*POLITICAL GEOGRAPHY.*—Syria has passed through many changes. Its ancient divisions were numerous, and constantly varying. The provinces of the Biblical Aram have already been noticed. [ARAM.] Phœnicia was generally regarded as a distinct principality [PHŒNICIA], and the warlike tribes of Lebanon appear to have remained almost in a state of independence from the earliest ages. [LEBANON.] The political divisions, as enumerated by Greek and Roman geographers, are indefinite and almost unintelligible. Strabo mentions five great provinces:—1. *Commagene*, a small territory in the extreme north, with Samosata for capital, situated on the Euphrates; 2. *Seleucia*, lying south of the former, was subdivided into four districts according to the number of its chief cities: (1.) Antioch Epidaphne; (2.) Seleucia, in Pieria; (3.) Apamea; and (4.) Laodicia. In the district of Antioch was another subdivision, situated near the Euphrates, and called Cyrrhestice, from the town Cyrrhestis, which contained a celebrated temple of Diana. Southward were two subdivisions (apparently) of Apamia, called Parapotamia and Chalcidice, bordering on the Euphrates, and inhabited by Scenitæ. The territory of Laodicia extended south to the river Eleutherus, where it bordered on Phœnice and Coelesyria. 3. *Calesyria*, comprising Laodicia ad Libanum, Chalcis, Abilene, Damascus, Iturea, and others farther south, included in Palestine; 4. *Phœnicia*; 5. *Judea* (*Geogr.* xvi. pp. 748, *seq.*)

Pliny's divisions are still more numerous than those of Strabo. It appears that each city on rising to importance gave its name to a surrounding territory, larger or smaller, and this in time assumed the rank of a province (Pliny, *H. N.* v. 14-21).

Ptolemy mentions thirteen provinces:—Commagene, Pieria, Cyrrhestica, Seleucis, Casiotis, Chalcibonitis, Chalcis, Apamene, Laodicene, Phœnicia, Coelesyria, Palmyrene, and Batanea, and he gives a long list of the cities contained in them. He excludes Palestine altogether (*Geogr.* v. 15).

Under the Romans Syria became a province of the empire. Some portions of it were permitted to remain for a time under the rule of petty princes,

dependent on the imperial government. Gradually, however, all these were incorporated, and Antioch was capital. Under Hadrian the province was divided into two parts:—*Syria Major* on the north, and *Syria-Phœnice* on the south. Towards the close of the 4th century another partition of Syria was made, and formed the basis of its ecclesiastical government: 1. *Syria Prima*, with Antioch as capital; 2. *S. Secunda*, with Apamea as capital; 3. *Phœnicia Prima*, including the greater part of ancient Phœnicia—Tyre was its capital; 4. *Phœnicia Secunda*, also called *Phœnicia ad Libanum*, with Damascus for capital ('Car. a St. Paul,' *Geog. Sac.* p. 287).

At the present time Syria forms a portion of three pashalics: Aleppo, Damascus, and Sidon.

THE CLIMATE of Syria greatly resembles that of Palestine. The summits of Hermon and Lebanon are crowned with perpetual snow, and the high altitudes along these ranges are as cool as the south of England; but on the other hand the low marshy plains of the interior are very hot. The seaboard being much exposed to the sun's rays, and sheltered by the mountains behind, is generally sultry and subject to fevers; but there are a few places—such as Sidon, Beyrout, and Suweidiyeh—where the soil is dry and the air pure. Rain is more abundant than in Palestine, and even during summer light showers occasionally fall in the mountains.

HISTORY.—Syria was colonised by two distinct sections of the human family, the *Canaanites* and *Arameans*. The former settled on the coast and on the heights of Lebanon, and had one inland station at Hamath. The latter occupied Damascus and spread over the remaining portions of the country (Gen. x.) In the time of King David Syria appears to have been divided into a number of independent kingdoms, of which Damascus and Zobah were the chief [ARAM]. On the conquest of the former by Tiglath-Pileser, Syria became a province of the great Assyrian empire.

Immediately after the battle of Issus, Syria passed into the hands of a different dynasty and a different race. Alexander the Great became its ruler. On his death (B.C. 323), the fortunes of war threw it into the power of Seleucus Nicator, the founder of the dynasty of the *Seleucidæ*. This prince built Antioch and made it his capital. Many other cities were erected by him and his successors on the throne; and their splendid ruins still exist as memorials of wealth and taste, long since departed from this unhappy land. From the commencement of the reign of the *Seleucidæ* till the year B.C. 114, Antioch remained sole capital. But at this period Antiochus Cyzicenus, brother of the reigning monarch, established a new sovereignty at Damascus. Disorder henceforth reigned in every section of the country, and did not cease until Syria was captured by the Romans under Pompey in B.C. 65. The dynasty of the *Seleucidæ* ruled Syria for a period of 247 years.

While a portion of Syria was placed directly under the Roman governors, several cities with territories attached to them were made free. They had their own rulers and their own laws, though subject to the imperial government, and paying regular taxes. Two of these, *Abilene* and *Damascus*, are mentioned in the N. T. Scaurus was the first of the Roman governors of Syria. He was styled *Quæstor pro Pratore*; his two successors

were *Pro-Prators*; then followed a *Proconsul*, a *Quæstor*, a *Proconsul*, a *Prætor*, and a *Proconsul*; but in the year A.D. 41 Antony gave the government to his general D. Saxa, with the title of *Legate*, which was henceforth borne by all the governors (Appian, *Syr.*) The country remained under Roman and Byzantine rule till A.D. 634, when it was overrun by the Mohammedans under Khaled. Sixteen years later Damascus was made the capital of the Mohammedan empire. The subsequent history of Syria has no connection with Biblical literature. In the 11th century the Crusaders entered it, captured its principal cities, with the exception of Damascus, and retained possession of them about a hundred years. For more than two centuries after the expulsion of the Crusaders, Syria was the theatre of fierce contests between the warlike hordes of Tartary and the Mamluke rulers of Egypt. At length, in A.D. 1517, it was captured by the Turks under Sultan Selim I., and has since remained a portion of the Ottoman empire.

The following are the leading authorities on the history, geography, and inhabitants of Syria:—Norisius, *Opera*, iii.; Clinton, *Fasti Hellenici*; Gibbon, *Decline and Fall*, etc.; Russell, *Nat. Hist. of Aleppo*; Pococke, *Description of the East*; Burckhardt, *Travels in Syria*; Chesney, *Euphrates Expedition*; Porter, *Damascus*, and *Handbook*; Thomson in *Bib. Sac.* vol. v.; Lyde, *The Asian Mystery*.—J. L. P.

SYRIAC VERSIONS. I. The old Syriac version of the Scriptures is often called the *Peshito*, a word which signifies *simple* or *single*, applied to the work to mark its freedom from glosses and allegorical interpretations. The version is *simple* and *literal*, unencumbered with allegorising additions, or mystical, glossarial expositions. *Peshito* is the same as the Chaldee פְּשִׁטָּה, distinguished from מְדִרְשָׁה, the simple and literal, opposed to the allegorical and mystical sense of the Jews.

Various traditions about its origin have been current among the Syrians, which partake of the fabulous. Jacob of Edessa, in a passage communicated by Gregory bar Hebræus, speaks of 'those translators who were sent to Palestine by the apostle Thaddeus, and by Abgarus king of Edessa' (Wiseman, *Horæ Syriacæ*, p. 103). This statement is improbable, notwithstanding the desire of Hävernicks to recommend it; and must be classed with the other accounts, such as that of Jesudad, that a part was translated in the time of Solomon for the use of Hiram and the Tyrians; or that it was made by Assa the priest, whom the Assyrian sent to the Samaritans. Ephrem the Syrian, in the 4th century, refers to the translation in such a manner as implies its antiquity. It seems to have been generally circulated in his time among the Syrians, and therefore he speaks of it as *our version*; which he would scarcely have done had it not obtained general authority. Besides, many expressions in it were either unintelligible to this father or very obscure; and he considered it necessary to explain terms and phrases for the use of his countrymen. Wiseman has given the principal passages in which Ephrem explains obscure words, and changes them for others (*Horæ Syriacæ*, pp. 122-136). Such circumstances are favourable to the idea of an early origin. Yet it was not

made in the 1st century, if the N. T. part be considered contemporaneous with the O. T. Michaelis is decidedly incorrect on this head. Nor can it be said with probability that it was made in the 2d century, except at its very close. The beginning of the 3d is most likely, A.D. 200. The comparatively late origin of the fourth gospel necessitates this conclusion.

With regard to the O. T. part, we incline to the opinion that it was made by Christians. Had it proceeded from Jews, or from a Jew, it would hardly have been so free from the glosses in which that people indulged. It would also have resolved anthropomorphisms as is done in the Septuagint; and exhibited less awkwardness in rendering the Levitical precepts. Many of the names of unclean animals are wanting in the Syriac of Lev. xi., and the Hebrew words are often retained, not because the translator did not understand them, but because he was negligent (Hirzel, *De Pent. vers. Syr. indole quam Peshito vocant comment crit-exeget.* p. 127, *et seqq.*). Besides, the Messianic passages show that no Jew translated them. Yet Simon, and most modern Jews, Frankel (*Vorstudien zur Septuaginta*, p. 183; *Ueber den Einfluss der palæst. Exegese*, p. 140), Rapoport (*Bicure ha-Shanah*, Jahrg. 1844, p. 37; *Erech Millin*, p. 254), Graetz (*Geschichte der Juden*, vol. iv. p. 554), and Perles (*Meletemata Peshitthoniana*) attribute its origin to Jews. The main argument adduced by Frankel and Rapoport is, that Midrashic elements are found in it, which is inconclusive, unless it could be shown that the Christians were free from Jewish influences and modes of interpretation. The necessity or motive for Jews undertaking such a version is not clear, because they had Targumic interpretations or versions which are essentially in the same dialect. Dathe conjectured that the translator was a Jewish Christian, which is possible, since the version does present evidences of Jewish influences upon it. But there is no need of resorting to an intermediate opinion of this nature.

Some have thought that the Septuagint was consulted by the authors of the Peshito. There is considerable resemblance between it and our version—not so much in single passages as in its general tenor—and the influence of the Greek is tolerably clear, notwithstanding the attempts of Hävernick and Herbst to explain it away. It may be true that in many difficult passages the two versions disagree; that the additions to the text, larger or smaller, which the LXX. have, are wanting in the Peshito, while the latter has additions and omissions of its own; and that some books are entirely free from the influence of the Greek (see Hirzel, pp. 100-124). But the Septuagint may have been used notwithstanding. It is not necessary that the opinion about the Greek having been used by the Syriac translator should include a general agreement in difficult passages, in insertions and omissions; or that the evidence should be as palpable in some books as in others. *A priori*, it is certainly probable that a translation so much used by Christians at that time should have been consulted. Nor is it easy to resist the conclusion that the person who translated the prophets had the LXX. before him. This fact is perceptible in the Pentateuch; in the historical and poetic books it is less so.

Some have thought that the translator also used Targums. Had he been a Jew or a Jewish

Christian this could be readily accounted for, even without having recourse to the supposition that the Targums were actually used; since Jewish modes of interpretation were prevalent in Palestine, and there would therefore be an approach to the Chaldaic *usus loquendi*. Gesenius and Credner argue very plausibly that the use of a Targum in different books is clear. But the passages they adduce are not convincing. Thus the former quotes Is.

xxxiii. 7, where the Syriac renders ܐܢܝܢ ܕܥܡܝܢ

ܐܢܝܢ, if he shews them, in the third person, the Chaldee having ܐܢܝܢ ܕܥܡܝܢ—i.e. ܐܢܝܢ ܕܥܡܝܢ as the Syriac read it; whereas the Chaldee should be read in the first person, ܐܢܝܢ. But the reading is corrupt here, because Ephrem has the first person, ܐܢܝܢ, which must have been originally in the

Peshito (*Commentar ueber den Jesaia*, vol. i. pp. 83, 84). The strongest argument against the use of any of our present Targums is that they were not then in existence. Elements embodied in them were current in Palestine, but they had not been wrought up and enlarged as they now are. One thing is certain, that the version was taken from the original Hebrew. In establishing this fact, external and internal arguments unite. The text at its basis is substantially the Masoretic one.

Eichhorn has tried to show, from the constituents of the version itself, that it proceeded from several persons. Without assenting to all his arguments, or attaching importance to many of his presumptive circumstances, we are disposed to agree with him in opinion—not that it was made in pieces at different times, but at the same time generally, as a work for the use of the Syrian churches. Tradition is favourable to this hypothesis, if tradition has any weight; and the words of Ephrem himself agree, where he says on Josh. xv. 28, 'Since those who translated into Syriac did not understand the signification of the Hebrew word' (Von Lengerke, *Comment. Critica de Ephrem. Syr. s. s. interprete*, p. 24). The Peshito contains all the canonical books of the O. T. The apocryphal ones were not originally included; but they must have been rendered into Syriac soon after, for Ephrem quotes them. In his day the books of the Maccabees were wanting, and the additions to Daniel.

The Peshito in the N. T. is part of the version on the O. T., and was made continuously with it. Bishop Marsh argues conclusively against Michaelis, that it did not appear till after the canon had been formed; but he errs in putting the close of the canon about the middle of the 2d century. It wants the second and third epistles of John, the second of Peter, the epistle of Jude, and the Apocalypse. Nor were these books originally a part of it, as Hug supposes, asserting that they gradually disappeared from it in the 4th century. Bertholdt has shown the reverse (*Einleit. Theil ii.* p. 635).

As the O. T. was made from the original Hebrew, the N. T. part was translated from the Greek.

In consequence of the variety observable in the mode of translating different books, Hug thinks that the N. T. proceeded from different hands;

and this is perhaps correct, for the Gospels and Acts hardly seem to have been rendered by the same person. Hug assigns it to the *κοινή* *ἑκδόσις*, or unrevised text. The old Latin and it belong to the most ancient period of the text, and therefore agree so strikingly. But the text was revised like that of the old Latin; which accounts for many modern or Constantinopolitan readings. The Peshito, as we have it, represents a mixed Greek text—the ancient basis appearing through the later revision. The centre of revision was Edessa, where it was made in the former half of the 5th century. Hence it may be said that the present text of the Peshito belongs to the early part of the 5th century. Griesbach's statement is exaggerated—'Diversis temporibus ad Græcos codices plane diversos iterum iterumque recognita esse videtur'—but he afterwards qualified it in his *Meltemata ii.* where he speaks of but *one* reviser, and says very correctly that it took place in the epistles more than in the gospels. The able remarks of Hug led to this partial retraction.\* Gregory Bar Hebræus says that the Peshito has an impure, rude, and inelegant diction. Passages to this effect from Gregory's grammar are given by Assemani (*Biblioth. Oriental.* ii. p. 279, *et seqq.*), to which Wiseman has added another. Perhaps Bar Hebræus thought it exhibited the impure dialect used by the inhabitants of Palestine and Lebanon, as distinguished from the pure and elegant dialect which prevailed at Edessa and in all ulterior Syria. But the version was not made in Palestine; and its language was pure and good at the time of its origin. The late period at which Bar Hebræus wrote helped to disqualify him for judging of language current so long before his day.

The O. T. Peshito was first printed in the Paris Polyglott, with a Latin translation by Gabriel Sionita. The MS. or MSS. from which this editor printed were imperfect, having not only many hiatuses, but being deficient in whole books, such as Esther and the Apocrypha. But the editor can hardly be blamed for defective MSS.; and the very fact that he left lacunæ as he found them, which Walton admits, militates against the truth of the statement that he filled up lacunæ 'ex proprio ingenio' (Walton's *Prolegomena*, ed. Dathe, p. 609). Walton pronounces a severe judgment on the work of the learned Maronite. The same text was afterwards printed in the London Polyglott, not more correctly, but rather less so, as Roediger rightly affirms. Walton, it is true, supplied the missing apocryphal books and Esther; but instead of making the text better from the three MSS. which he had, he contented himself with reproducing that of Sionita, and giving collations of the three by Thorndyke in the sixth volume of his Polyglott (see *Hallische Literatur Zeitung*, 1832, No. 5, p. 38). The edition published by Professor Lee in 1823, 4to, for the use of the British and Foreign Bible Society, is one of the best. According to the account given by the editor himself in the *Classical Journal* for 1821 (p. 245, etc.), he used two MSS. of Ussher, one of Pococke, one formerly belonging to Ridley, another lent him by Adam Clarke, and the Travancore MS. which Buchanan brought from the

East, besides consulting the works of Ephrem, which have many quotations, and Bar Hebræus. The only tolerable lexicon is Michaelis's enlarged reprint of Castell, published at Göttingen in two parts, 1788, 4to; for Bernstein did not live to publish more than one part of his long-expected lexicon. The Pentateuch was printed separately by Kirsch, 1787, 4to; and the Psalter at Mount Lebanon 1585, 1610; at Paris by Gabriel Sionita, 1625; at Leyden by Erpenius, 1625; and at Halle by Dathe, 1768.

The N. T. Peshito was first made known in Europe by Moses of Mardin, a Syrian priest, who was sent by Ignatius, patriarch of Antioch in 1552, to Pope Julius III. to acknowledge the supremacy of the Roman pontiff, and also to superintend the printing of the Syriac Testament. It was first published at Vienna in 1555 by John Albert Widmanstad, chancellor of Austria under Ferdinand I. Two MSS. were employed in it (duo vetustissima exemplaria; duo singularis fidei exemplaria). It wants of course the last two epistles of St. John, the second of Peter, the epistle of Jude, and the Revelation. It also wants John vii. 53–viii. 11; some words in Matthew x. 8 and xxvii. 35; two verses in Luke xxii.—viz. 17, 18; and 1 John v. 7, all which are absent from Syriac MSS. In 2 Cor. v. 8 it has *in the heaven of purity*, which is found in Nestorian sources alone; but it has the usual reading in Hebrews ii. 9, not the Nestorian one *χρῆσι θεοῦ*.

The best editions of the N. T. Peshito next to Widmanstad's are Leusden and Schaaf's, Lugd. Bat. 1708 or 1709, 4to; that prepared for the Bible Society by Professor Lee, London 1816, 4to, probably to supersede the Gospels and Acts in Syriac, with a Latin translation, 4to, published the preceding year under Buchanan's editorship, Broxbourne; and that of Greenfield, 12mo, 1828, based on Widmanstad, with a Syriac preface by Lee, and an imperfect collation of readings. The best lexicon, which also serves for a concordance, is Schaaf's, 1709, 4to. The Peshito has been translated into English by Etheridge, 1846, 1849, 12mo, 2 vols.; and better by Murdock, in 1 vol. 8vo, New York 1851.

A new critical edition of the Peshito is a desideratum. Materials are not wanting in the Ambrosian Library at Milan, the Vatican, the British Museum, and the Bodleian. Among the treasures collected out of the Nitrian desert, there is a MS. of the Peshito Pentateuch in the British Museum, 14,425, dated 464 A.D. There is another MS. of the gospels of the 6th or 7th century. We do not believe, however, that the oldest MS. varies much from the text usually printed; as a collation of various chapters in the 464 A.D. MS. has yielded only a few unimportant variations, chiefly in orthography.

II. L. de Dieu first published the *Syriac Apocalypse* from a MS. formerly in the library of the younger Scaliger, and afterwards in that of the university at Leyden (Ludgini Batav. 1627, 4to); reprinted with a Latin version and notes in his *Critica Sacra*, Amsterdam 1693, fol. What version this MS. contains, or to what age it belongs, is very uncertain. The subscription to the MS. says that it was written by Gaspar from the land of the Indians. Another MS. at Florence written by Gaspar states that it was copied in 1582 from an autographic copy of Thomas of Harkel (see White's

\* Verissime enim clar. Hugius animadvertit, versionem hanc a Diorthote quodam videri recognitam fuisse ac castigatam (pp. li. lii.)

preface to the Philoxenian edition, p. xv.) It may be part of the Harclean recension of the Philoxenian, as Ridley, Storr, Michaelis, and Bertholdt think. But it is of an inferior type. It has fewer Greek words than the Philoxenian, several compounds are not expressed, the Syriac orthography is followed in proper names, and the version is on the whole not so literal. The translator has made many blunders. Hence we are not inclined to believe it a part of the Philoxenian. Its critical value is small.

III. The character of the version of the four epistles, first printed by Pococke from a MS. in the Bodleian (Leyden 1630, 4to), betrays a later age than the Peshito. It belongs probably to the Philoxenian before the latter was revised by Thomas of Harkel. These unauthentic portions of the Peshito were put with the authentic books of that version in the Paris Polyglott, whence they were transferred to the London one.

IV. The story of the adulteress in John vii. 53-viii. 11 was added in the latter work from a MS. belonging to Ussher, which contained the Philoxenian not the Peshito.

After the Syrian church was divided into different sections, various recensions of the Peshito appeared. The recension of the Nestorians is often quoted in the scholia of Gregory Bar Hebræus, and extended no farther, according to Wiseman, than the points appended to the Syriac letters. The *Karkaphension recension* is also cited by the same writer, and was long supposed to be a separate version, till the researches of Wiseman at Rome brought its true character to light. From the examination of two codices at Rome he ascertained that it was a mere revision of the Peshito, distinguished by a peculiar mode of pointing and a peculiar arrangement of the books, but not departing essentially from the common text. In this recension Job precedes Samuel, and the minor prophets succeed Isaiah immediately. The Proverbs follow Daniel. The arrangement of the N. T. books is as singular. It begins with the Acts of the Apostles and ends with the four gospels; while the epistles of James, Peter, and John, come before the fourteen Pauline letters. This is a Monophysite recension. According to Assemani and Wiseman, the name Karkaphension means *mountainous*; because it was made about Mount Sigara, where there was a monastery of Jacobite Syrians.

V. Besides the Peshito, Gregory Bar Hebræus, in the preface to his *Horreum Mysteriorum*, mentions another version of the N. T., the *Philoxenian* or *Harclean*.

This second version was made from the Greek into Syriac in the city of Mabug; and is so called from Philoxenus or Xenayas bishop of Mabug, in Syria. There is some doubt about the part which that ecclesiastic had in the translation; and the testimony of Bar Hebræus is not uniform. In one passage he says that it was made *in the time of* Philoxenus; in his *Chronicon*, that it was done by *his desire*; and in another place of the same work, that it was his own production. Moses Aghelæus (Assemani, *Biblioth. Oriental.* ii. p. 83) states that its author was Polycarp, rural bishop of Philoxenus. In an Arabic MS., quoted by Assemani (ii. p. 23), Philoxenus is said by a Jacobite author to have translated the four gospels into Syriac. The truth seems to be that Polycarp, acting under his auspices, made the version; Philoxenus hoping to

advance the Monophysite tenets by a new translation. One thing is certain, that it was made between the years 485 and 518 of the Christian era, most probably in 508 A.D. No MS. of this version as it came from the hands of Polycarp has been yet discovered, unless the Codex Angelicus at Rome, containing the four gospels, be such, as Bernstein supposes. It is described by Adler (p. 59, etc.); and by Bernstein (in the *Kritische Anmerkungen* prefixed to his edition of John's Gospel); the latter of whom gives a collation of its readings in John i.-v. The MS. itself is attributed to the 11th century; but the subscription is by another hand, and seems to have been taken from a Harclean MS. A few fragments, constituting the marginal annotations of a very ancient Vatican codex, examined by Wiseman, and numbered 153, belong to the unrevised version also. The passages are printed in his *Horæ Syriacæ*, p. 178, *et seq.* Moses Aghelæus says that Polycarp rendered the Psalter also into Syriac. If so, his version of it must have soon disappeared.

In A.D. 616 Thomas of Harkel or Harclea, in Palestine, afterwards a monk in the monastery of Taril, and subsequently bishop of Mabug, revised it in the monastery of Anaton at Alexandria; from which recension nearly all our knowledge of it is derived.

A postscript to the gospels which most MSS. have, states that Thomas corrected the gospels after two (some MSS. have *three*) Greek codices. A like subscription relates that the Acts and catholic epistles were revised after one Greek MS. This work of emendation was completed in 616. The basis was the Peshito.

The text of the Philoxenian as revised by Thomas, is furnished with obeli and asterisks. Most of the MSS., too, have critical remarks and readings in the margin, which Wetstein and White have ascribed for the most part to Thomas himself. In this conclusion Hug and Bertholdt agree. But others infer, from the fact of a codex being found in the Medicean library at Florence without Thomas's subscription, and yet with these signs (the codex representing, in Adler's opinion, the Philoxenian before revision—*N. T. Versiones Syriacæ*, etc. p. 55), that the obeli and asterisks were as early as the time of Polycarp himself. We agree with White that the obeli and asterisks were meant to show the difference between the old text and the Greek MSS. with which it was collated, though Wetstein and Storr suppose them to relate to the comparison of the new with the old Syriac version. It is matter of regret that they have been so often changed, confused, and removed from their places by ignorant transcribers (Adler, *Novi Test. Versiones Syriacæ*, etc. p. 51); so that it is impossible to tell the exact state in which they were at first; or to assign them to their probable author. The similar procedure of Origen offers an analogy which Thomas might be supposed to imitate, were it not for the fact that an asterisk for the most part indicates a word or words which were wanting in the Greek; and an obelus that the Syriac requires something to be added which the Greek is without.

The character of this version, based upon the Peshito, is extreme literality. It was the translator's aim to prevent a syllable of the original from being lost. The Syriac idiom, therefore, has been often sacrificed by rigid adherence to the original Greek. Greek words are used, even

the Greek cases appear, the Greek article is imitated by pronouns, Greek etymology is represented, and Greek constructions are not unusual. In consequence of this slavish adherence to the original, the style is greatly inferior to that of the Peshito, though its critical use is greater. Judging by the Florentine MS., we should say that Thomas's corrections were neither numerous nor important. He did not make extensive alterations in the Philoxenian text.

About the time of Thomas's revisal of Polycarp's version, Paul of Tela made the Hexaplar Syriac from the Septuagint. It is difficult to tell the connection that existed between the two. The one may have executed the version of the O. T. to accompany the new recension of the N. T., or Thomas may have imitated the procedure of Paul.

The marginal readings are probably the most valuable part of the version in a critical view. One of the Greek MSS. compared by Thomas had considerable affinity to D in the gospels and Acts. Of 180 marginal readings about 130 are found in B C D L i. 33, 69, etc. With D alone of MSS. it harmonises nineteen times in the gospels; with D and B seven times. With the Alexandrian or A alone it agrees twice, but with it and others D L eight times. With the Vatican or B alone it harmonises twice, but with it and others four times (see Adler, pp. 130, 131).

The most complete MS. of the version yet known is one formerly belonging to Ridley, now in the library of New College, Oxford (see Ridley's *De Syriacarum novi Fœderis versionum indole et usu dissertatio*, London 1761). It contains all the books of the N. T. except the Apocalypse, and from the 27th verse of the 11th chapter of the epistle to the Hebrews to the end. All other MSS. yet known contain no more than the gospels. In 1778 White published the four gospels from Ridley's MS. 4to. In 1799 the Acts and catholic epistles followed; and in 1803 the Pauline epistles. The editor gave a Latin version and notes.

In 1853 Bernstein published in 8vo St. John's Gospel in the Harclean text from a Vatican MS., No. 271, which has neither asterisks, obeli, nor marginal notes; but it has the vowel-points, together with Kushoi and Rucocli. This edition is accompanied by valuable critical remarks containing descriptions of some MSS., and comparisons of readings.

VI. In 1858 Dr. Cureton published the 'Remains of a very ancient Syriac recension of the four gospels in Syriac, hitherto unknown in Europe,' with an English translation and preface, 4to. The gospels are arranged thus: Matthew, Mark, John, Luke, and many parts are wanting—all Mark's gospel except xvi. 17-20. It contains only Matt. i. 1-viii. 22; x. 32-xxiii. 25; Mark xvi. 17-20; John i. 1-42; iii. 6; vii. 37; xiv. 10-12, 16-18, 19-23, 26-29; Luke ii. 48-iii. 16; vii. 33-xv. 21; xvii. 24-xxiv. 44. The editor thinks that it is a very ancient form of the Syriac gospels, not a version altogether independent of the Peshito; one less revised after Greek MSS. This opinion is substantially correct. It is an older version than the Peshito; which the author or authors of the latter consulted throughout. There is a considerable resemblance of the one to the other, so that their mutual dependence is clear. Entire verses are contained in both which are identical; while in others a very slight difference exists. The pas-

sages in which this agreement is seen are very numerous (see Hermansen's *Disputatio de codice evangel. Syriaco*, pp. 22, 23). It is remarkable, too, that the identity of the two appears in some places where both depart from the Greek, and in the use of very rare words, as is exemplified in Luke ix. 5, and in xiii. 9 where is the singular rendering for *εἰς τὸ μέλλον*, ܐܠܝܢܐ. But their diversities are also striking and numerous. The very method of translation is different, being freer and looser in the Curetonian than the Peshito; neither so accurate nor so terse. The editor is mistaken in believing that St. Matthew was made from an Aramaean text representing very nearly the original Hebrew of St. Matthew's Gospel. It is all but certain that the proper original document of the apostle Matthew comprehended little more than the discourses of Jesus; and therefore that 'the Gospel according to the Hebrews' was a copious and free enlargement of it both from tradition and the Greek gospel. Hence we can never hope to get at the original memoirs compiled by St. Matthew through the Syriac version. Abundant proof lies in the recension itself that St. Matthew was translated from the Greek, like the other gospels. Thus in Matt. vi. 24, 'or should bear one,' shows that *ἀνθίσταται* was confounded with *ἀνέστηται*; and in Matt. xxi. 16, 'I will prepare praise' proceeded from a like exchange of *κατηρίσω* and *καταρίσω*. The weakness of the arguments adduced by Cureton is apparent. Thus in Matt. xiii. 48 the version has ܐܬܝܢ ܕܥܝܢܐ ܕܥܝܢܐ, *the fishes that were*

*good, good* or the best fishes. This is simply a free version of the Greek *τὰ καλά*, omitting *εἰς ἀγρία*, inserting *fishes*, which is not in the Greek, and making *good* the superlative by repetition. But Cureton supposes that the translator confounded *טובין*, *good*, with *במכין*, *into baskets*, which is a gratuitous and most improbable conjecture. Again, in Matt. xx. 11 this version has ܐܬܝܢ ܕܥܝܢܐ, *when they saw*, for the Greek *λαβόντες*, which is merely an incorrect translation. But Cureton conjectures very unfortunately that the Greek translator took *היו* from *אחיו* of the Hebrew for *היו*, dropping the *א*. *אחיו* could not have been used here for *λαβόντες*, but some other verb. In iii. 17, where the Greek has *οὗτός ἐστιν*, the Syriac has *thou art*, which Cureton accounts for by conjecturing that the Greek translator read *הו* *אית* instead of *הו* *אנת*, which he rendered *οὗτός ἐστιν* instead of *σὺ εἶ*. A translator could not be guilty of such gross ignorance. Nothing can be juster than Hermansen's remark, that the words usually adduced by the learned editor from the gospels to prove the Aramaean original of this Syriac Matthew 'are miserably twisted to serve a purpose.' There is so much uniformity in the version as to show that it was made by one person, from one language, not from two. And there are marks of antiquity about it which show an age prior to the Peshito. Probably it was a local version made for private rather than public use; perhaps in Palestine. It formed the basis of the Peshito, for there is evidence enough of the translators who made the latter having worked upon the basis of this one, but everywhere with the Greek before them. As the Peshito was meant for public use in the churches it is more correctly and competently done. The looseness of rendering, and the incompetence so often seen in this old ver-

sion, are less frequent in the later one. The text of the gospels represented in this Syriac MS. is that of the end of the 2d century, when it was made. It often agrees with B C D, and the old Latin version before it was corrected by Jerome, especially its MSS. a b c; with D most of all. Very seldom does it coincide with A. alone. Thus in Matt. xix. 9 the words *καὶ ὁ ἀπολελυμένην γαμή-σας, μοιχᾶται* are omitted, as in D a b e ff; and to the 28th verse a long passage is added which is only in D a b c d. It omits Matt. xvi. 2, 3, with B and two other uncial MSS.; though the old Italic has them as well as D. In xiii. 55 it has *Joseph* with B C the old Italic, Vulgate, and other authorities.

As to the critical value of this recension compared with that of the Peshito, it has many older and better readings than the latter. But it has also inferior ones. It is therefore unfair to the Peshito to select a number of texts in which the Curetonian Syriac readings are obviously better and more ancient; omitting the places in which it is the reverse. In Luke xxiv. the fortieth verse is omitted, contrary to the Peshito and the most ancient uncial MSS. A B N. In Matt. xxii. 35 *καὶ λέγων* is read by the Curetonian; but it is absent from the Peshito, which is supported by B and N. In Matt. vii. 22 the words 'have we not eaten and drunk in thy name?' are inserted without any MS. authority, apparently from Luke xiii. 26. In Matt. xi. 23 instead of the usual Greek text it has 'thou shalt not be exalted to heaven but;' contrary to all authority and betraying at the same time a Greek original with *μή*. In Matt. xxi. 9 it is added at the end, 'and many went out to meet him, and were rejoicing and praising God concerning all that which they saw,' words wholly unauthorised. In xxi. 23 *διδάσκοντι* is omitted without authority. In xxiii. 18 from *ὅς εἰν* to *ἔστω* are also left out, contrary to all external evidence. In Luke vii. 16 is the unauthorised addition 'he set forth another parable.' In Luke xi. 29 'except the sign of the prophet Jonas' is omitted, contrary to MSS. Luke xx. 12 is omitted without authority. In xxii. ver. 20 is wanting, and 19 is put before 17; *διδόμενον* is also absent in 19 without authority. In John v. 8 we have the addition 'go away to thy house.' So too in the ninth verse, 'and he took up his bed,' is omitted. In vi. 20 *μή φοβεῖσθε* are left out, against MS. authority. In Matt. i. 8 three kings are put in the verse, Ahazia, Joash, Amuzia, which are not in MSS., and are contrary to the 17th verse. The opinion of so late a writer as Bar Salibi about the omission of these names, or even that of Mar Yakub the Persian, is of no account against all MSS. and the context.

A good deal of importance is attached by Cureton to the fact of St. Matthew's Gospel having a title attached to it, *ܡܬܬܝܬܐ ܕܡܬܬܝܬܐ ܕܡܬܬܝܬܐ*,

whereas the others have none. There is a small hole in the vellum immediately before *ܡܬܬܝܬܐ*, not large enough to have admitted a Dolath. As to the meaning of *ܡܬܬܝܬܐ* it is difficult to decipher. 'The distinct gospel' gives little sense. Nor does it appear to signify *explained, interpreted or translated* after the analogy of *ܡܬܬܝܬܐ* in Neh. viii. 8; because the Hebrew word has not that meaning in the passage. It is highly improbable

that it denotes interpretation from one tongue into another. It cannot be a general title, because there is no space between the name of Matthew and it. There is not even room for a Dolath between them. The most probable supposition is that of Gildemeister, that it is an epithet of the apostle, denoting him to be a *separated* or *select* one. As a title of honour attached to his name, it may stand before as well as after it. This view has historical support, for in the Eastern church the epithet is applied to the apostle exclusively, *Matthew the chosen* (see *Zeitschrift der deutschen morgenländischen Gesellschaft*, vol. xiii. p. 472, et seq.)

It is unnecessary to notice the arguments of the *Abbé Lehir* (Etude sur ancienne version Syriaque des Evangiles récemment découverte et publiée, par le Dr. Cureton, Paris 1859), because they are mostly directed to the support of the view which Dr. Cureton advocates. As far as his remarks go, Ewald has written conclusively upon the recension, deciding, as all scholars who have critical sagacity must do, in favour of the Greek original of Matthew and the priority of the version to the Peshito (*Fachbücher der biblischen Wissenschaft*, vol. ix.)

VII. The *Jerusalem* or *Palestino-Syriac* version of the N. T. This was discovered by Adler in a Vatican MS. (No. 19). From the subscription to the MS. it seems to have been written in a monastery at Antioch A.D. 1030. The dialect is peculiar, uncouth, and barbarous, being a mixture of Chaldee and Syriac similar to that of the Jerusalem Talmud. The *character* is also peculiar, approaching the Hebrew letters, but not very different from the Estrangelo. Dolath usually wants the diacritic point. The letter Pe has two forms, according as it is pronounced *f* or *p*. The MS. is merely a *lectionary* or *evangelistarium* containing lessons from the four gospels for the Sundays and festivals in the year. The version was made from the Greek, probably in the 6th century, and could only have been local. It is difficult to tell whether it formed part of a more extended version, or was taken simply from a Greek evangelistarium. The latter view throws its origin too late—viz. not before the 8th century. The only complete passage published till recently was owing to Adler—viz. Matt. xxvii. 3-32; and scholars could only repeat or work upon what he gave. But the version has been published entire by Count Minischalchi Erizzo at Verona 1861, 1864, 2 vols. 4to; the first containing the text, with a Latin translation; the second, prolegomena and a glossary. We are grateful to Minischalchi for his beautiful edition of the MS.; but his prolegomena are disappointing; showing besides numerous mistakes, little capacity for criticism. Critical editors of the Greek Testament cannot now overlook this very valuable document, whose readings are so important. It contains the following portions of the gospels: all Matthew except iii. 12; v. 34-41; vi. 25-34; vii. 19-23; viii. 14-19; x. 9-15, 23-31, 34-36; xi. 16-26; xii. 1-29, 38-50; xiii. 1-43, 55-58; xiv. 1-13, 35-36; xv. 1-20, 29-31; xvi. 1-12, 20-28; xvii. 20, 27; xviii. 5-9, 11, 21, 22; xix. 1, 2, 13-15; xx. 17-28; xxi. 44-46; xxvi. 40-43; all Mark except i. 12-34, 45; ii. 13, 18-22; iii. 6-35; iv.; v. 1-23, 35-43; vi. 6-13, 31-56; vii. 1-23; viii. 1-26, 32, 33; ix. 1-15, 31, 41-50; x. 1-31, 46-52; xi. 1-21, 26-33; xii. 1-27; xiii., xiv.; xv. 1-15, 33-42; all Luke except i. 69-75, 77-79; iii. 23-38; iv. 1-15, 37-44; v. 12-16,

33-39; vi. 11-16, 24-30, 37-49; vii. 17, 18, 30-35; viii. 22-25, 40; ix. 7-26, 45-56; x. 13-15, 22-24; xi. 1-26, 34-54; xii. 1, 13-15, 22-31, 41-59; xiii. 1-10, 30-35; xiv. 12-15, 25-35; xv. 1-10; xvi. 1-9, 16-18; xvii. 1, 2, 20-37; xviii. 1, 15-17, 28-34; xix. 11-48; xx. 9-44; xxi. 5-7, 20-24, 37, 38; xxii. 40, 41, 46-71; xxiii. 1-31, 50-56; all John except ii. 23-25; iii. 34-36; iv. 1-4, 43-45; v. 34, 45, 46, 71; vii. 30-36; xi. 46, 55-57; xiii. 18-30; xix. 21-24.

As to the readings, it appears to us that they are such as characterised the 5th and 6th centuries. The text is not that of **S**, **B**, **Z**, or even **D**, but rather that of **A** and **C**. In Matt. vi. it has the doxology of the Lord's prayer which is not in **S**, **B**, **D**, **Z**; it has John vii. 53-viii. 11; contains John v. 3, 4; has the usual order of the 4 and 5 verses in Matt. v.; and has the later enlarged form of v. 44. It also contains the last 12 verses of Mark xvi., contrary to **S** and **B**; has *υλος νοτ θεος* in John i. 18; and in Matt. xxii. 35 has the later reading *καὶ λέγων*, omitted in **B**, **L**, and the Peshito. It has also *οἱ δώδεκα* in Luke xxii. 14, with **A**, **C**, **E**, etc., but contrary to **S**, **B**, **D**, the Curetonian, Syriac, and Italic. In John i. 27 it has the words *ἐμπροσθέν μου γέγονεν* contrary to **S**, **B**, **L**, and the Curetonian Syriac; but with **A**, **E**, **F**, etc., the old Italic, Vulgate, and Peshito. In Matt. xix. 17 it has the old and genuine *τί με ἐρωτᾷς περὶ τοῦ ἀγαθοῦ*; in John iii. 15 *μὴ ἀπόλθῃται* ἀλλὰ are omitted with **S**, and the Curetonian Syriac, **E**, etc. On the whole, while it is easy to see a number of the oldest readings in the text, such as those in **S**, **B**, the old Italic, **D**, etc., yet the readings of a later period prevail. Its text, though often differing from the Peshito, is neither older nor better. The Greek at its basis is not anterior to the 5th century. Nothing is more incorrect than the assertions of Minischalechi that Matthew's Gospel is the apostle's authentic one; and that the source of the version was anterior to and wholly different from, that of the Peshito.

VIII. *Hexaplar-Syriac*.—A version of the Septuagint into Syriac was made by Paul of Tela, at Alexandria, at the instigation of the Monophysite patriarch Athanasius, A.D. 617. It is from Origen's Hexaplar text, with his critical remarks, the margin having notes respecting various readings, fragments of the versions of Aquila, Theodotion, Symmachus, with scholia from Syriac and Greek writers.

The character of the version is extreme literalism. Every Greek word is rendered by a Syriac one, to the neglect of the laws of the language into which the version was made. This makes it very useful to the critic, and most important in restoring Origen's text. The Greek text at its basis agrees for the most part with the Codex Alexandrinus. But it often leans to the Vatican, and not seldom to the Complutensian texts. At other times it departs from all. Eichhorn has given copious examples of its peculiarities and uses; which are sufficient to prove its value in restoring the genuine text of the Septuagint as Origen left it.

Three MSS. containing this version, but none of them complete, have been known to scholars. That formerly possessed by Masius contained Joshua, Judges, Kings, Chronicles, Ezra, Esther, Judith, Tobit, and a considerable part of Deuteronomy, as we learn from his commentary on Joshua, which contains a Latin version of that

book (Antwerp 1574, fol.) This codex has disappeared. Another in the Ambrosian Library at Milan contains the Psalms, Job, Proverbs, Ecclesiastes, Canticles, the Wisdom of Solomon, Sirach, the twelve minor Prophets, Jeremiah, Baruch, Lamentations, Daniel, Ezekiel, Isaiah. A third MS. in the Paris Library has the fourth book of Kings. In 1787 Norberg published Jeremiah and Ezekiel from the Milan MS., with a Latin version. His transcript must have been very imperfect, judging from Bugati's remarks. In 1788 Bugati published Daniel. In 1820 the Psalms appeared, four years after his death, superintended by Cighera. In 1834, 1835, Middeldorff published in two volumes 4to, at Berlin, the four books of Kings, Isaiah, the twelve minor Prophets, Proverbs, Job, Canticles, Lamentations, and Ecclesiastes, with a commentary. The editor had only a faulty transcript of Norberg's, and did not collate the original. With the exception of Bugati's Daniel, none of these is well edited. Norberg's edition is very incorrect; nor is that of Middeldorff less so. In 1859 Rörðam issued *Libri Judicum et Ruth secundum versionem Syriaco-Hexaplaem ex codice Musei Britannici nunc primum editi, Græce translatis, notisque illustrati*, in two fasciculi, 1859, 1861, Copenhagen 4to. A competent scholar has undertaken the task of editing the remainder—Dr. Antonio Ceriani of Milan. In 1861 appeared his *Monumenta sacra et profana*, tom. i. fascic. i. Milan, containing, among other ancient documents, the Hexaplar-Syriac, Baruch, Lamentations, and the epistle of Jeremiah. In the preface, the learned editor states his intention to publish, from the Ambrosian MS. and others, the entire version, even the books printed before, of whose inaccurate execution he speaks in just terms. No more is yet published; and scholars must regret its being delayed by the issue of other ancient documents, such as those in tom. iii. fascic. i.

Most of the works on the literature of Syriac versions have been already quoted. In addition to them we may refer to Wichelhaus *De N. T. versione Syriaca antiqua*, etc., Halis, 1850; Lee's *Prolegomena to Bagster's Polyglot*; Bernstein's *Commentatio de Charklensi Novi Testamenti translatione Syriaca*, 1857; Reusch, *Syrus interpres cum fonte N. T. Græco collatus*, 1741; Storr's *Observationes super N. T. versionibus Syriacis*, 1772; Winer, *De usu vers. Syriacæ N. T. critico caute instituendo*, 1823; Loehlein, *Syrus ep. ad Ephesios interpres*, 1835; Michaelis, *J. D. Curæ in versionem Syriacam Actuum Apostolicorum*, 1755; Credner, *De prophetarum min. vers. Syr. quam Peshito vocant indole*, 1827; the Introductions of De Wette, Herbst, and Bleek, with Davidson's *Treatise on Biblical Criticism*, vol. ii.—S. D.

SYRO-PHŒNICIAN (Συροφονίσις, Συροφονικισσα), a native of Phœnicia Proper, called Syro or Syrian Phœnicia, from being included in the Roman province of Syria. It includes that part of the coast of Canaan, on the borders of the Mediterranean, in which the cities of Tyre and Sidon were situated; and the same country, which is called Phœnicie in the Acts, is in the Gospels called the coasts of Tyre and Sidon. The woman also described as Syro-Phœnician in Mark vii. 26, is in Matt. xv. 22 called a Canaanitish woman, because that country was still occupied by the descendants of Canaan, of whom Sidon was the

eldest son. Some MSS. read Σύρα Φωνίση, a Phœnician Syrian.

## T

TAANACH (תַּעֲנַךְ; Sept. Θανάκ), a royal city of the Canaanites (Josh. xii. 21), in the territory of Issachar, but assigned to Manasseh (Judg. i. 27; v. 19; Josh. xvii. 11-21; 1 Kings iv. 12). Schubert, followed by Robinson, finds it in the modern Ta'annuk, now a mean hamlet on the south side of a small hill, with a summit of table-land. It lies on the south-western border of the plain of Esdraelon, four miles south of Megiddo, in connection with which it is mentioned in the triumphal song of Deborah and Barak (Judg. v. 19). Schubert, *Morgenland*, iii. 164; Robinson, *Bib. Res.* iii. 156; *Bib. Sacra*, i. 76.

TAANATH SHILOH (תַּעֲנַת שִׁלֹּה; Sept. Θαναθ Σηλώ; Alex. Τηναθ Σηλώ), a place on the border-line of Ephraim (Josh. xvi. 6). In the *Onomasticon* it is placed between Neapolis and the Jordan, at the distance of ten Roman miles from the former. This would place it to the east of Shiloh; and it is probably the Θῆνα of Ptolemy, which he mentions along with Neapolis as the chief towns of Samaria (*Geog.* v. 16. 5). There is a place called Tāna N.E. of Migdel which some have identified with Taanath Shiloh, but without reason Robinson thinks (*Lat. B. R.* 295).—W. L. A.

TABBATH (טַבַּת; Sept. Ταβάθ; Alex. Γάβαθ), a place mentioned Judg. vii. 22, but which has not been identified. It may be the remarkable mound called *Tubukat-Fakil* (Robinson, *Later B. R.* iii. 321), which is in the same district in which the narrative would lead us to look for Tabbath.—W. L. A.

TABEAL (טַבְּעָל; *God is good*; Sept. Ταβεήλ), father of the unnamed person on whom Rezin king of Syria, and Pekah king of Israel, proposed to bestow the crown of Judah in case they succeeded in dethroning Ahaz (Is. vii. 6). Who 'Tabeal's son' was is unknown, but it is conjectured that he was some factious and powerful Ephraimite (perhaps Zichri, 2 Chron. xxviii. 7) who promoted the war in the hope of this result.

TABERAH, one of the stations of the Israelites in the desert. [WANDERING.]

TABERNACLE, THE (מִשְׁכָּן; *a dwelling*, אֹהֶל, *a tent*, σκηνή), called also TABERNACLE OF THE CONGREGATION (אֹהֶל מוֹעֵד), TABERNACLE OF WITNESS (אֹהֶל הָעֵדוּת), HOUSE OF THE LORD (בֵּית יְהוָה), SANCTUARY or HOLY PLACE (קֹדֶשׁ), מִקְדָּשׁ, ἁγίασμα, ἁγιαστήριον, τὸ ἅγιον, τὰ ἅγια), and, though rarely, TEMPLE OF THE LORD (הֵיכָל, יְהוָה, 1 Sam. i. 9; iii. 3; Ps. v. 8 [7]).

I. CONSTRUCTION AND HISTORY.—The first mention made in Scripture of the tabernacle as a holy place is in Exod. xxv., where are detailed the instructions which Moses received of the Lord when he was with him on the mount, concerning

the construction and furniture of the sanctuary. In these Moses was enjoined to follow closely the pattern (תַּבְּנִית, τὸ παραδέγμα) showed to him

by God. Whether we are to understand by this that God actually showed to Moses a *model* of the fabric he commanded him to rear, or only caused the *idea* of it to rise up clearly in his mind, is a question of little moment, so long as it is admitted that the plan of the fabric originated with God, and was by him communicated to Moses. The state in which Moses found the Israelites on his descent from the mount prevented the execution of this plan for some time; and in the interval a temporary substitute was provided in a tent which Moses caused to be pitched at a distance from the encampment of the people (Exod. xxxiii. 7). It has been supposed by some that this was the tent of Moses himself; but such a supposition seems inconsistent with the statement that it was at a distance from the camp, and that Moses went out to it and returned from it as did the rest (ver. 8, 9). To this tent the people went out when they sought to present themselves before God either in worship or to ask counsel of him. To Moses alone, however, appears to have been conceded the privilege of entering the tabernacle and enjoying immediate intercourse with God. To Joshua, his minister, the charge of keeping the tabernacle appears to have been entrusted (ver. 8-11).

After a season the tabernacle was erected according to the divine design. The materials for this erection were supplied by the free-will offerings of the people. They were of the most costly kind, consisting of gold, silver, and copper, cloths of the richest colours and finest fabric, the coarser fabrics of goats-hair cloth, rams' skins dyed red, and acacia wood, for the construction of the tabernacle; oil, spices, and sweet incense for the service of the sanctuary; and precious stones of various kinds to adorn the vestments of the priests (Exod. xxv. 3-7). To construct the tabernacle out of the materials thus collected, the skill of Bazaleel and Aholiab, men specially endowed by God with the necessary qualifications, was put in requisition; and under their directions, and by the labour of all the skilled artificers of the host, the work was accomplished (Exod. xxxv. 30, ff.). The entire structure with all its furniture was finished by the end of the first year of their wandering in the wilderness, and on the first day of the second year the tabernacle was set up and its services inaugurated with solemn pomp. The divine acceptance of the place which had been thus prepared for the habitation of the Lord was indicated by the settling down on it of a cloud, and the filling of it with the divine glory in such awful effulgence that even Moses dared not to enter the place (Exod. xl. 1, ff.).

As Moses describes minutely the construction of the tabernacle, it is easy to form a general conception of its form and arrangement. Josephus also describes it (*Antiq.* iii. 6), but he adds little to what the Bible supplies. The same may be said of Philo (*De Vit. Mosis*, Bk. iii.).

The tabernacle was an oblong rectangular structure, 30 cubits in length, 10 in height, and 10 in width. This is the measurement given by Josephus, and it agrees punctually with that of Moses. The only point that occasions difficulty is the statement that the end boards were eight in number, which

would give a width of 12 cubits. This, however, is easily explained. The measurements are of the *inner* side, and as the boards at the end would have to cover not only the space between the side boards, but also the ends of these, and as each board, according to Jewish tradition, was a cubit thick, we thus account for the number of cubits stated (outside width = 12 cubits; thickness of boards = 2 cubits; leaving 10 cubits for inside width). These corner boards were strongly coupled above and below to the sides, so as to be *flush* with them, and to keep all together. The framework of this structure was composed of acacia boards twenty in number on each side, and six at the west or inner end, with two corner boards, the east or outward end being left open. These boards were gilded; and they were fastened at the base by means of tenons which fitted into silver sockets; and they were kept together by means of bars of acacia wood, also gilded, which passed through rings of gold fastened in the upright boards. These bars were five in number on each side; but as to their arrangement there is some difference of opinion. Rashi thinks that the middle bar was twice the length of each of the other four, that it stretched from end to end of the side, and that the others were joined in pairs so as also to stretch the whole length of the side. Thus there were on each of the three sides an upper bar, consisting of two bars of equal length fitted to each other, an under bar the same, and a middle bar of one piece. This last Rashi thinks was made to pass through the centre of the boards, so as not to be visible from without—a statement which may or may not be accepted without affecting the other parts of this description. This view appears preferable to that commonly held, according to which all the five bars are supposed to have been of equal length, and to have run parallel to each other. In that case the description of the middle bar as one that was to reach from end to end would lose its significance, inasmuch as this would characterise all the bars. The arrangement described by Josephus, however, seems the most probable. He says: ‘Through the golden rings gilded bars were passed to unite the boards, the head of each bar being let into the head of another by means of tenons, after the manner of vertebrae made by an artificer. But, for the back, one entire bar passed through all the boards, and into it were fastened the ends of the side bars by sockets, so that the whole was firm.’ Something of this sort there must have been, else the back part of the structure would have been loose. An ingenious writer has recently started the hypothesis that the middle bar was a ridge-pole over which the coverings of the tent were hung (Smith, *Dict. of the Bible*, iii. 1452); but a bar which is described as the middle bar, which passed *בְּתוֹךְ הַקִּרְשִׁים* in the middle of (or between) the boards, could not be a pole passing above them, and forming the ridge of the roof.

The area thus formed was divided into two unequal portions, the outer one 20 cubits, the inner 10 cubits long. The latter was thus a cube of 10 cubits. This was the Most Holy place, into which the high-priest alone could enter. It was separated from the outer portion of the sanctuary by four pillars of acacia wood, gilded, on which was hung, by means of hooks of gold, a veil of the richest material, and most beautifully

adorned. At the outer entrance of the tabernacle there were five pillars of acacia wood, also gilded, and resting on bases of brass, on which was hung by golden hooks a veil adorned with needlework. This veil, Josephus says, came down to the middle of the pillars, and over it there was another of coarser materials, which served to protect it from the weather, and which could be drawn up with cords so as to afford a view of the more costly veil behind. Besides supporting the veils, these pillars probably contributed to the support of a framework on which the coverings of the roof were stretched.

No details are given either in the Bible or by Josephus of the construction of the roof; the coverings of it are alone mentioned. These coverings are minutely described by the historians. They were four in number. First came one made of ten curtains of delicate texture of byssus in various colours, and adorned with figures of cherubim; each curtain was 28 cubits in length, and 4 in breadth; they were hung five on each side, these being probably sewed together (Rashi on *Exod.* xxvi. 3), so as to form a sheet 20 cubits by 28, and the two sheets were coupled together by loops and taches of gold. The second covering was formed by eleven curtains of goats’ hair, each 30 cubits in length and 4 in breadth; these were fastened (probably sewed) together, five on one part, and six on the other; and the two sheets thus formed were to be joined by loops and taches of brass. The third covering was of rams’ skins dyed red, probably a kind of morocco leather (see this art.); and the fourth was of tachash skins [TACHASH]. The dimensions of these are not given in the Bible. Josephus says that they both projected so as to protect the other coverings from rain and sunshine; but Rashi and others are of opinion that the leather and skin coverings were only for the top, and did not reach to the sides. There is some countenance given to this by the

use of the word *כֹּלְמִעֲלָה*, ver. 14; but this probably applies only to the tachash skins, and may intimate that these were used to cover the places on the top where the curtains were joined.

Such were the coverings of the Tabernacle; the question now arises, how were they adjusted? Assuming that the roof of the Tabernacle was flat, we may suppose the arrangement to have been as follows:—First, we have two large curtains of byssus, each 20 cubits by 28; with which have to be covered two sides, each 30 × 10 cubits, and a roof also 30 × 10. Suppose then one curtain stretched from the front backwards it would cover 20 cubits of the roof, and hang down over 20 cubits in length of the sides; attached to this by the loops and golden taches the other curtain would cover the remaining 10 cubits of roof and wall, leaving a space uncovered at the base to show the silver sockets. This meets one condition of the text; it brings the juncture of the two curtains exactly over the veil at the entrance of the Holy of Holies (ver. 33); but it labours under the disadvantage of representing the costly innermost covering as concealed for two-thirds of its surface between the walls of the tabernacle and the outer covering of goats-hair cloth. This objection, however, may be obviated, as Bähr suggests, by supposing that the byssus curtain was made to cover the *inside* of the boards, so as to form a sort of

tapestry. On other grounds this is probable, and there is no serious objection to it; for though it has been asked, how could the same curtain cover both a flat roof and perpendicular wall? there seems no great difficulty in conceiving an adjustment of the framework of the roof by which this might be accomplished.

The byssus curtain being thus adjusted so as to cover the wall inside, which had else been left bare, and on this account unseemly, the goats-hair curtain was placed over it, but so as to fall down outside the walls. As this curtain had 11 pieces, there were 5 cubits to spare. The covering seems to have been so placed that one half of these was to the front and the other half to the back; and whilst the part at the back hung loose down (ver. 12), the part at the front was folded back, so as to form a kind of penthouse or projecting roof (*δερώματι παραλήσιον*, Joseph.) and sides. In this way a small portico was formed; and thus we get the three parts of which Josephus says the whole consisted. It is worthy of notice that while the byssus covering was only 28 cubits in length, this of goat's hair was 30; and that the difference between these two is just the difference between the inside and the outside measurement (allowance being made in the latter for the thickness of the boards, which was one cubit). This confirms the suggestion that the one hung within and the other without the walls.

Over these two coverings the covering of rams' skins and that of tachash skins were placed, probably as already suggested. The whole would thus present the appearance (if we may use so familiar an illustration) of a large bed, with its curtains hanging down.

Such is the idea which, in the general, has hitherto been entertained of the construction of the tabernacle. Another idea, however, has of late years been suggested which deserves to be noticed. Saalschütz (*Archäol. der Hebräer*, ii. 321, ff.), represents the hangings of the tabernacle as suspended in the form of a tent. He thinks the מִשְׁכָּן was properly the space enclosed by the boards of acacia wood; and that these formed the outer wall, so to speak, *within* which the tabernacle, the

הלל properly so called, was reared in the form of a peaked tent. Of this the byssus curtains, he supposes, formed the internal drapery, while the goats-hair curtains, covered with leather and tachash skins, formed the outer covering. The whole structure would thus present the appearance externally of a peaked tent, reared within a high palisade of wood, and open at the front. This representation has the advantage of allowing the ornamental curtain, and also the gilded boards with their golden rings and silver sockets, to be fully visible. There seems, however, one fatal objection to it—viz. that it does not provide for fulfilling the condition that the joinings of the curtains shall be over the pillars that separate the holy from the most holy place—a condition of essential significance. This objection does not apply, however, to the reconstruction proposed by Mr. Fergusson (*Smith's Dict. of the Bible*, art. 'Temple'), who has worked out the idea of a tent structure with his wonted skill and ingenuity; for, according to his idea, the roof of the tent was ridged not peaked, the coverings being suspended on a pole running from the foot of the structure to the back. The reader is referred to his article for drawings and details.

Such representations undoubtedly preserve better than the older ones the idea of a *tent*. It may be suggested, however, on the other side, that as the fundamental idea of the structure was that of a *house*—God's permanent residence among his people—it is not improbable that the structure was conformed rather to the model of one of the flat-roofed houses with which the Israelites were familiar than to that of a nomad's tent.

It has been objected to the traditional reconstruction of the tabernacle that a structure of this sort would not keep the rain from sinking into the interior, and that a heavy fall of snow would lodge a weight on the roof that would soon tear its coverings through. But Josephus seems to have considered the structure as thus arranged quite sufficient to stand against any meteorological influences to which it might be exposed; and his judgment as a native of that part of the world is of weight in such a matter. Nor need we suppose that any very large amount of skill would be required to provide against rain lodging on the roof so as to sink through into the interior. As for snow, there was doubtless strength enough in the framework of the roof to enable the coverings to bear such weight of that as there was any likelihood of being deposited on them in the Desert or the south of Palestine.

Within the tabernacle thus constructed were placed the Ark of the Covenant, over which were the cherubim within the Most Holy place, and in the sanctuary the table for the shewbread on the north side, and opposite to it the golden candlestick. [See these articles.]

The tabernacle was placed within an enclosure 100 cubits long by 50 wide, formed by hangings or byssus, fastened to pillars by silver hooks and fillets. The height of the pillars was 5 cubits, and their number was 10 for the west end, and for each of the sides 20; at the east, or entrance end, there were 3 pillars on each side of the entrance for which a space of 20 cubits was thus left. In this space 4 pillars were placed, and on these hung a curtain similar to that which was over the door of the tabernacle. Within this enclosure stood also the altar near to the entrance, and between it and the tabernacle was the laver (Exod. xxvii.)

So long as Israel was in the wilderness, the tabernacle formed the central point of their encampment. Around it were grouped the tribes according to a fixed order (Num. ii. 2). From it came the indication which determined whether the host was to rest or to march. So long as the glory of the Lord rested on it, the people knew that they had to remain where they were, but when that arose from it, they knew that the signal for their removing was given (Exod. xl. 36, 37; Num. ix. 17). The tabernacle was then taken to pieces, which were borne by the three Levitic families of Kohath, Gershom, and Merari [LEVITES], whilst the Aaronic household took charge of the covered treasures of the Most Holy place (Num. iv. 6-15).

On important occasions the congregation of the people was assembled before the door of the tabernacle. One memorable instance of this is recorded (Lev. viii.), on the occasion of the consecration of Aaron and his sons to the priestly office. This has of late been brought into special prominence from its being made the ground of an objection to the authenticity of the Pentateuch. The utter

impossibility of so placing 600,000 people before the door of the tabernacle as that they should see the ceremonial of the consecration, shows, it has been alleged, that this record is unhistorical and untrustworthy. To give force to this objection it is asserted that, had this mass of people been placed before the door of the tabernacle, they would have formed a column nearly 20 miles in length (Colenso, *The Pentateuch, etc., examined*, ch. vi.) Now it must strike one that, had the writer of Leviticus gravely made a statement involving such an absurdity as this, he must not only have been a very unfaithful historian, but a man not much above the level of a fool; nor can it fail to appear strange that successive generations, Jew and Christian, should have been studying this book without detecting or suspecting an absurdity so manifest as this. But waiving this, let us see whether the statement of the historian may not be so understood as to exempt it from such an outrageous violation of common-sense as has thus been imputed to it.

Moses says that 'all the congregation' was to be convened before the door of the tabernacle. Does this necessarily mean that *every* adult male must be present there? If we look to the usage of the same expression elsewhere, we shall be led to conclude that it is not so. From a comparison of passages, it appears that commands to convene the whole congregation of Israel were regarded as fulfilled by the assembling of the elders or princes of the congregation; comp. Exod. iii. 15 and 16; xii. 3 and 28; xix. 7 and 8; xxviii. 18, 19, with Deut. v. 23, 24; Deut. xxxi. 28 and 30, etc. The admirable organisation of the host of Israel facilitated their acting by means of a representative body composed of the head men of the tribes and families; and it probably no more occurred to an ancient Jew in reading such statements as that we are considering to suppose that every adult male was present, than it occurs to an Englishman of the present day when he reads that the British nation has done this or that, to imagine that the writer asserts that all the adult males of the United Kingdom were assembled in mass, and consented to the deed recorded. There is an old maxim with which our representative system has made us all familiar, 'Quod facit per alium facit per se'; and as the Jewish people were even more perfectly represented than we are, the idea of the whole congregation being present in and acting through their chiefs would be one so perfectly familiar to them that they would at once apply it to remove any such difficulty as the statement of the historian here is supposed to present (*Historical Character of the Pentateuch Vindicated*, by a Layman, p. 108).

If this way of explaining the historian's statement be refused, there is still a possibility of showing that that statement may be taken literally without involving such consequences as Bishop Colenso has suggested. 'The tabernacle would doubtless be pitched on some spot preferable for this purpose [that of allowing the people to witness the ceremony], or in front of a gentle acclivity. The hangings in the front of the court, and part of those on each side, would be withdrawn and folded toward the pillars, so that the altar of burnt-offering would be full in view. If the people, then, were disposed in a circular section, one third of a complete circle, or as far as 60° on each side of the front line, and densely packed with four square feet to each person, we should have  $\frac{1}{3} \pi r^2 = 2,400,000$ , and  $r =$

1514, or the furthest would be 505 yards from the altar, a distance of little more than a quarter of a mile. Even allowing four times the space, the furthest would only be a thousand yards distant, and from higher ground might easily follow the outline of the ceremonial' (Birks, *The Exodus of Israel*, p. 111). Even on the assumption, then, that all the adults were assembled, there is nothing incredible in the statement that they stood in the front of the tabernacle and saw the ceremony.

During the conquest of Canaan the tabernacle, at first moved from place to place (Josh. iv. 19; viii. 30-35; ix. 6; x. 15), was finally located at Shiloh (Josh. ix. 27; xviii. 1). Here it remained during the time of the Judges till it was captured by the Philistines, who carried off the sacred ark of the covenant (1 Sam. iv. 22). From this time forward the glory of the tabernacle was gone. When the ark was recovered, it was no longer placed in the tabernacle; though the latter still seems to have been regarded with veneration by the people, and to have retained the services of the priests (comp. 1 Sam. xxi. 1-6; xxviii. 4-6; 1 Chron. xvi. 13). Even after the ark was removed to Jerusalem and placed in a new tabernacle the old structure still had its hold on the veneration of the community, and the old altar still received their offerings (1 Chron. xvi. 39; xxi. 29). It was not till the temple was built, and a fitting house thus prepared for the Lord, that the ancient tabernacle was allowed to perish and be forgotten.

II. SYMBOLICAL AND TYPICAL SIGNIFICANCY.—As the central point of a great symbolical and typical institute, the tabernacle necessarily possessed, both as a whole and in its contents, a symbolical and typical significance. On this head much fanciful and unregulated ingenuity has been indulged; but this must not induce us to neglect those conclusions to which a just application of the principles of typological interpretation conduces.

The primary idea of the tabernacle was that of a dwelling for Jehovah in the midst of his people; and this was prominently kept in view in all the arrangements concerning the construction and location of the structure. 'Let them,' said God to Moses, 'make me a sanctuary that I may dwell among them' (Exod. xxv. 8; xxix. 45); when the structure was completed it was set up in the midst of the congregation, and there it always remained whether the people rested or were on their march (Num. ii.); on it rested the cloud which indicated the Divine presence, and which by its quiescence or removal indicated the will of the Great Sovereign of Israel as to the resting or the removing of the camp (Exod. xl. 36-38); and to it the people repaired when they had sacrifice to offer to God, or counsel to ask of Him (Lev. i. 3; Num. xxvii. 2; Deut. xxxi. 14, etc.) As Judaism was strictly monotheistic it knew but *one* sacred place where Jehovah was to be found. The Holy of Holies, which the apostle calls 'the second tabernacle' (Heb. ix. 7), was the appropriate residence of Jehovah as the God of Israel. In this the principal thing was the ark, in which was placed 'the testimony' (עֵדוּת), and which was covered by

'the mercy-seat' (כַּפֹּרֶת). The testimony was the book of the law, and it was put into the ark as a witness against the people because of their sinfulness (Deut. xxxi. 26, 27). This symbolised the great truth, that the first relation into which Jeho-

vah comes with the sinner, is that of a ruler whose law testifies against the transgressor. But this testimony was *hid* by the mercy-seat, on which the blood of atonement was sprinkled by the high-priest when he entered within the veil, and on which the visible emblem of Jehovah's presence—the *shechinah* between the cherubim of glory—was enthroned; and in this there was an emblem of the fact, that the condemning and accusing power of the law was taken away by the propitiatory covering which God had appointed. By all this was indicated the grand truth, that the character in which Jehovah dwelt among his people was that of a justly offended but merciful and propitiated sovereign, who having received atonement for their sins, had put these out of his sight, and would remember them no more at all against them (comp. Philo, *de Vit. Mos.*, Bk. iii.)

In the first, or outer tabernacle, were the altar of incense, the table with the shewbread, and the golden candlestick. The first was symbolical of the necessity and the acceptableness of prayer, of which the smoke of sweet incense that was to ascend from it morning and evening appears to be the appointed Biblical symbol (comp. Ps. cxli. 2; Luke i. 10; Rev. v. 8; viii. 3, 4). The second was emblematical of the necessity of good works to accompany our devotions; the bread being the offering of the children of Israel to their Divine King (Lev. xxiv. 8), and consecrated to him by the offering of incense along with it as emblematical of prayer. The third was the symbol of the church, or people of God; the gold of which it was formed, denoting the excellence of the church, the seven lamps its completeness, and the oil by which they were fed, being the appropriate symbol of the Divine Spirit dwelling in his people, and causing them to shine (comp. Zech. iv. 2, 3; Matt. v. 14, 16; Rev. i. 12, 20).

In the fore-court of the tabernacle stood the altar of burnt-offering, on which were offered the sacrifices of the people; and the laver, in which the priests cleansed their hands and feet before entering the holy place. The symbolical significance of these is too well known to need illustration. [OFFERINGS; PURIFICATION.]

Whilst the tabernacle was thus, in its different parts, *symbolical* of several important truths, there are certain things in Christianity of which it, by itself, contained the *types*.

If we view the tabernacle as a whole it was Jehovah's dwelling in the midst of his people, and that to which it answers under the new dispensation can be no other than the human nature of our Lord. He was 'God manifest in the flesh,' 'Immanuel,' God with us, and in him 'dwelleth all the fulness of the Godhead bodily' (1 Tim. iii. 16; Matt. i. 23; Col. ii. 9.) Hence St. John (i. 14), in speaking of his incarnation, says: 'The Word became flesh and *tabernacled* (*ἐσκήνωσε*) among us,' where the language evidently points to the ancient tabernacle as the symbolical residence of Jehovah; and in the book of Revelation (xxi. 5) the same apostle, in announcing the final presence of Christ, in his glorified humanity with his church, uses the expression: 'the *tabernacle* of God is with men.' From these statements of the N. T. we may hold ourselves justified in concluding that the ancient tabernacle, viewed in its general aspect as the dwelling of Jehovah, found its antitype in the human nature of Christ, in whom God really dwelt.

Viewed more particularly in its two great divisions, the tabernacle symbolised in its inner department the reign of Jehovah in his own majesty and glory, and in its outer department the service of God by propitiation and prayer. In keeping with this the writer of the Epistle to the Hebrews teaches us to regard the outer part of the tabernacle as more strictly typical of the person of Jesus Christ, and the inner of heaven, into which he has now entered. Thus he speaks of him (viii. 2) as now, in the heavenly state, 'a minister of the true [i.e. *real*, *ἀληθινῆς*, as distinguished from *symbolical*] tabernacle which the Lord pitched, and not man,' where the allusion seems to be partly to the fact that Christ is in heaven, and partly to the fact that he ministers there in human nature. Still more explicit is the language used in ch. ix. 11, where the writer, after speaking of the sacerdotal services of the ancient economy as merely figurative and outward, adds: 'But Christ having appeared as high-priest of the good things to come, by means of the greater and more perfect tabernacle not made with hands (that is, not of this creation), nor by means of blood of goats and calves, but by means of his own blood, entered once (for all) into the holy place, having obtained eternal redemption for us.' In interpreting this passage, we would follow those who take the whole as far as the words 'his own blood,' as the subject of the sentence, and consequently join the clauses depending from *διὰ* with *παραγεγνημένος*, and not with *εἰσῆλθεν*; for it seems to be more natural to suppose that the writer should say that it was by means of a more perfect tabernacle and a holier sacrifice that Christ became the high-priest of spiritual blessings, than that it was by these means that he entered into the holy place. The objection to this construction which Dean Alford urges, that 'in that case *οὐδέ* would be left without any preceding member of the negation to follow,' is of no weight, for it burdens the construction he adopts as much as that he rejects; and is to be obviated in either case by resolving *οὐδέ* into *καὶ οὐ* (see Meyer's note on ver. 12). Assuming this to be the proper construction of the passage, it seems clearly to represent the human nature of our Lord—that in which he made his soul an offering for sin—as the antitype of the ancient tabernacle in which the high-priest offered sacrifice; whilst the heavenly world into which he has entered as a high-priest was typified by the holy place into which the Jewish high-priest entered to appear in the symbolical presence of Jehovah. For further confirmation of this may be adduced ch. x. 20, where the writer, speaking of the privilege enjoyed by believers under the new dispensation of approaching God through Christ, says, we can do it 'by a new and living way which he hath inaugurated (*ἐνεκαίνισεν*) for us through the veil (that is, his own flesh).' The allusion here is undoubtedly to the ancient tabernacle service, and the truth set forth is, that as the high-priest of old went with sacrificial blood through the veil into the Holy of Holies, so we, as made priests unto God by Jesus Christ, may approach the immediate presence of Jehovah through that path which the Saviour has inaugurated for us by his death in human nature—that path by which he himself has preceded us as our great intercessor, and which is ever fresh and living for us. There may be some rhetorical confusion in this passage, but the general idea seems plainly this, that the

body of Christ, slain for us, affords us a passage by means of sacrifice into the presence of God, just as the first tabernacle with its services afforded an entrance to the high-priest of old into the Holy of Holies (comp. Owen and Bengel on the passages; and Hofmann, *Schriftbeweis*, ii. 1. p. 405, etc.; *Weissag. u. Erfüll.* ii. 189, ff.)

We have also N. T. authority for putting a typical significance on the capporeth or mercy-seat. Regarding this, we have the testimony of the apostle, when he says that 'God hath set forth his Son to be a propitiation (or mercy-seat) through the faith in his blood.' The word here used is *ἱλαστήριον*, which is the term employed by the LXX., by Philo, and by Paul himself (Heb. ix. 5) to designate the covering of the ark in the Holy of Holies. The application of it to our Lord, therefore, in this passage, is doubtless intended to intimate the analogy between him, as the true medium of propitiation between God and the sinner, and the mercy-seat, or symbolical covering of sin under the law.

Thus far we have N. T. evidence to guide us in the symbolical and typical meaning of the ancient tabernacle and its parts, and beyond this we do not think it safe to go.

(Lund, *Die alt. Jüdisch. Heiligtümer dargestellt*, fol. 1695, best edition by Wolf, Hamb. 1738; Lamy, *De Tabernac. Fœd.* fol. Par. 1720; Witsius, 'De Tabern. Levit. Mysteris' in his *Miscell. Sac.* L. 318; Bähr, *Symbolik des Mos. Cultus*, i. 55, ff.)—W. L. A.

TABERNACLES, THE FEAST OF (חג הסוכות; Sept. *ἑορτὴ σκηνῶν*; N. T. and Josephus *σκηνοπηγία*; Philo *σκηναί*), the third of the three great annual festivals, the other two being the feasts of Passover and Pentecost, on which the whole male population were required to appear before the Lord in the national sanctuary.

1. *Name and its signification.*—This festival is called—i. חג הסוכות, *ἑορτὴ σκηνῶν*, *feria tabernaculorum*; the *Feast of Tabernacles* (Lev. xxiii. 34; Deut. xvi. 13, 16; xxxi. 10; 2 Chron. viii. 13; Ezra iii. 4; Zech. xiv. 16, 18, 19), because every Israelite was commanded to live in tabernacles during its continuance (comp. Lev. xxiii. 43). ii. חג האסיף, *ἑορτὴ συντελεσας*, the *Feast of Ingathering* (Exod. xxiii. 16; xxxiv. 22), because it was celebrated at the end of the agricultural year, when the ingathering of the fruits and the harvest were completed. And iii. It is κατ' ἐξοχὴν, denominated יהוה יהוה, the *Festival of Jehovah* (Lev. xxiii. 39), or simply יהוה, *the Festival* (1 Kings viii. 2; 2 Chron. v. 3; vii. 8, 9; *Mishna, Shekalim*, iii. 1; *Succa*, ii. 6; *Rosh Ha-Shana*, i. 2; *Megilla*, iii. 5; *Taanith*, i. 1, 2), because of its importance, and of its being the most joyful of all festivals. The assertion of Winer (*Bibl. Realwoerterbuch*, s.v. 'Laubhüttenfest'), repeated by Keil (*Archäologie*, vol. i. sect. 85, note 3) and Bähr (*Symbolik*, ii. 660), that the Rabbins call this festival יום המרובה, *dies multiplicationis*, is incorrect. The *Mishna*, which Winer quotes in corroboration of this assertion, does not denominate this festival as such, but simply speaks of the many sacrifices offered on the first day thereof. The *Mishna* in question is as follows: 'If any one vows wine [for the Temple] he must not give less than three *logs*; if oil, not less than one *log*. . . . If he says, I do not know how much I have set

apart, he must give as much as is used on the day which requires most' (*Menachoth*, xiii. 5)—i.e. as is used on the first day of the festival [of Tabernacles] when it happens to be on a Sabbath, for on such a day there are more libations used than on any other day in the year, inasmuch as 140 *logs* of wine are required for the different sacrifices. After this, it need scarcely be added that the Rabbins never called the Feast of Tabernacles by this name.

2. *The time at which this festival was celebrated.*—The time fixed for the celebration of this festival is from the 15th to the 22d of *Tishri*=September, when the season of the year is changing for winter (τρεπομένου τὸ λοιπὸν τοῦ καιροῦ πρὸς τὴν χειμέριον ὥραν, Joseph. *Antiq.* iii. 10. 4). There were thus only four days intervening between this festival and the Great Day of Atonement. But though its duration strictly speaking was only seven days (Deut. xvi. 13; Ezek. xlv. 25), yet, as it was followed by a day of holy convocation, this festival is sometimes described as lasting eight days (Lev. xxiii. 36; Neh. viii. 18).

3. *The manner in which this festival was celebrated.*—As it is most essential, in describing the manner in which this festival was and still is celebrated, to distinguish between the Pentateuchal enactments and those rites, ceremonies, and practices, which gradually obtained in the course of time, we shall divide our description into three periods—viz. A. The period dating from the original institution of this festival to the Babylonish captivity. B. The period beginning with the return from Babylon, and terminating with the destruction of the Temple. And C. From the dispersion of the Jews to the present day.

A. THE PERIOD FROM THE INSTITUTION OF THIS FESTIVAL TO THE BABYLONISH CAPTIVITY.—The Mosaic enactments about the manner in which this festival is to be celebrated are as follows:—The Israelites are to live in tabernacles during the seven days of this festival, 'that your generations may know that I made the children of Israel to dwell in tabernacles when I brought them out of the land of Egypt' (Lev. xxiii. 42, 43). The first day alone, however, is to be a holy convocation (מִקְרָא קֹדֶשׁ), and a Sabbath or day of perfect cessation of business, on which no manner of secular work is to be done (Lev. xxiii. 35, 39); and all the able-bodied male members of the congregation, who are not legally precluded from it, are to appear in the place of the national sanctuary, as on Passover and Pentecost (Exod. xxiii. 14, 17; xxxiv. 23). On this day the Israelites are to take 'the fruit of goodly trees, with branches of palm trees, boughs of thick trees, and willows of the brook' (Lev. xxiii. 40), most probably to symbolise the different vegetation which grew in the different localities of their journey through the wilderness—viz. the palm-tree of the plain where the Israelites encamped, the willow at the mountain stream, from which God gave his people water to drink; and the designedly indefinite thick bush on the mountain heights over which they had to travel; whilst the fruits of the goodly trees represent the produce of the beautiful land which they ultimately obtained after their pilgrimages in the wilderness (Pressel in Herzog's *Real-Encyclopädie*, s. v. 'Laubhüttenfest'). As this festival, however, though symbolising by the several practices thereof the pilgrimage through the

wilderness, was nevertheless more especially designated to celebrate the completion of the harvest (למלך המצות) in the promised land, as typified by 'the fruit of the goodly trees' in contrast to the plants of the wilderness, the Israelites are enjoined 'not to appear before the Lord empty, but every one shall give as he is able, according to the blessing of the Lord thy God which he hath given thee' (Exod. xxiii. 15; Deut. xvi. 16, 17). Hence they are to offer burnt-offerings, meat-offerings, drink-offerings, and other sacrifices as follows:—On the first day, the burnt-offering is to consist of 13 bullocks, 2 rams, 14 lambs, and 1 kid of the goats for a sin-offering, with the appropriate meat and drink-offerings; the meat-offerings being  $\frac{10}{16}$  ephah of flour mingled with  $\frac{1}{2}$  hin of oil to each bullock,  $\frac{2}{10}$  ephah of flour mingled with  $\frac{1}{2}$  hin of oil to each ram, and  $\frac{1}{16}$  ephah of flour mingled with  $\frac{1}{2}$  hin of oil to each lamb; the drink-offering consisting of  $\frac{1}{2}$  hin of wine to each bullock,  $\frac{1}{2}$  hin of wine to each ram, and  $\frac{1}{2}$  hin of wine to each lamb (Num. xv. 2-11; xxviii. 12-14). The same number of rams and lambs, and one kid, are to be offered on the following days; the number of bullocks alone is to be reduced by one each day, so that on the seventh day only seven are to be offered (Num. xxix. 12-38). There are accordingly to be offered during the seven days in all 70 bullocks, 14 rams, 98 lambs, and 7 goats, with 33 $\frac{1}{2}$  ephahs of flour, 64 $\frac{1}{2}$  hins of oil, and 64 $\frac{1}{2}$  hins of wine. Moreover, the law is to be read publicly in the Sanctuary on the first day of the festival every Sabbatical year (Deut. xxxi. 10-13). The six following days—i.e. 16th-22d of *Tishri*—are to be half festivals; they were most probably devoted to social enjoyments and friendly gatherings, when every head of the family was to enjoy the feasts from the second or festival tithe with his son, daughter, man-servant, maid-servant, the Levite, the stranger, the fatherless, and the widow (Deut. xvi. 14). [TITHE.]

At the conclusion of the seventh day another festival is to be celebrated, denominated the *concluding day* (יום עצרת), the *eighth concluding day* (שמיני עצרת; Sept. ἑξῆς). Like the first day it is to be a holy convocation, and no manner of work is to be done on it. As it is not only the finishing of the Feast of Tabernacles, but the conclusion of the whole cycle of festival [FESTIVALS], the dwelling in the tabernacle is to cease on it, and the sacrifices to be offered thereon are to be distinct, and unlike those offered on the preceding days of Tabernacles. The burnt sacrifice is to consist of 1 bullock, 1 ram, and 7 lambs one year old, with the appropriate meat and drink offerings, and 1 goat for a sin-offering (Num. xxix. 36-38). The sacrifices, therefore, were to be like those of the seventh new moon and the Great Day of Atonement. Being, however, attached as an octave to the Feast of Tabernacles, the Sabbatical rest and the holy convocation, which properly belong to the seventh day of the Feast of Tabernacles, are transferred to it, and hence the two festivals are frequently joined together and spoken of as one composed of eight days. There is only one instance on record of this festival being celebrated between the entrance into the promised land and the Babylonish captivity (1 Kings viii. 2; 2 Chron. vii. 8-10 with Neh. viii. 17). No trace of any exposition of the Pentateuchal enactments

with regard to this festival is to be found till we come to the post-exile period.

#### B. THE PERIOD FROM THE RETURN FROM BABYLON TO THE DESTRUCTION OF THE TEMPLE.

—In the account of the first celebration of this festival after the return of the Jews from the Babylonish captivity, the concise Pentateuchal injunction is expanded. Not only are the localities specified in which these booths are to be erected, but additional plants are mentioned, and the use to be made of these plants is stated. The Jews, according to the command of Ezra, made themselves booths upon the roofs of houses, in the courts of their dwellings, in the courts of the sanctuary, in the street of the water-gate, and in the street of the gate of Ephraim, from the olive-branches, the pine-branches, the myrtle-branches, the palm-branches, and the branches of the thick trees, which they were told to gather, and dwell in these booths seven days (Neh. viii. 15-18). The Sadducees of old, who are followed by the Karaites, took these boughs and the fruits to be identical with those mentioned in Lev. xxiii. 39, 40, and maintained that these were to be used for the construction and adornment of the booths or tabernacles. The Pharisees and the orthodox Jewish tradition, however, as we shall see hereafter, interpreted this precept differently.

When the Feast of Tabernacles, like all other festivals and precepts of the Mosaic law, began to be strictly and generally kept after the Babylonish captivity, under the spiritual guidance of the Great Synagogue, the Sanhedrim, and the doctors of the law—scribes, more minute definitions and more expanded applications of the concise Pentateuchal injunction were imperatively demanded, in order to secure uniformity of practice, as well as to infuse devotion and joy into the celebration thereof, both in the temple and in the booths. Hence it was ordained that the tabernacle or booth (סוכה = *Succa*) must be a detached and temporary habitation, constructed for the sole purpose of living in it during this festival, and must not be used as a permanent dwelling. The interior of it must neither be higher than twenty cubits, nor lower than ten palms; it must not have less than three walls; it must not be completely roofed in, or covered with any solid material, but must be thatched in such a manner as to admit the view of the sky and the stars; and the part open to the rays of the sun must not exceed in extent the part shaded by the cover. It must not be under a tree; neither must it be covered with a cloth, nor with anything which contracts defilement or does not derive its growth from the ground (*Mishna Succa*, i. 1-ii. 7). Every Israelite is to constitute the *Succa* his regular domicile during the whole of the seven days of the festival, whilst his house is only to be his occasional abode, and he is only to quit the booth when it rains very heavily. Even a child, as soon as he ceases to be dependent upon his mother, must dwell in the booth; and the only persons exempt from this duty are persons deputed on pious missions, invalids, nurses, women, and infants (*Mishna*, *ibid.* ii. 8, 9). The orthodox Rabbins in the time of Christ would not eat any food which exceeded in quantity the size of an egg, out of the booth (*Mishna Succa*, ii. 5).

The four species of vegetable productions to be used during prayer (Lev. xxiii. 39, 40) are the next distinctive feature of this festival to which the ancient

doctors of the law before the time of Christ devoted much attention. These are—i. 'The fruits of the goodly tree' (פרי עץ הדר). As the phrase *goodly* or *splendid tree* (עץ הדר) is too indefinite, and the fruit of such a tree may simply denote the fruit of any choice fruit-tree, thus leaving it very vague; the Hebrew canons, based upon one of the significations of הדר (*to dwell, to rest*; see Rashi on Lev. xxiii. 40), decreed that it means the *fruits which permanently rest upon the tree*—i.e. the *citron*, the *paradise-apple* (אחרוני). Hence the rendering of Onkelos, the so-called Jerusalem Targum, and the Syriac version of הדר by *Ethrog* (= κίτρον, Joseph. *Antiq.* xiii. 13. 5), *citron*. The *ethrog* must not be from an uncircumcised tree (Lev. xix. 23), nor from the unclean heave-offering (comp. Num. xvii. 11, 12); it must not have a stain on the crown, nor be without the crown, peeled of its rind, perforated, or defective, else it is illegal (*Mishna Succa*, iii. 5, 6). ii. 'Branches of palm-trees' (כפת תמרים). According to the Hebrew canons, it is the shoot of the palm-tree when budding, before the leaves are spread abroad, and whilst

it is yet like a rod, and this is called *Lulab* (לולב), which is the technical expression given in the Chaldee versions and in the Jewish writings for the Biblical phrase in question. The *Lulab* must at least be three hands tall, and must be tied together with its own kind (*Mishna Succa*, iii. 1, 8; Maimonides, *Iad Ha-Chezaka*, *Hilchoth Lulab*, vii. 1). iii. 'The bough of a thick tree' (ענף עץ עבה). This ambiguous phrase is interpreted by the ancient canons to denote 'the myrtle-branch' (הדרם) whose leaves thickly cover the wood thereof: it must have three or more shoots around the stem on the same level of the stem, but if it has two shoots opposite each other on the same level, and the third shoot is above them, it is not thick, but is called (עבורת שוטה) a *thin myrtle* (*Succa*, 32 b; Maimonides, *ibid.* vii. 2). This explanation accounts for the rendering of the Chaldee paraphrases of this phrase by *Hadas* (הדרם) = *myrtle-branch*. If the point of this myrtle branch is broken off, or if its leaves are torn off, or if it has more berries on it than leaves, it is illegal (*Mishna Succa*, iii.

2); and *iv.* 'The willows of the brook' (ערבי נחל) = *salix helix* must be of that species the distinguishing marks of which are dark wood, and long leaves with smooth margin. If any one of these four kinds has been obtained by theft, or comes from a grove devoted to idolatry, or from a town which has been enticed to idolatry (comp. Deut. xiii. 12, etc.), it is illegal (*Mishna Succa*, iii. 1-5). Their legality having been ascertained, the palm, the myrtle, and the willow are bound up together into one bundle, denominated *Lulab* (לולב).

It has already been remarked that the Sadducees in and before the time of Christ maintained that the boughs and fruit here mentioned (viz. Lev. xxiii. 40) are to be used for the construction and adornment of the booths, and that they appeal to Neh. viii. 15, 16 in support of this view. This view has not only been espoused by the Karaite Jews, the successors of the Sadducees [SADDUCEES], but is defended by Bishop Patrick, Keil, and most modern Christian interpreters. Against this, however, is to be urged that—i. The obvious sense of the injunction (Lev. xxiii. 40) is that these boughs are to be carried as symbols during

the rejoicing, and that we should expect something more, explicit than the single and simple word ולקחתם, and ye shall take, had it been designed that these boughs should be employed for the construction of the booths. ii. The *fruit* (פרי)—as the margin of the A. V. rightly has it, and not *boughs*, as it is in the text with which this injunction commences—could surely not be among the materials for the construction of the booths. iii. The law about the booths is entirely separated from the ordering of the fruit and boughs, as may be seen from a comparison of Lev. xxiii. 40 with 42. iv. The first day of this festival, as we have seen, was a holy convocation, on which all manner of work was interdicted. It is therefore against the sanctity of the day to suppose that the command to take the fruit and the boughs on the first day (ביום הראשון) meant that the Israelites are to construct with these plants the booths on this holy day: and v. The appeal to Neh. viii. is beside the mark, inasmuch as different materials are there mentioned—*ex.gr.* olive-branches and pine-branches—which were actually used for making the booths, whilst the *Hadar* fruit and the willow specified in the Pentateuchal injunction are omitted. With the regulations about the tabernacles and the boughs or *Lulab* before us, we can now continue the description of the mode in which this festival was celebrated in the temple.

14th of Tishri was the *Preparation Day* (ערב יום טוב = παρασκευή). The pilgrims came up to Jerusalem on the day previous to the commencement of the festival, when they prepared everything necessary for its solemn observance. The priests proclaimed the approach of the holy convocation on the eve of this day by the blasts of trumpets. As on the Feasts of Passover and Pentecost, the altar of the burnt-sacrifice was cleansed in the first night-watch (*Mishna Joma*, i. 8), and the gates of the temple, as well as those of the inner court, were opened immediately after midnight for the convenience of the priests who resided in the city, and for the people who filled the court before the cock crew to have their sacrifices and offerings duly examined by the priests (*Mishna*, *ibid.* i. 8). When the first day of Tabernacles happened on the Sabbath, the people brought their palm branches or *Lulabs* on the 14th of Tishri to the synagogue on the temple mount, where the servants of the synagogue (חזנים) deposited them in a gallery, whilst the *Lulabs* of the elders of the synagogue (וקנים) were placed in a separate chamber, as it was against the Sabbatical laws to carry the palms on the Sabbath from the booths of the respective pilgrims to the temple.

15th of Tishri.—At daybreak of the first day of the festival a priest, accompanied by a jubilant procession and by a band of music, descended with a golden pitcher holding three logs to the pool of Siloam, and having filled it with water from the brook, he endeavoured to reach the temple in time to join his brother priests who carried the morning sacrifice to the altar (*Tosiphta Succa*, cap. iii.) Following in their steps, he entered from the south through the water-gate into the inner court (*Mishna Middoth*, ii. 6; *Gemara Succa*, 48 a). On reaching the water-gate, he was welcomed by three blasts of the trumpet. He then ascended the steps of the altar with another priest who carried a pitcher of wine for the drink-offering. The two priests turned to the left of the altar where two silver

basins were fixed with holes at the bottom; the basin for the water was to the west, and had a narrower hole, whilst the one for the wine was to the east, and had a wider hole, so that both might get empty at the same time. Into these respective basins they simultaneously and slowly poured the water and the wine in such a manner that both were emptied at the same time upon the base of the altar. To the priest who poured out the water the people called out, Raise thy hand! The reason for this is, that when Alexander Jannai, who officiated as priest, was charged with this duty, being a Sadducee and rejecting the ordinances of the Scribes, he poured the water over his feet and not into the basin, whereupon the people pelted him with their *ethrogs* or citrons. At this catastrophe, which nearly cost the life of the Macca-bæan king, Alexander Jannai called for the assistance of the soldiers, when nearly 6000 Jews perished in the temple, and the altar was damaged, a corner of it being broken off, in the struggle which ensued (Joseph. *Antiq.* xiii. 13. 5; *Mishna Succa*, iv. 9; *Gemara*, *ibid.* 48 a; 51 a; Graetz, *Geschichte der Juden*, vol. iii. pp. 112; 473 ff. 2d ed. Leipzig 1863). [SCRIBES.] The ceremony of drawing the water was repeated every morning during the seven days of the festival.

At the same time that the priests went in procession to the pool of Siloam, another jubilant multitude of people went to a place outside Jerusalem called *Moza* (מוצה), which abounded in willows. These willows they gathered with great rejoicing, carried them into the temple amidst the blasts of trumpets, and placed them at the altar in such a manner that their tops overhung and formed a sort of canopy (*Mishna Succa*, iv. 5). The decorating process of the altar being finished, the daily morning sacrifice was first offered, *Musaph* (מוסף); then the additional or special sacrifice for this festival, prescribed in Num. xxix. 12-38, which on the first day consisted of a burnt-offering of 13 bullocks, 2 rams, and 14 lambs, with the appropriate meat and drink offering, and a goat for a sin-offering, and then the peace-offerings, the vows, and the free-will offerings, which constituted the repast of the people (*Jerusalem Succa*, v.). Whilst these sacrifices were being offered the Levites chanted the *Great Hallel*, as on the feasts of Passover and Pentecost. On this occasion, however, each of the pilgrims held in his right hand the *lulab* or palm to which were tied the twigs of myrtle and willow, as described above, and the *ethrog* or citron in his left, whilst these Psalms were being chanted, and during the chanting of Ps. cxviii. the pilgrims shook their palms three times—viz. at the singing of verses 1, 25, and 29 (*Mishna Succa*, iii. 9). When the *Musaph* chant was finished, the priests in procession went round the altar once, exclaiming: Hosanna, O Jehovah; give us help, O Jehovah, give prosperity! (Ps. cxviii. 25). Whereupon the solemn benediction was pronounced by the priests, and the people dispersed amidst the repeated exclamations: 'How beautiful art thou, O altar!' or 'To Jehovah, and thee, O altar, we give thanks!' (*Mishna Succa*, iv. 5; *Gemara*, *ibid.* 44 b, 45). Each one of the pilgrims then betook himself to his respective booth there to enjoy his repast with the Levite, the stranger, the poor, and the fatherless, who shared his hospitality. This practice explains the remarks of the evangelists (Matt. xxi. 8, 9, 15; John xii. 12, 13). It is to be remarked that on the

first day of the festival every Israelite carried about his *lulab* or palm all day; he carried it into the synagogue, held it in his hand whilst praying, and only laid it down when called to the reading of the law, as he then had to hold the scroll [SYNAGOGUE]; carried it with him when he went to visit the sick, and comfort the mourners (*Succa*, 41 a; Maimonides, *Iad Ha-Chezaka*, *Hilchoth Lulab*, vii. 24).

16th-20th of Tishri.—These days were half-holy-days, they were called the middle days of the festival

(חול מועד = μεσοστής τῆς ἐορτῆς, John vii. 14), or the lesser festival (מועד קטן). Any articles of food or raiment required for immediate use were allowed to be purchased privately during these days, and work demanded by the emergencies of the public service, or required for the festival, the omission of which entailed loss or injury, was permitted to be done [PASSOVER]. On the night of the 15th, and on the five succeeding nights, the rejoicing of the drawing of water (שמחת בית השואבה) was celebrated in the court of the temple in the following manner.—The people assembled in large masses in the court of the women at night after the expiration of the first day of the festival. The women occupied the galleries, which were permanent fixtures in the court (*Mishna Middoth*, ii. 15), while the men occupied the space below. Four huge golden candelabras were placed in the centre of the court; each of these candelabras had four golden basins and four ladders, on which stood four lads from the rising youths of the priests, with jars of oil wherewith they fed the basins, whilst the cast-off garments of the priests were used as wicks. The lights of these candelabras illuminated the whole city. Around these lights pious and distinguished men danced before the people with lighted flambeaux in their hands, singing hymns and songs of praise; whilst the Levites, who were stationed on the fifteen steps which led into the women's court and corresponded to the fifteen Psalms of degrees = steps (Ps. cxx.-cxxxiv.), accompanied the songs with harps, psalteries, cymbals, and numberless musical instruments. The dancing as well as the vocal and instrumental music continued till day-break. Some of these pious men performed dexterous movements with their flambeaux whilst dancing for the amusement of the people. Thus it is related that R. Simon II. (A.D. 30-50), son of Gamaliel I., the teacher of the apostle Paul [EDUCATION], used to dance with eight torches in his hands, which he alternately threw up in the air and caught again without their touching each other or falling to the ground (*Tosiphta Succa*, cap. iv.; *Jerusalem Succa*, v. 4; *Babylon*, *ibid.* 53 a). It is supposed that it was the splendid light of this grand illumination which suggested the remark of our Saviour: 'I am the light of the world' (John viii. 12). Towards the approach of day two priests stationed themselves with trumpets in their hands, at the upper gate leading from the court of the Israelites to the court of the women, and awaited the announcement of daybreak by the crowing of the cock. As soon as the cock crew, they blew the trumpet three times, and marched out the people of the temple in such a manner that they had to descend the ten steps, where the two priests again blew the trumpets three times, and when they reached the lowest step in the outer court they for the third time blew the trumpets three times. They continued to blow as they were marching across the court till they

reached the eastern gate. Here they turned their faces westward towards the temple, and said: 'Our fathers once turned their back to the sanctuary in this place, and their faces to the east, and worshipped the sun towards the east (comp. Ezek. viii. 15, 16); but we lift up our eyes to Jehovah.' Whereupon they returned to the temple, whilst the people who were thus marched out went to their respective booths. Some however formed themselves into a procession and went with the priests to the pool of Siloam to fetch the water, whilst others returned to the temple to be present at the morning sacrifice (*Mishna Succa*, v. 2-4; Maimonides, *Iad Ha-Chezaka*, *Hilchoth Succa*, viii. 12-15). The Talmud maintains that the ceremony of the drawing of water is anterior to the Babylonian captivity, and that Is. xii. 3 refers to it (*Succa*, 48 b). Indeed it is only on this supposition that the imagery in Is. xii. 3 obtains its full force and significance. As to the import of this ceremony ancient tradition furnishes two explanations of it. *i.* Since the Feast of Tabernacles was the time of the latter rain (Joel ii. 23), the drawing and pouring out of the water was regarded as symbolical of the forthcoming rain which it was ardently desired might be blessed to the people. Hence the remark that he who will not come up to the Feast of Tabernacles shall have no rain (*Succa*, 48, 51; *Rosh Ha-Shana*, 16; *Taanith*, 2 a). And *ii.* It was regarded as typical of the outpouring of the Holy Spirit. Hence the remark: 'It is called the house of drawing the water, because from thence the Holy Spirit is drawn in accordance with what is said (Is. xii. 3), 'with joy shall ye draw water out of the wells of salvation' (למה נקרא שמה בית שואבה שמים)

שואבים רוח הקודש על שם ושואבתם מים בששון מועדי הששון, *Jerusalem Succa*, v. 1). It is upon this explanation that our Saviour's remark is based (John vii. 37-39), in allusion to this ceremony on this last day of the festival when it was performed for the last time. The mode in which the sacrifices were offered in the middle days of the festival, the use of the palm and the citron, the procession round the altar, etc. etc., were simply a repetition of the first day of the festival, with this exception, however, that the number of animals diminished daily, according to the prescription in Num. xxix. 12-38, and that the *Lesser Hallel* was chanted by Levites instead of the *Great Hallel* [HALLEL]. A peculiarity connected with the sacrificial service of this festival must here be noticed. On all other festivals only those of the twenty-four orders of the priests officiated upon whom the lot fell (comp. 1 Chron. xxiv. 7-19), but on the seven days of Tabernacles the whole of the twenty-four orders officiated. On the first day the thirteen bullocks, two rams, and one goat were offered by sixteen orders, whilst the fourteen sheep were offered by the other eight. As there was one bullock less offered each of the seven days, one order of priests left each day the sixteen orders, who offered these bullocks and joined those who offered the fourteen lambs. Hence 'on the first day six of these orders offered two lambs each, and the other two orders one lamb each. On the second day five orders of the priests offered two lambs each, and the other four orders one lamb each. On the third day four orders offered two lambs each, and six orders one lamb each. On the fourth day three orders offered two lambs each, and eight orders one lamb each. On the fifth day

two orders offered two lambs each, and ten orders one lamb each. On the sixth day one order offered two lambs each, and twelve orders one lamb each; whilst on the seventh day, when the orders of priests who sacrificed the bullocks had diminished to eight, fourteen orders offered one lamb each' (*Mishna Succa*, v. 6).

*21st of Tishri.*—The seventh day, which was designated the last day of the Feast of Tabernacles (יום טוב האחרון של חג, *Mishna Succa*, iv. 8), was especially distinguished in the following manner from the other six days:—After the *Musaph* or special festival sacrifice of the day, the priests in procession made seven circuits round the altar (*Mishna Succa*, iv. 5), whereas on the preceding days of the festival only one circuit was made. The willows (ערבה) which surrounded the altar were then so thoroughly shaken by the people that the leaves lay thickly on the ground. The people also fetched palm branches and beat them to pieces at the side of the altar (*Mishna*, *ibid.* iv. 6). It is from this fact that the last day of the festival obtained the names of the Day of Willow (יום ערבה, *Mishna Succa*, iv. 1), the Great Hosanna Day (יום הושענה נא רבה), and the Branch-thrashing Day (יום הכות חריות), *Mishna*, *ibid.* iv. 6). Herzfeld suggests that the thrashing of the willows and palms may have been to symbolise that after the last verdure of the year had served for the adornment of the altar the trees might now go on to cast off their leaves (*Geschichte des Volkes Israel*, ii. 125). As soon as the thrashing process was over, the children who were present, and who also carried about the festive nosegays, threw away their palms and ate up their *ethrogs* or citrons (*Mishna Succa*, iv. 7); whilst the pilgrims, 'in the afternoon of this day, began to remove the furniture from the Tabernacles in honour of the last day of the festival' (*Mishna*, *ibid.* iv. 8), as the obligation to live or eat in the booths ceased in the afternoon of the seventh day, inasmuch as the Feast of Tabernacles itself had now terminated. Mr. Clark, the writer of the article 'Tabernacles, Feast of,' in Smith's *Dict. of the Bible*, is therefore mistaken when he says that 'the Hebrews left their huts and dismantled them on the morning of the eighth day.' Besides, the eighth day, as we shall presently see, was a holy convocation, whereon no manner of work was allowed to be done, and the Hebrews could no more dismantle their huts on this day without desecrating it than on the Sabbath. It must also be remarked that this last day of the festival, this Great Hosanna day, was regarded as one of the four days whereon God judges the world (*Mishna Rosh Ha-Shana*, i. 2; *Gemara*, *ibid.*). There can, therefore, be but little doubt that when St. John records the memorable words uttered by Christ (ἐν τῇ ἐσχάτῃ ἡμέρᾳ τῇ μετὰ τῆς ἑορτῆς) in the last great day of the festival (John vii. 37) he meant this distinguished day.

*22d of Tishri.*—The eighth day—which, as we have seen, was a separate festival—was a day of holy convocation whereon no manner of work was allowed to be done. After the daily morning sacrifice and the private offerings of the people, the sacrifices prescribed in Num. xxix. 36-38 were offered, during which the great Hallel was chanted by the Levites. At the sacrifices, however, the twenty-four orders of priests were no longer present, but lots were cast as on other festivals, and that

order upon whom the lot fell, offered the sacrifices (*Mishna Succa*, v. 6). The Israelites dwelt no longer in the booths on this day, the joyful procession for the drawing of water was discontinued, the grand illumination in the court of the women ceased, and the palms and willows were not used any more.

It only remains to be added that when the Feast of Tabernacles fell on a Sabbatical year, the reading of portions of the law (Deut. xxxi. 10-13) was afterwards confined to one book of the Pentateuch. [SABBATICAL YEAR.] This arose from the multiplication of synagogues in which the law was read every week, thus rendering it less needful to read extensive portions in the temple during this festival, inasmuch as the people had now ample opportunities of listening in their respective places of worship to the reading of the law and the prophets. Hence also the reading of the law, which in olden days took place in the last hours of the forenoon of every day of this festival, was afterwards restricted to one day. It was at last assigned to the high priest, and ultimately to the king [SABBATICAL YEAR].

C. FROM THE DISPERSION OF THE JEWS TO THE PRESENT TIME.—Excepting the ordinances which were local and belonged to the temple and its sacrificial service, and bating the exposition and more rigid explanation of some of the rites so as to adapt them to the altered condition of the nation, the Jews to the present day continue to celebrate the Feast of Tabernacles as in the days of the second temple. As soon as the Day of Atonement is over every orthodox Israelite, according to the ancient canons, begins to erect his booth in which he and his family take up their temporary abode during this festival. Each paterfamilias also provides himself with a *lulab*=palm, and *etrog*=citron, as defined by the ancient canons. On the eve of the 14th of *Tishri* (which in this year, 1865, is October 4), or of the Preparation Day (ערב סוכות), the festival commences. All the Jews, attired in their festive garments, resort to the synagogue, where, after the evening prayer (מעריב) appointed in the liturgy for this occasion, the hallowed nature of the festival is proclaimed by the cantor (חזן) in the blessing pronounced over the cup of wine (קידוש). After the evening service every family resorts to its respective booth, which is illuminated and adorned with foliage and diverse fruit, and in which the first festive meal is taken. Before, however, anything is eaten, the head of the family pronounces the sanctity of the festival over a cup of wine. This sanctification or *Kiddush* (קידוש) was ordained by the men of the Great Synagogue [SYNAGOGUE, THE GREAT], and as there is no doubt that our Saviour and his apostles recited it we shall give it in English. It is as follows:—‘Blessed art thou, O Lord our God, King of the Universe, who hast created the fruit of the vine! Blessed art thou, O Lord our God, King of the Universe, who hast chosen us from among all nations, hast exalted us above all tongues, and hast sanctified us with thy commandments. In love, O Lord, thou hast given us appointed times for joy, festivals, and seasons for rejoicing; and this Feast of Tabernacles, this time of our gladness, the holy convocation, in memory of the exodus from Egypt; for thou hast chosen us, and hast sanctified us above all nations, and hast caused us to inherit thy holy festivals with joy and rejoicing. Blessed art thou, O Lord, who hast sanctified Israel and the

seasons! Blessed art thou, O Lord our God, King of the Universe, who hast sanctified us with thy commandments, and hast enjoined us to dwell in booths! Blessed art thou, O Lord our God, King of the Universe, who hast preserved us alive, sustained us, and brought us to the beginning of this season!’ Whereupon each member of the family washes his hands, pronouncing the prescribed benediction whilst drying them, and all enjoy the repast. The orthodox Jews sleep in the booths all night. The following morning, which is the first day of the festival, they again resort to the synagogue, holding the palms and citrons in their hands. They lay them down during the former part of the prayer, but take them up after the eighteen benedictions [SYNAGOGUE, THE GREAT], when they are about to recite the *Hallel* [HALLEL]. Holding the palm in the right hand and the citron in the left, they recite the following prayer: ‘Blessed art thou, O Lord our God, King of the Universe, who hast sanctified us with thy commandments, and hast enjoined us to take the palm-branch!’ Whereupon each one turns his citron upside-down and waves his palm-branch three times towards the east, three times towards the west, three times towards the south, and three times towards the north. The legate of the congregation [SYNAGOGUE] pronounces the following benediction: ‘Blessed art thou, O Lord our God, King of the Universe, who hast sanctified us with thy commandments, and hast enjoined us to recite the *Hallel*!’ and the *Hallel* is chanted; when they come to Ps. cxviii. the waving of the palm-branch is repeated at the first, tenth, and twenty-fifth verses, just as it was done in the temple. Two scrolls of the law are then taken out of the ark (ארון) and brought on the platform (במה), when the lessons for the first day of the festival are read out from the law: Lev. xxii. 26–xxiii. 44; and Num. xxix. 12–16, as *Maphthir*; and from the prophets Zech. xiv. 1–21; in the manner described in the article HAPHTARA in this Cyclopædia. After this the *Musaph* prayer is recited, which corresponds to the *Musaph* or additional sacrifices in the temple for this special festival. When the legate of the congregation, in reciting the *Musaph*, comes to the passage where the expression *priests* (כוהנים) occurs, the Aaronites and the Levites arise, and after the latter have washed the hands of the former, the priests with uplifted hands pronounce the sacerdotal benediction (Num. vi. 24–27) upon the congregation, who have their faces veiled with the *Talith* [FRINGED GARMENT]. The ark of the Lord is then placed in the centre of the synagogue, when the elders form themselves into a procession headed by the legate, who carries the scroll of the law, and all the rest carry the palm branches in their hands and walk round the ark once repeating the *Hosanna*, and waving the palms in commemoration of the procession round the altar in the temple (Maimonides, *Iad Ha-Chezaka*, *Hilchoth Lulab*, vii. 23). When the morning service is concluded the people betake themselves to their respective booths to partake of the festive repast with the poor and the stranger. In the afternoon, about five or six o’clock, they again resort to the synagogue to recite the *Mincha* (מונחה) prayer, answering to the daily evening sacrifice in the temple. As soon as darkness sets in or the stars appear, the second day of the festival commences, the Jews having doubled the days of holy convocation [FESTIVAL]. The evening prayer,

as well as the practices for this evening, resemble those of the first evening.

The ritual for the second day in the morning, as well as the rites, with very few variations, are like that of the first day. The lesson, however, from the prophets is different, for on this day 1 Kings viii. 2-21 is read. After the afternoon service of this day the middle days of the festival begin, which last four days, when the ritual is like that of ordinary days, only that a few prayers bearing on this festival are occasionally inserted in the regular formulæ, lessons from the law are read on each day as specified in the article HAPHTARA, and the above-named procession goes round the ark. The seventh day, which is *the Great Hosanna* (הוֹשַׁעְנָה רַבָּה), is celebrated with peculiar solemnity, inasmuch as it is believed that on this day God decrees the weather or rather the rain for the future harvest (*Mishna Rosh Ha-Shana*, i. 2; *Gemara*, *ibid.*) On the evening preceding this day every Israelite prepares for himself a small bunch of willows tied up with the bark of the palm; some of the pious Jews assemble either in the synagogue or in the booths to read the book of Deuteronomy, the Psalms, the Mishna, etc., all night, and are immersed before the morning prayer. When the time of morning service arrives, numerous candles are lighted in the synagogue, and after the *Shachrit* (שַׁחֲרִית) = morning prayers, which is similar to that of the previous day, seven scrolls of the law are taken out of the ark, and from one of them the lesson is read. The *Musaph* or additional prayers are then recited; thereupon a procession is formed headed by the Rabbi and the legate with the palms in their hands, and followed by those who carry the seven scrolls of the law. This procession goes seven times round the ark which is placed in the middle of the synagogue, or round the reading-desk, reciting the Hosannas, in accordance with the seven circuits around the altar which were performed in the temple on this day, and waving their palms at certain expressions. The palms are then laid down, and every one takes up his bunch of willows, and beats off its leaves at a certain part of the liturgy, in accordance with the beating off the leaves from the willows around the altar in the temple, which took place on this day. On the evening of the seventh day the festival commences which concludes the whole cycle of festival (יְשִׁמְיֵי עֲצֵרֶת). It is a day of holy convocation, on which no manner of work is done, and is introduced by the *Kiddush* (קִידּוּשׁ) = proclamation of its sanctity, given in the former part of this article. On the following morning the Jews resort to the synagogue, recite the morning prayer (שַׁחֲרִית), as in the first two days of the feast of Tabernacles, inserting however some prayers appropriate for this occasion. Whereupon the special lesson for the day is read [HAPHTARA], the *Musaph* (מוֹסַף) or additional prayer is offered, and the priests pronounce the benediction in the manner already described. The people no longer take their meals in the booths on this day. On the evening of this day again another festival commences, called *the Rejoicings of the Law* (שִׂמְחַת תּוֹרָה). After the reciting of the Eighteen Benedictions, all the scrolls of the law are taken out of the ark, into which a lighted candle is placed. A procession is then formed of the distinguished members, who are headed by the legate; they hold the scrolls in their hands, and go around the reading-desk; the scrolls are then put back into the ark,

and only one is placed upon the desk, out of which is read the last chapter of Deuteronomy, and to the reading of which all persons present in the synagogue are called, including children. When the evening service is over the children leave the synagogue in procession, carrying banners with sundry Hebrew inscriptions. On the following morning the Jews again resort to the synagogue, recite the Hallel after the Eighteen Benedictions, empty the ark of all its scrolls, put a lighted candle into it, form themselves into a procession, and with the scrolls in their hands, and amid jubilant songs, go round the reading-desk. This being over, the scrolls of the law are put back into the ark, and from one of the two which are retained is read Deut. xxxiii., whereunto four persons are at first called, then all the little children are called as on the previous evening, and then again several grown-up people are called. The first of these is called *the Bridegroom of the Law* (חַתָּן תּוֹרָה), and after the cantor who calls him up has addressed him in a somewhat lengthy Hebrew formula, the last verses of the Pentateuch are read; and when the reading of the law is thus finished all the people exclaim הוֹזֵק, *be strong!* which expression is printed at the end of every book in the Hebrew Bible, as well as of every non-inspired Hebrew work. After reading the last chapter of the law, the beginning of Genesis (i. 1-ii. 3) is read, to which another one is called who is denominated *the Bridegroom of Genesis* (חַתָּן בְּרֵאשִׁית), and to whom again the cantor delivers a somewhat lengthy Hebrew formula; the *Maphtir*, consisting of Num. xxix. 35-xxx. 1, is then read from another scroll; and with the recitation of the *Musaph*, or additional special prayer for the festival, the service is concluded. The rest of the day is spent in rejoicing and feasting. The design of this festival is to celebrate the annual completion of the perusal of the Pentateuch, inasmuch as on this day the last section of the law is read. Hence the name of the festival, '*the Rejoicing of finishing the Law*' [HAPHTARA].

4. *Origin and import of this Festival.*—Like Pentecost, the Feast of Tabernacles owes its origin to the harvest, which terminated at this time, and which the Jews in common with other nations of antiquity celebrated as a season of joy and thankfulness for the kindly fruit of the earth. This is undoubtedly implied in its very name, *the Feast of Ingathering*, and is distinctly declared in Exod. xxiii. 16: 'Thou shalt keep . . . the feast of ingathering in the end of the year when thou hast gathered in thy labours out of the field' (comp. also Lev. xxiii. 39; Deut. xvi. 13). With this agricultural origin, however, is associated a great historical event, which the Jews are enjoined to remember during the celebration of this festival, and which imparted a second name to this feast—viz. 'Ye shall dwell in booths seven days . . . that your generations may know that I made the children of Israel to dwell in booths when I brought them out of the land of Egypt' (Lev. xxiii. 42, 43), whence its name '*the Feast of Booths or Tabernacles*.' The Feast of Tabernacles, therefore, like Passover, has a twofold significance—viz. it has a reference both to the annual course of nature and to a great national event. As to the reason for connecting this pre-eminently joyous festival of ingathering with the homeless dwelling of the Israelites in booths in the wilderness, we prefer the one given by the ancient Jews to theories advanced by modern commen-

tators. In the midst of their great joy—when their houses are full of corn, new wine, oil, and all good things, and their hearts overflow with rejoicing—the Israelites might forget the Lord their God, and say that it is their power and the strength of their arm which have gotten them this prosperity (Deut. viii. 12, etc.) To guard against this the Hebrews were commanded to quit their permanent and sheltered house and sojourn in booths at the time of harvest and in the midst of general abundance, to be reminded thereby that they were once homeless and wanderers in the wilderness, and that they are now in the enjoyment of blessings through the goodness and faithfulness of their heavenly Father, who fulfilled the promises made to Abraham, Isaac, and Jacob. This idea was still more developed after the Babylonish captivity, when the canons about the building of the booths were enacted. The booths, as we have seen, were to be covered in such a manner as to admit the view of the sky and the stars, in order that the sojourners therein might be reminded of their Creator, and remember that, however great and prosperous the harvest, the things of earth are perishable and vanity of vanities. This is the reason why the Scribes also ordained that the Book of Ecclesiastes should be read on this joyous festival [ECCLESIASTES].

5. *Literature*.—The *Mishna Tractate Succa*; the *Jerusalem and Babylonian Gemaras* on this *Mishna*; Dachs, a learned Swiss orientalist, published a Latin version of the *Babylon Gemara on Succa*, with erudite annotations and extracts from the Jewish Rabbins on this festival, Utrecht 1726; Maimonides, *Iad Ha-Chezaka, Hilchoth Lulab*; Meyer, *De Temp. et Festis Diebus Hebræorum*, p. 317, etc., Utrecht 1755; Bähr, *Symbolik des Mosaischen Cultus*, vol. ii. pp. 624 ff., 652 ff., Heidelberg 1839; Herzfeld, *Geschichte des Volkes Israel*, vol. ii. pp. 120 ff., 177 ff., Nordhausen, 1857; *The Jewish Ritual* entitled *Derech Ha-Chajim*, pp. 214 b ff., 295 ff., Vienna 1859; Keil, *Handbuch der biblischen Archäologie*, p. 412 ff., 2d ed., Frankfort-on-the-Maine 1859.—C. D. G.

TABITHA (Ταβιθά, טַבִּיטָּה = Heb. צִבְיָה, *gazelle*), the Aramæan name of a Christian female, called in Greek Dorcas (Δορκάς), resident at Joppa, whose benevolent and liberal conduct, especially in providing the poor with clothing, so endeared her to the church in that place that on her death they sent for Peter, then six miles off at Lydda, imploring him to come to them. Why they sent is not stated. It is probable that they desired his presence to comfort and sustain them in their affliction. That they expected he would raise her from the dead is less likely, as the apostles had not yet performed such a miracle, and as even Stephen had not been restored to life. But the apostle, after fervent prayer to God in the chamber of death, bade the corpse arise; on which Tabitha 'opened her eyes, and when she saw Peter she sat up.' This great miracle was not only an act of benevolence, but tended to give authority to the teaching of the apostles, and to secure attention for the doctrines which they promulgated (see Acts ix. 36-42).—J. K.

TABOR (תְּבוֹר; Ταβόρ; Θαβώρ; Ἰραβύριον).

1. A mountain on the confines of Zebulun and Naphtali, standing out in the north-east border of

the plain of Esdraelon, the name of which appears among Greek and Roman writers in the forms of Itabyrion and Atabyrion, and which is now known by the name of جبل طور, *Jebel Tur*. It is men-

tioned in Josh. xix. 22; Judg. iv. 6; viii. 18; Ps. lxxxix. 12; Jer. xli. 18; Hos. v. 1). Mount Tabor stands out alone and eminent above the plain, with all its fine proportions from base to summit displayed at one view. It lies at the distance of two hours and a quarter south of Nazareth. According to the barometrical measurements of Schubert, the height of Tabor above the level of the sea is 1748 Paris feet, and 1310 Paris feet above the level of the plain at its base. Seen from the south-west, it presents a semi-globular appearance; but from the north-west it more resembles a truncated cone. By an ancient path, which winds considerably, one may *ride* to the summit, where is a small oblong plain, with the foundations of ancient buildings. The view of the country from this place is very beautiful and extensive. The mountain is of limestone, which is the general rock of Palestine. The sides of the mountain are mostly covered with bushes, and woods of oak trees (*illex* and *agilops*), with occasionally pistachio trees, presenting a beautiful appearance, and affording a fine shade. There are various tracks up its sides, often crossing one another. The ascent usually occupies an hour, though it has been done in less time. The crest of the mountain is table-land, of some six or seven hundred yards in height from north to south, and about half as much across; and a flat field of about an acre occurs at a level of some twenty or twenty-five feet lower than the eastern brow. There are remains of several small ruined tanks on the crest, which still catches the rain-water dripping through the crevices of the rock, and preserves it cool and pure, it is said, throughout the year. The view from the summit, though one edge or the other of the table-land, wherever one stands, always intervenes to make a small break in the distant horizon, is declared by Lord Nugent to be the most splendid he could recollect having ever seen from any natural height. This writer cites an observation made many years ago, in his hearing, by Mr. Riddle, that he had never been on any *natural* hill, or rock, or mountain, from which could be seen an unbroken circumference with a radius of three miles in every part. This, his lordship says, has been verified in all his own experience, and it was so at Mount Tabor, although there are many abrupt points of vantage ground on the summit (*Lands Classical and Sacred*, ii. 204, 205).

This mountain is several times mentioned in the O. T. (Josh. xix. 12, 22; Judg. iv. 6, 12, 14); but not in the New. Its summit has however been usually regarded as the 'high mountain apart,' where our Lord was transfigured before Peter, James, and John. But the probability of this is opposed by circumstances which cannot be gainsaid. It is manifest that the Transfiguration took place in a solitary place, not only from the word 'apart,' but from the circumstance that Peter in his bewilderment proposed to build 'three tabernacles' on the spot (Matt. xvii. 1-8; Luke ix. 28-36). But we know that a fortified town occupied the top of Tabor for at least 220 years before and 60 years after the birth of Christ, and probably much before and long after (Polybius, v. 70. 6;

Joseph. *Antiq.* xiv. 6. 3; *De Bell. Jud.* i. 8. 7; ii. 20. 6; iv. 1. 8; *Vita*, sec. 37); and the tradition itself cannot be traced back earlier than towards the end of the 4th century, previously to which we have in the *Onomasticon* notices of Mount Tabor, without any allusion to its being regarded as the site of the Transfiguration. It may further be remarked that this part of Galilee abounds with 'high mountains apart,' so that in removing the scene of this great event from Tabor there is no difficulty in providing other suitable sites for it (Robinson, *Bibl. Researches*, iii. 210-227; Lord Nugent, *u.s.* ii. 198-204; Schabert, *Morgenland*, iii. 174-180; Burckhardt, *Syria*, pp. 332-336; Stephens, ii. 317-319; Elliot, ii. 364).—J. K.

2. The name of a grove of oaks in the vicinity of Benjamin, in 1 Sam. x. 3, the topography of which chapter is usually much embarrassed by the groundless notion that Mount Tabor is meant. [PLAINS.]

3. A Levitical city in Zebulun, situated upon Mount Tabor (1 Chron. vi. 77).

TABRET. [MUSICAL INSTRUMENTS.]

TABRET. [WEIGHTS AND MEASURES.]

TACHASH (תַּחַשׁ), a word of uncertain meaning, but which is generally believed to be the name of an animal the skins of which were used to cover the tabernacle (Exod. xxv. 5; xxvi. 14; Num. iv. 6, 8, etc.), and shoes or sandals made of which were worn by women (Ezek. xvi. 10). The ancient versions understand it of a colour (LXX. *ὡκεῖνθωα*; Aq. and Symm. *lávθwa*; Chal. and Syr. *סַפְּנֹנָה*, *saegona*, red; Arab. *Julūd dārish*, a black skin). Bochart follows this view, giving *hysginus*, dark red, as the rendering (*Hieroz.* iii. 30). But this view hardly any in more recent times have adopted; the common opinion being that the Tachash was an animal. It is not agreed, however, what animal was thus designated. According to the Talmud it was an animal resembling the *marten*; according to Rashi it was the *badger*, the *seal*, or the *dolphin*. Luther and the A. V. follow Rashi in making it the badger, and this Gesenius defends. It seems, however, a fatal objection to this that the badger is not found in Asia so far south as Palestine or Arabia, and therefore could not be familiar to the Israelites so as to supply them with coverings for the tabernacle. It is doubtful also whether the skin of an unclean animal would have been employed to cover the dwelling of Jehovah. The latter objection applies also to the seal, though in other respects there is much in favour of the opinion that this was the tachash. From the fact that the Arabs call a species of dolphin *tahas*, an argument may be drawn in favour of Rashi's last suggestion; but it may be doubted whether the skin of the dolphin could be conveniently used to cover a tent. We think there is much probability in the suggestion thrown out by Colonel Hamilton Smith in the former edition of this work, that as animals of the antelope tribe, and bearing the names of *pacasse*, *tacasse*, and *tachmitze*, abound in eastern Africa, it may be one of them which was known as the tachash to the Hebrews.—W. L. A.

TACHMAS (תַּחֲמָס, Lev. xi. 16; Deut. xiv. 15) is mentioned as one of the unclean birds in the Pentateuch, but so little characterised that no decided opinion can be expressed as to what species

is really intended. In the A. V. it is translated *owl*, but we rather incline to identify the Tachmas with the night-hawk of Europe (*Caprimulgus Europæus*), which, or a species very nearly allied to it, is an inhabitant of Syria, and belongs to a genus closely connected with superstitions in all countries. The night-hawk is a migratory bird, inferior in size to a thrush, and has very weak talons and bill; but the gape or mouth is wide; it makes now and then a plaintive cry, and preys on the wing; it flies with the velocity and action of a swallow, the two genera being nearly allied. Like those of most night birds, the eyes are large and remarkable, and the plumage a mixture of colours and dots, with a prevailing gray effect; it is finely webbed, and entirely noiseless in its passage through the air. Thus the bright eyes, wide mouth, sudden and inaudible flight in the dusk, are the original causes of the superstitious fear these birds have excited; and as there are in southern climates other species of this genus, much larger in size, with peculiarly contrasted colours, strangely disposed feathers on the head, or paddle-shaped single plumes, one at each shoulder, projecting in the form of two additional wings, and with plaintive loud voices often uttered in the night, all the species contribute to the general awe they have inspired in every country and in all ages.—C. H. S.

TACHMONITE. [HACHMONITE; JASHO-BEAM.]

TADMOR (תַּדְמוֹר; Sept. *Θερμόρ, Θοεδμόρ*) or TAMAR (תָּמָר), a town built by King Solomon (1 Kings ix. 18; 2 Chron. viii. 4). The name Tamar signifies a palm-tree, and hence the Greek and Roman designation of PALMYRA, 'city of palms'; but this name never superseded the other among the natives, who even to this day give it the name of Thadmor. The form Tamar seems more ancient than that of Tadmor. It is found in the text (*kethib*) of 1 Kings ix. 18, while the latter stands in the margin (*keri*); but in the later historical book 'Tadmor,' having become the usual designation, stands in the text without any various reading. Palm trees are still found in the gardens around the town, but not in such numbers as would warrant, as they once did, the imposition of the name. Tadmor was situated between the Euphrates and Hamath, to the south-east of that city, in a fertile tract or oasis of the desert. It was built by Solomon probably with the view of securing an interest in and command over the great caravan traffic from the east, similar to that which he had established in respect of the trade between Syria and Egypt. See this idea developed in the *Pictorial Bible*, note on 2 Chron. viii. 4; where it is shown at some length that the presence of water in this small oasis must early have made this a station for the caravans coming west through the desert; and this circumstance probably dictated to Solomon the importance of founding here a garrison town, which would entitle him—in return for the protection he could give from the depredations of the Arabs, and for offering an intermediate station where the factors of the west might meet the merchants of the east—to a certain regulating power, and perhaps to some dues, to which they would find it more convenient to submit than to change the line of route. It is even possible that the Phœnicians, who took much interest in this important trade, pointed out to

Solomon the advantage which he and his subjects might derive from the regulation and protection of it, by building a fortified town in the quarter where it was exposed to the greatest danger. A most important indication in favour of these conjectures is found in the fact that all our information concerning Palmyra from heathen writers describes it as a city of merchants, who sold to the western natives the products of India and Arabia, and who were so enriched by the traffic that the place became proverbial for luxury and wealth, and for the expensive habits of its citizens.

We do not again read of Tadmor in Scripture, nor is it likely that the Hebrews retained possession of it long after the death of Solomon. No other source acquaints us with the subsequent history of the place, till it reappears in the account of Pliny (*Hist. Nat.* v. 24) as a considerable town, which, along with its territory, formed an inde-

pendent state between the Roman and Parthian empires. In the time of Trajan, however, it was lying waste; but it was rebuilt by his successor Adrian, and from him took the name of Adriano-polis. From Caracalla it received the privileges of a Roman colony. During the weak administration of the emperors Gallienus and Valerian, in the 3d century, while independent governments were rising in several provinces of the Roman empire, Odenatus became master of Palmyra and the whole of Mesopotamia, and assuming the regal title himself, also bestowed it upon his consort Zenobia, and his eldest son Herod. After his death, Zenobia, styling herself Queen of the East, ruled over most of the eastern provinces of the Roman empire, as well as over her own territories, with so much firmness and policy, that Aurelian, who vanquished her and led her in triumph to Rome, could not withhold his admiration. On the revolt of Palmyra

495. Palmyra.

shortly after, Aurelian, having recovered possession of it, caused it to be levelled with the ground, and the greater part of the inhabitants to be put to death. He, however, ordered the temple of the sun to be restored, placed a garrison in the town, and appointed a deputy over the district attached to it. Diocletian adorned the city with additional buildings; and under the emperor Honorius it still had a garrison, and was the seat of a bishop. Justinian strengthened the fortifications, and also constructed a very costly aqueduct, the remains of which still exist. When the successors of Mohammed extended their conquests beyond the confines of Arabia, Palmyra was one of the first places which became subject to the khalifs. In the year 659, a battle was here fought between the khalifs Ali and Moawiyah, and won by the former. In 744 it was still so strongly fortified that it took the

khalif Merwan seven months to reduce it, the rebel Solyman having shut himself up in it. From this period it seems to have gradually fallen into decay. Benjamin of Tudela, who was there towards the end of the 12th century, speaks of it as 'Thadmor in the desert, built by Solomon of equally large stones (with Baalbec). This city is surrounded by a wall, and stands in the desert, far from any inhabited place. It is four days' journey from Baalath (Baalbec), and contains 2000 warlike Jews, who are at war with the Christians and with the Arabian subjects of Nouredin, and aid their neighbours the Mohammedans.' In connection with this statement, it may be remarked that the existing inscriptions of Palmyra attest the presence of Jews there in its most flourishing period, and that they, in common with its other citizens, shared in the general trade, and were even objects of public

honour. One inscription intimates the erection of a statue to Julius Schalmalat, a Jew, for having at his own expense conducted a caravan to Palmyra. This was in A.D. 258, not long before the time of Zenobia, who, according to some writers, was of Jewish extraction. Irby and Mangles (*Travels*, p. 273) also noticed a Hebrew inscription on the architrave of the great colonnade, but give no copy of it, nor say what it expressed. The latest historical notice of Tadmor which we have been able to find is, that it was plundered in 1400 by the army of Timur Beg (Tamerlane), when 200,000 sheep were taken (Rankin, *Wars of the Mongols*). And Abulfeda, at the beginning of the 14th century (*Arab. Descript.* p. 98), speaks of Tadmor as merely a village, but celebrated for its ruins of old and magnificent edifices. These relics of ancient art and magnificence were scarcely known in Europe till towards the close of the 17th century. In the year 1678, some English merchants at Aleppo resolved to verify, by actual inspection, the reports concerning these ruins which existed in that place. The expedition was unfortunate; for they were plundered of everything by the Arabs, and returned with their object unaccomplished. A second expedition, in 1691, had better success; but the accounts which were brought back received little credit: as it seemed unlikely that a city which, according to their report, must have been so magnificent, should have been erected in the midst of deserts. When, however, in the year 1753, Robert Wood published the views and plans, which had been taken with great accuracy on the spot two years before, by Dawkins, the truth of the earlier accounts could no longer be doubted; and it appeared that neither Greece nor Italy could exhibit antiquities which in point of splendour could rival those of Palmyra. The examinations of these travellers show that the ruins are of two kinds. The one class must have originated in very remote times, and consists of rude, unshapen hillocks of ruin and rubbish, covered with soil and herbage, such as now alone mark the site of the most ancient cities of Mesopotamia and Babylonia, and among which it would be reasonable to seek any traces of the more ancient city of Solomon. The other, to which the most gorgeous monuments belong, bears the impress of later ages. It is clear from the style of architecture that the later buildings belong to the three centuries preceding Diocletian, in which the Corinthian order of pillars was preferred to any other.

The ruins cover a sandy plain stretching along the bases of a range of mountains called Jebel Belaes, running nearly north and south, dividing the great desert from the desert plains extending westwards towards Damascus and the north of Syria. The lower eminences of these mountains, bordering the ruins, are covered with numerous solitary square towers, the tombs of the ancient Palmyrenes, in which are found memorials similar to those of Egypt. They are seen to a great distance, and have a striking effect in this desert solitude. Beyond the valley which leads through these hills, the ruined city first opens upon the view. The thousands of Corinthian columns of white marble, erect and fallen, and covering an extent of about a mile and a half, present an appearance which travellers compare to that of a forest. The site on which the city stands is slightly elevated above the level of the surrounding desert for a cir-

cumference of about ten miles; which the Arabs believe to coincide with the extent of the ancient city, as they find ancient remains whenever they dig within this space. There are indeed traces of an old wall, not more than three miles in circumference; but this was probably built by Justinian, at a time when Palmyra had lost its ancient importance and become a desolate place; and when it was consequently desirable to contract its bounds, so as to include only the more valuable portion. Volney well describes the general aspect which these ruins present:—'In the space covered by these ruins we sometimes find a palace, of which nothing remains but the court and walls; sometimes a temple whose peristyle is half thrown down; and now a portico, a gallery, or triumphal arch. Here stand groups of columns, whose symmetry is destroyed by the fall of many of them; there, we see them ranged in rows of such length that, similar to rows of trees, they deceive the sight and assume the appearance of continued walls. If from this striking scene we cast our eyes upon the ground, another, almost as varied, presents itself: on all sides we behold nothing but subverted shafts, some whole, others shattered to pieces, or dislocated in their joints; and on which side soever we looked, the earth is strewn with vast stones, half buried; with broken entablatures, mutilated friezes, disfigured reliefs, effaced sculptures, violated tombs, and altars defiled by dust.'

It may be right to add, that the account which has been more recently given of these ruins by Captains Irby and Mangles, is a much less glowing one than those of other travellers, English and French. They speak indeed with admiration of the general view, which exceeded anything they had ever seen. But they add: 'Great, however, was our disappointment when, on a minute examination, we found that there was not a single column, pediment, architrave, portal, frieze, or any architectural remnant worthy of admiration.' They inform us that none of the pillars exceed four feet in diameter, or forty feet in height; that the stone scarcely deserves the name of marble, though striking from its snowy whiteness; that no part of the ruins taken separately excite any interest, and are altogether much inferior to those of Baalbec; and that the plates in the magnificent work of Messrs. Wood and Dawkins do far more than justice to Palmyra. Perhaps this difference of estimate may arise from the fact that earlier travellers found more wonderful and finished works at Palmyra than their information had prepared them to expect; whereas, in the latter instance, the finished representations in the plates of Wood's great work raised the expectations so highly, that their disappointment inclined the mind to rather a detractive estimate of the claims of this ruined city—Tadmor in the wilderness. The present Tadmor consists of numbers of peasants' mud huts, clustered together around the great temple of the sun. This temple is the most remarkable and magnificent ruin of Palmyra. The court by which it was enclosed was 179 feet square, within which a double row of columns was continued all round. They were 390 in number, of which about sixty still remain standing. In the middle of the court stood the temple, an oblong quadrangular building, surrounded with columns, of which about twenty still exist, though without capitals, of which they have been plundered, probably because they were com-

posed of metal. In the interior, at the south end, is now the humble mosque of the village.

The remains of Palmyra, not being of any direct Scriptural interest, cannot here be more particularly described. Very good accounts of them may be seen in Wood and Dawkins, *Ruins of Palmyra, otherwise Tadmor in the Desert*; Irby and Mangles, *Travels*; Richter, *Wallfahrten*; Addison, *Damascus and Palmyra*. The last work contains a good history of the place; for which see also Rosenmüller's *Bib. Geog.* translated by the Rev. N. Morren; and in particular Cellarius, *Dissert. de Imp. Palmyreno*, 1693. Besides Wood's great work, excellent views of the place have been published by Cassas in his *Voyage Pittoresque de la Syrie*; and more recently by Laborde in his *Voyage en Orient*.

TAHPANHES (תַּחְפָּנֶחֶס), or TEHAPHNEHES (תַּחְפָּנֶחֶס), a city of Egypt. The former name is used by Jeremiah (ii. 16 [KETITH, TAHAPNES (תַּחְפָּנֶחֶס)]; xliii. 7-9; xlv. 1; xlv. 14), and the latter by Ezekiel (xxx. 18). The Sept. render it by *Táφνας*, *Táφναι*, the name of a goddess, *Tphnet* (Cham-pollion, pp. 121, 123). This was doubtless *Daphne*, a strong boundary city on the Pelusiac arm of the Nile (Herodot. ii. 30, 107). A mound called Tel Defenneh, nearly in a direct line between the modern Zan and Pelusium, is supposed from its name and position to mark the site of Daphne (Wilkinson, *Mod. Egypt.* i. 447). Isaiah (xxx. 4) names it in the abbreviated form Hanes. It was to this place that Johanan and his party repaired, taking Jeremiah with them, after the murder of Gedaliah. [DAPHNE.]

TAHPENES (תַּחְפָּנֶס), Sept. *Θεκεμνας*, a queen of Egypt, consort of the Pharaoh contemporary with David. Her sister was given in marriage to Hadad, the fugitive prince of Edom (1 Kings xi. 19) [HADAD].

TAHTIM-HODSHI, THE LAND OF (תַּחְתִּימֹהֶדְשִׁי), *תַּחְתִּימֹהֶדְשִׁי*; *els ḡḡr Ṭaḥṣawṣ, ḡ ḡṣṣw 'Adṣal*; Alex. *ḡḡr ṭḥawṣ ḡḡḡḡ*; *in terram inferiorem Hodsi*. This word occurs only in 2 Sam. xxiv. 6, and its exact signification is doubtful. Some make it a proper name; others translate it ('nether or low land newly inhabited'); while others, as the Vulgate, translate the first word and make Hodshi a proper name. It seems probable from the connection that the whole is a proper name, descriptive however of the physical aspect of the region to which it was given. The route taken by the king's messengers was first eastward to Moab; then northward through Gilead; then from Gilead to 'the land of Tahtim-Hodshi' to Dan-jaan and Zidon. 'The land of Tahtim-Hodshi' was thus manifestly a section of the upper valley of the Jordan, probably that now called *Ard el-Haleh*, lying deep down at the western base of Hermon.—J. L. P.

TAITAZAK or TAYTAZAK (טַיטַזַק), JOSEPH, a Jewish commentator of a very literary family, who with his father and brothers was among the 300,000 Jews that were expelled from Spain in 1492. He settled down at Salonica, where he wrote the following works:—(1.) A commentary on Ecclesiastes, entitled *The Fruitful Bough of Joseph* (פֶּרֶת יוֹסֵף), after Gen. xlix. 22, and in

allusion to his name Joseph, Venice 1599; (2.) A commentary on Daniel and the Five Megilloth—viz. the Song of Songs, Ruth, Lamentations, Ecclesiastes, and Esther—entitled *The Bread of Sacredness* (לֶחֶם סְתֵרִים), in allusion to Prov. ix. 17, Venice 1608. In its present form this work only contains fragments of Taytazak's commentaries on three books, and MSS. of the entire commentaries are still extant; and (3.) A commentary on the Psalms, excerpts of which have been published with Jedadjah Penini's commentary on the Psalms, entitled *The Tongue of Gold* (לִשָּׁן זָהָב), Venice 1599. The MS. of his complete commentary on the Psalms is to be found in the libraries of Paris and Oxford (comp. Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodliana*, col. 1533; Fürst, *Bibliotheca Judaica*, iii. 412).—C. D. G.

#### TALENT. [WEIGHTS AND MEASURES.]

TALMAI (תַּלְמַי), *full of furrows*; Sept. *Θαλμῖ*.

1. One of the sons of Anak (Num. xiii. 22; Josh. xv. 14; Judg. i. 10). 2. King of Geshur, and father of David's wife Maacah, the mother of Absalom (2 Sam. iii. 3; xiii. 37; 1 Chron. iii. 1, 2) [GESHUR].

TALMUD. The Talmud (תַּלְמוּד) is the work which embodies the canonical and civil law of the Jews. It contains those rules, institutions, precepts, and interpretations, by which the Jewish people profess to be guided, in addition to the O. T. Whatever is obligatory on them, besides the law, is recorded in this work. Here duties are explained, doubts resolved, cases of conscience cleared up, and the most minute circumstances relative to the conduct of life discussed with particularity. The contents of the work are of a miscellaneous character, relating not merely to religion, but to philosophy, medicine, jurisprudence, history, and the various branches of practical duty.

The Jews have been accustomed to divide their law into written and unwritten—the former contained in the Pentateuch; the latter handed down orally, till circumstances urged them to commit it to writing. The oral law is founded upon or developed out of the written. Some Jews have assigned the same antiquity to both, alleging that Moses received them on the mount; that Joshua got the oral law from Moses, and delivered it to the seventy elders, who transmitted it to the men of the Great Synagogue, the last of whom was Simon the Just. From the men of the Great Synagogue it came into the possession of the Rabbins. This, however, is a superficial and inaccurate account of the matter. *Midrashim*, or explanations and amplifications of Biblical topics, were of gradual growth. Their commencement dates prior to the Chronicle-writer, because he refers to works of that nature. The system of interpretation which they exemplify and embody existed in the age of the so-called Sopherim, who took the place of the prophets. The men of the Great Synagogue promoted it. It prevailed from the Asmonean period till that of Hadrian—i. e. about 300 years. The midrash was naturally simple at first; but it soon grew more comprehensive and complicated, under a variety of influences, of which controversy was not the least powerful. When secret meanings, hidden wis-

dom, deep knowledge, were sought in the letter of Scripture, the midrashim shaped themselves accordingly, and a distinction in their contents could be made. Thus they have been divided into the *Halacha* and *Hagada*—i.e. the rule, and what is said. Legal prescriptions formed the halacha; free interpretations, the hagada. The one as a rule of conduct *must be attended to*; the other merely passed for *something said*. The one was permanent, and proceeded from authoritative sources, from schools, the teachers of the law, etc.; the other was the product of individual minds, consisting of ideas which had often no other object than that of being expressed at the moment.

The oldest collection of Halachoth—that is the oldest Mishna—proceeded from the school of Hillel. R. Akiba, who was slain in the Hadrianic war, is said to have composed Mishna-regulations. The school of R. Simon ben Gamaliel (A.D. 166) who was a descendant of Hillel, collected and sifted the existing materials of the oral law. The present Mishna proceeded from the hands of R. Jehuda Hanasi (219 A.D.), son and successor of R. Simon ben Gamaliel. His son, R. Simon, made many additions to the Mishna after his father's death. It must not be supposed, however, that the Mishna was reduced to writing by R. Jehuda. For several centuries it was committed to the *memories* of scholars; and to write it down was even looked upon as a religious offence. Nothing but *hagadas* were written here and there; and though singular or striking *halachas* were carried about in writing by some, it was in secret. Nor were all the midrashim, or traditional precepts and interpretations, incorporated in this official Mishna. Many others existed, which are contained in part in the Sifra or Torah Kohanim,\* in the Sifri,† the Mechilta,‡ the second or smaller Sifri,§ in the Mishnas made by individual teachers for the use of their pupils, with the additions to the official Mishna collected by R. Chiya and his contemporaries. All the halachas of this sort which were extra-Mishnaic were called *Boraitas* (בריות), Hebrew (הינות) or *Toseftas* (תוספות). The necessity for digesting and reducing them to writing became more apparent when persecutions destroyed the academies of Palestine in the 4th century, and of Babylonia in the 5th. Thus the present Talmud or written Gemara originated. The Jerusalem, or as it has been sometimes called the Palestinian Talmud, proceeded from the academy of Tiberias. It is said to have been chiefly written by R. Jochanan, rector of that academy. But this is contradicted by internal evidence; for Diocletian (284-305), Ursicinus, and Julian (361, etc.) are mentioned in it; whereas R. Jochanan died A.D. 279. Hence we must infer that it was not compiled till the end of the last half of the 4th century, which agrees very nearly with the

opinion of Maimonides. The Jerusalem Talmud has contributed to the Babylonian, there being evident traces of it in the latter. The Babylonian Talmud, called 'ours' by later Jews, was principally compiled by R. Ashe, who died in 427 A.D. The labour spent upon the mass of materials which he had to arrange, weigh, decide upon, and adjust, was immense. More than half a century was devoted to it. But Ashe did not complete it. It was left to his successors to do so—to Rabina and R. Jose, presidents of the schools of Sora and Pumpadita respectively. These, with the aid of other scholars whose names we need not give,\* brought the work to its final state of redaction. It belongs therefore to the 6th century.

The *Mishna* is divided into six orders or books (סדרים), 63 treatises (מסכתות), *massicthoth*, and 525 chapters (פרקים), *perakim*. The order of these is not exactly the same in the two Talmuds. The first *Seder* (סדר) is called זרעים, *Seder Zeraim*, the order of seeds. It treats of sowing, the productions of the earth, herbs, trees, the uses of fruits, of seeds, etc. etc.; and contains the treatises Berachoth, Peah, Demai, Cilaim, Shebiith, Zeru-moth, Maassroth, Maasser sheni, Challah, Orlah, Biccuring—i.e. 11 treatises. Only the first has a gemara in the Babylonian Talmud; whereas all have gemaras in that of Jerusalem. The order in both is the same.

The second *Seder*, called מועד, *môed*—i.e. the order of festivals—is occupied with a statement of the times when festivals should begin and terminate, with the different rites and ceremonies to be observed at such seasons. It contains twelve *massicthoth* or treatises—viz. Shabbath, erubim, pesachim, shekalim, yoma, succah, bethsal, rosh hashannah, taanith, megillah, môed katon, chagigah. Such is the arrangement in the Jerusalem Talmud. But the Babylonian Talmud has them thus: shabbath, erubim, pesachim, betzah, chagigah, môed katon, rosh hashannah, yomah, succah, taanith, shekalim, megillah. In the Babylonian Talmud shekalim alone wants a gemara; but all the *massicthoth* have one in the Jerusalem Talmud.

The third *Seder* is called נשים (נשים), and discusses the distinctive rights of men and women, marriage, divorce; the customs, inclinations, sicknesses of women, etc. etc. It contains seven *massicthoth*—viz. yebamoth, cecuboth, kiddushin, gittin, nedarim, nazir, sotah. All have gemaras in both Talmuds, and the order is the same.

The fourth *Seder* is termed נזיקין (נזיקין), consisting of ten treatises. It is occupied with the losses and injuries which one person may bring upon another, damages done by cattle, restitution, the punishment to be inflicted for such offences or losses, etc. The *massicthoth* are, baba kama, baba mezia, baba bathra, sanhedrim, maccoth, shebuoth, edayoth, horayoth, abodah sarah, pirke aboth. Such is the arrangement of the Jerusalem Talmud. But the Babylonian has the treatises thus: baba kama, baba mezia, baba bathra, abodah sarah, sanhedrim, maccoth, shebuoth, horayoth, edayoth, pirke aboth. All have gemaras in both Talmuds, except edayoth, pirke aboth, and the third chapter of maccoth.

\* A midrash on Leviticus, composed by Rab or Abba Areka, rector of the academy at Sora (219 A.D.)

† A midrash on Numbers and Deuteronomy, made by the same Rab.

‡ A midrash on a part of the book of Exodus, consisting of nine *massicthoth* or treatises. It is usually ascribed to Ismael ben Elisha, who lived in the 1st century.

§ A midrash on Numbers, of which fragments exist.

\* See them in Jost's *Geschichte des Judenthums und seiner Sekten, zweyte Abtheilung*, pp. 199, 200.

The fifth *Seder* is termed *Kodashim* (קֹדֶשִׁים), and treats of sacrifices, oblations, their different kinds, etc. etc. Its massicth are eleven—viz. zebachim, menachoth, chollin, becoroth, erachin, temurah, mēilah, cerithuth, tamid, middoth, kinnim. The Babylonian order differs somewhat, being zebachim, menachoth, becoroth, chollin, erachin, temurah, mēilah, cerithuth, kinnim, tamid, middoth. All have a gemara in the Jerusalem Talmud; but the last two have none in the Babylonian.

The sixth *Seder*, *taharoth* (טְהָרוֹת), relates to purifications, the purity and impurity of vessels, to household furniture, and other things, and the way in which they should be cleansed. The massicth are celim, sholoth, negaim, parah, taharoth, mikvaoth, niddah, macshirin, zabim, tebul yom, yadaim, okzim—i.e. twelve treatises. The Babylonian Talmud puts niddah first; but in other respects the arrangement is the same. Niddah is the only one that has a gemara in both.

Seven treatises or massicth were afterwards added to the Babylonian Talmud; and as they are a later appendix they have no mishna. They are—

1. *Masseceh sopherim*, treatise of the scribes, containing rules for the writing of MS. rolls and other sacred books. 2. *Masseceh ebal rabbathi shekorim semachoth*, relating to mourning for the dead, burial, and the way in which mourners should be comforted. 3. *Masseceh callah*, relating to a bride and marriage-customs. 4. *Masseceh derek ertz rabba vezuta*, about life in a strange land, etc. 5. *Masseceh gerim*, relative to strangers, and the laws to be observed by proselytes. 6. *Masseceh cuthim*, about Samaritans. 7. *Masseceh taitzith*, relating to fringes.

These are the מַסְכֵּתוֹת קָטְנוֹת or little treatises appended to the Talmud. The following is a summary of the massicth of each *Seder* :—

### I. סדר זרעים.

1. *Masseceh berachoth*, the treatise of blessings, containing precepts relative to prayers and thanksgivings for the fruits of the earth and other blessings given by God; instructions about the times, places, and modes in which such prayers should be offered up. This treatise contains nine perakim or chapters.

2. *Masseceh peah*, treatise of the corner. This treatise shows how corners of the harvest fields should be left to the poor at the time of reaping, and how the fruits of the field should be gathered. Here there are eight perakim or chapters.

3. *Masseceh demai*, treatise of the doubtful. This treatise refers to fruits about which some doubts may be raised whether tithes should be paid from them or not. Here are seven perakim or chapters.

4. *Masseceh cilaim*, treatise of the heterogeneous—i.e. the mixing of several kinds of seed, etc. Here are nine perakim or chapters.

5. *Masseceh shebiith*, of the seventh—i.e. the sabbatical year, in which the Jews were forbidden to sow. In this treatise are ten perakim or chapters.

6. *Masseceh terumah*, relating to the heave-offering consecrated to the use of the priesthood. This contains eleven perakim or chapters.

7. *Maasher rishon*, the first tenth or tithe, which belonged to the Levites; and with what things it should be discharged. Here are five chapters.

8. *Maasher sheni*, the second tenth, which the Levites had to pay out of their tenth to the priests. Here again are five chapters.

9. *Challah*, cake—i.e. the cake which the women were required to bring of kneaded dough to the priest, etc. This treatise has four chapters.

10. *Orlah*, prepuce. Young trees were so called; for during the first three years their fruit was reckoned impure and injurious, and was thrown away. In the fourth year it was consecrated to God. Here are three chapters.

11. *Biccurim*, first-fruits. This treatise is occupied with an examination of the things of which first-fruits were to be brought into the temple. Here are four chapters.

The entire *seder* consists of seventy-five chapters.

### II. סדר מועד.

1. *Masseceh shabbath*, of the sabbath, its privileges and its sacredness; of lights, oil used on that day; of ovens in which articles of food were warmed on the sabbath; and the dress of men and women used on the same day. This treatise has twenty-four chapters.

2. *Erubin*, combinations. The treatise contains regulations for the combining of courts, of limits, and of streets. Here are ten chapters.

3. *Pesachim*, the Passover. This treatise relates to the Passover, and all things connected with its celebration. Here again are ten chapters.

4. *Shekalim*, shekels. This treatise contains laws relating to the half-shekel which was paid for the support of public worship. It has eight chapters.

5. *Yoma*, the day of expiation or atonement, a day spent by the Jews in fasting and penitence. This treatise has also eight chapters.

6. *Succah*, the Feast of Tabernacles. This treats of the form of the tents, the mode of living in them, etc. etc. Here are five chapters.

7. *Beitzah*, egg. This treatise begins with the question, whether it be right to eat on the day of a festival or a *yom tov*, the egg which a hen has laid on the same day. It relates to everything which a person should do or omit on any feast-day except the sabbath. Here again are five chapters.

8. *Yosh hashannah*. This treatise is occupied with remarks about the new year, the beginning of the new year on the new moon of the month Tisri, and the manner in which the day should be kept. It has four chapters.

9. *taanith*, fasting. This relates to public fasts, and the manner in which they should be observed. It has also four chapters.

10. *Megillah*, roll. This treatise refers to the Feast of Purim, and is so called because the megillah of Esther is read at that time. Here are four chapters.

11. *Moed katon*. In the present treatise are discussed the minor festivals intervening between the first and last days of the passover. Here are three chapters.

12. *Chagigah*. This treatise is founded on the command contained in Exod. xxiii. 17, that all

the males should appear three times in the year before the Lord at Jerusalem. Here again are three chapters.

The entire *seder* contains eighty-eight chapters.

### III. סדר נשים.

1. **יבמות** *yebamoth*. This treatise relates to the marrying of a deceased brother's wife, who has had no children by her husband. Here are sixteen chapters.

2. **כתובות** *ketuboth*. The present treatise relates to matrimonial contracts, dowries, and writings connected with marriage. Here are thirteen chapters.

3. **נדרים** *nedarim*, *votos*, discussing what vows are binding or otherwise; who can make vows and who not. Here are eleven chapters.

4. **נזירות** *neziruth*. This treatise refers to the vows of the Nazarites, and their mode of living. It contains nine chapters.

5. **סוטה** *sotah*. This treatise regards a woman suspected of conjugal infidelity; how she must drink the bitter water that causeth the curse, etc. etc. Here again are nine chapters.

6. **גיטין** *gittin*, respecting divorce, and the writing given to the wife on that occasion, how it must be written, etc. etc. This treatise consists of nine chapters.

7. **קידושין** *kiddushin*, respecting betrothment. Here are four chapters.

The third *seder* or order, contains seventy-one chapters.

### IV. סדר נזיקין.

1. **בבא קמא** *baba kama*, the first gate, relative to the losses sustained by men and beasts from one another. This treatise consists of ten chapters.

2. **בבא מציעא** *baba metziah*, the middle gate, This treatise refers to things found or pledged, usury, etc. etc. It has also ten chapters.

3. **בבא בתרא** *baba bathra*, the last gate. This treatise relates to commercial transactions, buying and selling, inheritances, etc. etc. Here again are ten chapters.

4. **סנהדרין** *Sanhedrin*. This is a most important treatise, relating to the great tribunal, to various punishments, judges, witnesses; who of the Israelites shall have part in the future life, and who not. It consists of eleven chapters or sections.

5. **מכות** *maccoth*. This treatise relates to corporeal punishments. Here the reason is explained why the expounders of the law omitted one stripe of the forty (2 Cor. xi. 24). It contains three chapters.

6. **שבועות** *shevuoth*, respecting oaths; who can take an oath, and who not. This treatise consists of eight chapters.

7. **עיריות** *edayoth*, respecting witnesses and witness-bearing. Here again are eight chapters.

8. **אבודה זרה** *abodah zarah*, called also **עבודת זרים**

*abodath elilim*, and also **אבודת כוכבים** *abodath cocabim*, respecting idolatry, and the avoiding of communion with idolatrous Christians. This treatise is wanting in the Basel edition, because it has severe reflections upon Jesus Christ and his followers. It is printed in the Venice edition, and consists of five chapters.

9. **אבות** *aboth*, or **אבות פרקי אבות** *pirke aboth*. This treatise contains moral maxims of the fathers. It has six chapters.

10. **הוריות** *horayoth*, respecting such errors in

judgment committed by the great Sanhedrim as require a sin-offering. The present treatise contains three chapters.

The entire *seder* contains seventy-four chapters.

### V. סדר קדשים.

1. **זבחים** *zebachim*, sacrifices. This treatise has fourteen chapters.

2. **מנחות** *menachoth*, meat-offerings. This treatise has thirteen chapters.

3. **חולין** *cholin*. This treatise respects clean and unclean animals killed for profane or domestic use. Here are twelve chapters.

4. **בכורות** *becoroth*, respecting the first-born of human beings and animals. Here are nine chapters.

5. **ערכין** *eracin*. This treatise relates to the valuing and taxing of such things as are dedicated to the Lord. It consists of nine chapters.

6. **תמורה** *temurah*. This treatise refers to consecrated animals that have had others substituted for them. It consists of seven chapters.

7. **כריתות** *cerithuth*, the excision of a soul from Israel, and the sins which cause such punishment: thirty-six kinds of this excision are enumerated. Here are six chapters.

8. **מעילה** *meilah*, *trespass*, laws relating to objects that have been consecrated, and converted to profane uses. This treatise also has six chapters.

9. **תמיד** *tamid*, respecting the daily morning and evening sacrifice. Here are seven chapters.

10. **מדות** *middoth*. This treatise relates to the measuring of the temple. It consists of five chapters.

11. **קנים** *kunnim*, relating to birds for sacrifices. The treatise is divided into three chapters.

The whole *seder* has ninety-one sections.

### VI. סדר טהרות.

1. **כלים** *celim*, respecting measures, household furniture, clothes, etc., and their purification. This treatise has thirty chapters.

2. **אהלות** *oholoth*, respecting cottages or houses; how they become unclean, and how they must be purified. This treatise has eighteen chapters.

3. **נגעים** *negaim*, regarding leprosy. Here are fourteen sections.

4. **פרה** *parah*, the red heifer (Num. xix.) This treatise is divided into twelve chapters.

5. **טהרות** *taharoth*, respecting minor impurities. Here are ten chapters.

6. **מקואות** *mikvaoth*. This treatise concerns diving baths for the cleansing of persons and utensils. It is divided into ten chapters.

7. **נדה** *niddah*, respecting the uncleanness of women. This treatise has also ten chapters.

8. **מכשירין** *macshirin*, of issues and their purification. It consists of six chapters.

9. **זבים** *zabim*, of fluxes. This treatise is divided into five chapters.

10. **טבול יום** *tebul yom*, relates to purifications by ablution on the day the uncleanness has been contracted. This treatise consists of four chapters.

11. **ידים** *yadayim*, regulations for purifying the hands from uncleanness. Here again are four chapters.

12. **עוקצין** *oketzin*, relative to the stalks of fruits; and how they become unclean by touching other fruits. This treatise has three chapters.

The entire *sefer* has 126 chapters.

From this account it appears that the Talmud consists of six *sedarim* or orders, containing sixty-three *massicloth* or treatises, and five hundred twenty and five *perakim* or chapters.

The Babylonian Gemara is much more copious than that of Jerusalem, occupying about four times the space of the latter. It is preferred by the Jews to the Jerusalem one. But Christians usually reverse the process, perhaps because of the brevity and succinctness of the one compared with the diffuseness of the other, which accounts for the appearance of fewer absurdities and fables. The Jerusalem Talmud is more difficult to be understood, because of the peculiar dialect in which it is written. Obscurity, however, belongs to both. The Mishna is written in Hebrew or late Hebrew; the Gemara in Aramaean; but the Palestinian dialect of the Jerusalem Talmud approaches Syriac. The Chaldee of the Babylonian Talmud is purer and more facile, without the grammatical and lexical anomalies which often appear in the earlier work making it hard and rugged. But quotations from prior midrashic works, especially those whose contents are *halachic*, as also fragments of older gemara-collections, and even the hagadic contents in part, are in Hebrew.

'The almost unconquerable difficulty of the style,' says Lightfoot, 'the frightful roughness of the language, and the amazing emptiness and sophistry of the matters handled, do torture, vex, and tire him that reads them (the Talmudic authors). They do everywhere abound with trifles in that manner as though they had no mind to be read; with obscurities and difficulties, as though they had no mind to be understood; so that the reader hath need of patience all along to enable him to bear both trifling in sense and roughness in expression.'

The difference between the two Talmuds is obvious from these remarks. While both have the same Mishna, they differ considerably in the Gemara. It is usual to characterise the Mishna as the text, and the Gemara as the commentary upon it. Though exception might be taken to the correctness of this statement, it is sufficient perhaps to give a general idea of the relation which the two bear to one another. The Gemara follows the Mishna step by step, and sentence by sentence, explaining the sense, putting different opinions about it together, and judging of it by a majority or minority of voices. But there are frequent divergences and retrogressions. The Mishna should have properly nothing but halachas in it, since they only are authoritative. It was intended to exclude all midrashim not of this nature. But hagadas have intruded, appearing most in aboth and middoth. Thirteen treatises alone are free from the halacha; while twenty-six present it in abundance.\* The Gemara, which occupies a secondary place, consists mainly of hagadas. But it contains some halachic midrashim, more of course in the Babylonian Talmud, where the halachic and hagadic are mixed together, and the distinction between them is less definite. The oldest halachas indeed have almost disappeared from the Babylonian Gemara, in consequence of the influences under which its materials were gradu-

ally developed in the schools of Babylonia; while more such halachic matter is preserved in the Jerusalem Gemara.\* But the extinction of the most ancient can hardly be regretted on the ground of its intrinsic value, the more elastic spirit of Babylonian Judaism being probably an advantage to after ages. Hagadic literature is much more extensive than halachic, and embraces a wide range of subjects, ethical, historical, and metaphysical.

Maimuni classes the contents of the Mishna under five heads—1st, Interpretations said to have been received from Moses, which are indicated in the text of Scripture or may be inferred from it. About these there is no controversy. 2. Those decisions which are said to be 'the constitutions of Moses from Sinai.' There is no controversy about these also. 3. Such judgments as are inferred from various modes of reasoning, and which are determined by the voice of the majority. 4. Determinations which prophets and wise men designed to be a hedge and guard to the law. God ordered these to be in general terms. 5. Laws projected in the way of examination, and by their agreement with what is usual among men. Such prescriptions and rites add nothing to the law; nor do they take aught from it. This classification is scarcely sufficient, because it applies chiefly to the halachic contents of the Mishna.†

The following specimen may serve to show the position, character, and mutual relation of the two Talmudic constituents, the Mishna and Gemara:—

מתני' ר' ישמעאל אומר שלשה לפניו שלשה  
לאחריו אסור וחכ"א לפני אידיון אסור לאחר  
אידיון מותר:

גם' אמ' רב תחילפא בר אבדימי אמר שמואל יום  
נוצרי לדברי ר' ישמעאל לעולם אסורי:

*Mishna:* Rabbi Ismael says, three days before (the feasts of the Gentiles) and three days after them, it is forbidden (to transact with them things mentioned before); but the wise men decide that those things are prohibited only before their feasts, but that they are allowable after them.

*Gemara:* Rab Tachlipa, son of Abdimi, teaches from R. Samuel, that the Nazarene day (the Lord's day) is prohibited for ever, according to the words of R. Ismael.

The term *Mishna* (מִשְׁנָה) signifies *repetition*, from שָׁנָה to repeat, because it consists of a repetition of the written law, or because it is as it were a second law (δευτέρωσις). It is a word of the Soferim or scribes (see Kelim, xiii. 7). But some, as De Rossi, make a distinction between מִשְׁנָה and מִשְׁנֵה, identifying the former alone with δευτέρωσις, and giving the meaning of doctrine to the latter from שָׁנָה to read, literally what is read or to be read, nearly equivalent to תִּלְמוּד. It is unnecessary to distinguish two words. The idea of repetition lies at the basis of the term in whichever way it is pointed or pronounced. An oral repetition, as well as an explanation of written law, is in the מִשְׁנָה.

\* See Geiger's *Urschrift und Uebersetzungen der Bibel*, u. s. w., pp. 156-158.

† See Maimuni's prefaces, translated by Ed. Pococke, in the first vol. of Surenhusius's *Mishna*

\* Zunz's *Gottesdienstlichen Vorträge der Juden*, 1832, 8vo.

The word *Gemara* (גמרא) denotes *supplement* or *complement* according to Buxtorf—i.e. this part of the Talmud, containing more extended explanations than the Mishna, and also the decisions of the rabbins, *supplements* and *completes* the Mishna. It is better, however, to take *Gemara* as synonymous with *Talmud*, doctrine, from גמור, *to learn*, equivalent to the Hebrew לָמַד.

The fact that Talmud and Gemara were often used indiscriminately, shows the correctness of this opinion. The word *Midrash*, which meant at first doctrine or study, was used synonymously with Talmud or Gemara after the oral law had a codex of its own—i.e. the Mishna.

Rabbinical Jews have always set a high value on the Talmud, often placing it above the old Mosaic law. Hence we find in the *Masseketh Soferim*, the saying: 'The Biblical text is like water, and the Mishna like wine, and the six orders like aromatic wine.' In another passage: 'The law is like salt, the Mishna like pepper, but the six orders like fine spices.' Again: 'The words of the scribes are lovely, above the words of the law; for the words of the law are weighty and light, but for the words of the scribes are all weighty.' These extravagant praises of the oral traditions agree with the Saviour's words: 'Making the word of God of none effect through your tradition, which ye have delivered' (Mark vii. 13). They are not justified by the contents of the Talmud itself. In consequence of its miscellaneous, diversified, and multitudinous contents, it is, indeed, difficult to give a fair estimate of the work in a brief compass. That it is a very valuable body of laws and decisions cannot be doubted. It has moulded the Jewish race materially, influencing their opinions, stimulating their spiritual and ecclesiastical life, promoting their intellectual activity, and regulating their conduct. As a monument of the learning, subtilty, and wisdom of their forefathers, the modern Jews may well be proud of it. The treatise *Pirke aboth* alone is a very favourable specimen of ethical philosophy. Yet it is patent to all that the *corpus theologicum et civilis juris* under consideration is marred by serious faults. It exhibits much that is unimportant and small, discussed, at the same time, in a tone of seriousness as if it were of moment. Hence the ridiculousness attaching to it. The work has also received from Persian sources or influences superstitious views and practices opposed to the genuine spirit of Judaism; such as the belief in demons or intermediate beings. It is also disfigured by unamiable and harsh utterances against other peoples and the adherents of other religions. Christians are severely and uncharitably spoken of. Yet it cannot be denied that other sentiments are directly opposed to superstition; and that a spirit of good-will to men in general is often expressed. Had the redaction of the materials been carried out, and the work of abridgment been prosecuted farther, the Talmud would have presented a better aspect. But an undue regard for the sentiments and sayings of former men was allowed to obstruct the process of rejection and condensation. Hence wisdom and folly appear side by side; the latter in considerable prominence. The fabulous, trifling, irreverent, absurd, shows itself very often. Curious questions, which should excite no curiosity, are opened up; an allegorising propensity is indulged; the miracu-

lous is believed in where it should not; and sentiments derogatory to the majesty of God are occasionally propounded. The region of the positively profane and impious, as well as that of the merely irreverent, is entered.

The following will exemplify the truth of these remarks:—For a bleeding at the nose, let a man be brought who is a priest, and whose name is Levi, and let him write the word Levi backwards. If this cannot be done, get a layman, and let him write the following words backwards:—Ana pipi shila bar sumte; or let him write these words—Taam ali bemi keseph, taam li bemi paggan; or let him take a root of grass, and the cord of an old bed, and paper and saffron, and the red part of the inside of a palm tree, and let him burn them together, and let him take some wool and twist two threads, and let him dip them in vinegar, and then roll them in the ashes, and put them into his nose; or let him look out for a small stream of water which flows from east to west, and let him go and stand with one leg on each side of it, and let him take with his right hand some mud from under his left foot, and with his left hand from under his right foot, and let him twist two threads of wool, and dip them in the mud, and put them into his nostrils; or let him be placed under a spout, and let water be brought and poured upon him, and let them say, 'As this water ceases to flow, so let the blood of M. the son of the woman N. also cease' (Gittin, fol. 69, col. 1).

Rabbah says: 'They that go down to the sea have told me that when a wave is going to overwhelm a ship, sparks of a white light are seen on its head. But if we strike it with a staff on which are graved the words, 'I am that I am, Jah, Lord of hosts, Amen, Amen, Selah,' it subsides. They that go down to the sea have told me that the distance between one wave and another is 300 miles. It happened once that we were making a voyage, and we raised a wave until we saw the resting-place of the least of all the stars. It was large enough to sow forty bushels of mustard-seed, and if we had raised it more we should have been burned by the vapour of the star. One wave raised its voice and called to its companion: 'O companion, hast thou left anything in the world that thou hast not overflowed? Come, and let us destroy it.' It replied: 'Come and see the power of thy Lord. I could not overpass the sand even a hair's-breadth, for it is written, 'Fear ye not me? saith the Lord; will ye not tremble at my presence, which have placed the sand for the limit of the sea, by a perpetual decree that it cannot pass?' (Jer. v. 22).' (Baba Bathra, fol. 73, col. 1).

Abba Saul said: When I was an interrer of the dead, I had once to pursue after a gazelle; I entered into the hollow of a hip-bone of a dead man, and ran after it three miles, and yet I reached neither the gazelle nor the end of the hip-bone; when I returned back they told me this bone belonged to Og, the king of Bashan. Abba Saul said: Once upon a time, when I had been interring the dead, a cave opened under me and I found myself standing up to my nostrils in the socket of a dead man's eye; when I returned they told me it was the eye of Absalom.' Perhaps thou wouldest say, Abba Saul was a short man; Abba Saul was the tallest in his generation (Niddah, Perek 3).

It is possible, as enlightened Jews suggest, that these and similar sayings have a meaning beneath

the letter which the ignorant do not see ; that they are parabolic, conveying a higher sense to the thoughtful than that which lies upon the surface. They are for the herd, the *vulgus* ; so it is affirmed. Or they may be the play of wit ; an expression of the humorous or ridiculous fitted to amuse those who are but children in mind. Are not these suggestions the after-thoughts of tender apologists ? Were the preservers and collectors of the Talmud conscious of a higher import which the portions in question were designed to convey to the rational or reflecting ?

The Talmud has been applied both to the criticism and interpretation of the O. T. Most of its citations, however, agree with the present Masoretic text. It has probably been conformed to the Masoretic standard by the rabbins. Criticism can, therefore, make it useful only by comparing MS. copies rather than the printed text, since the latter has been altered. The instances in which the text, even in its printed state, departs from the Hebrew original, furnish a presumption in favour of finding more of the same kind, if MSS. were carefully collated. Frommann collected thirteen variants out of the Mishna (*Opuscula*, i. 1-46) ; and Gill, who collated the Talmud for Kennicott, found about a thousand. It must be admitted, however, that many of them are trifling, not a few also being words added by the rabbins to explain others. The collation of Gill was imperfectly done.

The Talmud has also been applied to the interpretation of the O. T. ; in this country by Gill more than any other commentator. Lightfoot also used it. The former has often quoted it where it is useless. Others have done the same thing. Little advantage can be gained from the study of the Talmud for this end, even though it be employed more judiciously and sparingly than it was by Gill.

The Talmud has been used in the illustration of the N. T. also by Lightfoot, Schoettgen, Meuschen, Wetstein, Gfroerer, and others. In various instances it has thrown light on the meaning, especially where there is a reference to Jewish customs and manners. Even doctrinal opinions have been elucidated on the ground that the N. T. writers were Jews. In this department, also, its utility has been over-estimated ; by none more than by Lightfoot himself, who says, in the dedication prefixed to his Talmudical exertations : ' Christians, by their skill and industry, may render them (the Talmudic writings) most usefully serviceable to their studies, and most eminently tending to the interpretation of the N. T. '

The first complete edition of the Babylonian Talmud was published at Venice in 1520-1523, in 12 vols. folio. This is the celebrated Bomberg edition now so rare, but not accurate. All succeeding ones are taken from it, often with alterations or omissions, especially of the passages directed against Christians. The Bomberg edition contains the Tosafoth and Pirke Tosafoth, the commentaries of Rashi and Asher, with Maimuni's commentary on the Mishna. The celebrated Froben of Basel published the same work in 1578-80, fol. ; but the passages calumniating Christ were excluded by command of the Tridentine bishops. The Talmud was also published at Cracow, 1616-20? 4to ; at Lublin 1617-22, 1626-28, 1639, fol. ; at Amsterdam, 1644-48, fol. ; at

Frankfurt-on-the-Oder, 1697-99, fol. ; at Berlin and Frankfurt-on-the-Oder, 1715-21, fol. ; at Amsterdam and Frankfurt-on-the-Maine, 1714-21, fol. ; at Amsterdam, 1752-65, fol. ; at Sulzbach, 12 vols. fol. 1766 ; and at Vienna, 1841, etc. fol. Landau's editions appeared at Prague, fol. 1830-34, and 1839-45, in 8vo. The latest edition has been announced under the editorship of Lebrecht of Berlin. It is matter of regret that the edition of Pinner, of which the first volume appeared in 1842, has been discontinued, though it is not so correct as could be wished, especially in the accompanying German translation.

The Jerusalem Talmud was first published by Bomberg about 1522-23 at Venice, folio ; and subsequently at Cracow 1609, folio.

The entire Talmud has not been translated into any language. The Mishna appeared in Latin in Surenhusius's edition (Amsterdam 1698-1703, folio) ; in German by Rabe, six parts, Ansbach 1760-63, 4to ; and at Berlin by Jost, 6 vols. 4to, 1832-34,

with the original text, and the commentary *מלך נחם*. But the German version is in Hebrew letters, which detracts from its value. A Spanish version of the whole work was published at Venice in 1606 and flg., made by Abr. ben Reuben, and corrected by R. Isaac Gherson. In English eighteen treatises from the Mishna were translated by De Sola and Raphall, London 1845, 8vo ; but even these are incomplete, chapters and sections of the original being occasionally omitted.

The best lexicon to the Talmud is still that of Buxtorf, 1639, folio, Basel, though it is capable of great improvement and many additions. The Latin translation in Surenhusius's *Mishna* often supplies better explanations. To these should be added the Bondis *אור חכמה*, *Beleuchtung der in Talmud von Babylon und Jerusalem, in den Targumim und Midraschim vorkommenden fremden besonders lateinischen Wörter.*, Dessau 1812, 8vo ; Hartmann's *Supplementa*, Rostock 1813, 4to ; especially his *Thesaurus lingue Hebraicae e Mishna augenda*, in 3 parts, 1825, 1826, 4to, in which 760 Mishna-words are enumerated whose roots are Biblical, but their form modern Hebrew ; 273 Greek and Latin, with 1720 peculiar ones, are also given. Along with these should be mentioned the *Aruch* of R. Nathan ben Jehiel, as edited and improved by Landau, published at Prague in 1819-24 in 5 parts. It contains explanations of the difficult words in the two Talmuds.

The celebrated Moses ben Maimuni (+1205) made a digest of all the laws and ordinances contained in the Talmud. This excellent abridgment is sufficiently copious for most readers, since it contains the essence of the whole work. It is entitled *מִשְׁנֵת תּוֹרָה* or *מִסְפֵּר הַי"ד*—i.e. the Book of 14 (books), and was divided into four parts, and was published at Soncino, 2 vols. folio, 1490 ; republished at Venice 1524, 3 vols. folio ; and at Amsterdam 1701, folio, 4 vols. Selections from it were made in English by Bernard, entitled *The Main Principles of the Creed and Ethics of the Jews, exhibited in Selections from the Yad Hachazakah of Maimonides, with a literal English translation, copious illustrations from the Talmud, etc.*, 1832, Cambridge, 8vo ; and an entire version into English, made by several writers, under the editorship of E. Soloweyczik, was begun at London

1863, 8vo. See Surenhusius's edition of the Mishna; Buxtorf, *Recensio Operis Talmudici*, in his *Liber de Abbreviaturis Hebraicis*; Bartolucci, *Bibliotheca Rabbinica*, iii.; Wolfius, *Bibliotheca Hebraea*, ii.; Reimann, *Einleitung zur Historie der Theologie insgemein, und der jüdischen insbesondere*; Zunz, *Die gottesdienstlichen Vorträge der Juden*; Pinner's *Introduction to the Talmud Babli*; Pressel's article 'Thalmud' in the 15th volume of Herzog's *Encyklopädie*; *Der Geist der talmudischen Auslegung der Bibel*, von Dr. H. S. Hirschfeld, 2 parts; Geiger's *Urschrift und Uebersetzungen der Bibel*; Steinschneider's article 'Jüdische Literatur' in Ersch and Gruber's *Encyklopädie*, sec. ii. 27 Theil; Steinschneider's *Catalogus librorum Hebraeorum in Bibliotheca Bodleiana*; Jost's *Geschichte des Judenthums und seiner Sekten*, Abtheilung ii.; Fürst's *Bibliotheca Judaica*; *Compendium des hierosolymitanischen und babylonischen Talmud*, by M. Pinner; and Geiger's *Zeitschrift*, ii. 488.—S. D.

**TAM, JACOB.** This distinguished talmudist, tosaphist, grammarian, and commentator, was the grandson of the immortal Rashi, and younger brother of the celebrated Rashbam. He was born at Remers about 1100, and obtained the appellation *Tam* (תם) in after life because of his great piety, and in allusion to Gen. xxv. 27, where his namesake Jacob is denominated *Tam*=*pious* (יעקב איש תם). As it is beyond the scope of the biographical notices in this Cyclopædia to discuss the extraordinary Talmudic learning of R. Tam and to detail his contributions to the elucidation of the traditional law, we shall simply mention his labours in the departments of Biblical exegesis and lexicography. He wrote (1.) A lengthy poem on the Hebrew accents, consisting of forty-five stanzas, five of which were first published by Luzzatto in the Hebrew Essays and Reviews, entitled *Kerem Chemed*, vol. vii. p. 38, Prague 1843, and the whole forty-five of which appeared in the following work; (2.) Grammatical and lexical animadversions, entitled *כפר ההכרעות*, designed to reconcile the differences of Danash Ibn Librat and Menachen Ibn Saruk on points of grammar and exegesis, first published by Filipowski, London 1855. He also wrote *Rules for Scribes*,

alternately entitled *ספר תורה*, *תקון ספר תורה*, and *תקון סופרים*, being a guide for transcribing MSS. of the Bible, and a grammatical commentary on the Bible (*פרושי תנ"ך*), which has not as yet come to light, but which is quoted by expositors, lexicographers, and grammarians. R. Tam died about A.D. 1171 (comp. Geiger, *Parschandatha*, p. 24 ff., Leipzig 1855; Fürst, *Bibliotheca Judaica*, iii. 406, etc.; Graetz, *Geschichte der Juden*, vol. vi. p. 211 ff., Leipzig 1861).—C. D. G.

**TAMAR** (תָּמָר, twice תָּמַר, Judg. iv. 5; Jer. x. 5) has been universally acknowledged to denote the 'palm-tree,' sometimes called the 'date-tree.' The date-tree is remarkable for its erect and cylindrical stem, crowned with a cluster of long and feather-like leaves, and is as much esteemed for its fruit, the 'date,' as for its juice, whether fermented or not, known as 'palm-wine,' and for the numerous uses to which every part of the plant is applied. The Arabic name of the date is *tamr*; thus the tamarind is called the Indian date, *tamr hindæ*. The family of palms is characteristic of tropical countries, and but few of them extend into northern latitudes. In

the old world, the species *P. dactylifera*, genus *Phoenix*, is that found furthest north. It spreads along the course of the Euphrates and Tigris across to Palmyra and the Syrian coast of the Mediterranean.

The peculiarities of the palm-tree are such that they could not fail to attract the attention of the writers of any country where it is indigenous, and especially from its being an indication of the vicinity of water even in the midst of the most desert country. Its roots, though not penetrating very deep, or spreading very wide, yet support a stem of considerable height, which is remarkable for its uniformity of thickness throughout. The centre of this lofty stem, instead of being the hardest part, as in other trees, is soft and spongy, and the bundles of woody fibres successively produced in the interior are regularly pushed outwards, until the outer part becomes the most dense and hard, and is hence most fitted to answer the purposes of wood. The outside, though devoid of branches, is marked with a number of protuberances, which are the points of insertion of former leaves. These are from four to six and eight feet in length, ranged in a bunch round the top of the stem, the younger and softer being in the centre, and the older and outer series hanging down. They are employed for covering the roofs or sides of houses, for fences, frame-work, mats, and baskets. The tender part of the spathe of the flowers being pierced, a bland and sweet juice exudes, which being evaporated yields sugar, and is no doubt what is alluded to in some passages of Scripture; if it be fermented and distilled a strong spirit or *arak* is yielded. The fruit, however, which is yearly produced in numerous clusters and in the utmost abundance, is its chief value; for whole tribes of Arabs and Africans find their chief sustenance in the date, of which even the stony seeds, being ground down, yield nourishment to the camel of the desert.

496. 1. Cluster of dates; 2. flower; 3. a date; 4. section of the same.

The palm-tree is first mentioned in Exod. xv. 27, when the Israelites encamped at Elim, where there were twelve wells and threescore and ten palm-trees. In the present day Wady Ghorendel is found the largest of the torrent beds on the west side of the Sinai peninsula, and is a valley full of date-trees, tamarisks, etc. Jericho was called the City of Palm Trees, no doubt from the locality being favourable to their growth. Mariti and Shaw describe them as still existing there, though in diminished numbers. The palm-tree was con-

sidered characteristic of Judæa, not so much probably because it was more abundant there than in other countries, but because that was the first country where the Greeks and Romans would meet with it in proceeding southward. Hence the coins of the Roman conquerors of Judæa have inscribed on them a weeping female sitting under a palm-tree, with the inscription 'Judæa capta' (*vide* Kempfer, *Amenitates Exotice*; and Celsius, *Hierobot.* i. 444-579).—J. F. R.

TAMAR. 1. (Sept. Θάμαρ) a Canaanitish woman, espoused successively to the two sons of Judah, Er and Onan; but as they both died childless, Judah hesitated to give her his third son Shelah, as patriarchal usage required. This set her upon the contrivance described in Gen. xxxviii.; and two sons, Pharez and Zarah, thus became the fruit of her criminal intercourse with Judah himself [JUDAH].

2. (Θημάρα, Alex. Θαμάρα), daughter of David by Maacah, who was also the mother of Absalom. The unhappy consequences of the criminal passion entertained for this beautiful damsel by her half-brother Amnon, brutally gratified by him, and terribly avenged by Absalom, formed the groundwork of the family distractions which embittered the latter years of David's reign (2 Sam. xiii.) [ABSALOM; AMNON; DAVID.]

3. (Θημάρα, Alex. Θαμάρα), daughter of Absalom, wife of Uriah of Gibeah, and mother of Maachah queen of Abijah (2 Sam. xiv. 27; 1 Kings xv. 2).

TAMAR (Sept. Θαμαρ), a place on the south-eastern frontier of Judah (Ezek. xlvii. 19; xlviii. 28). The *Onomasticon* mentions a Thamara, a place lying between Hebron and Ailah (*s. v.* Hazeyon Tamar); and Ptolemy (*v.* 16. 8) mentions a Θαμαρώ, as do also the Peutinger Tables (Reland, *Pal.* 462). Robinson identifies it with Kurnûb, a place about an ordinary day's journey from El-Milh towards the pass Es-Sufâh. This, however, depends on a conjectural emendation of the *Onomasticon*, where in the clause κώμη διεστῶσα Μάψις (*v. l.* μόλις, Μάλις), ἡμέρας ὀδόν, he would read Μαλάθης for Μάψις, whereby he makes Thamara a day's journey from Malatha, which he identifies with El-Milh. Besides, as Van de Velde observes, the distance of Kurnûb from El-Milh is not a day's journey, but only four hours; nor is Kurnûb to the S.W. of the Dead Sea, where the Peutinger Tab. places Thamyro. We must still, therefore, regard the identification of Tamar as undetermined.—W. L. A.

TAMMUZ (הַתְּמוּז; Sept. ὁ Θαμμούζ), a Syrian deity, for whom the Hebrew idolatresses were accustomed to hold an annual lamentation (Ezek. viii. 14). This idol was the same with the Phœnician Adon or Adonis, and the feast itself such as they celebrated. Silvestre de Sacy thinks that the name Tammuz was of foreign origin, and probably Egyptian, as well as the god by whom it was borne. In fact, it would probably not be difficult to identify him with Osiris, from whose worship his differed only in accessories. The feast held in honour of Tammuz was solstitial, and commenced with the new moon of July, in the month also called Tammuz; it consisted of two parts, the one consecrated to lamentation, and the other to joy; in the days of grief they mourned the disappearance of the god, and in the days of gladness celebrated his discovery and return. Tammuz appears to have

been a sort of incarnation of the sun, regarded principally as in a state of passion and sufferance, in connection with the apparent vicissitudes in its celestial position, and with respect to the terrestrial metamorphoses produced, under its influence, upon vegetation in advancing to maturity. See Lucian, *De Dea Syra*, sec. vii. 19; Selden, *De Diis Syris*, ii. 31; Creuzer, *Symbolik*, iv. 3; Fickenscher, *Erklär. d. Mythus Adonis*.—J. K.

TAN (תָּן), used only in the pl. תָּנִים or תְּנִין (Lam. iv. 3, where the Q'ri has תָּנִים, a mammal (*l. c.*) dwelling in deserts (Is. xiii. 22; xxxiv. 13; xxxv. 7; xliii. 20; Ps. xlv. 20; Jer. ix. 11; x. 22; xlix. 33), and distinguished by a wailing cry like that of a child (Job xxx. 29; Mic. i. 8). The LXX. (confounding the word with תָּנִין) give δράκοντες, σειρήνες, ἐχίνου, as the equivalent term, and the Vulg. *Sirenes & dracones* (but in Lam. iv. 3, *lamia*). Bochart (*Hieroz.* ii. 429) follows this, understanding by the word *huge serpents*. Much more in accordance, however, with the usage of the word is the opinion which Gesenius and Fürst adduce from Tanchum and Bar Bahlul, that it is the *jackal* that is thus designated. Or it may be the *hyena*.—W. L. A.

TANCHUM OF JERUSALEM B. JOSEPH JOSHUA, also called *R. Tanchum Jerushalmi*. Nothing was known of this distinguished grammarian, lexicographer, and commentator, who flourished A.D. 1265-1280, till the year 1791, when Schnurrer published ch. i.-xii. of his Arabic commentary on Judges. And though the indefatigable researches of Munk, Steinschneider, Haarbrücker, etc., have as yet failed to throw any light upon the life of this eminent expositor beyond the fact that he was a native of Jerusalem, the son of a learned Jew named Joseph Joshua, and that he must have lived shortly after the devastation of Palestine by the Mongolians (A.D. 1260), yet they have succeeded in bringing before Biblical scholars the valuable labours of R. Tanchum. It is now established beyond the shadow of a doubt that he wrote a commentary in Arabic on the whole O. T., entitled כְּתָבִיב אֱלֹהִים = *the Book of Exposition*. The commentary on the Pentateuch has not as yet come to light. A MS. of (1.) The Commentary on the Earlier Prophets—*i. e.* Joshua, Judges, Samuel, and Kings—is in the Bodleian Library, cod. Pocock. 314. In the same library are also MSS. of his (2.) Commentaries on Jeremiah, Ezekiel, and the Minor Prophets, cod. Pocock. 344; (3.) Commentaries on the five Megilloth (*i. e.* Song of Songs, Ruth, Lamentations, Ecclesiastes, and Esther) and Daniel, cod. Pocock.

320; (4.) כְּתָבִיב אֱלֹהִים אֶלְפִּתָּרוֹת, *the Haphtaroth, or the Lessons from the Prophets* [HAPHTARA], translated into Arabic, cod. Hunt. 607. These commentaries are preceded by elaborate introductions, treating on the general import of Holy Writ. He has also written (5.) An Arabic Lexicon to the Mishna, entitled אֶלְפִּתָּרוֹת אֱלֹהִים, *A Sufficient Guide*, treating on the relation of the language of the Mishna and of Maimonides' *Iad Ha-Chazaka*, which is written in this language to the Hebrew of the Bible—there are three different MSS. of this work in the Bodleian; and (6.) A Grammar of the O. T. Hebrew quoted by Tanchum himself, which has not as yet come to light (comp. Steinschneider, *Jewish Literature*, p. 138). The following portions of his great exegetical work have been

published:—(i.) Commentary on Joshua, edited by Haarbrücker in the *Wissenschaftliche Blätter aus der Veitel Heine Ephraimschen Lehranstalt*, Berlin 1862. (ii.) Commentary on Judges, cap. i.-xii., edited by Schnurrer, Tübingen 1791; cap. xiii.-xxi., edited by Haarbrücker, Halle 1847. (iii.) Commentary on Samuel and Kings, edited by Haarbrücker, Leipzig 1844. (iv.) Commentary on Habakkuk, edited by Munk in Cahen's Bible, vol. xii., Paris 1843; and (v.) Commentary on Lamentations, edited by Cureton, London 1843. R. Tanchum's contributions to Biblical exegesis are very important to its history. His commentaries are based upon the literal and grammatical meaning of the text. He frequently avails himself of the labours of Hai Gaon, Dunash Ibn Librat, Ibn Chajug, Ibn Ganach, Ibn Ezra, Maimonides, etc. etc.; rejects the traditional interpretations (comp. Comment. on Judg. xii. 7; xx. 28); transposes sundry portions of the sacred narratives so as to point out their chronological order (comp. Comment. on Judg. xviii. 1; xx. 28); and, like Maimonides, distinguishes different degrees and kinds of prophecy (Comment. on Judg. vi. 34; xiii. 1; xx. 28). Comp. Ewald, *Beiträge zur Geschichte der Ältesten Auslegung und Sprachklärung des A. T.*, vol. i. p. 151, ff., Stuttgart 1844; Fürst, *Bibliotheca Judaica*, iii. 56, etc.; Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 2666-2669; Graetz, *Geschichte der Juden*, vol. vii. p. 156, ff., Leipzig 1863.—C. D. G.

TANCHUMA B. ABBA flourished A.D. 380, was a disciple of R. Huna b. Abin (*Midrash Rabba* on Num., cap. iii. p. 27 a), a junior contemporary of Rabba (*Rosh Ha-Shana*, 21 a), Hillel II., and Julian, and is one of the last *Amoraim* [EDUCATION; MIDRASH] whose labours are mentioned in the Jerusalem Talmud. He is the reputed author of the celebrated traditional Commentary on the Pentateuch, a description of which is given in the article MIDRASH of this Cyclopædia. Comp. Graetz, *Geschichte der Juden*, vol. iv. pp. 458, 558, Berlin 1853; Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 2669; Fürst, *Bibliotheca Judaica*, iii. 409.—C. D. G.

TANNEEN (תַּנִּינִים, pl. תַּנִּינִים), a generic name for a large animal of the serpent class. It is used for a land serpent (Exod. vii. 9, x. 12; Deut. xxxii. 33; Ps. xci. 13; Jer. li. 34), and also of some monster of the deep (Gen. i. 21; Job vii. 12; Ps. lxxiv. 13, cxlviii. 7; Is. xxvii. 1, xxi. 9; Ezek. xxix. 3; xxxiii. 2 [where תַּנִּינִים is used]). In these last passages some suppose that it designates the *crocodile*; but this is purely conjectural. The A. V. renders by *whale* or *whales* in several of these passages, and there is no reason why this may not be accepted. The word is evidently used with very wide application.

The LXX. in some of these passages give *κῆτος*, and from the application of this term to the fish (דָּג) which swallowed Jonah, a very general belief has been established that this was a whale. The Greek word, however, no more fixes the meaning to *whale* than does the Hebrew; it is simply a generic name of wide significance (comp. Hesych. *in voc.*), and may be used of the shark or any large monster of the deep. It may be observed also that 'cetaceous animals, though less frequent in the Mediterranean than in the ocean, are far from being un-

known there. Joppa, now Jaffa, the very place whence Jonah set sail, displayed for ages in one of its pagan temples huge bones of a species of whale, which the legends of the place pretended were those of the dragon monster slain by Perseus, as represented in the Arkite mythus of that hero and Andromeda; and which remained in that spot till the conquering Romans carried them in triumph to the great city. Procopius mentions a huge sea-monster in the Propontis, taken during his præfecture of Constantinople, in the 36th year of Justinian (A.D. 562), after having destroyed vessels at certain intervals for more than fifty years. Rondoletius enumerates several whales stranded or taken on the coasts of the Mediterranean: these were most likely all *orcas*, *physeters*, or *campedolios*—i.e. toothed whales, as large and more fierce than the *mysticeles*, which have balein in the mouth, and at present vary rarely make their way further south than the Bay of Biscay; though in early times it is probable they visited the Mediterranean, since the present writer has seen them within the tropics. In the Syrian seas, the Belgian pilgrim Lavaers, on his passage from Malta to Palestine, incidentally mentions a 'Tonynvisch,' which he further denominates an 'oil-fish,' longer than the vessel, leisurely swimming along, and which the seamen said prognosticated bad weather. On the island of Zerbi, close to the African coast, the late Commander Davies, R. N., found the bones of a cachalot on the beach. Shaw mentions an orca more than sixty feet in length, stranded at Algiers; and the late Admiral Ross Donnelly saw one in the Mediterranean near the island of Albarran. There are, besides, numerous sharks of the largest species in the seas of the Levant, and also in the Arabian Gulf and Red Sea, as well as cetacea, of which *balæna bitan* is the largest in those seas, and two species of *halicore* or *dugong*, which are herbivorous animals, intermediate between whales and seals.—(C. H. S.)—W. L. A.

TAPPUACH (תַּפְּחִיחַ), translated 'apple' in the A. V., has been the subject of considerable difference of opinion among authors on Biblical Botany. Most admit that *apple* is not the correct translation, for that fruit is indifferent in Palestine, being produced of good quality only on Mount Lebanon, and in Damascus. Many contend that 'quince' is the correct translation of Tappuach. Though somewhat more suitable than the apple, we think that neither the quince tree nor fruit is so superior to others as to be selected for notice in the passages of Scripture where *tappuach* occurs. The Arabs use the word *toph* or *toofa*, which closely resembles this in a generic sense, as the Greeks used *μῆλον* and the Latins *pomum* and *malum*. Thus Dioscorides gives *Mala vulgaria*, *Cotonea*, *Persica*, *Armeniaca*, and *Medica sive Citria*. The last, or citron, we think, has the best claim to be considered the *Tappuach* of Scripture, as it was esteemed by the ancients, and known to the Hebrews, and conspicuously different, both as a fruit and a tree, from the ordinary vegetation of Syria, and the only one of the orange tribe which was known to the ancients. The citron, resembling the lemon in form, but distinguished by its thick rind, was the *μῆλον Μηδικόν* of Theophrastus, the *Μηδικόν* of Dioscorides, and for which he gives as a synonym *κεδρύμηλον*. It was called *citria* and *citromela* by the Romans, though their citron wood

was produced by *Thuya articulata* [THYINE WOOD]. That the citron was well known to the Hebrews we have the assurance in the fact mentioned by Josephus, that at the Feast of Tabernacles king Alexander Jannæus was pelted with *citrons*, which the Jews had in their hands; for, as he says, 'the law required that at that feast every one should have branches of the palm-tree and *citron-tree*' (*Antiq.* xiii. 13. 5). From this and other facts we conclude that the *Etz hadar* of Lev. xxiii. 40 has reference to the citron [ETZ HADAR]. There is nothing improbable in the Hebrews having made use of boughs of the citron, as it was a native of Media, and well known to the Greeks at a very early period; and indeed on some old coins of Samaria the citron may be seen, as well as the palm-tree; and it is not an unimportant confirmation that the Jews still continue to make offerings of citrons at the Feast of Tabernacles. Citrons, accordingly, are imported in considerable quantities for this purpose, and are afterwards sold, being more highly esteemed after having been so offered.

The *tappuah*, or citron-tree, is mentioned chiefly in the Song of Solomon (ch. ii. 3, 5; vii. 8; viii. 5). It occurs also in Prov. xxv. 11. In Joel i. 12 it is enumerated with the vine, the fig-tree, the palm, and pomegranate, as among the most valuable trees of Palestine. The rich colour, fragrant odour, and handsome appearance of the tree, whether in flower or in fruit, are particularly suited to all the above passages of Scripture.—J. F. R.

TAPPUAH, OR BETH-TAPPUAH. 1. (תַּפְּחָה), a city in the tribe of Judah, not far from Hebron (*Josh.* xv. 53). Robinson identifies it with an old village, called Teffuh, which he found upon the hills north-west of Hebron (*Bib. Researches*, ii. 428). 2. Another Tappuah lay in the plain of Judah, apparently in the vicinity of Zanoah, Jarmuth, Socoh, etc. (*Josh.* xv. 34): which of these was the place conquered by Joshua is not very clear (*Josh.* xii. 17; comp. x. 6). 3. Another place of the same name called also *En Tappuah* occurs on the confines of Ephraim and Manasseh (*Josh.* xvi. 8; xvii. 18). 4. And in 1 Chron. ii. 43 a man of this name appears.

TARES. [ZIZANION.]

TARGUM (תַּרְגּוּם, תַּרְגּוּמָא, *interpretation, translation*; exposition of one language by another, from תַּרְגָּם, תַּרְגָּם, *to interpret, to translate*) is the name given to a Chaldee version or paraphrase of the O. T., of which there are several extant, all belonging to the field of Hagadic literature. The origin of these paraphrases is bound up with the fortunes of the Jews in and after the Babylonish captivity. Among the exiles at Babylon the Hebrew language began to be lost, being gradually displaced by that of the conquerors, especially and soonest among the common people; while the educated retained it longer. The latter would naturally adhere to it more than the mass of the people, not only because of their acquaintance with books, but of their stronger attachment to the usages of their fathers. The decision of the question whether Hebrew became *entirely* extinct as a living language is partially connected with the meaning of two words in the book of Nehemiah—viz. מְבָרָשׁ and יְהוּדִית (viii. 8, and xiii. 24). Gesenius and Fürst explain

the former *distinctly, faithfully, exactly*; Hengstenberg, *illustrated, explained*—i. e. by an accompanying version into Chaldee. The latter term is understood by Gesenius to mean the Hebrew language; while Hengstenberg refers it to the Aramæan, or that which the Hebrews commonly used. In both cases Gesenius is right. It is improbable that the Hebrew language ceased entirely to be spoken after the race had returned from exile. Doubtless they had forgotten it to a great extent. Tenacious though they were of national peculiarities, they became more and more accustomed to the Chaldee. The old tongue continued to be the language of books; the other constituted a part of their ordinary discourse. We see, however, from Neh. xiii. 24, that Hebrew was still the people's language in the time of Nehemiah, whose patriotism rebelled against persons speaking a newly-adopted tongue. Soon after Ezra, perhaps, a few oral explanations in Chaldee were added by a public interpreter to the Sabbath lessons from the law and prophets. The Hebrew Scriptures were accompanied by occasional glosses or paraphrases in Chaldee. The interpreter was different from the reader. After the latter had read a passage or paragraph, the former took it up and translated it for the benefit of the congregation into Aramæan; and thus the two performed their duties alternately. But possibly the reader himself may have thrown in a word or two at first before the necessity for a separate expounder was felt.

The custom of extempore paraphrase seems to have occasioned palpable abuses. Hence definite hermeneutic rules were laid down, in conformity with which the interpretation of the law was to be conducted. It is easy to see how the value of written expositions would become apparent, when the freedom of the interpreter was abridged by established rules. The nature of the exposition required called for written interpretations. Thus oral gave rise to *written* explanations; the necessity of the latter becoming more visible when the liberty taken by the extempore translator was narrowed and restricted by rules. The surest and safest method was simply to read a version written for general use.

External circumstances were favourable to the existence of written explanations. The Hellenistic Jews were already in possession of the law in their own tongue. Other Greek versions, supplementary or in opposition to the Alexandrian, also proceeded from the Jews themselves, and obtained much approbation. In the midst of so general a desire to have versions of the O. T. in current dialects, it is natural to suppose that the Aramæan-speaking Jews should wish to possess translations in their vernacular. In Palestine, however, there was an obstacle to this. Targum, like halacha, belonged to the things that were not to be written. It was understood to be prohibited. But the obstacle could not prevail long against the stream which had set in; and the felt necessity of interpretation in one form or other, hagadic or halachic, forced itself into prominence. Zunz asserts that there were written Targums of several O. T. books in the time of the Maccabees—a doubtful statement unsupported by facts. It is true that an Aramæan version of Job belonging to the first century is mentioned; and it may be argued that it was not the first book rendered into the language of the people; but we are not inclined to put implicit

credence in the casual statements of Talmudical tracts and discussions, or of Toseftas, unless they have a character of truth in themselves. It is probable, however, that older Targums did exist, as intimated in various allusions to them in Jewish literature.

*Targum of Onkelos.*—This is usually placed first, both because it is on the Pentateuch or first five books of the O. T., and because it is thought to be the oldest extant. As to the author, the notices respecting him are obscure and unsatisfactory. Indeed we shall see many reasons for denying that he was Onkelos, and for attributing it to an unknown person or persons.

1. Of *Onkelos* the proselyte (אֲנֶלְלוֹס הַגֵּר) we read that he embraced the Jewish faith and became so devoted to it that, after sharing the paternal inheritance with his brothers, he threw his portion into the Dead Sea (*Tosefta*, *Demai*, vi. 9); that he burned, at the funeral rites of Gamaliel the elder, his teacher, garments and furniture worth 70 Tyrian minæ—that is, according to Graetz, 140 thaler or £21 (*Tosefta*, *Shabbath*, 8; *Semachoth*, 8; *Aboda Zara*, 11 a); that he was the son of Calonicus, sister's son of Titus; and before embracing Judaism conjured up from the other world the spirits of Titus, Balaam, and Christ, to ask them which nation was the happiest, who all answered the Jews (*Babyl. Talm.* *Gittin*, 56); that he was the son of Kalonymus, and having become a proselyte, the emperor sent three successive Roman cohorts to capture and bring him before the Roman tribunal, but he converted them all (*Aboda Zara*, 11 a); and that he made the Targum to the Pentateuch from the mouth of R. Eliezer and R. Joshua (*Megilla*, 3 a). All these statements are from the *Tosefta* and the Babylonian Talmud. There are other unimportant notices in the former (*Mikva'oth*, 6; *Kelim*, 3. 2; and *Chagiga*, 3. 1) and in the latter (*Baba Bathra*, 99 a).

2. Many notices of one אֲכִילָס or אֶקִילָס, *Akilas*, occur in Talmudic and hagadic literature, which bear considerable likeness to those of Onkelos. Putting both side by side, they strike the reader most. Both are said to have been proselytes (*Tosefta*, *Demai*, vi. 9; *Babyl. Talm.* *Gittin*, 56; *Baba Bathra*, 99 a; אֲנֶלְלוֹס הַגֵּר, *Irenæus*, *Adv. Haeres.* iii. 24; *Euseb. Demon. Evangel.* vii. 1; *Jerome, Ep. ad Pammach. Opp.* iv. 2. 255, Ἀκύλας προσήλυτος, *Aquila proselytus*); to have been related to a Roman emperor, Onkelos being the nephew of Titus (*Gittin*, 56 a), and Aquila son of Hadrian's sister (*Chag.* 2. 1; *Tanch.* 28. 1; *Epiphanius, De Pond. et Mens.* sec. 14, πενθερίδης). Both became converts to Judaism against the emperor's will. Of Onkelos, son of Kalonymus, it is stated that 'the emperor' sent three successive Roman cohorts to capture and bring him before the Roman tribunal, but he converted each (*Aboda Zara*, 11 a); of *Akilas*, that the emperor disapproved of his conversion (*Tanch.* 28. 1; *Shem Rabba*, 146 c). Both were friends and disciples of R. Eliezer, R. Joshua, and R. Akiba (*Megilla*, 3 a; *Ber. Rabba*, 78 d; *Jerome, Epistola* 57 *ad Pammachium*). Of Onkelos we read, 'The Targum to the Pentateuch was made by Onkelos the proselyte from the mouth of R. Eliezer and R. Joshua' (*Megilla*, 3 a); and of *Akilas*, 'Akilas the proselyte made a version under the auspices of R. Eliezer and R. Joshua, and they praised him'

(*Megilla*, 1. 9). The conclusion drawn from these notices is, that Onkelos and *Akilas* are identical; else there were two persons living at the same time whose names were almost the same, both nephews of the reigning emperor, both converts to Judaism, disciples of R. Eliezer and R. Joshua, and both translators of the O. T. under the sanction of these rabbis.

3. There is abundant evidence that *Akilas* is identical with *Aquila* the Greek translator. Fourteen passages have been collected from the Talmud and other Jewish books in which he is cited, and these agree substantially with what we know of *Aquila's* Greek version by existing fragments. After the argument of Anger, to prove the identity of *Akilas* and *Aquila*, it is needless to say more on the point (*De Onkeloso Chaldaico*, particula 1, Leipzig 1845, 4to). The only obstacle to this at all plausible, and which Anger has not removed, is the fact that to the same *Akilas* from whom Greek words are cited, a Hebrew expression (*Bereshith Rabba*, cap. 21, and *Kiddushin Jer.* 1. 1) is assigned; while in *Yalkut*, ii. sec. 961, an Aramæan paraphrase of *Prov.* xxv. 11; in *Midrash-Kohleth*, 113 c, an Aramæan paraphrase of *Isaiah* v. 6; and in *Yoma Jer.* iii. 8, the half-Aramæan half-Greek *lokobel lampados*, are attributed to him. But with respect to *Isaiah* v. 6, *Akilas* is a mistake for *Jonathan*, the passage being actually found in the latter; and the word *lokobel* may belong to the narrator. The true solution is, that citations were sometimes made merely according to the sense of a phrase, which is the case here. In one instance at least the same translation, and that in Greek, of an expression in *Ezekiel* xvi. 10, which is ascribed in the *Midrash* on *Canticles* to *Akilas* (27 d), is given to Onkelos in *Midrash-Echa*, 58 c.

4. If *Akilas* and *Aquila* be one, it follows from the parallel accounts of Onkelos and *Akilas* that Onkelos and *Aquila* are the same person. It is most unlikely that the circumstances and facts narrated could have belonged to two different individuals.

5. It cannot be denied that there are points of discrepancy which militate against the identity of *Akilas* or *Aquila*, and Onkelos. One is, that *Aquila* belonged to the reign of Hadrian, about 130 A.D.; whereas Onkelos is brought into connection with *Gamaliel the elder* (*Tosefta*, *Shabbath*, 8; *Aboda Zara*, 11 a; *Semachoth*, 8). This is obviated in a summary way by Graetz, who assumes a transcriber's mistake in the word *elder*. If, as he supposes, *Gamaliel II.* be intended, the time will agree (*Geschichte der Juden*, vol. iv. p. 152). But in *Tosefta*, *Mikva'oth*, 6. 1, and *Kelim*, 3. 2, *Gamaliel* is mentioned without הַזֶּקֶן attached, implying apparently that it was *Gamaliel II.* It is not very probable, though indeed possible, that *Gamaliel I.* is meant there, though Anger inclines to that opinion (see Bartolucci, *Biblioth. Rabbin.* vol. iii. p. 266). But another discrepancy comes in the way; for Onkelos is said to have been the nephew of Titus, or, as it is in a MS. belonging to the Senate of Leipzig, grandson of the impious Titus (Anger, *De Onkeloso*, particula ii. pp. 11, 12). But the connection of Onkelos with R. Eliezer and R. Joshua favours the Hadrian chronology. It is also urged by Frankel against the identity of the two that *Akilas* and the Targum Onkelos not only differ in many places, but translate in a way oppo-

site to each other (*Ueber den Einfluss der palaestinensischen Exegese auf die alexandrinische Hermeneutik*, pp. 15, 92, 101). This objection is invalid, not only because we have no certainty of the fragments collected by Montfaucon being really Aquila's, Origen's labours having created great confusion; but because the identity of *persons* does not imply identity of *versions*. The book of Zohar also (sect. *אחרי כות* on Lev. xviii. 4) makes Onkelos a disciple of Hillel the Babylonian who flourished sixty years B.C.; but the late origin of this work renders it of little authority.

6. The connection of Onkelos with the Targum that bears his name is first mentioned in the Babylonian Talmud, where we read: 'The Targum to the Pentateuch was made by Onkelos the proselyte from the mouth of R. Eliezer and R. Joshua; the Targum to the prophets was made by Jonathan Ben Uzziel from the mouth of Haggai, Zechariah, and Malachi. . . . But have we not been taught that the Targum existed from the time of Ezra? . . . Only that it was forgotten, and Onkelos restored it.' It is easy to see that the latter part of this passage is unhistorical—viz. that relating to the Targum of Jonathan Ben Uzziel, and the existence of Onkelos's Targum from Ezra's time. Internal evidence contradicts these statements. The fact of Onkelos's restoration of the version is very like the alleged restoration of Scripture ascribed to Ezra, and deserves the same credit. If therefore the greater part of the passage be fabulous, why should not the whole be so? This supposition is confirmed by the circumstance that the Jerusalem Talmud attributes the same thing to Akilas's Greek version, which is here assigned to that of Onkelos the proselyte. 'R. Chiya bar Abba said (as the same Rabbi said of Onkelos the proselyte), Akilas the proselyte made a version before (with the approbation of) R. Eliezer and R. Joshua, and they praised him.' Here is the origin of Akilas's version; and the same repeated in an enlarged and fabulous form is predicated of Onkelos's. In their ignorance of the author of the paraphrase, the Babylonian Jews, writing Akilas, *Onkelos*, which is only another orthography, repeat the account of the former in such a manner that it becomes a statement about a different person and a different version. The Jews of Tiberias, if we may judge from the silence of the Jerusalem Talmud, were ignorant of the existence of Onkelos's Targum. At least they never quote it or refer to its author, and therefore it is probable that it was not made in their time; or possibly, it had not attained to a definite form and character.

But how does the Babylonian Talmud refer to the Chaldee paraphrase of Onkelos? It often refers to it, and never in connection with his name. It uses the introductory *כדמרתנמינ* (as we paraphrase), *הרגנו דנן* (our Targum), or *כדמרגנו* (as the Targum has it). On the other hand, Akilas's version is always cited in the Talmud by the name

of its author *הרגנו עקילס*. Does not this throw a grave doubt on the relation of Onkelos to the Chaldee paraphrase? Had he been its author, it is natural to think that the work would have been quoted with his name.

Again, there is a wide interval between the time when the origin of the Targum is ascribed to Onkelos in the Babylonian Talmud in that unhistorical passage, and its next citation as his. In

the Pirke R. Eliezer (chap. 38), a midrash of the 8th or 9th century, the Targum is quoted as *the paraphrase of Onkelos*. It is afterwards cited in the same manner by Ibn Koreish and Menachem ben Saruk, as well as by Donash Ibn Librat. And Rashi frequently quotes the Targum of Onkelos. None of these lived later than the 12th century. We need not apply to the passage in Eliezer the terms 'ziemlich verdächtig' as Geiger does; nor is it correct to say with Levi, that for three centuries after Eliezer the version was almost always quoted without its authorship being ascribed to Onkelos, as we have just seen (Geiger's *Zeitschrift*, vol. v. pp. 185, 186). The fact, however, remains indubitable, that the paraphrase is not attributed to Onkelos till the 9th century. We conclude therefore, from all the circumstances of the case, that Onkelos, the author of the Chaldee version, is a mythical person; and that the real author is unknown.

7. In consequence of the identity of Aquila and Onkelos it may be asked, Did the Greek translator of the O. T. make a Chaldee version also? Was he the author of the Targum commonly ascribed to the son of Kalonymus? The answer must be in the negative. What then is meant by *Targum Onkelos*? Or to what is the allusion when a Chaldee, not a Greek, version is associated with the name of Aquila or Onkelos? Here we must limit our answer to the person or persons that first employed such phraseology, as far as we know them. It is a common opinion among modern Jewish critics, that *Targum Onkelos* means simply a version made after the manner of Akilas the Greek translator. Aquila's translation was a special favourite with the Jews, because it was both literal and accurate. Being highly valued, it was considered a model or type after which the new Chaldee one was named, in commendation perhaps of its like excellences. Such is the view proposed and adopted by Levi, Luzzatto, Geiger, Jost, Frankel, Graetz, Herzfeld, and other Jews. It is very ingenious, and saves the credit of the Babylonian Jews to some extent; but it is hardly probable. Whatever may have been the opinion of Jewish critics respecting the author of the Chaldee version in the 9th and following centuries (and we believe that they thought him to be Onkelos), the Babylonians, from whom the version proceeded, could scarcely have associated Onkelos's name with it for the reason now given. The passage from the Babylonian Talmud already cited is adverse to the supposition. The Babylonians knew nothing of the original translator. In their ignorance they betook themselves to the well-known name of the Greek translator, to whom they assigned a more facile appellation than *Akilas*, which was unknown to Jews not speaking Greek—viz. *Ankelos* or *Onkelos*. They may have thought that Akilas began the Chaldee also; or rather, they gave his name to the version without having other reason for it in their minds than that the name was known and in repute among the Palestinian Jews. Their motive was probably neither a definite nor a rational one; and had more of blunder in it than aught besides. When they said that Onkelos restored it, they could not have been influenced by the cause which Geiger and others assume.

If our observations be correct, Onkelos was neither the author of the Targum nor a historical person. Various circumstances render it probable

that the work was of Palestinian origin. The lexical basis belongs to Palestine. We suppose that it was Palestinian in its first stage only. There may be some truth in the passage from the *Bab. Gen. Megilla*, fol. 3 a, where the Rabbis Eliezer and Joshua are represented as the depositaries of ancient tradition, which they communicated orally to another, who made it public. Perhaps something more is intended by the expression *כופי* than mere *approval*, as Luzzatto after R. Azaria,\* supposes (Philoxenus, prol. p. viii.) Traditional interpretations were embodied in the version, but its form was incomplete. It remained in a fluctuating, unfixed state for a considerable period in Palestine. Even to the 2d century, if not the 3d, its readings were indefinite. But when it passed out of Palestine, it underwent much alteration in the hands of the Babylonian Jews. From them it received midrashic additions, and got that definite form which it has retained ever since. It has been supposed, not without reason, that R. Joseph and his contemporaries brought it to its final redaction (Levi in Geiger's *Zeitschrift*, v.); but it is now impossible to trace the various stages of improvement through which it passed, till it appeared complete about the end of the 3d century. The language certainly bespeaks a Babylonian rather than a Jewish locality; its grammatical and dialectic complexion savouring of Babylon. The dialect strongly resembles that of the Babylonian Talmud, though it is purer—very much purer than the dialect of Palestine. Levi has rightly called attention to the facts that *the Euphrates* is always *the river*, *נהר*, showing that the version is preeminently Babylonian; and that Persian words are found in it, as was natural in Babylon. Thus both Eichhorn and Winer are right, though neither exclusively so; the version being neither entirely Babylonian nor entirely Palestinian.

Let us now consider the work itself.

It is literal, adhering to the Hebrew text closely, and giving the sense intelligibly and rightly in the majority of instances. It is a faithful version on the whole, the Aramaean dialect employed being pure, and approaching in character to that of Daniel and Ezra. The original is followed word for word, with occasional paraphrastic interpolations. All the grammatical peculiarities which appear in Daniel and Ezra are observable in Onkelos; such as a *Haphel* for an *Aphd*; *yod* to denote the third person masculine future not *nun*; the syllable *ilh* not *mith*, before infinitives passive, etc. etc. Abridgments of words which appear in other Targums, are absent, as in Daniel and Ezra—*ex.gr.* *אָנָשׁ*, Onkelos i. 26; vi. 4; vii. 27; Dan. ii. 10; Ezra iv. 11; not *נָשׁ*, *תַּרְתִּי עֲשִׂי*, Gen. v. 8: whereas we find *תַּרְתִּי עֲשִׂי* in the Jerus. Targ. Gen. xiv. 4; *חִמֵּשׁ עֲשִׂי*, Gen. v. 10; whereas in Jon. Lev. xii. 5 *חִמִּיִּר*: *אֲוֹתָן*, Gen. iv. 25, but *הוֹן* Lev. xviii. 9 Jon. : *יָהֵב*, Gen. iv. 25, not *יָב*, as in the Jerusalem dialect.

Notwithstanding the usual literalness and exactness of Onkelos, his rendering is sometimes less faithful than one could desire. In Gen. xlviii. 22

\* כהסכמם כי ראוהו ויהללוהו, according to their approval, because they saw and approved it (*Meor Enayim*, p. 145).

the translator renders *וְאֵנִי נָתַתִּי לְךָ שֵׁכֶם אֶחָד* by *וְהִבֵּית לְךָ חֵד חוֹלֶק*, and *I give thee one part*, and *וְאֵלֶּה לְקַבֵּל אֶפְדָּךְ* in xlix. 4 by *פָּחוּ בְּמִים*, *thou hast been carried away by thine anger*. In Gen. iii. 15 he renders, *הוּא יְהִי דְכִיר לְךָ מִה דְעֵבְרְתָ לִיה*, *he shall remember to thee what thou hast done to him from the beginning; and thou shalt watch him unto the end*. In Gen. xvi. 13 the Hebrew words *וְהָלַם רְאִיתִי* *אָף אֲנִי* are perhaps rightly rendered *אָף אֲנִי*, *I have even remained seeing after he has been revealed to me*. Though the interrogative *הָ* is omitted, the sense is the same. But probably the *וְהָלַם רְאִיתִי* of Buxtorf should be pointed *וְהָלַם רְאִיתִי*, *I have begun*, and so the translation would be, *Have I indeed begun here to see after him who has been revealed to me?* In Gen. iv. 23, Onkelos translates *לֹא נִבְרָא קְטָלִית דְּבִרְלִיָּה אֲנָא סָבֵל חֻבִּין וְאָף זֶרְעִי*—i.e. *I have not slain a man for whose sake I might bear guilt; nor have I slain a young man for whose sake my seed might be destroyed*. He has taken *כִּי* interrogatively, and rendered the affirmative interrogation by a negative. In Deut. xxxii. 2, *יַעֲרֹךְ בְּמִטָּר* is represented by *יִבְסֵם*, *will be sweet*. In Gen. xiv. 14, the version has *וְהָיוּ יָת עֲלָמוֹהִי*, *he armed his young men*. In Gen. vi. 3 it has *לֹא יִתְקַיֵּם דְּרָא*, *they shall not exist before me for ever, because they are flesh, and because their works are evil*. Onkelos is not happy here.

2. The translator is least satisfactory in the explanation of difficult words and passages. Here he is not unfrequently incorrect, as in Gen. xx. 16, where the words *וְאֵת כָּל וְנוֹכַחַת* are paraphrased *וְעַל כָּל מַה דְּאִמְרַת אֲתוֹכַחַת*, *and with respect to all things which she said she was reproved*. In Gen. xlix. 10, the passage is referred to the Messiah, and *שִׁילָה* explained as = *שָׁלֹן*, *'whose is the rule.'* *בֶּר פֶּרֶנְסָא*, Gen. xv. 2, is rendered *בֶּר פֶּרֶנְסָא*, *son of government or governor*, which is contrary to the true sense of the words. The difficult passage Gen. iv. 7 is thus rendered, *וְאֵם תּוֹמִיב עוֹבְדָךְ לְיוֹם דִּינָא*, *shall not pardon be given thee if thou doest well; but if thou doest not well, thy sin shall be preserved till the day of judgment*, etc. Here *שָׂאָת* is taken from *נִשָּׂא*, and referred to the *taking away of sin*, not to the *lifting up of the countenance*. In Gen. xlix. 5, Onkelos, reading *כָּל* for *כָּלִי*, with the Samaritan, renders *בְּמִכְתִּיהֶם* by *בְּאֶרֶץ תּוֹתְבוֹתָהוֹן*, *in the land of their habitation*. In Gen. xxii. 14 there is the paraphrastic render-

12. In employing Onkelos as a source of emendation the Hebrew text great caution is needed—far more than Cappellus and his disciples have been disposed to exercise. Very rarely can we claim to be used in this capacity. Here it is easy to fall into error, and attribute to the text from which he translated what is owing to his ignorance, carelessness, or fancy. Thus we might suppose that Onkelos read  $\text{לֵךְ} \text{לְפָנַי}$  in Lev. vii. 25, because he has  $\text{לֵךְ} \text{לְפָנַי}$  there, especially as the latter reading is found in some MSS. But this is improbable, because  $\text{לֵךְ} \text{לְפָנַי}$  is his usual rendering of  $\text{לֶחֱבֹד}$ . See Exod. xxix. 18, 25; 41; Lev. i. 9. In Lev. vii. 21, Onkelos may also have had  $\text{לֵךְ} \text{לְפָנַי}$ , a *vulgate*, for the present Hebrew  $\text{לֵךְ} \text{לְפָנַי}$ ; with which agree various MSS. of Kennicott and De Rossi, and the Samaritan, Syriac, and Arabic versions. But we doubt if the term  $\text{לֵךְ} \text{לְפָנַי}$  be the authentic and primitive word. In Gen. xlix. 24, where  $\text{לֵךְ} \text{לְפָנַי}$  is joined with Israel, Cappellus thinks that the reading found by the Targumist was  $\text{לֵךְ} \text{לְפָנַי}$ , being caused he translates, *the strong God of Jacob who nourished by his sword* (or by himself) *fathers and sons* ( $\text{אֲבוֹתָם בְּסִיף}$ ). But Onkelos has merely indulged a play of fancy (*Cynthia Savar*, ed. Schaffenburg, ii. p. 792). Again, De Rossi supposes that Onkelos read  $\text{לֵךְ} \text{לְפָנַי}$  instead of  $\text{לֵךְ} \text{לְפָנַי}$  in Exod. xxiv. 7, because he renders  $\text{לֵךְ} \text{לְפָנַי}$  (*Variæ lectiones Vet. Testamenti*, vol. i. p. 68); but this is incorrect, since  $\text{לֵךְ} \text{לְפָנַי}$  is usually rendered in the same manner, as in Gen. xx. 8. It is possible that the text of the Chaldee has been tampered with, and adapted to the Hebrew by additions or alterations. The temptation to do this was very strong in the case of those early copies of the Pentateuch who placed the Hebrew and Chaldee in parallel columns. As an example of a late addition, we may instance  $\text{לֵךְ} \text{לְפָנַי}$  along with  $\text{לֵךְ} \text{לְפָנַי}$ , where the first word has been inserted out of Jonathan's Targum. In not a few cases its text can be emended by the help of Jonathan's, which was based upon it. Thus in Gen. xxii. 13, where there are two translations, one of the reading  $\text{לֵךְ} \text{לְפָנַי}$  (viz.  $\text{לֵךְ} \text{לְפָנַי}$ ), and another of  $\text{לֵךְ} \text{לְפָנַי}$  (viz.  $\text{לֵךְ} \text{לְפָנַי}$ ), Jonathan has only  $\text{לֵךְ} \text{לְפָנַי}$ . Hence one is a gloss—a *glossula*. Hence one is a gloss— $\text{לֵךְ} \text{לְפָנַי}$ . Luzzatto has failed to see this (Philoxenus, p. 39). In other cases the text may be corrected by collating various editions, especially the oldest ones. Thus in Gen. xviii. 21, Buxtorf's reading, which is that of the Amsterdam edition (1681), the Complutensian, and an edition published in 1517, all differ. The second of these is defended by Luzzatto, but unsuccessfully; for there is little doubt that the third has the original—viz.  $\text{לֵךְ} \text{לְפָנַי}$ .

We must not however go so far as Frankel appears to do, in assuming that wherever a double translation occurs, one is a gloss, and did not proceed from the translator himself. The gradual growth of the version accounts for the existence of these twofold readings, even after the work was finally redacted (see Frankel's *Monatschrift* for 1861, p. 77, et seq.)

Etheridge; Genesis and Exodus in 1862; Leviticus and Numbers, 1865. This translation, however, is inaccurate.\*

See Smith, *Diatriba de Chaldaicis paraphrastis*, 12mo, 1662; Wolf, *Bibliotheca Hebraea*, vols. ii. and iii.; Zunz, *Die gottesdienstlichen Vorträge der Juden*, 1832, 8vo; Levi in Geiger's *Wissenschaftliche Zeitschrift*, vol. v.; Luzzatto in the same; Winer, *de Onkeloso ejusque paraphrasi Chaldaica*, 1820, 4to; Anger, *de Onkeloso Chaldaico*, 1845, 1846, 4to; Herzfeld, *Geschichte des Volkes Israel*, vol. iii.; and Geiger, *Urschrift und Uebersetzungen der Bibel*, 1857. Luzzatto's *אורח נר* sive *Philoxenus*, etc. distributes the deviations from the Hebrew into thirty-two classes, and endeavours to emend the text from MSS.; but the genius of the version is not well described in it. Isaiah Berlin's *ספר מיני* 1831, throws little light on the paraphrase; and Berkowitz's treatise, principally on the hermeneutics of Onkelos, *עוטה אור*, 1843, 8vo, is of no great importance.

*Jonathan Ben Uzziel on the Prophets*—i.e. Joshua, Judges, Samuel, Kings, Isaiah, Jeremiah, Ezekiel, and the twelve minor prophets.—Little is known of the reputed author of this Targum. The Talmud says of him, that 'he was the greatest of the eighty disciples of Hillel . . . and when he sat at work upon the law every bird flying over him was burnt (*Baba Bathra*, 134 a; *Succa*, 28 a). He wrote the paraphrase of the prophets from the mouth of Haggai, Zechariah, and Malachi. Then was the land of Israel shaken three hundred parangs. The Bath-Kol went forth and said, Who has revealed my secrets to the sons of men? Jonathan ben Uzziel stood upon his feet and said, It is I who have revealed thy secrets to the sons of men, etc.' (*Megilla*, 3 a).

Both internal and external evidence is opposed to this early authorship. The passage itself is sufficiently fabulous to prevent any one attaching authority to it; and the paraphrase was not quoted as Jonathan's till a comparatively late period. The Babylonian Talmud and other authorities of the same country adduce it as 'ours,' or associate it with the name of Joseph ben Chama in the 4th century, who appears to have occupied himself much with its elaboration. Even Hai Gaon (A.D. 969-1038), quotes it as the Targum of R. Joseph (*Comment. on Tohoroth* [Kelim], c. 17, 29, 30; *Oholoth*, c. 1, 8, 9, 18). It is only the later Rabbis who call it 'the Targum of Jonathan.' A comparison of this Targum with that of Onkelos will show that it is not so old. The language is less pure, and its nature haggadic to a very considerable degree. It is pretty largely sprinkled with fables, allegories, legends, superstitions, fancies, and references to later occurrences. It is true that several of the latter may be subsequent interpolations; a supposition confirmed by the fact that some of them are absent from the text in the Antwerp Polyglott; but the general tone betrays a

later time. Besides, Jonathan cites the words of Onkelos (Judg. v. 26, comp. Deut. xxii. 5; 2 Kings xiv. 6, comp. Deut. xxiv. 16; Jer. xlviii. 45, 46, comp. Num. xxi. 28, 29). Herzfeld's explanation of this identity cannot be admitted—viz. that Aramaean glosses on the Pentateuch existed before the time of Jonathan, which passed into later paraphrases, so that the coincidence of the passages is accidental (*Geschichte des Volkes Israel*, vol. ii. p. 64). That the dialect is substantially the same as that of Onkelos, and only less pure to a small extent, is apparent. It is therefore highly probable that a similar origin belongs to both, as well as a similar redaction. Palestine was the birth-place of the present Targum as it was of Onkelos's. But it did not come to maturity there. It only commenced in exegetical glosses, perhaps in the 2d century. We do not suppose that Jonathan ben Uzziel, if such a person ever existed, had aught to do with it. In its incipient state it arose out of the readings of the prophets in the synagogues. When Jewish literature sank in Palestine, and Babylon became its centre, much attention was given to Targumic exposition; and the existing bases of written paraphrases were enlarged, elaborated, and completed. Successive stages of development brought both Onkelos and Jonathan to their present condition. We shall not be far wrong in placing about a century between the final redaction of the two; that on the prophets being a continuation of the other, and completed at the end of the 4th century. The same persons were probably concerned with both—viz. R. Joseph and his companions or disciples. If it be probable that this celebrated president of the academy at Pumpadita was busied with the Targum on the law, it is more likely that he took part in the redacting and perfecting of that on the prophets, because in the Babylonian Talmud and later authorities the latter is expressly referred to him. If this view of the Targum be correct, the question discussed by Eichhorn, Bertholdt, and Hävernick, respecting one author or more, ceases to be of importance. None of these critics is right; though the first two are nearer the truth than the last. Hävernick's argument in favour of one author is singularly unfortunate, because the uniformity he seems to perceive does not exist. The mode of translating in the historical and prophetic books is somewhat different. Many contributed to the work, some in Palestine, more in Babylon.

It is difficult to tell whether Jonathan be a mythical person or not. He may have been conjured up for the purpose of authorship to the Targum before us. The only passages in the Talmud that speak of him are pitched in a high key of laudation. Had the Talmud associated the passages it quotes from the Targum with his name as author, we should have been more inclined to believe in his existence; but that is not the case. There R. Joseph the blind receives the credit of having made the version. Without denying the existence of Jonathan we hesitate to believe that he had any share in the Targum commonly ascribed to him. The putting of the gate Pickum for Hananeel in Jer. xxxi. 38; Zech. xiv. 10; and of the pool Eglā for Goath (Jer. xxxi. 39), do not prove, as Herzfeld supposes, that Jerusalem was still standing when Jonathan made the version; for the names may have been handed down by tradition (*Geschichte*, ii. p. 61). It is absurd to suppose that

\* Thus in Deut. i. 7 he translates *מְגִירוֹתָי* 'its habitable places,' whereas it should be *חִס* or *חִסְתָּי* 'its neighbours.' In Deut. xxxiv. 9 he renders 'the Lord God commanded (by) Moses;' whereas the Chaldee can only mean, *commanded Moses*. The sign of the accusative *מִן* precedes the name Moses. Instances showing that the translator is but slightly acquainted with the language might be multiplied.

it was made 'from the mouth of Haggai, Zechariah, and Malachi,' as is alleged; or that veritable traditional interpretations belonging to those prophets were written down for the first time by Jonathan. The Babylonians were ignorant of the origin of the version, and associated it in their Talmud, in a single passage, with an individual of whom they knew but the name. That name, however, they surrounded with a halo of wonders to ennoble the commencement of the work.

Luzzatto (in Geiger's *Zeitschrift*, v. p. 124, etc.) and Geiger (*Urschrift*, pp. 163, 164) suppose that as *Jonathan* is the same with the Greek *Theodotion*, the Babylonians gave this name to the paraphrase—especially as they were acquainted with that of Jonathan ben Uzziel—to indicate that the Targum was *after the manner* of Theodotion, like the reputed origin of the name *Onkelos* in connection with the Greek *Akilas* or *Aquila*. The conjecture has no support or probability. Why should the Babylonians attribute the original composition of the Targum to Jonathan son of Uzziel in one place of the Talmud, and also quote it repeatedly as R. Joseph's, if they believed that it was merely made *after the manner* of Theodotion's Greek translation? They must have been ignorant to think that the genius of the two versions was alike. So far from their being similar they are the reverse. Theodotion was a skilful and competent translator, the other not. It is needless to allude to the oldest form of this hypothesis—viz. that Jonathan the Chaldee translator, and Theodotion the Greek one, were one and the same person. Drusus refuted that notion by a reference to their respective times; and Schickard showed that it proved too much, because Jonathan might be identified with Theodosius for the same reason.

In the historical books the exegesis is simple and tolerably literal. A few words are added occasionally, which have no representatives in the original, but they are not many. The interpretation is good, giving the sense fully and fairly. But in the prophetic books the text is more freely handled. Here it is often paraphrastic and haggadic. Allegorical senses are introduced, and the fancy is indulged. The obscurity and difficulty of the prophets may serve to account for this. The translators could not be very literal and intelligible at the same time; at least they did not try to combine the two. Amid the poetical pictures of Israel's future and the ideal hopes of the prophets, the temptation to paraphrase and amplify was natural. The introduction of haggadic elements detracts from the merits of the version; and although it is historically interesting to note the theological views of the time that are interwoven with the text, they lessen the real value. Extraneous additions, legendary ideas, and distortions of the true sense, cannot be other than blemishes.

1. In order to amplify the meaning a few words are inserted. Thus in 1 Sam. ix. 7, after *נִיחַל* are put *וְאִם מְקַבֵּיל מוֹמֹן*, and if he take money. In ix. 16, instead of 'For I have looked upon my people because their cry is come unto me,' the paraphrase has *אֲרִי גִלִּי קִרְדִּי וְהִתְקַא דַּעְמִי אֲרִי עֲלַי*, *אֲרִי גִלִּי קִרְדִּי וְהִתְקַא דַּעְמִי אֲרִי עֲלַי*, *קִבְּלִיתָהוֹן לְקִרְדִּי*, for the affliction of my people is revealed to me because their cry has come up before me. In 1 Sam. vi. 19, where the Hebrew runs,

'And he smote the men of Beth-shemesh because they had looked into the ark of the Lord, even he smote of the people fifty thousand and three-score and ten men,' the Chaldee has *וְקָטַל בְּנֵי בֵּית שֶׁמֶשׁ עַל דְּחִירָא דְּחִיזוּ אֲרֹנָא דִּי בְּדִ גִּלִּי וְקָטַל בְּכֶרֶי עֲמָא שְׁבַעִין אֲנָרָא וּבְקִהְלָא חֲמִשִּׁין*, and he slew of the men of Beth-shemesh because they rejoiced at their seeing the ark of the Lord when it appeared, and he slew of the old men of the people seventy men, and of the multitude fifty thousand men, etc. In Is. vi. 3, the cry of the seraphim, 'Holy, holy, holy, Lord of hosts' is enlarged thus, *קִדִּישׁ בִּשְׁמַי מְרוֹמָא עֲלֵאָה בֵּית שְׁכִנְתָּיה קִדִּישׁ עַל אֲרַעָא עוֹבֵד*.

—i.e. *הַבְּהִרְתִּיהָ קִדִּישׁ לְעֵלְמָא וּלְעֵלְמִי יִי צְבָאוֹת*, holy in the lofty heavens, most high, the house of his glory; holy on earth, the work of his power; holy for ever, and to ages of ages, the Lord of hosts.

2. Figures of speech are freely resolved and converted into prose. Thus in Is. ii. 13, etc., the *cedars* and *oaks* are converted into *princes*; the *towers* and *fenced walls* are changed into the *inhabitants* of towers and fortresses; and the *ships* are rendered *rich, sea-faring merchants*. In Is. v. 1-6, the whole parable disappears before a lengthy explanation (comp. also xxii. 23, 24).

3. Haggadic and inflated paraphrase is not infrequent in the prophetic portion. Thus in Is. lxii. 10 we have: 'The prophet said, Pass and return through the gates; turn the heart of the people to the right way; announce good news and consolations to the righteous, who have taken away the thoughts of lust, which was as a stone of stumbling; lift up a standard to the people.' In Is. xxviii. 10 we find: 'As it was commanded them to keep the law, they would not do what was commanded them. The prophets prophesied to them that if they turned, their sins should be forgiven them; but they did not adopt the words of the prophets, but walked after the lust of their souls, and had no desire to do the law. They waited that idolatry might be confirmed in them, and did not wait upon the service of my holy temple. Little esteemed in their eyes was my sanctuary that they should worship there. Little esteemed in their eyes was my habitation there.'

4. The meaning is changed and distorted. Thus in 1 Sam. vii. 2, where we read: 'And all the house of Israel lamented after the Lord,' *וְאִתְנַהֲיָא כָּל בֵּית יִשְׂרָאֵל בְּתַר פּוֹלְחָנָא דִּי*, and all the house of Israel were assembled after the worship of Jehovah. In 1 Kings iii. 19 we read the words: 'and we were together; there was no stranger with us in the house;' but the Chaldee has *וְאִתְנַהֲנָא בְּחֻדָּא וְזָבָאִין*, and we were together innocent, and there was no stranger, etc.

5. In various instances the original is entirely forsaken, and what is foreign put in its place. Thus in Is. vii. 3, for the name of the prophet's son *Shear-jashub* we have in the paraphrase, *שְׂאֵר תְּלִמְיָדָה דְּלֵא חֲטוּ*, the remnant of thy disciples who have not sinned.

6. Anthropopathic expressions, and others of a like nature applied to God, are generally removed from the text. Thus in Is. i. 18, where the Lord says 'let us reason together,' the Chaldee puts *חֲבַעֲוֵן מִן קִרְדִּי*, ask of me.

7. A number of Greek words appear in the version. Thus in Judg. i. 11 it has אַרְכִּי (ἀρχία), archives; Is. ix. 14, הֶיְמוֹן (ἡμεών). קְרוֹנָה 1 Kings vii. 16, 17, 20, is probably the Latin *corona*, though Hävernicks thinks otherwise.

8. The following places in the Talmud adduce this version, all with the name of R. Joseph:—Moed Katon, 26 a, 2 Kings ii. 12; Pesachim, 68 a, Is. v. 17; Sanhedrin, 94 b, Is. viii. 6; Menachoth, 110 a, Is. xix. 18; Yoma, 77 b, Is. xxxiii. 21; Aboda Zara, 44 a, Is. xli. 16; Yoma, 32 b, Jer. xlv. 20; Kiddushin, 13 a, Hosea iv. 2; Nedarim, 38 a, Amos vi. 7; Baba Kama, 3 b, Obad. vi.; Berachoth, 28 a, Zeph. iii. 18; Kiddushin, 72 b, Zech. ix. 6; Moed Katon, 28 b, and Megilla, 3 a, Zech. xii. 11.

9. Many passages are referred to the Messiah, even such as do not rightly belong to him; so that no polemical tendency against Christians appears in the version. The following is a list of them:—1 Sam. ii. 10; xxiii. 3; 1 Kings iv. 33; Isaiah iv. 2; ix. 6; x. 27; xi. 1, 6; xv. 2; xvi. 1-5; xxviii. 5; xlii. 1; xliii. 10; xlv. 1; lii. 13; liii. 10; Jer. xxiii. 5; xxx. 21; xxxiii. 13, 15; Hosea iii. 5; xiv. 8; Micah iv. 8; v. 2, 18; Zech. iii. 8; iv. 7; vi. 12; x. 4. We do not find in the explanation of Isaiah, 53d chapter, the doctrine of a suffering and atoning Messiah, as Hengstenberg does. Indeed the chapter generally refers to the Jewish people, especially all that is said about the humiliation of the 'servant of Jehovah.' Allusions to the Jewish theology of the times when the version was made occur in Isaiah xxii. 14, where the second death is mentioned (comp. Rev. ii. 11, etc.) which the wicked should die in the next world or kingdom of the Messiah; in xxx. 33, where *Gehenna* is spoken of; and in Is. xl. 22; lvii. 15, etc., where the *Shechinah* occurs. In various places the notices respecting the Messiah's offices, character, and conduct, the effects of his advent and personal influence, harmonise with those of the N. T. writers (Gesenius, *Commentar ueber den Isaia*, vol. i. p. 76, *et seq.*)

10. There is little doubt that the text has received several interpolations. To this head Zunz refers all that is hostile to Rome—*ex. gr.* 1 Sam. ii. 5; Is. xxxiv. 9; Exod. xxxix. 16. So too *Armillus* in Is. xi. 14; but Herzfeld, who supposes Jonathan to have actually made a version in Judæa, dissents. To these may be added perhaps *Germania*, from Gomer, in Ezek. xxxviii. 6; the superstitious legend inserted in Is. x. 32, relative to the army and camp of Sennacherib; and the peculiar story about Sisera, Judg. v. 8. Even Rashi speaks of falsifications of the text in his day (on Ezek. xlvii. 19). If these be so explained, the chief arguments of John Morin and Isaac Voss in favour of a very late origin of the Targum fall away.

11. In the criticism of the Hebrew text, the version of Jonathan can only be of limited use. It would be hazardous to rely on it alone as an evidence for restoring a primitive reading supposed to be displaced. It has been employed indeed to indicate various readings, but often without reason; as is evident from Cappellus's *Critica Sacra* and De Rossi's *Annotations*. But though its independent authority be insufficient to correct the original, it may be a valuable auxiliary to other critical sources. Thus, in 1 Kings i. 4, where we read of

Abishag לְמִלְכָּה סִכְנֶת, Cappellus supposes that the Targumists read שִׁכְנֶת, *dwelling* or *abiding*, because they have for it קְרִיבָה. But the Hebrew word may be so translated as to correspond to the Chaldee one with sufficient nearness. There is no good reason to suppose that the Hebrew was ever different from what it now is. In Hosea vi. 5, where the version has וְרִיבִי כְּנְהוֹר נֶפֶק for the Hebrew וְרִיבִי אֹרֶךְ, it is evident that the reading was וְרִיבִי כְּנְהוֹר, *and my judgment shall go forth as the light*; which is corroborated by the other ancient versions, except the Vulgate. Again, in Amos viii. 8, we have now in the Hebrew כִּפְאָר, 'it shall rise up like light,' whereas the Targum reads כִּפְאָר, *like a flood*, since it renders נְהַרָה, 'like the waters of a river.' So too the Septuagint and Vulgate.

12. The paraphrase on the historical books only was printed for the first time at Leiria 1494, fol., accompanied by the Hebrew text and Kimchi's as well as Levi ben Gerson's commentaries. It was afterwards printed complete in Bomberg's Rabbinical Bibles, in Buxtorf's; and in the Antwerp, Paris, and London Polyglotts. I was translated into Latin by Alphonso de Zamora for the Complutensian Polyglott, but was excluded from it. Having been corrected by Arias Montanus, it was put into the Antwerp Polyglott 1572. The twelve minor Prophets were translated into Latin by John Mercer, 1559, 4to, accompanied by the original.

In החלון *oder wissenschaftliche Abhandlungen* for 1852, pp. 109-111 (Lemberg), there is a list of readings from this Targum, which is only a meagre instalment of what might be done in the same department.

Part of the literature belonging to Onkelos relates to Jonathan. We may mention here, in addition, Gesenius's *Commentary on Isaiah*, vol. i.

*Pseudo-Jonathan on the Pentateuch*.—This paraphrase is falsely ascribed to Jonathan ben Uzziel. No author in the middle ages associated his name with it. The way in which it came to be regarded as his is supposed to have been the mistake of a copyist who made out of תַּרְגֻּמוֹ—i. e. *Targum Jerushalmi*—תַּרְגֻּמוֹ יוֹנָתָן, *Targum Jonathan* (see Zunz's *Gottesdienstl. Vortr.* p. 71). Proof is not needed at the present day to show that the Jonathan of the Prophets is not the Jonathan of the Pentateuch. If it be, we refer to the convincing arguments of Smith (*Diatriba de Chaldaicis Paraphrastis*, p. 70, *et seq.*) The work of the pseudo-Jonathan is not a version. It is rather a paraphrase, though by no means exclusively so. Neither is it a haggadic commentary. Version and paraphrase are interwoven throughout, the author seldom confining himself to simple explanation, but proceeding to large midrashim.

Halacha and hagada are richly embedded in the work; the latter especially. His legends are rich and copious. His hagada is not historical; it is ethical, religious, metaphysical, lyrical, and parabolic. It has been well observed that he is only the interpreter of the ideas prevailing in his time—the narrator of traditions, religious and national, not their inventor, because most of them are found in preceding literature, such as the Talmud, Mechilta, etc. (see Zunz, p. 72, note

b). But though he represents the spirit of his time in this respect, we believe that Zunz and Seligsohn lay too much stress on the point, in their anxiety to oppose Winer and Petermann. What good reason can there be for denying him some power of imagination, and confining him to the mere task of a retailer? Fancy played its part in the creation of the legends and fables mingled with early Jewish literature; why was *his* fancy altogether idle? Some are peculiar to him, such as that in Deut. xxi. 8, which may have been derived from the popular belief of the day: but it may not.

It is curious to observe how events and characters are dressed out hyperbolically in Jonathan's midrashim; not only the Biblical heroes, as was natural, but even the enemies of the Jewish nation. Thus Og carries on his head a piece of rock sufficient to bury all the camp of Israel beneath its weight, Num. xxi. 35, which is taken from the Talmud (Berachoth, chap. 9). A mountain possessed of divine virtues is suspended in the air over the children of Israel, Exod. xix. 17—from the Aboda Sara (chap. 1); but see Petermann, p. 30, *et seq.* Perhaps the ethical hagada is the best part of the work. Here the exegete becomes didactic. Thus in Genesis, 40th chapter, it is said that Joseph suffered two additional years of imprisonment because he built on man's rather than God's help. Comp. also Levit. xxii. 28.

We are not surprised to find that Jonathan treads the region of the supernatural very freely. His angelology is marvellous. He has the names of many angels outside the circle of the Bible (Gen. xxviii. 12).

As an example of a lyrical hymn or paraphrase, we refer to that on Moses's death, Deut. xxxiv. 6.

Like Onkelos and others, he avoids anthropomorphic ideas, and is averse to attribute superhuman attributes to heathen gods.

His halacha, which is also frequent, is principally derived from the Mechilta, Sifri, and Sifra. Examples of it pervade Exodus, chapters xxi. and xxii. The paraphrast shows himself in Gen. i. 3,

where he says that light was created לְאִנְהָרָא עֲלֵהָא,  
*for the upper illumination.* In xxi. 12, he gives as a reason for Abraham obeying Sarah דִּבְנֵי יִצְחָק הֵיא,  
*because she was a prophetess.* Compare also the addition in Gen. xv. 6. Sometimes he seeks, by explanatory additions from the Midrash, to remove the difficulty of a Biblical passage, as in Gen. xlv. 27, justifying the number seventy; and in Exod. xii. 41, where the four hundred years in Egypt are accounted for.

The language of this Targum shows it to be of Palestinian origin, as it is in what is called the Jerusalem dialect, like that of the Jerusalem Talmud, but with many peculiarities. It is far from being pure, because the Syriac had deeply affected it. Foreign elements enter into it largely.

A few historical notices enable us to fix the date of the work pretty closely. In Exod. xxvi. 9 the six orders of the Mishna are mentioned; in Num. xxiv. 19-24, Constantinople is alluded to; and a wish is expressed for the downfall of the west-Roman empire, Num. xxiv. 19-24. The Jewish calendar was fixed, as we learn from Gen. i. 14. The names of two of Mohammed's wives, Fatima and Khadijah, are also given (Gen. xxi. 21). Thus

the paraphrase was not prior to the middle of the 7th century. This late date leads us to expect a strong mixture of foreign words in the work, Greek, Latin, and Persian. These had been imported into the Palestinian dialect of the time through the vicissitudes of the people and their country; and no language could have withstood the influences from without to which it was subject. Its individuality was lost. A collection of exotic expressions, tolerably full, may be found in Petermann (*De indole Paraphraseos quæ Jonathanis esse dicitur*, etc., p. 66, *et seq.*)

A very slight comparison of Jonathan with Onkelos will show that he had the latter before him. Many places attach themselves almost verbally to Onkelos, as Gen. xx. 1-15. Indeed one object which the pseudo-Jonathan had in view, was to give a criticism upon Onkelos. He corrects and alters him more or less. Where Onkelos paraphrases, Jonathan enlarges the paraphrase. The same attention to the work of his predecessor is shown in his halachic as in his hagadic interpretation; as also in the avoidance of anthropomorphisms and anthropopathisms. The divergences from Onkelos are sometimes slight, only such as dialectic difference required—sometimes important. And they are often superior to Onkelos; but sometimes the reverse. As his object was different, his production presents a great contrast on the whole; because he wished to act the part of an interpreter, not a translator. And there was another cause for divergence from Onkelos; he did not base his work *primarily* on the latter, but upon another paraphrase. In other words he worked upon Onkelos indirectly in the first instance, because his whole production rests on the basis of the Jerusalem Targum. Let us speak of the Jerusalem Targum before completing our observations on the pseudo-Jonathan.

*Jerusalem Targum on the Pentateuch.*—This is a fragmentary Targum, written in the same dialect substantially as that of the pseudo-Jonathan. It contains interpretations of select passages only, and generally agrees with the pseudo-Jonathan. Whole chapters are occasionally omitted, or a series of successive explanations is attached to a single expression. The principal question to be considered is, if it were at first a complete Targum. There is no proof that it was, because there is method in its present state. Nowhere does it break off so as to disturb and interrupt the sense. If it became fragmentary in the course of time, we should expect sudden stops. There is also a plan in it. It is mainly on the historical parts of the Pentateuch, or in other words, the most important. According to the proportions given by Zunz, Genesis alone has a third of it, Deuteronomy a fourth, Numbers a fifth; Exodus has four independent pieces, making about three-twentieths of the whole; and Leviticus has but one-fourteenth, because it is mainly halachic. Besides, the larger midrashim have a rounded and complete form, without interrupting the connection, thus evincing design in their compass. It should also be observed that passages where the poetical diction makes the meaning difficult or obscure are treated to a copious and connected paraphrase, while the easy ones are commonly omitted, as in Gen. v. 1-32; Exod. vi. 14-26. Hence we infer that it is now in its primitive state. If so, it cannot be a fragmentary recension of Jonathan. Yet their similarity is striking.

The hagada of the one regularly appears in the other, and has usually a more concise form in the Jerusalem Targum. Indeed, there is often a verbal agreement or nearly so between them, so that one might at first be inclined to assume their original identity; if not, that they are fundamentally the same work—the Jerusalem containing variations to the other, or being a fragmentary recension of it. To the latter opinion Zunz has given the sanction of his great name. Against it are many phenomena, especially the fact that the work is complete and rounded off in many parts. And though the similarity of Jonathan and the Jerusalem is considerable, there is so much divergence as to prove diversity of authorship. The dialect of both, though Palestinian, is not identical—that of the Jerusalem Targum being older, and reminding one of the Mishna, while that of Jonathan is liker the Talmud. Those common words in the

Mishna, *לָקַט* and *פָּרַט*, which the Jerusalem Targum leaves as they are, are Aramæised by Jonathan *לִקְטָא*, or translated *נִתְרָא* (Lev. xix. 9, 10).

And the Jerusalem has many Hebrew expressions, for which Jonathan has Aramæan ones, as in Gen. xxxiii. 4; Exod. xxiv. 8, etc. Again, the Jerusalem Talmud often cites the Biblical text unaltered, whilst Jonathan translates it into Aramæan even where he has the introductory formula *דִּבְרֵי כְפֻרְשֵׁי*. Thus in Gen. xv. 12, where the Jerusalem Targum leaves several words untranslated, Jonathan has the same Chaldaised. Besides, pseudo-Jonathan and the Jerusalem Targum differ in their angelology. The mystic and later element of the former's system is wanting in that of the latter (Gen. v. 24). The former has the names of angels belonging to a later and cabalistic time, such as those said to be present at the death of Moses (Deut. xxxiv. 6); the angelology of the latter is confined to a few traditional ideas about the functions of such spiritual beings (Gen. xviii. 1; xxxii. 27; Deut. xxxii. 3); and he knows only the Biblical name of one of them, Michael (Gen. xxxviii. 25). Again, while Jonathan has both hagadic and halachic matter in profusion, the Jerusalem Targum has its hagadas mostly as digressions and consciously, unlike the former; and its halacha is sparing. Comp. Gen. i. 55, and the illustrations of Frankel (*Zeitschrift für die religiöse Interessen des Judenthums* for 1846, pp. 116, 117).

It is also perceptible that the reverence of Onkelos for the name of God, shown in substituting the *Memra* or something intermediate, is not so excessive in Jonathan as in the Jerusalem Targum (Frankel in *Zeitschrift*, pp. 119, 120).

If such be the diversity of Jonathan and the Jerusalem Targum, they are not one work fundamentally; nor is the one a recension, now in fragments, of the other. How, then, is their resemblance to be explained? By the fact that both have relation to Onkelos. The author of the Jerusalem Targum worked upon that of Onkelos, his object being to correct it according to certain principles, and to insert in it a selection of hagadas current among the people. The pseudo-Jonathan afterwards resumed the same office, and completed what his predecessor had begun. The Jerusalem Targum formed the basis of Jonathan; and its own basis was that of Onkelos. Jonathan used

both his predecessors' paraphrases; the author of the Jerusalem Targum that of Onkelos alone.

We believe then that the small glossarial passages of the Jerusalem Targum are a critical commentary upon Onkelos. Here the author proceeds freely in using his predecessor. He rejects his acceptations of words, and gives closer acceptations for his freer ones. In many places where Onkelos's scrupulosity about removing anthropomorphisms from the text had obscured the sense, the Jerusalem Targum restores the original meaning by some addition or change. Thus in Gen. vi. 6, where Onkelos omits the name Jehovah and paraphrases, the Jerusalem Targum comes near the original text. Sometimes, where Onkelos Aramæises a Hebrew word, the Jerusalem Targum substitutes a genuine Aramæan one, as in Gen. viii. 22, where the *קִטָּא* of Onkelos is displaced for *שׁוּרְבָא*. So in Gen. xxxiv. 12, where Onkelos

has *מוֹהֲרִין וּמוֹתְנִין*, the Jerusalem Targum puts

*פּוֹרֵן וּכְתוּבָתָא*. *Vice versa*, the Jerusalem Targum often prefers a Hebrew word to Onkelos's Aramæan one, perhaps because the latter was better known in Palestine, as in Gen. xxii. 24. There is indeed no uniformity between Onkelos and Jerusalem in the use of Aramæan words, while consistent divergences may be readily traced.

The general object of the author of the Jerusalem Targum will be discerned from the preceding sketch. It was to correct and explain Onkelos, to adapt it to a later time and different country by enriching it with the hagadic matter which had accumulated, so that its deficiencies might be removed. From being a version, he wished to supplement it in various parts, so that it should be a paraphrase there. It is superfluous to remark that he has made many mistakes, and in not a few cases departed from Onkelos for the worse. Thus in Gen. vi. 3, where he departs from Onkelos, the explanation is altogether unsuitable, because he did not fully understand that of his predecessor. It is very strange that he should have confounded the Hebrew *אֱלֹהִים* with the Greek *ἄλλος*, and interpreted it *אֲוֹרֵן* (Gen. xxxv. 8). But we need not enumerate his errors, since Petermann has brought many of them together (p. 60, *et seq.*)

It is this fragmentary Jerusalem Targum to which Jonathan had regard in the first instance. He uses the larger paraphrases and hagadic parts of it as well as the smaller variations from Onkelos, always with discretion. Nowhere does he simply copy, but contracts, enlarges, elucidates. More commonly is the hagada of the Jerusalem Targum abridged. Thus in Gen. ii. 15 he omits the superfluous *וַיֹּאמֶר יְהוָה* of the Jerusalem Targum.

Comp. also Num. xii. 12. *מֹשֶׁה* is rendered *פֶּסֶק* by the Jerusalem Targum, but Jonathan follows Onkelos in giving it *עָרִי* (Exod. xiii. 22). *וְהָיָה* for the Hebrew *וְשָׁב* is frequent in Jonathan and Onkelos, but never occurs in the Jerusalem Targum, which has always *חָזַר* (Gen. xxvii. 45; Exod. xiv. 2, 27).

Nor does Jonathan follow Onkelos implicitly, but often diverges. If he does not adhere consistently to the Jerusalem Targum, we need not expect to see him copying Onkelos. Thus in Gen.

vii. 11, xxii. 24, he leaves Onkelos for the Jerusalem Targum. It should be observed, however, that Jonathan relies upon Onkelos much more than the Jerusalem Targum, which is freer and more independent. Thus the former follows Onkelos, and the latter departs from him, in Gen. xi. 30; xii. 6, 15; xiii. 6; xiv. 5, 21; xvi. 7, 15; xix. 31; xx. 18, etc. etc. The interval of time between the Jerusalem Targum and Jonathan cannot be determined exactly, but it must have been a century.

From these observations it will no longer be uncertain 'if the Targum of Jerusalem hath been a continued Targum, or only the notes of some learned Jew upon the margin of the Pentateuch, or an abridgment of Onkelos' (Allix's *Judgment of the Ancient Jewish Church*, etc., p. 88). All the guesses are incorrect.

The only objection to the hypothesis we have set forth, is the statement of Zunz, that as many citations made by older authors from the two Targums in question are now missing, an older and complete Jerusalem Targum is lost. But when we

consider the probable chances of passages being lost in the course of transcription, and of others being interpolated, as also the fact of variations in the editions, it need not be assumed in the face of internal evidence that they are *very* different now from what they were at first. Many of the passages cited by authors and now wanting, which Zunz has brought together, need such sifting and correction as Seligsohn has shown (in Frankel's *Monatschrift* for 1857, p. 113).

The view of the relation now given between Onkelos, the Jerusalem Targum, and pseudo-Jonathan, was briefly advocated by Frankel in his *Zeitschrift* for 1846 (p. 111, *et seq.*) with ability and success; and was afterwards satisfactorily established by Seligsohn and Traub in a prize-essay printed in Frankel's *Monatschrift* for 1857. We regret the premature death of Seligsohn, who had begun to work in this department with so much acuteness. The Jerusalem Targum may thus be called in a loose way the *first* recension of Onkelos, and Jonathan the *second*. We subjoin a specimen of the three in parallel columns.

# GENESIS, CHAPTER XXII. 10-19.

## ONKELOS.

And Abraham stretched forth his hand, and took the knife to immolate his son. And the angel of the Lord called him from the heavens and said, Abraham, Abraham; and he said, Here am I. And he said, Stretch not forth thy hand to the youth, nor do ought to him, for now I know that thou fearest God, and hast not spared thine only son for my sake. And Abraham lifted up his eyes after these [words] and looked, and behold a ram caught in a tree by his horns. And Abraham went and brought the ram, and offered him for a burnt-offering instead of his son. And Abraham worshipped and prayed in that place, saying before the Lord, Here generations shall worship; wherefore it shall be said on that day, On this mountain Abraham worshipped before the Lord. And the angel of the Lord called Abraham a second time from the heavens and said, By my word I have sworn, saith the Lord, because thou hast done this thing, and hast not spared thine only son, therefore with blessing I will bless thee, and multiplying I will multiply thy sons as the stars of heaven, and as the sand which is on the shore of the sea; and thy sons shall inherit the cities of their enemies. And all the peoples of the earth shall be blessed because of thy son, since thou hast obeyed my word. And Abraham returned to his young men, and they arose

## TARG. JERUS.

And Abraham stretched out his hand, and took the knife to slay his son Isaac. Isaac answered and said to Abraham his father, My father, bind my hands properly, lest in the hour of my affliction I tremble and confuse thee, and thy offering be found profane, and thou cast into the pit of destruction in the world to come. The eyes of Abraham reached to the eyes of Isaac; but the eyes of Isaac reached to the angels on high. Isaac beheld them; but Abraham saw them not. In that hour the angels on high came forth and said one to the other, Come, behold two righteous ones alone in the midst of the world; the one slayeth, the other is slain. He that slayeth does not defer, and he who is to be slain stretches out his neck.

And he said, Abraham, Abraham. Abraham answered, in the language of the sanctuary, and said, Here am I. And Abraham worshipped and prayed in the name of the word of the Lord and said, Thou art the Lord who seest and art not seen. I pray for mercies before thee, O Lord. It is wholly manifest and known before thee that there was no division in my heart at the time thou saidst to me to offer Isaac my son, and to make him dust and ashes before thee; but that immediately I rose up in the morning and performed thy word there with joy, and fulfilled thy word. And now I pray for mercies be-

## PSEUDO-JONATHAN.

And Abraham stretched out his hand and took the knife to slay his son. And Isaac answered and said to his father, Bind me properly, lest I should tremble through the affliction of my soul, and be cast into the pit of destruction, for profaneness shall be found in thy offering. The eyes of Abraham were intent upon the eyes of Isaac; and the eyes of Isaac were intent upon the angels on high. Isaac beheld them, but Abraham saw them not. The angels on high answered, Come, behold how these are alone in the world; the one slays the other; he who slays delays not; he that is slain, reaches forth his neck. And the angel of the Lord called him from the heavens, and said to him, Abraham, Abraham; and he said, Here am I. Then he said, Stretch not out thy hand to the young man, nor do him any harm, for now it is manifest before me that thou fearest the Lord, and hast not withheld thy son, thy only begotten, from me. Then Abraham lifted up his eyes and looked, and behold, a ram which had been created between the evenings of the foundation of the world was caught in the entanglement of a tree by his horns. So Abraham went and took him, and offered him for a burnt-offering instead of his son. And Abraham gave thanks, and prayed there in that place, and said, I pray through the mercies that are

## ONKELOS.

and went together to Beersheba ; and Abraham dwelt in Beersheba.

## TARG. JERUS.

fore thee, O Lord God, that when the children of Isaac offer in the hour of necessity, thou wouldest remember the binding of Isaac their father to them, and remit and pardon their sins, and deliver them from all necessity. That the generations to follow may say, In the mountain of the house of the sanctuary of the Lord did Abraham offer Isaac his son ; and upon this mountain, which is the house of the sanctuary, the glory of the Shechinah of the Lord was manifested to him.

## PSEUDO-JONATHAN.

before thee, O Lord ; it is manifested before thee that it was not deepness in my heart to turn away from doing thy decree with joy. Now when the children of Isaac my son shall offer in the hour of affliction, be thou mindful of them, and hear them, and deliver them ; and let all generations to come say, In this mountain Abraham bound Isaac his son, and the Shechinah of the Lord was revealed to him there.

And the angel of the Lord called to Abraham a second time from the heavens, and said, By my word have I sworn, saith the Lord, as thou hast done this thing and hast not withheld thy son, thine only begotten, that in blessing I will bless thee, and in multiplying I will multiply thy sons as the stars of the heavens, and they shall be as the sand which is on the shore of the sea, and thy sons shall inherit the cities before their enemies. And all the people of the earth shall be blessed through the righteousness of thy son, because thou hast obeyed my word. And the angels on high took Isaac and brought him into the school of the great Shem ; and he abode there three years. And on the same day Abraham returned to his young men ; and they arose and went together to Beersheba, and Abraham dwelt in Beersheba.

A commentary was written upon the pseudo-Jonathan and Jerusalem Targums by R. David ben Jacob, Prague 1609, 4to ; and another by R. Pheibel ben David, Hanau 1614, 4to. The latter is only an exposition of the more difficult words, including those in Onkelos also. R. Mardochai ben Naphtali is the author of another commentary on Jonathan and the Targ. Jerus., Amsterdam 1671, fol. The Targ. Jerusalem was first printed at Venice by Bomberg, 1518, in his Rabbinical Bible. It was repeated in the following Rabbinical Bibles of Bomberg, and in the great Polyglotts. Since its publication by Walton in 1657, it has also appeared at Wilna 1852, and Vienna 1859. A Latin version of it, by Francis Tayler, appeared at London 1649, 4to ; and a more correct one, by Antony Chevalier, in Walton's Polyglott, 1657. An English translation was made by Etheridge, with his translation of Onkelos and the pseudo-Jonathan, London 1862, 1865, 12mo.

The Targ. pseudo-Jonathan was first published at Venice in 1591. It is in the London Polyglott. It was published with the Pentateuch at Hanau 1614, Amsterdam 1640, Prague 1646, Amsterdam 1671 and 1703, Berlin 1705 ; all these, as well as the editio princeps, having Onkelos and the Jerus. Targ. It is also in the Wilna (1852) and Vienna editions (1859). A Latin version was made by

Antony Chevalier, in Walton (vol. iv.) Etheridge has put it into English.

Zunz supposes that the Jerusalem Targum, or rather, as it should be called, the Palestinian one, extended to the prophetic books also ; and justifies his opinion by the following particulars, which we give in his order :—Abudraham cites such a Targum on one passage in the book of Samuel (1 Sam. ix. 13) ; and D. Kimchi has preserved fragments

of a תרגום של תוספתא, or simply תוספתא, to Judges xi. 1 (47 words) ; 1 Sam. xvii. 8 (106 words) ; 1 Kings xxii. 21 (68 words) ; 2 Kings iv. 1 (174 words) ; iv. 6 (55 words) ; iv. 7 (72 words) ; xiii. 21 (9 words). But Luzzatto doubts whether these passages belonged to a *Jerusalem* Targum, because they agree in dialect with the Babylonian Talmud ; and thinks them of Babylonian origin. Passages from a Jerusalem Talmud are quoted by Rashi (on Isaiah lxvi.), Abudraham (Isaiah liv. 11), and Farissol (Isaiah lxvi.) ; which agree, in part, with a fragment in a Vatican MS. (Cod. Urbin. No. 1), about 130 words. A Jerusalem Targum on Jeremiah is quoted by D. Kimchi ; one on Ezekiel by R. Simeon, R. Nathan, and D. Kimchi. Rashi was acquainted with a Jerusalem Targum on Micah ; and a fragment belonging to such a Targum on Zechariah is contained in Cod. Kennicott.

No. 154, written 1106, first published by Bruns. Rashi speaks of a Targum on the prayer of Habakkuk (iii. 1). De Rossi, too, knew of a Targum on the 3d chapter of Hab., which differed entirely from that of Jonathan (Zunz, *Gottesdienstliche Vortr.* pp. 77, 78). We fear that this cannot be supplemented by contributions from a MS. which Luzzatto procured from Africa, written on paper in 1487, and containing a Targum on the Prophets and Psalms, Job and Samuel; because, though it contains passages marked Tosefta (additional Targum), the *Targum of Jerusalem* upon it was put by some copyist. The fragments of this *additional* Targum relate to 1 Sam. xviii. 19; 2 Sam. xii. 12; 1 Kings v. 9, 11, 13; x. 18, 20; xiv. 13; Hosea i. 1; Obadiah 21; and are all printed by Luzzatto (see Geiger's *Zeitschrift*, vol. v. p. 132, *et seq.*) Zunz, after referring to the natural conjecture that the Jerusalem Targum on the Prophets embraced nothing more than the Haphtaroth or lessons, remarks that the idea is untenable, because the expressions of the authors who allude to it go to show that they had seen Targums upon entire books. This may be so. But the existence of an entire Targum of Palestine on all the prophets is problematical. Some books may have received such a paraphrase; on others, and those the great majority of the prophetic books, there is reason to doubt its existence. It is more probable that *portions* were treated paraphrastically in the spirit of the later hagada; portions selected on no definite principle, but adopted by the fancy or liking of paraphrasts.

The *Targums on the Hagiographa* are usually divided into three groups, viz.—1. Job, Psalms, Proverbs; 2. The five Megilloth; 3. Daniel, Chronicles, and Ezra. Of these, the first is the oldest, and possesses the same linguistic character, so that its different parts must have been nearly contemporaneous. Zunz supposes that its birth-place was Syria. The second was probably later, and was made in a different locality. The tradition that R. Joseph the Blind was the author of this Targum, is already contradicted by writers of the 13th century. Internal evidence shows that all were considerably later than the 4th century. The earliest could scarcely have existed before the 6th century; the latest may belong to the 8th or 9th. Indeed all range themselves in the cycle of that comprehensive Palestinian Targum spoken of by Jewish writers under the appellation of 'Targum Jerushalmi,' which was made in portions at different times, and appeared perhaps in more than one recension. That it was post-Talmudic is apparent from Targ. on Canticles i. 2.

The *Targum on the Book of Job* is of late date and hagadical. Mention is made of a paraphrase on this part of Scripture as early as the middle of the 1st century. The book presented a peculiar temptation to Chaldee expositors, not only from its difficulty, but its adaptation to allegorising fancies. The first thing that strikes the reader is the existence of a double Targum here, at least in many places. After one interpretation, which is always free in character, another still more paraphrastic is annexed with the introductory תרגום אחר, *another Targum* (comp. xxviii. 7, 8, 18). The extraneous insertions are very numerous, uncertain, fabulous, and incorrect. Thus at ii. 1 we read: 'And the three friends of Job heard of all the evil that had come upon him when they had

seen the trees of his garden burnt up, and the bread of his food changed into living flesh, and the wine of his drink into blood; and they came each one from his place, and for this service they were delivered from the place appointed them in Gehenna.' In i. 15 the words of the original ותפל נופלת בהכף לילית מומלת שבה are rendered זמרנר, *and the Queen of Samarcand (?) suddenly rushed in.* If Samarcand be really mentioned here, the date is late. One thing is certain, that the phrase עקירת יצחק, 'the binding of Isaac,' to denote Abraham's time, is recent. The word

אנגלי (angel) is used in xv. 15; xx. 27; xxxv. 10, which cannot be of early fabrication. The work is a growth belonging to various times and writers, of which the beginning and end cannot be precisely determined. The best separate edition of the Targum on Job is that of John Terentius, professor at Franeker, 1663, 4to. The chief value of this edition is not in the text, which is taken from Buxtorf, nor in the Latin translation, which is that of the Polyglotts as corrected by Arias Montanus, but in the notes, pp. 125-312, consisting of various readings and explanations of Chaldee words. John Mercier also published the Latin version of Alphonso de Zamora, with notes, at Franeker 1663, 4to; and Victorius Scialac translated it into Latin, Rome 1618, 8vo.

The *Targum on the Psalms* is not so hagadic or diffuse as that of Job. Sometimes it follows the original with a tolerable degree of closeness, as in Ps. i. iii. v. vi. etc. In more cases, however, it indulges in prolix digressions, absurd fables, and commonplace remarks. Two or three different versions of the same text occasionally follow one another without remark, though the introductory notice תרגום אחר sometimes precedes (comp. Ps. cx. 1). The additions to the text are often inappropriate, the sense distorted, the titles wrongly paraphrased, and fables are abundant. Thus in Ps. cx. 1 the paraphrase has: 'The Lord said in his word that he would appoint me lord of all Israel; but he said to me again, Wait for Saul, who is of the tribe of Benjamin, till he die, because he does not agree in the kingdom with an associate; and afterwards I will make thine enemies thy footstool;' to which is subjoined תרגום אחר thus—'The Lord said in his word that he would give me the dominion because I was intent upon the doctrine of the law of his right hand: wait till I make thine enemy the footstool of thy feet.' In the second Psalm the words נשקני בר are rendered קבילי אולפנא, *receive instruction.* Of fables we have one about David hid in the cave (lvii. 3); that God created a spider which spread its web over the mouth of the cave, so that Saul concluded none had entered or was concealed in it. We have also the Talmudic legends about the wonderful ox that grazes upon a thousand mountains every day (l. 10); the miraculous bird, whose feet reach to the bottom of the sea, while its body floats on the surface and its head touches heaven (l. 11); as well as leviathan, whom the Messiah, after subduing the kings of the earth, gives to the Jews to feast upon (civ. 26). אודיתא (vii. 1) seems to be the Greek ὀδῆ (vii. 1); and אנגלי, *angels of*, occurs in Ps. l. 4; lxviii. 18; lxxvi. 8, as in Job. On

the whole, the general language and style resemble the Jerusalem Targum on the Pentateuch (comp. cxxi. 5, and many others). This paraphrase was printed in Justiniani's Polyglott Psalter (Genoa 1516, folio); and in the Hexaglott edition of the Psalter published at Rostock 1643, folio. Arias Montanus's Latin version is contained in the Antwerp and following Polyglotts (1572, 1645, 1657). Like the Targum on Job, this one is an accumulation of expositions extending over centuries.

The Targum on Proverbs presents more of the character of a version than a paraphrase, for it adheres more closely to the original text than that of the Psalms, and is not hagadic. Nor does it seem to contain fragments of a second recension, if xxv. 20 be not an example. Departures from the Hebrew are few and of small extent, as in xi. 15, where it has, 'The wicked man acts badly against the righteous man, in that he stands surety for a stranger, and hates those who place their hope in God.' Occasionally the original is misunderstood, unless perhaps another reading was followed, as in xi. 4, where הוֹן *riches*, is rendered נִשְׁקָרָה *falsehood*; and in x. 20, where כְּמַעַט is represented by מַחֲתָה *contrition*.

It has been frequently noticed that this Targum has a remarkable agreement with the Syriac version. So close is the likeness, that the very choice and position of the words in both is often the same. Take the following as an example, in which we give the Syriac and Chaldee in succession, after the manner of Eichhorn, who has the first five verses of the first chapter in a similar form.

סִבְיָה וְנִסְמָלָה וְנִסְמָלָה וְנִסְמָלָה  
סִבְיָה וְנִסְמָלָה וְנִסְמָלָה וְנִסְמָלָה  
לְכָל מַחֲתָה לְכָל מַחֲתָה לְכָל מַחֲתָה  
לְכָל מַחֲתָה

הִירִין תִּתְּבִין צִדְקָתָה וְדִינָה וְתִרְצוּתָה דְּכָל שְׂבָלִי  
שְׂפִירִי : אֲרִי תַעֲלֵה חֲכָמָתָה לְלִבִּי וְיִדְעָתָה לְנִפְשִׁי  
יִבְרָם : (ii. 9. 10.)

It is also observable, that where the one departs from the Masoretic text, the other does the same. Thus for פֶּקַעְסָם, Prov. vii. 22, both read with the

Septuagint כְּכֶלֶב *like a dog* (ὡς περ κύνων). Many other examples are given by Dathe, such as xxvi. 10; xxvii. 16; xxx. 13, etc.

In xxii. 16 the Chaldee and Syriac agree in the various reading, 'He who injures a poor man multiplies evil to himself'; and he who gives to the rich, poverty will be to him'—i.e. דַּעֲשֵׂק לְמִסְכֵּנָה מִסֵּי : לֵיהּ בִּישְׁתָּה

In x. 3, for הוֹן both read הוֹן, contrary however to the LXX. (Dathe, *De ratione consensus versionis Chaldaicae et Syriacae Proverbiorum Solomonis*, p. vi.) The same paraphrastic additions appear in both, as in Prov. xiv. 14; xxviii. 1, 4.

How is this similarity to be accounted for? Dathe supposes that the Chaldee interpreter was dependent on the Syriac, and endeavours to prove his position by many pertinent arguments, such as that the Syriac explains Aramaean departures from

the Hebrew most naturally, and that many Syriasm in words, forms, and orthography appear in the version, which are otherwise unknown to Chaldee, or at least are very rare. Eichhorn takes the same view. But Hävernicks denies the use of the one by the other, endeavouring to account for their similarity by the cognate dialects in which both are written, the identity of country in which they had their origin, and their literality. The latter opinion is much less probable than the former, because it does not account for so many phenomena. Thus in Prov. xxix. 5 the Syriac renders קְרִיָּה, *a city*, כְּבִרְבָּה, but the Targumist has כְּבִרְבָּה *falsehood*, apparently because he mistook the Syriac for כְּבִרְבָּה. The Syriasm which have been adduced, such as אֶלְיָן for הוֹיָה, xxv. 20; אֶלְיָן for אֶלְיָן

כִּי־נָּ in the third person of the future of the verb for יִ; the pure Syriac adverb מִסְרִיבָּהִית for אֲרִי, etc. (Dathe, p. xvi.);

are not a valid argument, because the birthplace of the version will explain them. We are more inclined to believe that, the Targum having been made in Syria, the Syriac as well as the Hebrew was consulted, or rather the Greek, through the medium of the Syriac. While the Hebrew was the basis, the Syriac was freely used.

The Syriac and Chaldee often disagree. Sometimes the latter coincides with the Hebrew against the former, as in ii. 12; viii. 7; xi. 20, etc. etc. Sometimes again it forsakes both and follows a way of its own, as in xi. 19; xviii. 1; xxi. 14, etc. etc. Hence a uniform dependence of the Aramaean upon the Syriac cannot be sustained; and the only probable assumption is that several sources were used by the paraphrasts.

The text is very corrupt. It abounds with countless errors, as Luzzatto has shown (*Philoxenus*, p. 132). The Targum on Proverbs was translated into Latin by John Mercier, and published at Paris 1561, 4to.

The Chaldee paraphrases of Job, Psalms, and Proverbs, together with that of the five Megilloth, are in the Rabbinical Bible of Venice, 1518 and those that followed it, whence they passed into Buxtorf's, and into the Polyglotts. Alphonso de Zamora's Latin version of Job and Proverbs, revised by Arias Montanus, was printed in the Antwerp and following Polyglotts.

The three Targums on Job, Psalms, and Proverbs, are usually put together; and Hävernicks goes so far as to contend that they were made by one and the same person. But that view is certainly incorrect, notwithstanding the particular phenomena quoted in favour of it, such as the kindred *usus loquendi* in the three; *ex. gr.* *nun* appended in the 3d plural preterite of peal (Prov. ix. 11); the infinitive with *נ* prefixed; קִיאָם (Prov. xxiv. 16) with the signification of Kal; נָּ = נָּ to commit

adultery (Prov. vi. 29, 32), גִּיּוּר, adulterer (xxx. 22, and Targum on Job xxxvi. 20); נִימוּס, *vñmos*, Syriac נִימוּסָה, for תּוֹרָה; יוֹמָנָה, *daily*, to expect (Hävernicks, *Einleit.* i. 2, p. 87, note). Surely identity of place, period, and prevailing dialect is a sufficient explanation of these peculiarities. So far from the same person having

made them all, it is tolerably clear that none of them proceeded from a single individual in its present state. Even that which is the most literal and free from hagadic matter bears the traces of various hands. Zunz supposes that the three belong to the cycle of the comprehensive Jerusalem Talmud on the Pentateuch, which embraced not only the Mosaic books, but the hagiographa, and probably the prophets also. They were a Palestinian production, and made gradually. Some parts we possess complete; others only in fragments. It is impossible to tell the times when the different books were translated into Chaldee; but one thing is certain, that they are all pretty late. As far as Job, Psalms, and Proverbs, are concerned, the last is older than the first two. The view of Zunz is confirmed by the fact that a Jerusalem Targum on the Psalms, Job, Proverbs, and the Song of Solomon is actually mentioned by Nachmanides, or cited by him, and in the Aruch, the quotation agreeing with the present paraphrases (Zunz, *Gottes Vor.* pp. 80, 81).

*The Targum on the five Megilloth*—i.e. on Ruth, Esther, Ecclesiastes, Canticles, and the Lamentations—was probably made by different persons, as internal evidence appears to show. But Zunz thinks otherwise. The whole work is a midrashic paraphrase, exceedingly free and loose in character, containing legends, fables, allusions to Jewish history, and many fanciful additions. The whole bears the impress of a date considerably posterior to the Talmudic time, and is written in an intermediate dialect between the west Aramæan of Job, Psalms, and Proverbs, and the east Aramæan of the Babylonian Talmud. The least hagadic is Ruth; the most rhapsodical that of Canticles. As a specimen of *Ruth* take ii. 10, 11: 'Why have I found pity in thine eyes to know me, and I of a strange people, of the daughters of Moab, and of a people who are not clean to enter into the church of the Lord? And Boaz answered and said to her, In telling it has been told me by the saying of the wise men, which, when the Lord decreed, he did not decree respecting women, but men; and it was said to me in prophecy that kings and prophets are about to spring from thee on account of the good thou hast done, etc.' Among the fables we may specify that in iv. 22: 'And Obed begat Jesse, who was called Nachash, because iniquity and corruption were not found in him, that he should be delivered into the hands of the angel of death to recover his soul from him; and he lived many days, till the counsel was remembered before the Lord which the serpent gave to Eve the wife of Adam to eat of the tree, inasmuch as those eating of its fruit are wise to distinguish between good and evil; and by this counsel all the inhabitants of the earth were liable to death, and in this iniquity Jesse the righteous fell.' In various instances the sense is perverted, as in i. 2 and iv. 7, 8. This Targum was published separately with a Latin translation and scholia by John Mercier, Paris 1564, 4to.

*The paraphrase on Lamentations* is more midrashic than that on Ruth, but of the same type, being copiously interwoven with pieces of history, allegories, fables, reflections, etc. Among the absurd stories we may instance that in v. 3. 'Upon the joining of our necks we were burthened when we went into captivity. Nebuchadnezzar the wicked saw the prefects of the children of Israel who went

empty, and he commanded that they should sew together the books of the law and make wallets of them; and they filled them with stones which were on the bank of the Euphrates, and loaded them upon their necks; and at that time we were labouring, there was no rest for us.' Wolfius says that he remembers reading of the Targum on Lamentations being published, with the text and commentaries of Rashi and Ibn Ezra, at London 1651; but we cannot discover a trace of such an edition.

*The Targum on Ecclesiastes* is more midrashic than that of Lamentations, the author having given a free rein to his imagination, and made copious insertions. Thus we read in i. 2: 'When Solomon king of Israel saw by the prophetic spirit that the kingdom of Rehoboam his son would be divided with Jeroboam the son of Nebat; and that Jerusalem and the house of the sanctuary would be destroyed, and that the people of the children of Israel would go into captivity; he said by his word: Vanity of vanities is this world; vanity of vanities is all that I and my father David have toiled for; it is altogether vanity.' The sense is frequently distorted, as in iv. 9, 10; vii. 5; xii. 11; and fables occur like that in x. 20, about Raziel the angel crying daily from heaven upon Mount Horeb with a voice reaching through the whole world; and Elijah the high-priest flying in the air like a winged eagle and telling the things done in secret to all the inhabitants of the earth. The Targum on Ecclesiastes was published along with that on Canticles, and both translated also into Latin by Schreckenfuchs, at Basel 1553, 8vo; also by John Mercier, Paris 1562, 4to. The Latin translations of Peter Costi (Lyons 1554, 4to) and Alphonso de Zamora were printed in Pineda's *Commentary* 1619, fol. It has been translated into English by Ginsburg in his *Commentary on Ecclesiastes*; but we are far from thinking with him that its importance to historical exegesis is incalculable.

*The Targum on Canticles* is the most hagadic of all, and hardly deserves the name of a paraphrase, because the words of the original are completely covered by extravagant and inflated expressions which refer to another subject. The paraphrast has indulged in the greatest licence, and allowed his imagination to run riot in a multiplicity of ways. He has composed a panegyric on his people, whose history and praises are held up to general admiration. God having loved Israel more than the seventy nations of the world, is highly pleased with his choice; for according to viii. 13, 'The Lord of the world shall say to the congregation of Israel, in the end of days: O thou congregation of Israel, like to a garden, the least among the nations and dwelling in the house of learning with the companions of the Sanhedrim, and the rest of the people who hearken to the voice of the head of the school and learn his words from his mouth; cause me to hear the law, the voice of thy words when thou sittest to justify and condemn, and I will consent to all that thou wilt do.'

He has the fable respecting two Messiahs, one the son of David, the other the son of Ephraim (iv. 5); and expects wonderful things from the Messiah when he shall have set his people free and led them back to Palestine. Thus we read in viii. 1, 2: 'When the King the Messiah shall be revealed to the congregation of Israel, the children of Israel shall say unto him: Be thou with us for a brother and let us go up to Jerusalem, and let us

suck with thee sentences of the law as a sucking-child sucks the breasts of its mother, etc. etc. . . . I will lead thee, O King the Messiah, and introduce thee into the house of my sanctuary, and thou shalt teach me to fear before the Lord, and to walk in his ways; and there we will keep the feast of Leviathan and drink old wine which has been hidden in its grapes since the day the world was created, and eat of the pomegranates which are prepared for the righteous in the garden of Eden.'

His ignorance is seen in confounding Alexander the Great with Antiochus Epiphanes (vi. 8); and in mistaking Ezekiel's vision for real history, since the prophet is said to have raised the dead in the plain of Dura (vii. 9). There is also a fair proportion of Rabbinic fables (comp. iv. 1, 12). After these specimens few will agree with the learned Broughton, that the paraphrase 'is worth our study, both for delight and profit;' or with the preposterous praise of Delitzsch, who does not hesitate to say that 'the Jerusalem Targum in its two recensions, and the *Targums of the five Megilloth*, are the most beautiful natural works of art, penetrated by the golden thread of Scripture, etc.' (*Zur Geschichte der jüdische Poesie*, 1836, 8vo, p. 135).

The Targum on Canticles was published, along with that on Ecclesiastes, and accompanied by a Latin translation made by Schreckenfuchs, at Basel 1553, 8vo. It was afterwards printed by itself at Amsterdam 1660, 8vo; with the Pirke Aboth at the end. Other editions appeared in 1619, 4to, Venice; 1683, Amsterdam, 4to; 1672, Venice, 8vo. It was translated into Latin by Schreckenfuchs, as already stated; and into English by Gill, at the end of his commentary on the Song.

There is a *triple Targum on Esther*, or to speak more correctly, a double one—a first and second. The so-called *second* Targum, in addition to the first or usual one, was published in the Rabbinical Bibles of Bomberg 1518, 1525-1526, 1547-1549; and in those of Venice, dated 1568, 1617 respectively. The first and second were likewise published together in 1590, Venice, 8vo; 1614, Hanau; 1640, Amsterdam, 4to; 1646, 8vo, same place; 1607, Basel; 1718, Frankfurt-on-the-Maine. The first was inserted in the third vol. of the Antwerp Polyglott. The London Polyglott has the second, after the example of Buxtorf, who has it alone in his Rabbinical Bible. The first is only an abridgment of the second; and they may be properly called one. Persons unacquainted with Chaldee may see the proportions between them by comparing the Latin version in Walton with that of Arias Montanus in the Antwerp Polyglott, because the former has the small portion corresponding to the latter's Targum in a different type. The correspondence indeed is not exact; but it is nearly so. The third Targum (second properly) was first published by Tayler in Latin, 1655, 4to. The editor gave no account of the MS. from which his version was made. The first is naturally concise in character. It is free from digressions and fables, adhering closely to the text itself. The second has perpetual digressions from the original, endless fables, absurd and trifling circumstances. It is wholly midrashic. The third is the most prolix of all. Here the little book has swelled out into a volume of useless matter. The third is of later origin than the second, made by some one who set about his task with larger ideas of extent than the

compiler of the second, but who evidently became weary as he proceeded, for he is less diffuse towards the end. A single specimen of the second must suffice.

In the second we read thus at the beginning, ch. i. 2: 'In those days when king Ahasuerus sought to sit on the throne of king Solomon, which was taken away from Jerusalem by the hands of Shishak king of Egypt, and was withdrawn from Egypt by the hands of Sennacherib, but had been taken from the hands of Sennacherib and brought back to Jerusalem; but was again taken by the hands of Pharaoh, the lame king of Egypt, and from Egypt carried away by the hands of Nebuchadnezzar and brought to Babylon; but when Cyrus was desolating the province of Babel, he carried it away to Elam; and afterwards when Ahasuerus reigned and sought to sit upon it, he could not. He sent therefore, and brought workmen from Alexandria to make one like it, but they could not. They made, however, one inferior to it, in the fabrication of which they were employed two years; and then at length, in the third year of his reign, he sat upon the throne of his kingdom, which the workmen made for him in Shushan, the metropolis.' This same fable is repeated and amplified in the third Targum, ch. i. 2. Compare also in the last Targum the order and mode in which Haman and his sons were hanged, ch. ix. 9. Absurd explanations of other Scriptures are not unfrequent—*ex. gr.* ch. i. 4, from Haggai ii. 9.

The Targum on the five Megilloth was published at Venice 1524, fol., along with the Hebrew text and Rashi's commentary. In addition to the Targum on the other hagiographa, it is in the Rabbinical Bible of Venice 1518, and the rest that followed it; in Buxtorf's, and the Polyglotts of Antwerp, Paris, and London. The best edition of all together is in the London Polyglott. There was also an edition, the same as the fol. one of 1524, with a German translation of the more difficult words by R. Jacob Kappel or Ben Samuel ben Boner, published by Froben without a date. R. Meir and R. Mordechai ben Jeichiel wrote Hebrew commentaries on it, the first published in 1614; the second in 1580.

A *Targum on Chronicles* was long unknown. In the 17th century, M. F. Beck found the MS. of one in the library of Erfurt; and published it at Augsburg in 1680-1683, 2 vols. 4to. The MS. has many chasms, especially in the first fourteen chapters. Such as it is, it was well edited; the editor accompanying the text with a Latin version, and with learned annotations in which Chaldee expressions are illustrated and the version compared not only with the Hebrew original but with other ancient translations. The same Targum was afterwards published by Wilkins at Amsterdam 1715, 4to, from a MS. in the University of Cambridge, formerly belonging to Erpenius. Here the text is complete, so that the lacunæ in Beck's edition are filled up. Like its predecessor, it has also a Latin version; but there are no notes. It speaks badly for the editor's knowledge that he has put on the title-page R. Joseph as the author (though Beck was of the same opinion); and that he has made him rector of the academy in Syria instead of Sora in Babylonia. Language, style, and manner, show that the Targum is of late and Palestinian origin. It is full of hagadic paraphrasing. Zunz remarks that it sometimes tran-

scribes the Jerusalem Targum on the Pentateuch verbally, as in the genealogical table of the first chapter (comp. ver. 51 with the Jer. Targ. on Gen. xxxvi. 39). So also in the Psalm-passages in 1 Chron. xvi., its words often coincide with the Targum on Psalms 105 and 96. In 1 Chron. v. 10, the name of Hungary appears, which was not known till after the 4th century; and the late fable of the Jews about 'the mountains of darkness' is alluded to in 1 Chron. v. 26. The origin of it cannot be put higher than the 8th century. We need hardly state that it abounds with fables, especially in the explanation of proper names (comp. i. 20); that it inserts many incorrect expositions, such as that Laban the Syrian was the same with Balaam, and was slain by Phinehas in the wilderness, etc. etc. (i. 44, 45); and that it has many Greek words (comp. i. 20; ii. 53, etc.) Both editions must be used by the critic; the first, for the learned notes; the second, for the more correct and complete text, as Eichhorn pertinently remarks.

The existence of a *Targum on Daniel* was first noticed by Munk, who thinks that he found it in a MS. in the Imperial Library at Paris (No. 45 du fonds de St. Germain-des-Près). The MS., however, contains only a Persian Targum, giving an apocryphal account of Daniel. According to the

learned writer this קצת דניאל, or *History of Daniel*, was taken from a Targum on Daniel in Chaldee. The first words are certainly written in Chaldee. They are then repeated in Persian, and the history continues in the latter language. After several legends known to the other Targums a long prophecy of Daniel follows, proving that the book was written after the first crusade. Not only are Mohammed and his successors spoken of, but also a king who shall come from Europe and go as far as Damascus. The critic concludes that the Persian treatise was written in the 12th century while the Christian kingdom of Jerusalem was still in existence; and proposes to publish the whole with a translation, which he has not yet done (*Notice sur Rabbi Saadia Gaon et sa version Arabe d'Isaïe*, p. 87). We must express our doubts about such a Chaldee paraphrase on Daniel, in the absence of all proof that the Persian was made from the Chaldee; for a few Chaldee words at the beginning are no argument in favour of it. All that Munk communicates—i.e. part of a page—is insufficient to warrant us in accepting the fact. Yet Steinschneider has referred to 'a Targum on Daniel' simply on the authority of Munk's notice (*Catalogus librorum Hebraeorum in Bibliotheca Bodleiana*). No Targum upon Daniel is extant as far as we yet know; and it is very doubtful whether one was ever made. The reason assigned in the Talmud for not rendering the book into Chaldee is that it reveals the precise time of Messiah's advent. A good part of the book is already in Chaldee. Nor is there any Targum, as far as is known, upon Ezra and Nehemiah. Part of Ezra is already Chaldee; and Nehemiah was counted with it as one book.

To the Roman edition of the LXX. of Daniel, published in 1772, a Chaldee version is added of the apocryphal pieces in *Esther*. This has been printed by De Rossi, accompanied by a Latin version, remarks, and dissertations (*Specimen variarum lectionum sacri textus et Chaldaica Estheris addita-menta*, etc., Tübing. 1783, 8vo).

It is probable that the Targums were written at first without vowels. When the vocalisation of the Hebrew Bible was enlarged and completed by the Masoretes, a similar degree of attention was not given to the Targums. Subsequently their editors endeavoured to punctuate them. None laboured so much as Buxtorf to correct the punctuation and bring it as near as possible to the standard of that in Daniel and Ezra; for which some censured him, though we believe unjustly. It is no reproach to his memory to say that he did not perfect their vocalisation.

In the present uncritical state of their text, the Targums can hardly be employed with much advantage in the criticism of the Hebrew original. They show the substantial integrity of the Masoretic text. Though they have been without doubt conformed to it occasionally, it is improbable that such corruption was practised to any great extent, or uniformly.

We form a very moderate opinion of their utility in the province of interpretation. The time has gone by when it was supposed that they were important in proving certain Christian doctrines. Though scholars like Walton, Wolf, and Carpov were of this opinion, and Allix exaggerated it in one point with polemical rancour; it will not be thought by any who are well acquainted with the Hebrew Bible that their application to justify Christian doctrine is dogmatically correct.

Perhaps most Jews attach too much value to these national works. However interesting historically, their intrinsic value is small at the present day; but they flatter the national pride, and abound with fables of the same tendency. On the other hand, Christians have despised them too much, from the days of John Morin downwards. Though Morin was a real scholar, and generally knew the subjects about which he wrote as well as most persons of his time, he should not have dwelt so much on the fables and absurdities of the Targums. It is the ignorant and indiscriminate abuse of these writers that demands rebuke. The words of Father Simon, to whom criticism owes so much, equally judicious and correct, deserve to be quoted here, especially as they express our own view. *Omnes istæ Paraphrases, præter illam Onkelosi et Jonathanis, non magnæ mihi utilitatis esse videntur, nec forsân multum e re fecit, illas curiosæ quæsiisse. Non quanta tamen multis existimatur, illarum utilitas: ex adverso Judæi ex illis arma adversus Christianos depromunt, sibi fingentes, nobis ipsorum superstitiones aniles et absurdas probari, quasi veteribus versionibus quibus conjunguntur a nobis equiparentur. Præterea videntur Judaici ritus et cerimonie iis magis quam fides Christiana confirmari: incerta itaque et anceps ex illis ducta contra Judæos victoria. Quid quod quæ nostræ fidei juvenia credimus, pleraque veræ sunt allegoriæ, quas non operosum verbis alio convertere; neque enim religio allegoriis probatur.* (*Hist. Crit. Vet. T. lib. ii. cap. 18.*)

Besides the general introductions to the O. T. of Eichhorn, Hävernick, De Wette, and Bleek, the reader may consult Davidson's *Treatise on Biblical Criticism*, vol. i.; Wolf's *Bibliotheca*, vol. ii.; Walton's *Prolegomena*, ed. Dathe; Smith's *Dialectica de Chaldaicis Paraphrasis*; Schickard's *Bechinath Happerushim*; Azaria De Rossi's *Meor Enayim*; Morin's *Exercitationes Ecclesiasticæ et Biblicæ*; Simon's *Historia Critica Veteris Testa-*

menti; Carpzov's *Critica Sacra*; Herzfeld's *Geschichte*, etc. etc. But the works written prior to Zunz's *Gottesdienstl. Vorträge*, published in 1832, are comparatively obsolete, except they be confined to a single Targum. Since that epoch-making book, we have Frankel in his *Zeitschrift* and *Monatschrift*; Geiger's *Urschrift*; Levi in Geiger's *Zeitschrift*, vol. v.; Seligsohn and Traub in Frankel's *Monatschrift* for 1857; which are most valuable. Other treatises have been already mentioned. The literature is still unexplored in various parts; and a thoroughly critical edition, based on an extensive and accurate collation of the best known MSS., is a desideratum. Buxtorf's *Lexicon* is still the best, though published upwards of two hundred years ago. Dr. Levy, however, has undertaken a new dictionary, the first *Lieferung* of which has just appeared—*Chaldaisches Wörterbuch ueber die Targumim u. s. w.*, Leipzig 1866. This is a welcome book to Hebrew scholars. These *Lexicons* may be supplemented by the Aruch, which needs itself to be re-edited. Grammars and Chrestomathies of the Targumic Chaldee are not wanting.—S. D.

TARNOV, JOHANN, born at Grevismühlen in Mecklenburg 19th April 1586, was professor of theology at Rostock, where he died 22d January 1629. He was the author of *Exercit. Biblicarum Libri IV. in quibus verus et genuinus sensus locorum mult. inquiritur ac defenditur*, 4to Rost. 1619, 1624, 1627, 8vo Lips. 1640; *In Threnos Jer. Comment.*, 4to, Hamb. 1704; *In Proph. Minores Comment.*, 4to, Franc. et Lips. 1688, 1706; *Comment. in Epp. Pauli ad Ephes. Philipp. Coloss. et Thess.*, 4to, Rost. 1636.—W. L. A.

TARNOV, PAUL, also professor at Rostock, previously rector of the burgh school there, was born at Grevismühlen 29th April 1562, and died 6th March 1633. He wrote a work of some value *De sacrosanto Ministerio*, Rost. 1623, and another *De conjugio*, ib. 1614; but he is known chiefly by his *Comment. in Johan. Evangel.*, 4to, Rost. 1629; of which Orme says that, though not so elaborate as the work of Lampe, it is scarcely less valuable (*Biblioth. Bib.* p. 427).—W. L. A.

TARPELITES (טַרְפְּלִיטִין; Sept. *Ταρφαλαῖτοι*), a people of Assyria whom Asnapper sent to colonise Samaria (Ezra iv. 9). The name may be regarded as a Gentile from *Turpel*, the name of some place in Assyria, which, however, has not been identified. The *Τάρπουροι*, or, as one MS. has it, *Ταρπούροι*, whom Ptolemy places in the east of Elymais (vi. 2. 6); and the *Τάρπητες*, whom Strabo (p. 757) places near the Mæotic marsh, have been suggested as probably the people in question. But to these conjectures no weight can be attached.—W. L. A.

TARSHISH (תַּרְשִׁישׁ), a celebrated part of the ancient world, about the exact position of which opinions are much divided. In this case, however, as in many other Scriptural difficulties, that is clear which is important, while the doubtful or the hidden is of comparatively little moment. We may, or we may not, be able to fix with certainty the exact spot where Tarshish lay; but the particulars which Scripture supplies respecting it are too numerous and too definite to allow any doubt as

to what was the character and condition of the place itself. Tarshish may be described, and, therefore, may be known, though we still remain in uncertainty on what point in the map the name should be inscribed. And while the exact locality is of small concern, the important details which the Bible presents may, nevertheless, render us aid in attempting to determine where Tarshish lay.

We will first give a summary of the notices which the Scriptures afford respecting Tarshish. In the great genealogical table (Gen. x. 4, 5) it is placed among the sons of Javan; 'Elishah and Tarshish, Kittim and Dodanim. By these were the islands of the Gentiles divided.' This refers the mind at once to the north-western parts of the Mediterranean. To a similar conclusion does other Scriptural language lead. In Ps. lxxii. 10 it is said, 'The kings of Tarshish and of the isles shall bring presents;' and in 2 Chron. ix. 21, we read, 'The king's (Solomon) ships went to Tarshish with the servants of Hiram; every three years once came the ships of Tarshish bringing gold and silver, ivory, and apes, and peacocks.' Now Hiram's city, Tyre, lay on the Mediterranean coast, and it is easy to see how Solomon's vessels might be associated with his in a voyage towards the west to fetch merchandise. In Is. lxvi. 19, we find Tarshish mentioned in a way which confirms this view: 'And I will set a sign among them, and I will send those that escape of them unto the nations (or Gentiles); to Tarshish, Pul, and Lud, that draw the bow, to Tubal and Javan, to the isles afar off.' These passages make it clear that Tarshish lay at a distance from Judæa, and that that distance was in a north-westerly direction; and the mention of such names as Lud, Javan, and the isles, carries the mind to the extreme north-west, and suggests Spain as the place for Tarshish. But Tarshish must have been on the sea-coast, for it was famous for its ships. 'The ships of Tarshish' were celebrated under that designation, which may have been used in that wide sense in which we speak of an East Indiaman, reference being made rather to the place whither the vessel traded, than to that where it was built; or the phrase may have come to denote a particular kind of vessel—i.e. trading or merchant ships, from the celebrity of Tarshish as a commercial port (1 Kings x. 22; Ps. xlviii. 7; Is. ii. 16; xxiii. 1-14; lx. 9; Ezek. xxvii. 25). Some six times do we meet with the phrase, ships or navy of Tarshish; which of itself shows how noted a seaport we have under consideration, if it does not prove also that in process of time the terms had come to describe vessels according to their occupation rather than their country, as we say 'a slaver,' denoting a ship engaged in the slave-trade (comp. Horat. 'sævis Liburnis,' *Carm.* i. 27; 'Bithyna carina,' i. 35; 'trabe Cypria,' i. 1). In Ezek. xxvii. 12-25, the place is described by its pursuits and its merchandise:—'Tarshish (here again in connection with a western country, Javan, ver. 13) was thy (Tyre) merchant, in all riches; with silver, iron, tin, and lead, they traded in thy fairs. The ships of Tarshish did sing of thee in thy market, and thou wast replenished and made very glorious in the midst of the seas.' The last words are admirably descriptive of the south-western coast of Spain. How could a Hebrew poet better describe the locality where the songs of the sailors of Tarshish made the name of Tyre

glorious? Let the reader turn to the map, and cast his eye on the embouchure of the Guadalquivir, and say if this spot is not pre-eminently, when viewed from Palestine, 'in the midst of the seas.' There is a propriety too in the words found in Ps. xlviii. 7 (comp. Ezek. xxviii. 26), 'Thou breakest the ships of Tarshish with an east wind,' if we suppose merchant vessels working eastwardly up the Mediterranean towards Tyre, encountering an east or rather north-east gale, which is a very violent and destructive wind to this day. Jeremiah (x. 9) tells us that 'silver spread into plates' was brought from Tarshish; and from the connection the silver appears to have been elaborately wrought; whence we infer that at one period there was in Tarshish the never-failing connection found between commerce, wealth, and art. An important testimony occurs in Ezek. xxxviii. 13: 'Sheba and Dedan, and the merchants of Tarshish, with all the young lions thereof, shall say unto thee, Art thou come to take a spoil? to carry away silver and gold? to take away cattle and goods, to take a great spoil?' whence it is clear that Tarshish was an opulent place, abounding in cattle and goods, in silver and gold. We are not sure that the words, 'the young lions thereof,' are intended to be taken literally. They may refer to the lion-hearted chiefs of the nation; but if they are understood as implying that lions were literally found in Tarshish, they only concur with other parts of Scripture in showing that the name is to be taken in a wide acceptance, as denoting, besides modern Andalusia, those parts of Africa which lay near and opposite to Spain. Nor is it impossible that a part of the trade of Tarshish lay in these and in other animals; for we certainly know that Solomon's ships brought that prince apes and peacocks: the lions may have been caught in Africa, and conveyed in ships of Tarshish to Tyre. Sheba and Dedan, however, are mentioned here in connection with Tarshish, and they were certainly eastern countries, lying probably on the western side of the Persian Gulf in Arabia. But the object of the writer may have been to mention the countries placed at the extremities of the then known world—Tarshish on the west, Sheba and Dedan on the east. In Is. xliii. 1-14, we read, as a part of the burden of Tyre, that the ships of Tarshish are called on to howl at her destruction, because Tyre afforded them no longer a commercial port and a haven; words which entirely agree with the hypothesis which makes Tarshish a city on the sea-board of Spain, trading up the Mediterranean to Tyre. Nor are the words found in the 6th verse discordant: 'Pass ye over to Tarshish; howl, ye inhabitants of the isles.' Let us now turn to the book of Jonah (i. 1-3; iv. 2). The prophet was commanded to go and prophesy against Nineveh on the Tigris. For this he should, on quitting Jerusalem, have gone in an easterly direction; but he shunned the duty and fled. Of course he naturally fled in a direction the opposite of that in which the avoided object lay: he proceeded, in fact, to Tarshish. Tarshish then must have been to the west, and not to the east, of Jerusalem. In order to reach Tarshish he went to Joppa, and took ship for the place of his destination, thus still keeping in a westerly course, and showing that Tarshish lay to the west. In Tarshish, indeed, placed in the extreme north-west, he might well expect to be distant enough from Nineveh. It is also worthy of

notice that, when he arrived at Joppa on the coast of Palestine, 'he found a ship going to Tarshish;' which fact we can well understand if Tarshish lay to the west, but by no means if it lay on the Red Sea.

Thus far all the passages cited agree, with more or less of evidence, in fixing Tarshish somewhere in or near Spain. But in 2 Chron. xx. 36 it is recorded that Jehoshaphat king of Judah joined himself with Ahaziah king of Israel, 'to make ships to go to Tarshish, and they made the ships in Ezion-geber,' that is, on the Elanitic gulf on the eastern arm of the Red Sea. If then these vessels, built at Ezion-geber, were to go to Tarshish, that place must lie on the eastern side of Palestine instead of the western; for we cannot suppose they circumnavigated Africa; not because such a voyage was impossible, but because it was long and tedious, and not likely to be taken when a nearer and safer way to Tarshish lay from the ports of the Palestinian coast. But in the parallel passage, found in 1 Kings xxii. 48, these vessels are described as 'ships of Tarshish' (merchant vessels), which were intended to go to *Ophir*, not to Tarshish. This removes the difficulty at once, for Ophir was in the east, and accounts for the fact that the fleet was built on the Red Sea, since it was an eastern not a western voyage which was intended. The reference appears to be to the same eastern trade of which mention is made in 1 Kings x. 22, where we find Hiram and Solomon importing from the East in ships of Tarshish, or merchantmen, gold and silver, ivory, apes, and peacocks. We have not space to enter into the critical questions which this contrariety between the books of Kings and Chronicles suggests for consideration; but we may remark that in a case in which a diversity appears in the statements of these two authorities, no competently-informed theologian could hesitate to give the preference to the former.

It appears then clear from this minute review of the Scriptural accounts and allusions, that Tarshish was an old, celebrated, opulent, cultivated, commercial city, which carried on trade in the Mediterranean, and with the seaports of Syria, especially Tyre and Joppa, and that it most probably lay on the extreme west of that sea. Was there then in ancient times any city in these parts which corresponded with these clearly ascertained facts? There was. Such was Tartessus in Spain, said to have been a Phœnician colony (Arrian, *Alex.* iii. 86), a fact which of itself would account for its intimate connection with Palestine and the Biblical narratives. As to the exact spot where Tartessus (so written originally) lay, authorities are not agreed, as the city had ceased to exist when geography began to receive attention; but it was not far from the Straits of Gibraltar, and near the mouth of the Guadalquivir, consequently at no great distance from the famous Granada of later days. The reader, however, must enlarge his notion beyond that of a mere city, which, how great soever, would scarcely correspond with the ideas of magnitude, affluence, and power that the Scriptures suggest. The name, which is of Phœnician origin, seems to denote the district of south-western Spain, comprising the several colonies which Tyre planted in that country, and so being equivalent to what we might designate Phœnician Spain. We are not however convinced that the opposite coast of Africa was not included, so that the word would

denote to an inhabitant of Palestine the extreme western parts of the world. We seem, however, authorised by considerations, besides those which have been already elicited, in identifying the Hebrew Tarshish with the Spanish Tartessus, whatever may have been the extent of the neighbouring country over which the latter held dominion, or possessed immediate influence. Among these considerations we mention—1st, That the two names are similar, if they are not the same; the Greek *Ταρτησσός*, with the Aramaic pronunciation, would be תרתיש, a fact which would of itself seem to settle the question, in the absence of conflicting evidence and claims; 2d, Spain was one of the chief seats of Phœnician colonisation; and if we unite therewith the north-west of Africa, we shall have some idea of the greatness of the power of Tyre in these parts, for Tyre is reported to have founded not fewer than three hundred cities on the western coast of Africa, and two hundred in south-western Spain (Strabo, ii. 82). Here, then, was found the chief object of the Phœnician sea trade. These countries were to Tyre what Peru was to Spain. Confining our remarks to Spain, we learn from Heeren that the Phœnician colonies on the European side of the sea were situated in the south of the present Andalusia. Here, with other important places, lay Tartessus, a name which is borne by a river, an island, a town, and a region. Heeren distinctly says that to Orientalists the word indicated the farthest west generally, comprising, of course, many places. In the commercial geography of the Phœnicians, he adds, the word obviously meant the entire of their colonial dependencies in southern Spain. In the same general way we use the term West Indies; and thus arose the river, the town, the district of Tartessus, since the country included them all (Heeren, *Ideen*, ii. 44, seq.) 3d, It does much to confirm our view that all the articles reported in Jeremiah and Ezekiel to have been brought from Tarshish, might have come from south-western Spain. Here there were mines of gold and silver, and Tartessus is expressly named as affording the latter mineral (Strabo, iii. p. 147; Diod. Sic. v. 35). Tin was brought by the Phœnicians from Britain into Spain, and thence carried to the Oriental markets. According to Diodorus Siculus (v. 38) tin was procured in Spain also, as well as lead, according to Pliny (*Hist. Nat.* iii. 4). Pliny's words are forcible: 'Nearly all Spain abounds in the metals—lead, iron, copper, silver, gold.'

The view which has been taken in these observations was suggested to our mind by Winer's excellent article on the subject (*Real-wörterb.* ii. 700), and on his authority some of our statements rest; but we should not do justice to it did we not add, that though suggested by Winer, it is the unprejudiced result of our own investigation of the several Scriptural passages which bear on the subject. We add one or two corroborations. Heeren (*Ideen*, ii. 64) translates Ezek. xxvii. 25, 'The ships of Tarshish,' etc., by 'Spanish ships were the chief object of thy merchandise; thou (Tyre) wast a full city, and wast honoured on the seas.' The Phœnicians were as eager in their quest of gold and gold countries as were the alchemists and the Europeans of the 16th century. The lust for gold urged them over the deserts of Arabia, and the cliffs of the Red Sea, as far as Yemen and Ethiopia; and the same passion carried them

westwardly to the coasts of Spain and the Pillars of Hercules. 'Spain,' says Heeren, 'was once the richest land in the world for silver; gold was found there in great abundance, and the baser metals as well. The silver mountains were in those parts which the Phœnicians comprised under the general name of Tartessus or Tarshish. The immeasurable affluence of precious metals which on their first arrival they found here, so astounded them, and the sight thereof so wrought on the imagination of the people, that fact called fable to its aid, and the story gained currency that the first Phœnician colonists not only filled their ships with gold, but made thereof their various implements, anchors not excepted.'—J. R. B.

TARSHISH, a precious stone, so called as brought from Tarshish, as Ophir is also put for the gold brought from thence (Exod. xxviii. 20; xxxix. 13; Ezek. i. 16; x. 9; xxviii. 13; Cant. v. 14; Dan. x. 6). The Septuagint, followed by Josephus, makes it the 'chrysolite'—*i. e.* the topaz of the moderns, which is still found in Spain: so Braun, *De Vestitu Sacerd.* ii. 17. Others suppose it to be 'amber;' but this does not agree with the passages in Exodus, which make the Tarshish to have been one of the engraved stones of the high-priest's breast-plate. The word is translated 'beryl' in the A. V.—J. K.

TARSHISH, the name of—(1.) One of the sons of Jediael (1 Chron. vii. 10); (2.) A Persian prince (Esther i. 14). As a Persian name the word stands in relation with *Teresh* (Esther ii. 21; vi. 2), and with *Tirshatha*; all probably from the root *תרש*, *torsh*, *severe* (Gesen. *Thes.*)

TARSUS (*Τάρσος*), a celebrated city, the metropolis of Cilicia, in Asia Minor, on the banks of the river Cydnus, which flowed through it, and divided it into two parts. Hence it is sometimes by Greek writers called *Tapsool* in the plural, perhaps not without some reference to a fancied resemblance in the form of the two divisions of the city to the wings of a bird. Tarsus was a distinguished seat of Greek philosophy and literature, and from the number of its schools and learned men was ranked by the side of Athens and Alexandria (Strabo, xiv. pp. 673, 674). Augustus made Tarsus free (Appian, *Bell. Civ.* v. 7). This seems to have implied the privilege of being governed by its own laws and magistrates, with freedom from tribute; but did not confer the *jus coloniarum*, nor the *jus civitatis*: and it was not therefore, as usually supposed, on this account that Paul enjoyed the privilege of Roman citizenship. [PAUL.] Tarsus, indeed, eventually did become a Roman colony, which gave to the inhabitants this privilege; but this was not till long after the time of Paul (Deyling, *Observat. Sacr.* iii. 391, seq.; comp. CITIZENSHIP; COLONY). We thus find that the Roman tribune at Jerusalem ordered Paul to be scourged, though he knew that he was a native of Tarsus, but desisted on learning that he was a Roman citizen (Acts ix. 11; xxi. 39; xxii. 24, 27). In the time of Abulfeda, that is towards the end of the 13th and beginning of the 14th century, Tarsus was still large, and surrounded by a double wall, and in the occupation of Armenian Christians (*Tab. Syriae*, p. 133). It is now a poor and decayed town, inhabited by Turks; but

it is not so much fallen as many other anciently great towns of the same quarter, the population being estimated at 30,000. There are some considerable remains of the ancient city (Heumann, *De Claris Tarsensib.*, Gott. 1748; Altmann,

*Exerc. de Tarso*, Bern. 1731; Mannert, ii. 97, *seq*; Rosenmüller, *Bib. Geog.* iii. 38; Beaufort, *Karamania*; Irby and Mangles, *Travels*, pp. 502-506; see also the articles CITIZENSHIP and COLONY.—J. K.

497. Tarsus.

TARTAK (תַּרְתַּק; Sept. *Θαρτάκ*), an idol of the Avites, introduced by them into Samaria (2 Kings xvii. 31). In Pehlevi *Tur-thakh* might mean 'deep darkness' or 'hero of darkness.' Gesenius thinks that under this name some malign planet (Saturn or Mars) was worshipped (*Comment. in Jes.* ii. 348); but we are too little acquainted with the Assyrian superstitions to be able to identify this idol with certainty.—J. K.

TARTAN (תַּרְתָּן; Sept. *Θαρτάν* and *Taváθav*), an Assyrian general whom Sennacherib sent, accompanied by Rabsaris and Rabshakeh, to Jerusalem (2 Kings xviii. 17). It is not known whether this is the same officer who in a preceding reign besieged and took Ashdod for his master (Is. xx. 1). [Rawlinson thinks Tartan not a proper name, but a title of office = *general* (Smith, *Bible Dict.* s. v.)]

T'ASHSHUR (תַּאֲשֻׁר) occurs in two places in Scripture, but great uncertainty has always existed respecting its true meaning (Cels. *Hierobot.* ii. 153); though it is now generally acknowledged to denote the box-tree. There is no philological proof of this conclusion, but yet there is nothing in the tree indicated unsuitable to the several contexts (Is. lx. 13; xli. 19). Further, in Ezek. xxvii. 6, in the account of the arts and commerce of Tyre, we read: 'Of the oaks of Bashan have they made thine oars, and the benches of the rowers are made of *ashur-wood*, inlaid with ivory,' as it is now usually interpreted. The ashur-wood, moreover, is said to

have been brought from the isles of Chittim, that is, of Greece.

498. *Buxus sempervirens*.

The box (*buxus sempervirens*) is a native of most

parts of Europe, and is widely diffused over Asia. Being a native of mountainous regions, it was peculiarly adapted to the calcareous formations of Mount Lebanon, and therefore likely to be brought from thence with the coniferous woods for the building of the temple, and was as well suited as the fir and the pine trees for changing the face of the desert.—J. F. R.

TATNAI (תַּתְנַי; Pers. perhaps *gift*; Sept. *Θαυθαυαί*), a Persian governor who succeeded Rehum in the rule of Samaria, and probably of other provinces north of Judæa. He appears to have been a more just person, and more friendly to the Jews, than his predecessor. An adverse report of their proceedings at Jerusalem reached him; but he resolved to suspend his judgment till he had examined into the matter on the spot. He accordingly repaired thither, accompanied by another great officer, named Shethar-boznai, and their colleagues, and finding that the Jews alleged the authority of a royal decree for their proceedings, he sent to the supreme government a temperate and fair report, founded on the information he had obtained, suggesting that the statement made by the Jews as to the decree of Cyrus and other matters should be verified by reference to the archives at Babylon. Then, without one word to influence the decision or to prejudice the claim advanced, Tatnai concludes with intimating that he awaits the royal orders. This official letter of the Persian governor is quite a model of exactness, moderation, and truth, and gives a very favourable idea of the administrative part of the Persian government. This took place in the second year of Darius, B.C. 519. The rescript being favourable to the claim of the Jews, whose statement had been verified by the discovery of the original decree of Cyrus, Tatnai and his colleagues applied themselves with vigour to the execution of the royal commands (Ezra v. and vi.)—J. K.

TAVERNS, THE THREE (Τρεῖς Ταβέρναι; Vulg. *Tres Tabernæ*). The name of a small place on the Appian Way, mentioned Acts xxviii. 15. The word *ταβέρνα* is plainly the Latin *taberna* in Greek letters, and denotes a house made with boards or planks, quasi *trabena*. Wooden houses, huts, etc., are called *tabernæ* (Hor. *Carm.* i. 4, 13). Hence the word also means shops, as distinguished from dwelling-houses. Horace uses it for a bookseller's shop (*Sat.* i. 4. 71), and for a wine shop (*Ep.* i. 14. 24). The shops at Pompeii are booths, connected in almost every case with dwellings behind, as they were in London three centuries ago. When eatables or drinkables were sold in a Roman shop, it was called *taberna*, tavern, victualing-house. The place or village called 'Three Taverns' probably therefore derived its name from three large inns, or eating-houses, for the refreshment of travellers passing to and from Rome. Zosimus calls it *τριά καπηλεια* (ii. 10). Appii Forum appears to have been such another place. Horace mentions the latter in describing his journey from Rome to Brundisium, as 'differtum nautis, cauponibus atque malignis' (*Sat.* i. 5. 3). That the 'Three Taverns' was nearer Rome than Appii Forum, appears from the conclusion of one of Cicero's letters to Atticus (ii. 10), which, when he is travelling south-eastwards from Antium to his seat near Formiæ, he dates 'Ab Appii Foro, hora quarta'

—from Appii Forum, at the fourth hour; and adds, 'Dederam aliam paulo ante, Tribus Tabernis'—I wrote you another, a little while ago, from the Three Taverns. Grotius observes that there were many places in the Roman empire at this time which had the names of Forum and Tabernæ, the former from having *markets* of all kinds of commodities, the latter from furnishing wine and eatables. The Itinerary of Antoninus places Appii Forum at forty-three Roman miles from Rome, and the Three Taverns at thirty-three. The place still remains, and is called Tre Tavernæ. The Roman Christians went in token of respect to meet St. Paul at these places, having been probably apprised of his approach by letters or express from Puteoli (Acts xxviii. 13-15)—one party of them resting at the Three Taverns, and the other going on to Appii Forum. When the apostle saw this unequivocal token of respect and zeal, he took fresh courage. In the 4th century there was a bishop of Three Taverns, named Felix (Optatus, lib. i.)—J. F. D.

TAWOS, JACOB. [TUSI.]

TAXES of some kind must have been coeval with the origin of civilised society. The idea of the one is involved in that of the other; since society, as every organisation, implies expense, which must be raised by the abstraction of property from the individuals of which it consists, either by occasional or periodical, by self-imposed or compulsory, exactions.

Accordingly we find a provision of income made at the very commencement of the Mosaic polity. Taxes, like all other things in that polity, had a religious origin and import. As a ransom for his soul unto the Lord, every Israelite was to pay half a shekel yearly, from twenty years old and upward, the rich not giving more, the poor not giving less, for the service of the tabernacle (Exod. xxx. 12, *seq.*; 2 Chron. xxiv. 6). From the latter passage it appears that the law appointing this payment was in force in the days of Joash (B.C. 878). This half-shekel was the tribute which our Lord was asked if he paid (Matt. xvii. 24). It is called in the Greek τὰ δίδραχμα, and was in value about fifteen pence. The way in which it is spoken of shows that it was an established and well-known payment—'they that received the didrachm'—in rendering which by 'tribute' our translators have failed to give the force of the original (comp. Joseph. *De Bell. Jud.* vii. 6. 6). This offering was obligatory on Jews who lived in foreign countries no less than on those who lived at home, though frequently the native princes tried to divert the didrachm from the temple treasury to their own, in which effort they were more than once arrested by the Romans (Joseph. *Antiq.* xviii. 9. 1). From the Talmudical Tract Shekalim (*Mishna*, ii. 4), the time of payment appears to have been between the 15th and the 25th of the month Adar, that is in March. After the destruction of the temple, this didrachm was ordered by Vespasian to be paid into the capitol, as, says Josephus, 'they used to pay the same to the temple at Jerusalem' (*De Bell. Jud.* vii. 6. 6). A special provision seems to have been made, under peculiar circumstances, of one-third of a shekel yearly, 'for the service of the house of our God' (Neh. x. 32). The Jews, at times, found the taxes they had to pay very oppressive. The ten tribes complained that they had found David's yoke heavy, and entreated Re-

hoboam that he would lighten it. And the stoning to death of Adoram, who 'was over the tribute,' shows to what an extent the question of taxes entered into the causes of the revolt of the ten tribes (1 Kings xii. 4, 18). When the Romans became masters of Palestine, the unhappy Jews had a double yoke to bear; while it appears from Josephus that the yoke of the native princes was anything but light. The income of Herod the Great seems to have been about 1600 talents, which has been estimated at £680,000 sterling (Joseph. *Antiq.* xvii. 11. 4, note in Whiston's Translation). Agrippa II. had revenues which amounted to twelve millions of drachmæ, which may have equalled nearly half a million of our money. Nor was the recently-removed house-tax an exclusive English imposition; for Herod Agrippa is recorded to have 'released the Jews from the tax upon houses, every one of whom paid it before' (Joseph. *Antiq.* xix. 6. 3; 8. 2).

Besides the regular half-shekel, there was a considerable income derived to the temple from tithes, firstlings, etc. (2 Kings xii. 4). Considering the fertility of the land, we cannot account these religious imposts as heavy. If we turn to the civil constitution, we find taxes first instituted at the time of the introduction of regal power, whose exactions are forcibly described by Samuel (1 Sam. viii. 10, *seq.*) They consisted partly in personal service, partly in tithe in kind. Occasionally a heavy poll-tax was imposed—'of all the mighty men of wealth, of each man fifty shekels of silver' (2 Kings xv. 20). On other occasions an assessment was made, and a tax raised from the people of the land generally (2 Kings xxiii. 35). Both these last cases, however, were provisions for a special need. Presents constituted a source of abundant income, and can hardly be regarded in any other light than as a sort of self-imposed tax (1 Sam. x. 27; xvi. 20; 1 Kings x. 25; 2 Chron. xvii. 5). Royal demesnes supplied resources (1 Kings iv. 22, *seq.*) There was also a transit-tax 'of the merchantmen, and of the traffic of the spice-merchants, and of all the kings of Arabia, and of the governors of the country' (1 Kings x. 15). Ships and other public property belonged to the king (1 Kings x. 28; ix. 26; xxii. 49): the weight of gold that came to Solomon in one year (independently of several sources) was 666 talents (1 Kings x. 14).—J. R. B.

TAXING, THE. [CYRENIUS; JESUS CHRIST.]

TAYISH (תַּיִשׁ), the he-goat (Gen. xxx. 35; xxxii. 14; 2 Chron. xvii. 11; Prov. xxx. 31); so called either from his butting (from תָּוֹשׁ, *to butt*) or from his strength (from תָּוִשׁ = אוֹשׁ, *to be strong*); comp. Lat. *Aries* = the excellent or strong one (Pott, *Etymol. Forsch.* i. 223).—W. L. A.

TAYLOR, JOHN, D.D., was a native of Lancashire, where he was born in 1694. He was educated at Whitehaven; and became pastor, first of a congregation at Kirkstead in Lincolnshire, and then of one at Norwich. He subsequently became tutor of the Dissenting Academy at Warrington. He was a man of considerable learning and acuteness, but wanted the power and grasp of mind adequate to some of the works in which he embarked. His most valuable work is his *Hebrew Concordance adapted to the English Bible, disposed after the manner of Buxtorf*, 2 vols. fol., London 1754. He

wrote also a *Paraphrase with Notes on the Epistle to the Romans, to which is prefixed a key to the Apostolic writings, etc.* 4to, London 1745, 1747. This work made much noise at the time of its publication, chiefly on account of the adroitness with which its author makes the apostle speak according to the doctrines of the Arian and Arminian school. The author's principles of interpretations, however, are wholly unsound, so that his exegesis rests upon a false basis, and leads only to erroneous results. Bishop Watson has given to the key a place among his *Theological Tracts*; but Doddridge, with a juster appreciation of its merits, said that Dr. Taylor had broken his key in trying to force the lock of St. Paul's reasoning. Taylor wrote also a treatise on *The Scripture Doctrine of Original Sin*, which Jonathan Edwards criticised in his work on the same subject; *A Scheme of Scripture Divinity formed on the Plan of the Divine Dispensations*; and many smaller tracts. He died in 1761.—W. L. A.

TEBEN (תֵּבֶן, ἄχυρον), translated *straw*, and once (Jer. xxiii. 28) *chaff*, in the A. V., the dried stalk of cereal grasses, derived by Gesenius from a supposed root תֵּבַן, *to divide*, by Fürst from the unused תֵּבַן, allied to אֵבַן, *to be dry or hard*. The Hebrews used the straw of wheat and barley as provender for cattle and beasts of burden (Gen. xxiv. 25, 32; Judg. xix. 19; 1 Kings v. 8; Jer. xi. 7; lxx. 25); the straw was chopped small and mixed with barley. The Egyptians mixed straw chopped small with clay in the making of bricks; the whole process is depicted on a tomb at Thebes (Wilkinson, *Anc. Egypt.* ii. 156), and specimens of brick so made still remain. When the taskmasters withheld the supply of straw from the Israelites they could procure only the stubble left in the fields; and as this was very short, for the Egyptians cut the straw close to the ground, their labour in order to furnish the full tale of bricks was immensely increased thereby (Wilkinson, ii. 49).—W. L. A.

TEBETH (טֵבֶת), the tenth month (Esth. ii. 16) of the sacred year of the Hebrews, commenced with the new moon in December, and terminated at the new moon in January. The Egyptians called it Τυβή or Τωβή, and it was their fifth month. Hieronymus has the following comment upon Ezek. xxix. 1: 'Decimus mensis, qui Hebræis appellatur Tebeth, et apud Aegyptios Τυβή, apud Romanos Januarius.' In Arabic it is called تَوْبَحَة, in Greek Τυβή or Τήβ, and in Sanscrit TAPAS.—C. H. F. B.

T'ENAH (תֵּנָה) is universally translated *fig* and *fig-tree* in both ancient and modern versions, and, no doubt, correctly so. It has from the earliest times been a highly-esteemed fruit in the East; and its present, as well as ancient Arabic name, is *teen*. The fig-tree, though now successfully cultivated in a great part of Europe, even as far north as the southern parts of England, is yet a native of the East, and probably of the Persian region, where it is most extensively cultivated.

The fig is first noticed in Gen. iii. 7, where Adam and Eve are described as sewing fig-leaves together, to make themselves aprons. The common fig-leaf is not so well suited, from its lobed nature, for this purpose; but the practice of sewing or

pinning leaves together is very common in the East even in the present day, and baskets, dishes, and umbrellas are made of leaves so pinned or sewn together. The fig-tree is enumerated (Deut. viii. 8) as one of the valuable products of Palestine. The spies, who were sent from the wilderness of Paran, brought back from the brook of Eshcol clusters of grapes, pomegranates, and figs. The fig-tree is referred to as one of the signs of prosperity (1 Kings iv. 25), and its failure is noted as a sign of affliction (Ps. cv. 33). The very frequent references which are made in the O. T. to the fig

499. *Ficus carica*.

and other fruit trees, are in consequence of fruits forming a much more important article of diet in the warm and dry countries of the East than they can ever do in the cold and moist regions of the North. Figs are also used medicinally; and we have a notice in 2 Kings xx. 7 of their employment as a poultice. The fig-tree is, moreover, mentioned in the N. T. by its Greek name *συκή* by all the Evangelists. The passages have been fully illustrated by the several commentators.—J. F. R.

TEIL TREE is the linden tree, or *Tilia Euro-  
pa* of botanists. It is mentioned in the A. V., in Is. vi. 13, 'as a teil tree, and as an oak;' but as in the Hebrew the word *alah*, or turpentine tree, is used, there is no reason for giving it a different signification in this from what it has in other passages [ALAH].—J. F. R.

TEKEL. [MENE, etc.]

TEKOA (תְּקוֹעַ; Sept. *Θεκω*), a city south of Bethlehem, on the borders of the desert to which it gave name, and noted as the residence of 'the wise woman' who interceded for Absalom; as one of the towns fortified by Rehoboam; and as the birthplace of the prophet Amos (2 Sam. xiv. 2; 1 Chron. ii. 24; 2 Chron. xx. 20; Jer. vi. 1; Amos i. 1). The site has long been known; it still bears the name of *Tekū'a*, and lies six miles south of Bethlehem, on an elevated hill, not steep, but broad at the top, and covered with ruins to the extent of four or five acres. These consist chiefly

of the foundations of houses built of squared stones, some of which are bevelled. The middle of the space is occupied by the ruins of a Greek church. The site commands extensive prospects, and towards the east is bounded only by the level mountains of Moab. Before and during the Crusades Tekoa was well inhabited by Christians; but in A.D. 1138 it was sacked by a party of Turks from beyond the Jordan, and nothing further is known of it till the 17th century, when it lay desolate, as it has ever since done (Robinson, *Bib. Researches*, ii. 182-184; Raumer, *Palästina*, p. 219; Turner, *Tour*, ii. 240; Irby and Mangles, p. 344).

TEL ABIB (תֵּל־אֲבִיב), the residence of Ezekiel in Chaldaea (Ezek. iii. 15). [CHEBAR.]

TELAIM (טֵּלַיִם, *young lambs*, from טָלַי; *ev* Γαλγδλούς; *quasi agnos*). Saul when proceeding on his expedition against Amalek 'gathered the people together, and numbered them in Telaim' (1 Sam. xv. 4). The name occurs nowhere else. And there is no clue to its site farther than the fact that Saul was going southwards, and it may be inferred that the gathering-place was toward the southern border of Judah. It is strange that both the Septuagint version and Josephus read Gilgal (*Antiq.* vi. 7. 2), which was in the valley of the Jordan near Jericho, and certainly not a fitting place to marshal an army to war with the Amalekites, seeing it would have to march through the wild passes of the wilderness of Judah (cf. Ewald, *Geschichte*, iii. 50). A more probable theory is that it is identical with Telem [TELEM].—J. L. P.

TELASSAR (תֵּלֶסָר, *Θεασθέν, Θεεμδθ*), or THELASAR (תֵּלֶאֶסָר, *Θεασθέν; Alex. Θαλάσσορ*), a city inhabited by 'the children of Eden,' and conquered by the Assyrians (2 Kings xix. 12; Is. xxxvii. 12). As it is enumerated with Gozan (*Gauzanitis*), Haran (*Kāḥḥai*, now *Harrah*), and Rezep (in the *Resapha* of Ptolemy, west of the Euphrates), it lay doubtless in northern Mesopotamia. Ewald (*Gesch.* iii. 301, note 3) identifies it with a heap of ruins called *Telada*, south-west from Racca. It is in favour of this that in that case the places mentioned along with it in the passages cited stand in the order in which they would naturally be attacked by a force invading the territory from the east, as would the Assyrians (Thenius, *Exeg. Hdb.* in loc.)—W. L. A.

TELEM (טֵּלֶם; *Τέλεμ; Telem*), one of the cities which are described as 'the uttermost of the tribe of Judah toward the coast of Edom southward' (Josh. xv. 24). It is not again mentioned except we regard it as identical with Telaim—a theory which seems highly probable (Reland, *Pal.* p. 1029). Telem is mentioned by Eusebius and Jerome as a city of Judah, but they appear to have been ignorant of its site (*Onomast.* s. v. *Talem*); nor have the researches of recent travellers and geographers been successful in discovering it. The opinion of Mr. Wilton, that a trace of the ancient

Telem is found in the Arab tribe Dhullâm (ذولام), which gives its name to a district lying south-east of Beersheba, is not altogether improbable, especially as the Arabic and Hebrew words are cognate

(see *The Negeb*, p. 87; and cf. Robinson, *B. R.* i. p. 102).—J. L. P.

TEMA (תִּמָּא = the Arabic تيماء 'a desert'; it is written תִּמָּא in Job vi. 19; Θαμὰν; *Thema*, and in Is. *Auster*), a name given to a son of Ishmael (Gen. xxv. 15; 1 Chron. i. 30), to the tribe or nation which sprang from him (Job vi. 19), and to the country they inhabited (Is. xxi. 14).

The Temanites were among the most influential of the tribes of Arabia. Job speaks of 'the troops of Tema' and 'the companies of Sheba,' as well known in his remote age. When the prophet Isaiah recorded 'the burden upon Arabia,' the 'travelling companions of Dedanim, and the inhabitants of the land of Tema' were mentioned as representatives of the whole country (xxi. 14). Jeremiah also speaks of Tema as one of the noted principalities of Arabia (xxv. 23).

The name and the tribe appear to have been known to classic writers. Ptolemy mentions the city of *Themme* (Θέμμη) among those of Arabia Deserta, and apparently in the centre of the country (*Geogr.* v. 19). Pliny states that 'to the Nabatei the ancients joined the *Thimanei*' (*Hist. Nat.* vi. 32). It may be questioned, however, whether he refers to the Biblical *Teman* or *Tema*.

There can be little doubt that the Themme of Ptolemy is identical with the modern *Teima*, an Arab town of some five hundred inhabitants, situated on the western border of the province of Nejd. Wallin, who visited it in 1848, thus describes it:—'Teima stands on a mass of crystalline limestone, very slightly raised above the surrounding level. Patches of sand, which have encroached upon the rock, are the only spots which can be cultivated. The inhabitants, however, have considerable date plantations, which yield a great variety of the fruit, of which one kind is esteemed the best flavoured in all Arabia. Grain is also cultivated, especially oats of a remarkably good quality, but the produce is never sufficient for the wants of the inhabitants. The greater portion of the gardens are watered from a copious well in the middle of the village. The hydraulic contrivance by which water is raised for distribution through channels among the plantations is the same as is used through Mesopotamia as well as in Nejd—viz. a bucket of camel-skin hung to the end of a long lever, moving upon an upright pole fixed in the ground' (*Journal R. G. S.* xx. p. 332).

Arab writers state of Teima that 'it is a town in the Syrian desert, and that the castle of Ablak, the son of Adiya, stood here.' Wallin says no remains of the castle now exist, nor does even the name 'live in the memory of the present inhabitants. A small ruined building, constructed of hewn stone, and half buried in sand and rubbish, appeared to me to be too inconsiderable to admit of its being identified with the celebrated old castle' (*ib.* p. 333).

It seems probable that the ancient Arab tribe of *Beni Teim*, of whom Abulfeda speaks (*Hist. Antislam.* ed. Fleischer, p. 198), were connected with this place, and were the more recent representatives of the children of Tema. Forster would further identify the tribe of Tema with the *Beni Temim*, who had their chief stations on the shores of the Persian Gulf; but his proof does not seem

satisfactory (see, however, *Geogr. of Arabia*, i. pp. 289, *seq.*).

It is interesting to find memorials of the nation founded by this son of Ishmael, not merely referred to by classic and Arab geographers, but existing to the present day, in the very region where we naturally look for them (see D'Anville, *Geogr. Ancienne*, ii. p. 250; Abulfeda, *Descript. Arab.* pp. 6, *seq.*) Like other Arab tribes the children of Tema had probably a nucleus at the town of Teima, while their pasture-grounds extended westward to the borders of Edom, and eastward to the Euphrates, just as those of the Beni Shummar do at the present time.—J. L. P.

TEMAN (תִּמָּן, on the right = תָּמַן, also the southern quarter; Θαμὰν; *Theman*; *Meridies*; *Auster*; Gent. noun, תִּמָּן; Θαμανίτης; *Themanites*), the name of a people and country taking their appellation from the oldest son of Eliphaz the son of Esau (Gen. xxxvi. 11). It would appear that Teman was the first duke or prince (מֶלֶךְ) of the Edomites (v. 15); and that, having founded a tribe, he gave his name to the region in which it settled (v. 34). The country of the Temanites formed in after ages the chief stronghold of Idumæan power; so that, when the Lord by the mouth of Ezekiel pronounced the doom of Edom, he said: 'I will make it desolate from Teman' (xxv. 13). The Temanites were celebrated for their courage; hence the force and point of Obadiah's judgment: 'Thy mighty men, O Teman, shall be dismayed' (ver. 9). They were also famous for wisdom; in allusion to which characteristic, and perhaps with special reference to Job's friend Eliphaz the Temanite, Jeremiah mournfully asks: 'Is wisdom no more in Teman? is counsel perished from the prudent? is their wisdom vanished?' (Jer. xlix. 7; Job ii. 11; cf. Baruch iii. 22. See Pusey on *Obadiah*, 8).

The geographical position of 'the land of Teman,' or more literally, the 'land of the Temanite,' as it is called in Gen. xxxvi. 34 (מִדְבַּר הַתִּמָּן; ἐκ τῆς γῆς Θαμανών), is nowhere defined in Scripture; but there are several incidental notices which tend to fix it with considerable certainty. 1. It is intimately connected with Edom, and manifestly either formed a province of it, or lay upon its border (Jer. xlix. 7, 20). In one passage it is included in the same curse with Bozrah the capital of Edom: 'I will send a fire upon Teman, which shall devour the palaces of Bozrah' (Amos i. 12). 2. Habakkuk joins Teman in parallelism with Mount Paran (iii. 3); and this might probably indicate that the portion of Edom lying over against Kadesh, beside which rose Mount Paran, was called Teman [PARAN, MOUNT]. Perhaps, as the northern section of Edom was called Gebal, the southern section may have got the name Teman. 3. Ezekiel groups Teman in such a way with Edom and Dedan as would lead to the conclusion that it lay between them, and therefore on the south and south-east of the former (Ezek. xxv. 13; DEDAN). On the whole, it would appear that Teman was the name given by Esau's distinguished grandson to his possessions in the southern part of the mountains of Edom. As the tribe increased in strength and wealth, they spread out over the region extending southward along the shore of the Gulf of

Akabah, and eastward into Arabia. This view is confirmed by a passage in the book of Joshua, hitherto considered obscure and difficult, but which the advances recently made in Biblical geography tend to elucidate. The sacred writer commences his description of the territory of Judah in these words: 'This then was the lot of the children of Judah; even to the border of Edom the wilderness of Zin southward was the uttermost part of the south coast' (xv. 1). Besides being unintelligible, this is not a literal translation of the Hebrew; and the renderings of the Septuagint and Vulgate are still worse. The Hebrew may be translated as follows: 'Upon (or *along*, אֵל) the border of Edom, the wilderness of Zin to the Negeb (נֶגֶב) from the extremity of Teman' (מִקְצֵה תִּמָּן).

The writer is describing the south-eastern section of the territory. It extended along the border of Edom, including the wilderness of Zin from the extreme (north-western) corner of Teman to the Negeb. Teman is unquestionably a proper name, as is shown by the word מִקְצֵה being placed before it. So also is Negeb. The wilderness of Zin extended up as far as Kadesh, and a part of it was thus allotted to Judah. Teman included the mountains of Edom as far north as Mount Hor, opposite Kadesh; and thus the territory of Judah reached to its extreme north-western corner. The Negeb included the downs along the southern base of the Judæan hills, and lay between them and the wilderness of Zin. The above translation is found in part in the Arabic version, and is adopted by Houbigant.

The accounts given by Eusebius and Jerome of Teman are not consistent. They describe it as a region of the rulers of Edom in the land of *Gabalitis*; and they further state that there is a village of that name fifteen (Jerome has *five*) miles from Petra. But in another notice they appear to distinguish this Teman from one in Arabia (*Onomast.* s. v. 'Theman'). On the map in Burckhardt's *Travels in Syria*, Theman is identified with the modern village of *Maan*, east of Petra; but for this there seems to be no authority (Winer, *B. W.* s. v. 'Theman'; See *Handbook for S. and P.* p. 58).—J. L. P.

TEMANITE, one belonging to the tribe or country of Teman (Job ii. 11; xxi. 1).

TEMPLE תֵּיבֵל קֹדֶשׁ יְהוָה, בֵּית־דָּאָל, or הַהֵיכָל (בֵּית אֱלֹהִים, בֵּית יְהוָה). The word הֵיכָל is a participial noun from the root הָכַל, *capere, excipere*, and reminds us strongly of the Roman *templum*, from *τῆμενος, τέμνω, locus liberatus et effatus*. The Septuagint translation usually renders הֵיכָל by *oikos* or *naós*, but in the Apocrypha and the N. T. it is generally called *τὸ ἱερόν*. Rabbinical appellations are בֵּית הַמִּקְדָּשׁ, *the house of sanctuary*, בֵּית הַבְּחִירָה, *the chosen house*, בֵּית הָעֵלְמִים, *the house of ages*, because the ark was not transferred from it, as it was from Gilgal after 24, from Shiloh after 369, from Nob after 13, and from Gibeon after 50 years. It is also called מְעוֹן. After the Israelites had exchanged their nomadic life for a life in permanent habitations, it was becoming that they should exchange also their movable sanctuary

or tabernacle for a temple. There elapsed, however, after the conquest of Palestine, several centuries during which the sanctuary continued movable, although the nation became more and more stationary. It appears that the first who planned the erection of a stone-built sanctuary was David, who, when he was inhabiting his house of cedar, and God had given him rest from all his enemies, meditated the design of building a temple in which the ark of God might be placed, instead of being deposited 'within curtains,' or in a tent, as hitherto. This design was at first encouraged by the prophet Nathan; but he was afterwards instructed to tell David that such a work was less appropriate for him, who had been a warrior from his youth, and had shed much blood, than for his son, who should enjoy in prosperity and peace the rewards of his father's victories. Nevertheless, the design itself was highly approved as a token of proper feelings towards the Divine King (2 Sam. vii. 1-12; 1 Chron. xvii. 1-14; xxviii.). We learn, moreover, from 1 Kings v. and 1 Chron. xxii. that David had collected materials which were afterwards employed in the erection of the temple, which was commenced four years after his death, about B.C. 1012, in the second month, that is the month of Siv (comp. 1 Kings vi. 1; 2 Chron. iii. 2), 480 years after the Exodus from Egypt. We thus learn that the Israelitish sanctuary had remained movable more than four centuries subsequent to the conquest of Caanan. 'In the fourth year of Solomon's reign was the foundation of the house of the Lord laid, in the month Siv: and in the eleventh year, in the month Bul, which is the eighth month, was the house finished throughout all the parts thereof, and according to all the fashion of it. So was he seven years in building it.'

The site of the temple is clearly stated in 2 Chron. iii. 1: 'Then Solomon began to build the house of the Lord at Jerusalem in Mount Moriah, where the Lord appeared unto David his father, in the place that David had prepared in the threshing-floor of Ornan (or Araunah) the Jebusite.' In south-eastern countries the site of the threshing-floors is selected according to the same principles which might guide us in the selection of the site of windmills. We find them usually on the tops of hills, which are on all sides exposed to the winds, the current of which is required in order to separate the grain from the chaff. It seems that the summit of Moriah, although large enough for the agricultural purposes of the house, had no level sufficient for the plans of Solomon. According to Josephus (*De Bell. Jud.* v. 5), the foundations of the temple were laid on a steep eminence, the summit of which was at first insufficient for the temple and altar. As it was surrounded by precipices it became necessary to build up walls and buttresses in order to gain more ground by filling up the interval with earth. The hill was also fortified by a three-fold wall, the lowest tier of which was in some places more than 300 cubits high; and the depth of the foundation was not visible, because it had been necessary in some parts to dig deep into the ground in order to obtain sufficient support. The dimensions of the stones of which the walls were composed were enormous; Josephus mentions a length of 40 cubits. It is, however, likely that some parts of the fortifications of Moriah were added at a later period. The characteristics of the site of the Solomonic temple have undergone so

many changes that it is at present scarcely possible to discern them. Niebuhr gave an accurate description of what he found, illustrated by a map, in the *Deutsches Museum*, 1784, vol. i. p. 448, *seq.*; ii. 137, *seq.*; and also in the third volume of his travels (comp. also Mishna, *Middoth*, ii. 4).

The workmen and the materials employed in the erection of the temple were chiefly procured by Solomon from Hiram, king of Tyre, who was rewarded by a liberal importation of wheat. Josephus states that duplicates of the letters which passed between Solomon and king Hiram were still extant in his time, both at Jerusalem and among the Tyrian records. He informs us that the persons employed in collecting and arranging the materials for the temple were ordered to search out the largest stones for the foundation, and to prepare them for use on the mountains where they were procured, and then convey them to Jerusalem. In this part of the business Hiram's men were ordered to assist.

Josephus adds that the foundation was sunk to an astonishing depth, and composed of stones of singular magnitude, and very durable. Being closely mortised into the rock with great ingenuity, they formed a basis adequate to the support of the intended structure. Josephus gives to the temple the same length and breadth as are given in 1 Kings, but mentions 60 cubits as the height. He says that the walls were composed entirely of white stone; that the walls and ceilings were wainscotted with cedar, which was covered with the purest gold; that the stones were put together with such ingenuity that the smallest interstices were not perceptible, and that the timbers were joined with iron cramps.

The temple itself and its utensils are described in 1 Kings vi. and vii. and 2 Chron. iii. and iv.

Many attempts have been made to represent the architectural proportions of the temple. According to the account in 1 Kings it was 60 cubits long, 20 wide, and 30 high. Josephus, however (*Antiq.* viii. 3. 2), says: 'The temple was 60 cubits high and 60 cubits in length; and the breadth was 20 cubits; above this was another stage of equal dimensions, so that the height of the whole structure was 120 cubits.' It is difficult to reconcile this statement with that given in 1 Kings, unless we suppose that the words *isos τοῖς μέτροις*, *equal in measures*, do not signify an equality in all dimensions, but only as much as equal in the number of cubits; so that the porch formed a kind of steeple, which projected as much above the roof of the temple as the roof itself was elevated above its foundations. As the Chronicles agree with Josephus in asserting that the summit of the porch was 120 cubits high, there remains still another apparent contradiction to be solved—viz. how Josephus could assert that the temple itself was 60 cubits high, while we read in 1 Kings that its height was only 30 cubits. We suppose that in the book of Kings the internal elevation of the sanctuary is stated, and that Josephus describes its external elevation, which, including the basement and an upper storey (which may have existed, consisting of rooms for the accommodation of priests, containing also vestries and treasures), might be double the internal height of the sanctuary. The internal dimensions of the 'holy,' which was called in preference *היכל*, was 40 cubits long, 20 cubits wide, and 30 cubits high. The holy was separated

from the 'holy of holies' (*קדש הקדש*) by a partition, a large opening in which was closed by a suspended curtain. The holy of holies was on the western extremity of the entire building, and its internal dimensions formed a cube of 20 cubits. [These measurements are exactly double those of the corresponding places in the tabernacle, excepting the height of the sanctuary, which was three times that of the tabernacle—perhaps because the one had an elevated roof and the other was flat. This falls in with what is said in Wisd. ix. 8, that the temple of Solomon was 'a resemblance (*μίμημα*, *imitation*) of the holy tabernacle.'] On the eastern extremity of the building stood the porch,

*אולם, πρόναος*. At the entrance of this pronaos stood the two columns called Jachin and Boaz, which were 23 cubits high.

The temple was also surrounded by three *גליות*, *storeys of chambers*, each of which storeys was five cubits high, so that there remained above ample space for introducing the windows, requisite more for ventilation than for the admission of light into the sanctuary. Now, the statement of Josephus, who says that each of these storeys of chambers (*גליות*) was 20 cubits high, cannot be reconciled with the Biblical statements, and may prove that he was no very close reader of his authorities. Perhaps he had a vague kind of information that the chambers reached half-way up the height of the building, and taking the maximum height of 120 cubits instead of the internal height of the holy, he made each storey four times too high. The windows, which are mentioned in 1 Kings vi. 4, consisted probably of lattice-work.

The lowest storey of the chambers was five cubits, the middle six, and the third seven cubits wide. This difference of the width arose from the circumstance that the external walls of the temple were so thick that they were made to recede one cubit after an elevation of five feet, so that the scarcement in the wall of the temple gave a firm support to the beams which supported the second storey, without being inserted into the wall of the sanctuary; which insertion was perhaps avoided not merely for architectural reasons, but also because it appeared to be irreverent. The third storey was supported likewise by a similar scarcement, which afforded a still wider space for the chamber of the third storey. These observations will render intelligible the following Biblical statements:—'And against the wall of the house he built storeys round about, both of the temple and of the oracle: and he made chambers round about: the nethermost storey was five cubits broad, and the middle was six cubits broad, and the third was seven cubits broad: for without in the wall of the house he made narrowed rests (*מנרעות*, narrowings or rebatements) round about, so that the beams should not be fastened in the walls of the house. The house, when it was in building, was built of stone made ready before it was brought thither: so that there was neither hammer, nor axe, nor any tool of iron heard in the house while it was in building. The door of the middle storey was in the right side of the house: and they went up with winding stairs into the middle storey, and out of the middle into the third. So he built the house, and finished it; and covered the house with beams and boards of cedar. And

then he built chambers against all the house, five cubits high : and they rested on the house with timber of cedar' (1 Kings vi. 7).

From this description it may be inferred that the entrance to these storeys was from without ; but some architects have supposed that it was from within ; which arrangement seems to be against the general aim of impressing the Israelitish worshippers with sacred awe by the seclusion of their sanctuary.

In reference to the windows, it should be observed that they served chiefly for ventilation, since the light within the temple was obtained from the sacred candlesticks. It seems from the descriptions of the temple to be certain that the *דבר*, *oracle*, or holy of holies, was an *adytum* without windows. To this fact Solomon seems to refer when he spake, 'The Lord said that he would dwell in the thick darkness' (1 Kings viii. 12).

The *דבר*, *oracle*, had perhaps no other opening besides the entrance, which was, as we may infer from the prophetic visions of Ezekiel (which probably correspond with the historic temple of Solomon) six cubits wide.

From 1 Kings vii. 10 we learn that the private dwellings of Solomon were built of massive stone. We hence infer that the framework of the temple also consisted of the same material. The temple was, however, wainscotted with cedar wood, which was covered with gold. The boards within the temple were ornamented by beautiful carvings representing cherubim, palms, and flowers. The ceiling of the temple was supported by beams of cedar wood (comp. ERES ; Pliny, *Hist. Nat.* xvi. 69). The wall which separated the holy from the holy of holies probably consisted not of stone, but of beams of cedar. It seems, further, that the partitions partly consisted of an *opus reticulatum* ; so that the incense could spread from the holy to the most holy. This we infer from 1 Kings vi. 21 : 'So Solomon overlaid the house within with pure gold : and he made a partition by the chains of gold before the oracle ; and he overlaid it with gold.'

The floor of the temple was throughout of cedar, but boarded over with planks of fir (1 Kings vi. 15). The doors of the oracle were composed of olive-tree ; but the doors of the outer temple had posts of olive-tree and leaves of fir (1 Kings vi. 31, *seq.*) Both doors, as well that which led into the temple as that which led from the holy to the holy of holies, had folding leaves, which, however, seem to have been usually kept open, the aperture being closed by a suspended curtain—a contrivance still seen at the church-doors in Italy, where the church-doors usually stand open, but the doorways can be passed only by moving aside a heavy curtain. From 2 Chron. iii. 5 it appears that the greater house was also ceiled with fir. It is stated in ver. 9, 'that the weight of the nails employed in the temple was fifty shekels of gold.' And also that Solomon 'overlaid the upper chambers with gold.'

The lintel and side posts of the oracle seem to have circumscribed a space which contained one-fifth of the whole area of the partition ; and the posts of the door of the temple one-fourth of the area of the wall in which they were placed. Thus we understand the passage 1 Kings vi. 31-35, which also states that the door was covered with carved work overlaid with gold.

Within the holy of holies stood only the ark of

the covenant ; but within the holy were ten golden candlesticks and the altar of incense (comp. the separate articles).

The temple was surrounded by an inner court, which in Chronicles is called the Court of the Priests, and in Jeremiah the Upper Court. This again was surrounded by a wall consisting of cedar beams placed on a stone foundation (1 Kings vi. 36) : 'And he built the inner court with three rows of hewed stone, and a row of cedar beams.' This inclosure, according to Josephus (*Antiq.* viii. 3. 9), was three cubits high. Besides this inner court, there is mentioned a Great Court (2 Chron. iv. 9) : 'Furthermore he made the court of the priests, and the great court, and doors for the court, and overlaid the doors of them with brass.' It seems that this was called the Outward Court (comp. Ezek. xiv. 17). This court was also more especially called the court of the Lord's house (Jer. xix. 12 ; xxvi. 2). These courts were surrounded by spacious buildings, which, however, according to Josephus (*De Bell. Jud.* v. 5. 1), seem to have been partly added at a period later than that of Solomon. For instance (2 Kings xv. 35), Jotham is said to have built the higher gate of the house of the Lord. In Jer. xxvi. 10, and xxxvi. 10, there is mentioned a New gate (comp. also Ezek. xl. 5-47 ; xlii. 1-14). But this prophetic vision is not strictly historical, although it may serve to illustrate history (comp. also Joseph. *Antiq.* viii. 3. 9). The third entry into the house of the Lord, mentioned in Jer. xxxviii. 14, does not seem to indicate that there were three courts, but appears to mean that the entry into the outer court was called the first, that into the inner court the second, and the door of the sanctuary the third. It is likely that these courts were quadrilateral. In the divisions of Ezekiel they form a square of four hundred cubits. The inner court contained towards the east the altar of burnt-offering, the brazen sea, and ten brazen lavers ; and it seems that the sanctuary did not stand in the centre of the inner court, but more towards the west. From these descriptions we learn that the temple of Solomon was not distinguished by magnitude, but by good architectural proportions, beauty of workmanship, and costliness of materials. Many of our churches have an external form not unlike that of the temple of Solomon. In fact, this temple seems to have been the pattern of our church buildings, to which the chief addition has been the Gothic arch. Among others, the Roman Catholic church at Dresden is supposed to bear much resemblance to the temple of Solomon.

It is remarkable that after the temple was finished it was not consecrated by the high-priest, but by a layman, by the king in person, by means of extempore prayers and sacrifices. The temple remained the centre of public worship for all the Israelites only till the death of Solomon, after which ten tribes forsook this sanctuary. But even in the kingdom of Judah it was from time to time desecrated by altars erected to idols. For instance, 'Manasseh built altars for all the host of heaven in the two courts of the house of the Lord. And he caused his son to pass through the fire, and observed times, and used enchantments, and dealt with familiar spirits and wizards : he wrought much wickedness in the sight of the Lord to provoke him to anger. And he set a graven image of the grove that he had made in the house,' etc. Thus we find

also that king Josiah commanded Hilkiah the high-priest, and the priests of the second order, to remove the idols of Baal and Asherah from the house of the Lord (2 Kings xxiii. 4, 13) : 'And the altars that were on the top of the upper chamber of Ahaz, which the kings of Judah had made, and the altars which Manasseh had made in the two courts of the house of the Lord, did the king beat down and brake them down from thence, and cast the dust of them into the brook Kidron.' In fact, we are informed that in spite of the better means of public devotion which the sanctuary undoubtedly afforded, the national morals declined so much that the chosen nation became worse than the idolaters whom the Lord destroyed before the children of Israel (2 Kings xxi. 9)—a clear proof that the possession of external means is not a guarantee for their right use. It appears also that, during the times when it was fashionable at court to worship Baal, the temple stood desolate, and that its repairs were neglected (see 2 Kings xii. 6, 7). We further learn that the cost of the repairs was defrayed chiefly by voluntary contribution, by offerings, and by redemption money (2 Kings xii. 4, 5). The original cost of the temple seems to have been defrayed by royal bounty, and in great measure by treasures collected by David for that purpose.

There was a treasury in the temple, in which much precious metal was collected for the maintenance of public worship. The gold and silver of the temple was, however, frequently applied to political purposes (1 Kings xv. 18, *seq.* ; 2 Kings xii. 18 ; xvi. 8 ; xviii. 15). The treasury of the temple was repeatedly plundered by foreign invaders. For instance, by Shishak (1 Kings xiv. 26) ; by Jehoash, king of Israel (2 Kings xiv. 14) ; by Nebuchadnezzar (2 Kings xxiv. 13) ; and lastly, again by Nebuchadnezzar, who, having removed the valuable contents, caused the temple to be burned down (2 Kings xxv. 9, *seq.*), B.C. 588. The building had stood since its completion 417 or 418 years (Josephus has 470, and Rufinus 370 years). Thus terminated what the later Jews called *בית הראשון*, *the first house*.

In many writers on the temple the Biblical statements concerning the first, or Solomon's temple, are confounded not merely with the temple in the prophetic visions of Ezekiel, but also with descriptions of the temple erected by Zerubbabel, and even with the later structures of Herod. This confusion we have endeavoured to avoid in the foregoing statements.

II. THE SECOND TEMPLE.—In the year B.C. 536 the Jews obtained permission from Cyrus to colonise their native land. Cyrus commanded also that the sacred utensils which had been pillaged from the first temple should be restored, and that for the restoration of the temple assistance should be granted (Ezra i. and vi. ; 2 Chron. xxxvi. 22, *seq.*) The first colony which returned under Zerubbabel and Joshua having collected the necessary means, and having also obtained the assistance of Phœnician workmen, commenced, in the second year after their return, B.C. 534, the rebuilding of the temple. The Sidonians brought rafts of cedar trees from Lebanon to Joppa. The Jews refused the co-operation of the Samaritans, who being thereby offended, induced the king Artasashta (probably Smerdis) to prohibit the building. And it was only in the second year of Darius Hystaspis, B.C. 520, that the building was resumed. It was

completed in the sixth year of this king, B.C. 516, (comp. Ezra v. and vi. ; and Haggai i. 15). According to Josephus (*Antiq.* xi. 4. 7) the temple was completed in the ninth year of the reign of Darius.

This second temple was erected on the site of the former, and probably after the same plan. According to the plan of Cyrus the new temple was sixty cubits high and sixty cubits wide. It appears from Josephus, that the height is to be understood of the porch, for we learn from the speech of Herod which he records, that the second temple was sixty cubits lower than the first, whose porch was 120 cubits high (comp. Joseph. *Antiq.* xv. 11. 1). The old men who had seen the first temple were moved to tears on beholding the second, which appeared like nothing in comparison with the first (Ezra iii. 12 ; Haggai ii. 3, *seq.*) It seems, therefore, that it was not so much in dimensions that the second temple was inferior to the first, as in splendour, and in being deprived of the ark of the covenant, which had been burned with the temple of Solomon. The temple of Zerubbabel had several courts (*αὐλάι*) and cloisters or cells (*πρόθυρα*). Josephus distinguishes an internal and external *ἱερὸν*, and mentions cloisters in the courts. This temple was connected with the town by means of a bridge (*Antiq.* xiv. 4). During the wars from B.C. 175 to B.C. 163, it was pillaged and desecrated by Antiochus Epiphanes, who introduced into it idolatrous rites (2 Maccab. vi. 2, 5), dedicating the temple to Jupiter Olympius, and the temple on Mount Gerizim, in allusion to the foreign origin of its worshippers, to Jupiter *Æνός*. The temple became so desolate that it was overgrown with vegetation (1 Maccab. iv. 38 ; 2 Maccab. vi. 4). Judas Maccabæus expelled the Syrians and restored the sanctuary, B.C. 165. He repaired the building, furnished new utensils, and erected fortifications against future attacks (1 Maccab. iv. 43-60 ; vi. 7 ; xiii. 52 ; 2 Maccab. i. 18 ; x. 3). Alexander Jannæus, about B.C. 106, separated the court of the priests from the external court by a wooden railing (Joseph. *Antiq.* xiii. 5). During the contentions among the later Maccabees, Pompey attacked the temple from the north side, caused a great massacre in its courts, but abstained from plundering the treasury, although he even entered the holy of holies, B.C. 63 (Joseph. *Antiq.* xiv. 4). Herod the Great, with the assistance of Roman troops, stormed the temple, B.C. 37 ; on which occasion some of the surrounding halls were destroyed or damaged.

III. TEMPLE OF HEROD.—Herod, wishing to ingratiate himself with the church and state party, and being fond of architectural display, undertook not merely to repair the second temple, but to raise a perfectly new structure. As, however, the temple of Zerubbabel was not actually destroyed, but only removed after the preparations for the new temple were completed, there has arisen some debate whether the temple of Herod could properly be called the third temple.

The reason why the temple of Zerubbabel was not at once taken down, in order to make room for the more splendid structure of Herod, is explained by Josephus as follows (Joseph. *Antiq.* xv. 11. 2). The Jews were afraid that Herod would pull down the whole edifice, and not be able to carry his intentions as to its rebuilding into effect ; and this danger appeared to them to be very great, and the vastness of the undertaking to be such as could

hardly be accomplished. But while they were in this disposition, the king encouraged them, and told them he would not pull down their temple till all things were gotten ready for building it up entirely.

And as Herod promised them this beforehand, so he did not break his word with them, but got ready a thousand waggons, that were to bring stones for this building, and chose out ten thousand of the most skilful workmen, and bought a thousand sacerdotal garments for as many of the priests, and had some of them taught the arts of stone-cutters, and others of carpenters, and then began to build; but this not till everything was well prepared for the work.

The work was commenced in the eighteenth year of the reign of Herod; that is, about the year 734-735 from the building of Rome, or about twenty or twenty-one years before the Christian era. Priests and Levites finished the temple itself in one year and a half. The out-buildings and courts required eight years. However, some building operations were constantly in progress under the successors of Herod, and it is in reference to this we are informed that the temple was finished only under Albinus, the last procurator but one, not long before the commencement of the Jewish war in which the temple was again destroyed. It is in reference also to these protracted building operations that the Jews said to Jesus, 'Forty and six years was this temple in building' (John ii. 20). The temple is described by Josephus (*Antiq.* xv. 11, and *De Bell. Jud.* v. 5). With this should be compared the Talmudic tract *Middoth* (Mishna, v. 10), which has been edited and commented upon by C. l'Empereur de Opyck, Lugduni Bat. 1630, 4to. Comp. also vols. viii. and ix. of *Antiquitates Hebraicae*, by Ugolino, which contains, in addition to other dissertations, Mosis Maimonidis *Constitutiones de domo electa*; Abraham ben David, *De Templo*. Comp. also E. A. Schulze, *De variis Judaeorum erroribus in descriptione templi secundi*, prefixed to his edition of Ireland, *De spoliis templi Hierosolymitani*.

The whole of the structures belonging to the temple were a stadium square, and consequently four stadia (or half a Roman mile) in circumference. The temple was situated on the highest point, not quite in the centre, but rather to the north-western corner of this square, and was surrounded by various courts, the innermost of which was higher than the next outward, which descended in terraces. The temple, consequently, was visible from the town, notwithstanding its various high enclosures. The outer court was called *הר הבית*, the *mountain of the house*, *τὸ ὄρος τοῦ ἱεροῦ* (1 Maccab. xiii. 52). According to *Middoth* (i. 3) this mountain of the house had five gates, two towards the south and one towards each of the other quarters. The principal gate was that towards the east: it was called the gate Susan, and a representation of the town of Susa, sculptured in relief, was affixed to it. This had been preserved from the days of Zerubbabel, when the Jews were anxious to express by all means their loyal submission to the Persian power. Most interpreters consider it the same which in Acts iii. 2 and 10 is called *πύλη ὡραία*, the *beautiful gate*. It seems, however, that besides these five principal gates there were some other entrances, because Josephus speaks of four gates on the west and several on the south. Annexed to the outer wall were halls which surrounded the

temple, and were thirty cubits wide, except on the south side, where the *βασιλικὴ στοά*, the *royal hall*, seems to have been threefold, or three times wider than the other halls. The roofs of these halls were of cedar-wood, and were supported by marble columns twenty-five cubits high. The Levites resided in these halls. There was also a synagogue where the Talmudic doctors might be asked questions, and where their decisions might be heard (Luke ii. 46). These halls seemed likewise to have formed a kind of lounge for religionists; they appear to have been spacious enough to afford opportunities for religious teachers to address knots of hearers. Thus we find that Jesus had there various opportunities for addressing the people and refuting cavillers.

Here also the first Christians could daily assemble with one accord (Acts ii. 46). Within this outer court money-changers and cattle-dealers transacted a profitable business, especially during the time of Passover. The priests took only shekels of full weight—that is, shekels of the sanctuary—even after the general currency had been deteriorated: hence the frequent opportunity of money-changers to accommodate for agio the worshippers, most of whom arrived from abroad unprovided with the right coin. The profaneness to which this money-changing and cattle-dealing gave rise caused the indignation of our Lord, who suddenly expelled all these sharks from their stronghold of business (Matt. xxi. 12, *seq.*; Mark xi. 15-17; Luke xix. 45, 46; John ii. 13-17).

The surface of this outer court was paved with stones of various colours. A stone balustrade, *סורג*, which according to some statements was three cubits high, and according to *Middoth* ten hands high, was several steps higher up the mountain than this outer court, and prevented the too near approach of the heathens to the next court. For this purpose there were also erected columns at certain distances within this balustrade, on which there were Greek and Latin inscriptions, interdicting all heathens, under penalty of death, to advance farther (Joseph. *De Bell. Jud.* vi. 2. 4; Philo, *Opera*, ii. 577). Comp. Acts xxi. 28, where Paul is accused of having brought Greeks into the temple, and thus polluting the holy place.

Higher up than this balustrade was a wall of the court called *חיל*. This wall was from its foundation forty cubits high, but from within the court it appeared to be only twenty-five cubits high. To this higher court led a staircase and gate on the eastern side of the square. This staircase first led into the *עזרת נשים*, *γυναικωνίτις*, *τὸ τῶν γυναικῶν περὶτεῖχοςμα*, the *court of the women*, which was 135 cubits square. Again, fifteen steps higher up was the principal entrance to the *עזרת ישראל*, the *court of the Israelites*—i.e. the men—on the eastern side of the temple. On the other sides only five steps led up from the court of the women to that of the men. But the fifteen steps, each of which was lower than each of the five steps, seem to have terminated in the same level. Over the gates were structures more than forty cubits high, in which were rooms. Each of the gates was adorned with two columns, which were twelve cubits in circumference. In these gates were folding-doors, each of which was thirty cubits high and fifteen wide: they were plated with gold and silver. The gate towards the east, being the principal one, was of Corinthian

brass, and was higher, larger, and more adorned with precious metal than the rest. Within the walls of this court were halls supported by beautiful columns. The court of the priests was separated from that of the Israelites by a low stone balustrade one cubit high. The whole space which was occupied by the court of the Israelites and that of the priests, together with the temple, was from east to west 187 cubits, and from north to south 135 cubits. Each of these courts was eleven cubits wide, in which measurement that of the halls seems not to have been included (comp. *Middoth*, ii. 6). The court of the priests surrounded the whole temple. On the northern and southern sides were magazines of salt, wood, water, etc., and on the south side also was the place of meeting for the Sanhedrin. Towards the east, with entrances from the court of the women, were two rooms in which the musical instruments were deposited; towards the north-west were four rooms in which the lambs for the daily sacrifices were kept, the shewbread baked, etc. (comp. 1 Chron. ix. 31, 32). In the four corners of the court of the women were lazarettos and quarantine establishments for the reception of persons suspected of leprosy and other infectious diseases; there was also a physician appointed to treat the priests who were unwell. There were several alms-boxes within the various courts, which had the shape of trumpets, and which sometimes are called *γαζοφυλάκια*, or also collectively *τὸ γαζοφυλάκιον*. All the courts were paved with flat stones. From the various statements concerning the court of the women, it is evident that this appellation did not mean a place exclusively devoted to the women, but rather a place to which even women were admitted, together with other persons who were not allowed to advance farther. The temple itself (*ὁ ναός*) was fifteen steps higher than the court of the Israelites, and stood, not in the middle, but rather towards the north-western corner of the court of the priests. In the usual plans of the temple the passage in *Middoth* (ii. 1) has been disregarded. This passage clearly states that the temple was not in the centre: 'The greatest space was from the south, the next greatest from the east, the third from the north, and the least from the west. The foundations of the temple consisted of blocks of white marble, some of which were forty-five cubits long, six cubits wide, and five cubits high. The porch measured externally a hundred cubits in width; the remaining part of the building sixty or seventy cubits.' Thus it appears that the porch projected on each side from fifteen to twenty cubits. The difference of measurement between Josephus and the Talmud may be accounted for by the difference of internal and external width. The projections of the porch were like shoulders (*ὥσπερ ὦμοι*). The whole building was a hundred or a hundred and ten cubits long, and a hundred cubits high. The internal measurement of the porch was fifty cubits by twenty, and ninety cubits in height. The holy was forty cubits by twenty, and sixty cubits high; the holy of holies was twenty cubits square and sixty cubits high. According to *Middoth* the porch was only eleven cubits, the holy forty cubits, the holy of holies twenty cubits, and behind this last there was a vestry of six cubits. The remaining twenty-three cubits were distributed among the diameters of the several walls, so that the whole was a hundred cubits long. In the eastern front, which was a

hundred cubits square, was a proportionate gate, seventy cubits high and twenty-five cubits wide. Above the holy and holy of holies were upper rooms. On the summit of the temple (*κατὰ κορυφὴν*) were spikes (*δρελοῖ*), which resembled our conductors in shape, and were intended to prevent birds from settling on the temple. *Middoth* (iv. 6)

calls these spikes, which were one cubit long, *כּוֹלָח עוֹרֵב*, *scare-crows*, or literally *scare-ravens*. It seems that the roof was flat, and surrounded by a balustrade three cubits high. On the north and south side of the temple were three storeys of chambers, which were much higher than those of the Solomonian temple, but did not entirely conceal the temple itself, because it projected above them. The spaces on the north and south side of the porch contained the apparatus for slaughtering the sacrifices, and were called *בֵּית הַחֵילָפוֹת*, *the house of knives*.

The holy of holies was entirely empty, *ἐκεῖτο οὐδὲν ὅλως ἐν αὐτῷ* (Joseph. *De Bell. Jud.* v. 5. 5); however, there was a stone in the place of the ark of the covenant, called *שֹׁהַן שְׁמִי*, on which the high-priest placed the censer. Before the entrance of the holy of holies was suspended a curtain, which was torn by the earthquake that followed after the crucifixion. The rabbis talk of two curtains, between which was a space of one cubit, suspended before the holy of holies. The folding doors between the porch and the holy were twenty cubits high and ten cubits wide; but the entrance itself, with its mouldings, was fifty-five cubits high and sixteen cubits wide. These doors stood open; there were, however, behind them some other doors which were shut, and before which a splendid Babylonian byssus curtain was suspended, in colours and workmanship similar to that of the Solomonian temple. The entrance to the porch was externally seventy cubits high and twenty-five cubits wide, with folding doors of forty cubits high and twenty cubits wide. These doors were usually kept open. This entrance to the porch was adorned

by a colossal golden vine, *נָפַל שָׁל זֶהָב*, whose grapes were as big as men (Jani, *De vite aurea templi Hierosolymitani*, in Ugolino, tom. ix.) This vine was a symbolical representation of the 'noble vine' (Jer. ii. 21; Ezek. xix. 10; Joel i. 7), and of the vineyard (Is. v.), under which the prophets represent their nation. It is very likely that this vine also gave an opportunity to the parable of the vine (John xv.), and to the strange misconception of pagan scribblers that the Jews worshipped Bacchus. (Comp. Lakemacheri *Observat. Philolog.* i. 17, seq.; Rosenmüller's *Exegetisches Repertorium*, i. 166, seq.)

Within the porch were a golden and a marble table, on which the priest who entered the sanctuary daily deposited the old and the new shewbread. Before the porch, towards the south, were the *בֵּינִי*, brazier or fire-pan, and the altar for burnt-offerings; towards the north were six rows of rings attached to the pavement, to which the sacrifices to be killed were fastened; also eight low columns overlaid with cedar beams, from which the beasts that had been killed were suspended in order to be skinned. Between these columns stood *שְׁלֹחֹת* *שֵׁשׁ*, *marble tables*, on which the flesh and entrails were deposited. On the western side of the altar stood a marble table, on which the fat was

deposited, and a silver table, on which the various utensils were placed.

The temple was situated upon the south-eastern corner of Mount Moriah, which is separated to the east by a precipitous ravine and the Kidron from the Mount of Olives: the Mount of Olives is much higher than Moriah. On the south, the temple was bounded by the ravine which separates Moriah from Zion, or the lower city from the upper city. Opposite to the temple, at the foot of Zion, were formerly the king's gardens, and higher up, in a south-westerly direction, the stronghold of Zion or the city of David, on a higher level than the temple. The temple was in ancient warfare almost impregnable, from the ravines at the precipitous edge of which it stood; but it required more artificial fortifications on its western and northern sides, which were surrounded by the city of Jerusalem; for this reason there was erected at its north-western corner the tower of Antonia, which although standing on a lower level than the temple itself, was so high as to overlook the sacred buildings with which it was connected, partly by a large staircase, partly by a subterraneous communication. This tower protected the temple from sudden incursions from the city of Jerusalem, and from dangerous commotions among the thousands who were frequently assembled within the precincts of the courts; which also were sometimes used for popular meetings. Under the sons of Herod, the temple remained apparently in good order, and Herod Agrippa, who was appointed by the emperor Claudius its guardian, even planned the repair of the eastern part, which had probably been destroyed during one of the conflicts between the Jews and Romans, of which the temple was repeatedly the scene (*Antiq.* xvii. 10). Many savants have adopted a style as if they possessed much information about the archives of the temple; there are a few indications from which we learn that important documents were deposited in the tabernacle and temple. Even in Deut. xxxi. 26 we find that the book of the law was deposited in the ark of the covenant. 2 Kings xxii. 8, Hilkiah rediscovered the book of the law in the house of Jehovah. In 2 Maccab. ii. 13, we find a βιβλίον-θήκη mentioned, apparently consisting chiefly of the canonical books, and probably deposited in the temple. In Josephus (*De Bell. Jud.* v. 5) it is mentioned that a book of the law was found in the temple. It appears that the sacred writings were kept in the temple (*Antiq.* v. i. 17). Copies of political documents seem to have been deposited in the treasury of the temple (1 Maccab. xiv. 49).

This treasury, ὁ ἱερός θησαυρός, was managed by an inspector, γασφύλαξ, גַּזְזָר, and it contained the great sums which were annually paid in by the Israelites, each of whom paid a half shekel, and many of whom sent donations in money, and precious vessels, ἀνθήματα. Such costly presents were especially transmitted by rich proselytes, and even sometimes by pagan princes (2 Maccab. iii. 3; Joseph. *Antiq.* xiv. 16. 4; xviii. 3. 5; xix. 6. 1; *De Bell. Jud.* ii. 17. 3; v. 13. 6; *c. Apion.* ii. 5; Philo, *Opp.* ii. 59, seq.; 569). It is said especially that Ptol. Philadelphus was very liberal to the temple, in order to prove his gratitude for having been permitted to procure the Septuagint translation (Aristeas, *De Translat. LXX.* 109, seq.) The gifts exhibited in the temple are mentioned in Luke xxi. 5; we find even that the rents of the whole town of Ptolemais were given to the temple (1

Maccab. x. 39). There were also preserved historical curiosities (2 Kings xi. 10), especially the arms of celebrated heroes (Joseph. *Antiq.* xix. 6. 1): this was also the case in the tabernacle.

The temple was of so much political importance that it had its own guards (φύλακες τοῦ ἱεροῦ), which were commanded by a στρατηγός.

Twenty men were required for opening and shutting the eastern gate (Joseph. *De Bell. Jud.* vi. 5. 3; *c. Apion.* ii. 9; *Antiq.* vi. 5. 3; xvii. 2. 2). The στρατηγός had his own secretary (*Antiq.* xx. 6. 2; 9. 3), and had to maintain the police in the courts (comp. Acts iv. 1 and v. 24). He appears to have been of sufficient dignity to be mentioned together with the chief priests. It seems that his Hebrew title was אִישׁ הַר הַבַּיִת, *the man of the mountain of the house*.

The priests themselves kept watch on three different posts, and the Levites on twenty-one posts.

It was the duty of the police of the temple to prevent women from entering the inner court, and to take care that no person who was Levitically unclean should enter within the sacred precincts. Gentiles were permitted to pass the first enclosure, which was therefore called the Court of the Gentiles; but persons who were on any account Levitically unclean were even not permitted to advance thus far. Some sorts of uncleanness—for instance that arising from the touch of a corpse—excluded only from the court of the men. If an unclean person had entered by mistake, he was required to offer sacrifices of purification. The high-priest himself was forbidden to enter the holy of holies under penalty of death on any other day but the day of atonement (Philo, *Opp.* ii. 591). Nobody was admitted within the precincts of the temple who carried a stick or a basket, and who wanted to pass merely to shorten his way, or who had dusty shoes (*Middoth*, ii. 2).

The various office-bearers in the temple were called στρατηγοὶ τοῦ ἱεροῦ, *captains or officers of the temple* (Luke xxii. 52), while their chief was simply designated στρατηγός.

During the final struggle of the Jews against the Romans, A.D. 70, the temple was the last scene of the tug of war. The Romans rushed from the tower Antonia into the sacred precincts, the halls of which were set on fire by the Jews themselves. It was against the will of Titus that a Roman soldier threw a firebrand into the northern out-buildings of the temple, which caused the conflagration of the whole structure, although Titus himself endeavoured to extinguish the fire (Joseph. *De Bell. Jud.* vi. 4). 'One cannot but wonder at the accuracy of this period thereto relating; for the same month and day were now observed, as I said before, wherein the holy house was burnt formerly by the Babylonians. Now, the number of years that passed from its first foundation, which was laid by King Solomon, till this its destruction, which happened in the second year of the reign of Vespasian, are collected to be one thousand one hundred and thirty, besides seven months and fifteen days; and from the second building of it, which was done by Haggai, in the second year of Cyrus the king, till its destruction under Vespasian, there were six hundred and thirty-nine years and forty-five days.'

The sacred utensils, the golden table of the shewbread, the book of the law, and the golden candlestick, were displayed in the triumph at Rome.

Representations of them are still to be seen sculptured in relief on the triumphal arch of Titus (comp. Fleck's *Wissenschaftliche Reise*, i. 1, plate i.-iv.; and Reland, *De spoliis Templi Hierosolymitani in arcu Titiano*, edit. E. A. Schulze, Traject. ad Rh. 1775. The place where the temple had stood seemed to be a dangerous centre for the rebellious population, until, in A.D. 136, the emperor Hadrian founded a Roman colony, under the name *Ælia Capitolina*, on the ruins of Jerusalem, and dedicated a temple to Jupiter Capitolinus on the ruins of the temple of Jehovah. Henceforth no Jew was permitted to approach the site of the ancient temple, although the worshippers of Jehovah were in derision compelled to pay a tax for the maintenance of the temple of Jupiter. Comp. Dion Cassius (Xiphil.) lxix. 12; Hieron. *ad Jes.* ii. 9; vi. 11, *seq.*; Euseb. *Hist. Eccles.* iv. 6; *Demonstratio Evangelica*, viii. 18. Under the reign of Constantine the Great some Jews were severely punished for having attempted to restore the temple (comp. Fabricii *Lux Evangelii*, p. 124).

The emperor Julian undertook, A.D. 363, to rebuild the temple; but after considerable preparations and much expense, he was compelled to desist by flames which burst forth from the foundations (comp. Ammianus Marcellinus, xxiii. 1; Socrates, *Hist. Eccles.* iii. 20; Sozomen, v. 22; Theodoretus, iii. 15; Schröckh, *Kirchen Geschichte*, vi. 385, *seq.*) Repeated attempts have been made to account for these igneous explosions by natural causes; for instance, by the ignition of gases which had long been pent up in subterranean vaults (comp. Michaelis, *Zerst. kl. Schrift.* iii. 453, *seq.*) A similar event is mentioned by Josephus (*Antiq.* xvi. 7. 1), where we are informed that Herod, while plundering the tombs of David and Solomon, was suddenly frightened by flames which burst out and killed two of his soldiers. Bishop Warburton contends for the miraculousness of the event in his discourse *Concerning the Earthquake and Fiery Eruption which defeated Julian's Attempt to rebuild the Temple of Jerusalem*. Comp. also J. G. Lotter, *Historia Instaurationis Templi Hierosolymitani sub Juliano*, Lips. 1728, 4to; J. G. Michaelis (F. Holzfuß) *Diss. de Templi Hierosolymitani Juliani mandato per Judeos frustra tentata restitutione*, Hal. 1751, 4to; Lardner's *Collection of Ancient Jewish and Heathen Testimonies*, iv. p. 57, *seq.*; Ernesti, *Theol. Bibl.* ix. 604, *seq.* R. Tourlet's French Translation of the works of Julian, Paris 1821, tom. ii. p. 435, *seq.*, contains an examination of the evidence concerning this remarkable event. See also Jost's *Geschichte der Israeliten*, iv. p. 211 and 254, *seq.*; and Jost's *Allgemeine Geschichte des Jüdischen Volkes*, vol. ii. p. 158.

A splendid mosque now stands on the site of the temple. This mosque was erected by the caliph Omar after the conquest of Jerusalem by the Saracens, A.D. 636. It seems that Omar changed a Christian church, that stood on the ground of the temple, into this mosque, which is called *El Aksa*, the outer, or northern, because it is the third of the most celebrated mosques, two of which—viz. those of Mecca and Medina—are in a more southern latitude.

Compare on the whole subject Ugolino, tom. viii. 9; Lightfoot, *Descriptio Templi Hierosolymitani*, Opp. i. p. 533, *seq.*; J. Bapt. Villalpando et Pradi, in *Ezechiel*; J. Jud. Leonis, libri quatuor, *De Templo Hieros. tam priori quam poster. ex Hebr.*

Histor.* i. ii. 113, *seq.* The best works on the antiquities and history of the Jews contain also chapters illustrative of the temple; see also Winer's *Real-Wörterb. sub* 'Tempel'; and the art. 'Tempel zu Jerusalem,' by Merz in Herzog, *Real-Encycl.*—C. H. F. B.

TEMPTATION OF OUR LORD (Matt. iv. 1-11; Mark i. 12, 13; Luke iv. 1-12). The popular view of this undoubted portion of our Saviour's history is, that it is a narrative of outward transactions; that our Saviour immediately after his baptism was conducted by the Spirit into the wilderness—either the desolate and mountainous region now called Quarantania by the people of Palestine (Kitto's *Physical History*, pp. 39, 40), or the great desert of Arabia, mentioned in Deut. xxxii. 10; viii. 15; Hos. xiii. 5; Jer. ii. 6, etc.—where the devil tempted him in person, appeared to him in a visible form, spoke to him in an audible voice, removed him to the summit 'of an exceeding high mountain,' and to the top of 'a pinnacle of the temple at Jerusalem;' whereas the view taken by many learned commentators, ancient and modern, is, that it is the narrative of a *vision*, which was designed to 'supply that ideal experience of temptation or trial, which it was provided in the divine counsels for our Lord to receive, previously to entering upon the actual trials and difficulties of his ministry' (Bishop Maltby, *Sermons*, vol. ii. Lond. 1822, p. 276). Farmer also considers it a 'divine vision,' and endeavours with much learning and ingenuity, to 'illustrate the wise and benevolent intention of its various scenes, as symbolical predictions and representations of the principal trials attending Christ's public ministry' (*Inquiry into the Nature and Design of Christ's Temptation*, 8vo, London, Preface). On behalf of the popular interpretation, it is urged that the accounts given by the evangelists convey no intimation that they refer to a vision; that the feeling of hunger could not have been merely ideal; that a vision of forty days' continuance is incredible; that Moses, who was a type of Christ, saw no 'visions,' and that hence it may be concluded Christ did not; that it is highly probable there would be a personal conflict between Christ and Satan, when the former entered on his ministry. Satan had ruined the first Adam, and might hope to prevail with the second (Trollope's *Analecta*, vol. i. Lond. 1830, p. 46). Why too, say others, was our Lord taken up into a mountain to see a vision? As reasonably might St. Paul

have taken the Corinthians into a mountain to 'show them the more excellent way of charity' (1 Cor. xii. 31). On the contrary side, it is rejoined, that the evangelists do really describe the temptation as a vision. St. Matthew says, ἀνέχθη εἰς τὴν ἔρημον ὑπὸ τοῦ πνεύματος; St. Mark, τὸ πνεῦμα αὐτὸν ἐκβάλλει; and St. Luke, ἤγετο ἐν τῷ πνεύματι. Do these phrases mean no more than that Jesus went by the guidance or impulse of the Spirit to a particular locality? Do they not rather import that Christ was brought into the wilderness under the full influence of the prophetic Spirit making suitable revelations to his mind? With regard to the hunger, the prophets are represented as experiencing bodily sensations in their visions (Ezek. iii. 3; Rev. x. 10). Further arguments, derived from an unauthorised application of types, are precarious—that the first Adam really had no personal encounter with Satan; that all the purposes of our Lord's temptation might be answered by a vision, for whatever might be the mode, the effect was intended to be produced upon his mind and moral feelings, like St. Peter's vision concerning Cornelius, etc. (Acts x. 11-17); that commentators least given to speculate allow that the temptation during the first forty days was carried on by mental suggestion only, and that the visible part of the temptation began 'when the tempter came to him' (Matt. iv. 3; Luke iv. 3; Scott, *in loc.*); that, with regard to Christ's being 'taken up into an exceeding high mountain,' Ezekiel says (xl. 2): 'In the visions of God, brought he me into the land of Israel, and set me upon a very high mountain,' etc.; and that St. John says: 'He carried me away in the spirit to a great and high mountain, and showed me that great city the holy Jerusalem' (Rev. xxi. 10). But certain direct arguments are also urged on the same side. Thus, is it consistent with the sagacity and policy of the evil spirit, to suppose that he appeared in his own proper person to our Lord, uttering solicitations to evil? Was not this the readiest mode to frustrate his own intentions? Archbishop Secker says: 'Certainly he did not appear what he was, for that would have entirely frustrated his intent' (*Sermons*, vol. ii. p. 114). Chandler says: 'The devil appeared not as himself, for that would have frustrated the effect of his temptation' (*Serm.* vol. iii. p. 178). Secker supposes that 'Satan transformed himself into an angel of light;' but was it likely that he would put on this form in order to tempt our Lord to idolatry? (Matt. iv. 9.) Chandler thinks he appeared as 'a good man;' but would it have served his purpose to appear as a good man promising universal dominion? The supposition that the devil disguised himself in any form might indeed constitute the temptation a trial of our Lord's understanding, but not of his heart. Besides, Christ is represented as addressing him as 'Satan' (ver. 10). It is further urged that the literal interpretation does but little honour to the Saviour, whom it represents as carried or conducted, 'by the devil at his will,' and therefore as accessory to his own temptation and danger; nor does it promote the consolation of his followers, none of whom could ever be similarly tempted. Our Lord indeed submitted to all the liabilities of the human condition; but do these involve the dominion of Satan over the body, to the extent thus represented? The literal interpretation also attributes miraculous powers to the devil, who, though a spiritual being,

is represented as becoming visible at pleasure, speaking in an audible voice, and conveying mankind where he pleases—miracles not inferior to what our Lord's preservation would have been, had he cast himself headlong from the temple. Suppose we even give up the old notion, that 'the devil hurried Christ through the air, and carried him from the wilderness to the temple' (Benson's *Life of Christ*, p. 35); and say with Doddridge and others, that 'the devil took our Lord about with him as one person takes another to different places;' yet how without a miracle shall we account for our Saviour's admission to the exterior of the temple, unless he first, indeed, obtained permission of the authorities, which is not recorded? (Comp. Joseph. *Antiq.* xv. 11, sec. 3, 5, and *De Bell. Jud.* v. 5.) The difficulty is solved by the supposition simply of a change in our Lord's perceptions. And how can we further understand, except by the aid of a vision or a miracle, that the devil 'showed our Lord all the kingdoms of the world and the glory of them in a moment of time' (ἐν στιγμή χρόνου), a phrase referring to the mathematical point, and meaning the most minute and indivisible portion of duration—that is, instantaneously; yet in this space of time, according to the literal interpretation, 'the devil showed our Lord all the kingdoms of the world and all the glory of them'—*i.e.* whatever relates to their magnificence, as imperial robes, crowns, thrones, palaces, courts, guards, armies, etc. Scott and Doddridge resort to the supposition of 'an illusory show;' but it may be asked, if one of the temptations was conducted by such means, why not the other two? Macknight endeavours to explain 'all the kingdoms of the world, and the glory of them' as relating only to the land of promise (*Harmony of the Gospels*, Lond. 1822, p. 350, note). Farmer conceives that no mountain in Palestine commands so extensive a prospect. It is a further difficulty attending the literal interpretation, that Satan represents all the kingdoms of the world and their glory to be at his disposal; an assertion not denied by our Lord, who simply rejects the offer. It may readily be conceived that it would answer all purposes that Jesus should seem to have the proposal in question made to him. It is next observed, that many things are spoken of in Scripture as being done, which were only done in vision. See the numerous instances collected by Bishop Law (*Considerations of the Theory of Religion*, Lond. 1820, pp. 85, 86). The reader may refer to Gen. xxxii. 30; Hos. i. iii.; Jer. xiii. xxv. xxvii.; Ezek. iii. iv. v. St. Paul calls his being 'caught up into the third heaven and into Paradise' a vision and revelation of the Lord (2 Cor. xii. 1-4). It is plain, from this instance in the case of Paul, and from that of St. Peter (Acts xii. 7-9), who had already experienced visions (x. 10, etc.), that neither of the apostles could at first distinguish visions from impressions made on the senses. In further illustration it is urged that the prophets are often said to be carried about in visions (Ezek. viii. 1-10; xi. 24, 25; xxxvii. 1; xl. 1, 2). The phrases 'by the spirit,' etc., are equivalent to 'the hand of God,' etc., among the prophets (1 Kings xviii. 46; 2 Kings iii. 15; Ezek. i. 3). A comparison of the parallel phrases in the Sept. of Ezekiel, and the evangelists, in regard to Christ's temptation, casts much light upon the subject. The phrase, 'the devil leaveth him,' is equivalent to the phrase, 'the

vision I had seen went up from me' (Ezek. xi. 24). Farmer's theory respecting the intention of this prophetic vision may be thus summarily stated. The spirit of God was its sole author, making suitable revelations to the mind of Jesus, with a view to his future trials. It is called a temptation of the devil, because couched under the figure of Satan coming to him and offering him temptations. The first scene was probationary, serving to try the present turn and temper of the Saviour's mind; and also prophetic, having reference to his future ministry, through the whole course of which he was pressed with the same kind of temptations, and resisted them upon the same principles. This part of the vision conveyed this general instruction, that Christ, though the Son of God, was to struggle with hunger and thirst, and all other evils incidental to the lowest of the sons of men, and that he was never to exert his miraculous power for his own personal relief, but with resignation and faith wait for the interposition of God in his favour. The second scene, in which he was tempted to cast himself from the temple, though dazzling as a proposal to demonstrate his Messiahship by a mode corresponding to the notions of the Jewish people, was intended to teach him not to prescribe to God in what instances he shall exert his power, nor rush into danger uncalled in dependence upon divine aid, nor to dictate to divine wisdom what miracles shall be wrought for men's conviction. Upon these principles he resisted this suggestion, and accordingly we find him ever after exemplifying the same principles. He never needlessly exposed himself to danger in reliance upon miraculous interposition; he cautiously declined hazards, avoided whatever might exasperate his enemies, enjoined silence with regard to his miracles when the publication of them might have excited envy or commotion; he opened his commission in Galilee, not in Jerusalem, courted privacy, avoided the great, conversed with the common people, etc. The third scene presignified the temptation to which he would be subject during the whole course of his ministry, to prostitute all his miraculous endowments to the service of Satan, for the sake of worldly honours, or for gratifying the mistaken apprehensions of the Jewish people. It is pleaded that this explanation obviates all difficulties, justifies the wisdom of God in this dispensation, and confirms our confidence in Christ's divine mission and character, since we thus learn that he was made acquainted with all he had to suffer, and nevertheless persevered, and with final success; and further, that through the various exercises thus afforded to his moral principles he learned 'to succour those that are tempted.' Farmer's inquiry throughout is recommended to the careful perusal of the student. For a comparison of the circumstances of the temptation and of the crucifixion, see *Encyclopædia Metropolitana*, vol. x. p. 604; for the coincidence between the petitions of the Lord's prayer and the temptation, p. 605, note; and for the analogy between the temptation of our Lord in the wilderness and of Adam in Paradise, see Townsend's *Chronological Arrangement*, Lond. 1828, vol. i. p. 92.—J. F. D.

## TEN COMMANDMENTS. [DECALOGUE.]

TENT (אֹהֶל, מִשְׁכָּן, σκηνή; קֶהָל, קֶהָל, κάμινος).

The patriarchal fathers of the Israelites were dwellers in tents, and their descendants proceeded at

once from tents to houses. We therefore read but little of *huts* among them; and never as the fixed habitations of any people with whom they were conversant. By huts we understand small dwellings made of the green or dry branches of trees intertwined, and sometimes plastered with mud. In Scripture they are called *booths*. Such were made by Jacob to shelter his cattle during the first winter of his return from Mesopotamia (Gen. xxxiii. 17). In after times we more frequently read of them as being erected in vineyards and orchards, to shelter the man who guarded the ripened produce (Job xxvii. 18; Is. i. 8; xxiv. 20). It was one of the Mosaical institutions that, during the Feast of Tabernacles, the people should live for a week in huts made of green boughs (Lev. xxiii. 42).

500.

The Scriptures make us more familiar with tents than with huts. They were invented before the Deluge, and appear from the first to have been associated with the pastoral life, to which a movable habitation was necessary (Gen. iv. 20). The practice of the pastoral fathers was to pitch their tents near wells of water, and, if possible, under some shady tree (Gen. xviii. 4; Judg. iv. 5). The first tents were undoubtedly covered with skins, of which there are traces in the Pentateuch (Exod. xxvi. 14); but nearly all the tents mentioned in Scripture were, doubtless, of goats' hair, spun and woven by the women (Exod. xxxv. 26; xxxvi. 14); such as are now, in Western Asia, used by all who dwell in tents; hence their black colour (Sol. Song, i. 5). Tents of linen were, and still are, only used occasionally, for holiday or travelling purposes, by those who do not habitually live in them. The patriarchal tents were probably such as we now see in Arabia, of an oblong shape, and eight or ten feet high in the middle. They vary in size, and have, accordingly, a greater or less number of poles to support them—from three to nine. An encampment is generally arranged circularly, forming an enclosure, within which the cattle are driven at night, and the centre of which is occupied by the tent or tents of the Emir or Sheikh. If he is a person of much consequence, he may have three or four tents, for himself, his wives, his servants, and strangers, respectively. The two first are of the most importance, and we know that Abraham's wife had a separate tent (Gen. xxiv. 67). It is more usual, however, for one very large tent to be divided into two or more apartments by curtains. The Holy Tabernacle was on this model (Exod. xxvi. 31-37).—J. K.

TE'O (תֵּאוֹ) or To (תֵּאוֹ; Sept. θρυξ), Deut.

xiv. 5; Is. li. 20 (*Oryx tao*, the Nubian oryx, Ham. Smith), is either a species or a distinct variety of leucoryx. The male, being nearly four feet high

at the shoulder, is taller than that of the leucoryx; the horns are longer, the body comparatively lighter, and every limb indicative of vigour and elasticity: on the forehead there is a white spot, distinctly marked by the particular direction of the hair turning downwards before the inner angle of the eye to near the mouth, leaving the nose rufous,

501. *Oryx tao*, or Nubian oryx.

and forming a kind of letter A. Under the eye, towards the cheek, there is a darkish spot, not very distinct; the limbs, belly, and tail are white; the body mixed white and red, most reddish about the neck and lower hams. This species resides chiefly in the desert west of the Nile, but is most likely not unknown in Arabia; certain it is, that both are figured on Egyptian monuments, the leucoryx being distinguished by horns less curved, and by some indication of black on the face. The Targums

502. *Antelope defassa* of Wilkinson. *Acronotus defassa*.

identify it with the *Bos sylvestris*, or wild ox; and there is a species of wild bove referable to the antilopidæ, though not an oryx, but most likely belonging to the genus damalis and the acronotine group of Griffith's Cuvier. It is the *Antelope defassa* of Sir J. Wilkinson, which we would place by the side of *Acronotus bubalis*, if it be not the

same, as might be inferred from the figures at Beni Hassan,\* in which the elevated withers are very conspicuous, where it is represented actually caught by the noose or lazzo. This last species would answer completely to the description of wild bull, while there can be no doubt that, in the dialects of some provinces of that country, the oryges of Arabia may still be denominated *reem*, even when bearing both horns; and all are sufficiently vicious, energetic, and capable of mischief, to justify the characters assigned to them in poetical phraseology, agreeably to the amplifying spirit of Aramæan nations.—C. H. S.

TERAH (תֶּרַח, Sept. Θάρρα), son of Nahor and father of Abraham, who, with his family, quitted Ur of the Chaldees to go to the land which God should show him, 'but tarried at Haran in Mesopotamia, and there died at the age of 205 years' (Gen. xi. 24-32; Acts vii. 2-4). From the latter text it appears that the first call which prompted them to leave Ur was addressed to Abraham, not to Terah, as well as the second, which, after the death of his father, induced him to proceed from Haran to Canaan [ABRAHAM]. The order to Abraham to proceed to Canaan immediately after Terah's death seems to indicate that the pause at Haran was on his account. Whether he declined to proceed any further, or his advanced age rendered him unequal to the fatigues of the journey, can only be conjectured. It appears, however, from Josh. xxiv. 2, 14, that Terah was given to idolatry, or rather, perhaps, to certain idolatrous superstitions retained together with the acknowledgment and worship of Jehovah, such as existed in the family in the time of his great-grandson Laban (Gen. xxxi. 30). This may suggest that it was not in the divine wisdom deemed proper that one who had grown old in such practices should enter the land in which his descendants were destined to exemplify a pure faith.—J. K.

TERAPHIM (תְּרָפִים). This word is in the A. V. always rendered either by '*teraphim*,' or by '*images*' with '*teraphim*' in the margin, except in 1 Sam. xv. 23; Zech. x. 2, where it is represented by '*idolatry*,' '*idols*.' The singular of the word does not occur, though in 1 Sam. xix. 13, 16, it appears that only *one* image is referred to. Possibly, as in the case of the Roman Penates (which word also has no singular), these representative images were always two or three in number. Strange to say, in the LXX. they are represented by a *different* rendering in nearly every book where the word occurs; in Gen. xxxi. by εἰδωλα, in Judg. xvii. xviii. by θεράφιν or τὸ θεράφειν, in 1 Sam. xix. by κεντάφια, in Ezek. xxi. 21 by γλυπτὰ, in Hos. iii. 4 by δῆλοι, and in Zech. x. 2 by ἀποσθεγῆσθαι. In the Vulg. we find nearly the same variations between *theraphim*, *statua*, *idola*, *simulacra*, *figure*, *idolorum*, *idololatritia*. In the Tar-

\* Wilkinson's *Anc. Egyptians*, vol. iii. p. 18, cut 327. In cut 328, No. 3 appears to be *A. Bubalis*, and No. 4 *defassa*, distinguished by lunate, cow-like horns, and a black cross on the shoulders and spine. *A. Bubalis* still comes occasionally to the Nile, and all the ruminants of the wilderness are at times liable to migrate from famine caused by drought or locusts.

gums the word is rendered by תַּלְמוּנִי, 'images,' and in Hos. iii. 4 by מְנַבִּי, 'announcers'; Aquila used *μορφώματα* and l. c. *φωτισμούς*; Symmachus *εἰδωλα*.

The references to teraphim in the Bible open so curious a question, and are of such high importance to elucidate the mental growth and history of the Jews, that we must pass them briefly in review; a process by which we are far more likely to arrive at a reasonable conclusion than if we recorded the vagrant guesses and baseless theories of learned commentators, at the least extravagant of which we shall merely glance.

1. Teraphim are first mentioned in Gen. xxxi. 19, where we are told that Rachel stole the teraphim of her father Laban, and successfully concealed them from his search under the *hīran* or coarse carpet which is used to cover the wicker-work pack-saddle of the camel. Aben Ezra says that she stole them in order that her father might not by means of their oracles discover the direction\* of Jacob's flight; Josephus says that she carried off these *τύπους τῶν θεῶν* that they might serve as a material protection to her if overtaken, although she herself disbelieved in them (*καταφρονεῖν μὲν τῆς τοιαύτης τιμῆς τῶν θεῶν διδάξαντος αὐτὴν τοῦ Ἰακώβου*, Joseph. *Antiq.* i. 19. 8); and lastly, some suppose that she was tempted by the precious metals of which they were made. It is far more probable that, like her father, Rachel, whose mind was evidently tainted with superstition (Gen. xxx. 14), regarded the teraphim as tutelary 'gods' (xxx. 30). Laban's eagerness to recover them shows the importance in which they were held, and it is important to observe that, although a believer in Elohim (xxx. 53), he openly paid to these teraphim, which were probably ancestral divinities of his family (xxx. 53), an idolatrous worship. Jurieu (*Hist. des Dogmes et des Cultes*, ii. 3, p. 456), after elaborately entering into the question, thinks that they may have been images of Shem and Noah.

2. It is extremely probable that these household deities were among the 'strange gods' and talismanic earrings which Jacob required his family to give up, and which were buried by him under the boughs of *Allon-Meonenim* 'the sorcerer's oak' (Judg. ix. 37). But an isolated act would naturally be ineffectual to abolish a cult which had probably existed for centuries in the Aramæan home of the Semites, and consequently in the time of the Judges we find the worship of teraphim existing in full vigour. The 17th and 18th chapters of Judges are entirely occupied with the story of Micah, an Ephraimite, who in those wild and ignorant times had fancied that he could honour Jehovah (xvii. 13) by establishing a worship in his own house. To the ephod and teraphim which he already possessed (ver. 5) his mother added a Pesel and Massékâh (possibly 'a graven and a molten image') made out of the gold which she had consecrated to Jehovah, and which he had stolen. When Jonathan, the grandson of Moses,† arrived at the house in his

accidental wanderings, Micah engaged him as a regular priest, and anticipated in consequence the special blessing of Jehovah. The five Danite spies consulted these oracular Penates of Micah through the intervention of Jonathan (xviii. 5), and informed the Danites on their way to Laish of the images which the house contained. The Danite warriors, with the most unscrupulous indifference, violently carried off the whole apparatus of this private cult, including the priest himself, to their new city; and we are informed that it continued to be celebrated till 'the day of the captivity of the land,' which, as we see from the next verse, may *perhaps*\* mean till the capture of Shiloh by the Philistines. What is most remarkable in this narrative is the fact that both Micah, who was a worshipper of Jehovah, and the Danites, who acknowledged Elohim (xviii. 5, 10), and Jonathan, the grandson of Moses himself, should, in spite of the distinctest prohibitions of the law, have regarded the adoration of teraphim and other images as harmless, if not as laudable; and that this form of idolatry, without any political motive to palliate it as in the case of Jeroboam, should have been adopted and maintained without surprise or hesitation, nay even with eager enthusiasm, by an entire tribe of Israel.

3. The next very distinct notice of teraphim which we find is in 1 Sam. xix. 13-16, where Michal, to give David more time to escape, deceives the messengers of Saul by putting 'the teraphim' in his bed 'with a pillow of goat's hair for his bolster.' The use of the article shows that 'the teraphim' was something perfectly well known (Thenius, *ad loc.*), and the fact that we thus find it (or them) in the house of a man so pious as David, entirely confirms our inference as to the prevalence of these images. The suggestions of Michaelis that Michal may have worshipped them unknown to David,† and that barren women were especially devoted to them, are wholly without foundation. We may legitimately infer from the passage that they had some rude resemblance to the human shape, being perhaps something like the *Hermæ*; hence Aquila in this place renders the word by *προτομαί*. The LXX. rendering *κενοτάφια* very probably points to the belief that the teraphim were images of deceased ancestors (*κενοτάφια τῶν ἡσαν ἐλισσόμενα ὡς τύπος νεκροῦ*. Suid. *vid.* Bochart, *Hieroz.* I. lib. ii. c. 51); and the rendering of 'put a pillow of goat's hair for his bolster' by *καὶ ἤπαρ τῶν αὐγῶν ἔθετο πρὸς κεφαλῆς αὐτοῦ*, 'she placed the goat's liver at his head,' shows that they read כֶּבֶר, 'liver,' for כְּבִיר, 'matress.' Now, if this ancient reading were correct, it brings the passage into remarkable parallel with Ezek. xxi. 21, where Nebuchadnezzar is said to have decided his course by *belomantia*, together with *consultation of teraphim and looking into the liver* (extispicium). From a combination of the two passages, Mr. R. S. Poole (Smith's *Dict. of*

the untenable, and we fear dishonest Jewish corruption of 'Moses' into 'Manasseh.'

\* Yet a comparison of Hos. iii. 3 would point the other way; *vid. infra*.

† הַתְּרָפִים. The article explodes the arguments of Michaelis (*De Theraphis. Comment. Soc. Gott.* 1763), Bochart (*Hieroz.* i. p. 623), etc., that the teraphim in this instance was a mere hastily-made doll of rags, in fact a sort of malkin.

\* That Laban adopted this or some other mode of augury is clear from his use of the word *nichashkithi*, 'I have augured,' Gen. xxx. 27. [See LABAN; the author's initials, F. W. F., have been accidentally omitted at the end of that article.]

† It is unfortunate that the A. V. should retain

*Bible*, art. 'Magic') has ingeniously conjectured that Michal may have been divining by means of a sacrifice to the teraphim when Saul's messenger arrived, and that she put the yet palpitating liver on the bed, with the image, which in a small dark narrow recess might well enough pass for a human being. Josephus, with his usual want of honesty, *omits all mention of the teraphim*, and only says that she put the *liver* under the bed-clothes, hoping that its motion would make the men more easily believe that David was\* gasping! (*Antiq.* vi. II. 4).

4. The next passage of importance about the teraphim is Hos. iii. 4, which is encompassed by difficulties. The prophet, purchasing Gomer to himself, bids her be chaste for many days, 'for the children of Israel shall abide many days without a king, and without a sacrifice, and without an image (*matzēbāh*), and without an ephod, and *without teraphim*.' Here it would certainly be the *primā facie* impression of every unbiassed reader that the *matzēbāh* and the teraphim are mentioned *without blame* as ordinary parts of religious worship. Without, however, entering into the question (which perhaps cannot be decided), whether Hosea did, or did not, mean to commend or tolerate these material adjuncts to a monotheistic worship, it is certainly not surprising that the reverence paid to the teraphim should have continued in Israel side by side with that paid to the *calves*, which beyond all doubt were intended to be mere elohistic symbols; and this is the less surprising when we remember that *one* of these cherubic emblems was set up *in the very city* (Dan) *to which the teraphim of Micah had been carried*; and probably indeed because of the existence there of the irregular worship established by Moses' grandson. But here again the LXX. version is curious and perplexing; for it uses the word *δῆλοι* (sc. *λίθοι*, bright gems), a word which, like *δῆλωσις*, it uses elsewhere of the *Urim and Thummim* (Num. xxvii. 21; 1 Sam. xxviii. 6); and Aquila seems to have had the same notion in adopting the word *φωτισμοῦς*, and it is even countenanced by St. Jerome, who in this passage includes the teraphim among the '*instrumenta sacerdotalis habitūs*.' This is one starting-point for the theory, supported with such a mass of splendid but unconvincing learning by Spencer (*De Legg. Hebr.* lib. iii. dissert. vii. pp. 920-1038), that the teraphim and urim were identical. He argues not only from this rendering *δῆλοι*, but also (i.) from the frequent union of *ephod* with teraphim; (ii.) from the supposition that urim means 'fires,' and that teraphim means the same, being a mere Aramaic equivalent for *seraphim*, 'the burning ones;'<sup>†</sup> (iii.) from the constant use of teraphim for oracular purposes. He concludes therefore that they were small images, permitted as a kind of necessary concession to deeply-rooted idolatry, placed in the folds of the ephod, and believed to emit predictions of the divine will. How ill the theory accords with the data before us will be obvious at once.

5. On the other hand, if, in the above passages, we have convincing proof that the use of teraphim was common, if not universal, among the early

Hebrews, there are other passages which show that it was condemned, and that strongly, by the stricter Jehovists. Thus in 1 Sam. xv. 23, we find teraphim classed by Samuel with iniquity and witchcraft; and in 2 Kings xxiii. 24 Josiah puts away the teraphim with wizards, idols, and other abominations; in Ezra xxi. 21, the use of them\* is attributed to the pagan Nebuchadnezzar; and in Zech. x. 2 they are mentioned as sources of deceit. Yet this last passage also proves that so thoroughly were they a part of the national tradition that they continued in use even after the captivity.

The main and certain results of this review are that the teraphim were rude human images; that the use of them was an antique Aramaic custom; that there is reason to suppose them to have been images of deceased ancestors; that they were consulted oracularly; that they were not confined to Jews; that their use continued down to the latest period of Jewish history; and lastly, that although the more enlightened prophets and strictest later kings regarded them as idolatrous, the priests were much less averse to such images, and their cult was not considered in any way repugnant to the pious worship of Elohim, nay even to the worship of him 'under the awful title of Jehovah.'<sup>†</sup> In fact they involved a *monotheistic idolatry very different indeed from polytheism*; and the tolerance of them by priests, as compared with the denunciation of them by the keener insight and more vivid inspiration of the prophets, offers a close analogy to the views of the Roman Catholics respecting pictures and images as compared with the views of Protestants. It was against this use of idolatrous symbols and emblems in a monotheistic worship, that the *second* commandment was directed, whereas the first is aimed against the graver sin of direct polytheism. But the whole history of Israel shows how early and how utterly the law must have fallen into desuetude. The worship of the golden calf, and of the calves at Dan and Bethel, against which, so far as we know, neither Elijah nor Elisha said a single word; the tolerance of high places, teraphim and *bætytia*; the offering of incense for centuries to the brazen serpent destroyed by Hezekiah; the occasional glimpses of the most startling irregularities, sanctioned apparently even in the temple-worship itself; prove most decisively that a pure monotheism, and an independence of symbols, was the result of a slow and painful course of God's disciplinary dealings among the noblest thinkers of a single nation, and not, as is so constantly and erroneously urged, the instinct of the whole Semitic race; in other words, one single branch of the Semites was under God's providence *educated* into pure monotheism only by centuries of misfortune and series of inspired men.

After the time of Zechariah we hear no more of teraphim, but our treatment of the subject would be incomplete if we did not very briefly allude to the vast mass of theory respecting them. Besides Spencer's theory, to which we have already alluded, we may mention four others, utterly valueless indeed, yet curious as bearing on the history of the

\* But in this passage Hävernick thinks that the word is merely used by general analogy for 'idols.'

† As in the case of Aaron, Jonathan, Uria, etc. See some acute remarks on this subject in Michel Nicolas, *Etudes Crit. sur la Bible*, pp. 129-135.

\* τῷ πηδηματι τοῦ ἡπατος σαλευόντος τὸ ἐπιβά-  
λαιον πιστωσάμεν τὸ κατακείμενον τὸν Δαυὶδ ὁ δὲ  
μαλὲν (Joseph. l. c.) Theodoret (*Quæst.* 49, in  
1 Reg.) repeats this preposterous notion.

question. 1. It has been a very general belief derived from Rabbi Eleazar, that a teraph was the head of a first-born infant torn from its shoulders and placed against the wall with a gold plate under it, on which was written the name of an unclean spirit, by means of which the head uttered oracles. This notion has been adopted by Southey in his *Thalaba* (canto ii.) 2. Others believe that *teraphim* were astrological figures made of metal under certain planetary aspects; amulets, in fact, like the *tilsemath* of the Sabæans, and the *telefin* of modern Persians. 3. Michaelis, Lengerke, etc., adopted the vaguer etymological fable that they were Sileni or Satyrs, because Pausanias (vi. 24) says ἐν γὰρ τῇ Ἐβραίων χώρα Σιληίου μῆμα, and this tomb of Silenus may allude to the teraphim buried by Jacob; and because the devils (שְׁעִירִים, 'hairy ones') of Lev. xvii. 7\* must allude to teraphim, which word may be derived from an Arabic root of the same meaning as the verb *trufdaw*, *I live delicately*!

No satisfactory derivation of the word has ever been offered. The one just mentioned, from the Arabic tarapha, 'to abound,' is perhaps as tenable as any, and is adopted by Schultens, Eichhorn, Gesenius, etc. If it be correct, Teraphim would mean 'givers of abundance.' Castelli suggests a Syriac verb 'to inquire'; Hofmann, Spencer, etc., connect it with *Scraphim*; Meier with an Ethiopic root meaning 'relics'; τράγος, θέραπες, turpis, etc., have all been pressed into the service of despairing etymologists.

The literature of the subject is very copious. Among the chief authorities (nearly all of which I have consulted), are Michaelis, *De Theraphis* (ubi supr.); Ugolini, *Thes.* xxiii. 7; Buxtorf, *Lex. Talm.* pp. 2660-2664; Pfeiffer, *Exerc. Bibl.* pp. 1-28; Hottinger, *Hist. Orient.* p. 296; Selden, *De Dis Syr. Syntagm.* i. 2; Spencer, *De Legg. Hebr.* pp. 920-1038; Bochart, *Hieroz.* i. p. 623; Carpzov, *Appar. Crit.* 537-546; Jurieu, *Hist. Crit. des Dogmes*, ii. 3; Gesenius, *Thes.* ii. Besides these nearly every commentator of importance has some dissertation on them; and in general it may be said *quot viri, tot sententiae*. But there is no real ground for this wide diversity of opinion.—F. W. F.

TERTIUS. We learn from Rom. xvi. 22 that the apostle Paul dictated that epistle to Tertius. Tertius was probably a Roman Christian well known to those to whom the epistle was addressed. Some writers say that he was bishop of Iconium (see Fabricii *Lux Evangelii*, p. 117). F. Burmann and Lightfoot conjectured that Tertius and Silas were one and the same person; but this conjecture rests on an exceedingly feeble foundation—namely, the similarity merely of the consonants in the Hebrew numeral שלש, *three*, to the consonants in the name Silas, while Tertius signifies in Latin the *third*. The scantiness of our information about Tertius has been a fruitful source of learned trifling and idle conjecture. See the article Tertius in Winer's *Real-Wört.*—C. H. F. B.

TERTULLUS (Τέρτυλλος), the Roman orator or advocate employed by the Sanhedrim to sustain

their accusation against Paul before the Roman governor (Acts xxiv. 1-8). The Jews, as well as the other peoples subject to the Romans, in their accusations and processes before the Roman magistrates, were obliged to follow the forms of the Roman law, of which they knew little. The different provinces, and particularly the principal cities, consequently abounded with persons who, at the same time advocates and orators, were equally ready to plead in civil actions or to harangue on public affairs. This they did either in Greek or Latin, as the place or occasion required.—J. K.

TESTAMENT, OLD AND NEW. When the books written by the apostles of Jesus Christ, or by apostolic men, came to be placed alongside the sacred books of the Hebrews, as comprising the entire Scriptural canon, it became necessary to distinguish the two divisions by appropriate designations. A usage which already prevailed furnished the designations required. The gracious engagements into which God was pleased to enter with individuals and communities bear in the O. T. the name of בְּרִית or *covenant* [COVENANT], and to this corresponds the Greek διαθήκη in the LXX. and N. T. Of these covenants two stand out from all the rest as of pre-eminent importance—God's covenant with Israel mediated by Moses, and that covenant which He promised to establish through the Messiah. In the Jewish Scriptures this latter is designated בְּרִית הַדְּשָׁה, הַכַּנִּיחַ, הַכַּנִּיחַ, הַכַּנִּיחַ (Jer. xxxi.

31), and this, adopted by our Lord (Matt. xxvi. 28), and familiarly used by the apostles (2 Cor. iii. 6; Heb. ix. 15, etc.), would naturally suggest the application of the phrase ἡ παλαιὰ διαθήκη to the former. Among the Jews such expressions as

לוחות הברית, *plakets της διαθήκης*, for the tablets on which the law was inscribed (Deut. ix. 9); סֵפֶר

הברית, *βιβλιον της διαθήκης* (Exod. xxiv. 7; 2 Kings

xxiii. 21; 1 Maccab. i. 57), *βιβλος διαθήκης* (Ecclus. xxiv. 23), were in common use. From these it is an easy transition to such an expression as that of the apostle (2 Cor. iii. 14), ἡ ἀνάγνωσις τῆς παλαιᾶς διαθήκης, where the name appropriate to the thing contained is used of that which contains it. There thus arose in the Greek church the usage of the phrases ἡ παλαιὰ διαθήκη and ἡ καινὴ διαθήκη as designations of the Jewish and Christian sacred writings respectively. In the Latin church the usage prevailed of calling these *Vetus et Novum Testamentum*. Why the word *Testamentum* was selected to represent διαθήκη rather than *Fœdus* or *Pactum* may be explained by the fact that the former rather than the latter is the proper equivalent of the Greek word. Hence in the old Italia made from the LXX. it is always used where the Greek has διαθήκη; and in the Vulgate it is used similarly in those books that remain in the old version, whereas in those which Jerome translated from the Hebrew בְּרִית is represented by *fœdus* or *pactum*. That this usage was an early one in the Latin church is evident from the words of Tertullian (*Adv. Marc.* iv. 1): Duos Deos dividens (Marcion) alterum alterius Instrumenti vel, quod magis usu est dicere, Testamenti. The use of *Testamentum*, however, does not seem to have been universally accepted till a much later period. In the passage quoted Tertullian evidently gives

\* Creuzer, partially adopting this view, thinks that it may have led to the old almanny that the Jews worshipped the head of an ass (Tac. *Hist.* v. 4; Rutilius, l. 387).

the preference to the word *instrumentum*, a term used technically to denote a writing by which anything is to be attested or proved (comp. Quintil. *Inst. Orat.* xii. 8. 12); and this is the word he generally uses (comp. *Adv. Marc.* iv. 2; *De Pudic.* c. 12, etc.). Rufinus also has 'novum et vetus instrumentum' (*Expos. Symb. Apostol.*); and Augustine uses both *instrumentum* and *testamentum* in the same context (*De Civ. Dei*, xx. 4). Lactantius, however, freely uses *testamentum* as a well-accredited term when he wrote (*Inst. Div.* iv. 20).

From the Vulgate and the usage of the Latin fathers, Luther adopted *Testament* in his translation, and this has continued to be the usage in Germany, though some scholars there prefer the term *Bund*, the proper rendering of בְּרִית and of διαθήκη as used by the sacred writers. In this country *Testament* has so established itself in common usage and the reverent feelings of the community, that all attempts to displace it would be futile and unwise.

The Jews divided the O. T. into three portions—the Torah or Law (comprising the Pentateuch), the Nebiim or Prophets (with the subdivision into Earlier and Later), and the Chethubim or Hagiographa. [CANON.] From an early period the books of the N. T. were divided into two portions, the one embracing the four gospels, the other the remaining books, and called respectively τὰ εὐαγγέλιον or τὰ εὐαγγελικά, and τὰ ἀποστολικά or οἱ ἀπόστολοι (Iren. i. 3. 6; iii. 11. 8; Clem. Alex. *Strom.* v. p. 561; vi. p. 659). Tertullian has 'Instrumentum Evangelicum,—apostolicum' (*Adv. Marc.* iv. 2); and he speaks also of the 'Evangelicæ, apostolicæ literæ' (*De Præscr.* c. 36). It is often stated that the latter division is sometimes called ἀπόστολος by the fathers, but this is more than doubtful; at any rate the two passages usually adduced in proof do not fully bear it out; for in the one (Tertull. *De Bapt.* c. 15) certainly, and in the other (Clem. Alex. *Strom.* vii. p. 706) probably, 'Apostle' means the writer not the writing. In one passage Clement seems to use εὐαγγέλιον as comprehending the Epistles as well as the Gospels (*Strom.* iv. p. 475). The division now generally adopted is into three classes—the *Historical*, including the Gospels and the Acts of the Apostles; the *Epistolary*, and the *Apocalyptic*.

On the *canonicity* of the different books, see CANON; ANTILEGOMENA; APOCRYPHA; INSPIRATION; and the articles on the separate books.

On the *text* of the O. and N. T., see CRITICISM, BIBLICAL; and MANUSCRIPTS.

On the *Interpretation* of the O. and N. T., see INTERPRETATION; COMMENTARY; HARMONIES; and the notices of the different commentators.

The *Versions* of the O. and N. T. will be found under their proper heads.

**TETRARCH** (τετράρχης; *tetrarcha*). This word, as its etymology indicates, originally signified the ruler of the fourth part of a country (τετράρχια or τετραδαρχία). Such were the four ancient divisions of Thessaly (Eurip. *Alcest.* 1154; Phot. *in voc.*; Strabo, ix. 5), revived by Philip (Dem. *Phil.* iii. p. 117; Thirlwall, *Hist. Gr.* vi. 13, 14, ed. 1), each of which had its own governor subordinate to the Tagus. The same division existed in Galatia, where there were as many as twelve tetrarchies, each of the three tribes being

divided into four, each with its own tetrarch (Strab. 566; Plut. *De V. M.* vol. ii. Wytt), ultimately fused into one ἐπαρχία under Deiotarus, c. 54 B.C.

In the later days of the Roman republic, and during the empire, the etymological meaning was almost entirely lost sight of, and it was applied, like 'ethnarch' and 'phylarch,' to the petty tributaries, 'the creatures of a proconsul's breath, and the puppets of his caprice' (Merivale, *Hist. of Rom.* iv. 167), whose importance did not warrant their receiving the title of 'king.' It is in this secondary sense that, in all probability, the word is used in the N. T. of the tetrarchs of Syria, the heirs and successors of Herod the Great. Niebuhr (*Hist. of Rom.* ii. 135) compares them to the zemindars of Bengal, after their recognition by Lord Cornwallis, 1791-93, as proprietors of the soil, and enjoying some amount of sovereign rights within the limits of their zemindary. The title of tetrarch was certainly given by Antony to Herod the Great in the early part of his career, B.C. 41, and his brother Phasael (Joseph. *Antiq.* xiv. 13. 1), without reference to territorial divisions; and though it appears that the tetrarchs Antipas and Philip did actually receive a fourth part of their father's dominions, while Archelaus as 'ethnarch' inherited half (Joseph. *Antiq.* xvii. 11. 4; *Bell. Jud.* ii. 6. 3), this correspondence of the name and the share may be considered accidental. The three rulers to whom τετράρχης or τετραρχῶν is applied in the N. T. are—(1.) Herod Antipas, tetrarch of Galilee and Perea, Matt. xiv. 1; Luke iii. 1, 19; ix. 7; Acts xiii. 1; also styled by courtesy βασιλεύς, Mark vi. 14, etc.; Matt. xiv. 9. (2.) Philip, tetrarch of Trachonitis, Auranitis and Batanea, Luke iii. 1. (3.) Lysanias of Abilene, Luke iii. 1.

For these persons, the limits of their tetrarchies, and the chronological difficulties connected with Lysanias, see Wieseler, *Chron. Synops. of Gospels*, translation 159-167; Hug. *Gutachten*; Noldius, *De Reb. Herod.* [HERODIAN FAMILY; LYSANIAS.]—E. V.

**THADDÆUS** (Θαδδαῖος), a surname of the apostle Jude, who was also called Lebbaeus (Matt. x. 3; Mark iii. 18; comp. Luke vi. 16.) [JUDE.]

**THANK-OFFERING.** [OFFERING.]

**THEATRE.** Although theatres and amphitheatres were erected by the Herods in Jerusalem and other towns of Syria (Joseph. *Antiq.* xv. 8. 1; xvi. 5. 1; xix. 7. 5; *Bell. Jud.* i. 21. 8), in which magnificent spectacles were exhibited, principally in honour of the Roman emperors, there is no reference to them in the Gospels or Acts. Even in narrating the death of Herod Agrippa (Acts xii. 21, 22), whose fatal seizure, according to the Jewish historian, took place in the theatre at Cæsarea (*Antiq.* xix. 8. 2), the word does not occur. The only mention of a theatre in the O. or N. T. is in the account of the outbreak of popular fanaticism at Ephesus (Acts xix. 29-31). The theatre of that city is stated to have been the scene of the infuriated assembly called together by the inflammatory speech of Demetrius, which for two hours rang with the cry, 'Great is Diana of the Ephesians.' The shell of this theatre remains unmistakably to be recognised on Mount Priar, though the marble seats have been removed. Its ruins are described by Fellows (*As. Min.* p. 274) as 'a wreck of immense grandeur,' and it is said to be the

largest of any that have come down to us from ancient days (Howson's *Life and Letters of St. Paul*, ii. 67). Laborde gives a view of it, copied in Smith's *Dictionary*.

The First Epistle to the Corinthians contains two probable references to theatrical representations, neither of which are very apparent in our version. The word translated 'spectacle' (1 Cor. iv. 9) is *θέατρον*, and the whole passage seems to refer to 'the band of gladiators brought out at last for death, the vast range of an amphitheatre under the open sky well representing the magnificent vision of all created beings, from men up to angels, gazing on the dreadful death-struggle; and then the contrast of the selfish Corinthians sitting by unmoved at the awful spectacle' (Stanley, *Corinthians*, 73). Again, in vii. 31, 'the fashion of this world passeth away,' *τὸ σχῆμα τοῦ κόσμου παράγει*, many have seen an allusion to the drama, drawn either from the shifting of the scenes, or the passing across the stage of the gorgeous processions then so common.—E. V.

THEBES, THEBÆ, or DIOSPOLIS MAGNA, a city of Egypt, and its capital during the empire, called in the Bible No-Amon or No (נֹחַ אֲמֹן; LXX. *μερὶς Ἀμμὼν*; Nahum iii. 8, *Ν*; LXX. *Διόσπολις*; Jer. xli. 25; Ezek. xxx. 14, 15, 16).

The ancient Egyptian names of Thebes are as usual two, a civil and a sacred, to which all foreign names may be traced, either as transcriptions, at least in origin, or translations. The civil name, perhaps the more ancient of the two, is AP-T, AP-TU, (Brugsch, *Geographische Inschriften*, i. p. 177, pl. xxxvi. Nos. 781-784). Hence the Coptic *ⲧⲁⲛⲉ*, which shows that the fem. article *t* was in this case transferred in pronunciation, and explains the origin of the classical forms *Θήβη*, *Θήβαι*, Thebe, Thebæ (cf. Wilkinson, *Modern Egypt and Thebes*, ii. pp. 136, 137). The sacred name has two forms, PA-AMEN or perhaps PAR-AMEN (Brugsch, *G. I. p.* 177, No. 780), the 'house of Amen,' or Jupiter Ammon, preserved in the Coptic *ⲡⲁⲗⲉⲟⲩⲛ*, where the word *pa* or *par* has been changed into the masc. article (cf. *ⲑⲃⲁⲕⲓ ⲛⲧⲉ ⲡⲁⲗⲉⲟⲩⲛ*), and translated in the Greek *Διόσπολις*; and NU-AMEN, the 'city of Amen,' the sound of the first part of which has been discovered by M. Chabas, who reads NO-AMUN (*Recherches sur le nom Ég. de Thèbes*, p. 5). The latter form of the sacred name is transcribed in the Hebrew No-Amon, and it is easy to understand the use of its first part *Nu*, 'the city,' instead of the whole, at a time when Thebes was still the most important city of Egypt.

The situation of Thebes with reference to the rest of Egypt well suited it to be the capital of the country. Though further from the Mediterranean and Syria than Memphis, it was more secure from invasion, and if it was far from the northern trade it commanded the chief line of commerce from the Red Sea. The actual site is perhaps the best of any ancient town of Upper Egypt. Here the valley, usually straitened by the mountains on one side if not on both, opens out into a plain which is comparatively spacious. On the west bank the mountains leave a broad band of cultivable land, on the east they recede in a semicircle. On the former side they rise to a fine peak about 1200 feet high,

unlike the level cliff-like form of the opposite range, a form seldom varied on either bank throughout the whole valley. The plain between is about two miles long, and has an extreme breadth of about four miles, no large space for a great capital except in Egypt. The monuments do not arrest the attention of the traveller as he sails up the river as do the pyramids of Memphis. On the east the massive fort-like winged portal of El-Karnak, and the colonnade of El-Uksur, and on the west the hills honeycombed with sepulchral grottoes, are the most remarkable objects to be seen, but being far apart they are singly seen from the river. If viewed from the western mountain, the many monuments of Thebes give an idea of the grandeur of this ancient city, the greatest in the world for magnificence if not for size from the days of the Judges to those of the Kings, and in Homer's age notorious even in remote Greece as the ideal of a wealthy and powerful capital.

The old city, Thebes proper, lay on the eastern bank; opposite was the western suburb, known in the time of the Greek and Roman rule as the Memnonia: the whole in ancient Egyptian was called TAM, the *περὶ Θήβας* of the Greeks. Of the houses of the city there are no traces, but they must have been near the temple of El-Karnak. The western suburb has similarly disappeared, though we know by the monuments where was its principal street.

The oldest royal names found at Thebes are those of kings of the Nantef line, who are known to have been there buried, and who are variously assigned to the 9th and the 11th dynasties, but undoubtedly reigned not long before the 12th. The 12th dynasty began about 2000 or 2100 years B.C., and the 11th, which probably ruled about half a century, was, like it, of Theban kings, according to Manetho, the Egyptian historian. The rise of the city to importance may therefore be dated with the beginning of the first Theban dynasty, about the earliest date to which Abraham's journey into Palestine is assigned by chronologers. With the 12th dynasty it became the capital of Egypt, and continued so for the 200 years of the rule of that line. Of this powerful dynasty the chief monument there is only part of the ancient sanctuary of the great temple of Amen-ra, now called that of El-Karnak. The 12th dynasty was succeeded by the 13th, which appears after a time to have lost the rule of all Egypt by the establishment of a foreign Shepherd dynasty, the 15th. Theban kings of the 13th and probably another dynasty, the 17th, continued to govern a limited kingdom, tributary to the Shepherds, until an insurrection arose which led to the conquest of the foreigners and the capture of their capital Zoan by Aahmes, the head of the 18th dynasty, and founder of the Egyptian empire, which was ruled by this and the 19th and 20th dynasties, all of Theban kings, for about 450 years from B.C. *cir.* 1525. During this period Thebes was the capital of the kingdom, and of an empire of which the northern limit was Mesopotamia, and the southern a territory upon the Upper Nile; and then, especially by the kings of the 18th and 19th dynasties, those great monuments which make Thebes the most wonderful site in Egypt were founded or excavated. The kings who have left the finest works are Thothmes III. and Amenoph III. of the 18th dynasty, Setee I. and Rameses II. of the 19th, and Rameses III. of the 20th; but

throughout the period of the empire the capital was constantly beautified. At the close of the 20th dynasty the high-priests of Amen-ra gained the sovereign power, perhaps corresponding to Manetho's 21st dynasty, which he calls of Tanites, and which must in this case be considered as of Thebans. They continued to add to the monuments of the capital, though, like the later kings of the empire, their constructions were not of remarkable size. The 22d dynasty, headed by Sheshenk I., the Shishak of the Bible, seems still to have treated Thebes as the capital, although they embellished their native city Bubastis, in the Delta. Under them and the kings of the 23d, who were evidently of the same line, some additions were made to its temples, but no great independent structures seem to have been raised. The most interesting of these additions is Shishak's list of the countries, cities, and tribes conquered or ruled by him, including the names of those captured from Rehoboam, sculptured in the great temple of El-Karnak. Under the 23d dynasty a period of dissension began, and lasted for some years until the Ethiopian conquest, and establishment of an Ethiopian dynasty, the 25th, about B.C. 714 (see M. de Rougé's interesting paper *Inscr. Hist. du roi Pianchi-Mériamoun*, Rev. Arch. N.S. viii. pp. 94, *seqq.*) At this time the importance of Thebes must have greatly fallen, but it is probable that the Ethiopians made it their Egyptian capital, for their sculptures found there show that they were careful to add their records to those of the long series of sovereigns who reigned at Thebes. It is at the time of the 25th dynasty, to which we may reasonably assign a duration of fifty years, that Thebes is first mentioned in Scripture, and from this period to that of the capture of Jerusalem by Nebuchadnezzar, it is spoken of as one of the chief cities of Egypt, or as No, 'the city.' Under the Ethiopians it was no more than a provincial capital; immediately after their rule, it was taken twice at least by the Assyrians. Asshur-bani-pal, son and successor of Esarhaddon, Asshur-akh-iddana, who came to the throne about B.C. 667-66, in a first expedition defeated the troops of Tirhakah, and captured the city of Nî'a: a second time he invaded the country, which had revolted, and again captured Nî'a. The exact time of these events has not been fixed, but it is evident that they occurred either at the close of the rule of the Ethiopian dynasty, or early in that of the Saïte 26th, when Egypt was governed by the Dodecarchy. Tirhakah and Nîku, evidently Necho I., the father of Psammetichus I., are mentioned almost as late as the time of the second expedition. Psammetichus I. came to the throne B.C. 664, and therefore it is probable that these events took place not long before, and about the time of, or a little after, his accession. These dates are especially important, as it is probable that the prophet Nahum refers to the first capture when warning Nineveh by the fate of her great rival. But this reference may be to a still earlier capture by the Assyrians, for Esarhaddon conquered Egypt and Ethiopia, though it is not distinctly stated that he captured Thebes (see Sir H. C. Rawlinson's *Illustrations of Egyptian History, etc., from the Cuneiform Inscriptions*, Trans. R. S. Lit., 2d ser. vol. vii. pp. 137, *seqq.*) The Saïte kings of the 26th dynasty continued to embellish Thebes, which does not seem to have suffered in its monuments from the Assyrians; but when their rule came to an end with the

Persian conquest by Cambyses, it evidently endured a far severer blow. Later Egyptian kings still added to its edifices, and the earlier Greek sovereigns followed their example. The revolt against Ptolemy X. Lathurus, in which Thebes stood a siege of three years, was the final blow to its prosperity. In Strabo's time its population dwelt in small villages, and Thebes no longer existed as a city, and this has been the case ever since; no one of these villages, or those that have succeeded them—for the same sites do not appear in all cases to have been occupied—having risen to the importance of a city. At the present time there are two villages on the eastern bank, El-Karnak and El-Uksur; the former, which is inconsiderable, near the oldest part of ancient Thebes; the latter, which is large and the most important place on the site, so as to deserve to be called a small town, lying some distance to the south on the river's bank. Opposite El-Karnak is the ruined village of El-Kurneh, of which the population mainly inhabit sepulchral grottoes, and opposite El-Uksur, the village of El-Ba'eerat, which indeed is almost beyond the circuit of the monuments of Thebes.

As Memphis is remarkable for its vast necropolis, Thebes surpasses the other cities of Egypt in its temples. The primæval kings of Egypt who ruled at the northern capital were tomb-builders, those who preferred the southern capital were rather temple-builders; and as the works of the former give us the best insight into the characteristics of the national mind, those of the latter tell us the history of the country under its most powerful kings. Thebes is the most thoroughly historical site in Egypt. The temples are not only covered with the sculptured representations and histories of the chief campaigns of the conquering kings and the similar records of their presents to the shrines, and many other details of historical interest, but they have the advantage of showing in the case of the most important temple, or rather collection of temples what was added under each dynasty, almost each reign, from the 16th century B.C. to the Roman dominion, and thus they indicate the wealth, the power, and the state of art, during the chief part of the period for which Thebes was either the capital or an important city of Egypt. The following is the plan of an Egyptian temple of the age of the empire:—An avenue of sphinxes, with at intervals pairs of colossal statues of a king, usually seated, led up to its entrance. The gate was flanked by lofty and broad wings, extending along the whole front of the temple, the long horizontal lines of which were relieved by tapering obelisks. The first hall was usually hypæthral, unless perhaps it had a wooden roof, and was surrounded by colonnades. The second, but sometimes the third, was filled with columns in avenues, the central avenue being loftier than the rest, and supporting a raised portion of the roof. Beyond were the naos and various chambers, all smaller than the court or courts and the hall. This plan was not greatly varied in the Theban temples of which the remains are sufficient for us to form an opinion. The great temple of El-Karnak, dedicated to Amen-ra, the chief god of Thebes, was founded at least as early as the time of the 12th dynasty (B.C. 2100 or 2000?), but is mainly of the age of the 18th and 19th. The first winged portal, which is more than 360 ft. wide, forms the front of a court 329

ft. wide and 275 long. Outside the eastern portion of the south wall of this court is sculptured the famous list of the dominions and conquests of Sheshenk I., the Shishak of Scripture, which has been already mentioned. The great hall of columns is immediately beyond the court, and is of the same width, but 170 ft. long: it was supported by 134 columns, the loftiest of which, forming the central avenue, are nearly 70 ft. high, and about 12 in diameter, the rest more than 40 ft. high, and about 9 in diameter. This forest of columns produces a singularly grand effect. The external sculptures commemorate the wars of Setee I. and his son Rameses II., mainly in Syria. Beyond the great hall are many ruined chambers, and two great obelisks standing in their places amidst a heap of ruins. More than a mile to the south-west of the temple of El-Karnak is that of El-Uksur, a smaller but still gigantic edifice of the same character and age, on the bank of the Nile, and having within and partly around it the houses of the modern village. On the western bank are three temples of importance, a small one of Setee I., the beautiful Rameseum of Rameses II., commonly called the Memnonium, and the stately temple of Rameses III., the Rameseum of Medeenet-Haboo, extending in this order towards the south. Between the Rameseum of Rameses II. and that of Rameses III. was a temple raised by Amenoph III., of which scarcely any remains are now standing, except the two great colossi, the Vocal Memnon and its fellow, monoliths about 47 ft. high, exclusive of the pedestals, which have a height of about 12 ft. They represented Amenoph, and were part of the dromos which led to his temple. Besides these temples of western Thebes, the desert tract beneath the mountain bordering the cultivable land and the lower elevations of the mountain, in addition to almost countless mummy-pits, are covered with built tombs, and honeycombed with sepulchral grottoes, which, in their beautiful paintings, tell us the lives of the former occupants, or represent the mystical subjects of the soul's existence after death. The latter are almost exclusively the decorations of the Tombs of the Kings, which are excavated in two remote valleys behind the mountain. These tombs are generally very deep galleries, and are remarkable for the extreme delicacy of their paintings, which, like most of the historical records of Thebes, have suffered more at the hands of civilised barbarians in this century than from the effects of time.

The most remarkable of the notices of Thebes in the Bible is that in Nahum, where the prophet warns Nineveh by her rival's overthrow. 'Art thou better than No-Amon, that was situate among the rivers, [that had] the waters round about it, whose rampart [was] the sea, [and] her wall [was] from the sea?' Notwithstanding her natural as well as political strength, Thebes had been sacked and the people carried captive (iii. 8-10). The description of the city applies remarkably to Thebes, which alone of all the cities of Egypt was built on both sides of the river, here twice called, as now by the modern inhabitants, the sea. The prophecy that it should 'be rent asunder' (Ezek. xxx. 16), probably primarily refers to its breaking-up or capture, but the traveller can scarcely doubt a second and more literal sense when he looks upon its vast torn and heaped-up ruins. The other

notices are in Ezek. (xiv. 15) and in Jer. (xlv. 25). —R. S. P.

THEBEZ (תִּבְעִי; properly *Tebz*, 'brightness,' from תִּבְיָ; Θήβης; Θάμσι; *Thebes*). This city is only mentioned in connection with one episode in Scripture history, the death of the cruel usurper Abimelech. After the terrible *auto-da-fé* at Shechem, in which a thousand persons, men and women, were burned alive, Abimelech went to Thebez. The rumour of his inhuman barbarity had doubtless preceded him. The people, when their city fell, took refuge in a strong tower. Abimelech approached the door to burn it, but a woman from the top threw down a piece of a millstone upon his head and killed him (Judg. ix. 50; 2 Sam. xi. 21). The geographical position of Thebez is not stated; but the narrative leaves the impression that it was not far distant from Shechem. Eusebius defines its position with his usual minuteness. He says, 'It is in the borders of Neapolis, . . . at the thirteenth mile on the road to Scythopolis' (*Onomast.* s. v. 'Thebes'). Just about the distance indicated, on the line of the old Roman highway, is the modern village of *Tubas*, in which it is not difficult to recognise the Thebez of Scripture. It stands on a hill-side at the northern end of a plain surrounded by rocky mountains. The hill is skirted by fine olive groves, and the whole environs bear the marks of industry and prosperity (Robinson, *B. R.* iii. p. 305). Some large hewn stones in the walls of the modern houses, and a number of deep wells and cisterns in and around the village, are the only traces of antiquity now remaining (Van de Velde, *Travels*, ii. p. 335; *Handbook*, p. 348). —J. L. P.

THEODORETUS (Θεοδόρητος) was born at Antioch towards the end of the 4th century; in A.D. 386 according to some, in 393 according to others. His early education was received in a monastery near his native city; and there he remained until he was called, in 420 or 423, to become bishop of Cyrus, a small town near the Euphrates. The teacher to whom he owed the most was Theodore of Mopsuestia. He was much involved in the theological and ecclesiastical controversies of his time; and in 449 was deposed by a synod convened by Dioscurus, patriarch of Alexandria, as a partisan of Nestorius. From this unjust sentence he was relieved by the council of Chalcedon in 451. The rest of his life he spent peacefully in his diocese, occupied chiefly in literary pursuits. He died in 457 or 458. His writings comprise several controversial treatises, a *History of the Church*, in 5 books, an apologetic treatise entitled Ἑλληνικὸν θεραπευτικὴ παρηγοριὰ, various orations and homilies, and some minor tractates, besides his exegetical works, which are the most valuable of his productions. He has left commentaries on the Pentateuch, Joshua, Judges, Ruth, Samuel, Kings, Chronicles, Psalms, Canticles, the Prophets, and on the epistles of St. Paul. His method is partly expository, partly apologetic and controversial. On the historical books of the O. T. he rather discusses difficult passages than presents a continuous commentary. He indulges very sparingly in allegorical explanations, and follows for the most part the grammatical meaning. There are two good editions of his whole works, that by Garnier and Sirmond in 5 vols. fol., Par. 1642-1684; and that

by Schulze and Noesselt, 5 vols. 8vo, in 10 parts, Hal. Sax. 1769-1774.—W. L. A.

THEODORUS (Θεόδωρος), bishop of Mopsuestia, was born at Antioch about the middle of the 4th century. He studied along with Chrysostom under Libanius and Andragathus, the former of whom taught them rhetoric, the latter philosophy. His theological studies were prosecuted under the direction of Flavianus of Antioch, Diodorus of Tarsus, and Craterius. From Antioch he removed to Tarsus, and in A.D. 394 became bishop of Mopsuestia in Cilicia. This post he held till his death in 429. His writings were very numerous. His fame rests principally on those which he wrote on the Scriptures. Unfortunately they are extant only in portions. Fragments are preserved in the Acts of the fifth œcumenical council (A.D. 553), at which his writings were condemned as favouring Nestorianism. His commentaries on Jonah, Obadiah, Nahum, and the introductions to those on Hosea, Amos, Zachariah, and Haggai, have been published by Mai in his *Script. vet. nova Collectio*, i. 2, p. 41, ff. Fragments of his commentaries on the N. T. are found in the *Catena*; but the fullest collection is that by Fritzsche, *Theod. Mops. in N. T. Comment.* Turici 1847. As an interpreter Theodore set himself against the allegorising method, and sought to bring out the literal historical sense. He somewhat inclined to rationalistic modes of interpretation, and held free views about the Canon, making distinctions in the degree of inspiration possessed by different writers, and casting doubt on the authority of some of the books.—W. L. A.

THEOPHILUS (Θεόφιλος), a person of distinction, to whom St. Luke inscribed his Gospel and the Acts of the Apostles (Luke i. 3; Acts i. 1). The word means 'lover of God;' whence some have fancied that it is to be taken as a general name for any or every lover of God (Origen, *Hom. i. in Luc.*; Epiphanius, *Haer.* li. p. 429; Hammond *in loc.*) But there seems no foundation for this opinion, as the circumstance and style of address point to a particular person of honourable station, with whom Luke was acquainted. The title—*κρίνιστος*, translated 'most excellent,' is the same which is given to governors of provinces, as Felix and Festus (Acts xxiii. 26; xxvi. 25); whence he is conceived by some to have been a civil magistrate in some high office. Theophylact (*Argument. in Luc.*) supposes that he was of the senatorian order, and perhaps a nobleman or prince. Many conjectures have been advanced regarding him; but all that can be asserted with any probability is that he was a convert to Christianity and a gentile of rank resident at Rome.

THEOPHYLACTUS (Θεοφύλακτος), archbishop of Bulgaria, flourished in the 11th century. He is believed to have been a native of Eubœa, to have been appointed to the see of Bulgaria between A.D. 1070 and 1077, and to have lived down to 1107 or later. He has left commentaries on the Gospels, the Acts, and the Epistles of Paul, and on the minor prophets; in which he chiefly follows Chrysostom. His exegesis, however, is so direct, precise, and textual, and his remarks are often so felicitous and to the point, that his commentaries have always been highly prized. Many editions of portions of his commentaries have been published;

his collected works have been issued in 4 vols. fol., Venet. 1754-63, edited by J. F. B. de Rossi and Bonif. Finetti.—W. L. A.

THESSALONIANS, EPISTLES TO THE.—FIRST EPISTLE.—The authenticity and canonical authority of this epistle have been from the earliest ages admitted; nor have these points ever been called in question, either in ancient or modern times, by those who have received any of St. Paul's epistles. Besides two probable quotations from it by Polycarp (Lardner, ii. 96, 8vo ed.), it is certainly cited, and cited as the production of the apostle Paul, by Irenæus (v. 6, sec. 1), by Clement of Alexandria (*Pæd.* i. sec. 19, p. 109, ed. Potter), by Tertullian (*De Resur. Carnis*, c. 24), by Caius (ap. Euseb. *Hist. Eccles.* vi. 20), by Origen (*Cont. Cels.* lib. iii.), and by others of the ecclesiastical writers (Lardner, ii. *pl. loc.*)

This epistle has generally been regarded as the first written by St. Paul of those now extant. In the Acts of the Apostles (xvii. 5, *seq.*) we are told that the apostle, after preaching the gospel with success at Thessalonica, had to flee from that city in consequence of the malice of the Jews; that he thence betook himself to Berea, in company with Silas; that, driven by the same influence from Berea, he journeyed to Athens, leaving Silas and Timothy (the latter of whom had probably preceded him to Berea) behind him; and that, after remaining in that city for some time, he went to Corinth, where he was joined by Timothy and Silas. It appears also from this epistle (iii. 1, 2, 5), that whilst at Athens he had commissioned Timothy to visit the infant church at Thessalonica; and from Acts xvii. 15, 16, we learn that he expected to be joined by Timothy and Silas in that city. Whether this expected meeting ever took place there, is a matter involved in much uncertainty. Michaelis, Eichhorn, De Wette, Koppe, Pelt, and others, are of opinion that, at least as respects Timothy, it did take place; and they infer that St. Paul again remanded him to Thessalonica, and that he made a second journey along with Silas to join the apostle at Corinth. Hug, on the other hand, supposes only one journey—viz. from Thessalonica to Corinth; and understands the apostle, in 1 Thess. iii. 1, 2, as intimating, not that he had sent Timothy from Athens to Thessalonica, but that he had prevented his coming to Athens by sending him from Berea to Thessalonica. Between these two opinions there is nothing to enable us to judge with certainty, unless we attach weight to the expression of Luke, that St. Paul had desired the presence of Timothy and Silas in Athens *ὡς τάχιστα*, 'as speedily as possible.' His desiring them to follow him thus, without loss of time, favours the conclusion that they did rejoin him in Athens, and were thence sent to Thessalonica.

But whatever view we adopt on this point, it seems indisputable that this epistle was not written until the apostle met Timothy and Silas at Corinth. The ancient subscription, indeed, testifies that it was written at Athens; but that this could not be the case is clear from the epistle itself. 1. In ch. i. 7, 8, Paul says that the Thessalonians had become 'ensamples to all that believe in Macedonia and Achaia: for from you (says he) sounded out the word of the Lord not only in Macedonia and Achaia, but also in every place your faith to Godward is spread abroad.' Now, for such an exten-

sive diffusion of the fame of the Thessalonian Christians, and of the gospel by them, a much longer period of time must have elapsed than is allowed by the supposition that St. Paul wrote this epistle whilst at Athens; and besides, his reference particularly to Achaia seems prompted by the circumstance of his being, at the time he wrote, in Achaia, of which Corinth was the chief city. 2. His language in ch. iii. 1, 2, favours the opinion that it was not from Athens, but after he had left Athens, that he wrote this epistle; it is hardly the turn which one living at Athens at the time would have given his words. 3. Is it likely that, during the short time St. Paul was in Athens, before writing this epistle (supposing him to have written it there), he should have '*over and again*' purposed to revisit the Thessalonians, but have been hindered? And yet such purposes he had entertained before writing this epistle, as we learn from ch. ii. 18; and this greatly favours the later date. 4. Before the apostle wrote this epistle, Timothy had come to him from Thessalonica with good tidings concerning the faith and charity of the Christians there (iii. 6). But had Timothy followed St. Paul to Athens from Berea, what tidings could he have brought the apostle from Thessalonica, except such hearsay reports as would inform the apostle of nothing he did not already know? From these considerations, it follows that this epistle was not written from Athens. It must, however, have been written very soon after his arrival at Corinth; for, at the time of his writing, Timothy had just arrived from Thessalonica (*ἀπὸ ἐλθόντος Τιμοθέου*, iii. 6), and St. Paul had not been long in Corinth before Timothy and Silas joined him there (Acts xvii. 1-5). Michaelis contends for a later date, but his arguments are destitute of weight. Before the apostle could learn that the fame of the Thessalonian church had spread through Achaia, and far beyond, it was not necessary, as Michaelis supposes, that he should have made several extensive journeys from Corinth; for as that city, from its mercantile importance, was the resort of persons from all parts of the commercial world, the apostle had abundant means of gathering this information even during a brief residence there. As little is it necessary to resort to the supposition that when St. Paul says that over and again Satan had hindered him from fulfilling his intention of visiting Thessalonica, he must refer to shipwrecks or some such misfortunes (as Michaelis suggests); for Satan has many ways of hindering men from such purposes, besides accidents in travelling.

The design of this epistle is to comfort the Thessalonians under trial, and to encourage them to the patient and consistent profession of Christianity. The epistle may be conveniently divided into two parts. The former of these, which comprises the first three chapters, is occupied with statements chiefly of a retrospective character: it details the apostle's experience among the Thessalonians, his confidence in them, his deep regard for them, and his efforts and prayers on their behalf. The latter part of the epistle (iv. v.) is, for the most part, of a hortatory character: it contains the apostle's admonitions to the Thessalonians to walk according to their profession; to avoid sensuality, dishonesty, and pride; to cultivate brotherly love, to attend diligently to the duties of life, to take the comfort which the prospect of Christ's second coming was calculated to convey, but not to allow that to seduce them into indolence or idle speculations; to render

due respect to their spiritual superiors; and, by attention to a number of duties which the apostle specifies, to prove themselves worthy of the good opinion he entertained of them. He concludes the epistle by offering fervent supplication on their behalf, and the usual apostolic benediction.

SECOND EPISTLE.—The apostle's allusion in his former epistle to the second coming of Christ, and especially his statement in ch. iv. 15-18, appear to have been misunderstood by the Thessalonians, or wilfully perverted by some among them, so as to favour the notion that that event was near at hand. This notion some inculcated as a truth specially confirmed to them by the Spirit; others advocated it as part of the apostolic doctrine; and some claimed for it the specific support of St. Paul in a letter (ii. 2). Whether the letter here referred to is the apostle's former epistle to the Thessalonians, or one forged in his name by some keen and unscrupulous advocates of the notion above referred to, is uncertain. The latter opinion has been very generally adopted from the time of Chrysostom downwards, and is certainly somewhat countenanced by the apostle's statement in the close of the epistle as to his autograph salutation being the mark of a genuine letter from him (iii. 17). At the same time, it must be admitted that the probability of such a thing being done by any one at Thessalonica, is, under all the circumstances of the case, not very strong.

On receiving intelligence of the trouble into which the Thessalonians had been plunged, in consequence of the prevalence among them of the notion (from whatever source derived) that the second coming of Christ was nigh at hand, Paul wrote to them this second epistle, in which he beseechingly adjures them, by the very fact that Christ is to come a second time, not to be shaken in mind or troubled, as if that event were near at hand. He informs them that much was to happen before that should take place, and especially predicts a great apostasy from the purity and simplicity of the Christian faith (ii. 5-12). He then exhorts them to hold fast by the traditions they had received, whether by word or epistle, and commends them to the consoling and sustaining grace of God (ver. 15-17). The rest of the epistle consists of expressions of affection to the Thessalonians, and of confidence in them; of prayers on their behalf, and of exhortations and directions suited to the circumstances in which they were placed. As regards the disposition and arrangement of these materials, the epistle naturally divides itself into three parts. In the first (i. 1-12), the apostle mingles commendations of the faith and piety of the Thessalonians with prayers on their behalf. In the second (ii. 1-17), he dilates upon the subject of the trouble which had been occasioned to the Thessalonians by the anticipation of the near approach of the day of the Lord. And in the third (iii. 1-16), he accumulates exhortations, encouragements, and directions, to the Thessalonians, respecting chiefly the peaceable, quiet, and orderly conduct of their lives, which he follows up with a prayer on their behalf to the God of peace. The epistle concludes with a salutation from the apostle's own hand, and the usual benediction (ver. 17, 18).

There is the strongest reason for believing that this second epistle was written very soon after the first, and at the same place—viz. Corinth. The circumstances of the apostle, while writing the one

seem very much the same as they were whilst writing the other; nor do those of the Thessalonians present any greater difference than such as the influences referred to in the second epistle may be supposed in a very short time to have produced. What seems almost to decide the question is, that whilst writing the second epistle, the apostle had Timothy and Silas still with him. Now, after he left Corinth, it was not for a long time that either of these individuals was found again in his company (Acts xviii. 18, compared with xix. 22); and with regard to one of them, Silas, there is no evidence that he and St. Paul were ever together at any subsequent period. At what period, however, of the apostle's abode at Corinth this epistle was written, we are not in circumstances accurately to determine.

'The genuineness of this epistle,' remarks Eichhorn, 'follows from its contents. Its design is to correct the erroneous use which had been made of some things in the first epistle; and who but the writer of that first epistle would have set himself thus to such a task? It however appears that the author of the first must also be the author of the second; and as the former is the production of Paul, we must ascribe the latter also to him. It was essential to the apostle's reputation that the erroneous consequences which had been deduced from his words should be refuted. Had he refrained from noticing the expectation built upon his words, of the speedy return of Christ, his silence would have confirmed the conclusion that this was one of his peculiar doctrines; as such it would have passed to the succeeding generation; and when they perceived that in this Paul had been mistaken, what confidence could they have had in other parts of his teaching? The weight of this, as an evidence of the genuineness of this Second Epistle to the Thessalonians, acquires new strength from the fact, that of all the other expressions in the epistle, not one is opposed to any point either in the history or the doctrine of the apostle' (*Einleit. ins N. T.* iii. 69).

The external evidence in favour of the genuineness of this epistle is equally strong with that which attests the first. Polycarp (*Ep. ad Philip.* sec. 11) appears to allude to ch. iii. 15. Justin Martyr, in his *Dialogue with Trypho* (p. 193, 32, ed. Sylburg. 1593), speaks of the reigning of the man of sin (τὸν τῆς ἀνομίας ἀνθρώπου), which seems to be an evident allusion to ch. ii. 3; and in a passage, quoted by Lardner (vol. ii. p. 125), he uses the phrase ὁ τῆς ἀποστασίας ἄνθρωπος. The eighth verse of this second chapter is formally cited by Irenæus (iii. c. 7, sec. 2) as from the pen of an apostle; Clement of Alexandria specially adduces ch. iii. 2, as the words of Paul (*Strom.* lib. v. p. 554, ed. Sylb.), and Tertullian also quotes this epistle as one of Paul's (*De Resurrec. Carnis*, c. 24).

Notwithstanding these evidences in its favour, the genuineness of this epistle has been called into doubt by some of the German critics. The way here was led by John Ernest Chr. Schmidt, who, in 1801, published in his *Bibliothek für Kritik und Exegese*, a tract entitled *Vermuthungen über die Beiden Briefe an die Thessalonicher*, in which he impugned the genuineness of the first twelve verses of the second chapter. He afterwards, in his *Einleitung*, p. 256, enlarged his objections, and applied them to the whole epistle. De Wette took the same side, and in the earlier editions of

his *Einleitung*, has adduced a number of reasons in support of his opinion, drawn from the epistle itself. His objections are of little weight, and have been most fully replied to by Guericke (*Beiträge zur Hist. Krit. Einl. ins N. T.* s. 92-99, Halle 1828), by Reiche (*Authentie Post. ad Thess. Epist. Vindicie*, Gött. 1829), and by Pelt in the *Prolegomena* to his *Commentary on the Epistles to the Thessalonians* (p. xxvii.) In his later editions, De Wette admits that the objections he adduced are not sufficient, and that the style is Pauline; and in his *Exegel. Handbuch* he defends the genuineness of the epistle against the cavils of Kern in the *Tübinger Zeitschr.* for 1839. Baur has also objected to this epistle on several grounds, but none of them are of importance; see Davidson, *Introd.* ii. p. 455; Bleek, *Einl.* p. 387.

THESSALONICA (Θεσσαλονίκη), now Salonichi, is still a city of about sixty or seventy thousand inhabitants, situated on the present gulf of Salonichi, which was formerly called Sinus Thermaicus, at the mouth of the river Echedorus. It was the residence of a *præses*, the principal city of the second part of Macedonia, and was by later writers even styled *metropolis* (Liv. xlv. 29, *seq.*; Cic. *Pro Planc.* 41). Under the Romans it became great, populous, and wealthy (Strabo, vii. p. 323; Lucian, *Osir.* c. 46; Appian, *Bell. Civ.* iv. 118; Mannert, *Geographie*, vii. 471, *seq.*) It had its name from Thessalonice, wife of Cassander, who built the city on the site of the ancient Therna, after which town the Sinus Thermaicus was called (Strabo, vii. p. 330; Herod. vii. 121; Plin. *Hist. Nat.* iv. 17; *Schol. Thuc.* i. 61; comp. Steph. Byz. s.v. 'Thessalonica'). Thessalonica was 267 Roman miles east of Apollonia and Dyrrachium, 66 miles from Amphipolis, 89 from Philippi, 433 west from Byzantium, and 150 south of Sophia. A great number of Jews were living at Thessalonica in the time of the apostle Paul, and also many Christian converts, most of whom seem to have been either Jews by birth or proselytes before they embraced Christianity by the preaching of Paul. Paul visited Thessalonica on his second missionary tour in company with Silas and Timothy. His preaching in a short time brought many converts. The present town stands on the acclivity of a steep hill, rising at the north-eastern extremity of the bay. It presents an imposing appearance from the sea, with which the interior by no means corresponds. The principal antiquities are the propylæa of the hippodrome, the rotunda, and the triumphal arches of Augustus and Constantine.—C. H. F. B.

THEUDAS (Θευδᾶς, Theodas), the leader of a popular tumult towards the close of the reign of Herod the Great, mentioned by Gamaliel in his temperate and conciliatory speech to the Sanhedrim (Acts v. 36). From the terms in which he is spoken of he appears to have been a religious impostor of high pretensions (λέγων εἶναι τινὰ ἐαυτὸν), to whom a small body of adherents (ἀνδρῶν ἀριθμὸς

ὡς τετρακοσίων) closely attached themselves (προσεκολληθή, rec. προσεκλήθη, A.B.), but who was ultimately slain (ἀνέρεθη), and his party annihilated (ἐγένοντο εἰς οὐδέν). On comparing the scriptural narrative with the civil history of the time, as given by Josephus, a chronological difficulty arises, which has been pressed to the utmost by a school of critics with whom it appears to be a first principle that wherever a discrepancy of statement exists the error must be on the side of the sacred writer, and who, in this instance, do not scruple to charge St. Luke with a gross historical error. The facts are these:—No insurgent of the name of Theudas is mentioned by Josephus at the period to which Gamaliel must refer, but a religious impostor (γόης τις ἀνὴρ) is described by him as having raised a somewhat similar commotion in the reign of Claudius, when Cuspius Fadus was procurator of Judæa—i.e. some ten or twelve years after the delivery of this speech, and therefore more than forty years later than the date fixed by the words of Gamaliel. Josephus's account of the matter (*Antiq.* xx. 5. 1) is, that this fanatic, laying claim to prophetic powers, persuaded a very large body (τὸν πλείστον ὄχλον) to follow him to the Jordan with the assurance that the waters would divide before him as they had done before Elijah and Elisha in the days of old; but being unexpectedly attacked by a squadron of cavalry sent out after him by Fadus, his followers were killed or taken prisoners, and the leader himself being taken was beheaded.

Now, if we are to regard it as certain that there was only one Jewish insurgent named Theudas, it follows that either St. Luke or Josephus must be guilty of a chronological blunder. The hypothesis that Josephus has misplaced Theudas, though not impossible, and maintained by Michaelis (*Einkl. in N. T.* i. 63) and Jahn (*Archæol.* ii. 2), is a way of cutting the knot which no unbiassed critic would desire to resort to. That the error is St. Luke's, though taken for granted by most modern German critics (Eichhorn, De Wette, Credner, Meyer, Baur, etc.), is even more improbable when we take into account the great historical accuracy of his narrative, which closer researches are continually placing in a stronger light, and the date of the publication of the Acts. Few things are less credible than that a careful author like St. Luke, writing within a few years of the event, should have been betrayed into such a glaring historical mistake as antedating the insurrection of Theudas by nearly half a century. That he should have done this by an intentional *prolepsis*, as is supposed by some (Vales. *ad Euscb. H. E.* ii. 11), is as completely at variance with the simplicity and unartistic character of his narrative.

But without resorting to either of these violent methods, the difficulty may be solved with perfect satisfaction by the simple hypothesis of there having been two insurgents of the same name. This, which has commended itself to such critics as Beza, Scaliger, Casaubon, and Bengel, in earlier times, and Olshausen, Winer, and Ebrard, in later days, is ably supported by Lardner (*Credibility*, vol. i. pp. 405-414), who remarks that 'it is not at all strange that there should be two impostors in Judæa of the same name in the compass of forty years, and that they should come to the same end; on the contrary, it is strange that any learned man should find this hard to believe.' The name Theudas was one of no unfrequent occurrence

(Winer, *R. W. B. s. v.*), while the fact that there were as many as three impostors of the name of Simon besides Simon Magus, and as many Judases, mentioned by Josephus in the space of about ten years, increases the probability that there may have been two named Theudas in the space of forty years. Moreover, the period to which Theudas is assigned by Gamaliel, the close of the reign of Herod—the insurrection of Judas the Galilæan, *before* which he appeared, being fixed A.D. 6 or 7—was one fertile in popular commotions (ἔτερα μυρία θορύβων ἐχόμενα τὴν Ἰουδαίαν κατελάμβανε, Joseph. *Antiq.* xvii. 12. 4); the whole of which, with a few exceptions, are passed over by Josephus without particularising their leaders, so that it need create little surprise that one in which so small a number were concerned (Gamaliel's 400 can be hardly made to tally with Josephus's πλείστος ὄχλος) should have been omitted by him, or spoken of in equally general terms. The preceding remarks will prepare us to acquiesce in the verdict of Jost (*Gesch. der Isr.* ii. *Anhang*, p. 76), that 'scholars might well have spared the labour of seeking to identify two men, one of whom preceded the other by half a century.'

Well-meant but not very successful attempts have been made to identify Theudas with one or other of the insurgents named by Josephus: such as that of—(1.) Sonntag (*Stud. u. Krit.* 1837, p. 662), who seeks to prove that he was Herod's slave Simon, who set himself up for a king, and plundered and burnt the royal palaces (Joseph. *Antiq.* xvii. 10. 6; *Bell. Jud.* ii. 4. 2); or (2.) Wieseler (*Chron. Synops. of Gospels*, transl. pp. 90-92), who considers him to have been the same with Matthias the son of Margaloth (Matthias=מתיאס being the Hebrew form of Θεόδοτος=Θεὸδᾶς), who hewed down the Roman eagle over the temple gate; or those of Usher (*Ann.* p. 797) or Zuschlag, who identify him with—(3.) Judas the robber (*Antiq.* xvii. 10. 5); or (4.) Theudion (*Ibid.* 4. 2). Such attempts arise from an unwillingness to acquiesce in the fragmentary character of the annals of the period, and are simply curious as efforts of ingenuity.—E. V.

THIEF, PENITENT, ON THE CROSS (Luke xxiii. 39-43). It has been assumed that this man had been very wicked; that he continued so till he was nailed to the cross; that he joined the other malefactor in insulting the Saviour; and that then, by a miracle of grace, he was transformed into a penitent Christian. But this view of the case seems to involve some misconception of the facts, which it may not be inexpedient to indicate. Whitby says, 'Almost all interpreters that I have read here say that this thief began his repentance on the cross.' With regard to his moral character, he is indeed styled by the Evangelist one of the 'malefactors (κακοῦργοι) who were led with Jesus to be put to death' (ver. 32); but the word is evidently used δοξαστικῶς—i.e. malefactors as they were considered. St. Matthew (xxvii. 44) and St. Mark (xv. 27) call them λῃσταί; but this word denotes not only robbers, etc., but also brigands, rebels, or any who carry on unauthorised hostilities, *insurgents* (Thucyd. iv. 53). Bishop Malby observes, in his sermon on the subject, that 'these κακοῦργοι were not thieves who robbed all for profit, but men who had taken up arms on a principle of resistance to the Roman oppression, and to what they thought an unlawful burden, the

tribute money; who made no scruple to rob all the Romans, and when engaged in these unlawful causes, made less difference between Jews and Romans than they at first meant to do' (*Sermons*, 1819-22, vol. i.) Insurrection was a crime, but it was a crime a person might have committed who had good qualities, and had maintained a respectable character. Again, this man's punishment was crucifixion, which was not in use among the Jews, and inflicted by the Romans not on mere thieves, but rebels. Barabbas had been one of these; and though he 'lay bound with them that had made insurrection with him, who had committed murder in the insurrection,' Mark (xv. 27) has the same word, *ληστής*, 'robber,' which is applied to him by St John (xviii. 40). It is most probable that these 'malefactors' were two of his companions. Our Lord was condemned under the same charge of insurrection (Luke xxiii. 2); and the man whose case we are considering says to his fellow-sufferer, 'Thou art under the same sentence,' *ἐν τῷ αὐτῷ κρίματι*, and admits that they both were guilty of the charge, while our Lord was innocent of it (Luke xxiii. 40, 41). It is impossible then to determine the degree of his criminality, without knowing what provocations he had received under the despotic and arbitrary rule of a Roman governor such as Pilate, how far he had been active, or only mixed up with the sedition, etc. The notion that he was suddenly and instantaneously converted on the cross is grounded entirely upon the general statement of Matthew: 'The thieves also which were crucified with him cast the same in his teeth' (xxvii. 44); whereas St. Luke, in his relation of the incident, is more exact. Instances of St. Matthew's style of speaking, which is called *amplification*, abound in the Gospels, and in all writers. Thus, 'the soldiers brought him vinegar' (Luke xxiii. 36; John xix. 29); 'one of them did so' (Matt. xxvii. 48; Mark xv. 36). 'The disciples had indignation' (Matt. xxvi. 8); 'some of them' (Mark xiv. 4); 'one of them' (John xii. 4). So in Mark xvi. 5, Matt. xxviii. 2, there is mention of one angel only; but in Luke xxiv. 4, John xx. 12, there is mention of two. It is also far from certain that either his faith or repentance was the fruit of this particular season. He must have known something of the Saviour, otherwise he could not have said *οὐδὲν ἄτοπον ἔπραξε*, 'he hath done nothing amiss.' He may have been acquainted with the miracles and preaching of Jesus before he was cast into prison; he may have even conversed with him there. He was convinced of our Lord's Messiahship: 'Lord, remember me when thou comest into thy kingdom.' His crime possibly consisted of only one act of insubordination, and he might have been both a sincere believer, and, with this one exception, a practical follower of Christ. Koecher (ap. Bloomfield, *Recen. Synop.*) tells us that it is a very ancient tradition that the thief was not converted at the cross, but was previously imbued with a knowledge of the gospel. See Kuinoel, Mack-night, etc.—J. F. D.

THIGH, the part of the body from the legs to the trunk, of men, quadrupeds, etc. (Heb. *רֵגל*; Sept. *μηρός*; Vulg. *femur*). It occurs in Gen. xxxii. 25, 31, 32; Judg. iii. 16, 21; Ps. xlv. 3; Cant. iii. 8. *Putting the hand under the thigh* appears to have been a very ancient custom, upon occasion of taking an oath to any one. [OATH.]

Our translation states that 'the hollow of Jacob's thigh' was out of joint by the touch of the angel who wrestled with him' (Gen. xxxii. 25). Some, however, prefer to render *ὑπὸ*, was *sprained*, or *wrenched*, and adduce Jer. vi. 8; Ezek. xxiii. 17, 18. The Sept. renders it *καὶ ἐνάρκησε τὸ πλάτος τοῦ μηροῦ*; the Vulg. *tetigit nervum femoris ejus, et statim emarcuit*. Some such sense better suits ver. 31, where we find Jacob *limping* on his thigh; see Gesenius on *ὑπὸ*. The custom of Jacob's descendants, founded upon this incident, is recorded in ver. 32, which has been thus translated: 'Therefore the children of Yisrael eat not of the nerve Nashé, which is upon the hollow of the thigh, unto this day: because he struck the hollow of Yaacob's thigh, on the nerve Nashé' (Sept. *τὸ νεῖρον*, Vulg. *nervus*). The true derivation of the word *נֶשֶׂה* is considered by Dr. Fürst, in his *Concordance*, to be still a secret; but, along with Gesenius, he understands the nerve itself to be the *ischiatric nerve*, which proceeds from the hip to the ankle. This nerve is still extracted from the hinder limbs by the Jews in England, and in other countries, where properly qualified persons are appointed to remove it (*New Translation*, etc., by the Rev. D. A. De Sola, p. 333). The phrase '*hip and thigh*' occurs in Judg. xv. 8, in the account of Samson's slaughter of the Philistines. Gesenius translates *לֵךְ* in this passage *with*, and understands it as a proverbial expression for 'he smote them all.' The Chaldee paraphrast interprets it, 'He smote both footmen and horsemen, the one resting on their legs (as the word *לֵךְ* should be rendered), the other on their thighs, as they sat on their horses.' Others understand that he smote them both on the legs and thighs. Some give another interpretation. *Smiting on the thigh* denotes penitence (Jer. xxxi. 19), grief, and mourning (Ezek. xxi. 12). A few mistranslations occur. The word 'thigh' should have been translated 'leg' in Is. xlvii. 2, *לֵךְ*, *κνήμης*, *crura*. In Cant. vii. 1, 'the joints of thy thighs,' etc., the true meaning is, 'the *cincture of thy loins* (i.e. the drawers, trousers) is like jewellery.' Lady Wortley Montagu describes this article of female attire as 'composed of thin rose-coloured damask, brocaded with silver flowers' (*Letters*, iii. 12; see Harmer, *On Solomon's Song*, p. 110). Cocceius, Buxtorf, Mercerus, and Junius, all adopt this explanation. In Rev. xix. 16, it is said 'the Word of God (ver. 13) hath on his vesture and on his thigh a name written, King of kings and Lord of lords.' Schleusner thinks the name was not written upon the thigh, but upon the sword. Montfaucon gives an account of several images of warriors having inscriptions on the thighs (*Antiquité Expliquée*, vol. iii. part ii. pp. 268-9; Grupe, iii. 1489; and see Zornii *Opuscula S.S.* ii. 759).—J. F. D.

THISTLE. [CHOACH; DARDAR; TRIBOLOS.]

THOMAS (Θωμάς). The word *תומא* is equivalent to the Greek *Διδυμος*, *twinn*. This name occurs also on Phœnician inscriptions, in a form which reminds us of the colloquial English abbreviation—viz. *תומא* and *תומא* (Gesenii *Monumenta Phœnicia*, p. 356).

The apostle Thomas (Matt. x. 3; Mark iii. 18; Luke vi. 15; Acts i. 13) has been considered a native of Galilee, like most of the other apostles (John xxi. 2); but according to tradition he was a

native of Antiochia, and had a twin-sister called Lysia (*Patres Apost.* ed. Cotel. pp. 272, 501). According to Eusebius (*Hist. Eccles.* i. 13) the real name of Thomas was Judas; and he occurs under this name also in the *Acta Thomæ*. This Judas was deemed the same as Judas the brother of Jesus (Matt. xiii. 55). It would seem even that the surname *Δίδυμος* was understood to mean that Thomas was a twin-brother of Jesus (Philo, *ad Acta Thomæ*, p. 94, *seq.*)

In the character of Thomas was combined great readiness to act upon his convictions, to be faithful to his faith even unto death, so that he even exhorted his fellow-disciples, on his last journey to Jerusalem, 'Let us also go, that we may die with him' (John xi. 16), together with that careful examination of evidence which will be found in all persons who are resolved really to obey the dictates of their faith. Whosoever is minded, like most religionists who complain of the scepticism of Thomas, to follow in the common transactions of life the dictates of vulgar prudence, may easily abstain from putting his hands into the marks of the nails and into the side of the Lord (John xx. 25); but whosoever is ready to die with the Lord will be inclined to avail himself of extraordinary evidence for extraordinary facts, since nobody likes to suffer martyrdom by mistake. These remarks are directed against Winer and others, who find in the character of Thomas what they consider contradictory traits—viz. inconsiderate faith, and a turn for exacting the most rigorous evidence. We find that a resolute and lively faith is always necessarily combined with a sense of its importance, and with a desire to keep its objects unalloyed and free from error and superstition. Christ himself did not blame Thomas for availing himself of all possible evidence, but only pronounced those blessed who would be open to conviction even if some external form of evidence should not be within their reach (comp. Niemeyer's *Akademische Predigten und Reden*, p. 321, *seq.*)

Thomas preached the gospel in Parthia (Origen, apud Euseb. *Hist. Eccles.* iii. 1; Socrat. i. 19; Clement, *Recogn.* ix. 29), and, according to Jerome, in Persia; and was buried at Edessa (Rufin. *Hist. Eccles.* ii. 5). According to a later tradition Thomas went to India, and suffered martyrdom there (Gregor. Naz. *Orat.* xxv. *ad Arian.* p. 438, ed. Par.; Ambrose, in *Ps.* xlv. 10; Hieron. *Ep.* 148 (59) *ad Marcell.*; Niceph. *Hist. Eccles.* ii. 40; *Acta Thomæ*, c. i. *seq.*; Abdia *Hist. Apost.* c. ix.; Paulin. A. S. Bartholomæo, *India Orient. Christiana*, Rom. 1794). This tradition has been attacked by Von Bohlen (*Indien*, i. 375, *seq.*) The ancient congregations of Christians in India who belong to the Syrian church, are called Thomas-Christians, and consider the apostle Thomas to be their founder (Fabricii *Lux Evangelii*, p. 626, *seq.*; Assemani, *Biblioth. Orient.* iii. 2, 435, *seq.*; Ritter's *Erdkunde*, v. i. 601, *seq.*) Against this tradition Thilo wrote in his edition of the *Acta Thomæ*, p. 107, *seq.* (comp. Augusti, *Denkwürdigkeiten*, iii. 219, *seq.*)

The fathers frequently quote an *Evangelium secundum Thomam*, and *Acta Thomæ*, the fragments of which have been carefully edited by J. C. Thilo, in his *Codex Apocryphus Novi Testamenti*, i. 275; and the *Acta Thomæ* separately, L. 1823; and see Winer's *Real-Wörterbuch*, under 'Thomas.'—C. H. F. B.

THORNS. [AKANTHA; ATAD; BARQANIM; KOTS; NAAZUZ; SALLON; SIRAH; SHAIT; SHAMIR; SIKKIM; SIRIM; SIRPAD; ZINNIM.] Other of the plants mentioned in the Bible were probably thorny. Rabbinical writers enumerate not fewer than twenty-five words, which they say denote prickly shrubs or trees; but many of these are probably so called because unknown. One not noticed in its proper place may find a place here.

CHEDEK (חֶדֶק) occurs twice in Scripture; in Prov. xv. 19: 'The way of the slothful is as a hedge of thorns' (*chedek*); and in Micah vii. 4: 'The best of them is as a brier' (*chedek*), and the most upright like a thorn-hedge.' *Chedek* is generally supposed to be as little known as the other thorny and prickly plants, but there is an Arabic word, حِذَق *chadaq* or *hudag*, which is

applied in the East to a species of *solanum*. This is supposed by Rosenmüller and others not to be suitable to the above passages; but some species of *solanum* grow to a considerable size; others are among the most prickly plants of the East, and very common in dry arid situations. *S. sanctum*, the *S. spinosum* of others, is found in Palestine. Dr. Harris is of opinion that *chedek* is the *colutea spinosa* of Forskal, which is called *heddad* in Arabic, and of which there is an engraving in Russell's *Nat. Hist. of Aleppo*, tab. 5.—J. F. R.

THREE. [NUMBER.]

THREE TAVERNS. [TAVERNS, THREE.]

THRESHING. [AGRICULTURE.]

THRONE. The Hebrew word כִּסֵּא or כִּסֵּה is generally thought to have for its root-meaning the idea of covering; hence it denotes a covered seat or throne. Fürst takes it as for כִּסְרָא, from כִּסַּר, and holds it to convey the notion of an arched or curved body, and so to have come to signify a seat of dignity, having the elegance given to it which curved lines can easily impart. Whatever the original import of the term may have been, כִּסֵּא, or rather כִּסְלִי, denoted the ornamented seat on which royal personages gave audience on state occasions among the Hebrews (I Kings ii. 19; xxii. 10; comp. Esth. v. 1). It was originally a decorated arm-chair, higher than an ordinary seat, so as to require a foot-stool (הֶדְרִים) to support the feet. Sometimes the throne was placed on a platform ascended by steps (Is. vi. 1). Solomon made a throne of ivory overlaid with gold, which had six steps, with six lions on each side (1 Kings x. 18). Archelaus addressed the multitude from 'an elevated seat and a throne of gold' (Joseph. *De Bell. Jud.* ii. 1. 1). A throne became the emblem of regal power (Gen. xli. 40); whence the phrases, 'to sit on the throne of his kingdom' (Deut. xvii. 18), that is, to rule as a monarch; and 'to sit on the throne of a person' (1 Kings i. 13; 2 Kings x. 30), which signifies, to be his successor.—J. R. B.

THUKIYIM (תֻּכִּיִּים and תֻּכִּיִּים). It is a question, perhaps, more of geographical and historical than of Biblical interest to decide whether *thukiyim* (1 Kings x. 22; 2 Chron. ix. 21) denote peacocks strictly so called, or some other species of animal or bird; for on the solution of the question in the affirmative depends the real direction of

Solomon's fleet; that is, whether, after passing the straits of Bab-el-Mandeb, it proceeded along the east coast of Africa towards Sofala, or whether it turned eastward, ranging along the Arabian and Persian shores to the Peninsula of India, and perhaps went onwards to Ceylon, and penetrated to the great Australian, or even to the Spice Islands. Bochart, unable to discover a Hebrew root in תִּכְיִים, rather arbitrarily proposes a transposition of letters, by which he converts the word into *Cuthiyim*, denoting, as he supposes, the country of the *Cuthei*, which, in an extended sense, is applied, in conformity with various writers of antiquity, to Media and Persia; and Greek authorities are cited to show that peacocks abounded in Babylonia, etc. This mode of proceeding to determine the species and the native country of the bird is altogether inadmissible, since Greek writers speak of Persian peacocks at a much later period than the age of Solomon; and it is well known that they were successively carried westward till they passed from the Greek islands into Europe, and that, as Juno's birds, the Romans gradually spread them to Gaul and Spain, where, however, they were not common until after the 10th century. But even if peacocks had been numerous in Media and northern Persia at the time in question, how were they to be furnished to a fleet which was navigating the Indian Ocean, many degrees to the south of the colder region of High Asia? and as for the land of the *Cuthei*, or of *Cush*, when it serves their purpose, writers remove it to Africa along with the migrations of the Cushites. The *Thukiyim* have been presumed to derive their appellation from an exotic word implying 'tufted' or 'crested,' which, though true of the peacock, is not so obvious a character as that afforded by its splendid tail; and therefore a crested parrot has been supposed to be meant. Parrots, though many species are indigenous in Africa, do not appear on the monuments of Egypt; they were unknown till the time of Alexander, and then both Greeks and Romans were acquainted only with species from Ceylon, destitute of crests, such as *Psittacus Alexandri*; and the Romans for a long time received these only by way of Alexandria, though in the time of Pliny others became known. Again, the pheasant has been proposed as the bird intended; but *Phas. Colchicus*, the only species known in antiquity, is likewise without a prominent crest, and is a bird of the colder regions of the central range of Asiatic mountains. Following a line of latitude, it gradually reached westward to High Armenia and Colchis, whence it was first brought to Europe by Greek merchants, who frequented the early emporium on the Phasis. The centre of existence of the genus, rich in splendid species, is in the woody region beneath the snowy peaks of the Himalayas, reaching also eastward to northern China, where the common pheasant is abundant; but not, we believe, anywhere naturally in a low latitude. Thus it appears that pheasants were not the birds intended by the Hebrew *Thukiyim*, although all versions and comments agree that after the apes (probably *Cercopithecus Entellus*, one of the sacred species of India) some kind of remarkable bird is meant; and none are more obviously entitled to the application of the name than the peacock, since it is abundant in the jungles of India, and would be met with, both wild and domesticated, by naviga-

tors to the coasts from Camboge to Ceylon, and would better than any of the others bear a long sea voyage in the crowded ships of antiquity. Moreover, we find it still denominated *Togei* in the Malabaric dialects of the country, which may be the source of *Thuki*, as well as of the Arabic *Turvas*, and Armenian *Taus*. With regard to the objection, that the long ocellated feathers of the rump, and not those of the tail, as is commonly believed, are the most conspicuous object offered by this bird, it may be answered, that if the name *Togei* be the original, it may not refer to a tuft, or may express both the erectile feathers on the head of a bird and those about the rump or the tail; and that those of the peacock have at all times been sought to form artificial crests for human ornaments. One other point remains to be considered; namely, whether the fleet went to the East, or proceeded southward along the African shore? No doubt, had the Phœnician trade guided the Hebrews in the last-mentioned direction, gold and apes might have been obtained on the east coast of Africa, and even some kinds of spices in the ports of Abyssinia; for all that region, as far as the Strait of Madagascar, was at that early period in a state of comparative affluence and civilisation. But in that case a great part of the commercial produce would have been obtained within the borders of the Red Sea, and beyond the Straits; the distance to be traversed, therefore, being but partially affected by the monsoons, never could have required a period of three years for its accomplishment; and a prolonged voyage round the Cape to the Guinea and Gold Coast is an assumption so wild, that it does not merit serious consideration; but intending to proceed to India, the fleet had to reach the Straits of Bab-el-Mandeb in time to take advantage of the western monsoon; be in port, perhaps, at or near Bombay, before the change; and after the storms accompanying the change, it had to proceed during the eastern monsoon under the lee of the land to Coodramalli, or the port of Palesimundus in Taprobana, on the east coast of Ceylon; thence to the Coromandel shore, perhaps to the site of the present ruins of Mahabalipuram; while the return voyage would again occupy one year and a half. The ports of India and Ceylon could furnish gold, precious stones, eastern spices, and even Chinese wares; for the last fact is fully established by discoveries in very ancient Egyptian tombs. Silks, which are first mentioned in Proverbs xxxi. 22, could not have come from Africa, and many articles of advanced and refined social life, not the produce of Egypt, could alone have been derived from India [OPHIR].

Though in this short abstract of the arguments respecting the direction of Solomon's fleet there may be errors, none, we believe, are of sufficient weight to impugn the general conclusion, which supports the usual rendering of *Thukiyim* by 'peacocks,' although the increase of species in the west does not appear to have been remarkable till some ages after the reign of the great Hebrew monarch, when the bird was dedicated to Juno, and reared at first in her temple at Samos. There are only two species of true peacocks—viz. that under consideration, which is the *Pavo cristatus* of Linn.; and another, *Pavo Muticus*, more recently discovered, which differs in some particulars, and originally belongs to Japan and China. Peacocks bear the cold of the Himalayas: they run with

great swiftness, and where they are serpents do not abound, as they devour the young with great avidity, and, it is said, attack with spirit even the *Cobra di Capello* when grown to considerable size, arresting its progress and confusing it by the rapidity and variety of their evolutions around it, till exhausted with fatigue it is struck on the head and dispatched.

A detailed description of a species so well known we deem superfluous.—C. H. S.

#### THUMMIM. [URIM AND THUMMIM.]

THUNDER (רעם); Sept. *Βροντή*, passim; also *קול, φωνή*. This sublimest of all the extraordinary phenomena of nature is poetically represented as the voice of God (Ps. civ. 7; comp. Exod. ix. 28 (Hebrew, or margin); Job xxxvii. 4, 5; xl. 9; Ps. xviii. 13; and especially Ps. xxix., which contains a magnificent description of a thunder-storm). Thunder is also introduced into the poetical allusion to the passage of the Red Sea in Ps. lxxvii. 18. The plague of hail on the land of Egypt is very naturally represented as accompanied with 'mighty thunderings,' which would be literally incidental to the immense agency of the electric fluid on that occasion (Exod. ix. 22-29, 33, 34). It accompanied the lightnings at the giving of the law (xix. 16; xx. 18). See also Ps. lxxxi. 7, which probably refers to the same occasion: 'I answered thee in the secret place of thunder,' literally, 'in the covering of thunder,' *בסתר רעם*—i.e. the thunder-clouds. It was also one of the grandeurs attending the divine interposition described in 2 Sam. xxii. 14; comp. Ps. xviii. 13. The enemies of Jehovah are threatened with destruction by thunder; perhaps, however, lightning is included in the mention of the more impressive phenomenon (1 Sam. ii. 10). Such means are represented as used in the destruction of Sennacherib's army (Is. xxix. 5-7; comp. xxx. 30-33). Bishop Lowth would understand the description as metaphorical, and intended, under a variety of expressive and sublime images, to illustrate the greatness, the suddenness, the horror of the event, rather than the manner by which it was effected (New Translation, and notes *in loc.*) Violent thunder was employed by Jehovah as a means of intimidating the Philistines, in their attack upon the Israelites, while Samuel was offering the burnt-offering (1 Sam. vii. 10; Ecclus. xli. 17). Thunder was miraculously sent at the request of Samuel (1 Sam. xii. 17, 18). It is referred to as a natural phenomenon subject to laws originally appointed by the Creator (Job xxviii. 26; xxxviii. 25; Ecclus. xliii. 17); and introduced in *visions* (Rev. iv. 5, vi. 1, viii. 5, xi. 19, xiv. 2, xvi. 18, xix. 6; Esther (Apoc.) xi. 5). In Rev. x. 3, 4, 'seven thunders.' It is adopted as a *comparison*. Thus 'as lightning is seen before the thunder is heard, so modesty in a person before he speaks recommends him to the favour of the auditors' (Ecclus. xxxii. 10; Rev. xix. 6, etc.). The sudden ruin of the unjust man is compared to the transitory noise of thunder (Ecclus. xl. 13); but see Amald, *in loc.* One of the sublimest metaphors in the Scriptures occurs in Job xxvi. 14: 'Lo, these are parts of his ways; but how little a portion is heard of him (שׁמַיִם, a mere whisper); but the thunder of his power who can understand?' Here the whisper and the thunder are admirably opposed to each other. If the

former be so wonderful and overwhelming, how immeasurably more so the latter? In the sublime description of the war-horse (Job xxxix.) he is said to perceive the battle afar off 'by the thunder of the captains, and the shouting' (ver. 25). That part of the description, however (ver. 19), 'hast thou clothed his neck with thunder?' appears to be a mistranslation. The word רעמה from רעם, 'to be agitated,' 'tremble,' refers rather to the mane: 'Canst thou clothe his neck with the trembling mane?' To the class of mistranslations must be referred every instance of the word 'thunderbolts' in our version, a word which corresponds to no reality in nature. Thus 'hot thunderbolts' (Ps. lxxviii. 48, רעמים) means 'lightnings,' *τῶ πυρὶ, igni*. 'Then shall the right-aiming thunderbolts go abroad' (Wisd. v. 21), *βολίδες ἀστραπῶν*, 'flashes' or 'strokes of lightning.' 'Threw stones like thunderbolts' (2 Maccab. i. 16), *συνεκεραύνωσαν*. The word conveys an allusion to the mode in which lightning strikes the earth. Thunders enter into the appellative or surname given by our Lord to James and John—Boanerges; *ὁ ἔστω, υἱὸς βροντῆς*, says St. Mark, 'sons of thunder' (iii. 17). The word קול, simply 'voice,' is often used for thunder, as in Exod. ix. 23; Ps. xxix. 3; lxxvii. 18; Jer. x. 13. In the last of these passages the production of rain by lightning is referred to: 'When he uttereth his voice, there is a multitude of waters in the heavens, he maketh lightnings with (or for) rain.' It is related (John xii. 28) that Jesus said, 'Father, glorify thy name. Then came there a voice from heaven, saying, I have both glorified it, and will glorify it again.' Some of the people that stood by, but had not heard the words distinctly, said it had 'thundered,' for the voice came from heaven; others who had caught the words, supposed that God had spoken to Jesus by an angel, conformably to the Jewish opinion that God had never spoken but by the ministry of angels. Perhaps, however, thunder attended the voice, either a little before or after; comp. Exod. xix. 16, 19; Rev. iv. 5, vi. 1 [BATH KOL].—J. F. D.

THYATIRA (Θυάτεια, *rd*), a city on the northern border of Lydia, about twenty-seven miles from Sardis, the seat of one of the seven Apocalyptic churches (Rev. i. 11; ii. 18). Its modern name is Ak-hissar, or *the white castle*. According to Pliny, it was known in earlier times by the names Pelopia and Euhippa (*Hist. Nat.* v. 29). Strabo asserts that it was a Macedonian colony (xiii. p. 928). The Roman road from Pergamus to Sardis passed through it. It was noted for the art of dyeing, as appears from Acts xvi. 14. Luke's account has been confirmed by the discovery of an inscription in honour of Antonius Claudius Alphenus by the corporation of dyers, which concludes with the words *οἱ βαφείς*. It still maintains its reputation for this manufacture, and large quantities of scarlet cloth are sent weekly to Smyrna. The town consists of about two thousand houses, for which taxes are paid to the government, besides two or three hundred small huts; of the former 300 are inhabited by Greeks, 30 by Armenians, and the rest by Turks. The common language of all classes is the Turkish; but in writing it, the Greeks use the Greek, and the Armenians the Armenian characters. There are nine mosques and one Greek church.—J. E. R.

THYINE WOOD (ξύλον θυώνον) is mentioned as one of the articles of merchandise which would cease to be purchased in consequence of the fall of Babylon (Rev. xviii. 12). This wood was in considerable demand by the Romans, being much employed by them in the ornamental wood-work of their villas, and also for tables, bowls, and vessels of different kinds. It is noticed by most ancient authors, from the time of Theophrastus. It was the *citrus* or citron-wood of the Romans (Cels. *Hierobot.* vol. ii. p. 25). It was produced only in Africa, in the neighbourhood of Mount Atlas, and in Granada (Plin. *Hist. Nat.* xiii. 15).

503. *Callitris quadrivalvis*.

This cedar or citron-wood was most likely produced by *Callitris quadrivalvis*, the *Thuja articulata* of Linnæus, which is a native of Mount Atlas, and of other uncultivated hills on the coast of Africa. In the kingdom of Morocco, according to Broussouel, this tree produces the Sandarach resin of commerce. Capt. S. E. Cook, in his *Sketches in Spain* (vol. ii.), brought to light the fact that the wood-work of the roof of the celebrated mosque, now the cathedral of Cordova, built in the 9th century, is of this wood; it had previously been thought to be that of the larch, from the resemblance of the Spanish word *alerce*, which is applied to the wood of *Callitris quadrivalvis* in Spain and Barbary, to the Latin word *larix* (Loudon's *Arboret.* iv. 2463). This, no doubt, was also the citron or thyme-wood of the ancients, and therefore that of the above-cited passage of the Revelation. —J. F. R.

TIBERIAS (Τιβεριδς; Talm. טבריא) is a small town situated about the middle of the western bank of the lake of Gennesareth. Tiberias was chiefly built by the tetrarch Herod Antipas, and called by him after the emperor Tiberias (Joseph. *Antiq.* xviii. 2. 3). According to Josephus (*Vit.* sec. 65), Tiberias was 30 stadia from Hippo, 60 from Gadara, and 120 from Scythopolis; according to the Tal-

mud it was 13 Roman miles from Sepphoris; and Joliffe, in his *Travels*, states that it is nearly 20 English miles from Nazareth, and 90 miles from Jerusalem. Others find it above two days' journey from Ptolemais.

From the time of Herod Antipas to the commencement of the reign of Herod Agrippa II., Tiberias was the principal city of the province (see Joseph. *Vit.* sec. 9). Justus, son of Pistus, when addressing the inhabitants of Tiberias, stated that 'the city Tiberias had ever been a city of Galilee; and that in the days of Herod the tetrarch, who had built it, it had obtained the principal place; and that he had ordered that the city Sepphoris should be subordinate to the city Tiberias; that they had not lost this pre-eminence even under Agrippa, the father, but had retained it until Felix was procurator of Judæa; but he told them that now they had been so unfortunate as to be made a present of by Nero to Agrippa; and that upon Sepphoris's submission of itself to the Romans, that city was become the capital of Galilee, and that the royal treasury and the archives were now removed from them.' Tiberias was one of the four cities which Nero added to the kingdom of Agrippa (Joseph. *Antiq.* xx. 8. 4). Sepphoris and Tiberias were the largest cities of Galilee (Joseph. *Vit.* sec. 65). In the last Jewish war the fortifications of Tiberias were an important military station (*De Bell. Jud.* ii. 20. 6; iii. 10. 1; *Vit.* sec. 8, seq.)

According to Josephus (*Vit.* sec. 12), the inhabitants of Tiberias derived their maintenance chiefly from the navigation of the lake of Gennesareth, and from its fisheries. After the destruction of Jerusalem Tiberias was celebrated during several centuries for its famous Rabbinical academy (see Lightfoot's *Horæ Heb.* p. 140, seq.)

Not far from Tiberias, in the immediate neighbourhood of the town of Emmaus, were warm mineral springs, whose celebrated baths are sometimes spoken of as belonging to Tiberias itself (Joseph. *De Bell. Jud.* ii. 21. 6; *Antiq.* xviii. 2. 3; *Vit.* sec. 16; Mishna, *Sabb.* iii. 4; and other Talmudical passages in Lightfoot's *Horæ Heb.* p. 133, seq. Compare also Wichmannshausen, 'De Thermis Tiberiensibus,' in Ugolini *Thesaur.* tom. vii.) These springs contain sulphur, salt, and iron, and were employed for medicinal purposes. Compare the *Travels* of Volney and Scholz.

There is a tradition that Tiberias was built on the site of the town כנרת *Kinnereth* (*Onomasticon*, sub voce 'Chennereth'). Against this tradition it has been urged that, according to Joshua xix. 35, Chinnereth belonged to the tribe of Naphthali. Compare Reland (*Palæstina*, p. 161). It has also been said that this tradition is contradicted by the following statement of Josephus (*Antiq.* xviii. 2. 3):—'Herod the tetrarch, who was in great favour with Tiberius, built a city of the same name with him, and called it Tiberias. He built it in the best part of Galilee, at the lake of Gennesareth. There are warm baths at a little distance from it, in a village named Emmaus.'

Others have identified Tiberias with Chamath; but it also belonged to the tribe of Naphthali, and the graves mentioned by Josephus militate against it as much as against Chinnereth. According to the Rabbins, Tiberias was situated on the site of Rakath (*Ilievros. Megil.* fol. 701). Comp. Otho. *Lex. Rabb.* p. 755; but it too was in the territory of Naphthali, and if the graves mentioned by Jose-

phus are any objection they must militate against this assumption likewise (Lightfoot, *Chorog. Cent.* cap. 72-74).

According to Joliffe (*Travels*, pp. 48, 49, *seq.*), the modern *Tibbarich* has about four thousand inhabitants, a considerable part of whom are Jews. The hot springs are about thirty-five minutes from Tabaria, and about twenty paces from the lake. Comp. the *Travels* of Mariti, Hasselquist, Buckingham, Burckhardt, and Richter. The site of the

present town does not fill the area of the ancient Tiberias, of which there are still some insignificant vestiges. *Tibbarich* suffered greatly by an earthquake on New Year's Day, 1837. Almost every building, with the exception of the walls and some part of the castle, was levelled to the ground. The inhabitants were obliged to live for some time in wooden booths (Schubert, in *d. Münchn. Gelehrte. Anzeig.* 1837, No. 191, p. 505; Winer's *Real-Wörterb.*)—C. H. F. B.

504. Tiberias.

#### TIBERIAS, SEA OF. [SEA.]

TIBERIUS (*Tιβέριος*), the third emperor of Rome. He is mentioned by name only by St. Luke, who fixes in the 15th year of his reign the commencement of the ministry of John the Baptist, and of Christ (Luke iii. 1). The other passages in which he is mentioned under the title of Cæsar, offer no points of personal allusion, and refer to

him simply as the emperor (Matt. xxii. 17, *seq.*; Mark xii. 14, *seq.*; Luke xx. 22, *seq.*; xxiii. 2, *seq.*; John xix. 12, *seq.*)—J. K.

TIBNI (*תִּבְנִי*; Sept. *Θαυνί*), one of those factious men who took a prominent part in the troubles which followed the violent death of Elah. He disputed the throne of Israel with Omri, and the civil war which was thus kindled between the two

factions lasted about three years with varying success, till the death of Tibni left his adversary master of the crown, B.C. 929 (1 Kings xvi. 21-23).—J. K.

**TIDAL** (תִּדְעָל; Sept. *Θαργῶλ*), one of the allies who with Chedorlaomer invaded Palestine in the time of Abraham (Gen. xiv. 1). Tidal bears the somewhat singular title of 'king of nations' or 'Gentiles' (גוֹיִם, *goyim*). Some make it almost a proper name here, as in Josh. xii. 23, where we read of a 'king of the Gentiles (*goyim*) of Gilgal.' Le Clerc and others take it for Galilee, because in Is. viii. 23 we meet with 'Galilee of the nations.' But there were reasons for its having then acquired that name, which did not exist in the time of Abraham, when all Palestine and the neighbouring countries were as much Gentile as Galilee. In fact, we cannot tell who these Goyim were over whom Tidal ruled; but it seems probable that he was a chief of several confederated tribes, whose military force he contributed to the expedition of Chedorlaomer.—J. K.

**TIDHAR** (תִּדְחָר) is twice mentioned in Scripture (Is. xli. 19, and lx. 13), in both of which places it is enumerated along with the *BEROSHI* and *T'ASHSHUR*, or cypress and box-tree, and is translated *pine-tree* in the A. V. But it has been variously interpreted, and even by the same translator in the two passages. Thus it is rendered *elm* in one passage, and *box* or *pine* in the other. In the Chaldee paraphrase, the word *murneyan*, commonly thought to mean the elm, is used as the synonym of *tidhar*. But no similar name having been discovered in any of the cognate languages, no proofs can be adduced in favour of one more than another. The name *tidhara*, meaning 'three-cornered,' is applied in India to a species of Euphorbia (*E. antiquorum*); but this is not likely to be the plant alluded to in Scripture. Gesenius is of opinion that *tidhar* signifies a durable tree, or one that yields durable wood. It is difficult, therefore, to select from among the trees of Lebanon that which is specially intended.—J. F. R.

**TIGLATH-PILESER**, the Assyrian king who subjected the kingdom of Israel in B.C. 747. [See ASSYRIA; ISRAEL; MERODACH-BALADAN.]

**TIGRIS**. [HIDDEKEL.]

**TIMBREL**. [MUSICAL INSTRUMENTS.]

**TIMNA** (תִּמְנָה, *restraint*; Sept. *Θαμνά*). 1. A concubine of Eliphaz, the son of Esau (Gen. xxxvi. 12-22; 1 Chron. i. 36). 2. The chief of an Edomitic tribe (Gen. xxxvi. 40; 1 Chron. i. 51).

**TIMNAH** (תִּמְנָה; Sept. *Θαμνά*). 1. One of the landmarks on the northern boundary of the district allotted to Judah (Josh. xv. 10). This is probably the same place which is called Timnath (Josh. xix. 43), and which belonged to the tribe of Dan. It is supposed to be represented by the modern *Tibneh*, a village about two miles to the west of *Ain Shems* (Bethshemesh), now deserted (Robinson, *B. R.* ii. 16). 2. (*Θαμνάθα*) A town in the mountain district of Judah (Josh. xv. 57). It is not mentioned elsewhere. By some it has been confounded with the Timnath of Gen. xxxviii. 12 (von Raumer, *Paläst.* p. 221); but this is doubtful (Keil, *in loc.*)—W. L. A.

**TIMNATH**, prop. **TIMNATHA** (תִּמְנָתָה; Sept. *Θαμνά* and *Θαμνάθα*). 1. The place to which Judah was going up when he was met by his daughter-in-law Tamar (Gen. xxxviii. 13, ff.) Whether this is identical with the Timnah of Josh. xv. 10 remains uncertain, though the probability is that it is so. 2. The residence of Samson's wife (Josh. xiv. 1, 2, 5).—W. L. A.

**TIMNATH-HERES**. [TIMNATH-SERAH.]

**TIMNATH-SERAH** (תִּמְנַת־סֶרַח, *portion of abundance*—i.e. *remaining portion*; Sept. *Θαμνα-σπαράχ*), a town in the mountains of Ephraim, which was assigned to Joshua, and became the place of his residence and burial (Josh. xix. 50; xxiv. 30). In Judg. ii. 9, it is called Timnath heres (*portion of the sun*); but the former is probably the correct reading, since a possession thus given to Joshua after the rest of the land was distributed (Josh. xix. 49) would strictly be a portion remaining. This was probably the same with the Timnah (*Θαμνά*) of Josephus (*Antiq.* v. 1. 29; *De Bell. Jud.* iii. 3. 5), the head of a toparchy lying between those of Gophna and Lydda; which seems to be recognised in a place called Tibneh, lying north-west of Gophna on the Roman road to Antipatris (*Bibliotheca Sacra*, i. 483). The choice of Joshua was certainly not in the best of the land. Jerome relates that Paula, when travelling in these parts, marvelled that the distributor of the possessions of the children of Israel should have chosen for himself a situation so rough and mountainous (*Epitaph. Paulæ*, fol. 99).—J. K.

**TIMON** (Τίμων), one of the seven chosen to distribute to the poorer brethren the alms of the church at Jerusalem (Acts vi. 1-6). From his name he was probably of Gentile birth. Tradition makes him one of the seventy-two disciples, and bishop of Bostra, where he suffered martyrdom.—W. L. A.

**TIMOTHY** (Τιμόθεος), a young Christian of Derbe, grandson of Lois, and son of Eunice, a Jewess, by a Greek father, who was probably a proselyte (Acts xvi. 1; xx. 4). He seems to have been brought up with great care in his family, and to have profited well by the example of the 'unfeigned faith' which dwelt in the excellent women named in 2 Tim. i. 5; iii. 15. The testimonials which Paul received in Lycaonia in favour of this young disciple induced the apostle to make him the companion of his journeys and labours in preaching the gospel (Acts xvi. 2, 3; 1 Tim. iv. 12). He became his most faithful and attached colleague; and is frequently named by Paul with truly paternal tenderness and regard. He calls him 'son Timothy' (1 Tim. i. 18); 'my own son in the faith' (1 Tim. i. 2); 'my beloved son' (1 Cor. iv. 17); 'my workfellow' (Rom. xvi. 21); 'my brother' (which is probably the sense of *Τιμόθεος ὁ ἀδελφός* in 2 Cor. i. 1). Timothy appears to have been with the apostle at Rome, and to have been, like him, a prisoner there, though liberated before him (Heb. xiii. 23). His subsequent history is, however, unknown. It appears from 1 Tim. i. 3, that when Paul went into Macedonia he left Timothy in charge of the church at Ephesus, and there are indications that he was still at Ephesus when the apostle was (as usually understood) a second time captive at Rome, and without hope of deliverance (1 Tim. iii. 14). The tradition is, that

Timothy retained the charge of the church at Ephesus till his death, and eventually suffered martyrdom in that city.—J. K.

**TIMOTHY, EPISTLES TO.** The common authorship of these two epistles has seldom been denied; nor, if denied, could the denial be successfully maintained, so marked and so numerous are the points of resemblance between the two, except upon the assumption that the one has been made up from the other. When, however, we proceed to inquire, *By whom* were they written? the question is one which has occasioned in more recent times no small controversy.

If we defer to the testimony of the early ecclesiastical writers, no doubt will remain upon the point. For the high antiquity of these epistles the allusions to passages in them by Barnabas, Clement of Rome, Polycarp, and Ignatius, sufficiently vouch (Lardner, ii. 20, 38, 79, 96). That they are also to be regarded as genuine productions of the apostle whose name they bear, is attested by Irenæus (*Adv. Hær.* lib. i. *sub init.* iii. 3. 3); by Theophilus of Antioch, who quotes 1 Tim. ii. 1, 2, along with Rom. xiii. 7, 8, as part of 'the divine word' (*Ad Autol.* iii. 14); by Clement of Alexandria (*Strom.* ii. 383; *ibid.* p. 448); by Tertullian (*De Præscr. Hæret.* c. 25); by Caius (ap. Euseb. *Hist. Eccles.* vi. 20); by Origen, etc. (comp. Lardner, vol. ii.) To this weighty mass of external evidence there is nothing to oppose of the same kind, for the omission of these epistles by Marcion from his *Apostolicon*, is a fact, to which, from the well-known caprice and prejudice of that heretic, no weight can be attached. Unless, therefore, difficulties of an insurmountable nature are presented by the epistles themselves to our regarding them as the productions of Paul, we must hold their claim to rank as his to be unimpeachable.

That such difficulties are presented by these epistles has been confidently maintained by Eichhorn (*Einleit.* iii. 317, ff.), De Wette (*Einleit.* s. 283, ff.), and other scholars of note. The learned and acute Schleiermacher assailed the genuineness of the first epistle in his *Kritisches Sendschreiben an J. C. Gass* (Berlin 1807); but that of the second he admitted, and not only so, but was wont to censure the attempts of those who rejected it and that to Titus, as 'removing the occasion and the means for the criticism of the first' (Lücke, *Theol. Stud. und Krit.* 1834, s. 766). To examine all the cavils which these eminent men, in the exercise of that micrologistic criticism in which it seems characteristic of their nation to delight, would be a task altogether incompatible with the limits within which we are confined. A succinct survey of the more weighty of their objections we shall, however, attempt to supply; beginning with those which are common to both epistles, and proceeding to such as are peculiar to each.

1. It is objected that the general style of these epistles is not Pauline. 'Has Paul's language in general,' asks Eichhorn, 'the clearness and ease of expression which we find in these pastoral epistles? Is it not much more unpolished, careless, and allied to a prose which has been thrown together, rather than carefully elaborated?' etc. 'The force of such an objection,' Eichhorn adds, 'it is very difficult to make apparent to those who have not the natural gift of discerning modes of writing.' A most convenient difficulty! enabling the critic to

retort the charge of incapacity upon all who do not see the characteristics of Paul's style in exactly the same light as they are viewed by him. We shelter ourselves behind the ample authority of Hug, who says of the latter part of the objection, that it 'is absolutely false,' and who replies to the former by asserting for a letter, written by the apostle to a friend so intimate as Timothy, the right to exhibit a more free and flowing style than would be proper in a letter addressed to a church (*Introd.* Fosdick's transl. p. 569).

2. Much stress is laid by all who have impugned the Pauline origin of these epistles on the occurrence in them of *ἀπαξ λεγόμενα*, and forms of expression not elsewhere usual with St. Paul. But to this it may be replied that the same objection might be offered against many of the unquestioned writings of the apostle, such, *ex. gr.*, as the Epistle to the Galatians, in which 57 *ἀπαξ λεγόμενα* occur, and the Epistle to the Philippians, in which we find 54, etc.; from which it appears but fair to infer that the occurrence of such is, so far as it can prove anything, an evidence for rather than against the Pauline origin of these epistles. All such reasonings, however, appear to rest upon too precarious a basis to be allowed much weight. When it is remembered how much the style of a writer is affected by his subject, by his design, by the state of his mind at the time of writing, by the circumstances of the parties for whom his composition is intended, as well as how much in the course of a few years the style of even a very careful writer alters, we shall cease to be much moved by the occurrence in the epistles of such a writer as St. Paul, of unexpected varieties and peculiarities of expression. The only valid argument that can be urged against the genuineness of a writing from such facts is, when it can be shown that the writer has used phrases or words, which it is historically impossible that the party to whom the writing is ascribed could have employed; as has been done so successfully in several instances by Bentley, in his work on the Epistles ascribed to Phalaris. No attempt of this sort, however, is made by those who have impugned the authenticity of the Epistles to Timothy; 'not one word has been adduced which can be shown to be foreign to the age of Paul; not a single phrase has been pointed out, of which either the outward form, or the conception on which it is based, belongs to a later age' (Planck, *Bemerkungen, u. s. w.* s. 17). So far from this, Eichhorn himself admits 'that they have in their language much that is Pauline,' and that the allusion to the apostle's persecuting zeal before his conversion (1 Tim. i. 13), the principles asserted respecting both the substance and the form of Christianity, and the proofs adduced, are highly Pauline (p. 318). (See for details Davidson's *Introduc.* iii. 100, ff., and Alford's *Gr. V. T.* iii. Prolegg. sec. 29, ff.)

3. It is objected that the writer of these epistles utters sentiments in favour of the law which are not Pauline, and teaches the efficacy of good works in such a way as to be incompatible with St. Paul's doctrine of salvation by grace. This assertion we may safely meet with a pointed denial. The doctrine of this epistle concerning the law is, that it is good if it be used *volutas*, as a law, for the purposes which a moral law is designed to serve; and what is this but the doctrine of the epistles to the Romans and Galatians, where the apostle maintains that in itself and for its own

ends the divine law is holy, just, and good, and becomes evil only when put out of its proper place, and used for purposes it was never designed to serve? (Rom. vii. 7-12; Gal. iii. 21, etc.) What the writer here teaches concerning good works is also in full harmony with the apostle Paul's teaching in his acknowledged epistles (comp. Rom. xii., Eph. v. and vi., etc.); and if in this epistle there is no formal exposition of the gospel scheme, but rather a dwelling upon practical duties, the reason may easily be found in the peculiar character of this as a pastoral epistle—an epistle of official counsels and exhortations to a minister of Christianity.

4. It is objected that in these epistles certain heretical opinions are denounced which belong to a later age than that of the apostle Paul. Baur does not hesitate to pronounce the opinions in question to be those of Marcionite Gnosticism. But a careful examination of the passages adduced (1 Ep. i. 3, 4, 6, 7, 19; iv. 1-7; vi. 3 ff., 20; 2 Ep. ii. 16-23; iii. 6-9, 13; iv. 4) will suffice to refute this assertion. From these passages it is evident that the heretics in question had embraced Judaistic notions (comp. Tit. i. 10, 14), and those of a kind to which Gnosticism always was more or less antagonistic, and that of Marcion strongly. On the other hand, the character of the Judaizing here condemned is not exactly the same as that which we find censured in the earlier Pauline epistles; it is more antinomian (1 Tim. i. 7) and more distinctly immoral (1 Tim. i. 19; iv. 2; vi. 5, comp. Tit. i. 11; 2 Tim. ii. 17; iii. 6, etc., comp. Tit. i. 15, 16). We probably see in it the more advanced form of the earlier tendency, according to that natural progress by which 'wicked men and seducers wax worse and worse' (2 Tim. iii. 13). Such an advance may well have taken place within the life-time of the apostle.

5. It is alleged that in these epistles and in that to Titus, the hierarchical system appears more complete, and the hierarchical spirit more manifest, than it was in the days of the apostle Paul. This is founded on the recognition in these epistles of *ἐπισκοποι*, *πρεσβύτεροι*, and *διάκονοι*. This, however, of itself obviously proves nothing, for these official names occur in earlier epistles and in the Acts, and must have been contemporary with the church institute itself. To make the objection of any weight it would require to be shown that the three orders of the ministry are presented in these epistles in that relation to each other which we find at a later age, and which alone can be properly called the hierarchical system. That bishops or presbyters, and deacons, have been from the first officers in the church, and that it is a duty of the members to revere and respect them, are points on which all are agreed; and there does not appear to be anything said of or to such in these epistles which might not have been uttered in the earliest of Paul's writings.

Besides these objections, which apply to both epistles alike, there are some which affect each epistle separately.

To the first epistle it is objected: 1. That it presents Timothy in a light in which it is inconsistent with other notices of him in Paul's epistles to regard him. Here he appears as little better than a novice, needing instruction as to the simplest affairs of ecclesiastical order; whereas, in the first epistle to the Corinthians, written earlier than this,

we find him (iv. 17) described by Paul as 'My beloved son, and faithful in the Lord, who shall bring you into remembrance of my ways which be in Christ, as I teach everywhere in every church;' and in 1 Thess. i. 1-3, we are told that the apostle had sent him to Thessalonica to establish the believers there, and to comfort them concerning their faith. If Timothy was so well able to regulate the churches at Corinth and Thessalonica, how, it is asked, can it be supposed that a short while afterwards he should require such minute instructions for his conduct as this epistle contains? To this it may be replied, (1) that in visiting Corinth and Thessalonica Timothy acted as the apostle's delegate, and had, doubtless, received from him minute instructions as to how he should proceed among those to whom he was sent; so that the alleged difference in the circumstances of Timothy when sent to Corinth, and when left in Ephesus, disappears; (2) that it does not necessarily follow, from the injunctions given to Timothy in this epistle, that the writer regarded him as a novice; for they rather respect the application of general principles to peculiar local circumstances, than set forth instructions such as a novice would require; and (3) it is not to be forgotten that the apostle designed through Timothy to present to the church at large a body of instruction which should be useful to it in all ages of its existence.

2. It is objected that after the church at Ephesus had enjoyed the apostle's instructions and presidency for three years, it could not have been, at the time this epistle is supposed to have been written by Paul, in such ignorance of ecclesiastical arrangements as the injunctions here given would lead us to suppose. But what is there in the epistle that necessitates such a supposition? It contains many directions to Timothy how he should conduct himself in a church, some of which are certainly of an elementary character, but there is nothing that leads to the conclusion that they were *all* intended for the benefit of the church at Ephesus, or that the state of that church was such as to require that injunctions of this kind should be given for its sake alone. Timothy's sphere of evangelistic effort extended greatly beyond Ephesus; and this epistle was designed at once to guide him as to what he was to do in the churches which he might be called to regulate, and to supply him authority for so doing. Besides, does it not naturally occur that such minute injunctions are just such as a person forging this epistle at a later period in Paul's name would be most likely to avoid?

3. The absence of allusions to events in Timothy's history has been alleged against the Pauline origin of this epistle. A strange objection!—and as untenable as strange. This may be seen by a reference to the following passages: i. 18; iv. 14; v. 23; vi. 12.

4. It is alleged that the writer of this epistle has made such a mistake as Paul could not have made when he classes Alexander with Hymenæus (1 Tim. i. 20) as a false Christian, whereas we know from 2 Tim. iv. 14 that he was not a Christian at all. But where is the shadow of evidence that the Alexander mentioned in 1 Tim. i. 20 is the same person with the Alexander mentioned in 2 Tim. iv. 14? Was this name so uncommon in Ephesus that we must needs suppose a blunder, where a writer speaks of one so called as a heretic, simply because in other passages

mention is made of one so called who was not a heretic? Nothing can be more obvious than that there were two Alexanders, just as there might have been twenty, known to the apostle and Timothy; and that of these two one was a heretic and troubler of the church at Ephesus, and the other probably a heathen and an enemy of the apostle.

5. In 1 Tim. i. 20, mention is made of Hymenæus as a heretic, whom the writer makes Paul say he had excommunicated; but this is a mistake, for in 2 Tim. ii. 17, we find Hymenæus still a member of the church at Ephesus, and such a mistake could not have been made by Paul. Here, however, it is assumed without proof, (1) that the Hymenæus of the one epistle is the same as the Hymenæus of the other; (2) that being the same, he was still a member of the same church; and (3) that it was impossible for him, though excommunicated, to have returned as a penitent to the church, and again to have become a plague to it. Here are three hypotheses on which we may account for the fact referred to, and until they be all excluded it will not follow that any blunder is chargeable upon the writer of this epistle.

6. In 1 Tim. vi. 13, the writer refers to our Lord's good confession before Pontius Pilate. Now of this we have a record in John's Gospel; but as this was not written in Paul's time, it is urged that this epistle must be ascribed to a later writer. It is easy to obviate any force that may appear to be in this remark by the consideration that all the prominent facts of our Lord's life, and especially the circumstances of his death, were familiarly known by oral communication to all the Christians before the Gospels were written. Though, then, John's Gospel was not extant in Paul's time, the facts recorded by John were well known, and might therefore be very naturally referred to in an epistle from one Christian to another. Of our Lord's confession before Pilate we may readily suppose that Paul, the great advocate of the spirituality of the Messiah's kingdom, was especially fond of making use.

7. It is alleged that 1 Tim. iii. 16 bears marks of being a quotation from a confession or symbol of the church, of which there were none in Paul's day. But what marks of this does the passage present? The answer is, the use of the word *δοκουμενως*, a technical word, and the word used by the ecclesiastical writers to designate something in accordance with orthodox doctrine. This is true; but as technical words are first used in their proper sense, and as the proper sense of *δοκουμενως* perfectly suits the passage in question, there is no reason for supposing any such later usage as De Wette suggests. Besides, his argument tells both ways, for one may as well assert that the ecclesiastical usage arose from the terms of this passage, as affirm that the terms of this passage were borrowed from ecclesiastical usage.

8. The writer of this epistle quotes as a part of Scripture a passage which occurs only in Luke x. 7; but as Luke had not written his Gospel at the time Paul is supposed to have written this epistle, and as it is not the habit of the N. T. writers to quote from each other in the way they quote from the O. T., we are bound to suppose that this epistle is the production of a later writer. But does this writer quote Luke x. 7, in the manner alleged? The passage referred to is in ch. v. 18, where we have first a citation from Deut. xxv. 4, introduced

by the usual formula, 'The Scripture saith;' and then the writer adds, as further confirmatory of his position, the saying of our Lord, which is supposed to be quoted from Luke's Gospel. Now we are not bound to conclude that this latter was adduced by the writer as a part of Scripture. It may be regarded as a remark of his own, or as some proverbial expression, or as a well-known saying of Christ's, by which he confirms the doctrine he is establishing. We are under no necessity to extend the formula with which the verse is commenced so as to include in it *all* that the verse contains. The *καί* by itself will not justify this; indeed we may go further, and affirm that the use of *καί* alone rather leads to an opposite conclusion, for had the writer intended the latter clause to be regarded as a quotation from Scripture as well as the former, he would probably have used some such formula as *καί παλιν* (comp. Heb. ii. 13).

9. It is alleged that the ordinance concerning widows (v. 9, ff.) betrays a later date than the time of St. Paul. But in order to make this good, those who adduce the objection have to assume that these widows were deaconesses, an order not recognised in the apostolic age. This may be [DEACONESSES]; but the assumption that these widows were deaconesses is wholly gratuitous. They were persons received into a class, either as fit objects for relief, or as fit agents of some work; but there is no evidence that they held any office in the church, or were in any sense an *institution*.

10. De Wette maintains that the injunction in ch. v. 23 is so much beneath the dignity of an apostle, that we cannot suppose it to have proceeded from such a writer as Paul. But what is there in such an injunction less dignified than in many injunctions of an equally familiar nature scattered through Paul's epistles? And in what is it incompatible with the apostolic character that one sustaining it should enjoin upon a young, zealous, and active preacher, whom he esteemed as his own son, a careful regard to his health; the more especially when, by acting as is here enjoined, he would vindicate Christian liberty from those ascetic restraints by which the false teachers sought to bind it.

Such are the principal objections which have of late been urged against the Pauline authorship of the First Epistle to Timothy. Let us now turn to glance with equal brevity at those which have been urged against the Second. Of these the most weighty are founded on the assumption that this epistle must be viewed as written during the apostle's first imprisonment at Rome; and as, for reasons to be subsequently stated, we do not regard this assumption as tenable, it will not be necessary to occupy space with any remarks upon them. We may leave unnoticed also those objections to this epistle which are mere repetitions of those urged against the first, and which admit of similar replies.

1. In ch. iii. 11 the writer enumerates a series of persecutions and afflictions which befel him at Antioch, Iconium, and Lystra, of which he says Timothy knew. Would Paul, it is asked, in making such an enumeration, have committed the mistake of referring to persecutions which he had endured *before* his connection with Timothy, and have said nothing of those which he endured *subsequently*, and of which Timothy *must* have known, whilst of the former he *might* be ignorant?

But there is no mistake in the matter. Paul has occasion to refer to the knowledge Timothy had of his sufferings for the gospel. Of these some had occurred before Timothy's connection with him, whilst others had occurred while Timothy was his companion and fellow-sufferer. Of the latter, therefore, Paul makes no specific mention, feeling that to be unnecessary; but of the former, of which Timothy could know only by hearsay, but of which he no doubt did know, for we cannot conceive that any interesting point in Paul's previous history would be unknown to his 'dear son in the faith,' he makes specific enumeration. This fully accounts for his stopping short at the point where Timothy's personal experience could amply supply the remainder.

2. The declaration in ch. iv. 7, etc., is incompatible with what Paul says of himself in Phil. iii. 12, etc. But respect must be had to the very different circumstances in which the apostle was when he wrote these two passages. In the one case he viewed himself as still engaged in active work, and having the prospect of service before him; in the other he regards himself as very near to death, and shortly about to enter into the presence of his Master. Surely the same individual might in the former of these cases speak of work yet to do, and in the latter of his work as done, without any contradiction.

3. In ch. i. 6, and ii. 2, there are allusions to ecclesiastical ceremonies which betray a later age than that of Paul. This is said without reason. The laying on of hands in the conferring of a *χρίσμα* was altogether an apostolic usage; and the hearing of Paul's doctrines was what Timothy, as his companion in travel, could easily enjoy, without our needing to suppose that the apostle is here represented as acting the part of professor in a school of theology.

A survey of these objections will show that no insuperable objection lies in the way of our yielding full assent to the claims of these two epistles to Timothy to rank among the productions of the apostle Paul. On the other side, the entire spirit, tone, character, and contents of these epistles are so truly Pauline, that they carry the evidence of their authenticity with them.

(Comp. the *Introductions* of Michaelis, Eichhorn, Hug, De Wette, Bertholdt, Guericke, Schott, Davidson, Bleek, Reuss, etc.; Schleiermacher, *Ueb. den sogenannten ersten Brief des Paulus an den Timotheos*, Berlin 1807, 12mo; Planck, *Bemerkungen über d. ersten Paulin. Brief an d. Tim.* Gött. 1808, 8vo; Beckhaus, *De vocabulis ἀπαξ λεγόμενις in I. ad Tim. Ep. Paulina obviis, authenticia ejus nihil detrahentibus*, Linge 1810, 8vo; Curtius, *De tempore quo prior Pauli ad Tim. Epist. exarata sit*, Berol. 1828, 8vo, etc.; Otto, *Die Geschichtl. verhältnisse der Past. Briefe*, Leipz. 1860).

Assuming that these epistles were written by St. Paul, the question next to be considered respects the time when each of them was composed.

With regard to the first, it is clear that it was written not long after Paul had left Ephesus for Macedonia (ch. i. 3). Now from Acts xx. 1 we learn that Paul left Ephesus after the uproar caused by Demetrius, and went into Macedonia. Shall we suppose, then, that it was at this time this epistle was written? Many excellent critics reply in the affirmative; and upon the whole we think this opinion the one to be preferred. It is not, however, without difficulties; the chief of which

lies in the fact that Timothy, to whom this epistle is addressed, appears to have been with Paul in Macedonia at this time (comp. 2 Cor. i. 1). To obviate this objection, it has been suggested that Paul might have written this epistle immediately after leaving Ephesus, and the second to the Corinthians not before the concluding period of his stay in Macedonia; so that Timothy might have visited him in the interval. This appears to remove the difficulty, but it does so by suggesting a new one; for how on this supposition are we to account for the apostle's delaying so long to write to the Corinthians after the arrival of Titus, by whose intelligence concerning the state of the Corinthian church Paul was led to address them? [SECOND EPISTLE TO THE CORINTHIANS.] It may be asked also if it be likely that Timothy, after receiving such a charge as Paul gives him in this epistle, would so soon have left Ephesus and followed the apostle. Pressed by these difficulties, many critics of note have resorted to the hypothesis that this epistle must have been written at a later period, subsequent to the apostle's first imprisonment at Rome, and upon a journey undertaken by him during the interval between that and his final imprisonment. But this hypothesis seems to assume the possibility of churches remaining in and around Ephesus in a state of defective arrangement and order for a greater length of time than we can believe to have been the case. It is opposed also by what Paul says, ch. iv. 12, from which we learn that at the time this epistle was written Timothy was in danger of being despised as a youth; but this could hardly be said of him *after* St. Paul's first imprisonment, when he must on the lowest computation have been upwards of thirty years of age. To weaken this objection it has been said that even at that age Timothy was young enough to exercise authority over bishops who might be older than himself. But it is not in this connection that the allusion occurs, but in connection with work to be done in driving heresies out of the community of the faithful. And, finally, this hypothesis is directly opposed to the solemn declaration of Paul to the elders of the church at Ephesus when he met them at Miletus: 'I know that ye all shall see my face no more' (Acts xx. 25), for it assumes that he did see them again and preached to them. These difficulties in the way of the hypothesis of a later date for this epistle seem to us weightier than those which attach to the other supposition. An attempt has been made by C. W. Otto (*Die Gesch. Verhält.* p. 23, ff.) to avoid the difficulty in this passage by translating it thus: 'As I in Ephesus exhorted thee to stand fast, so do thou, as thou goest to Macedonia, enjoin on some not to adhere to strange doctrines, etc.' The passage is thus made to refer to Timothy's going to Macedonia, not to the apostle's, and the occasion of his going is referred to the journey mentioned Acts xix. 21, 22, with which the visit to Corinth mentioned 1 Cor. iv. 17, xvi. 10, is made to synchronise. The date of 1 Tim. is thus placed *before* that of 1 Cor. All this, however, rests on a rendering of 1 Tim. i. 3 which, in spite of much learned disquisition, the writer has failed to vindicate.

With regard to the second epistle, it is certain that it was written at Rome, and whilst the apostle was a prisoner there (i. 8, 16; ii. 9; i. 17; iv. 21); but the question arises, was it during his first or his second imprisonment that this took place?

In favour of the first, the most weighty consideration arises out of the fact that the apostle appears to have had the same individuals as his companions when he wrote this epistle, as he had when he wrote the epistles to the Ephesians, Philippians, and Colossians, and that to Philemon, which we know were written during his first imprisonment at Rome. 'At the beginning of the imprisonment,' says Hug, who has very forcibly stated this argument in favour of the earlier hypothesis, 'when the Epistle to the Ephesians was written, Timothy, who was not one of Paul's companions on the voyage to Italy (Acts xxvii. 2), was not with him at Rome; for Paul does not add his name in the address with which the epistle commences, as he always did when Timothy was at his side. Timothy afterwards arrived; and accordingly, at the outset of the epistles to the Colossians and Philemon, his name appears with the apostle's (Col. i. 1; Phil. 1); secondly, Luke was in Paul's company (Col. iv. 10; Phil. 24); thirdly, Mark was likewise with him (Col. iv. 10; Phil. 24); fourthly, Tychicus was then Paul's *διδάκων* and letter-bearer, and, in particular, was sent to Asia (Eph. vi. 21; Col. iv. 7, 8). All these circumstances are presented to view in the second epistle to Timothy. Timothy was not with Paul at first, but was summoned to his side (2 Tim. iv. 9, 21); secondly, Luke was with him (iv. 11); thirdly, he wishes Mark to come with Timothy, so that he must have been with him in the course of his imprisonment (iv. 11); fourthly, Tychicus was with him in the capacity of letter-bearer, and, in particular, was sent to Asia (iv. 12). Now, in order to suppose that Paul wrote this epistle to Timothy during the second imprisonment at Rome, we must assume that the circumstances of both were exactly the same, etc. We must also assume that Paul at both times, even in the latter part of Nero's reign, was permitted to receive friends during his confinement, to write letters, despatch messengers, and, in general, to have free intercourse with everybody' (*Introduction*, p. 556, etc., Fosdick's transl.)

The case, as here stated, it must be admitted, is strongly in favour of our assigning the composition of this epistle to the time of St. Paul's first imprisonment at Rome. On the other hand, the difficulties lying in the way of this seem insuperable. Hug's reasoning assumes that the epistle must have been written in the *early* part of the apostle's imprisonment, else Timothy could not have been absent at the time of its composition. But that this is utterly inadmissible the following considerations show:—

1. When St. Paul wrote to the Colossians, the Philippians, and Philemon, Demas was with him; when he wrote this epistle to Timothy, Demas had forsaken him, having loved this present world and gone to Thessalonica (iv. 10).
2. When St. Paul wrote to the Ephesians, Colossians, Philippians, and Philemon, he was in good hopes of a speedy liberation from his imprisonment; when he wrote this epistle to Timothy he had lost all these hopes, and was anticipating death as near at hand (iv. 6-8).
3. At the time this epistle was written St. Paul had been, if not oftener, at least once before the bar of the emperor, when he had offered his apology (iv. 16).
4. Tychicus, the bearer of the letters to the Colossians, had been despatched from Rome *before* this epistle to Timothy was written (iv. 12).
5. At the time the epistles to the Colossians and Philemon

were written, Aristarchus was with St. Paul; by the time this was written Aristarchus had left him (iv. 11). All these circumstances forbid our supposing that this Second Epistle to Timothy was written before the epistles above named, that is, in the early part of St. Paul's first imprisonment at Rome. Shall we then assign the epistle to a later period of that same imprisonment? Against this also lie difficulties. Before we can admit it we must suppose that Timothy and Mark, who did not accompany St. Paul to Rome, had shortly after followed him thither, and, after remaining awhile, left the apostle, and were again requested by him in this epistle to return; that during the interval of their absence from Rome, St. Paul's first trial had occurred; and that, yet even before he had so much as appeared before his judges, he had written to his friends in terms intimating his full confidence of a speedy release (Phil. i. 25; ii. 24; Philem. 22). These circumstances may perhaps admit of explanation; but there are others which seem to present insuperable difficulties in the way of the supposition that this epistle was written at any period of Paul's first imprisonment at Rome.

1. St. Paul's imprisonment of which we have an account in the Acts, was of a much milder kind than that in which he was at the time he wrote this epistle. In the former case he was permitted to lodge in his own hired house, and to receive all who came to him, being guarded only by a single soldier; in the latter he was in such close confinement that Onesiphorus had no small difficulty in finding him; he was chained, he suffered evil even unto bonds as a malefactor, his friends had mostly deserted him, and he had narrowly escaped destruction from the Roman tyrant (i. 16-18; ii. 9; iv. 6, 7, 8, 18).
2. In ch. iv. 13 he requests Timothy to bring with him from Troas some books, parchments, etc., which he had left at that place. If we suppose the visit here referred to the same as that mentioned in Acts xx. 5-7, we must conclude that these documents had been allowed by the apostle to lie at Troas for a space of seven or eight years, as that length of time elapsed between the visit to Troas, mentioned by Luke, and St. Paul's first imprisonment at Rome. This is surely very unlikely, as the documents were plainly of value to the apostle; and if by *φαλδύνης*, in this passage, he meant a *cloak* or *mantle*, the leaving of it for so long a time unused when it might have been of service, and the sending so anxiously for it when it could be of little or none, as the apostle's time of departure was at hand, must be allowed to be not a little improbable.
3. In ch. iv. 20 St. Paul speaks of having left Trophimus sick at Miletus. Now this could not have been on the occasion referred to in Acts xx. 15; for subsequent to that Trophimus was with the apostle at Jerusalem (Acts xxi. 29). It follows that St. Paul must have visited Miletus at a subsequent period; but he did not visit it on his way from Jerusalem to Rome on the occasion of his first imprisonment; and this, therefore, strongly favours the hypothesis of a journey subsequent to that event, and immediately antecedent to the writing of this epistle. The attempt to enfeeble the force of this by translating *ἀπέλειπον*, 'they left,' etc., and understanding it of messengers from Ephesus coming to visit Paul, is ingenious, but can hardly be admitted, as no sound interpreter would forcibly supply a subject to a verb where the context itself naturally supplies one.
4. In ch. iv. 20 the apostle says, 'Erastus abode in

Corinth.' Such language implies that shortly before writing this epistle the apostle had been at Corinth, where he left Erastus. But before his first imprisonment St. Paul had not been at Corinth for several years, and during the interval Timothy had been with him, so that he did not need to write to him at a later period about that visit (Acts xx. 4). Hug contends that *ἐνευ* simply expresses the fact that Erastus was then residing at Corinth, without necessarily implying that St. Paul had left him there; but would the apostle in this case have used the aorist?

On these grounds the hypothesis has been adopted, that St. Paul, after his first imprisonment, was set at liberty, resumed his missionary labours, was again apprehended, and wrote this epistle during his second imprisonment. Whichever hypothesis we adopt we shall encounter difficulties; but the latter seems, upon the whole, the preferable (comp. the *Introductions* of Horne, Hug, Michaelis, Eichhorn; Hensen's *Leben Pauli*; Paley's *Horæ Paulinæ*, etc.)

The design of the first epistle is partly to instruct Timothy in the duties of that office with which he had been intrusted, partly to supply him with credentials to the churches which he might visit, and partly to furnish through him guidance to the churches themselves. It may be divided into *three* parts, exclusive of the introduction (i. 1, 2), and the conclusion (vi. 20, 21). In the *first* of these parts (i. 3-20) the apostle reminds Timothy generally of his functions, and especially of the duties he had to discharge in reference to certain false teachers, who were anxious to bring the believers under the yoke of the law. In the *second* (ii.-vi. 2) he gives Timothy particular instructions concerning the orderly conducting of divine worship, the qualifications of bishops and deacons, and the proper mode of behaving himself in a church. In the *third* (vi. 3-19) the apostle discourses against some vices to which the Christians at Ephesus seem to have been prone.

The design of the second epistle is partly to inform Timothy of the apostle's trying circumstances at Rome, and partly to utter a last warning voice against the errors and delusions which were corrupting and disturbing the churches. It consists of an inscription (i. 1-5); of a series of exhortations to Timothy, to be faithful in his zeal for sound doctrine, patient under affliction and persecution, careful to maintain a deportment becoming his office, and diligent in his endeavours to counteract the unhallowed efforts of the false teachers (i. 6; iv. 8); and a conclusion in which Paul requests Timothy to visit him, and sends the salutations of certain Christians at Rome to Timothy, and those of the apostle himself to some believers in Asia Minor.

TIN. [BEDIL.]

TINSHEMETH (תִּנְשֶׁמֶת). This name has already been referred to the 'chamæleon,' but there

is no doubt that it also denotes a bird; for it occurs in the enumeration of unclean species which the law forbade to be eaten, and we are not at liberty to presume that a lizard could be meant, where all the others are positively flying creatures (Lev. xi. 18; Deut. xiv. 16). Bochart, with his usual learning, endeavours to prove it to be a species of owl; but in that case not less than three species of owls would be enumerated in the series, while many other birds that cannot well be assumed to be clean would be omitted. The Sept. and the Vulgate understand a water-fowl to be meant, the first rendering it *πορφυριων*, and the second, not comprehending the meaning of this designation, rendering it 'swan.' Giggeius wavered between these two; and Dr. Mason Harris, seemingly not better informed, and confounding the American red species with the white one of Africa, guessed that *porphyriion* must mean the 'flamingo.' The swan, for which some recent scholars contend, asserting that it was held sacred in Egypt, does not occur, so far as we have ascertained, in any Egyptian ancient picture, and is not a bird which, in migrating to the south, even during the coldest seasons, appears to proceed further than France or Spain, though no doubt individuals may be blown onwards in hard gales to the African shore. We recollect only two instances of swans being noticed so far to the south as the sea between Candia and Rhodes: one where a traveller mentions his passing through a flock reposing on the sea during the night; the other recorded by Hasselquist, who saw one on the coast of Egypt; but we conjecture that they mistook pelicans for swans, particularly as the last mentioned are fresh-water birds, and do not readily

505. The Porphyrio

take to the true salt sea. We prefer the rendering of the Sept., because the porphyrio, or purple gallinula, cannot have been unknown to the Alexandrian temples, and was then, as it is now, seen both in Egypt and Palestine. The circumstance of the same name being given to the chamæleon may have arisen from both having the faculty of changing colours, or being iridescent; the first when angry becoming green, blue, and purple—colours which likewise play constantly on the glossy parts of the second's plumage. The porphyrio is superior in bulk to our water-hen or gallinula, has a hard crimson shield on the forehead, and flesh-coloured legs; the head, neck, and sides are of a beautiful turquoise blue, the upper and back parts of a dark but brilliant indigo.

The porphyryion is a remarkable bird, abounding in the southern and eastern parts of Europe and Western Asia, feeding itself standing on one leg, and holding its food in the claws of the other. It was anciently kept tame in the precincts of pagan temples, and therefore perhaps was marked unclean, as most, if not all, the sacred animals of the heathens were. We subjoin a figure of *porphyrio hyacinthinus*, the species most common in Europe, although there are several others in Asia and Africa; *porphyrio erythropus*, abundant on the south-east coast of Africa, appears to be that which the pagan priests most cherished.—C. H. S.

TIPSAH (תִּפְסָח; Sept. *Θεσπᾶ*, *Θάψα*), a large and opulent city on the western bank of the Euphrates. It is doubtless the same as the Thapsacus of the Greeks and Romans. The name means 'ford'; and the town was, in fact, situated at the lowest fording-place of the Euphrates; whence it became the point of trading-communication between the natives east and west of the river. On this account, and as commanding the ford, the possession of the place was deemed of great importance by the ruling powers of the day (Xenoph. *Anab.* i. 4, 11; Arrian, ii. 13; iii. 7; Strabo, xvi. p. 1082; Q. Curtius, x. 1-9). This circumstance explains the contentions of the kings of Syria and Egypt respecting Carchemish, which was a strong place a little lower down the river, at the junction of the Chaboras. Solomon obtained possession of Tiphseh (1 Kings iv. 24), probably in connection with the series of operations (of which the building or fortification of Tadmor was one) adopted by him for the purpose of drawing the Eastern trade into his own dominions [SOLOMON; TADMOR]. Nothing remains of Tiphseh at the present day except the name; but the site is supposed to be marked by the village of Ed-Deyr. The Tiphseh of 2 Kings xv. 16 is usually identified with the above by Jewish writers; but it seems rather to have been in the land of Israel, and not far from Tirzah.—J. K.

TIRAS. [NATIONS, DISPERSION OF.]

TIRHAKAH, king of Cush (Ethiopia in the Common Version), who in the days of Hezekiah came out against Sennacherib when he was making war on Judah (2 Kings xix. 9; Is. xxxvii. 9). He is the *Ταρακός* of Manetho, the third king of the twenty-fifth dynasty, and the *Τερακών* of Strabo (xv. 687), with whom the twenty-fifth Ethiopic dynasty came to an end. According to Strabo, he made his way victoriously as far as the Pillars of Hercules. The length of his reign is fixed by Syncellus at eighteen, and by Eusebius at twenty years. According to the first statement, the period of his reign falls in the years 714-696 B.C. His successful opposition to the power of Assyria is recorded on the walls of a Theban temple, for at Medinet Habu are the figure and the name of this king and the captives he took. That Tirhakah ruled at Napata, now Gebel Berkel, and in the Thebaid at the same period, is proved by the additions he made to the temples of Thebes, and by the monuments he built in Ethiopia. That he was a very potent monarch is evident from his defeat of Sennacherib, as well as from the monuments he has left both in Egypt and Ethiopia, and his maintenance of the Egyptian possessions in Asia; and although Strabo may have exaggerated his power when he affirms that he extended his conquests like

Sesostris into Europe, yet his authority is of use, as it leads to the conclusion that Tirhakah ruled Lower as well as Upper Egypt [SENNACHERIB].—J. R. B.

TIRSHATHA (תִּרְשָׁתָא), always with the art.; Sept. *Ῥερσασθά*, a title borne by Zerubbabel and Nehemiah as Persian governors of Judaea (Ezra ii. 63; Neh. vii. 65, 70; viii. 9; x. 2). It seems to come from the Persic *ترش*, *torsh*, 'severe,' and, in that case, would be equivalent to 'your severity;' comp. 'dread sovereign,' and the German 'gestrenger Herr,' a title formerly borne by the magistrates of the free and imperial German states.

TIRZAH (תִּרְצָח) is mentioned only once in Scripture, namely in Is. xlv. 14. 'He (that is, the carpenter, ver. 13) heweth him down cedars, and taketh the cypress' (*tirzah*) for the purpose of making an idol. There is no doubt but the wood must have been of a texture fit to be worked, as well as to retain the shape given to it. Though translated 'cypress,' we have no proof that this tree was intended, but it is well suited for the purpose indicated. [BEROSH.] The Greek translators, Aquila and Theodotion, have employed a word which denotes the wild or forest oak (*ἀγριοδάλανος*). The oldest Latin version renders the Hebrew word by *ilex*, 'the evergreen oak' (Rosenmüller, p. 317). As the wood of this species is well fitted for being worked into images, and was so employed by the ancients, it is possible that it may be that intended, though we have no satisfactory proof of its being so.—J. F. R.

TIRZAH (תִּרְצָח, 'pleasantness'; *Θερσά*; *Θαρσά*; Alex. *Θερμά*; *Θερσά*; *Thersa*), an ancient royal city of the Canaanites, captured by Joshua (Josh. xii. 24). After its conquest it is not again mentioned in history till the time of Jeroboam, who appears to have chosen it as his principal residence. He was at least living there when his son Abijah died (1 Kings xiv. 17). From this period till the founding of Samaria by Omri (some fifty years) it continued to be the capital of the northern kingdom (xv. 21, 33). It was the scene of Elah's murder (xvi. 8), and there too Zimri the murderer, to escape the avenging sword of Omri, 'burnt the king's house over him with fire, and died' (ver. 18). The last notice of it in Scripture history is in connection with Menahem, who went from Tirzah to Samaria, 'and smote Shallum, and reigned in his stead' (2 Kings xv. 14).

The geographical position of Tirzah has not been given by any ancient geographer. Eusebius and Jerome simply mention it as a city captured by Joshua (*Onomast.*, s. v. *Thersa*). Brocardus, a writer of the 13th century, appears to have been the first to identify it. He says: 'From Samaria it is three leagues eastward to the city of *Thersa*, which is situated on a high mountain' (*Descriptio Ter. San.* vii.) From that time until the visit of Dr. Robinson it remained unknown; but that acute geographer discovered it in the modern *Tell-tzah*. 'The change of *r* into *l* is very common, the harder letter being softened, especially in the later Hebrew books and the kindred dialects. The place lies in a slightly and commanding position. . . . It is surrounded by immense groves of olive trees, planted on all sides around;

mostly young and thrifty trees. . . . The town is of some size, and tolerably well built. We saw no remains of antiquity, except a few sepulchral excavations and some cisterns' (*B. R.* iii. 302, 303). When compared with other sites in Palestine, the appropriateness of Solomon's figure will be perceived: 'Thou art beautiful, O my love, as Tirzah' (*Cant.* vi. 4).—J. L. P.

**TISHBITE** (תִּשְׁבִּי; Sept. *Θεσβίτης*), the Gentile name of Elijah—'Elijah the Tishbite' (1 Kings xvii. 1, 2; xxi. 17)—derived from a town called Tishbi in the tribe of Naphtali, the name of which occurs only in Tob. i. 2, *Θεσβη* (see Reland, *Palästina*, p. 1035).

**TISRI** (תִּשְׂרִי, from a root which denotes to begin) was the first month of the civil, and the seventh month of the ecclesiastical year, in which fell the Festival of Atonement and that of Tabernacles. In 1 Kings viii. 2 it is termed the month of Ethanim, that is, the month of streaming rivers, which are filled during this month by the autumnal rains. It corresponds with our September-October. Tisri is one of the six names of months found in Palmyrene inscriptions; which, with other evidence, renders it very probable that the Jewish names of months form a member in a great series of names of months, which were extensively in use in the eastern parts of the world (see *Über die Monatsnamen einiger alter Völker* von T. Benfey und M. A. Stern, Berlin 1836).—J. R. B.

**TITHE** (מַעֲשֵׂר, *dekátē*, *δέκατον*, *ἐπιδέκατον*, *decima*, Targum מַעֲשֵׂרָא, מַעֲשֵׂרָא כֶּן עֲשָׂרָא), the tenth part both of the produce of the land and of the increase of the flock, enjoined in the Mosaic law to be devoted by every Israelite to the servants of the sanctuary, and to the hospitable meals provided on the festivals for the poor and needy (*Lev.* xxvii. 30-33; *Num.* xviii. 21-32; *Deut.* xii. 5-18; xiv. 22-29; xxvi. 12-14).

1. *The Mosaic law respecting Tithes.*—The first enactment respecting tithes ordains that the tenth of all produce and of all animals is to be devoted to the Lord; that the predial or vegetable tithe may be redeemed if one-fifth is added to its value; and that the mixed or animal tithe, which is unredeemable, is to be taken as it comes, without any selection, and without attempting to effect any change, else the original animal and the one substituted for it are both forfeited to the sanctuary (*Lev.* xxvii. 30-33). In the second mention of the tithe, it is enacted that it is to be given to the Levites of the respective districts as a remuneration for their services in the sanctuary, since they were excluded from sharing in the division of the land of Canaan, that they are allowed to consume the tithe wherever they please (*בכל מקום*), and that from the tithe thus received they are to give a tenth to the Aaronites or priests (*Num.* xviii. 21-32). In the third legislation on this point, it is further commanded that the Israelites are to tithe the produce of the soil every year; that this vegetable tithe, together with the firstlings of the flock and herd, is to constitute the social and festive repast in the place of the sanctuary; that in case the sanctuary is too far off, the tithal produce is to be converted into money, which is to be taken to the metropolis, and there laid out in food for this entertainment, and that the Levite is to share with

the family in this social meal. It is, moreover, ordained that at the end of every third year this vegetable tithe (מַעֲשֵׂר תְּבוּאָה) is not to be taken to the metropolis, but is to constitute hospitable and charitable meals at home, to which the Levite, the stranger, the fatherless, and the widow are to be invited (*Deut.* xii. 5-7, 17; xiv. 22-29). The triennial conversion of the second or vegetable tithe into entertainments for the poor is again enjoined in *Deut.* xxvi. 12-15, where it is also ordered that every Israelite shall make an exculpatory declaration that he has conscientiously performed the tithal command.

It will be seen that the book of Deuteronomy only mentions the second or vegetable tithe as well as its triennial conversion into the poor tithe, omitting altogether the first or Levitical tithe; whilst the books of Leviticus and Numbers, which discuss the Levitical tithe, pass over in silence the second or feast tithe. This has given rise to various theories among modern critics. Thus Ewald will have it that the Deuteronomist writing during the period of the Jewish monarchy, when the Levitical tithe, as enacted in *Lev.* and *Num.*, could no longer be continued as a regular rate in consequence of the new taxes imposed by the sovereigns, endeavoured to bring the tithe back to its original form of a voluntary offering (*Die Alterthümer des Volkes Israel*, p. 346). Knobel (*Comment. on Lev.* pp. 419, 590) regards *Deut.* xii. 6, 11; xiv. 22-29; xxvi. 12, as proceeding from the later Jehovistic legislator who lived towards the end of the kingdom of Judah, and who substituted for the older Elohist's annual vegetable and animal tithe, which was no longer practicable, the triennial vegetable tithe which was to be devoted to the hospitable meals whereunto the Levites, together with the stranger, widow, orphans, and poor, were to be invited. Whilst Bishop Colenso (*The Pentateuch and the Book of Joshua critically examined*, iii. 476), who also regards the enactments in *Lev.*, *Num.*, and *Deut.* as referring to one and the same tithe, finds 'the most complete contradiction between the two sets of laws.' Against these theories, however, is to be urged that—*i.* The tithal enactment in *Deut.* has nothing whatever to do with the one in *Lev.* and *Num.*, and is therefore neither intended to contravene nor supersede it. *ii.* The Deuteronomist presupposes the existence and force of the Levitical tithe as the fixed income of the ministers of the sanctuary, and designs the second tithe to be in force by its side. This is evident from the fact that the book of Deuteronomy (x. 9; xii. 19; xiv. 27, 29), like the books of *Lev.* and *Num.*, legislates upon the basis of Levitical poverty, and frequently refers to the care to be taken of the Levites. Now if, according to the above-named hypothesis, we are to regard the triennial tithe as substituted in the place of the original Levitical tithe, we are shut up to the preposterous conclusion that the only provision made by the Deuteronomist for the Levites is an ample meal once in three years. *iii.* The mention of the second tithe by the Deuteronomist alone is owing to the fact that it is connected with the fixing of the central sanctuary, the rites and regulations of which he alone discusses. And *iv.* The post-exile practice of the Jews shows, beyond the shadow of a doubt, that the nation for whom these tithal laws were passed understood the enactment in Deuteronomy to mean a second tithe to be in force side by side with the first or Levitical tithe

enjoined in Lev. and Num. (Tobit i. 7; Joseph. *Antiq.* iv. 8. 8, 22; *Mishna, Maaser Sheni*). This also sets aside the objection urged by some that a double tithe would be too heavy and unbearable a tax. For if the Jews did not find it so in later times, when under the rule of foreign sovereigns, and paying heavy rates to them, surely they could not have found the double tithe too grinding an oppression during the independence of the state, especially when it is remembered that the second tithe was devoted to festival repasts of the respective families at which the Levites, the strangers, the widows, orphans, etc., were simply guests.

2. *Classification of and later Legislation upon the Tithes.*—It will be seen from the above description that the tithes are divisible into four classes—viz. *i.* The Levitical or first tithe. *ii.* The priestly tithe paid by the Levites from their tithes. *iii.* The festival or second tithe. And *iv.* The triennial tithe. As the anxiety to pay them properly called forth more minute definitions and further expansions of the Pentateuchal enactments, we shall give the most important practices which obtained during the second temple in connection with each of these four classes of tithes.

*i. The Levitical or first tithe (מעשר ראשון) (בבורים).* This tithe was paid after both the first fruit (תרומה) and the priestly heave-offering (תרומה) had been separated, the amount of which, though not fixed in the Mosaic law, was generally  $\frac{1}{10}$  of the produce (comp. Exod. xxiii. 19, Deut. xxvi. 1, etc., with *Mishna Bikkurim*; Num. xviii. 8, Deut. xviii. 4, with *Mishna Teruma*, iii. 7, iv. 3, Maimonides, *Iad Ha-Chezaka, Hilchoth Mathanuth Anjim*, vi. 2). As the Mosaic law does not define what things are subject to this tithe, but simply says that it is to consist of both vegetables and animals (Lev. xxvii. 30, etc.), the Jewish canons enacted that as to the produce of the land, 'whatsoever is esculent though still kept in the field, and derives its growth from the soil, is tithable; or whatsoever may be eaten from the commencement to the completion of its growth, though left in the field to increase in size, is tithable, whether small or great; and whatsoever cannot be eaten at the beginning, but can only be eaten at the end of its growth, is not tithable till it is ripe for food' (*Mishna, Maaseroth*, i. 1). It will be seen that this definition embraces even the smallest kitchen herbs and aromatic plants; and that it explains the remark of our Saviour that tithe was paid of mint, dill, and cummin, which he however did not condemn, but on the contrary said, 'these ought ye to have done' (Matt. xxiii. 23; Luke xi. 42; with *Mishna, Maaseroth*, i. 2-8). The animals subject to this Levitical tithe are still more indefinitely described in the Pentateuchal statute, which simply says, 'as to all the tithe of herds and flocks, whatsoever passeth under the rod, the tenth shall be holy unto the Lord' (Lev. xxvii. 32). It will be seen that this law does not say whether the tenth is to be paid of the newly-born animals, whether it includes those newly purchased or exchanged, whether it is payable if a man has less than ten cattle, or at what age of the animals the tithe becomes due. The spiritual heads of the people had therefore most minutely to define these points, so as to make the tithal law practicable. Hence the following canons obtained. All animals are tithable except those which are born of heterogeneous copulation (comp. Deut. xxii. 9), which are damaged, which have come into the world irregu-

larly, or which are bereaved of their mother, which have been purchased or received as presents. They are only tithable when there are ten newly born of the same kind, so that the offspring of oxen and small cattle must not be put together to make up the requisite number, nor are even those to be put together which are born in different years, though they belong to the same kind. Sheep and goats may be tithed together provided they have all been born in the same season (*Mishna, Bechoroth*, ix. 3, 4). The tithing is to take place three times in the year, about fifteen days before each of the three great festivals—viz. *i.* On the first of *Nisan*, being fifteen days before Passover; *ii.* On the first of *Sivan*, being only five days before Pentecost, because the small number of animals born between these two festivals could not suffice for the celebration of Pentecost if the second tithe term were to be fifteen days before this festival; and *iii.* On the twenty-ninth of *Elul* instead of the first of *Tishri*, which is properly speaking fifteen days before Tabernacles, because the first of *Tishri* is the Feast of Trumpets or New Year [FESTIVALS]. Those which were born in the month of *Elul* were tithed by themselves (*Mishna, Rosh Ha-Shana*, i. 1, with *Bechoroth*, ix. 5, 6). On each of the three occasions the herd of every owner extending over a pasture-ground not exceeding sixteen Roman miles were collected together into one fold, whilst those beyond the prescribed limits formed a separate lot. In the pen wherein the herd was thus gathered, a small door was made which only admitted of one animal going out at a time, and the owner placed himself at this narrow opening, holding a rod or staff in his hand, wherewith he counted each animal as it made its exit from the fold till he came to the tenth, which he marked with red colour, saying, 'This is the tithe!' (*Mishna, Bechoroth*, x. 7). The command 'whatsoever passeth under the rod' (Lev. xxvii. 32) was thus literally carried out.

*ii. The priestly tithe*, also called *tithe of the tithe* (מעשר מן המעשר, מעשר המעשר, Num. xviii. 26); *the heave-offering of the tithe* (תרומת מעשר), ἀπαρχὴ ἀπαρχῆς (Philo, *De nom. mul.*), or δευτεροδεκάται (St. Jerome on Ezek. xlv.) This tithe had to be separated by the Levite from the tenth he had received from the Israelite. It had to be given to the priests in Jerusalem (Neh. x. 38), before the Levite could use the rate paid to him. It had moreover to be a tenth part of the very tithe which the Levites received, and was therefore subject to the same laws and regulations to which the Levitical tithe was subject. After the Babylonish captivity, when the Levitical tithe was divided [SCRIBES] (see below), this so-called *tithe of tithes* necessarily ceased. Hence the priests, instead of receiving a tenth of the Levitical tithe as heretofore, took their share directly from the people (Heb. vii. 5).

*iii. The second tithe (מעשר שני, δευτεροδεκάτη).* This festival tithe could not be sold nor given or received as a pledge, nor used as weight, nor exchanged, but might be given away as a present (*Mishna, Maaser Sheni*, i. 1). If the distance to the national sanctuary was so great as to preclude the possibility of conveying it in kind, it might be converted into specie and the money could only be expended in the metropolis in ordinary articles of food, drink, and ointment for the festival meals or festival sacrifices which were eaten at these social

repasts (זבחי שלמים), *Mishna*, *ibid.* i. 7; iii. 2; *Chagiga*, i. 3). There were store-houses (לשכות, אוצרות) in one part of the temple under the superintendence of priests and Levites, in which the tithe was kept (2 Chron. xxxi. 11-14; Neh. x. 38, 39; xii. 44; xiii. 12; Joseph. *Antiq.* xx. 8, 8).

iv. *The triennial or poor tithe* (מועשר עני, πτω-  
χοδεκάτρη), also called *the third tithe* (מועשר שלישי, ἡ τρίτη δεκάτρη, Tobit i. 7; Joseph. *Antiq.* iv. 8, 22), and the *second tithe* (δεύτερον ἐπιδέκατον, Sept. Deut. xxvi. 12), because it was properly the second tithe converted into the poor tithe, to be given to and consumed by the poor at home, instead of conveying it to the metropolis and eaten by the owner. As every seventh year was a fallow year not yielding a regular harvest, it was enacted that the second tithe should be eaten in Jerusalem by the owner thereof and his guests, in the first, second, fourth, and fifth years of the septennial cycle, and be given to the poor in the third and seventh year. It will thus be seen that the whole series of taxes reached its completion at the end of every third and seventh year, or on the eve of Passover of the fourth and seventh year. Hence it is that the third year is denominated *the year of tithe* (שנת המועשר)—i.e. when all the tithes had taken

their rounds (כי תכלה לעשר את כל מועשר תבואתך, Deut. xxvi. 12), and not because, as some critics will have it, the annual tithe of the earlier legislator was afterwards changed by the Deuteronomist into a triennial tithe. Hence, too, the spiritual heads of the Jewish people in and before the time of Christ constituted and denominated the Preparation day of Passover of the fourth and seventh year a day of searching and removal (בעור) in accordance with Deut. xxvi. 12 (*Mishna*, *Maaser Sheni*, v. 6), when every Israelite had to separate all the tithes which he ought to have paid in the course of the three years, but which, either through negligence or through some untoward circumstances, he had failed to do. At the evening sacrifice on the last day of Passover every pilgrim before preparing to return home had to offer a prayer of confession, in accordance with Deut. xxvi. 13. As this confession (ודוי) is an expansion and traditional exposition of Deut. xxvi. 13-15, which accounts for the Chaldee and other versions of the passage in question, we shall give it entire:—‘I have removed the hallowed things from the house’—i.e. the second tithe and the quadrennial fruit [Lev. xix. 23, etc.]; ‘have given it to the Levite’—i.e. the Levitical tithe; ‘and also given it’—i.e. the priestly offering (תרומה) and the priestly tithe (תרומת מועשר)—‘to the stranger, to the fatherless, and to the widow’—i.e. the poor tithe . . . ‘from the house’—i.e. from the dough [comp. Num. xv. 17, etc.], ‘according to all thy commandments which thou hast commanded me’—i.e. not given the second tithe before the first. ‘I have not transgressed thy commandments’—i.e. not paid one kind for the other, the cut for the standing, the standing for the cut, the new for the old, nor the old for the new. ‘I have not forgotten’—i.e. to thank thee and to remember thy name thereby. ‘I have not eaten thereof in my mourning . . . I have not given thereof to the dead’—i.e. for coffins, shrouds, or mourners. ‘I have hearkened to the voice of the Lord my God’—i.e. have taken it to the chosen sanctuary. ‘I have done all that thou hast commanded me’—i.e. have

rejoiced and caused others to rejoice therewith, etc. (*Mishna*, *Maaser Sheni*, v. 10-13). In the two years of the septennial cycle, when the second tithe was converted into the poor tithe, there was no additional second tithe, inasmuch as the poor tithe took its place (Maimonides, *Iad Ha-Chezaka*, *Hilchoth Mathanuth Anjim*, vi. 4). The poor could go into a field where the poor tithe was lying and demand of the owner to satisfy their wants. The minimum quantity to be given to them was defined as follows:—If the tithe be of wheat,  $\frac{1}{4}$  cabus; barley, 1 cabus; spelt, 1 cabus; lenten-figs, 1 cabus; cake-figs, the weight of 25 sicli; wine,  $\frac{1}{4}$  log; oil,  $\frac{1}{4}$  log; rice,  $\frac{1}{4}$  cabus; olives, 1 pound; pulse, 3 cabi; nuts, 10 nuts; peaches, 5 peaches; pomegranates, 2; citrons, 1; and if of any other fruit, it shall not be less than may be sold for such a sum as will buy food sufficient for two meals. If the owner's means are slender, and the poor so numerous that he is unable to give to each the specified measure, he is to produce the whole tithe, and place it before them, so that they may divide it among themselves. The owner may only give one-half of the tithe to his own poor relatives, and the other he must distribute among the poor generally. If a man and woman apply together, the woman is to be satisfied first. No debts are allowed to be paid out of the poor tithe, nor a recompense to be made for benefits, nor captives redeemed, nor is it to be devoted to nuptial feasts or alms, nor is it to be taken out of Palestine into a foreign land (Maimonides, *ibid.* vi. 7-17). Though no tithes were paid in Palestine in the Sabbatical year, when all was in common [SABBATICAL YEAR], yet the land of Egypt, Ammon, and Moab had to pay them for the support of the poor of Israel, because the Sabbath of the soil was not observed in these countries, whilst the Babylonians had to pay the second tithe (*Mishna*, *Tadajim*, iv. 3; Maimonides, *Iad Ha-Chezaka*, *Hilchoth Mathanuth Anjim*, vi. 5).

3. *Origin and observance of the tithal law.*—The practice of paying tithes obtained among different nations from the remotest antiquity. Thus the ancient Phœnicians and the Carthaginians sent tithes annually to the Tyrian Hercules (Diodorus Siculus, xx. 14; Justin, xviii. 7); the southern Arabians could not dispose of their incense before paying a tenth thereof to the priests at Sabota, in honour of their god Sabis (Pliny, *Hist. Natur.* xii. 32); the ancient Pelasgians paid a tithe of the produce of the soil and the increase of their herds to their deities (Dionys. Halic. i. 19, 23, etc.). Whilst the Hellenes consecrated to their deities a tenth of their annual produce of the soil (Xenoph. *Anab.* v. 3, 9), of their business profits (Herod. iv. 152), of confiscated estates (Xenophon, *Hellen.* i. 7, 10), of their spoils (Herod. v. 77; ix. 81; Xenoph. *Anab.* v. 3, 4; *Hellen.* iv. 3, 21; Diod. xi. 33; Pausan. iii. 18, 5; v. 10, 4; x. 10, 1; τὰς δεκάτας τῶν περιγινόμενων τοῖς θεοῖς καθιερούειν; Harpocration, s.v. ‘δεκατέθειν’; and Knobel, *Comment. on Lev.* xxvii. 30). Indeed, the Bible itself tells us that Abraham paid a tithe to Melchizedek (Gen. xiv. 20; Heb. vii. 2, 6), and that Jacob vowed a tenth of his possessions to the Lord in case he should return home in safety (Gen. xxviii. 20-22). There can therefore be no doubt that, like many other Pentateuchal ordinances, the inspired legislator adopted the tithal law into the divine code because he found that, with some modifications,

this primarily voluntary tax was a proper stipend for the servants of the sanctuary, and that it would at the same time be a means of promoting pilgrimage to the national sanctuary on the great festivals, and social intercourse between the rich and the poor. During the monarchy, the payment of tithes was neglected, and it seems that the kings claimed them for themselves (1 Sam. viii. 14, 15, 17, with 1 Maccab. ii. 35). It was, however, re-established at the restoration of religion by the pious Hezekiah (2 Chron. xxxi. 5, 6, 12), and after the return of the Jews from the Babylonish captivity (Neh. x. 38; xii. 44; xiii. 5, 12), when material alterations and modifications were made in the tithal law, owing to the altered state of the commonwealth, and to the disproportion of the Levites and laymen. Only 341 or 360 Levites returned at first from the Babylonish captivity, with about 37,319 laymen, whilst with Ezra only 38 Levites came back, with 1496 laymen, and there can be but little doubt that the same disproportion continued among those who returned afterwards, as well as in the gradual and natural increase of the nation. There were thus 97 laymen to 1 Levite, whilst the tithe of 9 laymen amounted to as much as was left for each private family; and if we take 10 laymen to 1 Levite, as the latter had to pay a tenth to the priest, the tithe when duly paid by all the people yielded 10 times as much as the Levites required. On the other hand there were in Judæa after the return from Babylon a disproportionately large number of priests, since, exclusive of those who had no register (Ezra ii. 62), 4289 of them came with Zerubbabel—i.e. 12 or 13 times more than Levites—and two whole families, besides separate individuals, came with Ezra. These could not possibly have subsisted upon the *legal dues* (Neh. x. 36-39). In addition to the miserably provided priests there were the 612 *Nethinim* who came back with Zerubbabel and Ezra (Ezra ii. 58; viii. 20; Neh. vii. 60), for whom no provision whatever existed. Ezra had therefore to take the superabundant tithe from the Levites for the support of the priests and the *Nethinim*. Hence Josephus distinctly tells us that the priests received tithes in later times (*Vita*, 15; *Antiq.* xi. 5. 8; xx. 8. 8, 9. 2; *Contra Apion.* i. 22). It is this distribution of the Levitical tithe between the priests and the Levites which is evidently alluded to when the Talmud says that Ezra transferred the tithes from the Levites to the priests as a punishment for their tardiness in returning from exile (*Kethuboth*, 26 a; *Chulin*, 131 b; *Jebamoth*, 86 b; *Sota*, 47 b), for it could not possibly mean that he took the *whole* tithe away from the Levites, since it would be at variance with other records (comp. Ezra x. 38, 39; Neh. xiii. 10, 13; Tobit i. 7, with *Tosephtoth on Kethuboth*, 26 a), leave the Levites wholly unprovided for, and visit the good Levites who did return with the punishment deserved by those who remained behind. It is, moreover, owing to this distribution of the Levitical tithe effected by Ezra, that the tithe was afterwards divided into three portions, one of which was given by the owner to his friends the priests and Levites, the other was taken to the temple storehouse, and the third portion was distributed in Jerusalem among the poor and the needy *Chaberim* (חברים) = doctors of the law (*Jerusalem Sota*, ix. 11; *Jerusalem Maaser Sheni*, v. 15; *Babylon Jebamoth*, 86 b).

The board appointed to watch over the tithes,

as well as the storehouses (אוצרות, לשכות), which already existed in the time of Hezekiah for the reception of the tithes (2 Chron. xxxi. 11-14), were now better organised than ever. To achieve the purpose intended by Ezra in the new division of the tithe it was absolutely necessary that the collecting and the distribution thereof should take place under the careful superintendence of a body consisting of both priests and Levites. Such a board was therefore duly appointed, and it was ordained that at least one portion of the tithes should be taken to Jerusalem for the support of the ministering Levites.

During the period of sacerdotal degeneracy and Grecian ascendancy in Palestine, the tithes were again discontinued; but at the rise of the Pharisees the strict payment of a tenth was made one of the two essential conditions exacted from every individual who desired to become a *chaber* (חבר) = member of this association. The reason for this is given in the article PHARISEES in this Cyclopædia.

4. *Literature*.—*Mishna*, *Tractates Maaseroth*, *Maaser Sheni*, and *Bechoroth*, ix. 1-8; and the *Gemaras* on these *Mishnas*; Maimonides, *Iad Ha-Chesaka*, *Hilchoth Mathemus Anjim*, vi. 1-17; *Hilchoth Maaser*, and *Maaser Sheni*; Selden, *The History of Tithes*, 1618; Spencer, *De Legibus Hebræorum*, lib. iii. cap. x. vol. ii. p. 720, etc., Cantabrigiæ 1727; Michaelis, *Commentaries on the Laws of Moses*, article cxcii. vol. iii. p. 141, etc., E. T., London 1814; Herzfeld, *Geschichte des Volkes Israel*, i. 62 ff, 138 ff., Nordhausen 1855.—C. D. G.

TITTMANN, JOH. AUG. HEINR., was born at Langensalza 1st August 1773. He studied at Wittenberg and Leipzig; and in 1796 became one of the theological professors in the latter of these universities. His writings are numerous, and belong to various departments of sacred science. The following only fall to be specified here: *Theolog. Encyklopædie* 1798; *De Synonymis N. T.* 1829, the second part of which was edited after his death by Becher, 1832; the whole, with some appended dissertations, translated into English by E. Craig, 2 vols. of the Edin. Bib. Cabinet 1833-37; and his edition of the Greek N. T., 'ad fidem optimorum librorum recens,' 1820, 1824. His polemical writings, in which he labours to reconcile theology with philosophy, and to defend evangelical truth against rationalism, are the most valuable productions of his pen. He died 30th December 1831.—W. L. A.

TITTMANN, KARL CHRIST., father of the preceding, was born at Grossbardau near Grimma 20th August 1744, and died at Dresden 6th December 1820. He was successively deacon at Langensalza, professor of theology, and provost, afterwards general superintendent at Wittenberg, and kirchenrath and superintendent at Dresden. He was a man of a cultured and elegant rather than powerful mind, and was deeply imbued with pious feeling and evangelical sentiment. These characteristics are apparent in his *Meletemata Sacra sive Comment. Exegetico-Crit. Dogmaticus in Evang. Joannis*, Lips. 1816, a work full of good thoughts, good sense, and genuine piety, but deficient in critical acumen and exegetical ability. It has been translated into English, and forms 2 vols. of the Edin. Bib. Cabinet. In his *Opuscula Theologica* 1803, are some dissertations of an exegetical charac-

ter. Perhaps his best work is his *Tractatus de Vestigiis Gnosticorum in N. T. frustra quesitis*, Lips. 1773.—W. L. A.

TITUS (*Títos*), a Christian teacher, and companion and fellow-labourer of St. Paul. He was of Greek origin, but was converted by the apostle, who therefore calls him his own son in the faith (Gal. ii. 3; Tit. i. 4). He was one of the persons sent by the church of Antioch to Jerusalem to consult the apostles, and it was not judged necessary that he should receive circumcision (Acts xv. 2; Gal. ii. 1). After a time we find him in company with St. Paul at Ephesus, whence he was sent to Corinth (2 Cor. xii. 18), where he was well received, discharged with discretion the task confided to him, and declined to suffer the church to defray his expenses (2 Cor. viii. 13, *seq.*; xii. 18). He then proceeded to Macedonia, and at Philippi rejoined his master, who had vainly been expecting him at Troas (2 Cor. vii. 6; ii. 12, 13). He was then employed by Paul in preparing the collection for the poor saints in Judæa, and, as an incident of this mission, became the bearer of the Second Epistle to the Corinthians (2 Cor. viii. 16, 17, 23). On a subsequent journey Titus was left by the apostle in Crete, to establish and regulate the churches in that island (Tit. i. 5), and he was still there when he received the epistle from St. Paul which bears his name (Tit. iii. 12). He is therein desired to join the apostle at Nicopolis; and it is presumed that he did so, and afterwards accompanied him in his last journey to Rome, whence he was sent into Dalmatia (2 Tim. iv. 10). Tradition states that Titus eventually returned to Crete, and died there at an advanced age.—J. K.

TITUS, EPISTLE TO. The genuineness of this epistle is attested by a large body of evidence, and seems never to have been questioned except by the heretic Marcion, and that upon the most frivolous grounds (Tertullian, *Adv. Marcion.* v. 21), until, in recent times, it was attacked by Eichhorn and De Wette. It is manifestly quoted by Clement of Rome (*Ep. ad Cor.* cap. 2); and it is referred to as the production of St. Paul by Irenæus (iii. 3. sec. 4); as part of the divine word by Theophilus (*Ad. Antol.* iii. sec. 14); as St. Paul's, by Clement of Alexandria (*Strom.* lib. i. p. 299, and in many other places); by Tertullian (*De Præser. Her.* c. 6); and by Origen, in many places (Lardner, *Works*, vol. ii. 8vo). The objections of the German critics are founded chiefly upon the difficulty of ascertaining the proper date of this epistle, and upon minute peculiarities in its style and sentiments. The latter class of objections is so much identical with those already considered in reference to the epistles to Timothy, that it is unnecessary to enter upon any examination of them here; in fact, none who have admitted the genuineness of the one have questioned that of the other, and *vice versa*. To the former the best reply will be furnished by ascertaining, if possible, when and where the epistle was written; but even should we fail in this, it would be strange were we to relinquish our conviction of the authenticity of an ancient writing, simply because, possessing very imperfect information as to many parts of the alleged author's history, we were unable to say with certainty when he was in circumstances to compose it.

It is evident from the epistle itself, that at the time it was written the writer had recently visited

Crete (ch. i. 5); that he was about to spend the winter in Nicopolis (ch. iii. 12); and that Apollos was about to visit Crete, on his way to some other place (ch. iii. 13). These points may serve, in some measure, if not as indices to the exact time when this epistle was written, at least as criteria by which to test the truth of any hypothesis that may be suggested on this subject.

We learn from the Acts of the Apostles that Paul visited Crete on his voyage to Rome (ch. xxvii. 7); but the shortness of his visit at that time, the circumstances under which it was made, and the improbability of his expecting to spend the ensuing winter at Nicopolis, place it out of the question to suppose that it was to this visit he refers in this epistle. As this is, however, the only visit recorded by Luke, in rejecting it we are forced to suppose another visit, and to find some period in the apostle's life when it was probable that such a visit was paid.

It has been suggested by Hug that the period referred to in Acts xviii. 18, 19, admits of our placing this visit to Crete within it. The apostle, at that time, was on his journey from Corinth to Palestine, but on some account or other landed at Ephesus. This leads to the suggestion that the apostle must either voluntarily have departed from the usual course in order to visit some place lying between Corinth and Ephesus; or that he must have been driven by stress of weather from the course he meant to pursue. In either case the probability of his visiting Crete at that time is strong. We find, from the mention made by Paul in this epistle of Apollos, that he, on his way from Ephesus to Corinth (Acts xviii. 24; xix. 1), was to touch at Crete; which renders it not improbable that it was customary for ships sailing between these two ports to call at Crete by the way; and Paul may have availed himself of this practice in order to visit Crete before going to Palestine. Or he may have sailed in a ship bound directly from Corinth to Palestine, and have been driven out of his course, shipwrecked on Crete, and obliged to sail thence to Ephesus as his only remaining method of getting to his original destination—a supposition which will not appear very improbable when we remember that St. Paul must have suffered several shipwrecks of which Luke gives no account (2 Cor. xi. 25, 26); and that his getting to Ephesus on his way from Corinth to Palestine is a fact for which, in some way or other, we are bound to account.

It was whilst staying on this occasion at Ephesus that Hug supposes Paul to have written this epistle. As confirmatory of this may be adduced the two other facts above referred to as mentioned in the epistle itself—viz. the visit of Apollos to Crete, and Paul's intention to winter at Nicopolis. From Acts xix. 1 we learn that during the time Apollos was residing at Corinth, whence he had gone from Ephesus, Paul was engaged in a tour through the upper coasts (viz. Phrygia and Galatia; comp. Acts xviii. 23), which ended in his return to Ephesus. This tour was commenced after the apostle had been at Jerusalem and Antioch (ch. xviii. 22). It appears, therefore, that Paul left Antioch much about the same time that Apollos reached Corinth. But Apollos went to Corinth from Ephesus, Paul went to Jerusalem from Ephesus. At this city, therefore, they must have met; and before leaving it St. Paul probably wrote this epistle,

and gave it to Apollos to deliver to Titus at Crete, on his way to Corinth.

Further, Paul went up to Jerusalem to keep the feast; after which he visited Antioch, and then travelled for some considerable time in Upper Asia. He, therefore, probably spent the winter somewhere in Asia Minor. Now there was a town named Nicopolis, between Antioch and Tarsus, near to which, if not through which, Paul must pass on his way from Antioch to Galatia (Strabo, lib. xiv. p. 465, ed. Casaubon, fol. 1587). May not this have been the very place referred to in Tit. iii. 12? In such a locality it was quite natural for Paul to desire to spend the winter; and as Titus was a native of Asia it would be well known to him, especially if he knew what route the apostle designed to pursue. All this supports the hypothesis that Paul wrote this epistle before leaving Ephesus to go to Syria.

Another circumstance in favour of this hypothesis is the close resemblance in sentiment and phraseology between this epistle and the First Epistle to Timothy. This resemblance is so close, and in some particulars so peculiar, that we are naturally led to conclude that both must have been written whilst the same leading ideas and forms of expression were occupying the apostle's mind. Now the First Epistle to Timothy was most probably written after Paul had left Ephesus the second time to go into Macedonia [TIMOTHY, EPISTLES TO]—that is, about two years and a half after the period when Hug supposes the Epistle to Titus to have been written. To some this may appear too long a time to justify any stress being laid upon the similarity of the two epistles in this question of their respective dates; but when it is remembered that during the interval Paul had been dealing at Ephesus with very much the same class of persons, to whom a great part of both epistles refer, and that both are addressed to persons holding the same peculiar office, the force of this objection will be weakened.

Such is Hug's hypothesis. To us it appears worthy of all respect. If it be rejected, we must either suppose some visit to Crete during the apostle's long subsequent residence at Ephesus (Acts xix. 8, 10; xxi. 31), or we must refer this epistle, with the Second Epistle to Timothy, to the interval between the first and a second imprisonment of St. Paul at Rome. This last opinion is adopted by Benson, Pearson, Paley, and others. If it be adopted, we must adopt along with it the hypothesis that the First Epistle to Timothy belongs to the same date; for the affinities of the two are such that we are constrained to believe they must have been written at nearly the same time. To this date, however, for the First Epistle to Timothy, we have seen there are grave objections. If Hug's hypothesis be not untenable, it must on this account claim the preference.

The task which Paul had committed to Titus, when he left him in Crete, was one of no small difficulty. The character of the people was unsteady, insincere, and quarrelsome; they were given to greediness, licentiousness, falsehood, and drunkenness, in no ordinary degree; and the Jews who had settled among them appear to have even gone beyond the natives in immorality. Among such a people it was no easy office which Titus had to sustain when commissioned to carry forward the work Paul had begun, and to set in order the affairs of the churches which had arisen there, especially

as heretical teachers had already crept in among them. Hence Paul addressed to him this epistle, the main design of which is to direct him how to discharge with success the duties to which he had been appointed. For this purpose the apostle dilates upon the qualifications of elders, and points out the vices from which such should be free (ch. i.) He then describes the virtues most becoming in aged persons, in the female sex, in the young, in servants, and in Christians generally (ch. ii.) From this he proceeds to enjoin obedience to civil rulers, moderation, gentleness, and the avoidance of all idle and unprofitable speculations (iii. 1-11). He then invites Titus to join him at Nicopolis, commends to him certain brethren who were about to visit Crete, and concludes with the apostolic benediction (ver. 12-15).

*Commentaries.*—Most of those who have written commentaries on the Epistles to Timothy have written also on that to Titus. The following works are on Titus alone: Taylor, *Commentary on the Epistle of St. Paul written to Titus*, Cambridge, 4to, 1612, fol. 1658; P. von Haven, *Commentatio Analyt. in Ep. Pauli ad Titum*, Hamb. 4to, 1742.—W. L. A.

TOB (טוב), Sept. *Tób*, a region or district beyond the Jordan into which Jephthah withdrew when expelled from Gilead (Judg. xi. 5). As the name occurs nowhere else, some doubt has arisen in determining its position. *Tob* signifies 'good,' and the Targum and Abarbanel render what we translate 'land of Tob' by 'good land;' while Kimchi and Ben Gerson look upon *Tob* as the name of the lord or owner of the land. It is, however, more usually regarded as the name of a city or country, and some conjecture it to be the same with Ish-tob, which was not far from the land of the Ammonites, seeing that they sent thither for assistance (2 Sam. x. 6). Jerome makes it a country, but says nothing of its situation. Junius places it on the border of Arabia Deserta; which is likely, if *Tob* be the same with the *Τούβιον* or *Τάβιον* of 1 Maccab. v. 13.—J. K.

TOBIAH, a base Samaritan, who, having raised himself from a state of slavery to be a trusted favourite of Sanballat, did his utmost to gratify his master by resisting the proceedings of Nehemiah in rebuilding the walls of Jerusalem. With an affectation of scorn, he, after the manner of Remus in the Roman legend, looked on the constructions of the now hopeful and thriving Jews, and contemptuously said: 'Even if a fox go up he will break down their stone wall' (Neh. iv. 3). This insult was the more disgraceful to Tobiah, because his own conduct quickly exposed the insincerity which lay at the bottom of it, for he took a prominent and active part with Sanballat in his unworthy courses against Nehemiah. In these treachery had its share; which Tobiah was enabled to carry on the more easily because he had allied himself with the chief men of Judah, having married the daughter of Shechaniah, the son of Arah, while his son Johanan had taken to wife the daughter of Meshullam, the son of Berechiah (Neh. vi. 17, *seq.*; comp. xiii. 4). These dishonest practices and the use of threats alike proved nugatory. Nehemiah, however, was obliged to leave Jerusalem. By this absence Tobiah profited, in order, with the aid of his relative Eliashib the priest, to get himself comfortably and splendidly

established in 'a great chamber in the house of God' (ch. xiii. 4). But his glory was short-lived. Nehemiah returned and caused him and his household-stuff to be ignominiously cast out of the temple. This is the last that we know of this member of that vile class who are ready and unscrupulous tools in the hands of their superiors for any dishonourable undertaking.—J. R. B.

TOBIAH B. ELIEZER flourished at Mayence circa A.D. 1107, and was a distinguished commentator of the Germano-French school of interpreters. In the midst of the first Crusade, and despite the extraordinary sufferings and deprivations to which he was subjected, together with his Jewish co-religionists, R. Tobiah devoted nearly twenty years of his life (1088-1108) to a commentary on the Pentateuch and the Five Megilloth—i.e. the Song of Songs, Ruth, Lamentations, Ecclesiastes, and Esther. This commentary, the proper title of which is *Lekach Tob* (לקח טוב)—in allusion to his name, as is evident from the quotations thereof by Ibn Ezra, Rashbam—but which is erroneously called פסקתא וזמרתא or פסקתא, consists both of excerpts from the ancient expository works, such as Siphra, Siphre, Tanchumia, etc. [MIDRASHI], and of an attempt at a grammatical explanation of the text. A portion of it, embracing the commentaries on Leviticus, Numbers, and Deuteronomy, was first published at Venice 1546. It has been republished with a Latin translation in Ugolino's *Thesaurus Antiquitatum Sac.*, vols. xv. and xvi., Venice 1766. Excerpts of the commentaries on the Five Megilloth have been published by the erudite and indefatigable scholar Adolph Jellinek, Leipzig 1855-1858. The whole MS. is in the Bodleian at Oxford, Cod. Uri. 124. Comp. Fürst, *Bibliotheca Judaica*, iii. 427.—C. D. G.

TOBIT, BOOK OF, one of the deutero-canonical books, detailing the wonderful dealings of God with a pious man of this name.

i. *Title of the Book.*—The book is called—i. βιβλος λεγειν Τωβιτ, from the words with which it begins, and which are an abbreviation of the superscription (Tobit i. 1, 2). ii. *Liber Tobiae*, or simply Τωβιτ, *Tobias*, because Tobit is the principal character in it. iii. *Tobit et Tobias*, because Tobias the son plays an equally important part in the narrative with Tobit the father; and iv. *Liber utriusque Tobiae*, because the Vulgate and the Hebrew Version, edited by Paul Fagius, denominate both the father and the son *Tobias*=טוביה.

2. *Design and contents of the Book.*—The design of this book is to show that God in his mysterious providence permits sore calamities to befall the most pious and God-fearing in the very act of, and apparently for, obeying his commandments, but that he at the same time exercises a special care over them in the midst of their sufferings, vouchsafes unto them a happy issue out of all their trials, and holds them up to the world at large as patterns of patience under tribulations, as such who have been deemed worthy of being tried and purified, and who have demonstrated that the effectual and fervent prayer of a 'righteous man availeth much.' The method adopted by the writer for working out this design will be seen from the following brief analysis of the contents of the book.

Tobit, a pious Jew of the tribe of Naphtali, was carried away with his wife Anna by Shalmaneser into captivity to Assyria, where he continued religiously to observe the law, though all his brethren departed from it (i. 1-12). Through the special favour of God he was made officer at court, and in this position he not only saved ten talents of silver, which he deposited with his countryman Gabael of Rages, in Media, but aided his poor brethren with money, and secretly performed the last rites to those of his co-religionists whom the king had put to death. For these acts of humanity he had to flee from Nineveh with his wife and his son Tobias, and his property was confiscated, but was allowed to return after the accession of Esarhaddon, through the intercession of his nephew Achiacharus (13-22), when he continued to walk in the ways of the Lord in spite of the taunts of his neighbours, who reminded him of the sufferings which his pious conduct had already drawn upon him (ii. 1-8). In the very act of thus fulfilling the law which necessitated his sleeping by the wall of his courtyard, 'sparrows muted warm dung into his eyes,' which blinded him, and he became dependent upon the earnings of his wife, who, like the wife of suffering Job, taunted him with the miserable issue of his pious deeds (9-14). Deeply grieved at it, he prayed to God to relieve him from his sufferings by death (iii. 1-6).

It so happened that on the self-same day his pious kinswoman Sara, the only daughter of Raguel in Ecbatane, also prayed for death as a release from her sufferings, because she was falsely accused of having strangled her seven husbands, whom the evil spirit Asmodeus [ASMODEUS] successively killed in the night of their marriage (7-15). God graciously heard their prayer and sent his angel Raphael to deliver the two sufferers from their sorrow (16, 17). Tobit, however, prepared himself for death as he had prayed, and before quitting this life he wished his son to obtain the ten talents of silver which he had deposited with Gabael. After charging him with the care of his mother, admonishing him sacredly to observe the commandments of the Lord (iv. 1-21), and giving him the order for the money, the angel Raphael, in the guise of a kinsman, Azarias, offered to accompany Tobias on his journey to Media just as they were in quest of a guide (v. 1-22). On their way, whilst sojourning at the river Tigris, Tobias, according to the command of his angel guide, caught a fish which had leaped out of the water, took out its heart, liver, and gall, wherewith he was told evil spirits could be controlled and blindness cured (vi. 1-8); the angel having told him that he would marry Sara and expel the demon (9-17). When they arrived at Ecbatane they were lodged in the house of Raguel, and Sara was given in marriage to Tobias, who, according to the instructions of Raphael, smoked the heart and liver of the fish and thereby drove Asmodeus 'to the utmost parts of Egypt,' where 'the angel bound him' (vii. 1-viii. 3), which called forth two beautiful prayers from Tobias and Raguel (4-17), and after which the wedding feast was kept (18-21). After Raphael had recovered the money from Gabael (ix. 1-6), and Raguel had given them half his goods as well as his parental blessing (x. 1-12), Tobias, accompanied by his wife, the angel, and the dog, returned home to Nineveh (xi. 1-4). Tobit, on hearing of the approach of his son, went out to meet him, and was

at once cured of his blindness by the application of the fish's gall to his eyes (5-19). When they offered handsomely to remunerate the guide, he admonished them to pray and give alms, told them that he was Raphael, and was sent to them in answer to prayer, and disappeared (xii. 1-22). Whereupon Tobit expresses his gratitude in a beautiful psalm (xiii. 1-18), lived for many years in the fear of the Lord (xiv. 1, 2), admonished his son before his death to go to Media, as Nineveh is to be overthrown according to the prophecy of Jonas the prophet, and to live in the fear and obedience of the Lord (3-11), which Tobias strictly obeyed after the death of Tobit, and he actually heard of the destruction of Nineveh (12-15).

3. *Historical and religious character of the Book.*—There are three theories about the historical character of this book. *a.* That it records *actual history*; *b.* That it is *pure fiction*; and *c.* That it is a *mixture of history and fiction*.

*a.* The opinion that this book records proper history was universally held by the Christian church up to the time of the Reformation, and has even since been maintained by Bishop Gray (*A Key to the O. T.* 620, etc., ed. 1857), Welte (*Einleitung*, 84, ff.), Scholz (*Einleitung*, ii. 594, ff.), and most Roman Catholic writers. In support of this opinion it is urged—*i.* The minute account which it gives of Tobit's tribe, his pedigree, place of birth, the time in which he lived, his family, his condition and employment, his captivity, poverty, blindness, recovery, age, death, and place of burial (i. 1, 13, 20, 21; ii. 10; xi. 13; xiv. 11-13); *ii.* The exactness of the historical remarks about the Assyrian kings (i. 2, 13, 15, 21), without deriving the names 'Eveḥšarpos (= Shalmaneser) and Σαχερδονός from the O. T., as well as the correctness of the geographical points (i. 14; ii. 21; iii. 7; vi. 1, 11); and *iii.* The impossibility of tracing the main features of the narrative to any O. T. prototype, and of explaining them on the hypothesis of fiction. The obscure place Thisbe is given as Tobit's place of birth (i. 2), and many minute particulars of his life are described which have in themselves nothing whatever to do with the plot, and which can only be accounted for on the reality of the events.

*b.* The opinion that it is a moral fiction was first thrown out by Luther (*Vorrede aufs Buch Tobia*—Bible, ed. 1534), and has since been maintained by Rainold (*Censur*. i. 726), J. A. Fabricius, Buddeus (*Hist. Eccl.* ii. 489), Paul Fagius, Eichhorn (*Einleitung*, 401, ff.), Bertholdt (*Einleitung*, v. 2477, ff.), De Wette (*Einleitung*, sec. 309), Gutmann (*Die Apokryphen*, 143), Ewald (*Geschichte d. V. J.* iv. 233, ff.), Fritzsche (*Kurzgef. exeget. Handb. z. d. Apokryphen*, ii. 14, ff.), Davidson (*The Text of the O. T. considered*, 1001), Vaihinger (*Herzog's Real-Encyclopædie*, s. v. 'Tobias'), Graetz (*Geschichte der Juden*, iv. 180, 2d ed. 1866), etc. In support of this opinion it is urged—*i.* The narrative is completely isolated, and though the events pretend to have occurred before and shortly after the fall of Nineveh (B.C. 606), no other document written at a later period refers to them. *ii.* The name Tobit does not occur in the O. T., and belongs to a later age. *iii.* The form, spirit, and tone of the narrative show that it belongs to a very late period. The doctrine of good and evil spirits (iii. 8; vi. 14; viii. 3; xii. 15); the ascription of human lusts to spiritual beings (vi. 14); the notion of the seven

presence-angels bringing the prayers of the pious before the divine throne (xii. 12, 15); the marriage instrument (בְּתוּבָה) and the legal benediction pronounced over the wedded pair (vii. 13, 14), are of post-Babylonian origin. And *iv.* The stories of the angel Raphael in a human form giving a false account of himself as being a kinsman of Tobit (v. 12), of Tobit becoming blind on both eyes by the falling of some dung of sparrows (ii. 10), and of the marvellous fish (vi. 2-5), are beyond all matter of fact.

*c.* The view that the narrative is based upon a real occurrence preserved by tradition, but poetically embellished to suit the spirit of the time in which it was written, is maintained by Arnald, Dereser, Ilgen, Keil, etc. This theory escapes the arguments urged by the defenders of the preceding two extreme views, and is in harmony with the other Deutero-canonical documents which, as has been shown elsewhere in this Cyclopædia, have always a certain amount of truth for a basis of the embellishments called forth by the peculiar circumstances of the time to convey a certain moral lesson [JUDITH]. Moreover, the fact that there are different recensions and embellishments of the story, and that the *Midrash Tanchuma* (Pericope, תנחומין [TANCHUMA; MIDRASH]) gives an independent version of it, shows that it was traditionally handed down from the time when the occurrence took place.

The religious character of the book is one of its most important and interesting features, inasmuch as it shows the phases of faith which obtained prior to the advent of Christ, and explains many points in the N. T. The doctrine of good and evil spirits is more fully developed than in the O. T. Seven angels are described as presenting the prayers of the saints before God (xii. 15 with Rev. i. 4; iv. 5; viii. 2). Carnal lusts are ascribed to the angelic beings (vi. 14 with Gen. vi. 2; Jude 6, 7). The greatest stress is laid on alms-giving (i. 16, 17; iv. 7-11), and the power of deliverance from death and expiation for sin are ascribed to it (xii. 9; xiv. 10 with Eccus. iii. 20; 1 Pet. iv. 8). The temple is 'consecrated and built for all ages' (i. 4; xiii. 8), and the feasts are an 'everlasting decree' (i. 8). No trace is to be found in it of the belief in a Messiah, in a future state of reward and punishment, or in the survival of the soul after the death of the body.

4. *Original language, versions, condition of the text, etc.*—The whole complexion of the book shows that it is of Palestinian origin, and there can be but little doubt that the languages in which the traditional story was first written down were Hebrew and Aramaic. Indeed St. Jerome tells us that he made his Latin version from the Aramaic in one day, with the assistance of a Jew, who being skilled in both Hebrew and Chaldean, dictated to him the import thereof in Hebrew ('Exigitis, ut librum Chaldaeorum sermone conscriptum ad Latinum styllum traham, librum utique Tobiae quem Hebraei de catalogo divinarum Scripturarum secantes huius Hagiographa [Apocrypha] memorant, manciparunt. Feci satis desiderio vestro, non tamen meo studio. . . . Et quia vicina est Chaldaeorum lingua sermoni Hebraico, utriusque linguae pertissimum loquacem reperiens unius diei laborem arripui, et quidquid illi mihi Hebraicis verbis expressit, hoc ego accito notario sermonibus Latinis exposui'—*Praef. in Tob.*) This is moreover corroborated by the fact that some of the inexplicable difficulties in the

Greek text can only be removed satisfactorily on the supposition of a Hebrew original. Thus ἐκχεον τοὺς ἄρτους σου ἐπὶ τὸν τάφον τῶν δικαίων (iv. 17), which has no sense, is manifestly a mistranslation of

שֶׁלַח לַחֲמוֹךְ בַּקָּרֶב הַצְדִּיקִים; the translator, by a transposition of the last two letters, having read

בִּקְרֶב instead of בַּקָּרֶב, and שֶׁלַח instead of שֶׁפַח, as is evident from the antithetical clause, 'and give it not to the wicked,' in harmony with the traditional

injunction להחזיק יד עוברי עברה *it is not lawful to strengthen the hands of the transgressor*. So also καὶ εὐλόγησε Τωβίας τὴν γυναῖκα αὐτοῦ (ix. 6), can only be accounted for on the supposition that it is a mistranslation of the Hebrew יוֹבֵרַךְ טוֹבִיָּה. The correct rendering of it requires that either Gabael should be taken as the subject—*i.e.* 'and he (*i.e.* Gabael) saluted Tobias with his wife'—or that both Tobias and his wife should be the subject—*i.e.* 'and Tobias and his wife saluted them,' *i.e.* the two comers, Azarias and the servant. Comp. also v. 11, 12, 18; vi. 9, and for the Hebraising style i. 1, 13; iii. 5; v. 14; xiv. 19; De Wette, *Einleitung*, sec. 310; Graetz, *Geschichte*, iv. 466, 2d ed.

There are extant different Greek, Latin, Syriac, and Hebrew texts of this book, differing more or less from one another in the details of the narrative. Besides the Greek text of the Sept. which was adopted into this version because it was that of the Greek Church, there is a recension, one fragment of which (i. 1-ii. 2), is contained in the Cod. Sinaiticus or Cod. Frid. Augustanus, ed. Tischendorf, Leipzig 1846, and another (cap. vi. 9-xiii.) in the three last MSS. (44, 106, 107), of Holmes and Parsons. Of Latin translations we have the ante-Hieronymian version, which was first published by Sabatier (*Bibliorum Sacrorum Latina versiones Antiquae*, 1743), from two MSS. of the 8th century, and which, according to the investigations of Fritzsche (p. 10, ff.), is mostly made from the recension of the Greek text, but partly (vi. 15-17; vii. 15-18; viii. 14-17; xii. 6-9; 11-22; xiii. 6-18), also from the common text, whilst cap. x. 1-xi. 19 is from a mixture of both texts. In this edition of the *Vetus Latina*, Sabatier also published in the form of notes and as various readings two other Codd., one being of the same age as the MSS. of the ante-Hieronymian version, belonging to the library of St. Germanus (No. 15), and concluding, cap. xiii. 12, with 'Explicit Tobī justus,' and the other belonging to the Vatican (No. 7). The text of the latter differs so materially from the other MSS. that it is regarded as an independent version though emanating from the same Greek source. It is less barbarous and more fluent in style, as well as more explicit in its renderings, and it is to be regretted that it has survived as a fragment, containing only i. 1-vi. 12 (*Bibl. Lat.* ii. 706). There also existed another Latin version, as is evident from the quotations of this book contained in the *Speculum* of Augustine, which Angelo Mai has published (*Spicilegium Romanorum*, ix. 21-23). As to the Vulgate Latin version, Jerome tells us that he made it in one day from the Syro-Chaldaic. It differs very materially from the Greek, and is evidently derived from a different form which this traditional story assumed in a different part of the country. The Syriac version is made from the two different recensions of the Greek; cap. i. 1-vii. 9,

being a translation of the common Greek text of the Sept., whilst vii. 10, etc., is from the above-named three MSS. (44, 106, 107) of Holmes and Parsons, according to the marginal annotations in Ussher's MS. There are four Hebrew versions of this book, the one first published in Constantinople 1517, then with a Latin translation by Paul Fagius, and adopted in Walton's *Polyglott*, vol. iv. London 1657. It is a free translation of the common Greek text, made by a learned Jew in the 12th century. The second is that first published with a Latin translation by Sebastian Munster, Basle 1542, then again in 1549, 1556, 1563, and has also been inserted in Walton's *Polyglott*. This Hebrew version is more in harmony with the *Vetus Latina*; and the author of it, who was a Jew, is supposed to have flourished in the 5th century. The third Hebrew version was made from the common Greek text by J. S. Fränkel, Leipzig 1830; and the fourth is by J. Siebenberger—it was published in Warsaw 1840, with a Judaio-German translation, a Hebrew commentary, and an elaborate Hebrew introduction.

As to the versions of the Reformation, Luther made his translation from the Vulgate; the Swiss-Zurich Bible (1531) is also from the Vulgate. Coverdale (1535) as usual followed the Zurich version [COVERDALE]; and he again was followed by Matthew's Bible (1537), Lord Cromwell's Bible (1539), Cranmer's Bible (1540), and the Bishops' Bible (1568). The Genevan version (1560) is the first made from the Greek, and our present A. V. (1611), as in most cases, followed the Genevan version, though this was interdicted by James I.

5. *Author and date.*—As cap. xii. 20 tells us that Raphael, before his disappearance, commanded Tobit and his son Tobias to record the events of their lives; and, moreover, since Tobit in the first three chapters speaks in the first person, whilst (cap. xiii.) his prayer is introduced by the statement καὶ Τωβὶτ ἔγραψε προσευχὴν εἰς ἀγαλλίαν καὶ εἶπεν; the church universal up to the time of the Reformation believed that Tobit himself wrote this book (*circa* 600 B.C.), as far as cap. xiv. ; that cap. xiv. 1-11 was written by his son Tobias; and that cap. xii. 12-15 was added by the editor of this document immediately after the death of Tobias. This opinion is shared by Bishop Gray, Prideaux, and others, who modify it by submitting that it was compiled from the memoirs of Tobit and Tobias; whilst Ilgen maintains that cap. i. 1-iii. 7; xiii. 1-8, was written by Tobit in Assyria, B.C. 689; cap. iii. 8-xii. 2-22; xiv. 1-15, was written in Palestine *circa* 280 B.C., and that from these two Hebrew documents the Chaldee version was made *circa* 120 B.C., which St. Jerome translated into Latin. Modern critics however conclude, from the whole complexion of the book, its angelology, theology, etc., that it is a post-Babylonian production, and that it was written by a Palestinian Jew. But these critics differ very materially about the precise date when the book was compiled, as will be seen from the following table:—

The Catholic Church—		} circa B. C. 689-600
Bishop Gray, Ilgen . . . . .		
Ewald . . . . .	. . . . .	350
Herzfeld . . . . .	. . . . .	300
Bertholdt . . . . .	. . . . .	250-200
Eichhorn . . . . .	. . . . .	A.D. 10
Fabricius . . . . .	. . . . .	100
Graetz . . . . .	. . . . .	130

But though internal evidence leaves it beyond the shadow of a doubt that the book was compiled after the Babylonian captivity, yet the arguments adduced by Graetz (*Geschichte*, iii. 466, 2d ed.) to prove that it was written after the destruction of the temple, and during the persecutions of Hadrian, are inconclusive. The reference to the destruction of the temple (xiii. 10, 16; xiv. 4) is designed to refer to what took place in the reign of Zedekiah, when Nebuchadnezzar took Jerusalem and burned the sanctuary (2 Kings xxv.) The anachronism involved in this reference is in perfect harmony with the anachronisms which are to be met with in the other deuterio-canonical books. The other remark of this learned historian—viz. that the bread of heathens (*ἄπρος τῶν ἔθνων* = פת נכרים), of which Tobit speaks (i. 10), was first interdicted shortly before the destruction of the temple by Titus—is based upon restricting the term *ἄπρος* to actual bread, whereas it signifies food generally, and this was prohibited long before the Christian era (comp. Dan. i. 5). Indeed the book is singularly devoid of the stringent Halachic expansions of the Mosaic enactments which obtained in later times, it contains no allusion whatever to the rewards in a future life, and has no reference to the party-strifes which were so rampant at the time of Christ, traces of which might naturally be expected in it if it had been written in or after the time of Christ. It is therefore most probable that the book was written circa 250-200 B.C.

6. *Canonicity and authority.*—Like the other deuterio-canonical books, Tobit was never included in the canon by the synagogue. This is established beyond the shadow of doubt, not only from the list of the Hebrew Scriptures given by the Jews themselves in the Talmud (*Baba Bathra*, 14); but from the oldest catalogues of the canon furnished by Christian fathers, such as Melito, Origen, etc. Indeed Origen distinctly states that neither Tobit nor Judith was ever received by the Jews as Sacred Scripture (Ἐβραῖοι τῷ Τωβίτι οὐ χρώσονται—*Ep. ad. Afric.* sec. 13). It was, however, different in the Greek church, where the text of the Sept. was received as canonical. Forming part of the contents of this version, Clement of Alexandria quotes Tobit iv. 15; xii. 8, as taken from ἡ γραφή, *Scripture* (*Strom.* ii. 23, sec. 139). But though Origen himself also quoted it as *Scripture*, yet in consequence of his remark that the Jews had it not in their canon, that it is ranked by Christians among such as were read to the catechumens, and that it contains a plainer and less elevated doctrine (*In Numb. Homil.* xx.), the Greek fathers put it among the Apocrypha, and classed it among those books which are 'to be read by beginners who are desirous to be instructed in the word of piety' (οὐ κανονιζόμενα μὲν τετυπωμένα δὲ παρὰ τῶν πατέρων ἀναγνώσκεσθαι τοῖς ἀρτι προσερχομένοις καὶ βουλομένοις κατηχεῖσθαι τὸν τῆς εὐσεβείας λόγον—Athanasius, *Ep. Fest.* ii. 39, ed. Colon.) This distinction, however, between *canonical* and *apocryphal* afterwards disappeared to a great extent in the Greek Church, as is seen from the fact that Bar-Hebraeus places Tobit among the sacred books in his *Nomocanon* of the Antiochian church (Mai, *Script. vet. nova collectio*, x. 53; comp. Fritzche, p. 18). In the Latin church Tobit was regarded with greater sacredness. Cyprian often quotes it as *Holy Writ* (*De Opere et Eleemosynis liber*). St. Hilary cites it to prove the intercession of angels (*In Ps.* cxxix.),

and tells us that some Christians added both Tobit and Judith to the other two-and-twenty canonical books to make up their canon of four-and-twenty books (*Prol. in Ps.*) St. Augustine includes it with the other Apocrypha of the Sept. among 'the books which the Christian church received' (*De Doctr. Christ.* ii. 8). Hence the third council of Carthage (A.D. 397), Innocent I. (A.D. 405), and the councils of Florence (1439) and Trent (1546), declared it canonical. Indeed, in the old Roman Missal and in the Missal of Sarum, there is a proper Mass of Raphael the archangel, and it is ordered in the prefatory rubric that the office be celebrated for pilgrims, travellers, sick persons, and demoniacs. This is followed by two short prayers, one addressed to God and the other to Raphael (comp. Arnald's *Dissertation on Asmodeus*). As to the Reformed Church, though Luther was the first who separated the deuterio-canonical from the canonical books, yet he entertained the highest opinion of the book of Tobit. 'If it is history,' says this great Reformer, 'it is fine holy history; but if fiction, it is indeed right beautiful, wholesome, profitable fiction, and play of an ingenious poet. . . . It is, therefore, profitable and good for us Christians to read this book as the production of an excellent Hebrew poet, who treats not on frivolous but solid matters' (*Vorrede aufs Buch Tobia*, in his translation of the Bible, ed. 1534). In the Anglican Church, the book of Tobit is looked upon with still greater favour—cap. iv. 7-16 is quoted in the *Homilies* as the counsel of the holy father Toby (*On Alms-deeds*, part i.); cap. iv. 10 is cited as a lesson taught by 'the Holy Ghost in Scripture' (*ibid.* part ii.); and cap. xii. 8 is adduced to show that the angel Raphael told Tobias that 'fasting used with prayer is of great efficacy' (*Of Fasting*, part ii.) Passages of Tobit are also incorporated in the liturgy. Cap. iv. 7-9 is among the passages used at the Offertory; cap. iii. 3, according to the Latin Vulgate, is introduced into the Litany; cap. vi. 17, according to the Vulgate, is alluded to in the preface to the marriage service; whilst in the prayer following immediately after the versicles and responses in the same service in the First Book of Prayer of Edward VI., the following sentence is used—'And as thou didst send the angel Raphael to Thobie and Sara, the daughter of Raguel, to their great comfort, so vouchsafe to send thy blessing upon these thy servants' (p. 131, Parker Society's ed.)

TOGARMAH (תוגרמא, תוגרמה, or in some codices transposed תרגומה) is the Hebrew name of Armenia, which in the Septuagint translation is called Θογαρμά, Θοργαμά, Θεργαμά, and

Θουργαβδά. According to Moses Chorenensis, the Armenians consider themselves to be descended from Gomer, through Torgom, and therefore they call themselves the *house of Torgom*. The sons of Gomer were Ashkenaz, Riphath, and Togarmah (Gen. x. 3; 1 Chron. i. 6). The name תוגרמה, for *Türk* and *Turkoman*, reminds us of תורמא.

Armenia was, according to Strabo (xi. 13. 9, p. 529), distinguished by the production of good horses (comp. Xenoph. *Anab.* iv. 5. 24; Herod. vii. 40). This account harmonises with the statement that the house of Togarmah traded in the fairs of Tyre in horses, and horsemen, and mules (Ezek. xxvii. 14). The situation of Togarmah was north of Palestine: 'Gomer and all his bands; the house of Togarmah of the north-quarters' (Ezek. xxxviii. 6). The countries of אררט and מני (Muvds), and also חוּל, were contiguous to Togarmah (Joseph. *Antiq.* i. 6. 1; compare the articles ARARAT, ARMENIA; see also Moses Chorenensis, *Historie Armen.* lib. iii. *Armen. edidit, lat. vert. notisque illustr.* W. et G. Whistonii, Lond. 1736; Heeren, *Ideen*, i. 1, 305; D. Michaelis, *Spicilegium Geographicum*, tom. i. 67-78; Klapproth's *Travels*, ii. 64).—C. H. F. B.

#### TOMB. [BURIAL.]

TONGUE (לָשׁוֹן; Sept. γλῶσσα, φωνή; Vulg. *lingua*, os) is used—1. *literally*, for the human tongue: 'Every one that lappeth the water with his tongue, as a dog lappeth' (Judg. vii. 5; Job xxvii. 4; Ps. xxxv. 28; xxxix. 1, 3; li. 14; lxi. 17; Prov. xv. 2; Zech. xiv. 12; Mark vii. 33, 35; Luke i. 64; xvi. 24; Rom. iii. 13; 1 Cor. xiv. 9; James i. 26; iii. 5, 6, 8; 1 Pet. iii. 10; Rev. xvi. 10; Eccclus. xvii. 6; Wisd. x. 21; 2 Maccab. vii. 4; for the tongue of the dog, Ps. lxxviii. 23; of the viper, Job xx. 16; of idols, Baruch vi. 8; the tongues of the seven brethren cut out, 2 Maccab. vii. 4, 10; comp. Prov. x. 20). Various explanations have been offered, why Gideon's three hundred followers should have been selected because they lapped water out of their hands, standing or perhaps moving onward, while they who stayed and 'bowed down to drink' were rejected. Josephus says, that the former thereby showed their timorousness and fear of being overtaken by the enemy, and that these poor-spirited men were chosen on purpose to illustrate the power of God in the victory (*Antiq.* v. 6. 3). On Mark vii. 33, 35, Dr. A. Clarke offers the interpretation, that it was the deaf and stammering man himself who put his own fingers into his ears to intimate his deafness; spat or emptied his mouth, that the Saviour might look at his tongue; touched his own tongue to intimate that he could not speak; looked up to heaven as imploring divine aid; and groaned to denote his distress under his affliction; and that our Saviour simply said 'Be opened' (*Commentary*). This explanation certainly clears the passage of some obscurities. James iii. 8, Dr. Macknight translates, 'But the tongue of men no one can subdue'—that is, the tongue of other men, for the apostle is exhorting the Christian to subdue his own (comp. ver. 13). He observes that Ecumenius read the passage interrogatively, as much as to say, Wild beasts, birds, serpents, marine animals, have been tamed by man, and can no man tame the tongue? 2. It is *personified*. 'Unto me every tongue shall swear'—that is, every man (Is. xlv. 23;

comp. Rom. xiv. 11; Phil. ii. 11; Is. liv. 17). The tongue is said to rejoice (Acts ii. 26); to meditate (Ps. lii. 2); to hate (Prov. xxvi. 28); to be bridled (James i. 26); to be tamed (James iii. 8; comp. Eccclus. xxviii. 18, etc.). It is apostrophised (Ps. cxx. 3). 3. It is used by *metonymy* for speech generally. 'Let us not love in tongue only' (1 John iii. 18; comp. γλῶσση φίλος, Theogn. lxxiii. 13; Job vi. 30; xv. 5; Prov. vi. 24); 'a soft tongue'—i.e. soothing language (xxv. 15). 'Accuse not a servant to his master, literally 'hurt not with thy tongue' (Prov. xxx. 10); 'the law of kindness is in her tongue'—i.e. speech (xxxi. 26; Is. iii. 8; l. 4; Wisd. i. 6). 4. For a *particular language* or dialect, spoken by any particular people. 'Every one after his tongue' (Gen. x. 5, 20, 31; Deut. xxviii. 49; Esth. i. 22; Dan. i. 4; John v. 2; Acts i. 19; ii. 4, 8, 11; xxvi. 14; 1 Cor. xii. 10; xiii. 1; xiv. 2; Rev. xvi. 16). 5. For the *people* speaking a language (Is. lxvi. 18; Dan. iii. 4, 7, etc.; Rev. v. 9; vii. 9; x. 11; xi. 9; xiv. 6; xvii. 15). 6. It is used *figuratively* for anything resembling a tongue in shape. Thus, 'a wedge of gold,' literally a 'tongue' (Josh. vii. 21, 24; γλῶσσα μίλα χρυσῆ; Vulg. *regula aurea*). The French still say *un lingot d'or*, 'a little tongue of gold,' whence, by corruption, our word 'ingot.' 'The bay that looketh southward,' literally 'tongue' (xv. 2; xviii. 19); 'a tongue of fire' (Is. v. 24; comp. Acts ii. 3; Is. xi. 15). 7. Some of the Hebrew *idioms, phrases*, etc., formed of this word are highly expressive. Thus, 'an evil speaker' (Ps. cxl. 11; לָשׁוֹן אִישׁ, literally 'a man of tongue'; comp. Eccclus. viii. 3, and see Eccles. x. 11, Hebrew or margin); 'a froward,' or rather 'false tongue' (Prov. x. 31; לָשׁוֹן תְּהַפּוּכֹת, 'a tongue of revolvings'); 'a wholesome tongue' (Prov. xv. 4; מְרַפֵּא

לָשׁוֹן, literally 'the healing of the tongue,' reconciliation, etc.; Sept. ταῖς γλῶσσαις, *lingua placabilis*); 'a backbiting tongue' (Prov. xxv. 23; סוֹתֵר, 'secret'; 'slow of speech' (Exod. iv. 10; כְּבֵד

לָשׁוֹן, literally 'heavy of tongue,' unfit to be an orator; βαρύνῃ γλῶσσος; contrast Eccclus. iv. 29); 'the tongue of the stammerer' (Is. xxiii. 4)—i.e. rude, illiterate (comp. xxxv. 6; on Is. xxviii. 11, see Lowth). In xxxiii. 19 it means a foreign language, which seems gibberish to those who do not understand it (comp. Ezek. iii. 5); 'the tongue of the learned' (Is. l. 4)—i.e. of the instructor. The lexicons will point out many other instances. 8. Some *metaphorical* expressions are highly significant. Thus, Hos. vii. 16, 'the rage of the tongue'—i.e. verbal abuse; 'strife of tongues' (Ps. xxxi. 20); 'scourge of the tongue' (Job v. 21 [EXECRATION]; comp. Eccclus. xxvi. 6; xxviii. 17); 'snare of the slanderous tongue' (li. 2); on the phrase 'strange tongue' (Is. xxviii. 11), see Lowth, notes on ver. 9-12, and afterwards the vivid rendering of the Vulg.; 'to slip with the tongue' (Eccclus. xx. 18; xxv. 8)—i.e. use inadvertent or unguarded speech; 'they bend their tongues, their bows, for lies' (Jer. ix. 3)—i.e. tell determined and malicious falsehoods; 'they sharpen their tongues' (Ps. cxl. 3)—i.e. prepare cutting speeches (comp. lvii. 4); 'to smoothe the tongue' (Jer. xxiii. 31), employ flattering language; 'to smite with the tongue' (Jer. xviii. 18)—i.e. to traduce—if it should not be rendered, 'on the tongue,' alluding to a punishment for false witness; 'to lie in wait with the tongue'

(Ecclus. v. 14) ; 'to stick out the tongue' (Is. lvii. 4)—*i.e.* to mock ; 'against any of the children of Israel shall not a dog move his tongue' (Exod. xi. 7)—*i.e.* none shall hurt them ; but both Sept. and Vulg. have, 'not a dog belonging to the children of Israel shall howl,' which, as opposed to the 'great cry' in Egypt over the firstborn, means, not one of the children of Israel shall have cause to wail (Josh. x. 21 ; Judith xi. 9). 'To hide under the tongue,' means, to have in the mouth, whether spoken of hidden wickedness (Job xx. 12 ; comp. Ps. x. 7), or delicious language (Cant. iv. 11) ; 'the word of God in the tongue,' denotes inspiration (2 Sam. xxiii. 2) ; 'to divide the tongues of the wicked,' is to raise up dissensions among them (Ps. lv. 9 ; comp. 2 Sam. xv. 34 ; xvii. 14. 15). 'The tongue cleaving to the palate,' signifies profound attention (Job xxix. 10), or excessive thirst (Lam. iv. 4 ; comp. xxii. 16) ; 'to cause the tongue to cleave to the palate,' is to inflict supernatural dumbness (Ezek. iii. 26 ; Ps. cxxxvii. 6). 9. Some beautiful *comparisons* occur. 'An evil tongue is a sharp sword' (Ps. lvii. 4) ; 'the tongue of the wise is health' (Prov. xii. 18) ; 'like choice silver' (x. 20)—*i.e.* his words are solid, valuable, sincere. 10. The *vices* of the tongue are specified in great variety ; flattery (Ps. v. 9 ; Prov. xxviii. 33 ; backbiting (Ps. xv. 3), literally, 'run about with the tongue' (Prov. xxviii. 23) ; deceit (Ps. l. 19) ; unrestrained speech (lxxiii. 9) ; lying (cix. 2) ; 'a lying tongue hateth those that are afflicted by it' (Prov. xxvi. 28) ; comp. Tac. (*Agg.* 42), *Proprium humani ingenii est, odisse, quem læseris*. 'They have taught their tongue to speak lies, and weary themselves to commit iniquity' (Jer. ix. 5)—words which beautifully illustrate the fact, that falsehood and vice are not natural, but are a restraint and compulsion upon nature : 'double-tongued' (1 Tim. iii. 8), *διδυμος*, saying one thing to this man and another to that (comp. Ecclus. v. 9, 14 ; xxviii. 13). The retribution of evil speakers brought on themselves (Ps. lxiv. 8). 11. The *virtuous* uses of the tongue are specified : 'keeping the tongue' (Ps. xxxiv. 13 ; 1 Pet. iii. 10 ; Prov. xxi. 23) ; 'ruling the tongue' (Ecclus. xix. 6 ; James i. 26) ; the origin of the right and wrong use of the tongue traced to the heart (Matt. xii. 34). 12. *Mistranslations* : as 'holding the tongue' ; the Hebrews had no such idiom (Ps. xxxix. 2 ; comp. the Bible and prayer-book version of Habak. i. 13). In Ezra iv. 7, 'the Syrian tongue,' literally, 'in Syriac' (Esth. vii. 4 ; Ecclus. xx. i. 7). Our mistranslation of Prov. xvi. 1, has misled many : 'The preparations of the heart in man, and the answer of the tongue, is from the Lord ;' literally, 'Of man are the dispositions of the heart, but a hearing of the tongue is of the Lord.'—J. F. D. [On the miraculous *gift of tongues*, see SPIRITUAL GIFTS.]

**TONGUES, CONFUSION OF.** The Biblical narrative of the Dispersion of Nations has been already examined [NATIONS, DISPERSION OF], with the exception of an important detail, the Confusion of Tongues, which has only been touched upon, its full discussion having been reserved for the present article. This subject is one that requires to be treated in such a manner as that information bearing on the narrative may be stated, before we attempt to discuss the general questions it suggests. The following order will meet this necessity :—The event ; the relation of the languages of the dis-

persed nations ; and the possibility of tracing all existing languages to one source. To inquire into the date of this part of Genesis would lead us into a long discussion : it may be sufficient to express an opinion that the indications of x. 12 perhaps (strangely ignored by most writers), and 18 certainly, seem to point to an age much before that of Moses.

1. *The event.*—The part of the narrative of the dispersion relating to the present subject thus commences : 'And the whole earth [or 'land,' אֶרֶץ] was of one language [or 'lip,' שָׁפָה], and of one speech [or 'words,' דְּבָרִים].' The journey and building of the tower is then related, and the divine determination to 'confound their language, that they may not understand one another's speech.' The scattering of the builders and discontinuance of the building of the city having been narrated, it is added :—'Therefore is the name of it called Babel ; because the Lord did there confound the language of all the earth ; and [or 'for'] from thence did the Lord scatter them abroad upon the face of all the earth' (xi. 1-9). The author of the *Genesis of the Earth*, etc., in accordance with the rendering 'for' instead of 'and,' which he proposes, suggests that 'the confusion was the consequence, not in any manner the cause, of the dispersion . . . ; designed to prevent the descendants of Noah from reuniting' (2d ed. p. 246). The ordinary explanation seems simpler, yet this one is by no means to be disregarded. It has also been supposed that the meaning is tropical, and that oneness of speech indicates agreement of policy, but this idea is not critically sound.

2. *The relation of the languages of the dispersed nations.*—The narrative of the dispersion and confusion immediately follows the list of Noah's descendants. It is therefore important to examine in the present place all the philological evidence of that list. Do the languages of the nations there indicated show traces of a common origin and also of a violent separation ? The philological data derived from the list have been already stated : we shall here briefly sum up the results then obtained. The languages which can be distinctly connected with the names of the list are of three classes—Barbaric, Iranian, and Semitic. To the first class belong the one identification of Hamites of Africa, and a possible second ; to the second class the only identifications of Japhethites ; to the third, those of two groups, the first comprising all the Canaanite nations, that is the Hamites of Palestine and Syria, and the second all the Shemite nations of which the language can be traced, ten in number, to which no doubt others might be reasonably added. It would seem at first sight that we have here three classes, corresponding to the descendants of the three sons of Noah, but on further examination this conjecture must be abandoned. Its stability depends upon a satisfactory reason for the adoption by the Canaanites of Semitic languages, but there is no evidence that they were preceded by Shemites, and therefore it appears that their own speech was Semitic and that they did not adopt it from Semitic predecessors. Let us look a little further at the connection of these languages. The Semitic languages are all closely allied, and even their remote branches have not to this time lost the strong characteristics that make all rather like dialects of one language

than distinct languages sprung from a single marked stock. The occurrence of these languages among Hamite nations is therefore very significant. The Iranian languages, on the other hand, have only been traced to a common origin by the researches of acute philologists. They form a not less marked family, but one in the remoter members of which the family likeness is far less readily discerned. The only Barbaric language traced with certainty, the Egyptian, is extremely peculiar, as it connects its class with the Semitic by the presence of strong Semitic elements. It has a monosyllabic Barbaric vocabulary, with an amalgamate Semitic grammar. The connection of the Semitic and Iranian languages, though not yet convincingly proved, is a problem that the best comparative philologists consider merely to require a certain amount of laborious examination. The connection of the Semitic family and the Egyptian language is established. The former connection is expected to prove common origin, the latter has been asserted to do so by some but denied by others. This question is of so much importance that it will be well here to state the main data for its solution. Egyptian is either a bridge between the Semitic family and the Barbaric class, or it is a trench separating them. The main characteristics of the language, equally found in the oldest form written in hieroglyphics and hieratic, in the later dialect of the demotic papyri and inscriptions, and in the Coptic language, may be briefly laid down. The roots are all monosyllabic. In the whole of the Egyptian vocabulary there are very few words which are not obviously monosyllabic roots, or derivatives readily reducible to such roots. In Coptic there is a departure from monosyllabism, but it is so obvious that it should occasion no difficulty. An intelligent student, if he examine Peyron's excellent Lexicon, which is arranged not alphabetically but under the roots, will at once see that Coptic is essentially monosyllabic. Egyptian monosyllabism is either biliteral or triliteral, the more common form being probably biliteral. The Egyptian formative syllables and formative words are immediately recognised as strikingly similar to the Semitic. The personal pronouns in their separate and enclitic forms, and the latter as used for the purpose of inflecting verbs and adding the possessive idea to nouns, are almost identical—facts now universally admitted. The most common form of the substantive verb is the same as the Hebrew. The prepositions and adverbs are important as possessing the forms, and in their use as nouns the significations, of the primitive nouns from which they originated, thus warning us not to place the earliest-known Egyptian very far from the first condition of the language; an important matter in the present inquiry, as it is repugnant to any theory that would place a Semitic language as the parent of Egyptian. The derivatives are framed in many different ways, and have not yet been proved to follow any fixed system. There is one very common form of the verb with *s* prefixed, which has a causative sense; there is a reduplicated form with a frequentative or augmentative sense; and traces of three other forms, respectively with *t*, *h*, and *n* prefixed. These forms are all Semitic; the first corresponds to the causative conjugation *Shaphel*, known in but one instance in Hebrew, but frequent in Syriac; the second to the frequentative *Pilpel*, and the kindred in form and use, *Pealal*; the third perhaps to

*Tipheh*; the fourth to *Hiphil-Hophal*; the fifth to *Niphal*: though the correspondence of sense is not yet certain in the last three cases, and the correspondence of form in the case of the *Tipheh* conjugation may be accidental. The compounds are mere agglutinations of two words, never more, as *HAS-SBA* 'a flute-player,' from *HAS* 'to play,' and *SBA* 'a flute.' The amalgamate stage of compounds is never reached.

The distinction of the non-Semitic and Semitic elements of the Egyptian language may probably be carried further. The different character of the radical and formative elements suggests that the former are due to a barbarous original, and the latter to a civilised later race. We might therefore expect to find among the roots traces of Semitism wherever the level was above that of a barbarous nation. The late Baron Bunsen has given a list of Egyptian roots corresponding to Semitic. In this list we find the following to be the only identifications that can be considered satisfactory or probable:—

- |   |            |
|---|------------|
| 1. <i>bah</i> , to swell, to overflow . . .                 | בעה        |
| 2. <i>hat</i> , to frighten . . .                           | חתת        |
| 3. <i>heben</i> , ebony, honey . . .                        | הבני       |
| 4. ? <i>hbs</i> , to clothe . . .                           | לבש        |
| 5. ? <i>hrs</i> , stool; <i>hes</i> , in name of Isis . . . | כסא        |
| 6. ? <i>kam</i> , black . . .                               | חכם        |
| 7. ? <i>kar</i> , to fight, deceive, circle . . .           | גלל, כפר   |
| 8. <i>man</i> , ell . . .                                   | אמה        |
| 9. <i>mak</i> , to rule . . .                               | מלך        |
| 10. <i>mna</i> , nurse . . .                                | אמן        |
| 11. <i>mrh</i> , salt . . .                                 | מלח        |
| 12. <i>nfr</i> , good . . .                                 | nablum נבל |
| 13. ? <i>nif</i> , breath . . .                             | נוף        |
| 14. <i>ptah</i> , to open . . .                             | פתח        |
| 15. ? <i>ran</i> , to please . . .                          | רנן        |
| 16. ? <i>sak</i> (= <i>sk</i> ), to bind, subdue . . .      | שכב        |
| 17. ? <i>sft</i> , to slay . . .                            | שחת        |
| 18. ? <i>sna</i> , elbow, knee, sisters . . .               | שנים       |
| 19. <i>spt</i> , lip . . .                                  | שפה        |
| 20. <i>ss-mut</i> , mare . . .                              | כוס        |
| 21. <i>sxb</i> , to strike oxen . . .                       | skab Aram. |
| 22. <i>ibh</i> , measure, weight, signet-ring . . .         | טבע        |
| 23. <i>tha</i> , to plunder, to be drunk . . .              | חנה        |

(comp. *Egypt's Place*, vol. iv. pp. 133, 134).

Obviously this list is not sufficiently large for us to form an induction. Some probable inferences may, however, be drawn from it. Classing the Egyptian words as civilised and barbarous, those that may be of the latter class are 1, 2, 3, 4, 6, 7, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 23. Of these, however, 3, 11, 20, are words that would be borrowed by neighbours, or taken from neighbours, as names of objects of trade. 20, the horse was introduced into Egypt probably between B.C. 1500 and 1800. 10 is an onomatopoeic word, if onomatopœia is to be at all admitted. It is contrary to sound philology to admit 4, 13, 14, 15, 16, 17, 18, for either the form

or sense is not sufficiently near. There remain, therefore, 1, 2, 6, 7, 9, 10, 19, 21, 23, which must be carefully examined:—1. *bah*, to swell, to overflow. 2. *hat*, to frighten; there is another root (*hr*) with the same sense. 6. *kam*, black; if *kam* be black in the sense of darkness there are other wholly different roots with the same or a similar sense. 7. *kar*, to fight, is a like case. So 9. *mah*, to rule; and 14. *plah*, to open. 19. *spt*, seems distinctly an instance of exact correspondence. It is, however, remarkable that in Coptic two words are found with the sense 'lip'; this one  $\epsilon\pi\omicron\tau\omicron\upsilon$

( $\epsilon\phi\omicron\tau\omicron\upsilon$ ) and  $\epsilon\pi\rho\omicron$  ( $\chi\epsilon\pi\rho\omicron$ ); the latter suggests a compound word from  $\rho\omicron$  ( $\rho\omega$ ),

the mouth, Eg. *ra*. 21, if, as originally supposed by Bunsen, of the *s*-conjugation, is not to be compared to the Aramaic *skab*. 23. *tha*, in its sense 'to plunder,' can be replaced by a different root; in its sense 'to be drunk,' it cannot be considered a barbarous word. It is thus evident that the original identity of any part of the radical element of Egyptian with Semitic rests upon a very slender basis until better evidence is brought forward. In saying this, however, we do not mean to deny the identity of some of these Egyptian roots with Semitic; the question is one of original identity. We shall recur to these and like roots in endeavouring to determine whether Egyptian be the earlier stage of Semitic: whether they can possibly mark the transition from Egyptian to Semitic, *conceding the possibility that they are of Egyptian origin*.

It is important to notice that there are two statements in later places of the book of Genesis that bear upon the languages of the dispersed nations. Laban and Jacob called the pile of witness differently, the former giving it the Aramaic name Jegar-sahadutha, the latter the Hebrew, Gal-ed (xxxii. 47). The almost irresistible inference from this is that the descendants of Abraham in Canaan spoke the language of the country. In Egypt Joseph spoke with his brethren through an interpreter, and they supposed that their speech together in Hebrew was not understood by him (xlii. 23). These facts show that the early existence of distinct Semitic dialects, or even languages, and the radical difference of Hebrew and Egyptian, were well known to the writer or writers of these portions of Genesis.

The results of the inquiry thus far may be briefly stated. The languages that we can assign to the nations of the dispersion are of three groups, Barbaric, Iranian, and Semitic. The Barbaric class belongs to Hamites in Africa, not to Hamites in Asia. The Iranian and Semitic families may probably be connected and traced to a common source; the single example of Barbaric is certainly connected with Semitic, but appears also to contain a well defined non-Semitic element. The last subject, the relation of Egyptian and Semitic, will be further discussed in the examination of the next question. It seems evident that the condition of languages after the dispersion cannot on any probable theory be supposed to have been one in which the various languages differed more than do the branches of the Semitic family. As the Hamites in Palestine and the Shemites in Syria both used Semitic forms of speech, we thus obtain what may be fairly considered a measure of difference. As to the character of the separation, whether it

were violent or not, the philological evidence is as yet uncertain. The narrative appears to state the former, which certainly seems to have been the character of the dispersion.

3. *The possibility of tracing all existing languages to one source*.—The first step towards the solution of this problem is an accurate classification of languages. Languages may be classified according to what it is convenient to call their degree of development, or according to their relations. The former method gives us the following result:—

1. Monosyllabic.
2. Agglutinate.
3. Amalgamate.

The first class comprises the primitive Chinese, and probably the originals of several of the second. Of the second class, the Nigritian and Turanian, using the latter term in the restricted sense to be soon mentioned, are instances. To the third class belong the great Semitic and Iranian families. Although it is perfectly evident that the monosyllabic and agglutinate classes belong to barbarism or semi-barbarous civilisation, and the amalgamate to high civilisation, this distinction may be illusory as bearing upon the supposed development of language, for the difference of race is far more distinct than that of civilisation. The speakers of Nigritian sometimes approach, and those of Turanian often far surpass, the civilisation in which nations speaking pure Iranian languages have remained for centuries.

The classification according to relations is now usually held to divide languages into three great groups—Semitic, Iranian, and Turanian. The relation of the Semitic and Iranian languages is unquestionable, that of the so-called Turanian is far less clearly established. The first and second groups are constructed by positive evidence, the third by negative. All that is not Semitic or Iranian is held to be Turanian, although the evidence of relation is very slender. Instead of the strong family likeness that is seen both in the general form and in the minute characteristics of every member of the Semitic group, and in the general form, though not as markedly in details, in every member of the more widely-spread Iranian group, the only point at which the discordant Turanian groups—the Turanian proper for instance, and the Malaic—are connected together so as to form a family, is in their common characteristic of agglutination. As reasonable would it be to hold the Semitic and Iranian to be a single family because their languages are unlike all others in being strictly amalgamate. We prefer, therefore, to range the families which Bunsen and Prof. Max Müller, with many other distinguished philologists, call Turanian under one great class, the Barbaric, reserving all opinion as to their relation.

Having thus established the existence of three great groups of languages—the Semitic, Iranian, and Barbaric—two families, and either a third, or, as we prefer to consider it, a class containing several families; it is possible to ask whether these groups grew up and lived side by side, or whether the seemingly less developed languages are really ancestors of those which have the aspect of the greatest development? The Egyptian language has been regarded as offering the means of solving this problem. It is found in remote antiquity, with characteristics partly Barbaric partly Semitic, seeming to some to bridge across the otherwise impassable chasm between those

different kingdoms of human speech. But it may be that, as on the confines of the solar system the radical difference we certainly find may be the beginning of another set of laws, so here in Egyptian we may see, not the suddenly arrested development of primæval Semitism, but the phenomenon of a mixed language existing on the boundary-line of Shemites and Nigritians, and so presenting a union of their linguistic peculiarities. The connection of Egyptian and Semitic must be thoroughly studied. Bunsen is no doubt right in unflinchingly facing the problem. The likeness of the two is far too marked not to indicate a step in the progress of development, if Semitic grew out of a monosyllabic stage. If we place primitive Chinese or any pure monosyllabic language at one end of the scale, and Hebrew at the other, we must give Egyptian an intermediate place; its Semitic machinery is too complete to be ignored.

The theory that Semitic had a monosyllabic stage has been studied and supported with much ingenuity, independently of the theory that it grew out of Egyptian. Semitic roots are mainly trilateral, of three principal letters besides vowels: many of these trilateral roots are, however, as now pointed, monosyllabic, and it is quite as reasonable, *prima facie*, to suppose that all may have been monosyllabic as that the latter are formed by a coalescence of vowel sounds and consonants. Those who hold that all languages must have gone through a long course of growth argue for the former theory. Fürst and Delitzsch, by a supposed philosophical law of language, derive all the Semitic trilateral roots from bilaterals with prefixes or suffixes, but they do not explain how these formations lost their power after their first use. Hupfeld supposes that the trilateral stage was developed from the biliteral. Dietrich and Boetticher hold that this process was analogous to that by which derivatives are formed from the trilateral roots, and this theory certainly has some strong internal evidence of correctness. But it may be a question whether these theories do not depend upon the strength of certain radicals and the weakness of others, rather than upon any fixed system of development. It is obvious, when we see how easily the weak letters, such as the gutturals, are eliminated, and how difficult it is to reduce a root consisting of three strong letters, that there may be a confusion in such theories between change and development; what is taken for development may be a mere euphonic change. The Hebrew *yasad*, 'he placed,' may be reasonably compared with the Sanskrit *sad*, our 'sit,' as the 'y' is a weak letter; but is this loss of such a letter, supposing the roots to be the same, enough to prove that the Hebrew form was originally without that letter?

But supposing, for the sake of argument, that the Semitic languages can be reduced to a primitive monosyllabism of biliteral roots, is this the same as Egyptian monosyllabism? Is Egyptian, in fact, an example of Semitic in a state of arrested development before it had reached the historical condition?

The Egyptian monosyllables are not always biliteral; and even if we consider the expressed vowels not to be equivalent (though they are essentially) to certain of the Hebrew gutturals, we have still trilateral roots of three consonants.

We have already remarked that there is but slender evidence of the original identity of any part of the radical element of Egyptian with Semitic,

the roots identical with Semitic ones being apparently borrowed, but in doing so we did not mean to deny the occurrence of identical roots in the two languages as known to us. Among these identical roots some are of two consonants and a vowel, others are trilaterals of three consonants. The following lists show examples of both classes, and they are unquestionably true Egyptian words, not those which were borrowed at the time of the Rameses family by Semiticising scribes. Here, therefore, we can put the theory of the growth of Semitic from Egyptian to the test.

I.				
<i>bah</i>	.	.	.	בַּהַ
<i>hat</i>	.	.	.	חַתַּ
<i>kam</i>	.	.	.	כַּמַּ
<i>kar</i>	.	.	.	כַּרַּ
<i>kna</i> , }	to bend		.	כְּנַעַ
<i>sna</i> , }			.	כְּנַעַ
<i>sab</i> , jackal	.	.	.	זַבַּ
<i>tha</i> , a chest	.	.	.	חַבַּ
<i>tha</i>	.	.	.	חַבַּ
II.				
<i>aru</i> , river	.	.	.	יַאֲרַ
<i>mrh</i>	.	.	.	מַרְחַ
<i>ptah</i>	.	.	.	פַּתַּח
<i>spt</i>	.	.	.	שַׁפַּח
<i>tth</i>	.	.	.	טַבַּח
<i>khtm</i> , to shut	.	.	.	חַתַּם

Some of the examples in the first list might seem to countenance the idea that the Hebrew trilateral roots were developed from biliteral; *hat*, *kam*, *kar* might seem to indicate that the corresponding Hebrew roots developed the third radical by repeating the sound. Unfortunately, however, for this theory we find *karr* in Egyptian in one of the senses of *kar*, and it is quite possible that there may be a triconsonantal form of the other two roots.

In the second list we find in *aru*, *mrh*, *ptah*, *spt*, *tth*, *khtm*, undoubted monosyllabic trilaterals, which present the same or corresponding radicals to those of the equivalent Hebrew roots, whereas, according to the theory of development, being monosyllables, they should have been biliterals. The cases of *ptah* and *khtm* are especially remarkable. Their relation to the Hebrew roots פַּתַּח, etc., and חַתַּם, is beyond question, for not only are they of corresponding radicals, but if the case of one could be a chance agreement it would be contrary to all criticism to imagine this of two words of like signification. The great antiquity of the first in Egyptian is also beyond question. Yet here, if anywhere, we should expect to find biliterals, were Egyptian an earlier stage of Semitic; for these two Hebrew roots seem especially to offer themselves to the operation of reduction. In פַּתַּח, the final letter is weak, and accordingly it is twice changed without a change of meaning in Hebrew itself (פַּתַּח, פַּתַּח, and פַּתַּח unused); so that Fürst unhesitatingly reduces it to a root פַּת, with a suffix ה. חַתַּם is still more easily reduced; it begins and ends with a weak letter, but the guttural was the most likely to be additional, and therefore Fürst

makes the root  $\text{קח}$ , with a prefix  $\text{ק}$ . Both these ingenious chemical operations become very doubtful when we find the words as monosyllables with all their radicals. This by the way however; our present object is to show that Egyptian monosyllabism is not the parent of Semitic trilateralism. The correspondences in Egyptian to Semitic do not indicate any earlier stage of Semitic than that in which we know it. Egyptian therefore is not the parent of Semitic. How then can we account for the occurrence of Semitic elements in this Barbaric language? We are now in a position to define the character and importance of this Semitic part of Egyptian. In the radical portion of the language it is traceable; but instead of our finding a multitude of ancestors of Semitic roots, we find a few roots either of the same generation or a little earlier, though not showing such an archaic type as Methusael and Methuselah. Whether the common roots are derived from one source, or are borrowed either from Hebrew by Egyptian, or the converse, cannot yet be determined. It may be of service to this inquiry to suggest that the roots common to Semitic and Iranian should be carefully compared with Egyptian. Should many such roots be found in Egyptian a step will be gained. We may instance  $\text{קח}$ , circa, *kar*;  $\text{מח}$ , Sansk. *math*, etc.;

mors (t) *mu*. But there are many Egyptian roots that may be common to Iranian and are not traceable in Semitic; *mr*, to love, amare; *mn*, to place, establish, *μένω*; *mt*, to hate, *μισος*. In the formative portion we are in many cases on Semitic ground. It would scarcely be incorrect to describe the Egyptian pronouns as Semitic; and the better we know this part of the language the fuller will be the evidence of its Semitic origin.

Two theories have been proposed for the explanation of this singular case, based respectively on the theories that all languages sprang from one, and the theory that they had two sources, one civilised the other barbarous. The former theory has been put forward by the late Baron Bunsen and supported by Prof. Max Müller, and the many learned men who are content with his view of comparative philology. We cannot do better than give Bunsen's views in his own words, from the last published volume of his *Egypt's Place*.

'Khamism [the Egyptian language in its pre-historical and historical state] stands in the same relation to West-Asiatic Semism that Turanism does to Arism [Iranism]; the former [in each case] is the western, the latter the eastern pole of the coinage of a language of concrete particles into a language consisting of parts of speech.'

'Khamism is the historical proof of the original unity of those two great languages of the world which took at a later period the form of Semitic and Arian; and therefore also of that of the language of those Turanians who lived on the borders of Iran, if not indeed of all the known languages of Asia and Europe, which are neither Semitic nor Arian.'

'Khamism is as different in kind from Semism as it is from Arism and Turanism.'

'A much vaster period must have intervened between the first western formation, the deposit of which we possess in Khamism, and the second, the Semitic of historical Asia, than is admitted by the ordinary rabbinical [not rabbinical technically so called] chronology.'

VOL. III.

+

'We must not exaggerate the time required. The secondary formation of Egypt runs contemporaneously by the side of the uninterrupted course of the linguistic formation which we possess in Chaldee (Babylonio-Assyrian), in Kanaanitish (Phœnician), in Hebrew and Arabic, as well as Ethiopian. We must therefore, in making our calculation, take into account this contemporaneous development. But the earlier stage of formation is separated by so vast an interval from the Semitic, that we find ourselves in a totally new world when we pass on from the examination of the Khamitic structure to that of the Semitic. In Egyptian the conscious organically creating mind begins, as it were, for the first time, and as if timidly trying its wings. The concrete meaning inherent still in all words is in direct opposition to the system of forms, and is distinguished by a rigid inflexibility. In the Semitic, on the contrary, the stem is already a root, the particle has become a part of speech, the noun and verb are distinct; the older forms have already become unintelligible, and are only under the command of mind in order to mark the relations of things to each other, and their own proper action' (*Egypt's Place*, iv. pp. 142-144).

It is to be regretted that we are still without the concluding volume of Bunsen's work, much of which, and especially the part which formed the basis of these arguments, was already composed at the author's death, for it is unsatisfactory to criticise results without having a statement of bases; yet it may be said without hesitation that only the Iranian side of the question will be aided by the publication of this long-delayed volume. The theory, as here stated, is that Egyptian and Turanism, here used in a sense little if at all wider than the application for which we have argued, are in the same position as ancestors of the more developed Semitic and Iranian. In the connection that Bunsen believed to exist between Egyptian and Arian (Iranian), he finds conclusive evidence of the unity of the two ancestors, Egyptian and Turanian, and the two descendants, Semitic and Arian, if not of the unity of all the languages of Asia and Europe. The difference between Egyptian and Semitic requires a vast period of time, elsewhere stated at at least 4000 years, from B.C. 14,000 to after B.C. 10,000. The whole theory of the growth of language will indeed be made clearer by an abstract of the chronological views from which we obtain these data.

Creation of man in Northern Asia, set at . . . . .	B.C. 20,000
Great disturbance in the globe, and Flood in the primitive country . . . . .	10,000
I. Formation of Sinism [primitive Chinese] . . . . .	20,000 to 15,000
II. Formation of Old Turanism . . . . .	15,000 to 12,000
III. Formation of Khamism Emigration to Egypt The Flood . . . . .	12,000 to 11,000 10,000
IV. 1. Formation of Semism. The Turanian kingdom (Nimrod) . . . . .	10,000 to 7250
V. 2. Formation of Iranism . . . . .	7250 to 4000
VI. 3. Chaldeeism in Babylonia . . . . .	4000

(*Egypt's Place*, iv. p. 480.)

Speculative as Bunsen was, it may be doubted whether any theory of the growth of all languages from one source would allow these vast periods to be greatly curtailed.

The answer to this theory may be thus briefly stated. The Egyptian language is not considered by the best Semitic scholars to stand in the relation here suggested to the Semitic group; it has yet to be proved that its radical element has strong Semitic affinities. If Egyptian migrated from Asia into Egypt, why are there no traces of its monosyllabic element in western Asia, of its Semitic element in Nigritia? in other words, why is a language of two elements found between languages on either hand consisting of one of these two, if it be the parent of one group and the sister of the other? To this difficulty we owe the supposition of an antediluvian emigration to Egypt, and a post-diluvian emigration from Egypt to Asia. Does not the demand for a vast period of time amount to a concession that there is no historical evidence of the supposed change, that without a new scale we cannot imagine the growth of pre-historical Chinese into pre-historical Egyptian, and of pre-historical Egyptian into pre-historical Semitic? If the contemporary records of Egyptian during the more than 3000 years of its vitality give us no ratio—and the like is the case with the contemporary records of Semitic during some 3500 years—is anything gained by the suggestion of vast cycles which bewilder the judgment by the popular fallacy of magnitude, to which Bunsen certainly would never have knowingly appealed for assistance?

The opposite view, which supposes two or more sources, has been more supported by negative than positive arguments. Among the former we may instance the conviction of Semitic scholars that the Semitic languages did not grow out of Egyptian, and the general belief among those who hold that language cannot have been developed from the rudest beginnings, that there must have been always a civilised stock, and the opinion of some of them that a barbarous stock may have been always contemporary with it. It is curious to observe how the theory of two sources of language is virtually conceded in Bunsen's tabular view. He can only unite the ancestors of Turanism and Khamism, which appear in his view in a kind of double relation, Turanism being the ancestor of Khamism, and yet the opposite pole of language, by the supposition of a still ruder primitive stock—Sinism—not far, if at all, removed from the inarticulate languages assigned to some of the lowest savage races. The theory of two sources has been very clearly stated in a work edited by the writer (*The Genesis of the Earth and of Man*, 2d ed., Williams and Norgate), from which the following statement is derived, which may be compared with Bunsen's view previously stated. There it is argued that the Semitic stock was in no way derived from a primæval language, though it may have received many so-called Turanian roots, and that Egyptian was from the first collateral to Semitic, and not, as Bunsen represents it, ante-historical Semitism (pp. 200, 201). The phenomena of Egyptian are explained as evidence, not of a condition of transition from so-called Turanian to Semitic, but of the mixture in Egypt of two languages, as of two races and two pagan religions, according to the view already given in this article.

If, however, we are to infer that the languages

of the dispersion cannot reasonably be supposed, as far as our present evidence takes us, to comprise the class to which Egyptian belongs; in other words, if we are unable with our present information to bring all languages within the limits which the 10th of Genesis would seem to fix; we must admit as a hypothetical consequence the possibility of a more than single origin of the human race. It is now very generally admitted by those who have studied this subject, that the difficulties the Biblical data bearing upon the origin of the races of man present, are rather doctrinal than historical. The idea of two races seems rather agreeable than the reverse to the narrative of Genesis, and many other passages in the Hebrew Scriptures. The strong argument of those who maintain the single origin is founded on the passages of St. Paul's Epistles, in which the apostle speaks of the entrance of sin into the world by Adam (Rom. v. 12), and contrasts Adam and Christ (1 Cor. xv. 21, 22). The force of these passages as proving that Adam was the federal head of mankind depends upon the definition of the doctrine of original sin. It is to be remarked that the tendency of theologians is gradually to desert the position of the fathers and the reformers, from an inability to reconcile with a strong sense of God's justice the idea that Adam's sin involved his whole posterity in the sense that these commentators assumed. A view which seems more consistent with the general tenor of Scripture is that which, while it acknowledges man to be born in sin, recognises his loss or gain of eternal life as, on his side, a matter of free-will. Manifestly a less stringent interpretation than that which has been usual in the case of these passages would lighten the difficulty that surrounds the question of another race than Adam's. It is not well in a work which is intended to represent the current views of scholars to insist upon any view not held by the majority; but the writer feels very strongly the importance of a candid consideration of the results of philological, ethnological, and historical inquiry, and is at the same time convinced that the view here touched upon affords the true solution of a question that has led many far away from the sacred records in which he thinks the problem does not appear without the means of solving it, as critics might have earlier agreed in seeing had not the strength of dogmatic theology and a praiseworthy sentiment of humanity combined to make them prejudice a controversy that is now transferred to the, alas! hostile court of scientific inquiry.

Those who have regarded this subject of the Confusion of Tongues rather from a metaphysical than a philological point of view, have indulged in curious speculations that we have here not ventured to consider. The possible essential unity of all languages has nothing to do with the subject, however interesting as a matter of inquiry. Nor is it a wise course in the present stage of the controversy to lay down precisely what the sacred historian 'meant' as to unity of language as connected with unity of race. It is better to labour to determine the exact sense of the words used before we endeavour, if indeed at any time this is right, to convert them into a philosophical system.—R. S. P.

TOOTH, TEETH (𐤔𐤕; Sept. *ὀδοὺς*, quasi *ἐδούς*, from *ἐδω*, 'to eat'; Vulg. *dens*, quasi edens, 'eating'). The Hebrew word is usually derived from *שׁנה*, 'to change' or 'repeat' because the

teeth are changed, or replaced by others. It occurs, first, with reference to the literal member itself in man, the loss of which, by violence, is specified by Moses, in illustration of his law concerning taliones, 'tooth for tooth' (Exod. xxi. 24). This outrage occurring between freemen (or between an Israelite and a foreigner, Lev. xxiv. 22) admitted, like other cases of maiming, most probably of a pecuniary compensation, and under private arrangement, unless the injured party proved exorbitant in his demand, when the case was referred to the judge, who seems addressed in Deut. xix. 21. The Targum of Jonathan renders the words, 'the price of a tooth for a tooth,' in Exod. xxi. 24; Lev. xxiv. 20; and Deut. xix. 21 (comp. Joseph. *Antiq.* iv. 8. 35, and the article PUNISHMENT in this work); but if a master inflicted this irreparable damage upon a servant—i.e. slave—of either sex, he was punished by the absolute loss of his slave's services (Exod. xxi. 27). The same law applied if the slave was a Gentile, notwithstanding the national glosses of the Jewish doctors (Selden, *De Jure Nat. et Gent.* iv. 1, p. 468). Our Lord's comment upon the law (Matt. v. 38), which was much abused in his time (Horne's *Introd.* vol. ii. p. 377, 6th ed.), prohibits no more than *retaliation* upon the *injurer* (τῷ πονηρῷ), not such a defence of our innocence as may consist in words, but *private revenge*, and especially with such a disposition as actuated the aggressor with impetuous rage or hatred. His exhortations relate rather to those injuries which cannot be redressed by the magistrate, or by course of law: these we should bear rather than resort to revenge (see Rosenmüller, Grotius, and Whitby, *in loc.*) Indeed the hermeneutics of our Lord's precepts in his sermon on the mount require much knowledge, care, and discrimination, in order to avoid a *prima facie* interpretation of them, which has often been given, at variance with his intention, subversive of the principles of natural justice, and productive of false ideas of Christian duty.

In Ps. iii. 7 we have שְׁנֵי לֶחֶי, for the human jaw-bone; for that of an ass, Judg. xv. 15-17, σιαγόνα, 'maxillam—i.e. mandibulam' (which becomes מַכְתָּשׁ in ver. 19, τὸν λάκκον τὸν ἐν τῇ σιαγόνῃ, 'molarem dentem in maxilla asini' [SAMSON]; and for that of leviathan, Job xl. 14, τὸ χεῖλος, *maxillam*. A 'broken (or rather 'bad,' רָעָה—that is, decayed—Vulg. *dens putridus*) tooth,' is referred to in Prov. xxv. 19 as furnishing an apt similitude of 'confidence in an unfaithful man in the time of trouble.' 'The teeth of beasts,' or rather 'tooth,' שֵׁן, is a phrase expressive of devastation by wild animals: thus, 'I will send the tooth of beasts upon them' (Deut. xxxii. 24), שֵׁן בְּהֵמָה, ὀδόντας θηρίων, *dentes bestiarum* (comp. 2 Kings xvii. 25). The word is sometimes metaphorically used for a sharp cliff or summit of a rock (Job xxxix. 28): thus, 'The eagle dwelleth and abideth upon the tooth of the rock,' עַל-שֵׁן-סֹלֶס, ἐπ' ἑξοχῇ πέτρας, *inaccessis rupibus*. So also (1 Sam. xiv. 4): 'a sharp rock on the one side and a sharp rock on the other side,' שֵׁן-סֹלֶס, ὀδοὺς πέτρας, *quasi in modum dentium scopuli*: these eminences were named Bozez and Seneh.

TEETH, שְׁנֵים, ὀδόντες, *dentes*, is found in the dual number only, referring to the two rows, yet used for the plural (1 Sam. ii. 13). The word

occurs first with reference to the literal organs in man (Gen. xlix. 12): 'His teeth shall be white with milk,' which the Sept. and Vulg. understand to mean 'whiteness greater than milk,' ἡ γάλα, *lacte candidiores* (Num. xi. 33; Prov. x. 26; Cant. iv. 3; vi. 6). Although שְׁנֵים is the general word for teeth, yet the Hebrews had a distinct term for the molares or jaw-teeth, especially of the larger animals; thus מַחְלָעוֹת, Job xxix. 17; Ps. lvii. 4; Prov. xxx. 14; Joel i. 6; and by transposition

מַלְחָעוֹת, Ps. lviii. 6, μῦλαι, *mole* and *molars*. The *apparent* teeth of the leviathan, *gyrus dentium*, are however called שְׁנֵים (Job xli. 14). Ivory, 'elephants' teeth,' 1 Kings x. 22, is simply שְׁנֵים; in Sept. *deest*; Vulg. *dentes elephantorum*; *dens* in Latin is sometimes so used. In 2 Chron. ix. 21 the word is שְׁנֵהֵם, ὀδόντες ἐλεφάντων, *edur*, where שֵׁן evidently denotes a tooth; but the signification of the latter part, הַבֵּים, is unknown, and Gesenius thinks that the form of the word may be so corrupted as to disguise its original meaning. May it not be of foreign origin, imported with the material from Ophir? [IVORY]. In other passages the reference to teeth is metaphorical; thus, 'a flesh-hook with three teeth,' that is, prongs (1 Sam. ii. 13) [HOOKS]. 'The teeth of lions' is a symbol of the cruelty and rapacity of the wicked (Job iv. 10). 'To take one's flesh into one's teeth,' signifies to gnaw it with anguish (Job xiii. 14; comp. Rev. xvi. 10). 'The skin of his teeth,' with which Job says he had 'escaped' in his affliction, is understood by the Vulgate, of the lips—'derelicta sunt tantummodo labia circa dentes meos'; but Gesenius understands it as a proverbial expression, meaning, I have scarcely a sound spot in my body. 'To smite upon the jaw-bone,' and 'to break the teeth,' mean to disgrace, and to disable (Ps. iii. 7; comp. Mic. vi. 13; 1 Kings xx. 35; Lam. iii. 30). The teeth of calumniators, etc., are compared to 'spears and arrows' (Ps. lvii. 4; comp. 1 Sam. xxiv. 9). To break the teeth of such persons means to disable them (Ps. lviii. 6). To escape the malice of enemies, is called an 'escape from their teeth' (Ps. cxiv. 6; Zech. ix. 7). Oppression is compared to 'jaw-teeth like swords, and grinders like knives' (Prov. xxx. 14). Beautiful teeth are compared to 'sheep newly shorn and washed,' in Cant. iv. 2; vi. 6; but the remaining part of the comparison, 'whereof every one beareth twins, and none is barren among them,' is much better rendered by Le Clerc, 'all of them twins, and none hath lost his fellow.' To 'break the teeth with gravel stones,' is a most hyperbolic metaphor for inflicting the harshest disappointment (Lam. iii. 16). 'Iron teeth' are the symbol of destructive power (Dan. vii. 7, 19). A nation having the teeth of lions, and the cheek-teeth of a great lion, denotes one which devours with irresistible force (Joel i. 6; comp. Eccles. xxi. 2; Rev. ix. 8). 'Prophets who bite with their teeth, and cry Peace,' are greedy and hypocritical prophets (Mic. iii. 5). 'To take away blood out of the mouth, and abominations from between the teeth,' means, to rescue the intended victims of cruelty (Zech. ix. 7). 'Cleanness of teeth,' is a periphrasis for hunger, famine (Amos iv. 6); Sept. γομφιασμόν ὀδόντων; Symmachus and Theodotion, καθαρισμὸν. *Gnashing of teeth* means properly grinding the teeth with rage or despair. The Hebrew word so rendered is חָרַק (Job xvi. 9; Lam. ii. 16; Ps. xxxv.

16; xxxvii. 12; cxii. 10); it is invariably rendered in the Sept. βρῦχω, and in the Vulg. infremo, fremo, frendo (see also Acts vii. 54; Eccclus. li. 2). In the N. T. it is said of the epileptic child (Mark ix. 18), τρίζει τοὺς ὀδόντας, *stridet dentibus*. The phrase, ὁ βρυγμὸς τῶν ὀδόντων, is in the Vulg. 'stridor dentium' (Matt. viii. 12; xiii. 42, 50; xxii. 13; xxiv. 51; xxv. 30; Luke xiii. 28). Suidas defines βρυγμός, τρισμός ὀδόντων. Galen. ὁ ἀπό τῶν ὀδόντων συγκρουομένων ψόφος. The phrase 'lest thou gnash thy teeth' (Eccclus. xxx. 10), is γομφιάσεις τοὺς ὀδόντας σου. 'To cast in the teeth,' is an old English phrase (for the Hebrew has no such idiom) signifying to *reproach*; thus 'the thieves who were crucified with Jesus cast the same in his teeth,' ὠλεδίζον αὐτόν (Matt. xxvii. 44); Vulg. *improperabant ei*; comp. also the Bible and Prayer Book version of Ps. xlii. 11. פִּיפִית, 'a sharp threshing instrument having teeth,' literally 'edges' (Is. xli. 15). The action of acids on the teeth is referred to in the proverb, 'the fathers have eaten sour grapes, and the children's teeth are set on edge' (Ezek. xviii. 2); ἐγομφίασαν, *obstupuerunt* (Prov. x. 26).—J. F. D.

TOPARCHY (τοπαρχία). This word is used in 1 Maccab. xi. 28 to describe the three subordinate governments of Aphœrema, Lydda, and Ramachem, which Josephus (*Antiq.* xiii. 4. 9) calls *νομοί*. Pliny (v. 14) mentions ten toparchies in Judæa, and so does Josephus (*Bell. Jud.* iii. 3. 5). The word τοπαρχης, *aga*, or *lord*, is used in the LXX. to represent מֶלֶךְ שָׂרָפָנִי, or *satrap*, Dan. iii. 3; פָּחָד, or 'captain,' 2 Kings xviii. 24; and פָּקִיד, or *overseer*, Gen. xli. 34.—F. W. F.

TOPAZ. [ΠΙΤΔΑΗ.]

TOPHET (תֹּפֶת; Sept. Ταφέθ; Vulg. *Topheth*), a place very near to Jerusalem, on the south-east, in the valley of the children of Hinnom, where the ancient Canaanites, and afterwards the apostate Israelites, made their children to pass through the fire to Moloch (comp. Ps. cvi. 38; Jer. vii. 31). It is first mentioned, in the order of time, by Isaiah, who alludes to it as deep and large, and having an abundance of fuel (ch. xxx. 33). He here evidently calls the place where Sennacherib's army was destroyed (B.C. 710) Tophet, by a metonymy; for it was probably overthrown at a greater distance from Jerusalem, and quite on the opposite side of it, since Nob is mentioned as the last station from which the king of Assyria should threaten Jerusalem (ch. x. 32), where the prophet seems to have given a very exact chorographical description of his march in order to attack the city (Lowth's Translation, Notes on xxx. 33). In the reformation of religion by king Josiah (B.C. 624), he caused Topheth to be defiled in order to suppress idolatry (2 Kings xxiii. 10). The means he adopted for this purpose are not specified, whether by throwing all manner of filth into it, as well as by overthrowing the altars, etc., as the Syriac and Arabic versions seem to understand it. The prophet Jeremiah was ordered by God to announce from this spot (ch. xix. 14) the approaching captivity, and the destruction, both by the siege of the city and by famine, of so many of the people, whose carcasses should be here buried, as that it should 'no more be called Tophet, nor the valley of the son of Hinnom, but the valley of slaughter' (ch. vii. 31, 32; xix. 6, 11-14). The

name of this place is generally derived from תֹּף, 'a drum,' because, it is said, the rites of Moloch were accompanied with the sound of that instrument; but, in the absence of any other evidence, this assertion must be considered a mere Rabbinical conjecture, derived from the etymon. Some, with more probability, derive the word from Chald. תוּף, 'to spit out,' or 'vomit,' hence תֹּפֶת, 'that which causes loathing or abhorrence' (comp. Job xvii. 16, Hebrew). Others derive it from the *fire-stove* (תֹּפֶת) in which the children were burnt to Moloch (2 Chron. xxviii. 3). The place might be called, even by the idolaters themselves, תֹּפֶת, 'the place of burning.' With regard to its locality, Jerome, on Jer. vii. 31, remarks: 'Tophet signifies that place which is watered by the streams of Siloam; it is pleasant and woody, affording horticultural pleasures.' Eusebius, in his *Onomasticon*, under the word 'Θαφέθ,' says: 'In the suburbs of Ailah is still shown the place so called, to which is adjacent the fuller's pool and the potter's field, or the parcel of ground Acheldamach.' For an account of the modern aspect of the place, see Kitto's *Physical History of Palestine* (pp. 122, 123). After the return from the captivity, the Jews resumed the ancient name for the whole valley—viz. the valley of Hinnom—called in our Lord's time by the Greek name Ge Hinnom, by corruption Γέεννα [GEHENNA]; and in order to perpetuate the disgrace of idolatry, they made it the common receptacle of the filth, etc., of the city, in which 'fires' were continually kept burning, to consume the carcasses of animals, executed criminals, etc., the unconsumed portions of which, as well as the offscourings in general, became the nidus of insects, whose larvæ, or 'worms,' revelled in the corruption. These circumstances furnished the most apt representation to the Jewish mind of future punishment (comp. Judith xvi. 17; Eccclus. vii. 17; see also

Chaldee Par. on Is. xxxiii. 14, where מוקדי עולם, 'everlasting burnings,' is rendered 'the Gehenna of everlasting fire'). Some writers, however, restrict our Lord's allusions to Gehenna (Matt. v. 22) entirely to temporal punishments. Thus, 'who-soever is *angry* with his brother without a cause'—i.e. captious, peevish, arbitrary, irascible—'shall be in danger of the judgment;' that is, by indulging such an unreasonable disposition shall be in danger of committing some act for which he shall be cited before ἡ κρίσις, 'the judgment,' an inferior court, consisting of seven presidents—taken before the magistrates for an assault, as we should say: 'and whosoever shall *say* to his brother Raca'—i.e. worthless, dissolute!—'shall be in danger of the council,' or Sanhedrim—shall render himself liable, by the indulgence of such a rancorous disposition, and by the use of such injurious language, to be called to trial for slander—cited before the spiritual court, as we should say, for defamation: 'but whosoever shall say, Moreh,' 'thou atheistic wretch!' ἔνοχος ἔσται εἰς τὴν γένεσιν τοῦ πυρός, will betray a likelihood of incurring capital punishment—come to the gallows, as we say—through violence of disposition, and of his body being cast into Gehenna, and exposed to its 'fire' and 'worm.' Our Lord's object in the use of these several figures is simply to *exemplify* the danger of unrestrained anger. So also his *illustration* of the evil of unrestrained concupiscence, etc. (Matt. v. 27-31), is to be understood. The prin-

ciple on which he reasons is no doubt applicable to future punishment; namely, that self-denial, at any cost, is preferable to the evils incurred by the neglect of it.—J. F. D.

TOR (תור, *ṭur*; *Turtur*) occurs in Gen. xv. 9; Lev. i. 14; v. 7, 11, etc.; Luke ii. 24.

The birds of this subgenus are invariably smaller than pigeons properly so called; they are mostly marked with a patch of peculiarly coloured scutellated feathers on the neck, or with a collar of black, and have often other markings on the smaller wing-coverts. The species *Columba Turtur*, with several varieties merely of colour, extends from the west of Europe through the north of Africa to the islands south of China. The turtle-dove of Pales-

506.

time is specifically the same; but there is also a second, we believe local: both migrate further south in winter, but return very early; when their cooing voice in the woods announces the spring. In the rites of the Hebrew law, full-grown or old turtle-doves might be offered in pairs, but only

גוזל (*gozal*) the young of pigeons not full grown. They were the usual offering of the poor, a circumstance, Bochart remarks, indicating the humble station of the Virgin Mary, since at her purification she offered a pair of turtle-doves instead of a lamb. This, however, was the usual practice on that and sundry other occasions: indeed, so constantly was either one or other species wanted, that dealers in doves and turtle-doves abounded within the precincts of the temple, and had an overseer appointed to superintend what concerned them.—C. H. S.

#### TORTOISE. [TSAB.]

TOWN. We use the term in its general signification, so as to embrace any assemblage of inhabited human dwellings of larger size than a hamlet or a village, the only way in which we can speak with correctness and advantage.

Towns are a natural result of the aggregative principle in human nature. Necessity led the early races of men to build their towns on lofty spots, where, with the aid of the natural advantages of the ground, they could easily protect themselves against beasts of prey and human foes. A town, and a stronghold or fort, would thus be originally identical. As population increased and agriculture spread, so some degree of security came, which permitted the inhabitants of the castle to diffuse themselves over the hill-side, and take up their abode in the valley, and by the side of the stream that lay nearest their acropolis; still the inhabitants kept at no great distance from the centre of strength, in order not to be deprived of its protection. The town, however, would thus be enlarged,

and as the necessity for self-defence still existed, so would the place soon be surrounded with walls. Thus would there be outer and inner bulwarks, and in some sort two species of community—the townspeople, who tilled the ground and carried on trade, and the soldiers, whose business it was to afford protection: these two, however, in the earliest stages of civilisation were one, the peasant and tradesman taking arms when the town was put in danger. How early towns were formed cannot be determined by any general principle: they were obviously a work of time. The primary tendency in population was to diffuse itself. Aggregation on particular spots would take place at a later period. When then Cain is said to have built a city (Gen. iv. 17), the first city (Enoch, so called after Cain's son), we have evidence which concurs with other intimations to show that it is only a partial history of the first ages that we possess in the records of the book of Genesis. In the time of the Patriarchs we find towns existing in Palestine which were originally surrounded with fortifications, so as to make them 'fenced cities.' In these dwelt the agricultural population, who by means of these places of strength defended themselves and their property from the nomad tribes of the neighbouring desert, who then, as they do now, lived by plunder. Nor were works of any great strength necessary. In Palestine at the present day, while walls are in most parts an indispensable protection, and agriculture can be advantageously prosecuted only so far as sheltered by a fortified town, erections of a very slight nature are found sufficient for the purpose, the rather because the most favourable localities offer themselves on all sides, owing to the natural inequality of the ground. The ensuing extract (*Travels in Egypt and the Holy Land*, etc., by Rev. S. Olin, New York 1843, vol. ii. 423, 424) throws light on the subject:—'Continuing our route over a well-wooded limestone ridge, we came in sight of a large village which occupied a hill directly before us, while farther to the right, and upon a still loftier summit, was a ruinous castle of great extent, and, from its commanding position, of very imposing appearance. The intervening region and that to the right of the castle, was undulating, fertile, and cultivated. We were nearly an hour in reaching the base of the isolated mount, which we passed to the right through a deep ravine that divides it from another lofty hill on the east, which is also surmounted with what appeared to be a ruined fortress. We passed round the acropolis to the north side, where we obtained a good view of this ancient stronghold. It embraces the entire summit of the mountain within a massive wall, which, as well as the several towers by which it was strengthened, is in a very dilapidated state. A little further west another summit is occupied by ruinous bulwarks and towers. The large village, called from the castle Tibinin, or Chibinin, lies in a valley between these two fortified hills. East of the principal works is another elevation surmounted with ruins, and farther in the same direction, beyond the narrow valley we had just traversed, is a fourth summit, the one I have already referred to as having ruins upon its top.' From this striking passage an illustration may be gathered of the force of our Lord's language when he describes his disciples as a city set on a hill, that cannot be hid (Matt. v. 14). Jesus has been thought to refer in this description to some par-

tical city, and the modern Safet has been fixed on and is still traditionally regarded as the place which he had in view. This town, now in a ruinous state—one of the four cities, Hebron, Tiberias, Jerusalem, Safet, regarded as especially holy—occupies the summit of the highest mountain in Galilee, and one of the highest in the Jewish territories. It is conspicuously seen from a great distance in all directions but the north. The town does not occupy the precise summit of the rounded mountain, but rather the sloping ground immediately below it, a military castle or citadel having been erected upon the highest point. The hilly position of towns sometimes caused the dwellings to be curiously placed relatively to each other. Thus, in Safet, the traveller, as he sits on his horse in the midst of the town, finds the smoke of a kitchen rise from the earth near him, and by a little survey ascertains that the smoke issues from the mouth of a chimney standing a few inches above the ground at his horse's feet; that he and his animal are in reality on the flat roof of a house; and that, as the hill-side is nearly perpendicular, the inhabitants have judged it the easiest mode of building to place the houses one upon another.

Of the ancient method of building in towns and cities we have no accurate knowledge, any farther than we may gather information from the ruins which still lie on the soil of Palestine. But these ruins can afford only general notions, as, though they are numerous, and show that the Land of Promise was thickly peopled and highly flourishing in its better days, the actual remains of ancient towns are to be ascribed to different and very distant periods of history. The crusades left many strongholds which are now in a state of dilapidation; but the crusades are of modern days compared with the times of the Saviour, which themselves are remote from the proper antiquity of the nation. The law of sameness, however, which prevails so rigidly in Eastern countries, gives us an assurance that a modern town in Palestine may be roughly taken as a type of its ancient predecessors.

At the gates of the town, which were frequented as the court of justice, the town's market, the rendezvous for loungers, newsmongers, pleasure-seekers, there were wide open places of greater or less dimensions, where on important occasions the entire population assembled for consultation or for action (Neh. viii. 1, 16; 2 Chron. xxxii. 6; 2 Sam. xxi. 12; Job xxix. 7; 2 Kings vii. 1). The streets were, it has been supposed, not so narrow as streets generally are in modern Oriental towns; [but this rests almost entirely on the use of the term רחוב *rehôb*, from רחב *rahab*, to be wide, for streets, and on this nothing can be built, because this term properly denotes an open space, and is applied to a street simply as open and free]. Their names were sometimes taken from the wares or goods that were sold in them: thus in Jer. xxxvii. 21, we read of 'the bakers' street.' The present bazaars seem to be a continuation of this ancient custom. The streets of Jerusalem at least were paved (Joseph. *Antiq.* xx. 9. 7); but the streets of most cities of Palestine would not need paving, in consequence of the rocky nature of the foundations on which they lay. Herod the Great laid an open road in Antioch with polished stone (Joseph. *Antiq.* xvi. 5. 3; comp. 1 Kings xx. 34). In regard to the earlier periods, we find only a notice to the

effect that Solomon caused the fore-court of the temple to be laid with flags. Besides paved streets, Jerusalem before the exile had an extensive system of watercourses or aqueducts, which seems to have been rendered necessary by the natural supply having been limited to one or two spots in the immediate vicinity. This subject has been handled by Robinson, and more fully by Olin (ii. 139, *seq.*: see Is. vii. 3; xxii. 9; 2 Kings xx. 20; Joseph. *Antiq.* xviii. 3. 2). Other cities were contented with the fountains whose existence had probably led to their formation at the first.

Palestine underwent constant changes in regard to its towns, from the earliest ages; one consequence of which is, that there are names of towns that belong exclusively to certain eras. The period of the Roman domination gave existence, as to structures of great splendour, so to many towns and fortified places. Galilee was especially rich in towns and villages, which, according to Josephus (*Vita*, sec. 45), amounted in all to the number of 204. The names of the Palestinian cities, for the most part, have meaning, reference being made to the nature of the locality, as Rama, Ain, Jericho, Bethlehem, Gibeon, Mizpah. Many are compounds formed with the aid of one of the following words, בית (house), עיר or קריה (city),

חצר (court), עמק (valley), אבל (a grass plot), באר (well), עין (fountain), כפר (hamlet). To distinguish cities that bore the same name, the name of the tribe was added. In 'the latter days,' especially under the Herods, it was the fashion to give to ancient towns new Greek names, as Diospolis, Neapolis, Sebaste, Cæsarea, Tiberias. Jerusalem, at a later period, was denominated Ælia Capitolina. These innovations indicated the slavish disposition of the age, and were tokens of the bondage in which the nation was held; as much

as the incorporation of the name בעל (Baal) at a much earlier era pointed out the Canaanitish origin of a place, and gave reason to think that it was originally addicted to idolatrous worship. The population of towns cannot now be ascertained with any degree of accuracy, for the materials are not only scanty and disconnected, but in a measure uncertain. Respecting the government of towns, we have no detailed information relating to the ante-exilian periods, though it was probably in the hands of the elders; and in Deut. xvi. 18 Moses commands, 'Judges (Hengstenberg translates the word 'scribe' or 'writer,' *Authentic des Pent.* i. 450) and officers shalt thou make thee in all thy gates, and they shall judge the people with just judgment.' In the post-exilian era magistrates occur under the name of Council (Joseph. *Vita*, sec. 14, 34, 61, 68), at whose head was a president or mayor (Joseph. *Vita*, sec. 27; *De Bell. Jud.* ii. 21. 3).—J. R. B.

TOWN-CLERK (γραμματεὺς, *scriba*). This word occurs only in the narrative of the popular commotion aroused at Ephesus by the inflammatory harangue of Demetrius the silversmith (Acts xix. 35). For the functions and authority of the γραμματεὺς in the Grecian critics, the ordinary works on classical antiquities may be consulted. The office at Ephesus, as in Asia generally after its subjugation by the Romans, appears to have been one of greater authority, and its holders to have occupied a higher and more public position than in

Greece. The title is found on several coins (see Wetstein, *N. T.* ii. 586; Akermann, *Numis. Illustrat.* p. 53), and in some inscriptions preserved by Boeckh, from which it appears that the *γραμματεὺς* was sometimes identical with the 'asiarch' for the time being. He would seem to have given his name to the year, like the 'Archon Eponymus' at Athens. 'No magistrate,' remarks Dr. Howson, 'was more before the public at Ephesus, no one more likely to be able to calm and disperse an angry and excited multitude.' His speech, to which the preservation of the apostle and his companions from personal violence, and perhaps death, was chiefly due, is a pattern of candid argument and judicious tact. Winer, *R. W. B. s.v.* 'Kanzler'; Greswell, *Dissertat.* iv. 152; Schwartz, *Dissertat. de γραμματεῦσι*; Van Dale, *Dissertat.* v. 425.—E. V.

TOWNSON, THOMAS, D.D., was born at Much Lees in Essex in 1715; was educated at Oxford, where he took his degree of M.A. in 1739; was ordained priest in 1742; became vicar of Hatfield Peverel in 1746, senior proctor of the University in 1749, and rector of Malpas in 1749, where the rest of his life was spent. In 1779 the degree of D.D. was conferred on him by the University of Oxford in recognition of his literary merits; in 1781 he was made Archdeacon of Richmond; and 1783 was offered the professorship of Divinity at Oxford, which he declined. He died 15th April 1792. His most important work is his *Discourses on the Four Gospels chiefly with regard to the peculiar Design of each, and the order and places in which they were written*, published in 1778, and which has passed through three editions; and his *Discourse on the Evangelical History from the Interment to the Resurrection of our Lord*, 1792. His collected works were issued in 2 vols. 8vo, Lond. 1810, edited by Ralph Churton, M.A.—W. L. A.

TRACHONITIS (Τραχωνίτις). The only mention of this place in the Scriptures is in describing the political divisions of Palestine at the time of John the Baptist's first public appearance:—'Philip was then tetrarch of Iturea and the region (χώρας) of Trachonitis' (Luke iii. 1). Although Trachonitis was a distinct and well-defined province, yet it appears that in this passage the phrase 'region of Trachonitis' is used in a wider sense, and included two or three other adjoining provinces. As considerable misapprehension has existed among geographers regarding Trachonitis, and as its exact position and boundaries were first clearly ascertained by the researches of the present writer, it may be well in this place to give a brief resumé of the ancient notices of the province, and then to show how they can be applied in setting aside modern errors and establishing correct views.

Josephus states that Uz the son of Aram founded Trachonitis and Damascus, which 'lay between Palestine and Coele Syria' (*Antiq.* i. 6. 4). From various other incidental remarks and descriptions in his writings, the position of Trachonitis in relation to the other Transjordanic provinces may be ascertained. It lay on the east of Gaulonitis, while it bordered on both Auranitis and Batanæa (*Bell. Jud.* iv. 1. 1; i. 20. 4). It extended farther north than Gaulonitis, reaching to the territory of Damascus (*Antiq.* xv. 10. 3, and 10. 1; *Bell. Jud.* iii. 10. 7). Ptolemy locates the Trachonite Arabs along the base of Mount Alsadamus, which he includes in the

province of Batanæa, of which Saccæa was a chief town (*Geogr.* v. 15). Strabo groups Damascus and Trachon together, and states that the latter country is rugged and wild, and the people daring robbers (*Geogr.* xvi. 11). Speaking of Kenath Jerome calls it a city of Trachonitis near Bozrah (*Onomast.* s. v. 'Canath'); and the writers of the Talmud extend Trachon as far as Bozrah (Lightfoot, *Opp.* ii. 473; cf. *Onomast.* s. v. 'Iturea'; Reland, *Pal.* pp. 109, seq.)

From these statements compared with the results of modern research the exact position and boundaries of this ancient province can be determined. It extended from the southern confines of Damascus, near the bank of the river Awaj (Pharpar), on the north, to Busrah (*Bostra* and *Bozrah*), on the south. Bozrah was the capital of Auranitis, and consequently that province lay along the southern end of Trachon. The province of Gaulanitis (now *Jaulân*) was its western boundary. Batanæa has been identified with Ard el-Bathanyeh, which embraces the whole ridge of Jebel Haurân, at whose western base lie the splendid ruins of Kenath, one of the ancient cities of Trachon (*Onomast.* s. v. 'Canath, Kenath'). Consequently the ridge of Jebel Haurân formed the eastern boundary of Trachon, which extended southward to Busrah in the plain, near the south-western extremity of the range (Porter, *Damascus*, ii. pp. 259, seq.; also in *Journal of Sac. Lit.* for July 1854). The region thus marked out embraces the modern district of *Lejah*, which may be considered the nucleus of Trachonitis; also the smooth plain extending from its northern border to the ranges of Khiyârah and Mânia. The rocky strip of land running along the western base of Jebel Haurân, and separating the mountain-range from the smooth expanse of Auranitis, was likewise included in Trachonitis. In the ruins of Musmeih on the northern edge of Lejah, Burckhardt discovered a Greek inscription which proves that that city was *Pheno* the ancient metropolis of Trachon (*Travels in Syria*, p. 117; see also *Preface*, p. xi.)

At first sight it might appear as if *Trachon*, or *Trachonitis* (Τραχών, or Τραχωνίτις), were only a Greek name applied to one of the subdivisions of the ancient kingdom of Bashan; yet there is evidence to show that it is a translation of a more ancient Shemitic appellation, descriptive of the physical nature of the region. Τραχών signifies rough and rugged; and Τραχωνίτις is 'a rugged region' (τραχὺς καὶ πετρώδης τόπος), and peculiarly applicable to the district under notice. The Hebrew equivalent is *Argob* (אַרְגֹּב, 'a heap of stones'; from אֶרֶב = רֶגֶב), which was the ancient name of an important part of Og's kingdom in Bashan. The identity of Trachon and Argob cannot now be questioned. It was admitted by the Jewish Rabbins, for the Targums read תְּרַחֲנָה (*Trachona*) instead of אַרְגֹּב (*Argob*) in Deut. iii. 14 and 1 Kings iv. 13 (Lightfoot, *Opp.* ii. p. 473); and it is confirmed by the fact that *Kenath*, one of the threescore great cities of Argob (1 Chron. ii. 23), was also, as has been seen, a city of Trachon. Eusebius, led doubtless by similarity of names, confounded Argob with the castle of *Erga* or *Ragaba*, near the confluence of the Jordan and Jabbok. In this he has been followed by Reland (*Pal.* p. 959, 201), Ritter (*Pal. and Syr.* ii. 1041), and even Robinson (*B. R. App.* p. 166, 1st ed. Nothing can be more clear however than that

Argob, a large province of Bashan containing sixty great cities, was quite distinct from Ragaba an obscure castle in Gilead (Porter, *Damascus*, ii. 271). Eusebius also confounded Trachonitis and Iturea (*Onomast.* s. v. 'Iturea'); a manifest error.

The province of *Lejah* (Arab. اللجاء, 'the Retreat') comprises the principal part of the Hebrew Argob and Greek Trachon. It is oval in form, about twenty-two miles long by fourteen wide. Its physical features are unparalleled in Western Asia. It is a plain; but its surface is elevated above the surrounding plain to an average height of 30 ft. or more. It is entirely composed of a thick stratum of black basalt, which appears to have been emitted from pores in the earth in a liquid state, and to have flowed out on every side until the surface of the plain was covered. Before completely cooling, it seems to have been agitated as by a tempest, and then rent and shattered by internal convulsions. The cup-like cavities from which the liquid mass was projected are still seen; and likewise the wavy surface a thick liquid generally assumes which cools while flowing. There are deep fissures and yawning gulfs with rugged broken edges; and there are jagged mounds that seem not to have been sufficiently heated to flow, but which were forced up by some mighty agency, and then rent and shattered to their centres. The rock is filled with air bubbles, and is almost as hard as iron. 'In the interior parts of the Lejah,' says Burckhardt, 'the rocks are in many places cleft asunder, so that the whole hill appears shivered and in the act of falling down; the layers are generally horizontal, from 6 to 8 ft. or more in thickness, sometimes covering the hills, and inclining to their curve, as appears from the fissures which traverse the rock from top to bottom' (*Travels in Syria*, p. 112).

It is worthy of note how minutely this description accords with that of Josephus, who says of the inhabitants of Trachon, that it was extremely difficult to conquer them or check their depredations, 'as they had neither towns nor fields, but dwelt in caves that served as a refuge both for themselves and their flocks. They had, besides, cisterns of water and well-stored granaries, and were thus able to remain long in obscurity and to defy their enemies. The doors of their caves are so narrow that but one man can enter at a time, while within they are incredibly large and spacious. The ground above is almost a plain, but it is covered with rugged rocks, and is difficult of access, except when a guide points out the paths. These paths do not run in a straight course, but have many windings and turns' (*Antiq.* xv. 10. 1).

The character of the inhabitants remains unchanged as the features of their country. They are wild lawless robbers, and they afford a ready asylum to murderers, rebels, and outlaws from every part of Syria. It seems to have been so in O. T. times; for when Absalom murdered his brother he fled to his mother's kindred in Geshur (a part of Trachon: GESHUR), 'and was there three years' (2 Sam. xv. 37, 38).

It is a remarkable fact that the great cities of Argob, famed at the time of the Exodus for their strength, exist still. The houses in many of them are perfect. The massive city walls are standing; and the streets, though long silent and deserted, are in some places complete as those of a modern

town. The city gates, and the doors and roofs of the houses, are all of stone, bearing the marks of the most remote antiquity. It is not too much to say that, in an antiquarian point of view, Trachon is one of the most interesting provinces in Palestine (Porter, *Bashan's Giant Cities*; Burckhardt, *Travels in Syria*; C. Graham, *Journal of R. G. S.*, vol. xxviii.; and *Camb. Essays*, 1858; Wetzstein, *Reisebericht über Hauran und die Trachonen*. Such as desire to compare with the above account the views previously set forth by geographers, may consult Lightfoot, *l. c.*; Reland, *Pal.* pp. 108, seq.; Cellarius, *Geogr. Ant.* ii. pp. 617, seq.)—J. L. P.

TRANCE (תְּרַחֲמָה; Sept. ἔκστασις, Vulg. *sopor*; Gen. ii. 21, etc.), a supernatural state of body and mind, the nature of which has been well conjectured by Doddridge, who defines it—'Such a rapture of mind as gives the person who falls into it a look of astonishment, and renders him insensible of the external objects around him, while in the meantime his imagination is agitated in an extraordinary manner with some striking scenes which pass before it and take up all the attention.' He refers to some extraordinary instances of this kind mentioned by Gualterius in his note on Acts x. 10 (*Family Expositor*, in loc. note g.) Stockius also describes it as 'A sacred ecstasy, or rapture of the mind out of itself, when the use of the external senses being suspended, God reveals something in a peculiar manner to prophets and apostles, who are then taken or transported out of themselves.' The same idea is intimated in the English word *trance*, from the Latin '*transitus*,' the state of being carried out of oneself. The Greek word, ἔκστασις, denotes the effect of any passion by which the thoughts are wholly absorbed. In the Sept. it corresponds to שְׂמֹחַ, 'a wonderful thing' (Jer. v. 30); and תְּמִימוֹן, 'astonishment' (Deut. xxviii. 28). In the N. T. it represents the absorbing effects of admiration (Mark v. 42; Luke v. 26; Acts iii. 10); of terror, Mark xvi. 8. The Hebrew word is used to denote the prophetic ecstasy. Thus 'the deep sleep' which fell upon Adam during the creation of Eve (Gen. ii. 21), and during which, as appears from the narrative, he was made aware of the transaction, and of the purport of the attendant circumstances (21-24) [MARRIAGE]. It is applied again to the 'deep sleep' which fell upon Abraham (xv. 12, ἔκστασις, *sopor*), during which the bondage of his descendants in Egypt was revealed to him. Possibly all the accounts recorded in that chapter occurred in 'vision' (1-12), which ultimately deepened into the trance (12-21). Compare verses 5, 12, where he is said to have seen the stars, though the sun was not gone down. The apparent objection, that Abraham was 'brought forth abroad' to see the stars, is only of the same nature with others explained in the ART. TEMPTATION OF OUR LORD. Some, perhaps many things recorded in Scripture, belong to this supernatural state of trance, which are not expressly referred to it. See the long list of such supposed instances in Bishop Law's *Consideration of the Theory of Religion* (pp. 85, 86, Lond. 1820). Elsner includes in this list the star seen by the wise men (*Comment. on Matt.* ii. 9, 10, etc.) In the narrative which Balaam gives of himself our translators have rightly added the words 'into a trance' after the word 'falling.' The incident of the ass speaking to him, etc., is

also understood by many learned Jews and Christians to have occurred in a vision (Bishop Law, *u. s.*) To the same mode of divine communication must be referred the magnificent description in Job iv. 13-21. Persons receiving it often fall to the earth. 'Abraham fell on his face, and God talked with him' (Gen. xvii. 3, etc.; 1 Sam. xix. 24, Hebrew, or margin; Ezek. i. 28; Dan. viii. 18; x. 15, 16; Rev. i. 10, 17). It is important to observe that in all these cases the visions beheld are also related. Hence such cases are distinguished from a mere deliquium animi. We find cases of prophetic trance in the N. T., as that of St. Peter: 'he fell into a trance' (or rather a 'trance fell upon him,' ἐπέπεσεν ἐπ' αὐτὸν ἔκστασις), during which he 'saw a vision,' which is therefore distinguished from the trance (Acts x. 10; comp. St. Paul's trance, xxii. 17; 2 Cor. xii. 2, etc.) The reality of the vision is established by the correspondence of the *event*. The nearest approach we can make to such a state is that in which our mind is so occupied in the contemplation of an object as to lose entirely the consciousness of the body—a state in which the highest order of ideas, whether belonging to the judgment or imagination, is undoubtedly attained. Hence we can readily conceive that such a state might be supernaturally induced for the higher purpose of revelation, etc. The *alleged* phenomena of the Mesmeric trance and clairvoyance, if they serve no higher purpose, may assist our conceptions of it.—J. F. D.

TRANI, ISAAH DA, the elder, so called after his native place Trani, a seaport town of Naples. This distinguished Talmudist and commentator, who is also denominated *Rid* = ריד, formed from the initials ישיעה דטראני, *R. Isaiiah da Trani*, and who may be regarded as the founder of the school of Talmudical and traditional exegesis in Italy, flourished *circa* A.D. 1232-1270. Passing over his numerous annotations on the Talmud, and his theological decisions (פסקים) connected with the traditional law, as foreign to the scope of the Bibliographical notices in this Cyclopædia, we have only to specify Trani's contributions to Biblical exegesis, which are as follows:—(1.) A commentary on the Pentateuch, entitled *החומש נמוקי*, *Annotations on the Five Books of Moses*, Leghorn 1792; (2.) Annotations on Joshua (פרוש יהושע), published with a Latin translation by J. G. Abicht, under the title *Esaiæ Comment. in Josuam, quem in Cod. MS. Biblioth. Senat. Lips. descriptum et versione ac notis illustratum*, Leipzig 1712; and (3.) Annotations on Judges and Samuel, printed in the Rabbinical Bibles [RABBINICAL BIBLES]. Besides these published commentaries, there are the following annotations of Trani in MS.:—A commentary on Ezra, Cod. Opp.; a commentary on the Five Megilloth and Daniel, in the Angelica at Rome; commentaries on the Minor Prophets, Psalms, and Job, the MS. of which is to be found in several European libraries. Comp. Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 1389-1392; Fürst, *Bibliotheca Judaica*, iii. 438-440.—C. D. G.

TREMELLIUS, EMMANUEL, was born at Ferrara in 1510. By birth a Jew, he was educated in the Jewish faith; but he was converted to Christianity by the teaching, it is said, of Cardinal Pole and M. A. Flaminio. Through the influence of Peter Martyr he soon after joined the Reforma-

tion party, and became an active propagator of their views. Having left Italy he visited Germany and England, and for some time supported himself by teaching Hebrew at Cambridge. On the death of Edward VI. he returned to Germany, where he remained till he was invited to occupy the Hebrew chair at Sedan. He died in 1580. His works are: *Rudimenta Ling. Heb.* Wittenb. 1541; חנוך בהירי יה, *Initiatio doctorum Domini* (a catechism in Hebrew), Par. 1552, Strass. 1554, Leyd. 1591, Par. 1551; *Gram. Chald. et Syra.*, prefixed to *Interpretatio Syr. N. T. Hebraicis typis descripta*, Par. 1569; *Biblia Sacra, sive Libb. canon. Latini recens ex Heb. facti*, Francof. 1579, Lond. 1580 [LATIN VERSIONS].—W. L. A.

TRESPASS-OFFERING. [OFFERING.]

TRIAL. [PUNISHMENT.]

TRIBES (שְׁבִיטִים, *שבטים*; φυλαί, *tribus*) is the name of the great groups of families into which the Israelitish nation, like other Oriental races, was divided. The modern Arabs, the Bedouins, and the Berbers, and also the Moors on the northern shores of Africa, are still divided into tribes. The clans in Scotland are also analogous to the tribes of the ancient Israelites. The division of a nation into tribes differs from a division into castes, since one is a division merely according to descent, and the other superadds a necessity of similar occupations being prevalent among persons connected by consanguinity. There occurs, however, among the Israelites a caste also—viz. that of the Levites. In Gen. xlix. the tribes are enumerated according to their progenitors—viz. 1. REUBEN, the first-born; 2. SIMEON, and 3. LEVI, instruments of cruelty; 4. JUDAH, whom his brethren shall praise; 5. ZABULON, dwelling at the haven of the sea; 6. ISSACHAR, the strong; 7. DAN, the judge; 8. GAD, whom a troop shall overcome, but who shall vanquish at last; 9. ASHER, whose bread shall be fat; 10. NAPHTALI, giving goodly words; 11. JOSEPH, the fruitful bough; 12. BENJAMIN, the wolf—all these were originally the twelve tribes of Israel. In this enumeration it is remarkable that the subsequent division of the tribe of Joseph into the two branches of Ephraim and Manasseh is not yet alluded to. After this later division of the very numerous tribe of Joseph into the two branches of Ephraim and Manasseh had taken place, there were, strictly speaking, thirteen tribes. It was, however, usual to view them as comprehended under the number twelve, which was the more natural, since one of them—viz. the caste of the Levites—did not live within such exclusive geographical limits as were assigned to the others after they exchanged their nomadic migrations for settled habitations, but dwelt in towns scattered through all the other twelve tribes. It is also remarkable that the Ishmaelites as well as the Israelites were divided into twelve tribes; and that the Persians also, according to Xenophon (*Cyropædia*, i. 2, 4, *seq.*), were similarly divided. Among other nations also occur ethnological and geographical divisions, according to the number twelve. From this we infer that the number twelve was held in so much favour that, when possible, doubtful cases were adapted to it. An analogous case we find even at a later period, when the spiritual progenitors of the Christian *ἁδελφολογ*, or the apostles, who were, after the death of Judas, the elec-

tion of Matthias, and the vocation of Paul, really thirteen in number, but were nevertheless habitually viewed as twelve; so that wherever, during the middle ages, any division was made with reference to the apostles, the number twelve, and not thirteen, was adopted, whether applied to the halls of theological libraries, or to the great barrels of costly wines in the cellar of the civic authorities at Bremen. Concerning the arrangement of these tribes on their march through the wilderness, in their encampments around the ark, and in their occupation of the land of Canaan, see the cognate articles, such as EXODUS, ENCAMPMENT, GENEALOGIES, LEVITES, WANDERING, and the names of the several tribes. We confine ourselves here to a few words about that inexhaustible source of theologico-historical charlatanism, the LOST TRIBES, on which there have been written so many volumes that it would be difficult to condense the contradictory opinions advanced in them within the limits of a moderate article. Suffice it to say, that there is scarcely any human race so abject, forlorn, and dwindling, located anywhere between the Chinese and the American Indians, who have not been stated to be the ten tribes which disappeared from history during and after the Babylonian captivity.

The truth of the matter seems rather to be as follows. After the division of the Israelites under Jeroboam and Rehoboam into the two kingdoms of Judah and Israel, the believers in whom the feelings of ancient theocratic legitimacy and nationality predominated, and especially the priests and Levites, who were connected by many ties with the sanctuary at Jerusalem, had a tendency to migrate towards the visible centre of their devotions; whilst those members of the tribes of Judah and Benjamin who had an individual hankering after the foreign fashions adopted in Samaria, and the whole kingdom of Israel, had a tendency externally to unite themselves to a state of things corresponding with their individuality. After the political fall of both kingdoms, when all the principal families connected with the possession of the soil had been compelled to emigrate, most Israelites, who had previously little feeling for theocratic nationality, gradually amalgamated by marriages and other connections with the nations by which they were surrounded; while the former inhabitants of the kingdom of Judah felt their nationality revived by the very deprivation of public worship which they suffered in foreign lands. Many of the pious members of those tribes which had formerly constituted the kingdom of Israel undoubtedly joined the returning colonies which proceeded by the permission of the Persian monarchs to the land of their fathers. However, these former members of the other tribes formed so decidedly a minority among the members of the tribe of Judah that henceforth all believers and worshippers of Jehovah were called יְהוּדִים, 'Ioudaioi, JUDÆI, Jews. Thus it came to pass that the best, although smaller, portion of the ten tribes amalgamated with the Jews, some of whom preserved their genealogies till after the destruction of Jerusalem; while the larger proportion of the ten tribes amalgamated with the Gentiles of Central Asia, to whom they probably imparted some of their notions and customs, which again were, in a state more or less pure, propagated to distant regions by the great national migrations proceeding from Central Asia. We are glad to find that this

our historical conviction has also been adopted by the most learned among the Jews themselves. We may refer to *Allgemeine Geschichte des Israelitischen Volkes*, by Dr. J. M. Jost, Berlin 1832, vol. i. p. 407 seq., 416 seq.

That the name of THE JEWS became general for all Israelites who were anxious to preserve their theocratic nationality was the more natural, since the political independence of the ten tribes was destroyed long before that of the kingdom of Judah. —C. H. F. B.

TRIBOLOS or TRIBULUS (*τριβόλος*) is found in Matt. vii. 16: 'Do men gather figs of thistles?' (*τριβόλων*); and again, in Heb. vi. 8, 'But that which beareth thorns and briers (*τριβόλοι*) is rejected.' The name was applied by the Greeks to two or three plants; one of which was, no doubt, aquatic, *Trapa natans*; of the others *Tribulus terrestris* is undoubtedly one, and *Fagonia critica* is supposed to be the other. Both, or nearly allied species, are found in dry and barren places in the

507. *Tribulus terrestris*.

East; and as both are prickly and spread over the surface of the ground, they are extremely hurtful to tread upon. The word *τριβόλος* is further interesting to us as being employed in the Septuagint as the translation of *dardar*. The presence of species of *Tribulus* and of *Fagonia* indicates a dry and barren uncultivated soil, covered with prickly or thorny plants. —J. F. R.

TRIBUTE (מַס mas, from masas, 'to melt' or 'liquefy'; Gr. *φῶρος*), a tax which one prince or state agrees, or is compelled, to pay to another, as the purchase of peace, or in token of dependence.

The Hebrews acknowledged no other sovereign than God; and in Exod. xxx. 12, 15, we find they were required to pay tribute unto the Lord, to give an offering of half a shekel to 'make an atonement for their souls.' The native kings and judges of the Hebrews did not exact tribute. Solomon, indeed, at the beginning of his reign levied tribute from the Canaanites and others who remained in the land and were not of Israel, and compelled them to hard servitude (1 Kings ix. 21-23; 2 Chron. viii. 9); but the children of Israel were ex-

empted from that impost, and employed in the more honourable departments and offices of his kingdom. Towards the end of his reign, however, he appears to have imposed tribute upon the Jews also, and to have compelled them to work upon the public buildings (1 Kings v. 13, 14; ix. 15; xi. 27). This had the effect of gradually alienating their minds, and of producing that discontent which afterwards resulted in open revolt under Jeroboam, son of Nebat. 'Thy father made our yoke grievous,' said the Israelites to Rehoboam; 'now, therefore, make thou the grievous service of thy father and his heavy yoke which he put upon us lighter, and we will serve thee' (1 Kings xii. 4).

The Israelites were at various times subjected to heavy taxes and tributes by their foreign conquerors. After Judæa was reduced to a Roman province, a new poll of the people and an estimate of their substance were taken by command of Augustus, in order that he might more correctly regulate the tribute to be exacted (Joseph. *Antiq.* xvii. i. 1). This was a capitation-tax levied at so much a-head, and imposed upon all males from 14, and all females from 12 up to 65 years of age (Ulpian, *Digest.* de *Censib.* lib. iii.; Fischer, *De Numism. Census*).

To oppose the levying of this tribute Judas the Gaulonite raised an insurrection of the Jews, asserting that it was not lawful to pay tribute to a foreigner, that it was a token of servitude, and that the Jews were not allowed to acknowledge any for their master who did not worship the Lord. They boasted of being a free nation, and of never having been in bondage to any man (John viii. 33). These sentiments were extensively promulgated, but all their efforts were of no avail in restraining or mitigating the exactions of their conquerors.

The Pharisees who sought to entangle Jesus in his talk, sent unto him demanding whether it was lawful to give tribute unto Cæsar or not; but knowing their wicked designs he replied, 'Why tempt ye me, ye hypocrites? Render unto Cæsar the things which are Cæsar's, and unto God the things that are God's.'

The apostles Peter and Paul severally recommended submission to the ruling powers, and inculcated the duty of paying tribute, 'tribute to whom tribute is due' (Rom. xiii. 1-8; 1 Peter ii. 13).—G. M. B.

**TRIBUTE-MONEY.** The money collected by the Romans in payment of the taxes imposed upon the Jews. The phrase may apply to money of any description, coined or uncoined. The piece shown to our Saviour at his own request was a Roman coin, bearing the image of one of the Cæsars, and must have been at that time current in Judæa, and received in payment of the tribute in common with other descriptions of money. There is no reason to suppose that the tribute was collected exclusively in Roman coins, or that the tribute-money was a description of coin different from that which was in general circulation [MONEY].—G. M. B.

**TROAS** (*Τρωάς*), more fully Alexandria-Troas, a city of northern or Lesser Mysia, in Asia Minor, situated on the coast at some distance southward from the site of Troy upon an eminence opposite the island of Tenedos (Strabo, xiii. p. 593; Plin. *Hist. Nat.* v. 33). Paul was twice at this place (Acts xvi. 8, 9; xx. 6; 2 Cor. ii. 12; 2 Tim. iv.

13). The name Troas, or Troad, strictly belonged to the whole district around Troy. Alexandria-Troas is represented by the present Eski-Stamboul, and its ruins are now concealed in the heart of a thick wood of oaks, with which the country abounds (Pococke, pt. iii. 153; Richter, *Wallfahrten*, p. 462).—J. K.

**TROGYLLIUM** (*Τρωγύλλιον*), a town and promontory on the western coast of Asia Minor, opposite Samos, at the foot of Mount Mycale (Strabo, xiv. p. 636). It is mentioned in Acts xx. 15.

**TROKI, ISAAC B. ABRAHAM**, who derived his name from his native-place Troki, a town of Russia-Poland, near Wilna, was born in 1533. Being Karaite Jews [SADDUCEES] his parents placed him under the tuition of R. Zephaniah b. Mordecai, a distinguished Karaite writer at Troki. Under the guidance of this scholarly and liberal-minded teacher, Troki not only became a most accomplished Hebrew scholar, but acquired a thorough knowledge of Latin and Polish, in order to be enabled to study the controversies which were then vehemently raging in Poland between the Roman Catholics and the newly-risen Protestants, as well as between the different sects to which the Reformation gave rise, especially the Lutherans, the Calvinists, and the Unitarians—the latter, as is well known, having founded at that time an asylum in Poland. He carefully studied the Catholic Polish version of the Bible made by Leonard from the Vulgate, which appeared in Cracow 1561, and again in 1575 and in 1577; the Calvinistic Polish version called the Radzivil Bible, made by an anonymous translator from the original texts at the expense of Prince Radzivil, which appeared at Brzesc in 1563; and the Socinian version, made also from the original texts by the celebrated Simon Budny, which was published at Nieswiez in Lithuania 1570; as well as the writings of Nicholas Paruta, Martin Czechowicz, and Simon Budny, the heads of Unitarianism in Poland. As all these sects, who differed from each other on almost every other point, agreed in their attack upon the Jews and their faith, the learned Troki determined to publish a defence of his ancestral religion. To this end he put together in 1593, when sixty years of age, the various conversations which he had with his Christian friends of the different denominations, about the questions at issue between Judaism and Christianity, and thus arose the celebrated polemical work entitled *Faith Strengthened* (*חִזּוּק אֱמוּנָה*). This work of world-wide celebrity is divided into two parts. The first part, which is devoted to an examination of the objections raised by Christians against Judaism, and which is subdivided into fifty chapters, discusses very minutely the interpretation of the Messianic passages of the O. T., and their application to Christ as the predicted Messiah; whilst the second part is taken up with a critical examination of the statements made in the sundry books of the N. T. Troki died in 1594, just when he had completed the general introduction and the table of contents to the first part. Joseph b. Mordecai Malinowski, his pupil and townsman, completed the table of contents to the second part, wrote a preface to it, and had it circulated in MS. among the Jews. The *Chizuk Emuna* = *Faith Strengthened*, though not printed, was greatly multiplied in copies, and was rapidly circulated among the Jews of almost every country on earth. As its

author was a Karaite Jew, a Rabbi of the Rabbinic Jews who copied the *Chizuk Emuna* in 1615 thought it his duty to introduce into it arbitrary and ignorant alterations, as well as to conceal its real author, his native place, his date, religious and philosophical views. It is a copy of this vitiated text which the celebrated Wagenseil obtained from a Jew in Africa, and which was published for the first time with other Jewish texts of a similar import, and with a Latin translation in his collection entitled 'The Fiery Darts of Satan,' *Tela Ignea Satane*, Altorf 1681. A reprint of this vitiated text without the Latin translation appeared in Amsterdam 1717, and in Jerusalem 1845. But though Christian Gottlieb Unger made a most thorough collation of the vitiated printed text with a correct MS. in his possession which was published by Wolf (*Bibliotheca Hebræa*, iv. 648), and though Geiger has shown most conclusively the very corrupt state of the printed text, yet the new edition of the *Chizuk Emuna*, edited by J. Fischl, Leipzig 1857, is simply a reprint of this corrupted text. From this corrupted text was made the English translation by Moses Mocatta, which was 'printed but not published' 1851. Elaborate refutations of this work have been written by J. Muller, *Confutatio libri Chissuk Emuna*, comprised in his *Judaismus ex Rabbino scriptis detectus*, etc. etc., *refutatus*, Hamburg 1644; J. Gousset, *Ternio controversæ adversus Judeos, oppositæ R. Isaac Chissuk Emuna*, Dordrecht 1688; B. H. Gebhard, *Centum loca N. T. vindicata adversus Chissuk Emuna*, Greifswalde 1699; J. P. Storr, *Evangelische Glaubenskraft. Gegen das Werk Chissuk Emuna*, Tübingen 1703; and by our own learned Bishop Kidder in his *Demonstration of the Messiah*, 2d ed. London 1726. Comp. Wolf, *Bibliotheca Hebræa*, iv. 639, etc.; Geiger, *Isaac Troki*, Breslau 1853; Fürst, *Bibliotheca Judaica*, ii. 138, etc.; iii. 448; Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 1074, etc.—C. D. G.

TROMM, ABRAHAM, successively pastor at Harlem and Gröningen, was born 23d August 1633, and died 29th May 1719. Besides his invaluable *Concordantie Græc. Versionis vulgo dictæ LXX. interpretum*, 2 vols. fol. Utr. 1718, he published a Concordance of the O. and N. T. for the Flemish translation, Amst. 1685-1692.—W. L. A.

TROPHIMUS (Τρόφιμος), a disciple of Ephesus, who accompanied St. Paul into Judæa, and was the innocent cause of the dangers which the apostle there encountered; for having been recognised by some Jews of Asia Minor, and seen in company with Paul, they took occasion to accuse Paul of having brought Greeks into the temple (Acts xx. 4; xxi. 29). His name does not again occur till after, seemingly, the first imprisonment of Paul. In one of the ensuing journeys he remained behind at Miletus (2 Tim. iv. 20). This circumstance is regarded as furnishing a strong fact to show that Paul was twice imprisoned at Rome; for Trophimus, in the first passage to Miletus (Acts xx. 15), was not left behind, but proceeded to Judæa; after which we do not lose sight of Paul for one day, and know that he was not again at Miletus before his first imprisonment at Rome.—J. K.

TRUMPET. [MUSICAL INSTRUMENTS.]

TRUMPETS, FEAST OF. [NEW YEAR.]

TRYPHENA and TRYPHOSA (Τρύφαινα καὶ Τρυφῶσα), female disciples at Rome, who laboured to extend the gospel and to succour the faithful (Rom. xvi. 12). Their history is unknown; but, from their names, they were probably sisters.—J. K.

TRYPHON (Τρύφων), an usurper of the Syrian throne. His proper name was Diodotus (Strabo, xiv. p. 668; Liv. Epit. lii. lv.), and the name Tryphon (Reveller) was either given to him (Strabo, xvi. p. 752) or assumed by him (Appian, *Syr.* 68) at a later period. A native of Kaziana in Apamene, he was educated at Apamene of Syria, and became of the party of Alexander Balas and his σπάρτηγος (1 Maccab. xi. 39). He took advantage of the unpopularity of Demetrius II. to secure the crown for Antiochus VI., but afterwards turned against him, and having slain him usurped the supreme power to himself (1 Maccab. xii. 39, ff., viii. 31, 32). In spite of the efforts of Demetrius Tryphon retained the throne till Antiochus VII. drove him from Syria (1 Maccab. xiv. 1-3; xv. 10-14, 37-39); soon after which he committed suicide, or as others report, was put to death by Antiochus (Strabo, xiv. p. 668; Appian, *Syr.* 68). According to Strabo (xiv. p. 668), it was at his suggestion the Cilicians formed companies of pirates.—W. L. A.

TSAB (צב), occurs Lev. xi. 29 as the name of an unclean animal. The LXX. call it the *ὁ κροκόδειλος ὁ χερσαῖος*, and the Vulg. *crocodilus*. The A. V. has followed Elias Levita, who makes it the *tortoise*. It is however, more probably the same as

צב, *Dab* of the Arabs, a species of lizard, as Bochart has largely shown (*Hieroz.* Bk. iv. ch. 1). It is probably the *Ouaran el hard* of the modern Arabs, a species of Scincus, or monitor (*Varanus arenarius* of Dumeril).—W. L. A.

TSAPHTSAPHA (צפצפה) occurs only in Ezek. xvii. 5, and is usually translated 'willow-tree.' 'He took also of the seed of the land, and planted it in a fruitful field; he placed it by great waters, and set it as a willow-tree.' Celsius, however, thinks that the word means *locus planus, planities*, although he at the same time gives all the evidence for the former meaning. First, the Rabbins consider it to mean a tree, 'et quidem *salix*;' R. Ben Melech says it is 'species salicis, Arabibus *Tsiftsaph* dicta;' while 'Avicenna hoc tit. dicit *Tsiftsaph* esse *Chilaf*.' Travellers, also, give us similar information. Thus Paul Lucas: 'Les Arabes le nomment *safsaf*, qui signifie en Arabe *saule*.' Rauwolf (*Travels*, i. ch. 9), speaking of the plants he found near Aleppo, remarks, 'There is also a peculiar sort of willow-trees, called *safsaf*, etc.; the stems and twigs are long, thin, weak, and of a pale-yellow colour; on their twigs here and there are shoots of a span long, like unto the Cypriotish wild fig-trees, which put forth in the spring tender and woolly flowers, like unto the blossoms of the poplar-tree, only they are of a more drying quality, of a pale colour, and a fragrant smell. The inhabitants pull of these great quantities, and distil a very precious and sweet water out of them.' This practice is still continued in Eastern countries as far as Northern India, and was, and probably still is, well known in Egypt. The species which is called *chilaf* by the Arabs is called *Salix Aegyptiaca* by botanists;

and it is probable that it is also found in Syria, and may be the above *safsaf*. Indeed, it was found by

508. *Salix Ægyptiaca*.

Hasselquist on his journey from Acre to Sidon, as he mentions it as *S. Ægyptiaca*, v. *Safsaf* [OREBIM].—J. F. R.

TSAR'AH (צָרַח, Exod. xxiii. 28; Deut. vii. 20: Sept. τὰς σφήκας; Vulg. *crabrones*; Josh. xxiv. 12, τὴν σφήκαν, *crabronem*; Wisd. Sol. xii. 8, σφήκας, *vespas*, 'wasps'). The Greek words ἀνθρήνη and σφήξ are given in the lexicons as signifying both 'hornet' and 'wasp,' especially the former of them (Stephens, *Scapula*, s. v.); and the Latin *vespa* as denoting the 'wasp,' and *crabro* the 'hornet' (Faccioliati, *Lex* s. v.). But Harduin contends that that which is *vespa* with the Latins is properly with the Greeks ἀνθρήνη (Gallicè, *une guêpe*), and not σφήξ, as was thought by Gaza and Scaliger; and urges that on this point so learned a Latin author as Pliny ought to be considered sufficient evidence; that he ascribes to the *vespæ* those things which Aristotle (*Hist. Anim.* v. 19, 617; ix. 65, 66) ascribes to the ἀνθρήναι; and, further, that he also ascribes to the *crabrones* those things which Aristotle ascribes to the σφήκες (comp. Arist. *ut supra*; Pliny, *Hist. Nat.* xi. 24, ed. Harduin, ii. p. 1741). The word *crabrones* Harduin accordingly explains, 'Græcis, σφήκες; Gallis, *des frelons*, hornets.' If this criticism be just, it vindicates both Jerome's translation of the first three words, and the English also. Our confidence in the definiteness of the Sept. rendering becomes increased when it is remembered that the Pentateuch, the most accurate portion of the whole version, was translated probably within fifty years after the death of Aristotle. Certainly the known characteristics of the hornet agree with the descriptions given of the σφήξ by Aristotle, and of the *crabro* by Pliny. 'The ἀνθρήναι do not live by the nutriment collected from flowers, as the bees, but prey

upon many kinds of flesh; whence also they frequent manure, for they pursue the great flies, and when they have caught them, having removed the head, they fly away, carrying the rest of the body' (*Hist. Anim.* ix.) Again:—αἱ μὲν ἀνθρήναι, ἐπὶ μετεώρων τινὲς οἱ δὲ σφήκες, ἐν τρώγλῃ (ποιούσιν κηρία): 'The ἀνθρήναι build their nests in some elevated place, but the σφήκες in a hole or cavity' (v. 19). The description of Pliny is nearly a translation of the above:—'Vespæ in sublimi nidos faciunt, crabrones in cavernis, aut sub terra;' on which Cuvier remarks, 'Sæpe sub tectis, aliquando sub terra vespæ; in *cavis arboribus* crabrones, ædificant' (Plin. *Libri de Animal.* curante J. B. Fr. S. Ajasson De Grandsagne, cum notis a Cuvier, Paris 1838, p. 424, n. 2).

Still it must be noticed that, as Harduin remarks with wonder, Pliny, when speaking of the *ichneumon*, a lesser species of hornet, calls them *vespæ*, while Aristotle, in the corresponding description, calls them σφήκες (*N.* 10). It would hence seem probable that the word *vespa* was sometimes used in an analogical and more comprehensive sense by Pliny; which may account for a similar variation in Jerome's rendering, 'vespas' (*Wisdom* xii. 8). Even the Greek word had already undergone great abuse, for Hesychius, 150 years before Jerome, explains ἀνθρήνη by εἶδος μελισσῆς, 'a species of bee;' and Suidas, in the 11th century, explains it as a species of wasp, and observes that the poets misapplied the word to the *bee* (see also Hom. *Il.* xiii. 167). It being upon the whole most probable, therefore, that 'the hornet' is the true rendering in these passages of Scripture, the only further question which remains is, whether the word is to be taken as literally meaning this well-known and terrific insect, or whether it is to be understood in a metaphorical and figurative sense for diseases, supernatural terror, etc., by which Jehovah 'drove out the Hivites, Canaanites, and Hittites, from before Israel.' Among the moderns, Michaelis has defended the figurative sense. In addition to other reasons for it, he doubts whether the expulsion of the Canaanites *could* be effected by swarms of σφήκαι, and proposes to derive the Hebrew from a root signifying 'scourges,' 'plagues,' *scutica*, *plagæ*, etc. (*Suppl. ad Lexic. Hebr.* vi. 2154); but his reasons are ably refuted by Rosenmüller, apud Bochart (*Hieroz.* Lips. 1796, iii. ch. 13, p. 402, etc.). In favour of the possibility of such an event it is observed, that Ælian relates that the Phaselitæ were actually driven from their locality by such means (Φασηλίτας δὲ σφήκες, κ. τ. λ. *Hist. Anim.* ix. 28), and Bochart has shown that those Phaselitæ were a Phœnician people (*ut supra*, p. 412). Even Rosenmüller himself adopts the figurative sense in his *Scholia* on Exod. xxiii. 28; but on Josh. xxiv. 12 he retracts that opinion, and amply refutes it. His reasonings and refutations have been adopted by numerous writers (among others, see Paxton's *Illustrations of Scripture*, i. 303, etc., Edin. 1819). Michaelis's doubt of the abstract possibility seems very unreasonable, when the irresistible power of bees and wasps, etc., attested by numerous modern occurrences, and the thin and partial clothing of the Canaanites, are considered. It is observable that the event is represented by the author of the book of Wisdom as a merciful dispensation, by which the Almighty, he says, 'spared as men, the old inhabitants of his holy land,' and 'gave them place for repentance.'

If the hornet, considered as a *fly*, was in any way connected with their idolatry, the visitation would convey a practical refutation of their error [see Baalzebub, under BAAL]. It may be remarked, that the hornet, no less than the whole species of wasps, renders an essential service in checking the multiplication of flies and other insects, which would otherwise become intolerable to man; and that in regard to their architecture, and especially their *instincts* and *habits*, they do not yield to their more popular congener, the bee, but even in several respects greatly excel it (Kirby and Spence, *Introduction to Entomology*, 8vo, Lond. 1828, i. 273, 274; Réaumur, *Mémoire pour servir à l'Histoire des Insectes*, vol. vi. Mem. 6, *pour des Guespes*, 4to, Par. 1734-42).—J. F. D.

TS'BI (צִבִּי; δορκάς). This may be regarded as a designation applying to a whole group or sub-genus of the antelope family, that of the gazelles; of which at least one species, if not more, may still be found in the deserts and uplands of Egypt, Arabia, and the eastern and southern borders of Palestine. The term *dorcas* was apparently generalised so as to include the roebuck of Europe, which was certainly not, as in our translation, the *ts'bi* of Scripture. It appears from Hermolaus that neither Aristotle nor Dioscorides confounded such distinct genera, and that they used the term *dorcas*

509. Ts'bi or Dorcas. Ariel or Gazella Arabica.

for the species with persistent horns, and *dorcas* for the roebuck, whose horns are annually renewed. This confusion, created by the classical grammarians of antiquity, was further increased by schoolmen and sportsmen constantly confounding fallowdeer with roebuck till within the 17th century, as is plainly perceptible in the writings of Gesner, that mine of zoological lore, not sufficiently consulted by Scriptural commentators. The Biblical species clearly included in the section gazella are *Antilope dorcas*, Linn.; *Ariel* or *A. Arabica*, Licht.; more remotely, *A. kevelia*, *A. corinna*, auctor.; and for eastern Arabia, *A. cora*, Ham. Smith; while *A. subgutturosa*, Guldenst., may be claimed for the north-eastern countries, where the species exists both in Asia Minor and Armenia, and therefore on the borders of Syria. All these species are nearly allied, the largest not measuring more than two feet in height at the shoulder, and

the least, the corinna, not more than about twenty inches. They are graceful and elegant in form, with limbs exceedingly slender, and have large and soft eyes, lyrate horns, black, wrinkled, and striated—most robust in *subgutturosa* and *kevelia*, most slender in *corinna*, and smallest in *cora*. Their livery is more or less buff and dun, white beneath, with small tufts of hair or brushes on the fore-knees: they have all a dark streak passing from each ear through the eyes to the nostrils, and a band of the same colour from the elbow of the fore-leg along the sides to the flank, excepting the corinna, whose markings are more rufous and general colours lighter. Most, if not all, have a feeble bleating voice, seldom uttered, are unsurpassed in graceful timidity, gregarious in habit, and residents on the open deserts, where they are unceasingly watchful, and prepared to flee with such speed, that greyhounds are liable to be killed by over-exertion in the chase. Of the species here enumerated, all, but more especially *A. Arabica*, *A. dorcas*, and *A. cora*, must have been designated by the terms *dorcas* and *ts'bi*, and the Arabic *tsabi*; generically, *Gazal*. The Chaldee *tabitha*, and Persic *zabegat*, may refer more immediately to *A. subgutturosa*, the *ahu* of Kämpfer, *tseiran* of modern Persia, and *jairou* of the Turks.

One or other of these, according to geographical localities, occurs in the A. V. under the name of *roe* or *roebuck*; in Deut. xii. 15, 22; xiv. 5; xv. 22; 1 Kings iv. 23; 1 Chron. xii. 8; 2 Sam. ii. 18; Prov. vi. 5; Cant. vii. 3; viii. 14; Is. xiii. 14; *dorcas*, Eccles. xxvii. 20.—C. H. S.

TSEPHA (צִפְּהָ) and TSIPH'ONI (צִפְּוֹנִי), a species of serpent; LXX. *ἐργονα ἀσπίδων, ἀσπίς, κέραστος, ὄφης*; Vulg. *basiliscus, regulus*; Targ. *viper*; A. V. *cockatrice, marg. adder* (Is. xi. 8; xiv. 29; lix. 5; Prov. xxiii. 32; Jer. viii. 17). The name is derived from צִפְּהָ, *to hiss*. The reptile denoted is most probably the *basilisk*, a small serpent exceedingly venomous, and which, from its hissing, is called also *sibilus* (Isidor. *Orig.* xii. 4).—W. L. A.

TSIMMAON (צִמְמוֹן) is rendered in the Vulg. by *Dipsas* (Deut. viii. 15); and is supposed by some to designate some species of serpent the bite of which causes severe thirst. The usage of the word, however, elsewhere (Ps. cvii. 33; Is. xxxv. 7) is against this; nor do any other of the versions favour such a rendering here. The LXX., it is true, has been thought to do so by its rendering *διψα*, but *διψα* means *thirst* merely, and may be used here in its proper sense. The proper rendering of צִמְמוֹן seems to be *thirsty, arid, or barren place*. (See Bochart, *Hieroz.* P. II. B. iii. ch. 8).—W. L. A.

TSIPH'ONI. [TSEPHA.]

TSIPPOR (צִפּוֹר, *sparrow*) occurs in Gen. vii. 14; Lev. xiv. 4; Ps. lxxiv. 3; cii. 7; *σπορθλον*, Matt. x. 29; Luke xii. 6, 7. The word includes not only the sparrow, but also the whole family of small birds not exclusively feeding on grain, but denominated clean, or those that might be eaten according to the law: hence the same word is also, in many instances, translated 'bird,' the Hebrew name itself being evidently an imitation of the voice of small birds, synonymous with the English

'chirrup.' *Trippor* includes many insectivorous and frugivorous species, all the thrushes we have in Europe, and the rose-coloured ousel or locust-bird, rare with us, but numerous and cherished in the East, solely for the havoc it makes among locusts, and named *Smurmur* by the Arabs, in imitation of its voice. It also includes perhaps the starlings (not *Zarzir*), the nightingale, all the European larks, the wagtails, and all the tribe of finches; but not fly-catchers, nor indeed swallows, which, there is reason to believe, were reckoned, along with night-hawks or goatsuckers, and crows, among the unclean and prohibited species. In Syria the sparrow is the same vivacious familiar bird we find it in Europe, and equally frequents the residence of man.—C. H. S.

TSIYIM (צִיִּים). Bochart, who was inclined to recognise this word as a general term denoting cats, or any kind of wild beasts that frequent dry places, discovered an incongruity when it is opposed to a single species, צִיִּים *Iyini*, which he translates 'Thoes' (Is. xxxiv. 14, and Jer. l. 39). Both words are meant, it seems, to imitate the cry of animals; and if he be right in regarding the first as expressive of the mewling or screaming of wild cats, with such other animals as the ancients included in the feline tribe, and we now class among viveridæ and mustelidæ, each including several genera, more or less represented by species residing in and around Palestine; we then find the opposition of the two words strikingly just, provided that, instead of the single *Thoes* of Bochart, we make *Iyini* include also the various wild canidæ (dogs) of the same region, amounting to at least twelve species, without including two hyænas [WEASEL].—C. H. S.

TS'LATSAL (צִלְצַל), an insect mentioned Deut. xxviii. 42. The A. V. makes it a *locust*, and from the connection in which the word is used this is a probable meaning. The LXX. render by ἐπισύβη, by which a species of mildew is intended (ὁ ὡς κοινοῦτος κατασχεύμενος καὶ ἀφάνισον σῖτον, Hesych.); or they may have meant by the term some insect of the locust species, for Suidas says that the word denotes an insect destructive to fruit; in Joel ii. 25 they use it for אֲרֵבָה, which is undoubtedly a locust. The Hebrew word is onomatopoeitic, and points out some insect which gives forth a ringing or tinkling sound (from צִלְצַל, *to tinkle*, whence צִלְצַל is used to designate a *cymbal*, Ps. cl. 5). Tychsen (*Comment. de Locustis*) identifies it with the *Grylla stridulus* of Linnæus. According to Gesenius and Fürst it is the *grasshopper* or *cricket*; but this hardly agrees with the destructive character ascribed to the Ts'latsal in Deut. xxviii. 42. The word may be used of any of the locust tribe, in all of which the male utters a sharp continuous sound. To the Heb. word correspond the Syr. ܛܠܫܐ, *tsertsooro* ('genus locustæ repens, non volans; percutit radices arborum et exarescunt,' Novariæ, *Lex. Syr.* quoted by Castell, s. v.), and the Arab. صرصر, *sarsar*, 'gryllus' (*Kamoos* ap. Freytag *Lex. Arab.* s. v.)—W. L. A.

TS'PHARDE'A (צִפְרָדִּיעַ; Βάρπαχος). This name, according to Gesenius, is compounded of צִפְרָ

to leap, and רָדַע, Arab. رَدَّع, *ridd'*, a *marsh*, q. *marsh-leaper*; but Ewald and Fürst derive it from צָפַר, *to chirp, quack, or croak*, which would be the more probable etymology were there any evidence that צָפַר ever meant to *quack* or *croak*. The term is applied to the Egyptian frog (Exod. vii. 28; viii. 3-9 [A. V. viii. 2-13]; Ps. lxxviii. 45; cv. 30), and to this only. Frogs abound in Egypt, but one species is especially abundant, the *Rana punctata* or greenspeckled grey frog; and this, in all probability, is the frog of Scripture. It is small, lively,

510.

and, like our brown frog, given to move on land in moist weather; the toes are only webbed to half their length, which prevents its being a good swimmer. It is called by the Arabs *doſda*, and often spreads itself over the country in such multitudes as to become a nuisance. Were it not for the storks and other wading birds which feed on it, and keep down the increase, it would multiply in such numbers as to be a plague (Hasselquist, *Reise*, p. 68, 254; Seetzen, *Reise*, iii. 245, 350, 364, 490; Richardson, *Travels*).—W. L. A.

TS'RI (צִרִי), properly TSORI, translated *balm*, occurs in Gen. xxxvii. 25; xliii. 11; and in both passages is mentioned along with *lot* and *neoth*, with the addition in the second of *botnim* and *shekadim*. In Gen. xliii. 11 Jacob thus addresses his sons: 'Take of the best fruits in the land in your vessels, and carry down the man a present: a little balm (*tseri*), and a little honey (*debash*), spices (*tragacanth*) [NECOTH] and myrrh [*ladanum*; LOT], nuts [BOTNIM] and almonds' [SHEKADIM]. In the separate articles on these substances some general observations have been made, which will equally apply to *tseri*. This, therefore, like the other substances intended as presents, or forming articles of commerce, must have been a produce of Gilead, or of the northern parts of Syria, and would thus be suitable for conveying to Egypt on the occasion referred to. Balm or balsam [BASAM; BAAL-SHEMEN], we have seen, was an Arabian and Abyssinian plant cultivated in one or two places of Palestine, but at a later period than the transactions recorded in the book of Genesis. As we have before said, 'It is probable, therefore, that some other tree producing a balsamic secretion is intended in the above passages, where the word *balm* has been considered the equivalent of *tseri*.' But it is difficult to determine exactly what substance is intended: we may, however, adduce the other passages in which the word is found. Ezekiel (xxvii. 17) mentions *tseri* along with 'wheat of Minnith, and Pannag, and honey, and oil,' as merchandise which Judah brought to the market of Tyre. That

it was possessed of medicinal properties appears from Jer. viii. 22: 'Is there no *balm* in Gilead?' 'Go up into Gilead and take *balm*' (xvi. 11). 'Take *balm* for her pain, if so she may be healed' (li. 8). It has been variously translated—*cera*, *theriaca*, *cedri resina*, *stacti unguenta*, *medicamenta*, *resina*, *colophonia*. Celsius and others state that *zurroo* in Arabic signifies *mastic*, and that *tseri* therefore is this resin: in which he is followed by Sprengel. In the Arabic and English Dictionary

زري is translated the gum of an Arabian tree, which is called *kamkam*, and said to be found in the mountains of Yemen. In the writer's MS. *Materia Medica*, *khushkhush*, one of the names of the poppy, is given as the synonym of *zurroo*; but this may be a mistake of transcribers. It is curious, however, that Avicenna mentions *zurroo* as a well-known gum brought to Mecca, as being odorous, and having the power of laudanum.

زري *zuree*, moreover, means 'bleeding profusely,' as a vein, or according to Rosenmüller, 'fluid or liquid in general, which equally applies to oil of every kind.'

We are unable, however, distinctly to connect any of the above names with any product of Gilead. But there is a product which, though little known to Europeans, is highly esteemed by the Arabs, according to the testimony of several travellers. This is the oil of the *zackum* tree, sometimes called the Jericho plum-tree, also the Jerusalem willow, oleaster or wild olive-tree, or *Elaeagnus angustifolius* of Linnæus. The fruit of one species is much esteemed in Persia, and known by the name of *zinzyd*. The Syrian fruit is ovoid, but oblong, fleshy, having an olive-shaped nut with a kernel containing oil. The oil is separated by pressure and floating it on water, and a further portion by boiling. The Arabs are described by Maundrell and Mariti as holding it in high esteem, and as preferring it to the balsam of Mecca, because they found it very efficacious against contusions and wounds. 'Formerly, if not now, when the Christian caravan advanced towards Jericho it used to be met by crowds of Arab women, offering the salutary oil for sale to the pilgrims, in small leather bottles' (Kitto, *Palestine*, ccxxiii.) This is supposed by some to be Myrobalanus of Pliny and other ancient writers; but by some the fruit of *Melia azadirachta*, and by others again that of *Hyperanthera Moringa*, or *H. aptera*, are considered the true Myrobalanus of the ancients. Of the last it is said: 'Oleum, e cotyledonibus expressum, in omni oriente usitatum, ea propter prædicatur, quod non facile rancorem contrahat.' But, as we are unable to connect any of these with the *tseri* of Scripture, we need not further pursue this subject [AGRIELAI].—J. F. R.

TUBAL (תובל; Sept. Θοβελ), a son of Japheth, and a people descended from him (Gen. x. 2; Is. lxvi. 19; Ezek. xxvii. 13; xxxii. 26; xxxviii. 2, 3; xxxix. 1), supposed to have been settled in Asia Minor near the Euxine [NATIONS, DISPERSION OF].

TUBAL-CAIN (תובל קין, *scoriarum faber*; Sept. Θοβελ), son of Lamech and Zillah, to whom the invention of the art of forging metals is ascribed in Gen. iv. 22 [SMITH].

TURBAN. Though it is presumable that in a climate like that of Palestine the inhabitants did not expose themselves to the cold of winter or the heats of summer without some covering for the head, there is no certain evidence that any such was in common use. The Hebrews have several words by which articles of head-dress are designated, but they all apparently belong to coverings which were either official or merely ornamental, with the exception of those used by the military.

In the Pentateuch two kinds of head-coverings are mentioned as forming part of the priest's dress, the *מִצְנֶפֶת* of the high-priest, and the *כִּנְיָה* of the common priests; the former of which was probably a sort of tiara, whilst the latter may have been a turban, but was more probably a high cap of a flower-like shape, such as are found among Orientals in the present day (Bähr, *Symbolik des Mos. Cult.* ii. 66). As these head-coverings ('bonnets' A. V.) were expressly designed for 'glory and for beauty' (Exod. xxviii. 40), they evidently give us no idea of what was worn on the head by the people commonly. In the ceremony prescribed for the drinking of the waters of jealousy, the priest is directed to *loosen* (פרע) the woman's head—i.e. to let her hair fall down loosely (Num. v. 18); and in the law concerning the leper it is prescribed that his head shall be *loosened* (פרוע); phraseology which seems to indicate that it was customary in the Mosaic times to bind the hair with a band or fillet, such as we see represented on the Egyptian and Assyrian monuments. On the other hand, from the stress that is laid in the law concerning the Nazarite on his suffering his locks to grow, and on his hair thus abundantly grown being the crown of God on him (Lev. xiii. 45), it seems fair to infer that the cropping of the hair, and perhaps also the shaving of the head and the wearing of some covering (it may be of artificial hair, as among the Egyptians), was common among the people.

In the other books the terms which occur designating head-dress, besides those which are *regal*, such as *כִּנְיָה* [CROWN], and those which are *military* [ARMS], are the following:—

1. *צִנְיָה*. This term occurs three times in the O. T. (Job xxix. 14; Is. lxii. 3; Zech. iii. 5). In all these cases the usage of the word shows that it refers, not to an ordinary article of dress, but to one which was ornamental and for display. It was probably a turban, the word being derived from *צָנָה*, to roll round or wind. Schröder (*De Vest. Mulier. Heb.* p. 364) endeavours to prove from the Arabic that this word means a narrow strip wound round the head; but his instances only prove that the Arabic *Tsinf* and *Tsinfa* denote a small band, or the hem of a garment. In Is. iii. 22 the fem. *Tsenipha* is used of a female head-dress worn for ornament.

2. *פֶּאֶר*. This word is used of the head-dress of distinguished persons, both male and female (Is. iii. 20; lxi. 3, 10; Ezek. xxiv. 17, 23; xlv. 18). In Exod. xxxix. 28 it is used of the priest's head-dress, as also in Ezek. xlv. 18. In all the other instances it indicates an article of holiday costume. Saalschütz suggests that the *Pèr* was probably the hat or bonnet, properly so called, and the *Tsaniph*, the ornamental head-band wrapped round it.

3. *צִפְרֶיֶת*, from *צָפַר*, to circle, a circlet, or diadem (Is. xxviii. 5); or it may have been a piece of fine

muslin wound round the turban for ornament, such as the Orientals still use.

4. לִיָּה (Prov. i. 9; iv. 9). Some regard this as a species of fillet by which the head was bound; but it probably rather means a garland or wreath of flowers.

The examination of these terms has failed to convey to us any information respecting the ordinary everyday costume for the head of the Hebrew people. Probably they were wont simply to throw some part of their dress over their heads when they had occasion to expose themselves to the weather, or to fold a piece of cloth over their heads, as do the Arabs of the present day, reserving such articles as those above named for holiday or festive occasions (Jahn, *Biblische Archæologie*, I. ii. 2, p. 116; Saalschütz, *Arch. der Hebr.* ii. p. 22).—W. L. A.

#### TURPENTINE TREE. [ALAH.]

#### TURTLE DOVE. [TOR.]

TUSI or TAWUS, JACOB B. JOSEPH (יַעֲקֹב בֶּן יוֹסֵף טָאוּס). All the researches of Oriental scholars and Biblical critics have hitherto failed in discovering anything about the life of this translator of the Hebrew Scriptures into Persian. Nothing more is known about him than that he derived his name from his native-place, Tus, a celebrated city of Chorassan. Even the mere age in which he lived is matter of dispute. Thus Rosenmüller says that he must have flourished in the 9th century, because he translates *Babel* (Gen. x. 10) by *Bagdad*, which was not built till A.D. 762 (*De Versione Pentateuchi Persica Commentatio*, p. 4); Fürst says the author lived in the 13th century; whilst Munk, Zunz, and Steinschneider conclude from the terms which the editor of the Constantinople Pentateuch Polyglott uses (1546)—אִשֵּׁר

בֶּאֱרֵן לֹנוּ אִישׁ נָבֹן וְחָכָם כִּי יַעֲקֹב בֶּן יוֹסֵף טָאוּס, that he was a contemporary of the editor, and that he made this version for this edition of the Pentateuch. It may, however, be questioned whether the words, 'which he interpreted for us,' refer to the editor, or mean that Tusi made this version for us—i. e. the Jewish nation; and whether the formula נִרְוָה עֵץ=נִרְוָה, he *reposes in Paradise*, refer to Tusi's father or to Tusi himself. We incline to the latter view, and hence agree with Fürst that Tusi flourished in the 13th century. His Persian version of the Pentateuch was first published in Hebrew characters, with the Hebrew text of the Pentateuch, Onkelos' Chaldee paraphrase, Saadia's Arabic translation, and Rashi's commentary, Constantinople 1546. It was then transcribed from this edition into the Arabico-Persian character, and printed in Walton's *Polyglott*, vol. iv. Besides the Pentateuch there is a Persian version, in the Paris Library, of the Prophets and Hagiographa, as well as of the Apocrypha, which was most probably also made by Tusi. Thus Catal. imprimé, MS. Hebr. No. 34, contains the version of Genesis and Exodus, with the Hebrew original after each verse. No. 35 contains the version of Leviticus, Numbers, and Deuteronomy in a similar manner. No. 40 contains Job and Lamentations, as well as a Persian elegy for the ninth of Ab, bewailing the destruction of the temple [FASRS]. No. 44 contains Isaiah and Jeremiah in the Hebrew character. No. 45 Daniel as well as an apocryphal history of this

prophet. No. 46, written in the year 1460, also contains a version of Daniel, with various readings of older MSS.; Fond de Saint-Germain-des-Près, No. 224, contains the Book of Esther, with the Hebrew original, as well as a Rabbinical Calendar in Persian, completed in 1290, and extending to 1522. No. 236 contains a version of the Apocrypha in the Hebrew character, written in 1600; the book of Tobit is different from the common Greek text, Judith and Bel and the Dragon agree with the Vulgate, whilst the Book of Maccabees is

מִגִּלְתָּ אַנְתִּיּוֹכּוּס, [MACCABEES, THE FIRST BOOK OF], Hebrew and Persian. Tusi, whose version has been largely interpolated in later times, seems to have made use of Persian versions which existed at a very early period. Thus Chrysostom (*Homil. ii. in Joannem*) and Theodoret (*De curandis Græcorum effectibus*) mention the existence of a Persian version, whilst Maimonides assures us that the Pentateuch was translated into Persian long before Mohammed (אֲנִרְתָּ תִּימִן). Comp. Rosenmüller, *De Versione Pentateuchi persici commentatio*, Leipzig 1814; Munk, *Version persane* in Cahen's Bible, vol. ix. p. 134, etc., Paris 1834 [CAHEN], who institutes a comparison between the printed text of the Persian version and that of the MS., and gives an elaborate account of the MSS., as well as specimens of the translation of Lamentations, etc.; Fürst, *Bibliotheca Judaica*, iii. 453.—C. D. G.

TWELLS, LEONARD, D.D., was educated at Jesus College, Oxford, where he took his degree of B.A. in 1704. He was vicar of St. Mary's, Marlborough; rector of St. Matthew, Friday Street, and St. Peter, Cheap, London, 1737; prebendary of St. Paul's; and one of the lecturers at St. Dunstan in the West. He died 1741 or 2. He excited notice by his *Critical Examination of the late new text and version of the N. T.* (Mace's), etc., 3 parts 8vo, Lond. 1731-32, in which he points out many mistakes and errors in that edition, and with learning and ability vindicates the true reading and interpretation of the sacred text. A lengthened vindication of the Apocalypse, in which its authenticity as the production of St. John is maintained, appears in the last part, and was translated into Latin by Wolfius for vol. 5 of the *Cura Philologica*. He wrote also a *Vindication of the Gospel of St. Matthew*, Lond. 1732, and took part in the controversy concerning the demoniacs of the N. T., maintaining that the demoniacs were really possessed by fallen angels. He published also two vols. of sermons.—W. L. A.

TYCHICUS (ΤΥΧΙΚὸς ὁ Ἀσιανός) is the name of an assistant and companion of the apostle Paul. The name has nearly the same signification which we find in the Hebrew *Gad*, and in the Latin *Felix* or *Fortunatus*. Tychicus was a native of Asia, who accompanied Paul on his third missionary journey (Acts xx. 4), and was, at a later period, the bearer of Paul's letter from Rome to the Colossians. Paul styled him a beloved brother, faithful minister, and fellow-servant in the Lord, who should declare all his state unto the Colossians, to whom he was sent that he might know their estate and comfort their hearts (Col. iv. 7, 8). For a similar purpose Tychicus was sent to the Ephesians also (Eph. vi. 21, 22; 1 Tim. iv. 12), and employed in various missionary journeys (Tit. iii. 12). According to tra-

dition, Tychicus was made bishop of Chalcedon.—C. H. F. B.

TYCHSEN, OLAUS GERHARD, born 14th December 1735 at Tondern, died 30th Dec. 1815, was successively teacher at the Orphan House, Halle, agent of the Callenberg Mission Institute for the conversion of Jews and Mohammedans, professor of Oriental languages at Rostock. He was a distinguished Oriental scholar, but was narrow and prejudiced in his views. His zeal for the integrity of the Masoretic text led him to issue his *Tentamen de variis codd. Hebb. Vet. Test. MSS. generibus*, Rostock, 1772, which brought him into collision with Kennicott; as his *Unechtheit der Jüdischen Munsen mit Hebr. und Samar. Buchstaben erwiesen*, Rost. 1779, did with Bayer. In both controversies Tychsen's great learning, together with his narrowness of view, is apparent. He was more successful in his discussion of Arabic numismatics: *Introductio in rem nummariam Muhammedanorum*, Rost. 1794, to which an *Additamentum I.* appeared in 1796. He contributed to Syriac and Arabic learning also in the following works: *Interpretatio inscript. Cuficæ in marmorea templi patriarch. S. Petri cathedra*, Rost. 1787, 1788; *Al-Makrizi Hist. Monete Arab. e Cod. Escorial.* 1797; *Tractatus de legalibus Arab. ponderibus et mensuris*, 1800; *Elementale Arab.* 1792; *Elementale Syr.* 1793; *Philologus Syrus, sive Hist. animalium 32 in SS. memoratorum Syriace*, 1795. Many other contributions to Oriental literature from his pen are enumerated and described in the work of his pupil Hartmann, entitled *O. G. Tychsen, oder Wanderungen durch die Mannichfaltigsten gebiete der biblisch-asiat. Literatur*, 4 vols. Brem. 1818-1820.—W. L. A.

TYCHSEN, THOMAS CHRISTIAN, born 8th May 1758 at Horsbyll in Schleswig, died 24th October 1834 at Göttingen, where he was professor of theology. Besides some works in classical literature and some on Oriental numismatics, he completed the concluding part of Michaelis' *Anmerkungen für Ungelernte*, and the last vol. of his *Supplementa ad Lex. Hebr.* 1792. He furnished also the 6th vol. of the *Nov. Test. Koppianum*—that containing the Epistles to the Galatians, Ephesians, and Thessalonians, 2d ed. 1791; and issued several programmes on Biblical subjects.—W. L. A.

TYNDALE, WILLIAM, was born at Hunt's Court, Nibley, Gloucestershire, of which his father was proprietor, about the year 1477. He studied at Oxford, and afterwards at Cambridge, and at both places made excellent proficiency in all the branches of study then pursued there. He obtained priest's orders in 1502, and entered the monastery at Greenwich as a friar in 1508. Some time before this he had commenced his translation of the N. T., and had probably imbibed some of the notions which were beginning to be circulated in favour of a reformation of the church. In 1520 he became tutor to the children of Sir John Walsh, in whose mansion at Little Sodbury he resided for two years. Here he came frequently into conflict with the clergy of the district, and became known as holding the new opinions. This rendered his longer residence there unsafe, and he accordingly came to London, where he was the guest of Humphrey Monmouth, a wealthy merchant, for a year. Bent on perfecting his translation of the N. T.,

Tyndale, in the early part of 1524, crossed over to the continent to Hamburg, where he remained for some time; afterwards he went to Cologne, where he put to press his translation of the N. T. Being interrupted in the printing, he retired to Worms, where greater liberty could be enjoyed; and there he not only completed what had been interrupted, the printing of his first edition in 4to, but printed another edition in 8vo, issued in 1525. A third edition was printed at Antwerp in the year following. Of the first edition only a fragment survives, and of the second only two copies, one imperfect, are known to exist. Tyndale now proceeded to the O. T., and issued his translation of the books as they were printed. He proceeded only as far as Deuteronomy in the printing; but it is believed that he translated the whole O. T., and that Coverdale profited by the use of his MSS. In 1534, he published at Antwerp a revised edition of his translation of the N. T., and with this concluded his labours in this department. The importation of his translation, and of some works which he had written, into England, had excited against him the hostility of the anti-Reformation party there; and their bitter hatred was such that the most unwearied efforts were used to destroy him. At Antwerp, where he had resided since 1530 as chaplain to the company of English merchants, he was, in 1535, seized through the treachery of an emissary of the English Chancellor, Sir Thomas More, and conveyed to Vilvorde near Brussels; where, after a protracted imprisonment, he was burnt to death in September 1536. A sacred interest attaches to his name. To him the most Bible-loving nations of the world are indebted for what still, in substance, supplies the version of the N. T. in ordinary use (Anderson's *Annals of the English Bible*, vol. i. Lond. 1845; Offor's edition of Tyndale's N. T. 1836 [ENGLISH VERSIONS]).—W. L. A.

TYPE. I. *Name*.—The Greek word *τύπος*, from which our *type* is derived, denotes primarily a *blow*, then the *mark left by a blow*, then a *mark or print of any kind*, then a *figure or image*, and finally a *mould or model*; whether that be viewed as the original from which something else has taken its form, or as indicating the form which something not yet existing may assume. In the N. T. the word occurs in several of these senses, and in some passages with a shade of meaning peculiar to itself. In John xv. 25 it is used to denote the mark which the nails made in our Lord's hands and feet; in Acts vii. 43 it means a copy or image; in Acts vii. 44 and Heb. viii. 5 it signifies a model after which something is made; in Rom. vi. 17 it denotes a mould from which a form is derived; in Rom. vi. 14 it conveys the idea of one person presenting some analogy to another person; and in several places it means an example which others may follow (1 Cor. x. 6, 11; Phil. iii. 17; 1 Thess. i. 7; 2 Thess. iii. 9, etc.)

As used by theologians the word *type* has received a special technical meaning not exactly equivalent to any of these usages, though approaching to that of Rom. vi. 14, where Adam is said to be the type of Christ. As used by theologians it is rather to *σύν* as employed by the N. T. writers than to *τύπος* that the word *type* corresponds. They mean by it some object, whether office, institution, person, or action, by means of which some truth connected with Christianity was prefiguratively foretold

under preceding dispensations. Such an object the apostles call a *σκιὰ*, a shadow or adumbration of that which it indicated (comp. Heb. x. 1; Col. ii. 17). This shadow became a type because it presented the model or representation of something yet future. Sometimes also the term *παράβολή* is used with a similar meaning (Heb. ix. 9; xi. 19).

II. *Fundamental Principles*.—There are certain fundamental principles which must be assumed as lying at the basis of Typology. These are—

1. Spiritual truths, ideas, thoughts, may be represented by material symbols, whether actions, institutions, or objects. This the usage of all nations establishes. More especially was this a favourite method of communicating thought among the imaginative Orientals; in general it is found to prevail most in the earlier stages of a people's history, whilst as yet the use of objects that appeal to the senses is more effective than the use of written documents. In Scripture frequent instances occur of such symbolical methods of conveying ideas; as, for instance, the placing of the hand under the thigh for confirmation of an oath; the boring of the ear of the servant who declined to avail himself of the liberty brought by the year of jubilee; the rending of the garments in token of grief; and such acts as those of Abijah when in announcing to Jeroboam the secession of the ten tribes from the house of Solomon he tore his garment into twelve pieces and gave to Jeroboam ten (1 Kings ix. 29); that of Elisha when he indicated to the king of Israel the victories which by divine help he should obtain over the Syrians by commanding him to shoot an arrow from the window eastward after he had placed his hand on the king's hand (2 Kings xiii. 14-19); and those of Jeremiah and Ezekiel when they were signs to the people (Jer. xix. 1-11; Ezek. xii. 3-16).

2. Such symbolical representations may be employed to convey *religious* truth. This usage we find also to have prevailed among all nations, especially in the earlier stages of their history. Among the Jews it was abundantly used; not, however, according to human caprice or ingenuity, but always in obedience to the express ordinance of God. The symbolical observances of an earlier age introduced into the service of God it may be presumed were also of divine appointment, on the general principle that as God alone can declare what worship He will receive, it is only as He appoints that any service can be properly offered to Him.

3. The true religion has in all ages been essentially the same, so that the truths symbolised by the institutions of the earlier dispensations are identical with those more directly and fully made known to us under the Christian dispensation. The substantial identity of the patriarchal and Mosaic religions with the Christian must be assumed in all attempts to argue from the O. T. to the N. or *vice versa*, and will not be denied by any who receive these books as divine. From this it necessarily follows that what was taught by *symbol* under the ancient economies as part of religious truth will be found identical with what is taught in *words* under the new dispensation.

4. The religion of Jesus Christ is one resting on the facts of his personal appearance and work. Out of these all its truths flow directly or indirectly; and to these they all have respect. Hence the truths taught symbolically to the O. T. saints, being

identical with those of Christianity, must also rest on and have respect to these facts.

5. A twofold character was thus of necessity given to the religious institutions of the ancient economies. They were primarily symbolical of religious truth. They were secondarily predictive of facts in the future on which these truths rested.

III. *Nature of Types*.—Proceeding on these data we may attempt to construct a typology, the design of which shall be to show what are the types in the O. T., and the correspondence between them and their antitypes in the N. T.

The first step towards this is to determine from the preceding data what is the proper idea of a type. This we would express as follows:—A type is an institute or act appointed by God to symbolise a religious truth, and to prefigure by means of analogy or resemblance those facts in the mediatorial work of Christ on which these truths rest. Here the following things are to be noted:—

1. A type is an institute or act. We use these terms in a wide sense, understanding under the former not only formal organisations and religious offices, but times, places, implements of religious service; and under the latter not only rites and ceremonies, but special acts or series of acts determined by the proper criterion to be typical. By this definition, however, *persons* and *things* simply as such are excluded. A person *per se*, or a thing simply as such, cannot possess a symbolical character; and cannot be the *σκιὰ* or prefigurative sign of another person or thing, much less of a fact or series of facts. A person may sustain a typical office or may perform a typical act; and a thing may be used in a typical service or ceremony; but in and by itself it cannot be a type. This sets aside a whole host of types which the ingenuity of interpreters has constructed out of the historical personages of the O. T. That many of these sustained typical offices, and performed typical acts, is admitted; but that they were in themselves—in their proper individual personality—types of our Lord, we cannot believe. The assertion, indeed, is to us unintelligible except in a sense which would be profane and untrue—viz. that their personal character and conduct was a representation of the character and conduct of our blessed Lord. It is true that for this doctrine of personal types the authority of the N. T. has been pleaded. But we are unable to find a solitary instance in the N. T. of any historical character mentioned in the O. T. being brought forward as having been personally a *σκιὰ* of Christ or his work. In one passage, indeed, Adam is called a *τύπος* of Christ, but *τύπος* is not there equivalent to *σκιὰ*; and, even if it were, it would not follow that it was Adam as a *person* who was the type of Christ, for the apostle is speaking throughout that context of our first parent in his official, federal, or representative character. The words of St. Peter also (1 Ep. iii. 21) have been cited as showing that a simple historical occurrence may be the type of a Christian truth; but whatever the apostle may mean in that passage by calling salvation by baptism the *ἀντίτυπον* of Noah's salvation by the ark, he cannot certainly mean that the latter was a divinely appointed prefiguration of the former. The utmost that can be drawn from his words is, that an analogy subsists between the two, whereby the one is fitted to illustrate the other. The strongest case in favour of the opinion we are opposing is our Lord's repre-

sentation of himself as the true bread of which the manna was the prefiguration. We cannot understand this as intimating less than that the manna was a type of him. Still it was the manna, not as a natural phenomenon, but as a special and peculiar provision made by God for the feeding of the people, that was the type of Christ; and in this divine appointment we find what reduces this under the head of proper types.

2. A type is an institute or act appointed by God, and by him adapted to the end it is designed to serve. Knowing what in due time was to be exhibited to men by the mission and work of his Son, God could not only predict that in words, but also give by means of symbolical acts and institutes such representation of it as would in some measure at least bring before the minds of the ancient saints a lively idea of it. And as God could alone do this it is on his appointment that the whole must rest. 'To constitute one thing the type of another, as the term is generally understood in reference to Scripture, something more is wanted than mere resemblance. The former must not only resemble the latter, but must have been *designed* to resemble the latter. It must have been so designed *in its original institution*. It must have been designed as something *preparatory* to the latter. The type as well as the antitype must have been pre-ordained; and they must have been pre-ordained as constituent parts of the same general scheme of Divine Providence. It is this *previous design*, and this pre-ordained connection, which constitute the relation of type and antitype' (Marsh, *Lectures on the Criticism and Interpretation of the Bible*, p. 374). By the earlier typologists this condition was neglected, and resemblance was made the sole criterion of the relation between an event or person of the O. T. and a fact or doctrine of the N. T. as type and antitype. A once popular book written on this plan is that of M'Ewen *on the Types and Figures of the O. T.* But the principle has been carried out to the wildest extent in a work recently published, entitled *The Typical Testimony to the Messiah: or the Analogy of the Scriptures in relation to typical persons*, by Micahiah Hill, Lond. 1862.

3. Each act or institute designed by God to serve as typical possessed a symbolical as well as a predictive character. This follows from the position that a type is a sensible emblem, or prefigurative token of some spiritual truth, which itself rests upon certain events yet future, but of which events a certain degree of knowledge is possessed by those to whom the type is exhibited. In all such cases, a twofold impression is conveyed to the mind: in the first place, that a particular truth already known is symbolically indicated; and in the second place, that those events on which that truth depends shall certainly take place.

In the testimony of God concerning his Son there are two points—one of fact, and one of doctrine—on both of which we must be instructed before we can really believe that testimony in all its fullness. What God calls us in the Bible to believe, is, first, 'the truth;' and, secondly, that 'truth, as it is in Christ Jesus.' With regard, for instance, to the doctrine of salvation by the atonement, there is, first, the general principle, that such a mode of salvation is reasonable, practicable, and intended by God; and, secondly, the matter of fact, that such an atonement has really been presented by our Lord Jesus Christ, and accepted by the Sove-

reign and Judge of all. Now it was, of course, the same under the O. T. dispensation: there was both the *doctrine* to be announced, and the *fact* to be predicted, before a *complete* statement of saving truth could be laid before the mind; and it was only as *both* of these were apprehended, that the belief of a Jew in the truth became full and intelligent. Hence every type contained at once a symbol of the truth and a prediction of the fact. It presented to the senses of the beholder an outward sign of a great general truth, and a memorial that in due season the event on which that truth rested would take place. Thus, for instance, in the case of *sacrifice*, there was both a symbol and a prediction. The slaying of the animal, and the burning of its flesh, were emblems of the great truth, that the sinner whose substitute that animal had become deserved death and subsequent agony, as well as of the general truth that God's plan of saving men from that desert was by the substitutionary sufferings of another. All this, however, would have been of no avail to the sin-burdened Israelite, who knew well that no mere animal could make atonement for the sins of man, had not that act prefigured and predicted the great sacrifice for sin on the part of the Lamb of God. But, pointed forward to this, his faith obtained an object on which to rest, and he was enabled to rejoice in the salvation of God. So also with regard to the immediate consequences of sacrifice. When a Jew had committed a trespass against the Mosaic law, he had to offer certain sacrifices before he could enjoy his civil and political rights. Immediately, however, on presenting these, he stood *rectus in curia*; he was acquitted of the sin he had committed, and restored to his civil privileges. With this, a mere carnal and worldly Jew was content. But to the pious believer, all this was only the symbol and type of something spiritual. It reminded him that his sins against God had made him guilty, and excluded him from the Divine favour; it directed him to the need of a sacrifice for sin ere God would forgive his transgression; and it assured him, that just as by sacrifice he had been restored to his place in the Jewish state, so by the great sacrifice might he be restored to the Divine favour, and to a place in that spiritual kingdom of which the Jewish nation was the type.

4. Though resemblance to that which it is designed to prefigure does not constitute the only or even the primary condition of a type, it is obvious that this must form a very important element in the adaptation of the type to serve its designed end. Hence we may expect to find some obvious analogy not only between the symbol and that which it symbolises, but also between the divinely-appointed act or institute, and that which it was designed to prefigure. Cyril. Alex. *ὁ τύπος . . . μὴ ὁμοίωσις τῆς ἀληθείας ἐσφέρεται* (in cap. vi. Amos. p. 315).

IV. *Relation to other modes of Teaching.*—Having thus indicated the nature of a type, we would now point out the relation of this mode of teaching divine truth to other modes employed in Scripture more or less akin to it.

1. *Relation to Prophecy.*—Type stands related to prophecy as its parallel. Like it, it teaches a present truth, and announces a future fulfilment of it; like it also, it has in its capacity of a type one definite meaning and one definite fulfilment, to both of which it was intended and designed to point. The difference between a prophecy and a type lies

only in this, that the former teaches by words, the latter by things: the former, that is, by an artificial combination of signs; the latter, by a scenical representation of the whole truth at once. A word is the symbol of an idea; a type is the symbol of some principle or law, and the prediction of some great general fact in the economy of redemption.

2. *Relation to Parable.*—From the word *παράβλη* being used to designate a type, it may be inferred that the connection between the two is intimate. A type, in fact, may be viewed as a sort of *acted parable*. Let us suppose, for instance, that our Lord, instead of describing in words the conduct and circumstances of the prodigal son, had, by the help of suitable actors and scenes, made the whole to pass before the eyes and ears of his auditors, the lesson would have been conveyed to them much in the same way as the truth concerning himself was conveyed to the ancient Jews by the typical rites of the Mosaic economy. In neither case is the lesson *new*, nor fully to be understood without an elucidatory comment; the object of both being to impress vividly a truth, otherwise reasonable or familiar, upon the minds of those to whom it is presented. There is this difference, however, between such a representation and a type,—that the former being merely doctrinal would be exhausted in inculcating a present truth, whilst the latter would, with the doctrine, incorporate a prophetic reference to some great event yet to happen, on which the doctrine was based.

3. *Relation to Comparison.*—The N. T. teachers, occasionally, for the sake of illustrating their meaning, introduce a *comparison*, drawn from some well-known fact in the history of the Jewish people, between which and the point they are discussing there exists some obvious analogy. In this way our Lord makes use of the fact of Moses's erecting the brazen serpent in the wilderness for the purpose of illustrating his own character as a deliverer, who was to be 'lifted up, that whosoever believeth in him should not perish, but have everlasting life' (John iii. 14, 15). On another occasion he instituted a comparison between his own case, as about to be consigned for a season to the tomb, and that of Jonah, who had been 'three days and three nights in the belly of the fish' (Matt. xii. 40). From this it has been hastily concluded that these events, and others alluded to in the N. T. in a similar manner, were real types and prefigurations of the facts they are brought to illustrate. It is obvious, however, that there is a great difference between an historical event—whether occurring in the natural course of things or by the special interposition of the divine power, and which a subsequent writer or speaker may make use of to illustrate, by comparison, some fact or doctrine of which he is treating—and a symbolical institute expressly appointed by God to prefigure, to those among whom it was set up, certain great transactions in connection with that plan of redemption which, in the fulness of time, he was to unfold to mankind. In the two cases above referred to there is the total absence of any evidence that the events recorded possess any other than a simple historical character. In the case of the brazen serpent, indeed, we have divine appointment; but along with the appointment we have the specific mention of the *purpose* for which it was set up, which was not to teach any religious truths at all, or form any part of religious worship, but simply that it might act as an instrument of

cure to the Israelites who were bitten by the fiery flying serpents. [BRAZEN SERPENT.] It is also possible that such a thing as the brazen serpent *might* possess a symbolical character; but if any will from this argue that it really had such a character, and that it was a symbol of Christ, it will be incumbent upon him, in the first place, to show some evidence in favour of his inference, and, in the next, to explain how it should come to pass that the express symbolical antithesis of the Messiah, the *serpent*, could form part of an institute intended to prefigure his work as the Saviour of men. As to the case of Jonah, we do not find in it so much as the appearance of anything typical; and, indeed, it would have been very strange had God caused the prophet to perform an action typical of the burial and resurrection of Christ, under circumstances in which there was no human being to receive any instruction by it except himself. A type is an acted lesson—a visible representation of invisible truths. To its utility, therefore, spectators are as indispensable as actors; and where the former are not present, to say that God appoints the latter to go through their performance, is to charge him with doing something in vain.

4. *Relation to Allegory.*—'An allegory,' says Bishop Marsh, 'according to its original and proper meaning, denotes a representation of one thing which is intended to excite the representation of another thing.' Adopting this as a just explanation, it is obvious that type and allegory are closely allied. In both there is an original representation which has a meaning of its own, and there is the use of that for the purpose of calling up to the mind the conception of another thing analogous to the former. The two, however, are very distinct. They differ in two respects: the one is that the subject of an allegory is a mere historical event occurring in the ordinary course of things, whereas a type is an act or institute expressly appointed by God to teach some important truth; the other is, that the allegorical sense is a *fictional* meaning put upon a narrative for the sake of illustrating something else; whereas the explanation of a type is its *true* and *only* meaning, and is adduced solely for the sake of unfolding that meaning. Thus Paul, in order to explain the doctrine of the covenants, allegorises the anecdote of Sarai and Hagar recorded by Moses, making Sarai represent the Abrahamic or new or everlasting covenant, and Hagar the Sinaitic or old covenant (Gal. iv. 24, 25). In the same way he allegorises the fact of the water from the rock following the Israelites through the wilderness, speaking of it as representing Christ in the blessings he confers upon his church (1 Cor. x. 4). These allegorisings (*ἀλληγοροῦμενα*) are only comparisons without the form; and their use is obviously merely to explain one thing by another. The radical difference between the exposition of a type and an allegorical interpretation of history, is apparent from the use which the apostle makes of them respectively. His allegorisings are mere illustrations on which, by themselves, nothing is built; whereas his typical explanations are all brought forward as forming the basis of arguments addressed to those who, admitting the type, were thereby pledged to the admission of the truths it embodied.

V. *Interpretation of Types.*—As a general rule it may be laid down that we should always expect to find in the antitype something higher and more

glorious than in the type. Chrysost. (in *Genes. Hom.* 35) *μη πάντα ἀπαλτει ἐν τῷ τύπῳ· οὐδὲ γὰρ ἂν εἴη τύπος εἰ μέλλοι παντὰ ἔχειν τὰ τῇ ἀληθείᾳ συμβαίνοντα*. This follows from the nature of the case. For if the design of a type be by outward symbols to foreshadow spiritual truths, it follows that, in proportion as the thing signified is more valuable than the mere sign, and as things spiritual and eternal are more glorious than things material and transitory, the type must be inferior in value and in majesty to that which it is designed to prefigure.

More specific rules having reference especially to the Mosaic ritual are—1. The symbolical ritual, as a whole and in its individual parts, can set forth only such ideas and truths as accord with the known, and elsewhere clearly announced, principles of O. T. theology. 2. An accurate knowledge of the outward constitution of each symbol is an indispensable condition of its interpretation; for, as the sole object of the symbol is to convey spiritual truth by sensible representations, to attempt to discover the former before we understand the latter, is to endeavour to reach an end without using the means. 3. The first step in the interpretation of a symbol is the explanation of its *name*; for, as this is generally given with a direct reference to the idea symbolised, it forms of itself a sort of exponent of the symbol to which it is affixed. 4. Each symbol expresses, in general, only *one* grand idea; at the same time, of course, including all subordinate ideas that may be involved in it. Thus, in the case of sacrifices, a variety of truths are presented to the mind, but all going to make up the one grand truth which that rite symbolised. 5. Each symbol has always the same fundamental meaning, however different may be the objects with which it is combined. Thus, for instance, the act of purification has the same symbolical meaning, whether it is performed upon a person or an animal, or upon a material object. 6. In interpreting a symbol, we must throw out of view all that is merely necessitated by the laws of its physical condition, and that does not serve to help out the symbolical representation. Symbols have often accessories of two kinds: the one consisting of such as are in themselves symbolical, and which go to make up the sum total of the representation; the other, of such as are, from the nature of things, required by the material objects composing the symbol for their continued existence. Thus, in the case of the candlestick in the sanctuary, it was provided that it should have branches, and knobs, and flowers, and also that it should be supplied with snuffers and snuff dishes. Now, of those accessories, the former were not indispensable to its serving the purpose for which it was designed—that of giving light; but they, having each a symbolical meaning, added to the symbolical effect of the whole; whereas the latter were merely required in order to prevent the lights from dying out for want of cleansing. Keeping this distinction in view, we need not be afraid of going too minutely into the explanation of the Mosaic ritual. Every thing, in fact, of which it was composed was a symbol, with the single exception of such things as the earthly, physical condition of the substance or persons employed rendered indispensable. Nay, even these, from belonging to a typical institute, such as the nation of Israel was, acquired a sort of secondary typical character; just as the

ordinary events of Israelitish history have for the same reason a spiritually doctrinal character. (Michaelis, *Entwurf der Typischen Gottesgelahrtheit*, Gött. 1763; Bähr, *Symbolik des Mosaischen Cultus*, 2 vols. Heidelb. 1837; Chevallier, *Hulsean Lecture* for 1826; Fairbairn, *The Typology of Scripture*, 2 vols. Edin. 1854.)—W. L. A.

TYRANNUS (Τύραννος), a sophist or rhetorician of Ephesus, who kept one of those schools of philosophy and eloquence so common at that period. St. Paul preached for two years daily in his school after quitting the synagogue (Acts xix. 9). This proves that the school was Greek, not Jewish. It does not appear whether Tyrannus was himself a convert or not; for it may be that he let to the apostle the house or hall which he used: but it is more pleasant to suppose that he was a convert, and that the apostle was hospitably entertained by him, and obtained the use of the hall in which he himself taught.

TYRE, SŪR, SŌR (Heb. צֹר or צָר; Phoen. צָר; Arab. صور [Aram. ܥܝܪܐ]; Gr. Τύρος; Jerome,

Πέτρα, ἡ Τυρίων πόλις, Σῶρ; whence the adjective Sarranus), a city and state of ancient Phoenicia, situated in . . . It is generally supposed to have derived its name from the (double) rock on which its first foundations were laid; while Hitzig traces it (erroneously) to صور, 'Palma exigua.' The name

does not occur among the six coast tribes mentioned in Gen. x. 15-18, and it is therefore generally taken to be a subsequent colony of Sidon (צִידֹן, the metropolis; cf. Just. 18. 3), from which it was distant 200 stadia. Nor does Homer, who specially names Sidon, appear to be aware of the existence of Tyre. Notwithstanding this, however, the latter, after its sudden rise, began to dispute the claim of Sidon with respect even to the priority of age, and went to the extent of assuming on its coins the designation צִידֹן מֵאֵם, 'Mother of the Sidonians.' This boasted antiquity (comp. Is. xxiii. 7; Τύρος ὡγενή, Dion. Perig. 911, etc.), which was traced by its priests to an antediluvian date, is by Josephus fixed at about B.C. 1250, and by Justin about a century later. It succeeded, at all events, in at least dividing the honours of a venerable age with the rival city in the eyes of foreign nations, and the palm is by late classical writers accorded variously to the one or the other. Yet it would appear, notwithstanding Justin's and other writers' testimonies, that Tyre, though her paramount greatness was due to Sidon—which, beaten or destroyed by 'Ascalon,' transferred herself entirely, inhabitants, commerce, manufactures, and all, to the former—had long existed independently of her supposed mother-city. For, even setting aside the primitive myths of Astarte having been born at Tyre, and Melkart having built the city—myths to which a certain substratum of truth is not to be denied—or the existence of the Agenorium, derived from Agenor, the 'founder of the Tyrian dynasty,' still existing at the time of Alexander the Great—the fact of Astarte, the supreme goddess of Sidon, taking second rank only at Tyre, and the Baal Melkart, unknown to Sidon, being the tutelary deity of Tyre, wars against the idea of the latter being nothing but a colony of the former. The most vital condition of Phoenician colonisation was, as is well known, the accurate adherence of the daughter

cities to the worship and special deities of the mother-cities. And situated midway, as it were, between Babylonia and Egypt, the most ancient seats of human civilisation, it is but natural to assume that its age, although not to be fixed now with anything like precision, must rank high even among the oldest cities of the ancient world, and both Justin's and Josephus's dates must be taken to refer to the regeneration or second foundation of Tyre by the Sidonians after their defeat by the Philistines. With this also the mention of a 'strong city Tyre'—*i.e.* the original city—in Josh. xix. 29 agrees perfectly.

Tyre was composed of two distinct parts or towns in historical times: the one situated on the mainland or continental Tyre, and one on the island opposite, from four to thirty stadia (Pliny, Strabo) distant from each other. According to Pliny, the circumference of both was reckoned at about nineteen Roman miles, the island-town comprising about 22 stadia. The town on the shore was called Palæ-Tyros, not from its having been founded before Island-Tyros—for this, indeed, we may assume to have been the first of the two (Reland, Vitringa, Hengstenberg, etc.)—but from the circumstance of its having achieved a high renown long before its much less favourably situated island-sister. Constantly exposed to earthquakes and deluges—occupying a space naturally circumscribed, and rendered still more so by the erections necessary for the purple fisheries and manufactories—and cut off from the easy means of export and import by caravans that belonged to the opposite city, Island-Tyros was by far inferior in importance. In fact, only one (the western) part of the island had been built over up to the time of Hiram, the contemporary of Solomon—*viz.* the 'Old Town' (τὸ ἄστυ), which probably served as harbour, a place for arsenals and magazines, to Palæ-Tyros, that by this time had sent out colonies already to Tartessus and the northern coast of Lybia. The other part of the island, or rather a small island by itself, which has now completely disappeared, and which was first joined to the ἄστυ as the 'New Town' by Hiram, had till then probably been inhabited only by the priests attached to the sanctuary of Melkart. To these two there came a third town or suburb, the Eurychoros (esplanade), formed by means of substructions on the eastern side of the rock. Palæ-Tyros, extending from the river Leontes on the north to the Ras-el-Ain on the south, covered with all its outlying parts no less than about 22 stadia (Pliny), and lay in one of the most fertile and blooming plains of Phœnicia; cf. Hosea's

(ix. 13) שְׁתוּלָה בְנוּה, 'planted in a pleasant place,' or William of Tyre's 'fertilitate præcipua et amœnitatē quasi singularis, habet planitiem sibi continuam divitis glebæ et opimi soli' (xiii. 3). It was watered by several aqueducts, which carried the stream from the fountains-group situated in the plain itself (Head of the Well, Ras-al-Ayin), not only through the whole territory of the continental city, but, probably by means of subterranean pipes, also into the island-city. Without this supposition it would be hardly credible how the latter, which, up to the siege by Salmanassar (before the 8th century), had subsisted on rain-water only collected in cisterns and open canals (ὕδαργυροί) from the Ras, could have stood the long sieges by Nebuchadnezzar (13 years) and of Alexander,

who naturally stopped the overground supplies: without apparently once suffering from want of water. Possibly we may, in a certain annual rite called the 'Wedding of the land-water to the sea-water,' still kept up by the inhabitants, see a faint reminiscence of this ancient juncture. Here also stood the ancient royal palace and the first sanctuary of Heracles, though the most celebrated one lay on the island opposite. The happy mixture of land and sea scenery thus exhibited by the two cities in the time of their prosperity is thus graphically described by Nonnus, a learned Egyptian antideologist of the end of the 4th Christian century: 'The sailor furrows the sea with his oar, as the ploughman the soil, the lowing of oxen and the song of birds answer the deep roar of the main; the Hamadryad among the tall trees hears the voice of the Nereid calling to her from the waves; the breeze from Lebanon, while it cools the rustic at his mid-day labour, speeds the sailor seaward.' 'O Tyros,' exclaims the prophet (Ezek. xxvii. 3, etc.), 'thou hast said: I am of perfect beauty; thy borders are in the midst of the sea, thy builders have perfected thy beauty.' The poets call her 'a virgin bathing in the sea, a Tartessus-ship swimming upon the ocean, an island on shore, and a city in the sea withal,' etc. Above all, however, Nonnus makes his Indian hero get into ecstasies at the 'primeval fountains, especially those where the water . . . gushing out of the depths of the earth, returns every hour;' and he mentions three distinct sources or water-nymphs: 'Abarbera, the fertile; Kal-lirrhoe, the sweet; and Drosera, the rich and bridal one.'

The early history of Tyre is so completely shrouded in mythical mystery that a rational reconstruction of it is next to impossible. We hear of kings of Phœnicia whose very names mostly prove them to be mere types of deities, or special tribes, such as Agenor, Phoenix, Phalīs, Sidon, Tetramnestus, Tennes, Strato, Abdalominus (a word spelt in many different ways, the only reasonable orthography of which however can only be Abd-Alonim

[Hebr. Eljonim], עֶבֶר עֲלִיֹנִים, servant of the Highest Ones or Gods). Abibal however is called the first king of Tyre, and the predecessor of Hiram (Hierom, Suram, etc.), the Biblical Chiram, with whom indeed begins what to us is approximately the historical period of Phœnicia. We have mentioned already the calamity in consequence of which the Sidonians, hitherto the mightiest power of Phœnicia, were obliged to leave their capital and seek refuge in neighbouring Tyre. This took place about 1209 B.C., and very soon after that period Tyre assumed the hegemony. In the time of Samuel we already hear of the Princes (Suffetes) of Tyre oppressing the Israelites. Under Hiram (980-947), the great friend of Solomon, Tyre not only attained to its fullest glory and renown among its sister-states, but the capital itself, enlarged by him into three distinct towns, received its fullest share of palaces, temples, and public edifices, and its two roadsteads and two harbours probably date from this period:—Such, indeed, was the perfection which architecture and the fine arts generally must have attained at that time that Solomon borrowed Tyrian artificers for the erection of his own royal palaces and the temple of Jerusalem, whither Hiram, 'ever a lover of David,' and the first king who concluded an alliance between Phœnicia and

Judæa, had already sent cedar-trees and workmen during the lifetime of David. Whether the letters given by Josephus as having passed between Solomon and Hiram be apocryphal or not, we have no means of judging; but there can be no doubt as to the friendly relations between the two countries, and their mutual exports and imports being highly beneficial to both, more particularly perhaps to Judæa. An offer of twenty cities in Galilee, not far from Tyre, by Solomon, in exchange of Hiram's many offices of kindness towards him, is recorded

to have been declined by the latter (כבול=like nothing; whence the name Kabul). It is at this period, also, when the joint trading expeditions to 'Ophir' are recorded to have taken place, in which the Tyrians furnished the pilots and mariners. Hiram himself seems altogether to have been a very refined, pious, and peaceful monarch. Hardly any wars are recorded during his lifetime, and his reported interchange of problems with the 'wisest of mankind' points to his renown as a '*bel esprit*.' Solomon is by the unanimous testimony of three Phœnician writers said to have married his daughter, who carried him finally over to the Ashtaroth worship. This account however may arise from a confusion between him and a later king of Judæa, Ahab, who, about half a century afterwards, married Jezebel, the daughter of a Tyrian king. Hiram was followed, according to Menander (in Josephus) and Theophilus, by Balestartus, whose four sons reigned after him for short periods. First came Abdastartus, 939-931, who, in consequence of a palace-revolution, was followed on the throne for twelve years by a son of his nurse: a period of internal sedition and general lawlessness, during which, so Justin tells us, all the free citizens of Tyre were murdered by the slaves having intervened. Astartus, the eldest son of Balestartus, succeeded to the government, and ruled from 918-907, when the third brother Astarymus was made king. He was murdered nine years later by Phalettus, his youngest brother, who, after a brief reign of nine months, was put to death by Ithobaal, priest of Astarte, in whose family the kingdom henceforth became hereditary. This Ithobaal, the Ethbaal of Scripture, whose daughter was married to Ahab, is called by Josephus 'king of Tyre and Sidon,' a sign of the supremacy which Tyre had acquired in his day. The drought reported to have taken place in Judæa under Ahab seems to have also touched Phœnicia, and such was Ithobaal's piety that at his supplication thunderclaps were heard, followed by copious rains, and it was chiefly before his reign (898-866) that Tyre commenced to spread its colonies as far as Africa, Spain, etc.: owing in the first instance probably to the danger of life and uncertainty of circumstances into which the country had been plunged by the internal conflicts. But Ithobaal himself seems to have encouraged colonisation, and, in order to prevent the overcrowding of the old cities, to have built a number of new cities. Balezor, his son, succeeded in 865, and was followed by his son Mutton, the office of high-priest devolving on his second son Sicharbaal. Mutton died in 833 and left two children, Elissa (Dido) and Pygmalion, who were to share the kingdom between them, while Elissa, by her marriage with Sicharbaal, was to unite the high-priesthood with the crown. To this arrangement however, the people, averse to the supreme priestly power, demurred, and Pygmalion

was declared sole king. Elissa's husband having been killed, for the sake of his treasures, by the new king, and herself being deprived of her dominion, she is said to have entered into a conspiracy with the aristocratic party, and in the ninth year of Pygmalion's reign, assisted and followed by her brother Barca and the principal families of the land, to have reached Carthage (New Town, קרת חדשה), a colony founded some time before by the Sidonians—about 813—and to have completely rebuilt it and laid the foundation for a power which contended with mighty Rome for the empire of the world.

What Tyre had done to Sidon, Carthage did to Tyre—it gradually extinguished it. We hear nothing more of it till, in the middle of the 8th century, it is found in violent contact with the first of the three great Asiatic powers (Chaldæa, Assyria, Egypt), that, one after the other, endeavoured to make themselves masters of the Tyro-Phœnician coast, and the eastern and western trade concentrated upon it.

The political existence of Palestine, Syria, and Phœnicia, which, instead of making a joint desperate stand, kept on intriguing and plotting against each other—Phœnicia, moreover, being hated and despised by her allies for her iniquitous trade with slaves kidnapped among her neighbours, chiefly in Judæa—was doomed from that time forth. At the time of Salmanassar, king of Assyria, Elulaios (Pyas) ruled Tyre, or rather Phœnicia. The Gittites, at one time subject to that country, had, it seems, revolted and thrown off his yoke. Elulaios, seizing the opportunity of Hezekiah's defeat of the Philistines, marched upon Gath, in order to reconquer it. Whereupon Salmanassar was appealed to by the Gittites, and taking up their cause, made Elulaios desist from his plan. In consequence of this, Sidon, Arke, Palæ-Tyros, and other cities, also threw off their allegiance to Tyre, and voluntarily submitted to Salmanassar, who now tried to reduce Tyre herself. He sent a fleet against her, which was defeated and dispersed with a much smaller number of vessels. He now tried to reduce the city by land, cutting off the water-supplies. For five years, however, Tyre withstood his forces, and when, at the end of this time, the Assyrian king died, the siege was raised. But there can hardly be a doubt that Tyre, as well as the whole of Phœnicia, very soon was made tributary to Assyria, like all the neighbouring countries, and the calamities brought upon them all alike by the uninterrupted war-expeditions of the Assyrian monarchs could not but be felt also by the dependencies and colonies. These fell more or less about this time into the hands of new settlers, from whom again Carthage somewhat later wrested a part for herself.

When the iron grasp of Assyria began to relax, the Chaldæo-Egyptian contest brought still greater miseries upon that unfortunate Syro-Phœnician coast, and Phœnicia, still nominally ruled by Tyre. The Phœnicians, it would appear, had allied themselves to the Egyptians, who under Psammetichus had seized upon Philistæa, and were about to assist Pharaoh-Necho in his further conquest of the Tyro-Palestinian states. When, therefore, at Karkemish, the Egyptians had been defeated by the Chaldæans, the latter instantly followed up their victory by occupying Syria, Palestine, and Phœnicia, and selling a great number of the inhabitants of the

latter, about 605. A league having been formed between these states to throw off the foreign yoke, gave rise to a new Chaldean expedition against them under Nebuchadnezzar (Jer. xxv. 22 ; xxvii. 3 ; xlvii. 4), which ended with the destruction of Jerusalem (587) and the reduction of the sea-coast—except Tyre. For thirteen years Nebuchadnezzar besieged it by water and by land, but, it would appear, without success. The most graphic descriptions of this siege are found in Ezekiel (xxvi. 7-12 ; xxix. 18 ; xxviii. 2 ; xxvi. 17, etc.)

An apparent show of submission, but not a subjection—leaving the native sovereigns on the throne and their wealth and naval power untouched—was all Nebuchadnezzar had gained when he raised the 'wageless' siege (cf. Ezek. xxix. 17). Once more Nebuchadnezzar armed, at the end of this war, against Egypt, but Pharaoh-Apries, swiftly marching upon Phœnicia, subduing it and destroying its fleet, prevented this expedition. At this time the ancient constitution of Tyre was changed. Ithobaal had been followed by Baal, but after Baal two

511. Tyre.

judges (suffetes) took for a certain period the place of the monarch. We hear of internal commotions—natural enough in a country and city upon which calamity after calamity had fallen in so short a time ; and the existence of two parties in the commonwealth that looked respectively to Chaldaea and to Egypt could not but foster those internal dissensions. In 538, while Eiromus stood at the head of the Tyrian or Phœnician affairs, Cyrus captured Babylon, and thus became master also of Phœnicia, which had reverted to this power. At that time

VOL. III.

Sidon, being made the royal residence, again resumed the Hegemony. Under the successive Persian rulers Phœnicia was allowed to retain many of its national institutions, and even a certain amount of independence, in return for which it paid a comparatively small tax and placed its again powerful fleet at the disposal of the conquerors, who entirely lacked that most vital element of naval power. Together with Philistæa and Cyprus it was incorporated under Darius Hystaspis in the fifth nomos or circle of the empire,

3 X 2

and up to the time of Xerxes the relations between the conquerors and the conquered were of a perfectly friendly nature. But when this king, during his Greek invasion, had managed to destroy the highly-prized Phœnician fleet almost completely, and to this calamity added galling measures and humiliations without end, the people became so exasperated that they took part, under Sidon's leadership, in the revolt of Egypt against Artaxerxes Mnemon, and Ochus, about the middle of the 4th century, which ended most disastrously for the whole country, and particularly for Sidon, which, wealth and all, was fired by its own inhabitants. Tyre afterwards (350) again resumed the sway, until, after the battle on the Issus, all the Phœnician cities except herself paid their allegiance to Alexander the Great. For seven months she sustained one of the most remarkable sieges ever recorded (332 B.C.) Palæ-Tyros having been razed to the ground, this once island-city was connected by the conqueror with the mainland by means of a mole, which, once destroyed, had to be reconstructed entirely anew. An immense fleet was collected, the ablest engineers of Phœnicia and Cyprus exercised all their skill on the construction of new battering and other machines, while the means of defence on the part of the Tyrians were as cunning as they were successful, and fearfully galling to the besiegers. At last Tyros fell under a furious double attack, and, provoked by their desperate resistance even after the town was taken already, the soldiery fired it and massacred an immense number of the inhabitants. Alexander replaced the population by new colonists, chiefly Carians, and soon again the exceptionally favourable position of the place regained for it part of its ancient prosperity, and scarcely eighteen years afterwards it was capable of sustaining a new siege, notwithstanding even the remaining mole.

Ptolemy had, after Alexander's death, annexed Phœnicia to his kingdom; but when, in 315, Antigonus returned from Babylonia, he easily expelled his garrisons from all the Phœnician cities save Tyre, which only surrendered after an eighteen months' siege. The boundaries of its territory at that period were: Sarepta to the north, the 'Tyrian Ladder' to the south, and Kedes and Baka in Galilee to the east. Beyond this nothing particular is known of it from this time forth to the time of the civil wars of Rome—with which empire Phœnicia had been incorporated together with Syria, by Pompey—when Cassius divided Syria into small provinces and sold them separately. Tyre for a short period thus became a principality again with a king of her own. Mark Antony presented it, together with the whole of Phœnicia, to Cleopatra, securing to Tyre (and Sidon), in spite of Cleopatra's entreaties, its ancient freedom; but what shadow of independence it had retained was taken from it by Augustus (A.D. 20). In the N. T. we find mention made of it (Matt. xi. 21; Luke x. 13, etc.), and at an early period a Christian community was formed there (Acts xxi. 3, 7). For a long time afterwards Tyre retained her manufactures and trade, though a mere shadow of what these once had been:—chiefly with regard to her dyeing produce Hadrian granted Tyre the title of metropolis, and it formed the principal naval station on the Tyrian coast. Once again it was fired in A.D. 193, when it took part with Septimius Severus against Pescennius Niger in their contest for the crown, and Severus

gratefully bestowed upon the place, which he peopled with his third legion, the title of colony and the Jus Italicum. And such was its elastic vitality, that at the time of Constantine it again equalled all the Eastern cities in wealth and commercial prosperity. St. Jerome, in the 4th century, calls it the noblest and most beautiful city of Phœnicia, and expresses his astonishment at the apparent nonfulfilment of the prophecy which threatened its eternal desolation. ('*Nec ædificaberis ultra*' videtur facere quæstionem, quomodo non sit ædificata? quam hodie cernimus Phœnices nobilissimam et pulcherrimam civitatem.') Notwithstanding the establishment of an imperial dyeing manufactory at Constantinople in the 7th century, when Phœnicia was taken by the Saracens, Tyre yet retained her ancient celebrity for her purple, which was imported into Lombardy at the time of Charlemagne. Under the Caliphs it enjoyed the benefits of a mild and enlightened dominion, and during the Crusades was much admired both for its natural beauty and its fine edifices, and its generally prosperous aspect. It again had at that time to sustain a long siege, but finally surrendered (1124), and was made an archbishopric, bestowed four years afterwards upon William of Tyre, the chronicler of the Crusades. In August 1192, it was fixed as the northern boundary of the Christian territories in Palestine, and continued to flourish, chiefly through the Venetian trade, as a commercial city until the conquest of Syria by Selim I. in 1516, from which time forth its decline, further aided by the discovery of the New World and the route to Asia by the Cape of Good Hope, has been rapid and complete. Nothing but ruins, and hardly any inhabitants were found by visitors from the beginning of the 16th century to the middle of the 18th, when a change for the better took place, although its general desolate aspect remains the same. There are yet, according to Mr. Porter, from about 3000 to 4000 inhabitants living among the broken ruins of its former magnificence, eking out a scanty livelihood upon insignificant exports of tobacco, cotton, wool, and wood. The place as it now stands was founded under the old name Sûr in 1766, and has suffered very considerably during the earthquake in 1837. The remains of an ancient cathedral church enclose probably the bones of the Emperor Frederic Barbarossa and of Origen. About 1½ mile distant from Tyre is the so-called tomb of Hiram, an immense sarcophagus of limestone, supposed to contain the corpse of that king. [See PHœNICIA; SIDON; HIRAM, etc.]—E. D.

## U

UCAL. [PROVERBS, BOOK OF.]

ULAI (𐤆𐤋𐤁, Sept. *Oûbal*), a river which flowed past the city of Shushan (Susa), where Daniel was (Dan. viii. 2). It can hardly be doubted that this name appears in *Euleus*, the name given by Pliny (*Hist. Nat.* vi. 31) and Arrian (*Exped. Alex.* vii. 7) to a river which flowed past Susa, and of the waters of which alone, the former says, the kings of Persia drink. But Herodotus (i. 188; v. 49, 52) says the same of a river which he calls *Choaspes*; and Strabo (xv. 728), Curtius (v. 2. 9), and others, call the river of Susa by this name. Two solutions of this discrepancy have been proposed. The one is, that as

Ptolemy says (vi. 3. 2) that the Eulæus had two sources, the one in Media and the other in Susiana, it may thus have had two names, and have received sometimes one and sometimes the other. The other solution is, that as there is reason to believe that the modern *Kerkhah*, which is identified with the *Choaspes*, bifurcated at a point some 20 miles N. W. of Susa, and sent forth thence a branch which passed by Susa and fell into the *Pasitigris* (*Kuran*), it is probable that the name Eulæus belonged properly to this branch, whilst the main stream retained that of Choaspes. Either of these hypotheses will explain and remove the discrepancy. The latter is probably to be preferred (Loftus, *Chaldea and Susiana*, p. 424, ff.; Kinneir, *Persian Empire*; Rawlinson and Layard in *Geograph. Journal*, ix. 48, ff., and xvi. 91, ff.) In this case the Ulai no longer exists.—W. L. A.

ULFILAS, the apostle of the Goths, was descended from a family which originally belonged to Sadagolthina, near the town of Parnassus in Cappadocia, whence his ancestors were carried captive by the Goths about the middle of the 3d century (Philostorg. *Hist. Eccl.* ii. 5). He was born A.D. 313; and, his mother being probably a Goth, he received a Gothic name, *Vulfila* = *wolf/kin*, from *Vulfo*, *wolf*. He grew up familiar with both the Gothic and Greek tongues. He commenced his career as a religious teacher among the West-Goths on the banks of the Danube; and in 343 he was consecrated bishop. This is the account of Auxentius, which seems preferable to that of Philostorgius, who says he was consecrated by Eusebius and other bishops on the occasion of his being sent to Constantine the Great on an embassy by the ruler of the Goths; for as Constantine died in 337, when Ulfilas was only 24 years of age, we cannot suppose that one so young would be set apart to so responsible an office. Philostorgius says he was the first bishop of the Goths; but in the list of bishops who were at the Council of Nice in 325 appears the name of an earlier Gothic bishop, Theophilus. From the first Ulfilas belonged to the Arian party, and in the synod at Constantinople in A.D. 360 acted with that party. He laboured with earnest zeal for the conversion of the heathen Goths, and with such success as to draw down on the Christians the persecution of the ruling powers. Ulfilas having obtained permission of the emperor to retire with his adherents beyond the limits of the empire, betook himself to Mœsia, where, at the foot of Mount Hæmus, near Nicopolis, a settlement was formed by those who had accompanied him in his exile. Here the rest of his life was spent, not without vicissitudes and agitations, yet in unwearied efforts for the spiritual good of the people among whom he dwelt. At what time his translation of the Bible into the Gothic tongue—the great and abiding monument of his evangelistic zeal—was executed is uncertain; but it was probably about A.D. 370 [GOTHIC VERSION]. He died in 383, overwhelmed, it is said, by finding himself ranked as a heretic by the Council of 381.—W. L. A.

UMBREIT, FRIED. WILH. KARL, was born 11th April 1795, at Sonneborn, near Gotha. At an early period he devoted himself to Oriental and Biblical literature, especially that of the O. T. In 1820 he became a professor extraordinary of philosophy and theology in the philosophical faculty at

Heidelberg; in 1823 he was made an ordinary professor; and in 1829 he conjoined with this an ordinary professorship in the theological faculty. He received from the Bavarian government in 1832 the title of Kirchenrath, and in 1844 that of Geheimen-Kirchenrath. For many years he edited, along with Dr. Ullmann, the *Theolog. Studien und Kritiken*, one of the most influential of the German theological journals. He began his publications on the O. T. with a new translation of the Song of Solomon, with æsthetic illustrations, Gott. 1820; and this was followed by his translation of Job, with notes, Heidelb. 1824 [translated into English and forming 2 vols. of the Edinburgh Biblical Cabinet]; and his translation, with notes, of the Proverbs, Heidelb. 1826. A work of higher merit than these is his *Praktischen Commentar ueber die Propheten des A. B.*, 4 Bde. Hamb. 1841-46. He published also *Christliche Erbauung aus dem Psalter*, Hamb. 1835, a translation with explanations of thirty-five Psalms, arranged under the heads of Faith, Redemption, Hope; *Grundtöne des A. T.* Hamb. 1843; *Der Knecht Gottes. Beiträge zur Christologie des A. B.* Hamb. 1840; *Die Sünde Beitr. zur Theologie des A. B.* Hamb. and Gotha 1856. His last work, and not the least valuable, was one in which he brought his O. T. learning to bear on the elucidation of the N. T., *Der Brief an die Römer aus dem Grunde des A. T. ausgelegt*, Gotha 1856. He died 26th April 1860.—W. L. A.

UMMAH (עַמְמָה; Ἀμμα; *Amma*), a city of Asher, mentioned only in Josh. xix. 30. There is nothing in the passage to indicate its exact position, farther than that it does not appear to have been one of the border cities. Eusebius and Jerome evidently knew nothing of it (*Onomast.* s. v. 'Amna'). Dr. Thomson suggested that it may be identical with the modern *Alma*, a village situated 'on the top of the Ladder of Tyre, and a little more than one hour east of its termination at the sea' (*Bibliotheca Sacra*, xii. p. 827). The Arabic name (عَلما) bears some resemblance to the Hebrew, and the situation is not unsuitable; but more than this cannot be said. The statement of Delitzsch (*Comment. on Josh.*), that '*Ummah* may perhaps have been preserved in Kefr Hammana, upon the Lebanon, to the south of Hammana,' cannot be received, for the territory of Asher reached only to Zidon on the north, and Ammeih is at least twenty miles beyond it.—J. L. P.

#### UNCLEAN MEATS. [FOOD.]

UNCLEANNES (טִמְאָה, from the adj. טָמֵא, so frequently used in the almost technical sense of Levitical defilement, and especially in the leper's wail, Lev. xiii. 45) is the term by which, in the law of Moses, is indicated that condition which caused the temporary suspension of a Hebrew man or woman from their religious and social privileges, as subjects of the Theocracy. About seventy specific cases of possible uncleanness are described, and others implied. Various modes of classifying them have been resorted to. The old Jewish writers made two classes, according to the length of the ceremonial suspension. The lighter class embraced the instances of uncleanness for the day; the heavier class, those of a longer period (*Pesietha*, in Ugolino, xv. 1148; Maimonides, *Constitutions*, in Ugol. viii. 58, where the contaminated of the

lighter class is called טבול יום, *de die lavandus*, comp. Lightfoot, *Harm. of O. T.* [Works by Pitman, ii. 122]; only he gives four classes, according to time). Other writers (see Corn-a-Lapide on Lev. xv. 22) make also two classes, only on a different principle: 'Duplex fuit immundities Hebr. Una erat peccatum, quia praecepto Dei vetita, talis erat comedere carnes immundas. Talis etiam erat pati lepram, etc. Altera non erat vetita, sed solum indicata et statuta, talis erat tangere leprosum, etc. Haec non erant peccata, sed tantum inducebant irregularitatem quandam.' Modern Jews profess to be bound only by the former of these classes. The *threefold* classification, however, which is indicated in the law of Moses itself, seems to be most convenient, and is most commonly adopted:—i. 'Every leper;' ii. 'Every one that hath an issue;' iii. 'Whoever is defiled by the dead' (see Num. v. 2). The lawgiver, no doubt, here refers to his own enactments in Leviticus, and under the three generic phrases includes all the instances of uncleanness. (1.) He begins with *Leprosy*, the gravest of all instances. A minute diagnosis of this terrible malady in its ceremonial character, and the purification which the law prescribed, are given in Lev. xiii. The reader is also referred for a full treatment of both parts of the subject to the article *LEPROSY*, especially sec. 2 (vol. ii. pp. 813, 814). (2.) Under the second head, of uncleanness from 'issues,' are included all those physical emanations or bodily discharges to which both sexes are liable. They are described in their several details in the following passages: [a.] The woman's *periodical* issues in Lev. xv. 19-24, and *irregular* issues in verses 25-27. These were alike unclean in themselves (the former for seven days, the latter during the irregularity), and communicated uncleanness during the day alike to 'whosoever touched her,' 'her bed,' or 'anything that she sat on;' from which uncleanness they escaped 'at even,' by washing their clothes and bathing. Any man, who so far forgot decency as to lie with her, and be stained with her menstrual taint, incurred an equally long defilement as the woman herself, and like her communicated uncleanness to the bed whereon he lay. On the day after the cessation of her issue (the eighth) the woman, for her purification, was to bring two turtle-doves or two young pigeons, one for a sin-offering and the other for a burnt-offering, to the priest, who was to make atonement for her before the Lord. [b.] The issues of males, two sorts of which are mentioned in Lev. xv. 3, produced uncleanness with effects precisely similar\* to

those of women (see verses 4-12). This is not the place to discuss the nature of these male fluxes; Michaelis adduces strong reasons for disputing the general opinion, which denies that the *Gonorrhoea virulenta* is referred to in the passage before us (*Laws of Moses* [Smith's trans.], art. ccxii.) [ISSUE.] The purification prescribed for men under this defilement is identical with that for women (vers. 13-15). [c.] Sexual copulation, including conjugal intercourse, caused to both man and woman uncleanness 'until the even,' from which they were to cleanse themselves and their garments by bathing and washing (vers. 16-18). [d.] The final result of the sexual act in childbirth produced a still more marked defilement (see Lev. xii.) The mother's uncleanness in this her puerperal state, on the birth of a boy, was identical in duration with that of her menstrual issues. Seven days was she unclean (ver. 2); on the eighth the child was circumcised (ver. 3); after which the mother remained in private, excluded from the sanctuary, during thirty-three days more (ver. 4). This period of forty days' defilement\* was doubled in the case of the birth of a maid child (ver. 5). The purification rites of the mother, however, were the same, whether observed at the end of the forty or of the eighty days. She brought a yearling lamb for a burnt-offering, and a young pigeon, or turtle-dove, for a sin-offering, unto the priest, that he might make atonement for her before the Lord, and she might be cleansed. In case of inability to bring the lamb, the substitution of another young pigeon or turtle-dove by the mother was allowed (vers. 6-8). Comp. the Virgin Mary's humbler offering in her 'low estate,' Luke ii. 22-24). In our general article on the LAWS OF MOSES, we had occasion to remark on the probable *substratum* of moral and religious mystery which underlies much of the ceremonial enactments. The havoc made by sin on our human race seems most strongly indicated by the fact that the *normal and inevitable conditions of our natural life are affected with uncleanness*. The gradations of pollution from conception to parturition, and its remarkable culmination in the birth of the *female child*, are wonderfully significant of the original 'transgression,' and of *woman's* first and heavier share in it (1 Tim. ii. 14, comp. with Gen. iii. 6, 16, 17). (3.) Equally noticeable, as

of man is Lord also of the Sabbath' (see Wordsworth on Lev. xv. 8). The Lord's touch of the leper and of the corpse of Jairus' daughter was, in like manner, not a mere ceremony preliminary to the miracles, but an express and formal mode of asserting his divine superiority over the law.

\* That is to say, *mutatis mutandis*; for the uncleanness of 'the saddle' is an incident peculiar to the male (ver. 9). In verse 8 another special case is mentioned, which is worthy of observation: 'If he that hath the issue *spit* upon him that is clean, then he shall wash his clothes, etc.' The spittle of the unclean man imparted also uncleanness (comp. Num. xii. 14). This fact gives peculiar interest to our Lord's use of *spittle* on three several occasions, as a means of imparting *cures and health* (Mark vii. 33; viii. 23; John ix. 6, 7). He not only thus refuted at the moment the calumny of his enemies, who reviled him as steeped in the worst of uncleanness and possessed with a devil, but vindicated his power over the law itself, as he did indeed in other particulars—*cx. gr.* when he said, 'The Son

\* The two periods in the mother's purification are, however, different in character. 'For seven days, immediately after she is brought to bed, she lies *בדמי טומאתה*, 'in the blood of her uncleanness;' but the three-and-thirty following, *בדמי טהרה*, 'in the blood of her purifying.' Although the privacy continued to the mother, she was after the seven days released from the ban of uncleanness, and did not communicate defilement to others, as in the previous period of her perfect isolation and disability. The old Jewish authorities are as usual very dogmatic on the point: 'In *Pesictha*, col. 4, it is written, *בדמי טהרה*, 'in the blood of her purifying;' *אפילו שופעת דם כנהר*, 'though she issue blood like a flood, yet טהורה,

might be expected, are the traces of this havoc, as displayed in the various uncleannesses of death—the third and last of our chapters of classification; and herein we recognise the deeper implication of our human race in the ruin, above all other living beings. ‘By the law of Moses,’ says Lightfoot, ‘nothing was unclean to be touched *while it was alive, but only man*: a man in leprosy was unclean to be touched, and a woman in her separation; but dogs, swine, worms, etc., were not unclean to be touched *till they were dead*; and there were also different degrees herein; while touching a dead beast brought uncleanness for a day, touching a dead man produced the uncleanness of a week,’ etc. (*Harm. of O. T.* as above). This gradation of defilement from contact with death is described—*i.* In Lev. xi. 8, 11, 24, 26, 27, 31-35, 39, 40; xvii. 15; *ii.* In Lev. xxii. 4-8; *iii.* In Num. xix. 11, 14, 16; *iv.* In Num. vi. 9. In the first of these four sections, the uncleanness arises from the dead bodies of animals, fishes, birds, and reptiles. It was the shortest in duration, lasting in every case only ‘until even;’ and it was to be terminated uniformly by the washing of the clothes. The last statute, Lev. xvii. 15, prescribed *ablution of the person also*, for ‘every soul that eateth that which died of itself, or that which was torn with beasts.’ In the second section, the same defilement is described as incidental to the *priests*,\* no less than to the laity, from which they must free themselves by ablution. So much for the *minor* uncleannesses from the dead. Our third and fourth sections contain the instances where the *major* disability of seven days is occasioned by contact with human dead: ‘Whosoever toucheth one that is slain with a sword in the open fields, or a dead body, or a bone of a man, or a grave, shall be unclean seven days.’ As the defilement was deeper, so was the mode of purification more elaborate and solemn. For the details of the ceremony,—the sacrifice of the red heifer without the camp; the sevenfold sprinkling of her blood before the tabernacle; the utter consumption by fire of the slain animal; the cedar-wood, hyssop, and scarlet cast into the burning mass; the gathering up of the ashes; their mixture in running water for ‘the water of separation;’ the sprinkling of this water over the unclean person, on the third and the last of the seven days; his own washing of his clothes and bathing of his person, and his final cleansing on the evening of the seventh day,—the reader will consult the 19th chapter of Numbers. Our fourth section describes the interruption of the Nazarite’s vow by any sudden death happening in his presence. This mortality ‘lost him’ all the days of his vow which had transpired, and required for its own expiation also the usual hebdomad, on the last day of which he was to shave his head, and on the morrow bring two young pigeons, or two turtles, to the priest, that he might present them as a sin-offering and a burnt-offering as an atonement for the polluted.

is she clean.’ Nor doth she defile anything by touching it, but what is holy.’—Lightfoot, *Exercit. on St. Luke* (Pitman), vol. xii. p. 37.

\* The members of the priesthood were also liable, like their lay brethren, to the disabilities arising from the pollutions of *leprosy*, and of the *running issue*, our classes *i.* and *ii.* See Lev. xxii. 4 [first clause].

Such are the cases of ceremonial uncleanness, as grouped in the threefold classification of the law itself. As, however, a few stray instances remain of a peculiar kind, we will proceed to class them in a supplementary chapter. We have then under this head, first, the cases of what may be called *official* uncleanness. (*a.*) The priest who superintended the holocaust of the red heifer was rendered unclean until evening by the part he took in the sacred rite; from this defilement he purified himself by the washing of his clothes and the ablution of his person (Num. xix. 7). This uncleanness was the more remarkable, from the precautionary character of the law, which in other cases seemed so strongly to aim at preserving the priests, as far as might be, from the incidence of ceremonial pollution (see Lev. xxi. 1-4). (*b.*) The man that burnt the heifer was involved in the same defilement as the priest, from which he was also extricated by a similar purification (Num. xix. 8). So again (*c.*), the man who gathered the ashes of the consumed heifer was unclean until evening; but from this disability he was released by the lesser ceremony of simply washing his clothes (ver. 10). Similar instances of uncleanness, arising out of official routine, occur in the ordinances of the Day of Atonement. (*d.*) The man who dismissed the scape-goat was to wash his clothes and bathe himself before returning to the camp (Lev. xvi. 26); and (*e.*), a like purification was required of him who burnt the bullock and the goat of the sin-offering (ver. 28). Under this head of *official* uncleanness, we may perhaps place the abnormal case of the Israelite soldiers who slew the Midianites at the command of Moses (Num. xxxi. 17). They were to remain outside the camp seven days; purify themselves on the third and on the seventh day; cleanse their raiment, etc., with either fire or the water of separation, as the case might require, and on the last day wash their clothes (vers. 19, 20, 23, 24). Besides these cases of *official* uncleanness, we find one instance *sui generis* occurring in Deut. xxiii. 10, 11, which, with its purification, is thus described:—‘If there be among you any man that is not clean by reason of uncleanness that chanceth him by night, then shall he go abroad out of the camp . . . but when evening cometh he shall wash himself with water, and when the sun is down, he shall come into the camp again.’ [It may be observed, that this case is not designated by the usual term *טִמְאָה*; the phrase merely denotes its accidental character, *לֹא-טִמְאָה מִקְרָה-לֵיָּלֵךְ*.]

Our enumeration, to be complete, should include the *aggregate* uncleanness of the priest and his household, and the nation (Lev. xvi.); this was expiated by the grand ritual of the GREAT DAY OF ATONEMENT, for the imposing details of which ceremony we must refer the reader to our article on that subject.

Some few historical instances of uncleanness, and more of purification, are mentioned both in the O. T. and the N. T. As being, however, applications only of some of the statutes which we have given above, we shall refrain from adducing them here, except one case, which is important because it led to the enactment of a proviso in the law. ‘There were certain men, who were defiled by the dead body of a man, that they could not keep the passover on that day.’ They stated their difficulty to Moses and Aaron, the former of whom referred

it to the Lord, and obtained from him a statute allowing a supplemental celebration of the passover for such as were incapacitated in the manner in question or on a distant journey (see PASSOVER and Num. ix. 6-12). In contrast with this relief was the inflexible penalty threatened against all wilful neglect of the various rites of purification prescribed in the law. The fullest formula of this penalty occurs in Num. xix. 20: 'The man that shall be unclean and shall not purify himself, that soul shall be cut off from among the congregation [or, as it runs in ver. 13, 'from Israel'], because he hath defiled the sanctuary of the Lord.' That this *excision* meant death is evident from Lev. xv. 31 and xx. 9 (See Michaelis, *Laws of Moses* [Smith], iv. 43, and Keil on Gen. xvii. 14). Jehovah, the theocratic king and holy God, who had his own ways of 'cutting off' the disobedient, is pleased to include in his sentence of excision the reason for its infliction; 'because he hath defiled the sanctuary of the Lord.' This is in direct accordance with the principle by which the divine legislator repeatedly sanctions his laws: 'Ye shall be holy, for I the Lord your God am holy' (Lev. xix. 2 and frequently elsewhere); and it was the recognition of these saintly duties which always characterised the pious Israelite. 'God' (says the Psalmist, Ps. lxxxix. 7) 'is greatly to be feared in the assembly of the saints' קדושים, which is likewise the word used in the formula of Leviticus—the phrase בְּקִדְּשֵׁי, also, which occurs in the 5th ver. of this Psalm,

is the frequent designation of the political organisation of the Israelites], and to be had in reverence of all them that are about him.' The Mosaic ritual on uncleanness illustrates much of the phraseology of the Psalms and the Prophets, and (what is more) many statements in the N. T.; not only in obvious comparisons, as in the Epistle to the Hebrews, but in oblique phrases, such as in Eph. v. 26, 27; where the apostle, 'speaking of Christ's washing the church, that he might present it to himself 'without spot or wrinkle,' etc., seemeth to allude to the Jews' exceeding great curiousness in their washings for purification' (Lightfoot, who quotes Maimonides in *Mikvaoth*, cap. i, vol. iii. p. 297). In conclusion, we must refer to the notices of purification which occur in the N. T. These are of three kinds—1st, The *legitimate* instances, such as that of the Virgin Mary (Luke ii. 22); the leper (Mark i. 44); the Nazarite (Acts xxi. 23, 24); all of which make express reference to the law. 2dly, The *unauthorised* cases, such as the traditional and Pharisaical washings of the hands (Matt. xv. 2), and of tables, cups, and platters (Mark vii. 4). All these the Lord condemned in strong terms as superstitious encroachments on the divine law. 3dly, The *doubtful* cases, such as the case of those who came to Jerusalem to purify themselves before the Passover (John xi. 55), and the discussion mentioned in John iii. 25. 'Their controversy,' says Lightfoot, 'was partly about the pre-eminence of the Judaical washings and the evangelical baptism—and here the Jews and John's disciples were at opposition; and partly about the pre-eminence of John's baptism and Christ's—and here the Jews would hiss them on in the contestation' (Works [Pitman], v. 67). Our object in this article has been to collect the *scriptural* laws on uncleanness and purification; we have avoided the Jewish tra-

ditional doctrines. These may be discovered by the curious on such subjects by a careful use of the indexes to the works of Lightfoot; Schoettgenii *Horæ Hebr. et Talmud*; and Surenhusii *Mishna*. Dr. Wotton, in his work on the Mishna (vol. i. 160-170), has analysed the *Seder Tahoroth* or *Order of Purifications*, which contains the authorised tradition on the subject of our article. 'In this order,' says Wotton, 'more than in any of the rest, the true Pharisaical spirit which our blessed Lord so severely reprehends in Matt. xv. and Mark vii. is plainly and fully seen.' We subjoin the names of the chief 'titles' or sections of this order:—1. *Celim*, vessels; 2. *Oholoth*, tents—treating of pollutions from the dead; 3. *Negaim*, plagues—of leprosy; 4. *Pava*, the red heifer; 5. *Tahoroth*, purifications—relating to lesser uncleannesses which last but a day; 6. *Mikvaoth*, collections of water for the cleansing baths, etc.; 7. *Nidda*, menstrual pollutions; 9. *Zabim*, men that have seminal uncleannesses; 10. *Tibul fom*, washed by day [see above]; and 11. *Jadaim*, hands—the constitutions in which title have no foundation in the written law.—P. H.

#### UNICORN. [REEM.]

UPHAZ (אֹפָז; Sept. Ὠφάξ), a country from which gold was obtained (Jer. x. 9; Dan. x. 5). It is generally supposed to be a corruption of אֹפִיר Ophir, which would require the change of only one letter, and there are other cases in which ו and ז are interchanged.

#### UPPER-ROOM. [HOUSE.]

UR OF THE CHALDEES (אֹר כַּשְׁדִּים; ἡ χώρα τῶν Χαλδαίων; *Ur Chaldeorum*; in Josephus, *Ὀρὴ τῶν Χαλδαίων*), the native place of the patriarch Abraham. The sacred historian states, that after the death of Haran, his son Terah migrated with his family from Ur of the Chaldees, 'and came unto Haran, and dwelt there' (Gen. xi. 28, 31). It is only in connection with this event that Ur is mentioned in Scripture. There is no clear indication in the Bible of its geographical position, nor is it said whether it was a city or a province. From the narrative in Genesis it appears that Terah set out from Ur with the intention of going to Canaan; but for some reason, on reaching Haran, he settled there; and it was not until after the death of Terah that Abraham continued his journey to the Land of Promise (xi. 31, 32; xii. 5). It may be inferred from another passage in Genesis that Abraham and his father originally left Ur of the Chaldees by divine command (xv. 7); and it is expressly stated by Nehemiah, the only other sacred writer who mentions Ur, that it was there the Lord first elected Abraham (ix. 7). The words of the martyr Stephen are important, not only as confirming this fact, but as tending to indicate the position of Ur. 'The God of glory appeared unto our father Abraham when he was in Mesopotamia, before he dwelt in Charran' (Acts vii. 2). This is all the information the Bible gives regarding Ur. From it, however, it is evident: first, that Ur was in the country of the Chaldeans; and second, that it was also situated in the country afterwards called Mesopotamia.

It will be observed that the Septuagint rendering of Ur is uniformly χώρα, 'region,' or 'land.' It may be that χώρα was an error, or attempted

correction of some copyist for *ûpa*. Or perhaps the word may have originally been written as a proper name, the letter *χ* being prefixed as an aspirate, or to indicate some peculiar pronunciation of the initial Hebrew *א*. It is certain that the Hebrew *אור* could never be made equivalent to the Greek *χώρα*.

Jerome translates the clause in Neh. ix. 6 *eduxisti cum de igne Chaldaeorum*: 'Thou broughtest him' (Abraham) 'out of the fire of the Chaldeans.' This rendering was doubtless suggested by the Jewish fable which is thus related in the *Targum of Jonathan* on Gen. xi. 28: 'And it came to pass when Nimrod had cast Abram into the furnace, because he would not worship his idol, and the fire had no power to burn him, that Haran's heart became doubtful, saying, If Nimrod overcome, I will be on his side; but if Abram overcome, I will be on his side. And when all the people saw that the fire had no power over Abram, they said in their hearts, Is not Haran full of divinations and charms, and has he not uttered spells over the fire, that it should not burn his brother? Immediately there fell fire from the heavens and consumed him; and Haran died in the sight of Terah his father, in the furnace of fire which the Kasdai (Chaldeans) had made for Abram his brother.'

The word *Ur* signifies 'fire' or 'light,' and may have formed the basis of this romantic legend. But the names of ancient cities were generally, indeed it may be said always, descriptive; and very often they were taken from some deity to whose worship the city was dedicated. The Chaldeans were fire-worshippers, and *Ur* appears to have contained one of their chief temples, which, at a later period, was specially dedicated to the moon, then esteemed the second great 'light' of heaven (Jerome, *Quæst. in Gen.* xi. 28; Eusebius, *Præp. Evang.* ix. 7). Rufinus states that Chaldean priests were accustomed to carry their sacred fire with them from place to place to combat other gods. Idols of brass, wood, and stone, were easily consumed or melted by the action of fire, and thus the victory of their national deity was secured (*Hist. Eccles.* ii. 26). Others suppose that *אור* may be a Babylonian form of the word *עיר*, 'a city,' and thus *אור כשדים* would signify 'the city of the Chaldeans' (Bonomi, *Nineveh*, p. 41). Others again derive *Ur* from a Persian root which signifies 'a castle' (Gesenius, *Heb. Lex.* by Tregelles, s. v.).

Various opinions have been held as to the site of *Ur*. Josephus calls it 'a city of the Chaldeans' (*Antiq.* i. 6. 5); he says that Chaldæa was in Mesopotamia (i. 7. 1); and he quotes a passage from Nicolaus of Damascus to the effect that the land of the Chaldeans was 'above Babylon' (*ὑπὲρ Βαβυλῶνος*; i. 7. 2). The words of Stephen in Acts vii. 2 also show that *Ur* was in Mesopotamia. But Mesopotamia was a wide region. The name was often applied somewhat indefinitely to the whole country extending from the mountains of Armenia to the Persian Gulf.

Some have located *Ur* to the north, others to the south, of Babylonia. Among those who hold the former view, which appears to accord with the statement of Josephus, some identify *Ur* with a castle mentioned by Ammianus (*Hist.* xxv. 8), which lay to the west of Nineveh, about two days' journey south-east of Nisibis. There is some doubt, however, whether its name is *Ur* or *Adur*; and the

theory of its identity with *Ur* of the Chaldees cannot be entertained (see Bochart, *Opp.* i. 38 and 78; Cellarius, *Geogr.* ii. 760; Grotius in *Gen.* xi. 31). Another theory, now much more popular, is that which identifies *Ur* with the classic *Edessa*, and modern *Urfa*. This theory has in its favour a very ancient Jewish tradition, some local sanctuaries dedicated to Abraham, and the fact that it is not far distant from Haran (see Ritter, *Erdkunde*, vii. 320, seq.; Pococke, *Description of the East*, i. 159).

But there is one thing fatal to all these theories which would locate *Ur* in the northern part of Mesopotamia. It is everywhere distinguished in the Bible as *Ur of the Chaldeans*. It must therefore have been in Chaldæa; and that country, as has already been shown, lay south of Babylonia, along both banks of the Euphrates, near its confluence with the Tigris [CHALDÆA]. Here again there are two claimants for the honour of identity. Until within the last few years it was supposed that Orchoë (*Ὀρχὼν*), a city of southern Babylonia mentioned by Ptolemy (*Geogr.* v. 20; cf. Strab. xvi. i. 6), was identical with *Ur* of the Chaldees. This was noted by Servetus in his edition of Ptolemy, and by others since his time (Cellarius, *Geogr.* ii. 760; Bonomi, *Nineveh*, pp. 41, 399). The theory appears to have arisen from a confounding of the *Ὀρχὼν* of Ptolemy with the *Ὀὐρη* of Josephus and *Ὀὐρίη* of Eupolemus. Recent researches have shown that the great mounds of *Warka*, on the left bank of the Euphrates, mark the site of Orchoë, and of the *Erech* of the Bible. A description of these remarkable ruins, and the monumental records exhumed from them, is given by Loftus (*Chaldæa and Susiana*, pp. 159, seq. and 199 seq.), and Fraser (*Mesopotamia and Assyria*, pp. 115, seq.); and the arguments for the identity of *Warka* and *Erech* are stated by Rawlinson in his *Ancient Monarchies* (i. pp. 22, seq.).

In an extract from Eupolemus, a Greek historian who lived before the Christian era, given by Eusebius in his *Præparatio Evangelica* (ix. 17), it is said that Abraham was a native of a city of Babylonia called *Kamarine*, but by others *Ourië* (cf. Cellarius, *Geogr.* ii. 760; Michaelis, *Spicileg.* ii. 105). *Kamarine* is doubtless derived from the Arabic *Kamr*, 'the moon.' The researches of Mr. Loftus and Sir Henry Rawlinson have discovered the remains of this ancient city in the great mounds of *Mugheir*. From an inscribed brick dug up it was ascertained that the ancient name of *Mugheir* was expressed by a monogram which signifies 'the moon,' thus identifying it with *Kamarine*; and on many other bricks the name *Ur* is written. There can thus be little doubt that *Ur* of the Chaldees, the native city of Terah and Abraham, has at length been found in the desolate mounds of *Mugheir*.

*Mugheir* is situated about six miles west of the river Euphrates, opposite its junction with the Shat el-Hie, and about midway between the ruins of Babylon and the Persian Gulf. The only objection which can well be made against the identity arises from its geographical position. Why, it may be asked, setting out from this region to go to Canaan, should Abraham travel all the way round by Haran? The answer is not difficult. It was the migration of a tribe with flocks and herds, women and children, and not of an individual. To traverse the vast Arabian desert would have been impossible. The natural route—the route which any Arab tribe

under similar circumstances would take at the present day—would be northwards along the rich meadows by the river side as far as Haran, and then across the narrow grassy plain to Syria. Even caravans travelling from Baghdad to Damascus are obliged to take this route.

But it may be said, Did not Stephen locate Ur in Mesopotamia? True; the name Mesopotamia, however, was not confined to the region actually between the rivers, it embraced sections of the adjoining plains. When it is said in Josh. xxiv. 3, 'I took your father Abraham from the other side of the flood,' reference appears to be made to Haran rather than to Ur of the Chaldees. While in Haran they worshipped idols (Gen. xxxi. 19, 34). And, besides, a large portion of Chaldaea lay on the east side of the Euphrates.

The name Mugheir ('the bitumen'd, or perhaps contracted from *Um-ghir*, 'The mother of bitumen') is given to a large circuit of low mounds, half a mile in diameter, dotting a vast marshy plain, which is sometimes flooded by the Euphrates. The name Múgeyer (so written by Loftus) is, however, peculiarly given to a remarkable building, seventy feet high, which stands near the north end of the mounds, and is the only example of a Babylonian temple remaining in good preservation, not wholly covered by rubbish. It is built of large bricks, and from their being 'cemented with bitumen' originates the modern name of Múgeyer. It consists of two distinct but massive storeys, having the plain of a right-angled parallelogram, the longest sides of which are the north-east and south-west. One angle points due north, which feature, I may remark, is observable in all edifices of truly Chaldaean origin. The lower storey is supported by buttresses thirteen inches deep, and, with the exception of those at the angles, eight feet wide. The building measures 198 feet in length and 133 in breadth. The lower storey is 27 feet high, and has but one entrance, which is 8 feet wide. The outer surface is faced with 'red kiln-baked bricks,' to a thickness of 10 feet; but the whole interior is of sun-dried bricks. In each of the angles of this building, 6 feet inward, near the foundation, an inscribed cylinder was discovered, which appears to have served the same purpose as the documents at present deposited beneath the foundation-stones of our great buildings. These cylinders are now in the British Museum.

The tablets of the Chaldeans discovered at Mugheir are among the most interesting ever brought to light. On a brick from the great temple is the following inscription:—'Orchamus, king of Ur, is he who has built the temple of the Moon-god.' On another:—'The Moon-god, his lord, has caused Orchamus, king of Ur, to build a temple to him, and has caused him to build the enceinte of Ur' (Rawlinson, *Anct. Monarchies*, i. 85).

Mr. Loftus' remarks on the discoveries at Mugheir are worthy of special note:—'From his examination of the numerous brick and cylinder inscriptions at Múgeyer Sir Henry Rawlinson regards this as one of the earliest, if not the very earliest, of the sites colonised by that Ethiopic or Scythic invasion. . . . These records bear the names of a series of kings from Uruk (B.C. 2230) to Nabonidus (B.C. 540). Among others is that of Kudurmapula, or *Chedorlaomer* (Gen. xiv. 1). The temple was dedicated to *Sin*, or 'the moon,' which element was preserved by the Greeks in the name *Mesene*,

applied by them to the surrounding region; and also in that of *Camarina*, derived from the Arabic word *Kamar*, 'the moon,' assigned by Eupolemus to either Múgeyer or Warka. The most important identification, however, is that of Múgeyer with the Biblical Ur of the Chaldees, which Sir Henry Rawlinson supposes to be complete, from having read the name *Uúr* upon the cylinders. In support of this proposed identification he states that one particular parish of this place was called *Ibra*, from which he supposes Abraham to have set out on his journey to Canaan, and from whence originated the word Hebrew. . . .

The cylinder inscriptions of Múgeyer are invaluable documents in confirming the authenticity and truth of Scripture. They not only inform us that Nabonidus, last king of Babylon, repaired the great temple of the moon at Húr; but they also explain who Belshazzar was, concerning whom the early Bible critics have in vain endeavoured to reconcile conflicting statements. In the book of Daniel (v. 30) he is alluded to as the king of the Chaldees when Babylon was taken by the united armies of the Medes and Persians. The account of Berosus does not, however, agree with that of Scripture. It states that Nabonidus, after being utterly routed in the open plain by Cyrus, shut himself up in the city of Borsippa, but was soon obliged to surrender his person to the conqueror. From Daniel, therefore, we are led to conclude that Belshazzar was the last Chaldaean monarch; while Nabonidus is represented in the same capacity by Berosus. . . . Sir Henry Rawlinson's reading of the Múgeyer cylinders entirely reconciles these discrepancies. The records distinctly state that *Belshazzar was the eldest son of Nabonidus*, and that he was admitted to a share of the government' (*Chaldaea and Susiana*, pp. 128-133; cf. *Journal of Asiatic Society*, xv. pp. 260, seq.)

It appears from other inscriptions that Ur was originally a maritime city. Its ships are mentioned along with those of Ethiopia (*Journal of R. G. S.* xxvii. 185; *Anct. Monarchies*, i. 20). Probably the channel of the Euphrates was then close to the city. It was unquestionably the ancient capital of Chaldaea; and subsequent to the rise of Babylon it retained a kind of ecclesiastical supremacy as the principal seat of the national religion. It has now been desolate for long centuries. The mounds that mark the site of its great temples are bare; the whole country around it is a dismal swamp. In regard to Ur as well as to Babylon, the words of Isaiah are true: 'The beauty of the Chaldees' excellency shall be as when God overthrew Sodom and Gomorrah' (xiii. 19).—J. L. P.

URBANE or URBAN (*Ὀὐρβανός*), a disciple at Rome, and one of Paul's companions in labour (Rom. xvi. 9). Nothing is known of him; but his name shows him to have been a Roman.

URBINO, SALOMON B. ABRAHAM. This distinguished lexicographer, who is also called *Rashba*=רשב"א, from the initials of ר' שלמה בן אברהם, *R. Salomon b. Abraham*, flourished A.D. 1480, in which year, and not in 1500, as is stated by Wolf (*Bibliotheca Hebraea*, i. 1037, etc.), he wrote his important lexicon on the synonyms of the O. T., entitled *אוהל מועד*, *the Tabernacle of the Congregation*, in allusion to Exod. xxxiii. 7, 'because therein are congregated expressions which

differ in sound but are alike in sense' (מצד היותו) בית ועד למלון השוים בהוראה אחת ושפת מתחלפת (ובו). The synonyms are divided into groups, the alphabetical order of which is determined by its most important word. Each group commences with the fixed formula, 'the word which is put down is to teach' (המלה אשר הונחה להורות), being made up from the abbreviation of the title of the work—viz. להאזיל—and is illustrated by a few quotations from the O. T. and the corresponding passages from the Targum, as well as by quotations from Saadia Gaon's Arabic translation of the Pentateuch (892-942), the works of Dunash Ibn Librat (920-980), Hai Gaon (969-1038), Ibn Ganach (995-1050), Ibn Giath (1030-1038), Nathan b. Jehiel (1030-1106), Ibn Balaam (1050-1090), Nachmanides (1193-1270), etc. etc. The Lexicon was published in Venice 1548, and being one of the very few important works on the synonyms of the O. T., it is greatly to be regretted that it is so exceedingly rare. Even Wolf (*Hist. Lexicor. Hebr.* p. 63) was not able to obtain it, and Plantavitus only got it when he had nearly completed his *Thesaurus Synonymus* [PLANTAVITIUS]. Comp. Geiger, in the *Zeitschrift der deutschen morgenländischen Gesellschaft*, vol. xvii. p. 321, Leipzig 1863; Fürst, *Bibliotheca Judaica*, iii. 461.—C. D. G.

URIAH (אֲרִיָּה), *flame of Jehovah*; Sept. Οὐρίας).

1. A Hittite, and therefore a descendant of the ancient inhabitants of Palestine, whose name occurs in the list of the 'worthies' or champions of king David, in whose army he was an officer. He was the husband of Bathsheba; and while he was absent with the army before Rabbah, David conceived and gratified a criminal passion for his wife. The king then directed Joab to send him to Jerusalem, but failing to make his presence instrumental in securing Bathsheba from the legal consequences of her misconduct, he sent him back with a letter directing Joab to expose him to the enemy in such a manner as to ensure his destruction. This the unscrupulous Joab accomplished; and David then took the widow into his own harem (2 Sam. xi.; xxiii. 39) [DAVID; BATHSHEBA].

2. A priest in the reign of Ahaz, summoned by Isaiah to be a witness of the prophecy concerning Maher-shalal-hash-baz (Is. viii. 2). He is probably the same as the Urijah of 2 Kings xvi. 18.

3. A priest of the family of Koz (properly Hakkoz, cf. 1 Chron. xxiv. 10) in the days of Ezra (Ezra viii. 33). In Neh. iii. 4, 21, he is called Urijah in the A. V.

URIEL (אֲרִיֵּאל; Sept. Οὐριήλ), described as of Gibeah, and as the father of Michaiah, the mother of Abijah king of Judah (2 Chron. xiii. 2). It is difficult to reconcile this with other passages in which the mother of Abijah appears as Maacah the daughter of Absalom (1 Kings xv. 2, 10, 13). The statement of Josephus (*Antiq.* viii. 10. 1) that his mother was the daughter of Tamar the daughter of Absalom, and the wife of Uriah, though not in itself improbable, is not easily reconcilable with the fact that everywhere else the name of Absalom's daughter, Abijah's mother, is Maacah. Another difficulty arises from the chronicler himself elsewhere (xi. 21, 22) calling the mother of Abijah Maacah. To meet this it has been suggested that she had two names, Maacah and Micaiah (Mica-

jahu), the latter probably a name of honour given her when she became the mother of a prince (Caspary, *Ueb. Micha d. Morasthiten*, p. 3, n. 4). But this is to cut the knot rather than to unloose it. For not only is there no evidence of this duplicity of name, but the fact that everywhere else, even after the birth of Abijah, she is called Maacah, casts doubt on it. When it is considered that Abijah's wife, the mother of his successor Asa, is called Maacah (1 Kings xv. 13; 2 Chron. xv. 16), one can hardly avoid suspecting some clerical error arising from a confounding of the mother with the wife of Abijah.

Other two persons of the name of Uriel, Kohathites, are mentioned 1 Chron. vi. 9 [24]; xv. 5, 11.—W. L. A.

URIAH (אֲרִיָּה), *flame of Jehovah*; Sept.

Οὐρίας). 1. High-priest of the Jews in the time of king Ahaz. He received from this young prince, who was then at Damascus, the model of an altar which had there engaged his attention, with orders to make one like it at Jerusalem. It was his duty to refuse compliance with this dangerous order; but he made such haste in his obedience that the altar was completed by the time Ahaz returned; and he afterwards went so far in his subservience as to offer upon this new and unauthorised altar the sacrifices prescribed by the law of Moses (2 Kings xvi. 10-12). He was probably not so fully aware as he ought to have been of the crime and danger involved in this concession to a royal caprice, being a transgression of the law which fixed the form of the Mosaic altar (Exod. xxvii. 1-8; xxxviii. 1-7): for he appears to have been in intention a good man, as he is one of the 'faithful witnesses' chosen by Isaiah (viii. 2) to attest one of his prophecies.

2. A prophet, son of Shemaiah of Kirjath-jearim in Judah, who, in the time of Jehoiakim, uttered prophecies against Judah and Jerusalem of the same tenor as those which Jeremiah was commissioned to deliver. Menaced with death by the king, Urijah sought refuge in Egypt; but Judah was at that time subject to Pharaoh-Necho, who had no interest in protecting a proscribed fugitive who foretold the conquests of the Babylonians. He was therefore delivered up on the demand of Jehoiakim, who put him to death, and ordered him to be buried dishonourably in one of the graves of the meanest of the people (Jer. xxvi. 20, 21).

3. [URIAH 3.]

URIM and THUMMIM (אֲרִיִּים וְתַמִּיִּם; Sept.

ὄφλως and ἀλήθεια, etc.; Vulg. *Doctrina et Veritas*). The Hebrew words are generally considered to be plurales excellentiæ, denoting *light* (i.e. revelation) and *truth*; and as used by a metonymy for the things or modes whereby the revelation was given and truth declared. They may, however, be *duals*. A similar view of their construction and meaning pervades the Sept. and Vulg. renderings, under some varieties of expression. There are two principal opinions respecting the Urim and Thummim. One is, that these words simply denote the four rows of precious stones in the breastplate of the high-priest, and are so called from their brilliancy and perfection; which stones, in answer to an appeal to God in difficult cases, indicated his mind and will by some supernatural appearance. Thus, as we know that upon each of

the stones was to be engraven the name of one of the sons of Jacob, it has been conjectured that the letters forming the divine response became some way or other distinguished from the other letters. It has been conjectured by others that the response was given by an audible voice to the high-priest arrayed in full pontificals, and standing in the holy place with his face turned towards the ark. The other principal opinion is, that the Urim and Thummim were two small oracular images, similar to the Teraphim, personifying *revelation* and *truth*, which were placed in the cavity or pouch formed by the folds of the breastplate, and which uttered oracles by a voice. [PRIEST, *the breastplate*; TERAPHIM.] We propose simply to lay before the reader a statement of the facts connected with this obscure but interesting subject. It is remarkable that the first time the Urim and Thummim are mentioned in Scripture, they are referred to as *things already known*. After a *minute* description of the breastplate, which, as we have shown in PRIEST, was to differ in several particulars from that worn by the Egyptian priests, it is simply added, 'And thou shalt put in the breastplate of judgment the Urim and the Thummim' (Exod. xxviii. 30). So inde-

finite, however, is the preposition  $\text{לְ}$ , here translated 'in,' that it may also mean 'on' or 'near' (Sept. reads *ἐπὶ*). The Urim and Thummim are, however, here clearly distinguished from the breastplate itself, or from the four rows of gems, unless we can imagine that the breastplate should be so called before the gems, the essential part of it, were put into their place. We observe the like distinction made in the account of Aaron's consecration (Lev. viii. 8; comp. Eccus. xlv. 10), and by Josephus (*Antiq.* viii. 3. 8), where he distinguishes the  $\text{τὸ λογιόν}$ , or oracle, from the precious stones. So does the Samaritan text, which also states the Urim and Thummim to have been *made* on the occasion. We think the distinction indicated in these passages of Scripture sufficiently clear to withstand the inference which has been derived from comparing Exod. xxviii. 29 with 30, and Exod. xxxix. 8, etc., with Lev. viii. 8; namely, that the Urim and Thummim were identical with the gems in the breastplate. In Num. xxvii. 21, the word  $\text{הַאֲדָמִים}$  alone is used in a brief recapitulatory manner, and, no doubt, including the Thummim, or else, in the general sense of divine revelations, answers, etc., by this method (Sept.  $\text{ἡ κρίσις τῶν δόλων ἐναντὶ κυρίου}$ ; comp. I Sam. xxviii. 6; Sept.  $\text{ἐν τοῖς δόλοις}$ ; Vulg. *per sacerdotes*). The usual order is reversed in Deut. xxxiii. 8, where it is Thummim and Urim. The last mention of them occurs after the return of the captivity, when 'the Tirshatha' decreed that certain claimants to the rights of the priesthood, but who could not produce their ecclesiastical pedigree, should wait 'till there stood up a priest with Urim and with Thummim,' by whom their claim might be infallibly decided (Ezra ii. 63; Sept.  $\text{τοῖς φωρίζουσι καὶ τοῖς τελείοις}$ ; Vulg. *sacerdos doctus atque perfectus*; Neh. vii. 65,  $\text{ιερεὺς φωρίσων}$ , *sacerdos doctus et eruditus*). From these obscure statements of Scripture we naturally turn to Josephus, the professed antiquarian of his nation. He says, when intending to treat of the subject, that 'God declared beforehand by those twelve stones which the high-priest bore on his breast, and which were inserted into the breastplate, when they should be victorious in battle; for so great a

splendour shone forth from them before the army began to march, that all the people were sensible of God's being present for their assistance, and that the breastplate left off shining two hundred years before he composed that book' (*Antiq.* iii. 8. 9; see Whiston's Notes *in loc.*) On the contrary, Philo, the learned contemporary of Josephus, represents the Urim and Thummim as two images of the two virtues or powers— $\text{δῆλωσιν τε καὶ ἀλήθειαν}$ . The full quotation is: 'Τὸ δὲ λογιόν (the pectoral or breastplate); τετραγώνον, διπλοῦν κατεσκευάσθη, ὡσανεὶ βάσις, ἵνα δύο ἀρετὰς ἀγαλματοφορῇ (that they might carry the image of the two powers); δῆλωσιν τε καὶ ἀλήθειαν' (*De Vita Moysis*, lib. iii. p. 152, t. 2, ed. Mangey). He also uses the following words (*De Monarch.* lib. ii. p. 824; *Orp.* vol. ii. p. 226): 'Ἐπὶ τοῦ λογιῶν διττὰ ὕψωματα καταποικίλλει, προσαγορεύων τὸ μὲν δῆλωσιν, τὸ δ' ἀλήθειαν. Of the two statements, that of Philo is best supported by certain external evidence, which will now be produced. It had been noticed by all the old commentators, that a remarkable resemblance existed between the Urim and Thummim of the Jewish high-priest, and the custom recorded by Ælian of the Egyptian archjudge, who was always a priest venerable for age, learning, and probity, and who opened judicial proceedings by suspending, by a gold chain hung round his neck (comp. Gen. xli. 42), an image made of a sapphire stone, which was called  $\text{Ἀλήθεια}$ —i.e. 'Truth,' and with which Diodorus Siculus says he touched (*προσθεῖτο*) the party who had gained the cause. Certain traces of a similar custom among the Romans had also been adverted to—viz. that among the Vestal Virgins, at least she that was called Maxima, and who sat in judgment and tried causes, as the Pontifex Maximus did, wore a similar antepectorale (Lipsius, *De Vestal. et Vestal.*; *SynAGMA Ant. ap. Plant.* 1603, cap. ult.) But these resemblances among the Egyptians were considered

512. Goddess of Truth and Justice.

to have been derived by them from the Jews, in consequence of their correspondence with them after Solomon's marriage with Pharaoh's daughter (Patrick on Exod. xxviii. 30). Subsequent discoveries, however, among the antiquities of Egypt lead to the conclusion that these resemblances belong to a much earlier period. Sir G. Wilkin-

tion says the figure of Truth which the Egyptian archjudge suspended from his neck was, in fact, a representation of the goddess who was worshipped under the *dual* or double character of Truth and Justice, and whose name, Thmei, the Egyptian or Coptic name of Justice or Truth (compare the Greek *Θέμις*), appears to have been the *origin* of the Hebrew Thummim—'a word,' he remarks, 'according to the Sept. translation, implying truth, and bearing a further analogy in its plural termination.' He also remarks that the word Thummim, being a plural or dual word, corresponds to the Egyptian notion of the 'two Truths,' or the double capacity of this goddess. 'This goddess,' he says, 'frequently occurs in the sculptures in this double capacity, represented by two figures exactly similar, as in No. 512. It is,' he adds, 'further observable that the chief-priest of the Jews, who, before the election of a king, was also the judge of the nation, was alone entitled to wear this honorary badge. Does the *touch* of the suc-

513. Goddess of Truth and Justice.

cessful litigant with the figure, by the Egyptian archjudge, afford any illustration of such passages as Is. vi. 7, Jer. i. 9, Esther v. 2, or of those numerous instances in which touching is represented as the emblem or means of miraculous virtue? Our authority for these Egyptian antiquities adds, that according to some the Urim and Thummim signify 'lights and perfections,' or 'light and truth'—which last presents a striking analogy to the two figures of Rê, the sun, and Thmei, truth, in the breastplate worn by the Egyptians (No. 514). Here

514. Breastplate.

Thmei is represented, as she is frequently, as a single figure wearing two ostrich feathers, her emblem, because all the wing-feathers of this bird were considered of equal length, and hence meant true or correct' (*Manners and Customs of the Ancient Egyptians*, ii. 27, etc.; v. 28, etc., London 1842. See also other remarks on the dual offices of Thmei, in *Gallery of Antiquities*, selected from

the British Museum by F. Arundale and J. Bonomi). Upon a view of the preceding facts, we incline to Mr. Mede's opinion, that the Urim and Thummim were 'things well known to the patriarchs,' as divinely appointed means of inquiring of the Lord (Gen. xxv. 22, 23) suited to an infantine state of religion; that the originals were preserved, or the real use at least, among the Abrahamidae, and at the reformation under Moses were simply recognised; that the resemblances to them among the Egyptians were but imitations of this primeval mode of divine communication, as were the heathen auspices of similar means originally connected with the sacrifice of animals [CAIN; ABEL; LIVER]. The speculations of learned Jews and Christians connected with this subject may be seen in Winer's *Biblisches Real-Wörterbuch*, Leips. 1835, art. 'Urim und Thummim;' or in Robinson's *Theological Dictionary*, London 1816; and some of them in Cruden's *Concordance*. Dr. Prideaux maintains that the divine answer was given by an audible voice to the high-priests arrayed and standing opposite to the ark (*Connection*, i. 123, etc.); but when David consulted the oracle by Abiathar (1 Sam. xxiii. 9, 11; xxx. 7, 8), the ark was at Kirjath-jearim, whereas David was in the one case at Ziklag, and in the other in the forest of Hareth. Jahn supposes that the answer was given by the words *yes* and *no* inscribed on two stones (a third being left blank for *no answer*) which the high-priest carried on his breastplate; and consequently that the Urim and Thummim was the sacred lot referred to in Prov. xvi. 33. The lot is cast (ברית) into the *bosom*; but the whole judicial decision is of the Lord (comp. xviii. 18; *Archæol.* sec. 370). Michaelis also considers it as a lot, which was used in criminal cases to discover, not *convict* the criminal; for the confessions of the guilty are recorded in the only two instances of this kind mentioned in Scripture (Josh. vii. 14-18, and 1 Sam. xiv. 37-45). Observe the Hebrew or margin of ver. 41, in the last reference. He remarks that the discovery of an unknown murder was not left to these means (*Notes on Exod.* xxviii. 30, and *Laws of Moses*, art. 304). Braunius maintains the notion of Josephus as to the mode of the divine answer (*De Vestitu Sacer. Heb.* ii. 20). Spencer maintains that of Philo (*De Legib. Heb.* lib. iii. Diss. ult.), but is opposed by Pococke (*On Hosea*, iii. 4, p. 149). See also Buxtorf, *Historia Urim et Thummim*, in *Exercitt. ad Hist.* Basileæ 1659; Jennings, *Jewish Antiquities*, i. 233; Witsius, *Ægyptiaca*, c. 10, etc. Winer also refers to Norris's *Archæologia*, or *Miscell. Tracts relating to Antiquity*, iv. No. 19; Schroeder, *Diss. de Urim et Thymnim*, Marb. 1744; Bellarmann, *Urim u. Thummim die ältesten Gemmen*, Berl. 1824; Stiebriz, *Diss. de Variis d. Urim et Thummim Sententi.* Hal. 1753-54.—J. F. D.

USQUE, ABRAHAM (ר' אברהם אשקי), was one of the thousands of Jews who were expelled from Portugal by King Immanuel (1497), after enjoying five years of comparative rest from the terrible sufferings consequent upon the expulsion of his family and co-religionists from Spain by Isabella and Ferdinand (1492). He sought refuge at Ferrara in Italy, where his great Hebrew learning secured for him the superintendence of the celebrated Hebrew press (1552-1558). In this capacity he not only edited various rabbinical works,

which are important contributions to Jewish literature, but published, in conjunction with Duarte Pinhel of Lisbon, the celebrated Spanish translation of the Hebrew Scriptures, entitled *Biblia en Lengua Espanola, traduzida palabra por palabra de la verdad hebraica, por muyexelentes letrados. Vista y examinada por el oficio de la Ynquisicion*, which he dedicated to Hercules II. and the Donna Gracia Nasi, Ferrara 5313 = 1553. Usque and Pinhel began this version in 1543, and completed it in 1553, after ten years of diligent labour. And though the names of the translators are not given, it being simply remarked 'made by very excellent scholars' (*por muy exelentes letrados*), which has led some to believe that Usque and Pinhel edited this version, yet there can be but little doubt that they were the principal authors of it. Usque and Pinhel adopted into their version the literal translation of the five books of Moses published in the Constantinople Pentateuch Polyglott 1547 [TUSI], which was commonly used by the Jews in Spain in the middle of the 15th century, and which is most probably the early Spanish translation of the middle ages falsely attributed to David Kimchi (comp. Steinschneider, *Jewish Literature*, 132). There were two editions, published simultaneously, of this Spanish Bible; one—the cost of which was defrayed by R. Jom Tob Athias, who is erroneously taken to have been a co-translator of Usque (Bartolucci, *Bibliotheca Magna Rabbinica*, i. 49)—was intended for the Jews, and the other—the expense of which was paid by Geronymo de Vargas—was designed to acquaint Spanish-speaking Christians with the O. T. New editions of the former appeared at Ferrara 1630; Amsterdam 1611; Venice 1617; and with corrections, improvements, and an introduction by Manasseh b. Israel, Amsterdam 1630; with tables of the Haphtaroth [HAPHTARA], of chapters, judges, kings, and prophets of Israel according to the *Seder Olam* (סדר עולם), as well as with an elaborate introduction by Gillis Joost, Amst. 1646-1661. Comp. De Rossi, *Typog. Hebr. Ferrariensi*, 28-46; La Long, *Biblioth. Sacra*, i. 364, 540; Steinschneider, *Catalog. Libr. Hebr. in Bibliotheca Bodleiana*, 195; Fürst, *Bibliotheca Judaica*, iii. 463-465.—C. D. G.

USSHER, JAMES, was born at Dublin 4th January 1580, and was educated at Trinity College, of which he was one of the first three scholars matriculated. In 1601 he was ordained; in 1603 he became chancellor of St. Patrick's; and soon after professor of divinity at the University; in 1619 he was made Bishop of Meath; and in 1624 he became Archbishop of Armagh and Primate. During the troubles arising out of the war between Charles I. and the Parliament, Ussher had to leave Ireland, and was subjected to much hardship, his property being seized, and his revenues distrained. He obtained the see of Carlisle (*in commendam*), but from that but little emolument accrued to him. He afterwards became preacher at Lincoln's Inn, and was one of the six divines allowed by Parliament to confer with Charles at Carisbrook. His later years were spent in the family of Lady Peterborough at Reigate, where he died 21st March 1656. Ussher was a laborious student, and amassed vast learning. His *Annales Vet. et Novi Test.* fol. 1650-54, established his fame as a scholar and a chronologist, and fixed the Biblical chronology which has since been generally followed in this country,

and which is adopted in the A. V. He wrote also *De Græca LXX. versione Syntagma; Epistola ad L. Capellum de variis Text. Heb. lectionibus* 1652; *Britannicarum Ecclesiarum Antiquitates*, fol. 1639, enlarged ed. 1677; and a multitude of works on the ecclesiastical controversies of the day, and on some questions in theology. His library, for which he collected books and MSS. from all quarters, was, after his death, presented to the Dublin University, where it remains. He succeeded in obtaining six copies of the Samaritan Pentateuch and several MSS. of the Syriac version. His collected works have been edited by Dr. Eltrington in 1 vols. 8vo, 1847, with a life of the author.—W. L. A.

USTERI, LEONHARD, was born at Zürich, 22d October 1799, and died at Berne 18th September 1833. His education was conducted partly in his native city, partly at Berlin, where his contact with Böckh, Hegel, and especially Schleiermacher, had a powerful effect on the development of his mind, and the direction of his pursuits and opinions. Returning to Zürich, he began to lecture in private on St. Paul's epistles, and in 1824 he succeeded Lutz as professor and director of the gymnasium at Berne. He combined exact scholarship with philosophic depth and acumen; a combination which gives especial value to his *Entwicklung des Paulinischen Lehrbegriffes mit hinsicht auf die übrigen schriften des N. T.* 1824, 6th ed. 1851; and his *Commentar ueber den Brief Pauli an die Galater*, 1833. He furnished also two short articles to the *Studien u. Kritiken*; the one on John the Baptist (1829), the other on the Baptism and Temptation of Christ (1832).—W. L. A.

USURY (נִשְׁכָּה, τóκος), a contract for the loan of money, to be returned again with exorbitant increase. By the laws of Moses the Israelites were forbidden to take usury from their brethren upon the loan of money, victuals, or anything else, not, it has been observed by Michaelis, as if he absolutely and in all cases condemned the practice, for he expressly permitted interest to be taken from strangers, but only out of favour to the poorer classes. In other words, he did not mean to represent that the taking of interest for the loan of money was in itself sinful and unjust; but as at that period the Israelites were comparatively a poor people and strangers to commerce, they borrowed, not with a view to profit, but from poverty, and in order to procure the common necessities of life. It would therefore have been a hardship to have exacted from them more than was lent. The Israelites were, however, permitted to take usury from strangers, from the Canaanites, and other people devoted to subjection. This was one of the many means they adopted for oppressing and ruining the Canaanites who remained in the land. After the return of the Jews from captivity, they were required by Nehemiah 'to leave off this usury,' and to restore to their brethren what they had exacted from them—'their lands, their vineyards, their olive-yards, and their houses; also the hundredth part of the money, and of the corn, the wine, and the oil' (Neh. v. 10, 11). Our Saviour denounced all extortion, and promulgated a new law of love and forbearance:—'Give to every man that asketh of thee, and of him that taketh away thy goods, ask them not again.' 'Love ye your enemies, and do good, and lend, hoping for nothing again' (Luke vi. 30, 35).—G. M. B.

UZ, THE LAND OF (עֶזְרָא; *Ausitis*; *Oûz*; *Hus*; *Ausitis*), is the name given in Scripture to the country of Job (Job i. 1), who is said to have been 'the greatest of all the men of the east,' or as it is in the Hebrew 'of all the Bene-Kedem' (ver. 3). The Bene-Kedem were the people who dwelt in Arabia, and more especially those parts of it which lay immediately to the east and south-east of Palestine (cf. Gen. xxix. 1; Judg. vi. 3; vii. 12; viii. 10). Hence it may be concluded that the land of Uz lay in that section of Arabia to which the name *Petræa* is usually given. It is mentioned only in two other passages of Scripture. Jeremiah in one passage (xxv. 20) groups it with Egypt, Philistia, Edom, and Moab; and in another he appears either to identify it with a portion of Edom, or to affirm that some of the Edomites in his days inhabited Uz. His words are, 'Rejoice and be glad, O daughter of Edom, that dwellest in the land of Uz' (Lam. iv. 21). These various statements show that Uz was closely connected with Edom, and most probably included a large section of the level-pasture lands which lie along the eastern side of the mountain-range, and extend northwards to Bashan. Other incidental notices of the sacred writers corroborate this view.

The name Uz was doubtless derived from the oldest son of Aram, who was founder of one of the primeval tribes, which took his name, and settled in 'the Land of Uz' (Gen. x. 23, 31). Josephus says that Uz founded Trachonitis and Damascus (*Antiq.* i. 6. 4). The former province lies in Bashan, and extends as far south as Bostra. It may have formed part of the Land of Uz. It is a singular fact that when the writer of this article was travelling through Trachonitis he heard at various places, from the lips of intelligent natives, the tradition that Jebel Haurân, which adjoins Trachonitis on the east, was the country of the patriarch Job.\* It is further worthy of note, as showing the connection between Uz and Edom, that Uz was the name of one of the descendants of Seir the Horite, whose tribe originally possessed Edom (Gen. xxxvi. 28; 1 Chron. i. 42). One of the three friends also who visited Job in his trials was Eliphaz the *Temanite*; and Teman, as has been seen, included a portion of southern Edom [TEMAN].

Jerome appears to identify Uz with Damascus and Trachonitis, following Josephus (*Quest. in Gen.* x. 25, cf. *Onomast.* s.v. 'Uz'). Bochart makes no less than three places of this name—1. The *Ghutah* of Damascus, confounding the Arabic غوطه, *Ghutah*, with the Heb. עֶזְרָא, words which are altogether dissimilar; 2. The region of *Ausitis*, named from Uz the son of Nahor (Gen. xxii. 21). The tribe of *Aesite* is mentioned by Ptolemy as residing in Arabia Deserta, near Babylon (*Geogr.* v. 19). 3. Uz of Edom, the land of the patriarch Job (*Opera*, i. 80). There seems to be no sufficient authority for this threefold division. The

country of Job was evidently a wide pastoral region; and the tribe of Uz, or *Aesite*, as Ptolemy calls them, though they had their chief seat in it, may have wandered with their flocks, as the modern Bedawîn do, away eastward to the banks of the Euphrates. Michaelis contends with great zeal and learning for the identity of Uz with the Ghûtah of Damascus. His arguments are not convincing (*Spicileg.* ii. pp. 126-135). The present writer knows the Ghûtah well, and he has no hesitation in stating that its rich alluvial soil, and the abundance of its waters, admirably adapted it for cultivation and settled life, and made it at the same time unsuitable for the vast herds of camels and immense flocks which Job possessed; while its peculiar position, almost encircled with mountains, lakes, and rivers, rendered it secure against any sudden raids of the wild tribes of the desert. The open plains of Haurân, or of the Belka, or of the region east of Edom, would be far more suitable theatres for the whole scenes and circumstances of the sacred narrative than any spot near Damascus. The exact position of Uz had become uncertain even in the days of Eusebius, for he states (*Onomast.* s.v. 'Idumæa'), that according to some 'Gabalene', the district of Idumæa around the city of Petra, is Ausitis, the country of Job; according to another Arabia was the country of Job; while others affirm that the region of Seon (ἡ χώρα τοῦ Ζηὼν) is the country of Job.

On the whole, therefore, it would appear from the statements and allusions of the sacred writers, combined with the remarks of Eusebius and Jerome, and the results of modern research, that the land of Uz was in Arabia, bordering on Edom westward, on Trachonitis northward, and extending perhaps indefinitely across the pasture-lands of Arabia towards the Euphrates. Like some of the modern Arab chiefs, Job possessed an agricultural settlement, while his flocks and herds, and droves of camels, roamed at large over the immense pasture-lands. His friends and associates, Eliphaz the *Temanite*, Bildad the *Shuhite*, Zophar the *Naamathite*, and Elihu the *Buzite*, were all Arabians; while every event, scene, and circumstance exhibits the characteristics of Arab life. Forster has argued with considerable ingenuity and learning that the land of Uz lay on the banks of the Euphrates adjoining Chaldæa. His fundamental theory, however, which extends the territory of Edom so far eastward, will not stand the test of critical investigation; and his arguments derived from the raids of the Chaldeans and Sabæans have no weight, for those intimately acquainted with the history and habits of nomad tribes know well that it is no uncommon thing for a plundering expedition from Mesopotamia or Babylonia to ravage the whole borders of Syria (see, however, Forster, *Geogr. of Arabia*, ii. 58-69; also Müller, 'De Terra Jobi' in *Thes. Vet. Test.* i. 540; Winer, *Bibl. R. W.* s.v. *Uz*; Spanheim, *Hist. Jobi*; Gesenius, *Thes.* s.v.)—J. L. P.

UZAL (עֶזְרָא; *Alzâh*; Alex. *Alzâh*; *Uzal*), a son of Joktan and descendant of Shem (Gen. x. 27; 1 Chron. i. 21). Like the other patriarchs whose names are recorded in the 10th chapter of Genesis, he was the founder of a tribe (cf. ver. 31). Except, perhaps, in an obscure passage in Ezekiel—to be noticed afterwards—Uzal is not again mentioned in the Bible, nor is it found in the geo-

\* This tradition is at least as old as the 3d century, for Eusebius in his *Onomasticon* thus writes regarding Karnaim (s.v. *Carnaim*): *ἔθδα ὡς ἐκ παραδόσεως τοῦ Ἰωβ τὸν οἶκον ἐπιδεικνύουσιν*. This Karnaim is by both Jerome and Eusebius located in Batanæa, which embraces the whole of Jebel Haurân.

graphical notices of Eusebius or Jerome. The Jewish colonists, however, who settled at a very early period in south-eastern Arabia, have preserved the name in their traditional history, and they, with Arab writers of more modern times, supply evidence amply sufficient to establish the identity of the site.

Abraham Zacuth, a learned Jewish writer, states that *Sanaa*, the metropolis of Yemen, is by the Jews called *Uzal* (Bochart, *Opera*, i. 114); and in the *Kamûs*, *Azal* (or *Uzal*) is said to be the ancient name of *Sanaa* (Goliuss, *Lex. Arab.* s. v.) This was still farther confirmed by Niebuhr, who heard, when travelling in Yemen, the same statement made by Mohammedan natives (*Description de l'Arabie*, iii. p. 252). The whole of Yemen was originally colonised by the descendants of Joktan, or *Bene-Kahltân*, as they are called by the Arabs; and consequently it is in this region that *Uzal* would naturally be looked for. When or why the name was changed to *Sanaa* does not appear, but of the fact there can be no doubt. The Hebrew name appears probably in the *Ausara* of Ptolemy (*Geogr.* vi. 7), and the *Ausaritis* of Pliny, celebrated for its myrrh (*H. N.* xii. 36).

*Sanaa* is situated in a mountainous region in the centre of Yemen, about 150 miles from Aden and 100 from the coast of the Red Sea. Its commanding position, its strong fortifications, the number of its mosques and minarets, and the size of its houses, render it one of the most imposing cities in Arabia. It is abundantly watered by mountain streams, and the gardens, orchards, and fields around it are said to rival in luxuriance and beauty the famous plain of Damascus (see Bochart, *l. c.*; Michaelis, *Spicileg.* ii. 164-175; Forster, *Geogr. of Arabia*, i. 143; and especially Ritter, *Erdkunde*, xii. 815-840). In the town of *Sanaa* there are still some 15,000 Jews, while in the various parts of Yemen their numbers are supposed to amount to 200,000.

Ezekiel, in his description of Tyre, says, as rendered in the A. V.: 'Dan and Javan going to and fro, occupied in thy fairs; bright iron, cassia, and calamus, were in thy market' (xxvii. 19). The word translated 'going to and fro' is

מֻזָּל, *Muzal*. In the Septuagint it is regarded as a proper name, with a prefix preposition, 'Ἐξ Ἀσέλ', 'from Asel.' In the Vulgate it is *Mosel*. The structure of the passage unquestionably favours the Greek rendering; and the proper translation would seem to be, 'Dan, and Javan of *Uzal*, conveyed to your markets wrought iron, cassia,' etc. There can be little doubt, therefore, that the prophet alludes to the great city of Yemen, the neighbourhood of which is known to have been famous for its spices and perfumes (Michaelis, *l. c.*; Winer, *Bib. R. W.* s. v. 'Usal'). This view is strengthened by the fact that Javan occurs in the *Kamûs*, and is said to be a town of Yemen. The expression Javan of *Uzal* is thus appropriate, for the latter was the name of the capital and of a district connected with it. The names Dedan, Arabia, Kedar, and Sheba, following immediately in the prophetic narrative, indicate the country to which the eye of the sacred writer was directed.—J. L. P.

UZZAH (עֻזָּה, *strength*; Sept. 'Ozâ), son of Abinadab, a Levite, who, with his brother Ahio, conducted the new cart on which the ark was

taken from Kirjath-jearim to Jerusalem. When the procession reached the threshing-floor of Nachon, the oxen drawing the cart became unruly, and Uzzah hastily put forth his hand to stay the ark, which was shaken by their movements. For this the anger of the Lord smote him, and he died on the spot. This judgment appeared to David so severe, or even harsh, that he was much distressed by it, and becoming afraid to take the ark any farther, left it there, in charge of Obed-edom, till three months after, when he finally took it to Jerusalem (2 Sam. vi. 1-11). The whole proceeding was very irregular, and contrary to the distinct and far from unmeaning regulations of the law, which prescribed that the ark should be carried on the shoulders of the Levites (Exod. xxv. 14), whereas here it was conveyed in a cart drawn by oxen. The ark ought to have been enveloped in its coverings, and thus wholly concealed before the Levites approached it; but it does not appear that any priest took part in the matter, and it would seem as if the ark was brought forth, exposed to the common gaze, in the same manner in which it had been brought back by the Philistines (1 Sam. vi. 13-19). It was the duty of Uzzah, as a Levite, to have been acquainted with the proper course of proceeding; he was therefore the person justly accountable for the neglect; and the judgment upon him seems to have been the most effectual course of ensuring attention to the proper course of proceeding, and of checking the growing disposition to treat the holy mysteries with undue familiarity. That it had this effect is expressly stated in 1 Chron. xv. 2, 13.—J. K.

UZZEN-SHERAH (עֻזֵּן שֶׁרָאָה; Sept. 'Ozân-Serphâ), a small city, founded by Sherah, the daughter of Ephraim or Beriah (1 Chron. vii. 24). No trace of this 'now exists, unless it be found in Beit Sira, a place to the S.E. of Beit-Ur-tahta, the Upper Bethhoron, also built by Sherah.—W. L. A.

UZZIAH (עֻזִּיָּה, sometimes עֻזִּיָּהוּ, *might of Jehovah*; Sept. 'Ozîas), otherwise called AZARIAH [as Gesenius thinks by an error of the transcriber, the resemblance between עֻזִּיָּה and עֻזִּיָּהוּ being sufficient to mislead], a king of Judah, who began to reign B.C. 809, at the age of sixteen, and reigned fifty-three years, being, with the sole exception of Manasseh's, the longest reign in the Hebrew annals. Uzziah was but five years old when his father was slain. He was sixteen before he was formally called to the throne: and it is disputed by chronologers, whether to count the fifty-two years of his reign from the beginning or from the end of the eleven intervening years. In the first half of his reign Uzziah behaved well, and was mindful of his true place as viceroy of the Divine King. He accordingly prospered in all his undertakings. His arms were successful against the Philistines, the Arabians, and the Ammonites. He restored and fortified the walls of Jerusalem, and planted on them engines for discharging arrows and great stones; he organised the military force of the nation into a kind of militia, composed of 307,500 men, under the command of 2600 chiefs, and divided into bands liable to be called out in rotation; for these he provided vast stores of all kinds of weapons and armour,—spears, shields, helmets, breastplates, bows, and slings.

Nor were the arts of peace neglected by him:

he loved and fostered agriculture; and he also dug wells, and constructed towers in the desert, for the use of the flocks. At length, when he had consolidated and extended his power, and developed the internal resources of his country, Uzziah fell. His prosperity engendered the pride which became his ruin. In the twenty-fourth year of his reign, incited probably by the example of the neighbouring kings, who united the regal and pontifical functions, Uzziah, unmindful of the fate of Dathan and Abiram, dared to attempt the exercise of one of the principal functions of the priests, by entering the holy place to burn incense at the golden altar. But, in the very act, he was smitten with leprosy, and was thrust forth by the priests. He continued a leper all the rest of his life, and lived apart as such, the public functions of the government being administered by his son Jotham, as soon as he became of sufficient age (2 Kings xv. 27, 28; 2 Chron. xxvi.)—J. K.

UZZIEL (עֲזִיָּאל; 'Ozēl; once 'Ozēthl, Exod. vi. 18, Alex.) 1. The fourth son of Kohath, and ancestor of the Uzzelites, one of the three families into which the Kohathites were divided (Exod. vi. 18, 22; Num. iii. 27).

2. One of the sons of Ishi, who, with his brothers, headed an expedition of 500 Simeonites against the remnant of the Amalekites that had been left in Mount Seir, notwithstanding the assaults of Saul, David, and Solomon on that race (1 Sam. xiv. 48; xv. 7; 2 Sam. viii. 12); and having extirpated them, took possession of their country (1 Chron. iv. 42, 43).

3. A member of the guild of the goldsmiths who presided over those of that company who laboured in repairing the wall of Jerusalem (Neh. iii. 8). Three other persons of this name are mentioned, but nothing is known of them.—W. L. A.

## V

VALCKNAER, LUDWIG CASPAR, was born at Leuwarden in 1715, and was successively conrector of the gymnasium at Kampen, Greek professor at Franeker, and professor of the languages and antiquities of Greece at Leyden, where he died 14th March 1785. Besides his contributions to classical learning, he wrote a valuable tract *De Aristobulo Judeo*, in which the Alexandrian school of interpretation is learnedly described and criticised. After his death Wassenbergh published *Selecta e scholiis L. C. Valcknarii in libros quosdam N. T.* 2 vols. 8vo, 1815. Valcknaer was so thorough and exact a scholar that even his unrevised notes are full of value.—W. L. A.

VALLEY. There are five Hebrew words rendered 'valley' in the A. V. These words are not synonymous. They were intended to convey distinct ideas; and much of the definiteness and force of Scriptural statements and illustrations is lost in consequence of their being represented in English by one term. The object of this article is to state briefly the precise meaning of the Hebrew words, and to indicate their true signification in the principal passages in which they occur. They are taken alphabetically.

1. בִּקְעָה, *Bikah*, is derived from בָּקַע, 'to cleave' or 'to divide'; and its primitive meaning is 'a valley between mountains'; but its general acceptation is 'a broad open valley,' whether shut in by mountain-chains or not. Thus the plain of Shinar is called *Bikah* (Gen. xi. 2); as also are the plains of Esdraelon (2 Chron. xxxv. 22; Zech. xii. 11), of Coelestria (Josh. xi. 17), of the Jordan (Deut. xxxiv. 3), and of Sharon (Neh. vi. 2). Palestine is described as 'a land of hills and valleys' (Deut. xi. 11), in allusion to those rich alluvial plains which constitute such a distinguishing feature of the country. The word also conveys the idea of a level surface, hence the expressive statement of Isaiah: 'The crooked shall be made straight, and the rough places plain' (xl. 4). Its usual rendering in the A. V. is 'valley'; but it is 'plain' in six passages. In the Sept. it is translated πεδιον or πεδεινός, except in Is. xl. 4, where the Alex. MS. has ὁδός [See PLAIN].

2. גַּי, *Gai*; by omission of the aleph גַּי, also גַּיָּא and גַּיָּא, *Ge*; pl. גַּיָּוֹת and גַּיָּוֹת. This word is of very frequent occurrence and is uniformly translated 'valley' in the A. V. In the Sept. its usual rendering is φάραγξ; but κοιλάς, νάπη, αὐλὼν, and γῆ, also occur. The root is גַּיָּ, 'to flow together' (not גַּי, which contains the strong letter פ; see, however, Stanley, *S. and P.* p. 477), and was originally applied to a valley from the water flowing together in it. A *Gai* is 'a narrow valley' or 'ravine,' as distinguished from a broad and level *Bikah*. Thus, there is the *Ge-Hinnom* at Jerusalem (Josh. xv. 8). A comparison of this 'ravine' (*gai*) with the 'plain' (*bikah*) of Megiddo or Sharon, will show how necessary it is to distinguish these words. A *gai* may be a glen running among mountains; or a deep and narrow water-course in a plain or table-land. Ezekiel speaks of the 'doves of the valleys.' The rocks and cliffs along the sides of the glens of Palestine are the favourite retreat of doves (Ezek. vii. 16). The word is frequently connected with other expletives so as to form proper names; thus *Ge-ben-Hinnom* (Jer. vii. 32); *Ge-charashim* ('valley of craftsmen,' Neh. xi. 35); *Ge-Fiphthah-el* (Josh. xix. 14); *Ge-Zeboim* (1 Sam. xiii. 18); *Ge-Zephathah* (2 Chron. xiv. 10), etc.

3. נַחַל, *Nakhal*, from נָחַל, 'to receive' (or perhaps 'to flow'), is the usual word applied to 'a torrent bed,' or a valley through which a winter-stream flows, but which is dry during summer. It corresponds to the Arabic *wady* (وَادِي) and the

Greek χειμάρρος. In the book of Job the uncertain flow of the *nakhal* is beautifully employed as an emblem of deceitful men:—'My brethren have dealt deceitfully as a brook (*nakhal*), as the stream of brooks they pass away; which are blackish by reason of the ice, wherein the snow is hid; what time they wax warm they vanish; when it is hot they are consumed out of their place' (vi. 15-17). The word is sometimes applied to the *valley*, and sometimes to the *stream* in the valley, as in 1 Kings xvii. 3 and 4, where Elijah is commanded to hide himself 'in the valley of Cherith;' and also 'to drink of the stream'—*nakhal* being used in both cases.

*Nakhal* is joined with many proper names; thus 'the brook Kedron' (1 Kings ii. 37); 'the river of Egypt' (Josh. xv. 4); 'the stream of Egypt' (Is. xxvii. 12); 'the river Jabbok' (Deut. ii. 37); 'the brooks of Arnon' (Num. xxi. 14); 'the valley of Gerar' (Gen. xxvi. 17), etc. The renderings in the Sept. are as various as those of the A. V.; thus, *φάραγξ*; *χειμάρρους*; *ποταμός*; *νομός*; and *νάπα*. [See for further information the article RIVER, 6.]

4. עֵמֶק, *Emek*, signifies 'a low tract of land,' whether plain or valley. Any level area, of whatever form, encompassed by hills, or by higher ground, might be called by this name. The word is derived from עָמַק, 'to be deep.' It is sometimes applied to a wide valley between parallel ranges of hills, as 'the valley of Jezreel,' between Gilboa and Moreh (Judg. vi. 33); sometimes to an upland plain, as 'the valley of Rephaim' (Josh. xv. 8); sometimes to a broad but sunk plain, as 'the vale of Siddim' (Gen. xiv. 3), and 'the valley of Beth-rehob' at Dan (Judg. xviii. 28); sometimes to a wide mountain glen, as 'the valley of Elah' (1 Sam. xvii. 2). In the A. V. it is universally translated 'valley' or 'vale,' except in Josh. xix. 27, where the Hebrew is retained as a proper name in 'Beth-emek.' The usual rendering of the Sept. is *κοίλας*; but *φάραγξ*, *αἰλῶν*, *πεδῖον*, *αἰλας*, and *βαθύς*, are also found. Of these the first is the most appropriate, giving the literal signification of the Hebrew word.

5. שְׁפֵלָה, *Shephelah*, 'a low plain,' from the root שָׁפַל, 'to be depressed.' With one exception this word has always the article השְׁפֵלָה, and is employed as a proper name to denote the plain of Philistia [see SHEPHELAH]. The exception is Josh. xi. 16, where 'the valley of the same' (without the article) is distinguished from 'the valley' (or the *Shephelah*, with the article). It is probable that the former means the plain of Sharon. The word is usually rendered 'vale' or 'valley' in the A. V., and *πεδῖον* or *πεδιὼν* in the Sept.; but it is 'low plains' in 1 Chron. xxvii. 28; 2 Chron. ix. 27; 'low country' in 2 Chron. xxvi. 10; xxviii. 18; and 'plain' in Jer. xvii. 26; Obad. 19; Zech. vii. 7. In the Sept. it is in four places rendered as a proper name Σέφηλα.—J. L. P.

VASHNI (וַשְׁנִי; Sept. Σαν), the eldest son of Samuel according to 1 Chron. vi. 13 [28]. But in 1 Sam. viii. 2 Samuel's first-born is called Joel, and so is he called in ver. 33 of this chapter. It has been supposed that the passage originally stood thus:—הַבְּכוֹר יֵאָל וְהַשְּׁנִי אֲבִיָּה, 'The first-born Joel, and the second Abiah,' but יֵאָל having been omitted by mistake, וְהַשְּׁנִי was changed into וַשְׁנִי, and made a proper name. The Syr. and Arab., however, are the only versions that give the passage thus; and it must be admitted that such a mistake is not very probable. But no better solution of the discrepancy has been offered.—W. L. A.

VASHTI (וַשְׁתִּי; Pers. *وشتی*, *beauty*; Sept. Ἀστὴ), the wife of Ahasuerus, king of Persia, whose refusal to present herself unveiled before the computators of the king led to her degradation, and eventually to the advancement of Esther (Esther i. 9-12). [AHASUERUS; ESTHER.]

VATER, JOHANN SEVERIN, was born 27th May 1771, at Altenburg. He commenced his career in 1794, as a privat docent, at Halle; thence he went to Jena, where he became extraordinary professor of theology in 1798; in 1800 he returned to Halle, as professor of Oriental languages; in 1809 he removed to Königsberg, where he was ordinary professor of theology; and in 1820 he returned to Halle to fill the chair of theology there. He died 16th March 1826. Vater was a great scholar and a voluminous writer. His works in Biblical literature are: *Hebr. Sprachlehre*, Leipzig 1797, 1814; *Commentar üb d. Pentateuch*, Halle 1802-5; *Comment. in Jes. xi.* Halle 1801; *Obs. in aliquot locos prophet. minorum*, Halle 1805; *Spicileg. I. et II. obs. ad usum patrum graecor. in critica N. T. pertinent.* 1810-11; *Nov. Test. Gr. denuo recog., cum adnotatione crit. et exeget.*, Halle 1824. Vater belonged to the rationalistic school, and his work on the Pentateuch is deeply tainted by rationalistic influences; but his works deserve notice for their learning.—W. L. A.

VEIL, CHARLES MARIE DE, also called *Duveil*, was born at Metz, in Lorraine, circa 1625. Being of a highly respectable Jewish family, he received from his youth an excellent Hebrew education, and he soon distinguished himself in the learning of his fathers. Through contact with learned Roman Catholics, and an examination of the O. T. prophecies, he was led to the conviction that Jesus was the Messiah promised to his fathers, and accordingly embraced the Roman Catholic faith (circa 1655). His learning and great abilities soon secured for him a high position in the Gallican church, of which he became a distinguished preacher. The University of Anjou conferred on him the diploma of Doctor of Divinity, and he was appointed public teacher of divinity in the university (1665). Whilst occupying this high position he devoted his time to the exposition of the Scriptures, and published, in Latin (1), a commentary on the Gospels of Matthew and Mark, Angers 1672; (2) a commentary on the Song of Songs and Ecclesiastes, Paris 1676; and (3), a commentary on Joel, Paris 1676. De Veil so ably defended the doctrines of the Roman church in these commentaries, that he was requested to hold a controversy with the Huguenots, who were at that time the great opponents of Romanism in France. But the diligent inquiry into the points of difference between Roman Catholicism and Protestantism which he instituted in order to refute the latter, resulted in his conviction that the doctrines of Protestantism were true. He had therefore to escape to Holland, where he openly abjured Romanism (1678), and soon after came over to England, where his extraordinary endowments and great piety secured for him the friendship of Drs. Stillingfleet, Sharp, Tillotson, Patrick, Lloyd, Compton, etc., and the appointment of chaplaincy and tutorage to a noble family. He now published new editions of the commentaries on Matthew and Mark (London 1678), and the Song of Songs (London 1679), discarding therefrom and refuting therein the doctrines of the Romish church. He moreover published (4), a commentary on the Minor Prophets, London 1680. As these commentaries became the text books of the clergy at home, and the Reformed churches abroad, Dr. Compton, bishop of London, encouraged De Veil to prosecute his Biblical labours, and gave

him free access to his library at all times. It was in this library that De Veil discovered some works of the English Baptists which led him to inquire into the controversy, and which resulted in his joining the Baptist community (1682), at the loss of all his friends, with the honourable exception of Tillotson. De Veil continued his Biblical labours, and published (5), a commentary on the Acts, London 1684, in which he defended his Baptist principles. This commentary, which, like all his other works, was written in Latin, he himself translated into English, and published in London 1685. A new edition of it appeared in London 1851. De Veil's commentaries are valuable contributions to Biblical literature; they abound with extracts from the Fathers and the best Jewish writers; and his thorough acquaintance with the manners, customs, and rites of the Jews, has often enabled him to throw light upon many an obscure allusion in the N. T.—C. D. G.

**VEIL.** There are several words denoting veil in the Hebrew Scripture, showing that, as at present, there were different kinds of this essential article of an Eastern female's attire. These are essentially of two descriptions. The first, and which alone offer any resemblance to the veils used among us, are those which the Eastern women wear in-doors, and which are usually of muslin or other light texture, attached to the head-dress and falling down over the back. They are of different kinds and names, some descending only to the waist, while others reach nearly to the ground. These are not used to conceal the face.

The veils mentioned in Scripture were, no doubt, mostly analogous to the wrappers of different kinds in which the Eastern women envelop themselves

515. In-door Veils.

when they quit their houses. These are of great amplitude, and, among the common people, of strong and coarse texture, like that in which Ruth carried home her corn (Ruth iii. 15). The word here is *מִטְפַּחַת*, *mitpachat*, and is rightly rendered 'veil' by our translators, although some lexicographers, not understanding Eastern veils, have considered it a mantle or cloak. The cuts will show how sufficient the out-door 'veils' of the Eastern women are for such a use. The word which indicates Ruth's ample and strong veil is that which also occurs in Is. iii. 22, and is there translated 'mantle.' In the same verse we find *רַדִּיד*, *radid*, which denotes another kind of veil,

probably of finer materials, from the manner in which it is mentioned in this text and in Cant. v. 7. The latter passage shows that it was an out-

516. Dress Veils, etc. In-door.

door veil, which the lady had cast around her when she went forth to seek her beloved. In Is. iii. 22, this word is rendered by the old English and now obsolete term 'wimple,' which means a kind of hood or veil in use at the time the translation was made, and was not a bad representative of the original. The word occurs in Spenser:—

'For she had laid her mournful stole aside,  
And widow-like sad *wimple* thrown away.'  
'But (she) the same did hide  
Under a veil that *wimpled* was full low;  
And over all a black stole she did throw,  
As one that inly mourned.'

Another kind of veil, called *צַמָּה*, *tzamah*, is named in Cant. iv. 1, 3; vi. 7, and Is. xlvii. 2, in which places the word is rendered 'locks' in the A. V.; but in these texts, according to the best critics, we should read, 'Thou hast dove's eyes within thy veil;' not 'within thy locks.' 'Thy

517. Out-door Veils.

temples within thy veil;' not 'within thy locks.' 'Raise thy veil;' not 'uncover thy locks.' And as these passages refer mostly to the effect of the veil as connected with the head-dress, it may per-

haps have been one of those veils, which have been already described as a part of in-door dress; although it must be admitted that the expressions are almost equally applicable to some kind of street-veil. Of this the reader can judge from the engravings.

Another veil, called תַּיִף, *tzaiph*, is mentioned in Gen. xxiv. 65; xxxviii. 14, 19, under circumstances which show that it was one of those ample wrappers which women wore out of doors. The etymology, referred to the Arabic تَعْنَف, *sub duplicavit*, suggests that it was 'doubled' over the shoulders, or folded about the body, in some peculiar manner which distinguished it from other veils. It is clear that it concealed the face, as Judah could not recognise Tamar when she had wrapped herself in a *tzaiph*.—J. K.

#### VEIL OF THE TABERNACLE AND TEMPLE. [TABERNACLE; TEMPLE.]

VENEMA, HERMANN, D.D., successively pastor at Dronryp and professor of theology and university preacher at Franeker, was born at Wildevank in 1697, and died in 1787. He was a copious writer in all departments of sacred science. His Biblical works are—*Comment. in Psalmos*, Leuward. 6 vols. 4to, 1762-67; *Comm. ad libr. Prophet. Jerem.* 2 vols. 4to, *ibid.* 1765; *Lectiones Acad. ad Ezech.* i.-xxi. ed. Verschuier 4to, *ibid.* 1790; *Dissert. ad vaticinia Daniel.* c. ii. vii. et viii. *ibid.* 1745; *Com. ad Dan.* xi. 4-xii. 3; *Sermones Acad. vice Comment. in lib. Proph. Zecharia.* 4to, *ibid.* 1789; *Comment. ad lib. Malachia.* *ibid.* 1759. These works are prolix, but those who can endure this will find them mines of learning and thought.—W. L. A.

#### VERMILION. [COLOURS.]

VERSE (פָּסָק; *στίχος*, *κόμμα*; *cæsum*, *incisum*, *versus*, *versiculus*). I. *Versicular divisions in MSS.*—The term *verse* (*versus*, from *verto*, 'to turn'), like the Greek *στίχος*, was applied by the Romans to lines in general, whether in prose or verse, but more particularly to the rhythmical divisions which generally commenced the line with a capital letter. The custom of writing poetical books in stanzas was common to the Greeks, Romans, Arabians, and Hebrews. The poetical books (*viz.* Job, Psalms, Proverbs, Ecclesiastes, and Canticles), in the oldest Hebrew MSS., as the Paris, Bodleian, Cassel, and Regiomontanus, are also thus divided, and the poetical passages in the historical books are still given in this form in our printed Hebrew Bibles. The Alexandrian MS., and those of the Italic version, are equally so written, and this division is found in the Psalterium Turicense, the Verona and St. Germain Psalters, and in Martianay's edition of Jerome. Athanasius applied the term *στίχος* to the passage in Ps. cxix. 62: 'I arose at midnight to praise thee for the judgment of thy righteousness;' and Chrysostom observes, on Ps. xlii., that 'each stich (*στίχος*) suffices to afford us much philosophy.' He also uses the term *ῥῆσις* in the same sense. The poetical books are called by Epiphanius the five *στιχηρῆς*.

It is not improbable that this division may have come from the original authors, which the nature of the subject, and especially the parallelism of the sentences, seems to require (Jebb's *Sacred Litera-*

*ture*). In the Cod. Alex. are equally divided in this manner the songs of Moses and of Hannah; the prayers of Isaiah, of Jonah, of Habakkuk, Hezekiah, Manasses, and Azarias; the Benedicite; and the songs of Mary (*theotokos*), Simeon, and Zachariah, in the N. T., to which is added the Morning Hymn, or Gloria in Excelsis.

A similar metrical division is found in the Latin version. Jerome (*Ep. ad Sunn. et Fret.*) applies the term *versiculus* to the words 'grando et carbones ignis' (Ps. xviii. 13), assigning as a reason why the Greeks had not this versicle after the interposition of two verses, that it had been inserted in the Sept. from the Hebrew and Theodotion version (with an asterisk). He also observes (*Pref. to Job*) that the book of Job commences with prose, glides into verse, and again ends with a short *comma* in prose from the verse 'Idcirco me reprehendo, et ago pœnitentiam in cinere et favilla' (the form assumed also by the text of the oldest Hebrew MSS.) He adds that there were 700 or 800 verses wanting in the old Latin version of this book, and makes mention of 'three short verses' in Ezek. xxi. and Is. lxiii. That a stichometrical arrangement pervaded the whole Latin Bible is further evident from the *Speculum Scripture*, attributed to Augustine, which contains extracts from Psalms, Canticles, Ecclesiastes, Job, Hosea, Amos, Micah, Zephaniah, Malachi, Isaiah, Jeremiah, Ezekiel, Wisdom, Ecclesiasticus, the four Evangelists, 2 Corinthians, Philippians, Timothy, 1 John, and Hebrews. The first editors of the *Speculum* seem to have misunderstood Augustine's meaning (Simon's *Hist. Critique*), yet it is beyond a doubt that the verses in the *Speculum* (one of which was, 'Populus ejus et oves pascuæ ejus'), were of the character which we are now describing. Jerome has not followed any of the divisions of the present Hebrew text, except in those passages where he could not well have avoided it, *viz.* the alphabetical division in the book of Lamentations, and the alphabetical Psalms, but even here he differs from the present divisions (Morini *Exerc. Bibl.* pars. ii. cap. 2).

Jerome introduced a similar division into the prophetic books and the books of Chronicles. To this division he, in the prophetic books, applies the terms *cola* and *commata* (or 'stanzas' and 'hemistichs'), while in the Chronicles he only employs the colon, or longer period. 'No one,' he observes, 'when he sees the Prophets divided into verses (*versibus*), must suppose that they are bound by metrical lines, or that in this respect they resemble the Psalms and the books of Solomon; but as the works of Demosthenes and Tully are divided into colons and commas, although written in prose and not verse, we have, for the convenience of the reader, also distinguished our new version by a new species of writing.' The Chronicles, he says, he divided into members of verses (*per versuum cola*) in order to avoid an 'inextricable forest of names.'

The following specimens of Jerome's divisions are from Martianay:—

[Job iii.]

'Pereat dies in qua natus sum  
et nox in qua dictum est: Conceptus est  
homo.

Dies illa vertatur in tenebras  
non requirat eum Deus desuper  
et non illustretur lumine.'

[Isaiah xl.]

‘Vox dicentis : Clama.

Et dixi :

Quid clamabo ?

Omnes caro fœnum,

et omnis gloria ejus quasi flos agri.’

[1 Chron. xiv.]

‘Misit quoque Hiram rex Tyri nuntios ad David, et ligna cedrina, et artifices parietum, lignorumque, ut ædificarent ei domum.

Cognovitque David quod confirmasset eum Dominus in regem super Israel, et sublevatum esset regnum suum super populum ejus Israel.

Acceptit quoque David alias uxores in Jerusalem : genuitque filios, et filias.’

A division of the prophetic books into *cola*, or stichs, has been considered by some to have had its origin before the time of Jerome. Eusebius acquaints us (*Hist. Eccles.* vi. 16) that Origen, in his *Hexapla*, divided the Greek and other versions into *κῶλα*, which, however, Bishop Christopherson (in Euseb. *Eccles. Hist.*) supposes to be the columns containing the different texts into which Origen’s *Polyglott* was divided. Hesychius, who died in A.D. 433, also published his *στιχηρεῖς* of the twelve prophets, which he calls an invention of the Fathers, in imitation of David and Solomon, who had thus divided their rhythmical compositions. He observes that he had found a similar division in the apostolical books. In this case such division must have been anterior to the stichometrical edition of Euthalius, if the date assigned to his publication be correct—viz. A.D. 450. It is not improbable that the work of Hesychius was but an adaptation of Jerome’s *cola* and *commata* to the Greek text. This is also the opinion of Martianay. Epiphanius (*De Orth. Fid.* iv.) adds the two books of Wisdom to the poetical books thus arranged.

We have seen that Jerome imitates the mode of writing the works of Demosthenes and Cicero in his divisions of Chronicles. This custom of writing *κατὰ στίχους* appears to have been usual among profane writers. Josephus observes that his own *Antiquities* consisted of sixty thousand *στίχοι*, although in Ittigius’s edition there are only forty thousand and broken lines. Diogenes Laertius, in his *Lives of the Philosophers*, recounts the number of stichs which their works contained. There have, however, existed doubts as to what the *στίχοι* really were; some supposing them to be simply lines, or lines consisting of a certain number of words or letters, as in our printed books, while others have maintained them to be lines of varied length regulated by the sense, like the *cola* and *commata* of Jerome. The fact is that there are MSS. written in both kinds of verses or stichs, with the number of the stichs placed at the end of each book; and this is what is called *stichometry*, or the enumeration of lines. The introduction of lines regulated by the sense into the New Testament is supposed to have been a rude substitute for punctuation. The second mode, resembling our printed books, is also common; it is that adopted in the Charlemagne Bible, at the close of each book of which will be found the number of verses—that is, lines of equal length, but without any regard to the number of words or letters.

We are not aware at what time or by whom

stichometry was adapted to the gospels, but not long after the time of Euthalius we find it in common use. The Cod. Bezae (C) and the Clermont MS. (D) are thus written. The following is from C [John i.] :—

Ἐν ἀρχῇ ἦν ὁ λόγος καὶ ὁ λόγος ἦν πρὸς τὸν Θεόν

Καὶ Θεὸς ἦν ὁ λόγος. οὗτος ἦν ἐν ἀρχῇ πρὸς τὸν Θεόν

Θεόν

Πάντα δι’ αὐτοῦ ἐγένετο καὶ χωρὶς αὐτοῦ

Ἐγένετο οὐδὲ ἓν ὃ γέγονεν· ἐν αὐτῷ

Ζῶν ἦν καὶ ἡ ζωὴ ἦν τὸ φῶς τῶν ἀνθρώπων.

The following is from Acts xiii. 16, in Greek and Latin (Kipling, p. 747) :—

Ἀναστάς δὲ ὁ Παῦλος—Cum surrexisset Paulus

Καὶ κατασεισας τῇ χειρὶ εἶπεν—Et silentium manu postulasset, dixit,

Ἄνδρες Ἰσραηλῖται, καὶ οἱ φοβούμενοι τὸν Θεόν—

Viri Istraheliti, et qui timetis Deum

Ἀκουσατε—Audite.

Ὁ Θεὸς τοῦ λαοῦ τούτου, κ. τ. λ.—Deus populi hujus, etc.

Afterwards, in order to save parchment, it became usual to write the stichometrical books continuously, separating the stichs by a point, but still placing their numbers at the end of each book. The following is a specimen from the Cod. Cypri. :—Ὁ δὲ ἐγερθεὶς, παρέλαβε τὸ παιδίον, καὶ τὴν μητέρα αὐτοῦ, καὶ ἦλθεν εἰς γῆν Ἰσραὴλ. ἀκούσας δὲ, ὅτι Ἀρχηλαὸς βασιλεῦσε ἐπὶ τῆς Ἰουδαίας, ἀντὶ Ἡρώδου τοῦ πατρὸς αὐτοῦ, ἐφοβήθη ἐκεῖ ἀπελθεῖν.

Sometimes, instead of the point, the stichs commenced with a capital, as in the Cod. Boerner., which, however, seems to have been written by an ignorant Irish scribe, unacquainted with the languages in which the MS. was written.

ZZ. Si autem aliquid nocuit t læsit te aut debet

Εἰ δὲ .τ.ι. ἠδεικῆσεν σε ἡ. οφείλειται.

hoc mihi imputa ego paulus scripsi mea

Τούτο μοι ἐλλογα Ἐγὼ παῦλος. ἐγραψα τῇ. ἐμῇ

manu ego reddam ut non dicam tibi quod et

χειρὶ. Ἐγὼ ἀποστείω. Ἴνα μὴ λέγω σοι. ὅτι καὶ

te ipsum mihi debes ita t utique frater ego

σε αὐτον. μοι. προσοφίλεις. Ναι. Ἡαί ἀδελφε. Ἐγὼ

te fruor in dño.

σου. οναμην. ἐν. κω. [Philem. 18–20.]

The stichs were sometimes very short, as in Cod. Laud. (E), in which there is seldom above one word in each. The Clermont MS. (D) contains a list of the stichs in all the Greek books of the O. and N. T., and the *Stichometry* of Nicephorus contains a similar enumeration of the Canonical books—the Antilegomena of the O. and N. T.—and of the Apocryphal books, as Enoch, the Testaments of the Patriarchs, etc. etc.

Hug (*Introd.*) observes that the Codex Alexandrinus might be easily mistaken for the copy of a stichometrical manuscript, from the resemblance of its divisions to the *στίχοι*, as, *ἡκούσα δὲ φωνῆς λεγουσῆς μοι. ἀναστάς Πέτρε. θύσον καὶ φάγε*, but these occur only in occasional passages.

Instances occur in other MSS. in which the stanzas are numbered in the margin, as in the Song of Moses, in Greek and Latin in the Psalter of Sedulius of Ireland, who flourished in the ninth century. The song consists of forty-two commas or stichs, comprised in seven colons or stanzas, with a Roman numeral prefixed to each—all in the handwriting of Sedulius. The Latin is ante-hieronymian (Montfaucon, *Palæogr. Græc.*)

There is a Greek stichometrical manuscript of Isaiah, probably of the 9th century, in the Bibliothèque du Roi (1892), in which the stichs do not commence with the line, but there is a Greek numeral letter attached in the margin opposite each stich, the enumeration recommencing at the end of every hundred lines, in this form :—

1. The vision of Isaiah, the son of Amoz, which he saw concerning Judah and Jerusalem, in the days of Uzziah, Jotham, Ahaz, and Hezekiah, kings of
2. Judah. Hear, O heavens, and
3. give ear, O earth : for the Lord hath spoken.
4. I have nourished and brought up children, and they
5. have rebelled against me. The ox knoweth
6. his owner, and the ass his master's crib :
7. but Israel doth not know, my people
8. doth not consider. O sinful nation, etc.

Hug is of opinion that the stichometrical system gave rise to the continuous and regular grammatical punctuation. Attempts at interpunction for the sake of the sense were, however, of much greater antiquity in profane authors than the era of stichometry. Grammatical points are said to have been first introduced by Aristophanes of Byzantium about two centuries before the Christian era. We have already seen that interpunction was in use in MSS. of the N. T. before Euthalius, as in the Cod. Alex. Isidore of Spain acquaints us that the only note of division in his time was a single point, which, to denote a *comma*, or short pause, was placed at the bottom ; to denote a *colon*, or larger pause, in the middle ; and to denote a full pause, or period, was placed at the top of the final letter of the sentence. Manuscripts of the N. T., as the Zurich Cod. Bas. E, have come down to us thus pointed. In others, as the Cod. Alex. and Cod. Ephrem., the point is placed indifferently at the top, bottom, or middle of the letter (Tischendorf, *Cod. Ephrem.*) Others, as L, use a cross for the purpose of marking a period, and Colb. 700 makes use of no other mark. Hupfeld, however (*Stud. u. Krit.*), doubts whether the priests in Cod. Cyprius are notes of the stichs, and denies any distinction between grammatical and other interpunction.

Originally there were no spaces between the words, but in the 8th or 9th century they began to be separated either by spaces\* or by points. About the same period the present marks of punctuation began to be gradually and imperceptibly adopted, and had become universal in the 10th century. Michaelis (*Introd.* ch. xiii.) says, 'that Jerome introduced the comma and colon ;' but this was not for the purpose of dividing sentences. Cod. V, however, in Matthæi, of the 8th century, has the comma and the point, and Cod. Vat. 351, the colon. The Greek note of interrogation came into use in the 9th century. After the invention of printing, the Aldine editions fixed the punctuation, which was, however, varied by Robert Stephens in his different editions of the Bible. It is scarcely necessary to observe that the punctuation of the Bible possesses no authority, and that no critic hesitates to dissent from it. The accents or the writing *κατὰ προσῳδῶν*, which were already in use

in the O. T., were added by Euthalius to his edition, but were not in general use before the 10th century.

The Hebrew MSS. all contain a versicular division, marked with the accent called *silluk*, and the *soph pasuk* (end of the verse). The word *pasuk*, פסוק, is found in the Talmud, where it denotes some division of this kind ; but whether the Talmudical *pesukim* are identical with those in the manuscripts, has been strongly contested. It is said in tract *Kiddushin* (30, c. 1) : 'Our rabbis assert that the law contains 5888 (or, according to Morinus, 8888) *pesukim* ;' while, according to division in our Bibles, there are 5845 verse. 'The Psalms have 8 more.' There are at present 2527. 'The Chronicles 8 less.' This division rather resembles the *στίχοι* in the Sept., of which the Psalms contain 5000. In the Mishna (*Megilla*, iv. 1) it is said : 'He who reads the law must not read less than three *pesukim*. Let not more than one be read by the interpreter, or three in the Prophets.' The passage in Is. lii. 3-5 is reckoned as three *pesukim*. In *Taan* (iv. 3) a precept is given for reading the history of the creation according to the Parashas and the verses in the law ; and in the Bab. Talmud (*Baba Bathra*, xiv. c. 2) the passage in Deut. xxxiv. 5-12 is called 'the last eight verses (*pesukim*) in the law.' It is evident, therefore, that some at least of our present verses correspond with the Talmudical. The term פסוקים *pisukim* is also applied in the Gemara, as synonymous with טעמים, to reading lessons in general, and sometimes to short passages or half verses. But no marks appear to have existed in the text to distinguish these divisions, which were doubtless preserved by oral teaching. The first notice of such signs is found in *Sopherim* (iii. 7), in these words : 'Liber legis, in quo incisum est, et in quo capita incisorum punctata sunt, ne legas in illo.' No such marks occur in the synagogue rolls. The Sept. and Vulg. differ both from the Hebrew and from each other in divisions of this character. (Ps. xliii. 11, 12 ; xc. 2 ; Lam. iii. 5 ; Jon. ii. 6 ; Obad. 9 ; Vulg. Cant. v. 5 ; Eccles. i. 5.) The *pesukim* of the Talmud, which are said there to have descended from Moses, may have been possibly separated by spaces. From a *Targum* on Cant. v. 13, it appears that the decalogue was originally written in ten lines (*tammim*). All the pointed or Masoretic MSS. contain the present verses, divided by the *soph pasuk* (†). We have already referred to the practice of the Masorites in numbering these verses, which was done at the end of each book. Thus at the end of Genesis : 'Genesis has 1534 verses,' etc. ; and at the end of the Pentateuch : 'The number of verses (*pesukim*) in the book of Deuteronomy is 955 ;' its sign דנ"ה (which represents the same number) ; the middle verse is, 'And thou shalt do according to the sentence' (xvii. 10) ; the number of parashas is 10, and of *sidarim* 27 ; and the number of verses in the entire Pentateuch is 5245 [5845 ?] . . . . The number of verses in the Psalms is 2527, the sign פסוקים ; the middle verse, 'Nevertheless they flattered thee with their mouth' [Ixxviii. 36] ; the number of *sidarim* 19 ; and the number of Psalms 150. The Venice edition of Ben Chajjim, from which these divisions are taken, omits them in Chronicles, but they are supplied by two MSS. In the Pentateuch the number of verses in the greater sections, or those marked by פ פ פ and ד ד ד, is also indicated at the end of each sec-

\* In the Cod. Alex. blank spaces are found at the end of the commas or sections, but nowhere else (Marsh's *Michaelis*).

tion, thus: 'Bereshith has 146 verses, sign מצי"ה; Noah has 153 verses, etc. The entire number of verses is 23,206.' Before the *Concordance* of Rabbi Nathan in the 15th century the Jews made their references by citing in the Pentateuch the two first words of the Sabbath lessons, making no use of the shorter *sidarim*, or of the open or shut parashas. Of these, which are confined to the Pentateuch, there are 290 open and 379 shut. Of the larger parashas, or Sabbath lessons, Genesis contains 12, Exodus 11, Leviticus, Numbers, and Deuteronomy, 10 each. Of the lesser *sidarim* Genesis contains 42, etc. These always commence in the Pentateuch with an open or closed section. From the time of Cardinal Hugo's *Concordance* citations began to be made by chapter and letter. All MSS. of the Vulgate after this period began to be thus marked, and we find Nicholas de Lyra in the 14th century frequently citing them in this manner. The citation of chapter and verse was a Jewish improvement of the succeeding century.

The ancient Greek MSS. which have descended to our times also contain a division into short sentences, which have been sometimes called *στιχοι* and *verses*. They are regulated by the sense, and each constitutes a full period. They are frequently double or treble the length of the verses in our present N. T., although sometimes they are identical with them. The Alexandrian, Vatican, Cambridge, Dublin, and other ancient MSS., all contain similar divisions. The following is from the Cod. Ephremi [1 Tim. iii. 14-16]:—

Ταυτα σοι γραφω ελπιζων ελθειν προς σε εν ταχει·  
εαν δε βραδυνω· ινα ειδης πως δει εν οικω θου  
αναστρεφειν· ειτις εστιν εκκλησια θου ζωντος·  
στυλος και εδραιωμα της αληθειας·

Και ομολογουμενος μεγα εστιν το της ευσεβειας  
μυστηριον· ος[?]εφανερωθη εν σαρκι· εδικαιωθεν  
πνι· ωφθη αγγελος· εκηρυχθη εν εθνεσιν· επισ-  
τευθη εν κοσμω· ανελημφθη εν δοξη·

## II. Versicular divisions in the printed Bibles.—

These, together with the numerical notation, are generally attributed to Robert Stephens, or Stephens [STEPHENS]. Their origin is, notwithstanding, involved in obscurity. Even those who attribute the invention to Stephens are not agreed as to their date (comp. Calmet, *Pref. to the Bible*; Du Pin, *Proleg.*; Simon, *Hist. Critique*; Jahn, *Introd.*) Morinus (*Exercit. Bibl.*), who is followed by Prideaux (*Connection*), attributes the verses to Vatablus, without naming a date; while Chevallier (*Hist. de l'Imprimerie*) and Maittaire (*Historia Stephanorum*) assert that Stephens divided the chapters into verses, placing a figure at each verse, in the N. T. in 1551, and in the O. T. in 1557. His son Henry tells us this was done by his father 'inter equitandum' whilst on a journey from Paris to Lyons.

But it is far from being true that Stephens, as has been commonly believed, was the first who either followed the Masorites, or divided the chapters into verses, or attached figures to each verse. This had been done, not only in regard to the Psalms, by James le Fèvre, in his *Psalterium Quin-cuplex* in 1509, but throughout the *whole Bible* by Sanctes Pagninus in 1528. The *Psalterium* was beautifully printed by Henry, father of Robert Stevens, each verse commencing the line with a red letter, and a number prefixed; and we may here observe, that the Book of Psalms was the first

portion of the Scriptures to which numbers were attached, by designating each separate Psalm by its number. Some ascribe this numeration to the Seventy; it is, we believe, first referred to by St. Hilary (*Pref.*), and is found in the MSS. of the Sept. Whether they were so numbered at the Christian era is somewhat doubtful. In Acts xiii. 33, the *second* Psalm is cited by its number, but in some of the best manuscripts the reading here is the *first* Psalm. In ver. 35 'in another' is said, without reference to its number; and Kuinoel is of opinion that the true reading in ver. 33 is simply *ἐν ψαλμῷ*—'in a psalm.'

In the year 1528 the Dominican Sanctes Pagninus of Lucca published at Lyons, in quarto, his accurate translation of the Bible into Latin from the Hebrew and Greek. This edition is divided throughout into verses marked with Arabic numerals in the margin, both in the O. and N. T. The text runs on continuously, except in the Psalms, where each verse commences the line. There was a second edition, more beautifully executed, but without the figures and divisions, published at Cologne in 1541. The versicular divisions in the O. T. are precisely the same with those now in use—viz. the Masoretic. Each verse is separated by a peculiar mark (¶).

In his preface to his French translation (Gen. 1552), Stephens asserts that the authors of the ancient (stichometrical) division reckoned by whole books, and he only professes to intimate them *in part*, as well as the Hebrew copies; which he did by making a versicular division of each chapter, and prefixing a figure to each verse (as in Nathan's *Concordance*), instead of adding the amount at the end of each book. Hug observes that it is really true that ancient MSS. of the N. T. are sometimes divided into smaller sections, which have some analogy to our verses, instancing the Alexandrine, Vatican, and others. His fac-simile contains eight of the nine first verses of St. Mark's Gospel, each of which commences the line with a capital. All but one are identical with those in Stephens.

It is, however, only in the canonical books of the O. T. that Stephens follows Pagninus. In St. Matthew's Gospel, Pagninus has 577 verses, and Stephens 1071. The number of verses in each chapter in Stephens is often double, frequently treble that in Pagninus. In John v., for instance, Pagninus has 7 and Stephens 22 verses. In the deuterocanonical books, into which no Masoretic distinction had found its way, Stephens has also a different division; thus, in Tobit he has 292 verses, while Pagninus has but 76; and the same proportion prevails throughout the other books, only Pagninus has not the third and fourth books of Esdras, the Prayer of Manasses, nor the addenda to Daniel.

It is not easy to arrive at entire satisfaction on the subject of Stephen's claims. We would, however, offer the following view as the result of our inquiries:—

Rabbi Nathan having in his *Concordance* (in 1450) commenced the practice of referring to a versicular division of each of the Latin chapters by the number of each Masoretic verse in the chapter, Arabic figures were, after the example of Le Fèvre's edition of the Psalms, affixed to each verse by Pagninus in his Latin Bible in 1528. Pagninus introduced a somewhat similar division into the N. T. and Apocryphal books. His system was

adopted by Robert Stephens in the N. T. in 1551, and in the whole Bible in 1555, with scarcely any alteration except in the deuterocanonical books and the N. T., wherein he introduced a different division. This division was partly founded on the practice of ancient manuscripts, and was partly his own. But as his object was to adapt his division to his *Concordance*, without any reference to the sense, he unfortunately introduced a much worse division than he found in any of his models. And it is to be lamented that his 'wild and indigested' system of breaking up the text into what appear to the eyes of the learned and to the minds of the unlearned as so many detached sentences (Michaelis' *Introduct.*), has had a deleterious effect on the sense of Scripture, and perhaps given rise to some heresies\* (See *Pref. to Bishop Lloyd's Greek Testament*). Michaelis supposes that the phrase 'inter equitandum' does not mean that Stephens accomplished his task whilst actually riding on horseback, but that during the intervals of his journey he amused himself by doing it at his inn. If his division was a mere modification of that of Pagninus, it might easily have been done 'inter equitandum': a phrase which, however we understand it, not inaptly represents the post-haste expedition with which his work was executed. Whether Pagninus himself adopted his division in the N. T. from manuscripts, or what his design was in introducing it, must be the result of an investigation which we cannot now enter upon. Stephens, it is true, never once refers to Pagninus' system; but we could hardly suppose that he was unacquainted with it, even had we no evidence to this effect. The evidence, however, does exist, for Stephens, in 1556, had in his possession two copies of Pagninus' Bible. The preface to his edition of 1557 contains the following words: 'In exteriori autem parte interpretationem Sanctis Pagnini (quam potissimum, at maxime fidem, omnes uno ore laudant), crassioribus litteris excusam damus: sed hanc quidem certe multis partibus ea quam in aliis editionibus habes, meliorem. *Nacti enim sumus duo ex primis illius editione exemplaria*, in quibus non solum typographica errata non pauca, nec levia, manu propria ipse author correxerat, sed multos etiam locos diligentius et accuratius quam antea examinatos, recognoverat.'

Croius (*Observat.*) states that he had seen very ancient Latin MSS. containing Stephens' division, with the first letter of each verse rubricated, but he does not designate his MSS. We believe this was a biased assertion. We have ourselves seen Latin MSS. with periods so marked; but they are not the same with Stephens' verses. There is in the British Museum also a MS. of part of the Sept. (Harl. 5021), dated in 1647, which is versiculated throughout, and marked with figures; but the verses are much longer than those of Stephens'. Latin MSS. are found divided in the same manner as the Greek, one of which is the Cod. Bezae, which was collated by Stephens for his edition of 1550. Dr. Laurence's book of Enoch is divided into verses, with numbers attached, as well as into

chapters called *Kefel*. Dr. Laurence says that these divisions into verses are arbitrary, and vary in the different Ethiopic MSS. of Enoch. The numbers, we presume, were added by the translator. By a letter from Dr. Bandinell, keeper of the Bodleian Library, we learn that that library possesses an Ethiopic MS. of the N. T. divided into sections and paragraphs entirely different from ours, not numbered, but separated by a peculiar mark. The verses in the Gospel of the Templars [GOSPELS, SPURIOUS], instead of spaces or figures, are separated by a horizontal line [—] (*Thilo Cod. Apoc.*)

The MS. of the Syriac N. T. in the British Museum (No. 7157), written at Bethkuko A.D. 768 (see Wright's *Seiler*, p. 651, note), contains a numerical division in the Gospels, with the numbers in rubric inserted by a coeval hand into the body of the text. Attached to each number is another in green, referring to a canon of parallel passages on the plan of that of Eusebius, but placed at the foot of each page. The sections, which are called *versiculi* in the catalogue, and have been mistaken for verses, are more numerous than the Ammonian, Matthew containing 426, Mark 290, Luke 402, and John 271. There is a complete capitulation also throughout all the books, the chapters being separated in the text by a peculiar ornament, with the number in the margin. Of these chapters Matthew has 22, Mark 13, Luke 22, John 20, Acts 25; of the Catholic Epistles, James 1, and [i.] John 6, and the Pauline have 54. After the first Gospel there is a double number, by which the former are recapitulated, and a treble number from the Acts to the end.

The numerical divisions into chapters and verses were first adapted to liturgical use in the Anglican Church—the chapters in Edward VI.'s first Book of Common Prayer (1549), and the verses in the Scotch Liturgy (1637), from whence they were adopted into the last revision (1662).—W. W.

VERSIONS. [See under their respective heads.]

VILLAGE. Some of the words rendered *village* in the A. V. are improperly so rendered. Thus Hab. iii. 14 the pl. פְּרוֹן is rendered 'villages.' It should be 'captains' or 'eminent men,' men separated by their rank or prowess from the mass; LXX. δυνάσται; Syr. , *she-lithona*, *princeps*, *praefectus*. In Judg. v. 7, 11, פְּרוֹן, properly *rulers*, Sept. δυνάτορ, is rendered 'villages;' and Ezek. xxxviii. 11 פְּרוֹנוֹת means *open country*. The cognate noun פְּרוֹי, however, signifying a countryman, a rustic, with כִּפְרִי prefixed, signifies a *country village*. The word חֲגֵרֶשׁ, translated 'villages' Lev. xxv. 31, is more correctly rendered at the 34th ver. 'suburbs.' The proper Heb. term for *village* is כִּפְרִי, which appears also in the forms כִּפְרִיר (Neh. vi. 2) and כִּפְרִי (1 Sam. vi. 18),

and is represented by the Arabic كَفْر, *kefr*, still so much in use; but another term, חֲצֵר, properly an enclosure, is used of farm-buildings enclosing a court, of the encampment of nomades (Gen. xxviii. 16; Deu. ii. 25, etc.), and of hamlets near towns

\* Tholuck (see Robinson's *Bibl. Sacra*, 1844, vol. i. p. 354) conceives the omission of the verses to be a defect in Lachmann's edition; but Lachmann has inserted Stephens' figures in the body of the text, and has properly discarded the use of capitals, except at the commencement of a period.

(Josh. xiii. 23, 28; xv. 32, *seq.*; 1 Chron. iv. 33; Neh. xi. 2, 5). Different from these were the **בָּנוֹת**

**הָעִיר**, *daughters of the city*, which were small towns or villages lying near to a great city, dependent on it, and included under its jurisdiction. The term **חַיָּה**, from **חָיָה**, *to breathe, to live*, qu. *place of living*, though others prefer to derive it from the Arab.

**حوی**, *chawa, convolvit, in gyrum se flexit*, whence

**حوا**, *chawaon, a tent, or a cluster of tents, an abode of nomades*, also denotes a village. The term occurs only in the plural, and only in reference to certain villages or small towns bearing the name of Havoth-Jair. These are mentioned Num. xxxii. 42; Deut. iii. 14; Josh. xiii. 30; Judg. x. 4; 1 Kings iv. 13 [HAVOTH-JAIR]. In the N. T. the term **κώμη** is used of Bethphage (Matt. xxi. 2); of Bethany (Luke x. 38; John xi. 1); of Emmaus (Luke xxiv. 13); and of Bethlehem (John vii. 42). Bethsaida of Galilee is called **κώμη** (Mark viii. 23, 26), and **πόλις** (John i. 45). Bethsaida of Gaulonitis, to which Herod-Philip II. allowed the dignity of a city (Joseph. *Antiq.* xviii. 2. 1), is called **πόλις**; unless these two are one and the same place (Thomson, *Land and Book*).

The Rabbins make the distinction between a city (**עיר**) and a village (**כפר**) to lie in the former having and the latter wanting the number of learned men (ten) deemed requisite to entitle a place to a synagogue (Lightfoot, *Chorograph. Matt. præmiss.* c. 98; and *Hor. Heb. in Matt.* iv. 23). This is a distinction, however, so purely arbitrary and artificial that it is worthless for any practical purpose. We know nothing distinctively characteristic of the villages of ancient Palestine except that they were not surrounded by walls. Probably in some cases they were not much better than a collection of huts with mud walls, or composed of stones rudely built together.—W. L. A.

VINE, THE (**נֶפֶץ**, *gephen*), with its fruit, the Grape, **ענב**, *anub*, or **יַיִן**, *yayin*, as well as Wine, is very frequently mentioned in Scripture, as might be expected from its being a native of the East, well known to ancient nations, and highly esteemed for its various natural and artificial products. Homer and Herodotus mention the vine: Theophrastus and Dioscorides treat of it in several chapters. But long before these times it was known to the Egyptians: representations of the careful culture of the vine, of the treading of the grapes and squeezing out its juice, and of the storing of the wine in jars, being all discovered in the paintings within their tombs. Though cultivated at such early periods, the vine was not a native of Egypt, nor probably of Syria; but both European and Asiatic writers mention it as a native of the hilly region on the southern shores of the Caspian, and in the Persian province of Ghilan. In the districts of the Caucasus, as well as in the elevated valley of Cashmere, the vine climbs to the tops of the loftiest trees, and the grapes are of fine quality and large size in many places of the intermediate country. Every part of the vine was and still continues to be highly valued. The sap was at one time used in medicine. Verjuice expressed from wild grapes is well known for its acidity. The late Sir A. Burnes mentions that in Caubul they use grape powder, obtained by drying and

powdering the unripe fruit, as a pleasant acid. When ripe, the fruit is everywhere highly esteemed, both fresh, and in its dried state as raisins. The juice of the ripe fruit, called *must*, is valued as a pleasant beverage. By fermentation, wine, alcohol, and vinegar are obtained; the lees yield tartar; an oil is sometimes expressed from the seeds; and the ashes of the twigs were formerly valued in consequence of yielding a salt, which we now know to be carbonate of potash.

518.

It is not surprising, therefore, that the vine is so frequently mentioned both in the O. and in the N. T., for it was one of the most valuable products of Palestine, and of particularly fine quality in some of the districts. Those of Eshcol, Sorek, Jibmah, Jazer, and Abel, were particularly distinguished. The men sent from Kadesh-barnea to explore the Promised Land brought back as a sign of its fertility—what would be sure to be appreciated by men who had been sojourning in the desert—a bunch of grapes from Eshcol, near Hebron, which they carried between them on a stick, probably to prevent its being bruised, but no doubt also on account of its great size. Modern travellers—as Dandini, Mariti, and Laborde—have described some of the grapes of Palestine as being of large size. Nau affirms that in Syria he had seen clusters ten or twelve pounds in weight; and Schulz states that he supped under a vine whose stem was about a foot and a half in diameter, its height about thirty feet, while its branches and branchlets, which had to be supported, formed a tent of upwards of thirty feet square. But this will appear nothing extraordinary to those who have seen the vine at Hampton Court, which covers a space of 2200 square feet. And we have it on record that, even in our own country, a bunch of *Syrian* grapes was produced at Welbeck, which weighed nineteen pounds, and measured in length twenty-three inches, and nineteen and a half inches in its greatest diameter. It was sent as a present from the Duke of Portland to the Marquess of Rockingham, and conveyed

a distance of twenty miles, on a staff, by four labourers, two of whom bore it in rotation, thus affording a striking illustration of the proceeding of the spies (Kitto, *Physic. Geog. of Palestine*, p. cccxxx.)

A fruitful vine is often adduced as an emblem of the Hebrew nation, and also the vine that was brought out of Egypt. A period of security and repose is figured by every one sitting under his own vine and fig-tree; and prosperity by 'Judah, a lion's whelp, binding his foal to the vine, and his ass's colt to the choice vine;' both indications of Eastern manners, where sitting in the shade is most pleasant, and tying cattle in similar situations a common practice. Of the vine there were no doubt several varieties, as of all cultivated plants, but that of Sorek is especially distinguished (Gen. xlix. 11; Jer. xi. 21). Rosenmüller supposes this to be the variety called *serik* or *sorik*, which is cultivated not only in Syria, but also in Arabia and in the north of Africa. It appears to be the variety called *kishmish*, or the Persian *bedana*, which signifies 'without seed.'

The vine must have been cultivated in very early times, as we are informed in Gen. ix. 20 that Noah planted the vine immediately after the deluge; and bread and wine are mentioned in Gen. xiv. 18. In Egypt also we have early notice of it (Gen. xl. 9, 10), as Pharaoh's chief butler saw in a dream a vine with three branches; and the Israelites complain (Num. xx. 5) that Moses and Aaron had brought them out of Egypt into that dry and barren land, where there were neither figs nor vines. The wines of Syria were in early times also highly esteemed; and though the growth of the vine has much decreased, from the diminished population and the Mohammedan rule, yet travellers still speak with enthusiasm of some of the wines, as of the vino d'oro of Lebanon. As space will not permit us to notice all the passages in which the vine, the grape, and wine are mentioned, we must refer to Celsius, *Hierobot.* vol. i. pp. 400-444; Calmet's *Dictionary*; Rosenmüller's *Biblical Bot.* p. 220; and to Kitto's *Physical History of Palestine*, p. cccxxiv., in all of which the subject is amply discussed and clearly elucidated.—J. F. R.

**VINE OF SODOM.** In Deut. xxxii. 32 it is said of the enemies of Israel that 'their vine is the vine of Sodom.' This has been supposed to refer to some natural production; and the so-called apples of Sodom have been generally regarded as the production referred to. What these were is very uncertain; but on this question we need not enter here, for it is wholly improbable that a fruit in shape and appearance resembling an *apple* should be called a *vine*. The vine of Sodom, if there was any such plant, must have been a trailing or creeping plant resembling a vine, probably one of the gourd species [PAKUOTII]. But it is more than doubtful whether any natural production is referred to in the passage quoted. It is more probable that, as in Ps. lxxx. 8, 14; Is. v. 2, 7; Hos. x. 1, the people as such are called a vine, so here the enemies of Israel represented by a vine are described as so depraved and reprobate that they are as the people of Sodom.—W. L. A.

**VINEGAR.** [WINE.]

**VIOL.** [MUSICAL INSTRUMENTS.]

**VIPER** (אַפֶּסֶת). [SARAPH.]

**VIRGIN** (עַלְמָה, בתולה; Vulg. *virgo*). The word בתולה occurs fifty times in the O. T., and is translated by παρθένος in the Sept. except in two instances. It is rendered once by νεάνις (1 Kings i. 2) and once by νέμψη (Joel i. 8). See Gen. xxiv. 16; Exod. xxii. 15, 16, 17; Lev. xxi.; Deut. xxii., xxxii.; Judg. xxi., etc. עלמה occurs seven times, in four of which it is rendered νεάνις, *puella* (Exod. ii. 8; Ps. lxxviii. 25; Cant. i. 3; vi. 8); in one (Prov. xxx. 19) νεότης, and in two (Gen. xxiv. 43; Is. vii. 14) παρθένος. The same word is also rendered *virgo* in the Vulgate in these two passages; in Exod. ii. 8, *puella*; in Ps. lxxviii. 26, *juvencula*; in Cant. i. 3, and vi. 8, *adolescentula*; and in Prov. xxx. 19, *adolescentia*, after the Sept. The Syriac follows the LXX. in Is. vii. 14, but in all the other passages agrees with Aquila, Symmachus, and Theodotion, who translate עלמה by νεάνις, not only in Ps. lxxviii. 26; Gen. xxxiv. 43; Exod. ii. 8; Prov. xxx. 19 (in which they agree with the Sept.), but also in Is. vii. 14. Justin Martyr (*Dial. c. Tryph.*) complains of the partiality of the Greek translators in rendering עלמה here by νεάνις (a term which does not necessarily include the idea of virginity), accusing these Jewish writers of wishing to neutralise the application to the Messiah of this passage, which the Jews of his time referred to Hezekiah. Gesenius (*Comm. in Isa.*) maintains, notwithstanding, that νεάνις, not παρθένος, is the correct rendering in Is. vii. 14, while he at the same time agrees with Justin that the prediction cannot possibly refer to Hezekiah, who was born nine years before its delivery. Fürst (*Concordance*) explains עלמה by *puella, virgo, nubilis illa vel nupta, tenera et florens ætate, valens ac vegeta*; but Hengstenberg (*Christology*), although admitting that עלמה does not necessarily mean a virgin (which he conceives is plain from Prov. xxx. 19), maintains that it is always applied in Scripture to an *unmarried* woman. St. Matthew (i. 23), who cites from the LXX., applies the passage (Is. vii. 14) to the miraculous birth of Jesus from the blessed Virgin. Professor Robinson (*Gr. and Eng. Lexicon*) considers παρθένος here to signify a bride, or newly-married woman, as in Homer (*Il.* ii. 514):

Ὅς τέκεν Ἀστυόχη . . . παρθένος αἰδομένη  
(‘Them bore Astyoche, a virgin pure’)

COWPER);

and considering it to refer apparently to the youthful spouse of the prophet (see Is. viii. 3, 4; vii. 3, 10, 21), holds that the sense in Matt. i. 23 would then be: Thus was fulfilled in a strict and literal sense that which the prophet spoke in a wider sense and on a different occasion. Jerome says that the Punic for *virgo* is *alma*, although the word עלמה is but twice so rendered in the Vulgate. The early Christians contended also for the *perpetual* virginity of Mary against the Jews, who objected to the use of the term *ἕως* (until, Matt. i. 25) as implying the contrary; but the Fathers triumphantly appealed against the Jewish interpretation to Scripture usage, according to which this term frequently included the notion of perpetuity (comp. Ps. cx. 1; Gen. viii. 7; Is. xlv.

## VITRINGA

4; Ps. lxi. 7; Matt. xxviii. 20; and see Suicer's *Thesaurus*, and Pearson *On the Creed*, Art. iii.) Although there is no proof from Scripture that Mary had other children [JAMES; JUDE], the Christian Fathers did not consider that there was any impiety in the supposition that she had (Suicer, *ut supra*). But, although not an article of faith, the perpetual virginity of Mary was a constant tradition of both the Eastern and Western church. The most distinguished Protestant theologians have also adopted this belief, and Dr. Lardner (*Credibility*) considered the evidence in its favour so strong as to deserve that assent which he himself yielded to it.

The word *παρθένος*, *virgin*, occurs in Matt. i., xxv.; Luke i.; Acts xxi.; 1 Cor. vii.; 2 Cor. xi. 2; and Apoc. xiv. 4. In 1 Cor. and Apoc. it is applied to both sexes, as it frequently is by the Fathers, who use it in the sense of *calcebs*. It is sometimes metaphorically used in the O. T. for a country, and in the N. T. to denote a high state of moral purity.—W. W.

VITRINGA, CAMPEGIUS, D.D., successively professor of Oriental languages and of theology at Leyden, and professor of theology at Franeker, was born at Leuwarden 16th May 1659, and died at Franeker 31st March 1722. His great work is his *Commentarius in librum Prophet. Jesaie*, 2 vols. fol., of which the first edition was published at Leuwarden in 1714-20; after his death an improved edition was carried through the press by Schultens, Basil. 1732. Besides this great work Vitringa published a commentary on Zechariah 1734, and on the Apocalypse 1705, and two volumes of *Observationes Sacrae*, of which several editions have appeared; the last in 1723, edited by Werner, has a life of the author prefixed. He wrote also *De Synagoga vetere libb. iii.* Franek. 1696, Weissenfels 1726, an abridged translation of which, by the Rev. J. L. Bernard, appeared Lond. 1842. Vitringa had previously published two relative treatises, *Archisynagogus obs. novis illust.* Franek. 1685, and *De decem viris otiosis*, Franek. 1687. Among his Biblical works may be also mentioned his *Hypotyposis Hist. et Chronol. sac. a M. C. usque ad finem sac. I.*, of which three editions have appeared. All Vitringa's writings are highly valuable. His son, whose name was also Campegius, and a professor at Franeker, has left a volume of *Dissertationes Sacrae*, Franek. 1731, which show learning and ability, and occasion regret that the author's early death prevented the harvest of which they give the promise. He was born 23d March 1693, and died 11th Jan. 1723. Another son, Horaz, who died at the age of eighteen in 1696, distinguished himself by his strictures on the treatise of Vorst, *de Hebraismis N. T.*—W. L. A.

VOW (נדר) is represented by a Hebrew word which signifies to 'promise,' and may therefore be defined as a religious undertaking, either, 1. Positive, to do or perform; 2. or Negative, to abstain from doing or performing a certain thing. The morality of vows we shall not here discuss, but merely remark that vows were quite in place in a system of religion which so largely consisted of doing or not doing certain outward acts, with a view of pleasing Jehovah and gaining his favour. The Israelite, who had been taught by performances of daily recurrence to consider particular cere-

VOL. III.

monies as essential to his possessing the divine favour, may easily have been led to the conviction, which existed probably in the primitive ages of the world, that voluntary oblations and self-imposed sacrifices had a special value in the sight of God. And when once this conviction had led to corresponding practice, it could not be otherwise than the highest consequence that these sacred promises, which in sanctity differed little from oaths, should be religiously and scrupulously observed. Before a vow is taken there may be strong reasons why it should not be made; but when it is once assumed, a new obligation is contracted, which has the greater force because of its voluntary nature: a new element is introduced, which strongly requires the observance of the vow, if the bonds of morality are not to be seriously relaxed. The writer may be of opinion that total abstinence is in itself not a virtue nor of general obligation, but he cannot doubt that 'breaking the pledge,' when once taken, is an act of immorality that cannot be repeated without undermining the very foundations of character: whence it obviously appears that caution should be observed, not only in keeping, but also in leading men to make pledges, vows, and promises.

Vows, which rest on a human view of religious obligations, assuming as they do that a kind of recompense is to be made to God for good enjoyed, or a consideration offered for good desiderated, or a gratuity presented to buy off an impending or threatened ill, are found in existence in the antiquities of all nations, and present themselves in the earliest Biblical periods (Gen. xxviii. 20; Judg. xi. 30; 1 Sam. i. 11; 2 Sam. xv. 8). With great propriety the performance of these voluntary undertakings was accounted a highly religious duty (Judg. xi. 35; Eccles. v. 4, 5). The words of the last vow are too emphatic, and in the present day too important, not to be cited: 'Better is it that thou shouldst not vow, than that thou shouldst vow and not pay' (comp. Ps. lxxvi. 13, *seq.*; lxxvi. 11; cxvi. 18). The views which guided the Mo- saic legislation were not dissimilar to those just expounded. Like a wise lawgiver, Moses, in this and in other particulars, did not attempt to sunder the line of continuity between the past and the present. He found vows in practice; he aimed to regulate what it would have been folly to try to root out (Deut. xxiii. 21, *seq.*). The words in the 22d verse are clearly in agreement with our remarks: 'If thou shalt forbear to vow, it shall be no sin in thee.'—J. R. B.

VULGATE (*Vulgata*; *κωφή*), the name generally given to the Latin translation of the Bible used in the Western Church [LATIN VERSIONS].

VULTURE. [DAAH; NESER.]

## W

WAGES. The word שכר, rendered in A. V. by this term, comes from a verb which signifies to hire, to pay, or receive wages. A word rendered *wages* is פָּעֵל or פְּעֻלָּה, from *to do, to labour*. Wages, then, according to earliest usages of mankind, are a return made

3

purchaser for something of value—specifically for work performed. And thus labour is recognised as property; and wages as the price paid or obtained in exchange for such property. In this respect it is obviously nothing more than a side effect.

most important work is his *History of Israelism*, first published in 1830.

## WANDERING, WILDERNESS OF 1078 WANDERING, WILDERNESS OF

identified, and the incidents narrated, correspond most accurately with the character of the country. The scene and the record are in perfect harmony. The difficulties and doubts conjured up by some recent writers disappear entirely before a thoughtful study of the sacred narrative and a minute examination of the wilderness.

It may be well to notice here a very singular theory regarding the Wilderness of Wandering, originally propounded by Dr. Beke in his *Origines Biblicæ*, and very recently revised and expanded by a writer in Fullarton's *Cyclopædia of Biblical Geography* [EXODE]. The theory is so strange, so totally opposed to established views of geographers ancient and modern, and so inconsistent, it may be added, with the whole tenor of the Biblical narrative, that it does not require refutation. Its leading points are as follows:—1. The country of *Mitzraim* is not the modern Egypt. 'Mitzraim proper,' says Dr. Beke, 'may be correctly defined to be the portion of Arabia Petrea which lies between the two heads of the Arabian Gulf (the Red Sea of geographers), and which extends northward from thence to the Mediterranean and the confines of Palestine' (*Origines Bib.* p. 291). 2. The Red Sea which the Israelites crossed, and in which the Egyptians were destroyed, was the gulf of Akabah (*Id.* p. 180). 3. Sinai, 'the Mount of the Law,' was situated on the east side of the Arabah, and probably beside the city of Petra (*Id.* 194). 4. 'The Wilderness of Wandering' was the great desert of Arabia east of Edom.

This remarkable theory its authors endeavour to support by theories as remarkable as itself. Not only are the whole results of geographical research summarily set aside, but the whole physical conformation of northern Africa and western Asia is arbitrarily changed. It is affirmed that Lower Egypt, including the whole Delta of the Nile, was at the time of the Exodus beneath the waves of the Mediterranean. It is affirmed that the Nile emptied itself to the eastward of the meridian of Suez. It is affirmed that great rivers flowed through the desert Et-Tih, and that the peninsula of Sinai was like a well-watered garden. It is affirmed that a line of great lakes or seas ran across the whole Arabian peninsula, connecting the Red Sea (that is, the Gulf of Akabah) with the Persian Gulf. [See generally EXODE, as above, and *Origines Bib.*]

These startling affirmations are not merely set forth as possibilities, or probabilities; but, to use the oft-repeated language of the authors, 'they are established beyond the possibility of doubt.' Most geographers, however, will take the liberty of doubting them. In fact few will, or can, receive them who, free from prejudice, carefully study the descriptions given in the closing chapters of Genesis and beginning of Exodus, of the character of the soil of Mitzraim, of its river, of its wheat, barley, and flax crops, of its brick-making and brick-built cities, of its fish and vegetables, and of its horsemen and chariots. Could such descriptions by any possibility apply to the rugged mountains and dreary plains of the peninsula of Sinai, and the desert of Et-Tih? The traveller who has passed through these regions will doubtless smile at the question.

THE JOURNEY OF THE ISRAELITES may, for convenience of reference, be divided into four stages.

1. *Rameses to the Red Sea*.—This stage has already been described in the article EXODUS. A

few of the leading points, however, must here be stated. Rameses is mentioned as the place from which the Israelites set out: 'And they departed from Rameses in the first month, on the fifteenth day of the first month; on the morrow after the passover the children of Israel went out with an high hand in the sight of all the Egyptians . . . And the children of Israel removed from Rameses and pitched in Succoth' (Num. xxxiii. 3, 5). It must not be supposed, however, that the whole body of the Israelites, men, women, and children, with their flocks, herds, and movables, had been gathered to that one spot, and there arranged in compact order. The people had been long preparing for the journey. A system of communication was established by which Moses could convey his orders with great rapidity to every part of the country in which they resided. The flocks and herds were doubtless away on the open plain towards the eastern frontier of Goshen. Most of the people being shepherds, were necessarily seminomads, and had their wives and children with their flocks. Moses and the leading men of the nation, with most of those probably who had been engaged in labour by Egyptian taskmasters, had assembled at Rameses; and they marched out in order. It must strike the thoughtful reader as most remarkable that *all* the people were able to set out on such a journey on short notice. Sceptics and infidels have objected to the historic truth of the narrative on this ground. Bishop Colenso puts the objection in its most plausible form. The people, he says, amounted to two millions. These were required to start at a moment's notice. The order was conveyed to them all; the passover was observed; property to an immense amount was borrowed; the flocks and herds were collected; the sick and infirm, women in child-birth and young infants, brought in from a wide extent of country, and congregated at Rameses. He concludes—'I do not hesitate to declare this statement to be utterly incredible and impossible' (*Pent. Pt. i.* pp. 61-65). It would be incredible were the facts as the bishop represents them. But they are not so. It would seem from a careful study of the whole narrative, that the flocks, herds, and 'mixed multitude,' did not follow the same line of route as the chief men. They are not mentioned at the passage of the Dead Sea, nor at Marah, nor at Elim. They appear to have taken a more northerly course, passing round the head of the gulf and through the best pastures. This is the plan always adopted by Bedawin on the march. The chiefs and main body of men keep together, while the flocks and their attendants roam far and wide. Yet when an Arab writer gives an account of the migrations of his tribe, he confines the narrative wholly to the central group.

It will be observed also that Colenso utterly ignores any divine element in the Exodus. He judges of it as a simple case of migration, in direct opposition to what is affirmed by the sacred historian repeatedly and emphatically. The power of the Lord was directly exercised in every stage of the Exodus (Exod. xii. 23, 36, 42, 51; xiii. 14-18, *seq.*) We know not how far the direct exercise of divine power extended—how it strengthened the weak, healed the sick, or directed the movements of the whole multitude. We do know, however, that it was exercised. Without it the Exodus would have been impossible.

4; Ps. lxi. 7; Matt. xxviii. 20; and see Suicer's *Thesaurus*, and Pearson *On the Creed*, Art. iii.) Although there is no proof from Scripture that Mary had other children [JAMES; JUNE], the Christian Fathers did not consider that there was any impiety in the supposition that she had (Suicer, *ut supra*). But, although not an article of faith, the perpetual virginity of Mary was a constant tradition of both the Eastern and Western church. The most distinguished Protestant theologians have also adopted this belief, and Dr. Lardner (*Credibility*) considered the evidence in its favour so strong as to deserve that assent which he himself yielded to it.

The word *παρθένος*, *virgin*, occurs in Matt. i. xxv.; Luke i.; Acts xxi.; 1 Cor. vii.; 2 Cor. xi. 2; and Apoc. xiv. 4. In 1 Cor. and Apoc. it is applied to both sexes, as it frequently is by the Fathers, who use it in the sense of *celibs*. It is sometimes metaphorically used in the O. T. for a country, and in the N. T. to denote a high state of moral purity.—W. W.

VITRINGA, CAMPEGIUS, D.D., successively professor of Oriental languages and of theology at Leyden, and professor of theology at Franeker, was born at Leuwarden 16th May 1659, and died at Franeker 31st March 1722. His great work is his *Commentarius in librum Prophet. Jesaie*, 2 vols. fol., of which the first edition was published at Leuwarden in 1714-20; after his death an improved edition was carried through the press by Schultens, Basil. 1732. Besides this great work Vitringa published a commentary on Zechariah 1734, and on the Apocalypse 1705, and two volumes of *Observationes Sacre*, of which several editions have appeared; the last in 1723, edited by Werner, has a life of the author prefixed. He wrote also *De Synagoga vetere libb. iii.* Franek. 1696, Weissenfels 1726, an abridged translation of which, by the Rev. J. L. Bernard, appeared Lond. 1842. Vitringa had previously published two relative treatises, *Archisynagogus obs. novis illust.* Franek. 1685, and *De decem viris otiosis*, Franek. 1687. Among his Biblical works may be also mentioned his *Hypotypypsis Hist. et Chronol. sac. a M. C. usque ad finem sac. I.*, of which three editions have appeared. All Vitringa's writings are highly valuable. His son, whose name was also Campegius, and a professor at Franeker, has left a volume of *Dissertationes Sacre*, Franek. 1731, which show learning and ability, and occasion regret that the author's early death prevented the harvest of which they give the promise. He was born 23d March 1693, and died 11th Jan. 1723. Another son, Horaz, who died at the age of eighteen in 1696, distinguished himself by his strictures on the treatise of Vorst, *de Hebraismis N. ## W

WAGES. The word שֹׁכֵר, rendered in A. V. by this term, comes from a verb which signifies to hire, to pay, or receive wages. A word rendered *wages* is פָּעֹלָה or פְּעֻלָּה, from פָּעַל, to do, to labour. Wages, then, according to earliest usages of mankind, are a return made

purchaser for something of value—specifically for work performed. And thus labour is recognised as property; and wages as the price paid or obtained in exchange for such property. In this relation there is obviously nothing improper or humiliating on the side either of the buyer or the seller. They have each a certain thing which the other wants, and in the exchange which they in consequence make both parties are alike served. In these few words lies the theory, and also the justification of all service. The entire commerce of life is barter. In hire, then, there is nothing improper or discreditable. It is only a hireling—that is, a mercenary, a mean sordid spirit—that is wrong. So long as a human being has anything to give which another human being wants, so long has he something of value in the great market of life; and whatever that something may be, provided it does not contribute to evil passions or evil deeds, he is a truly respectable capitalist, and a useful member of the social community. The Scriptural usage in applying the term translated ‘wages’ to sacred subjects—thus the Almighty himself says to Abraham (Gen. xv. 1), ‘I am thy exceeding great reward’—tends to confirm these views, and to suggest the observance of caution in the employment of the words ‘hire’ and ‘hireling,’ which have acquired an offensive meaning by no means originally inherent in themselves, or in the Hebrew words for which they stand (Gen. xxx. 18, 32, 33).

Property, in all ages, has in practice disowned the truth, that it has its duties as well as its rights. This Jacob found in his dealings with Laban. But in the iron age of the Jewish state, injustice towards those who had no property but such as their labour supplied became very common, and conducted, with other crimes, to call down the divine wrath—‘I will be a swift witness against those that oppress the hireling in his wages’ (Mal. iii. 5).—J. R. B.

## WAGGON. [CART.]

WAHL, CHRIST. ABRAHAM, D.D., born at Dresden 1st November 1773, was successively pastor at Friesdorf, in the duchy of Mansfeld, super-pastor at Schruberg, superintendent at Oschatz, and church-councillor at Dresden. He published an *Introduction to the Bible* for schools, Leip. 1819, and also a *Bibl. Handwörterbuch* for the higher classes, Leip. 1825; but the work which gives him a claim to notice here is his admirable *Clavis Novi Test. philolog.*, the first edition of which appeared at Leipzig in 1822, an enlarged edition in 2 vols. in 1829, a third enlarged and corrected, 1 vol. 4to, 1843. An abridged edition was issued by the author in 1831. This, in the edition of 1843, is as yet the best lexicon to the N. T. we possess.—W. L. A.

## WALL. [MOURNING.]

WALL, WILLIAM, a dissenting minister for in Homerton college, born at Bath 9th May 1773, died at Uxbridge 22d Jan. 1850. He published *The Book of Psalms, a new translation with notes explanatory and critical*, Lond. 1846. *Cura Romane: Notes on the Epistle to the Romans, with a revised translation*, Lond. 1846. These are the works of an accomplished scholar and judicious critic.—W. L. A.

WALL, WILLIAM, D.D., vicar of Shoreham in Sussex, born 1645 or 1646, died 1727-28. His

most important work is his *History of Infant Baptism*, first published in 1705, 2 vols. 8vo; in 1720 appeared the third edition, accompanied by an additional volume containing *A Defence of the History against the Reflections of Mr. Gale and others*. Besides this, Wall wrote *Critical Notes on the O. T.*, 2 vols. 8vo, 1734; *Brief Critical Notes especially on var. readings of the N. T.*, 1730. Orme says these are ‘valuable works which explain many difficult passages’ (*Bibl. Bib.*).—W. L. A.

## WALLS. [FORTIFICATIONS; TOWNS.]

WALTON, BRIAN, D.D., was born in 1600 at Seamer, in the district of Cleaveland in Yorkshire; in 1616 he was admitted a sizar of Magdalen College, Cambridge, whence he removed to Peterhouse in 1618, and took his degree of M.A. in 1623. He left college for a curacy and mastership of a school in Suffolk; but was soon after removed to London, where he was first assistant in the Church of All-Hallows, Broad Street, and afterwards, in 1626, rector of St. Martins Orgar, with which he conjoined the rectory of Sandon in Essex. In 1639 he commenced D.D. at Cambridge. Soon after this he was involved in the troubles which arose from the contest of king and parliament, was deprived of his preferment, and was obliged to take refuge in Oxford. Here he formed the plan of his great work, *The London Polyglott*, and here probably he made some preparations for it. It was not, however, till he returned to London that any active steps were taken towards carrying his design into effect. A prospectus of the work was issued in 1652; the assistance of the most eminent Oriental and Biblical scholars of the day was engaged; and in the fall of 1653 the printing was begun. The first volume appeared in September 1654, and the whole work was completed before the end of 1657. Of the merits of this invaluable work it is needless here to speak [POLYGLOTT]. It remains an imperishable memorial of the learning, assiduity, and ability of the editor and his coadjutors. After the Restoration, Walton was, in 1660, made bishop of Chester, an office which he filled only for a few months, his death occurring 29th November 1661. Besides the valuable *Prolegomena* to his great work, Walton wrote *Introductio ad lectionem Linguar. Oriental.* 1654-55, part of which was republished under the title of *Dissertatio de ling. Orient.*, Daventriae 1658. He replied also to some strictures of Dr. Owen on the Polyglott in his *Considerator Considered*, etc., 1669, 1821.—W. L. A.

WANDERING, WILDERNESS OF. The object of this article is to trace the footsteps of the Israelites from Egypt to Palestine, to describe the physical geography and topography of the ‘Wilderness’ through which they passed, and to throw light, as far as it may be possible from the results of modern research, upon their mode of travel, their various routes, and the supplies of water and pasture afforded by the country for their flocks and herds.

From the time the people left Egypt until they crossed the Jordan into Palestine, forty years elapsed (Deut. i. 3; viii. 2; Josh. v. 6). During that long period they were wandering in the wilderness. They did not proceed in a direct course from Egypt to Canaan. Had they done so they might have performed the journey in ten or twelve

days, for the distance is not more than 150 miles. 'But God led them not through the way of the land of the Philistines, although that was near; for God said, Lest peradventure the people repent when they see war, and they return to Egypt; *but God led the people about through the way of the wilderness of the Red Sea*' (Exod. xiii. 17, 18). Even in this way they did not advance along one direct line of route. They were led from place to place, back and forward, by a divine guide. For thirty-eight years they were literally 'wanderers,' moving apparently from pasture to pasture, and from fountain to fountain, like one of the great nomad tribes of Arabia. The full history of these 'wanderings' is not given in the Bible. All the places through which they passed, or in which they lingered, are not mentioned. Even the few stations whose names are recorded cannot all be identified. It is consequently impossible to trace the footsteps of the Israelites in every part of their wilderness-journey. There are, however, several leading places on the route which have been unquestionably identified; and taking these as landmarks, it is not difficult to determine the general line along which they marched. These places are the following:—1. Goshen, from which the people set out. 2. That point on the western gulf of the Red Sea, near Suez, where a way was opened up for them through the waters. 3. Mount Sinai, where the law was given, and the camp was fixed for nearly a year. 4. Kadesh-Barnea, where an unsuccessful attempt was made to enter Canaan. 5. The plains of Moab, on the east side of the Jordan, to which they passed from Kadesh round the southern and eastern borders of Edom.

In order that the reader may fully understand the details of the route now about to be sketched, he is recommended to read with care the articles GOSHEN, EXODUS, SINAI, and KADESH. The present article is to some extent supplementary to these; and the conclusions arrived at rest, in part, on arguments therein developed.

I. GENERAL GEOGRAPHY OF THE WILDERNESS.—It will be seen from the foregoing remarks, that the country embraced in the 'Wilderness of Wandering' extended from the borders of Egypt and the Mediterranean on the west, to the plateau of Arabia on the east. How much of the latter it included cannot be determined, because the eastern boundary of Edom is indefinite; and even were it minutely defined, it would be impossible to ascertain how close to or how far from it the Israelites travelled. There can be little doubt that their march was never conducted, like that of a modern army, in one dense column. It bore a far closer resemblance to the migration of an Arab tribe, whose flocks, herds, shepherds, and guards, with their families, spread over the country for many miles. The writer has more than once passed through a moving tribe whose outer extremities were twenty miles apart. The southern limits of the wilderness were marked by the Red Sea and its gulfs; and the northern by Canaan, Moab, and Bashan.

This vast region is divided by the Gulf of Akabah, and the deep valley of the Arabah, into two great sections. The western section is triangular in form, the base being marked by the Mediterranean coast and the hills of Judah, and the apex by Ras Mohammed on the extreme south. The physical geography of this region is very

remarkable, and, as it formed the chief scene of the wanderings of the Israelites, it must be described with some minuteness.

From the shore of the Mediterranean a great plain extends inland. At first it is very low, and studded with mounds and ridges of drifting sand. It rises gradually, and the sand gives place to a white, flinty soil, which scantily covers the limestone strata. As the elevation increases, long reaches of rolling table-land, and broad ridges with naked crowns and long gravelly slopes, stretch away far as the eye can see, while shallow naked wadys, and bleak rocky glens, seam its surface and wind away waterless to the sea. Towards the east the table-land becomes still more uneven. The ridges rise higher and are more rugged, and the valleys are deeper and wilder. Here, however, are some smooth expanses of upland plain, and broad beds of wadys, coated with a light but rich soil. Springs and wells also become more frequent, and occasionally a streamlet may be traced for a mile or two along its tamarisk-fringed bed. At length the plateau, having attained an altitude of about 2000 feet, breaks down abruptly, in a series of irregular terraces, or wall-like cliffs, to the great valley of Arabah.

Such are the general features of the *Desert of Et-Tih*. Its name is remarkable. *Et-Tih* signifies 'The Wandering,' and is doubtless derived from the wanderings of the Israelites, the tradition of which has been handed down through a period of three thousand years. It was at the eastern border of the plateau, in the valley of Arabah, that the camp was pitched so long around the sacred fountain of Kadesh; and it was up the wild passes that lead from the Arabah to the table-land, that an infatuated and rebellious people attempted to force their way, against the divine command, into Canaan, when they were driven back with disgrace by the hardy Amalekites (Num. xiv. 40-45).

On the north the plateau of Et-Tih rises gradually to meet the swelling hills and green vales of Palestine. On the south it also rises in long, bare, gravelly slopes to Jebel et-Tih, which sweeps round like the arc of a bow, and regular as a colossal wall, from Suez to the head of the gulf of Akabah.

Et-Tih is called a 'desert;' but if by desert is meant a region of shifting sand, or of barren, gravelly, or rocky plain, it is not a desert. The Hebrew word *Midbar* (מִדְבָּר; DESERT), which is generally applied to it in the O. T., describes its physical character perfectly. It is a pastoral country; unfitted as a whole for cultivation, because of its scanty soil and scarcity of water. During the rainy season, however, it is clothed with a sparse vegetation, on which goats, sheep, and camels feed and fatten. Large sections of it were at one time under cultivation. Some of the valleys have a rich soil, which even to this day amply repays the labours of rude Arab husbandry. The remains of large towns and villages are also studded over it, strewn around fountains and ancient wells. In the torrent beds, cut deeply through the gravelly soil and calcareous rock, and in the blasted trunks of old trees which here and there linger in the valleys and on the hill-sides, we see evidences of a bygone age when rain was more abundant, and when forests covered in part at least the surface of the desert of Et-Tih. Though the hand of the improvident Bedawy has been employed for long ages in the work of destruction; though trees have

been cut down, buildings ruined, fields neglected, wells suffered to become choked up with rubbish, the traces of ancient industry and of a comparatively numerous population have not been wholly destroyed. Field enclosures are seen in many places; extensive thickets of tamarisks are found extending for miles along the moist bed of some of the deeper valleys (Stewart, *The Tent and the Khan*, pp. 185, 190). Of the district of Eboda, in the centre of Et-Tih, Mr. Drew says: 'Soon after starting this morning (from Wady Jaifeh) we came upon patches of ground under cultivation, and growing barley and oats. Further on we found extensive traces of field enclosures. At 11.30 we reached Berein ('the two wells'), and rested under the shade of the first group of trees we had seen since leaving the garden at Sinai. The whole country around Eboda was evidently under cultivation. Wide grassy swards, and ploughed fields, just before we reached this Wady Abeyad, where we are now encamped, show that this region was included in the south country' (*Scripture Lands*, p. 4). In another place he thus writes:—'As for the soil, the thin and scanty verdure, barely covering the limestone which spreads almost everywhere beneath the desert surface, sufficiently explains its nature. Here and there patches of deeper earth, and richer swards, with clumps of trees, vary these pastures of the wilderness; as again they are broken by wide areas, thickly covered with shrubs of considerable height and size. These features mark not only a sinking of the rock surface, but the abundant presence of water, which is seldom lacking in any part of this region' (*Id.* p. 7). Farther south along the upper parts of Wady el-Arish, the tamarisk, juniper (or *retm*), and other dwarf trees and shrubs, abound (Bonar, *Desert of Sinai*, pp. 268, 281). Away at the south-eastern extremity is a high plateau, the bleakest and barest in Et-Tih; and yet in the wadys which intersect it Dr. Robinson found herbs and Seyâl trees. As he advanced to the interior he says: 'The smaller wadys were now full of herbs, and gave to the plain the appearance of a tolerable vegetation' (*B. R.* i. 177). Many other places are described by him as clothed with vegetation, and capable of tillage; and he states that traces of running water were seen in some of the wadys (pp. 188, 189). Of Wady el-Ain he writes:—'We reached the deep gully which forms its watercourse, and found it bordered with grass, daisies, and other small flowers, most refreshing to the eye. Indeed, we had found to-day more vegetation in the desert than before in all the way from Egypt. . . . After crossing the watercourse we came upon a broad tract of tolerably fertile soil, capable of tillage, and apparently once tilled. Across the whole tract the remains of long ranges of low stone walls were visible, which probably once served as the divisions of cultivated fields' (p. 190).

It will thus be seen that while compared with any western land Et-Tih may be called a desert, yet it is not so in reality. No part of it is ever wholly destitute of vegetation; and it contains, notwithstanding long centuries of neglect and desolation, many tracts of fertile soil, and rich pasture, and thickets of tamarisk, juniper, and other dwarf trees and shrubs. In fact it is manifest that even at the present time the desert of Et-Tih is capable of supporting immense flocks and herds, and a considerable population. There can be no doubt that

in former ages the rainfall was greater, and vegetation and water consequently more abundant. These facts have a most important bearing on the wanderings of the Israelites. They prove that there was sufficient food for their flocks and herds in the desert independent altogether of any miraculous agency.

The south-eastern section of Et-Tih is called in Scripture 'the Wilderness of Paran' [PARAN], and the north-eastern 'the Wilderness of Zin' (Num. xiii. 21; Gen. xiv. 6, cf.).

South of Et-Tih lies the *peninsula of Sinai*, shut in, as it were, from all the world by the colossal wall of Jebel et-Tih, and the gulfs of Suez and Akabah. It is composed of a nucleus of lofty granite mountains, which rise abruptly from the bosom of the latter gulf on the east, but have a narrow border of gravelly plain along the gulf of Suez, and a wider border of sandy plateau, and broken sandstone ridges, on the north. In the very centre of this magnificent stronghold of nature stands Sinai, 'the mountain of the Lord,' with the little upland plain of Râhah spread out at its base, as if designed by Jehovah to be the scene of the proclamation of his law to his assembled people. The physical structure of this mountain-group has already been described [SINAI]; but here it may be well to give a few of its leading features, as it forms the central point of Israel's wanderings, and is in some respects the most interesting and remarkable spot on earth. The highest peaks of the peninsula—Um Shamar, Jebel Fera, and Jebel Katerîn—are grouped within a few miles of Sinai, and vary from 6000 to 9300 feet in height; while the serrated summit of Serbâl stands cut on the western confines of the sacred territory.

The nakedness and desolation of these mountains form one of their most striking characteristics. Their sharp jagged tops, their rugged sides, the wild clefts and glens which rend and separate them, are all bare granite. The scarcity of water and the burning sun of a long summer, combined with the nature of the rock and the extraordinary dryness of the atmosphere, account for the absence of vegetation. This again causes a great scarcity of animal life. Beasts and birds are almost as rare as human inhabitants. A silence as of death reigns throughout the entire peninsula. The slightest sound—the call of the shepherd, or the shout of the camel-driver—is heard to a great distance. The report of a gun, or the fall of a fragment of rock from the mountain-side, reverberates from cliff to cliff, and from valley to valley, like a thunder-peal.

Yet though so naked, stern, and desolate, the mountains of Sinai are beautiful. The gorgeous colouring of the granite rock makes up for the absence of foliage and vegetation. 'The rocks,' says Miss Martineau, 'were the most diversified I ever saw. I noted them on the spot as being black, green, crimson, lilac, maroon, yellow, golden, and white; and their form was that of a whole host of cones.' Again she writes: 'The red granite mountains we were now in the midst of are massive and awful beyond any other mountains I ever saw. The sunset lights, and the morrow's dawn, dressed them in splendour, but scarcely relieved their gloom' (*Eastern Life*, 346, 347). Sinai has been compared to 'the Alps stripped naked.' In one respect the comparison tends to convey an entirely wrong impression of the scenery. True, the dark forests, the unrivalled verdure, the leap-

ing cascades, and the glittering crowns of snow, are all wanting here; but the want is not felt as it would be in the Alps, where the granite peaks are of one uniform gray hue. In Sinai the bright, soft, varied colours, sometimes far surpass, in grandeur and beauty, even the gay clothing of the Swiss mountains.

It was here, amid nature's grandest and wildest architecture, wrapped in nature's profoundest silence and solitude, far removed from the din and distraction of the world of life and action, that the people of Israel met with their God, and witnessed manifestations of his glory, and majesty, and power, such as mortals never witnessed before and never can witness again. There, as Stanley says, 'they were brought into contact with a desolation which was forcibly contrasted with the green valley of the Nile. They were inclosed within a sanctuary of temples and pyramids not made with hands,—the more awful from its total dissimilarity to anything which they or their fathers could have remembered in Egypt or Palestine. They were wrapt in a silence which gave full effect to the morning and the evening shout with which the encampment rose and pitched, and still more to the 'thunders, and the voice exceeding loud' on the top of Horeb' (*S. and P.* p. 20). The appropriateness of these natural features to the scenes recorded in the sacred narrative cannot safely be overlooked by the modern critic and commentator. They tend to demonstrate the perfect consistency of Bible history in its minutest details.

Another characteristic of the peninsula of Sinai may be stated. Though bare and desolate it is not absolutely barren. At certain seasons of the year a thin vegetation covers every valley. There are also some spots rich in grass and foliage, where groves of dwarf palm spread their feathery branches over fountain and streamlet, where the willow droops over murmuring waters, and where shrubberies of tamarisk and acacia extend along the glen sides. A close inspection likewise discovers, that in the wildest ravines, and on the shelves of cliff and mountain side, are tufts of herbage and succulent shrubs, on which goats and sheep find ample food. Streams are few, but fountains are numerous, and wells still more so. The greatest number of 'living waters' is grouped round Sinai, high up in the adjacent clefts and glens; and this circumstance makes that region the favourite resort of the native Arab tribes. In was in that same region the Israelitish camp remained for a whole year. Still the question may be, and has been asked, How could that vast body of people, with their flocks and herds, have found the means of life amid these desolate mountains? The question can be answered. For the people themselves there was the daily supply of manna; and when water failed from natural sources, the smitten rock yielded sufficient to satisfy the wants of all. As to the flocks and herds, they were never congregated together. Scattered over the whole peninsula, among its glens and upland plains, and away out it may be over the steppes of Et-Tih, they had always enough of pasture. In the peninsula of Sinai, as on the northern plateau, there are numerous evidences that in ancient times the mountains were in part covered with forests, that the rain-fall was greater, and that consequently vegetation of all kinds was much more abundant than at present (See Burckhardt, *Travels*, p. 538; Wellsted, ii.

15; Stanley, p. 26). The acacia and tamarisk still grow in retired nooks to a considerable size. But every year is diminishing the number of the trees, and thus rendering the country more and more desolate. The Arabs cut them down for firewood; the Egyptians burn them for charcoal; and no effort is ever made to secure a young growth.

The *Arabah* is a deep wide valley, running in a straight line from the Gulf of Akabah to the Dead Sea. From the latter it rises in a series of terraces, supported by wall-like cliffs, until it attains an elevation of three or four hundred feet above the level of the ocean; then it declines gently to the shore of the Gulf of Akabah. The greater portion of it is a bare and barren desert, covered in part with a light flinty soil, and in part with loose sand. Low shrubberies of tamarisk appear here and there, and clumps of camel-thorn are met with, but these are its only products. Fountains are almost unknown in it. That of Kadesh is the only one of any note. Along its western side runs a range of bare, rugged limestone hills, from two to three thousand feet in height. The range is deeply furrowed by long dry ravines, like rents in the rocky strata; and these form the only approaches to the plateau of Et-Tih. Most of them are impassable to human feet; and as they cut far into the table-land, they effectually bar all passage along its eastern border. The Israelites therefore, in their approach to Kadesh from Sinai, must have travelled along the Arabah.

On the east side of the valley is a mountain-range of a different character. Its southern section is granite, showing the sharp peaks and deep colours of the Sinaitic group. The granite then gives place to sandstone, whose hues are still more gorgeous. This range formed the country of the Edomites, and has been already described. [IDUMÆA.]

Into the territory of Edom the Israelites never penetrated. They were compelled to turn back from Mount Hor, march down the Arabah, and pass round the southern and eastern sides of Edom. The *desert of Arabia* thus formed the scene of their last wanderings. It is a vast table-land, extending from the mountain-range of Edom eastward to the horizon, without tree or shrub, stream or fountain. The surface is either bare rock, or white gravel mixed with flints, or drifting sand. The very Bedawîn dread the passage of this 'great and terrible wilderness.' For days together the daring traveller who ventures to cross it must hasten onward, and should the supply of water which he is obliged to carry with him fail, all hope is gone. Wallin, one of the very few who traversed it, says: 'It is a tract the most desolate and sterile I ever saw. Its irregular surface is, instead of vegetation, covered with small stones, which, shining sometimes in a dark swarthy, sometimes in a bright white colour, reflect the rays of the sun in a manner most injurious to the eyes' (*Journal R. G. S.* xxiv. 135). Mr. Palgrave, who crossed it more recently, almost in the track of Wallin, also gives a frightful account of it (*Travels in Arabia*, i. p. 8, seq.). It is far more desolate, and dreary, and terrible, than any part of the region west of the Arabah.

Such then are the general features and resources of that country through which the Israelites passed from Egypt to Canaan. It will be seen that the several stages of their journey, in so far as they are indicated by the sacred historian, and can now be

identified, and the incidents narrated, correspond most accurately with the character of the country. The scene and the record are in perfect harmony. The difficulties and doubts conjured up by some recent writers disappear entirely before a thoughtful study of the sacred narrative and a minute examination of the wilderness.

It may be well to notice here a very singular theory regarding the Wilderness of Wandering, originally propounded by Dr. Beke in his *Origines Biblicæ*, and very recently revised and expanded by a writer in Fullarton's *Cyclopædia of Biblical Geography* [EXODE]. The theory is so strange, so totally opposed to established views of geographers ancient and modern, and so inconsistent, it may be added, with the whole tenor of the Biblical narrative, that it does not require refutation. Its leading points are as follows:—1. The country of *Mitzraim* is not the modern Egypt. 'Mitzraim proper,' says Dr. Beke, 'may be correctly defined to be the portion of Arabia Petrea which lies between the two heads of the Arabian Gulf (the Red Sea of geographers), and which extends northward from thence to the Mediterranean and the confines of Palestine' (*Origines Bib.* p. 291). 2. The Red Sea which the Israelites crossed, and in which the Egyptians were destroyed, was the gulf of Akabah (*Id.* p. 180). 3. Sinai, 'the Mount of the Law,' was situated on the east side of the Arabah, and probably beside the city of Petra (*Id.* 194). 4. 'The Wilderness of Wandering' was the great desert of Arabia east of Edom.

This remarkable theory its authors endeavour to support by theories as remarkable as itself. Not only are the whole results of geographical research summarily set aside, but the whole physical conformation of northern Africa and western Asia is arbitrarily changed. It is affirmed that Lower Egypt, including the whole Delta of the Nile, was at the time of the Exodus beneath the waves of the Mediterranean. It is affirmed that the Nile emptied itself to the eastward of the meridian of Suez. It is affirmed that great rivers flowed through the desert Et-Tih, and that the peninsula of Sinai was like a well-watered garden. It is affirmed that a line of great lakes or seas ran across the whole Arabian peninsula, connecting the Red Sea (that is, the Gulf of Akabah) with the Persian Gulf. [See generally EXODE, as above, and *Origines Bib.*]

These startling affirmations are not merely set forth as possibilities, or probabilities; but, to use the oft-repeated language of the authors, 'they are established beyond the possibility of doubt.' Most geographers, however, will take the liberty of doubting them. In fact few will, or can, receive them who, free from prejudice, carefully study the descriptions given in the closing chapters of Genesis and beginning of Exodus, of the character of the soil of Mitzraim, of its river, of its wheat, barley, and flax crops, of its brick-making and brick-built cities, of its fish and vegetables, and of its horsemen and chariots. Could such descriptions by any possibility apply to the rugged mountains and dreary plains of the peninsula of Sinai, and the desert of Et-Tih? The traveller who has passed through these regions will doubtless smile at the question.

THE JOURNEY OF THE ISRAELITES may, for convenience of reference, be divided into four stages.

1. *Rameses to the Red Sea.*—This stage has already been described in the article EXODUS. A

few of the leading points, however, must here be stated. Rameses is mentioned as the place from which the Israelites set out: 'And they departed from Rameses in the first month, on the fifteenth day of the first month; on the morrow after the passover the children of Israel went out with an high hand in the sight of all the Egyptians . . . And the children of Israel removed from Rameses and pitched in Succoth' (Num. xxxiii. 3, 5). It must not be supposed, however, that the whole body of the Israelites, men, women, and children, with their flocks, herds, and movables, had been gathered to that one spot, and there arranged in compact order. The people had been long preparing for the journey. A system of communication was established by which Moses could convey his orders with great rapidity to every part of the country in which they resided. The flocks and herds were doubtless away on the open plain towards the eastern frontier of Goshen. Most of the people being shepherds, were necessarily seminomads, and had their wives and children with their flocks. Moses and the leading men of the nation, with most of those probably who had been engaged in labour by Egyptian taskmasters, had assembled at Rameses; and they marched out in order. It must strike the thoughtful reader as most remarkable that *all* the people were able to set out on such a journey on short notice. Sceptics and infidels have objected to the historic truth of the narrative on this ground. Bishop Colenso puts the objection in its most plausible form. The people, he says, amounted to two millions. These were required to start at a moment's notice. The order was conveyed to them all; the passover was observed; property to an immense amount was borrowed; the flocks and herds were collected; the sick and infirm, women in child-birth and young infants, brought in from a wide extent of country, and congregated at Rameses. He concludes—'I do not hesitate to declare this statement to be utterly incredible and impossible' (*Pent.* Pt. i. pp. 61-65). It would be incredible were the facts as the bishop represents them. But they are not so. It would seem from a careful study of the whole narrative, that the flocks, herds, and 'mixed multitude,' did not follow the same line of route as the chief men. They are not mentioned at the passage of the Dead Sea, nor at Marah, nor at Elim. They appear to have taken a more northerly course, passing round the head of the gulf and through the best pastures. This is the plan always adopted by Bedawin on the march. The chiefs and main body of men keep together, while the flocks and their attendants roam far and wide. Yet when an Arab writer gives an account of the migrations of his tribe, he confines the narrative wholly to the central group.

It will be observed also that Colenso utterly ignores any divine element in the Exodus. He judges of it as a simple case of migration, in direct opposition to what is affirmed by the sacred historian repeatedly and emphatically. The power of the Lord was directly exercised in every stage of the Exodus (Exod. xii. 23, 36, 42, 51; xiii. 14-18, *seq.*) We know not how far the direct exercise of divine power extended—how it strengthened the weak, healed the sick, or directed the movements of the whole multitude. We do know, however, that it was exercised. Without it the Exodus would have been impossible.

The stations and encampments mentioned in the sacred record were those of the marshalled men under the command of Moses. The number of this marshalled body cannot be ascertained. If we take modern Arab tribes as a guide, it probably did not amount to more than one-tenth of the whole.

The site of Rameses is disputed. If, as seems most probable, it lay between the bitter lakes, on the eastern border of the Delta [RAMESSES], then the line of march must have been south-east, parallel to the ancient canal (Robinson, *B. R.* i. 54). The distance to the head of the gulf would thus be about thirty-five miles. If, however, Rameses lay near Cairo, the natural route for the people would be along the line of the railway to Suez (Beaumont, *Cairo to Sinai*, pp. 16-21). The former theory accords best with the sacred narrative. It must not be forgotten that the Israelites from first to last were under divine guidance. At first they appear to have marched 'by the way of the wilderness' to the head of the gulf; but on reaching Etham, 'in the edge of the wilderness' (Exod. xiii. 20; Num. xxxiii. 6), they turned aside. There the presence of the Lord as their leader, in 'a pillar of cloud,' is first mentioned, and there 'the Lord spake unto Moses, saying, Speak unto the children of Israel, that *they turn* (literally 'return,' וישבו, ἀποστρέψαντες) and encamp before Pi-hahiroth, between Migdol and the sea, over against Baal-Zephon' (Exod. xiv. 2). In the parallel passage in Numbers (xxxiii. 7) it is said, 'They removed from Etham, and *turned again* unto Pi-hahiroth.' There was here a complete change in their route by divine command, for the purpose of entrapping the Egyptians, who, it seems, were watching their movements. At first they directed their course to the head of the gulf, as if about to pass by it into the wilderness; but at Etham they turned sharply to the right down the western shore. Pharaoh now thought they were completely in his power, and so, humanly speaking, they were; but God opened a passage for them through the sea.

The point at which they passed through the sea must be determined from the details of the Biblical narrative in connection with the physical features of the coast. The depth of the channel cannot be allowed to influence our decision; nor can the tidal rise or fall, nor any supposed effect of an ordinary storm. The passage was opened by a miracle—that is, by a direct exercise of divine power temporarily overcoming the laws of gravitation and raising up the waters on each side. The mode in which the divine power operated is stated: 'The

Lord caused the sea to go' (ויולך) by a *strong east wind* (or perhaps 'a strong vehement wind,' ברוח

קרים עזה, cf. Ps. xlviii. 8; Ezek. xxvii. 26; Job xxvii. 21) all that night, and made the sea dry, and the waters were divided, and the children of Israel went *through the sea* upon dry ground, and the waters were a *wall* (חומה) to them on the right hand and on the left' (Exod. xiv. 21, 22). With equal definiteness it is described in the song of Moses: 'With the blast of thy nostrils the waters were gathered together, the floods stood upright as an heap, and the depths were congealed in the heart of the sea' (Ex. 8).

The action of the wind cannot be fully explained. It appears to have swept *across* the gulf in a narrow track, with such tremendous violence as to cut a

way through, forcing the water back on each side. No natural tempest could have done this. It was a mighty agent in God's hand, acting as he willed, not merely clearing a passage, but keeping up 'the wall' of waters on each side during the entire night. This miraculous element must be fully admitted, or else the narrative must be rejected altogether as a fable.

The place of passage is minutely described.

They had encamped '*in front of*' (לפני) Pi-hahiroth, between Migdol and the sea, in front of (לפני) Baal-Zephon.' These places, however, are now unknown. It is even uncertain whether the names are Egyptian or Hebrew, so that no argument can be based on their signification. One thing is clear; the position of the Israelites was such as to cause their enemies to say, 'They are entangled in the land, the wilderness hath shut them in' (Exod. xiv. 3). This appears to signify that, besides having the sea in front, they were so hemmed in by mountain and desert as to make escape impossible.

The head of the gulf is a channel less than a mile wide and about four miles long, running from north to south. At its southern end, on a low promontory, stands the town of Suez. South of the town the shore trends westward, and sweeping round, forms a spacious bay, bounded on the south by the low rocky promontory of Atâkah. The bay has a broad margin well adapted for a camp. It is shut in on the west by the lofty precipitous ridge of Jebel Atâkah; while on the south, beyond the promontory, is a barren desert. This bay appears to correspond in all respects to the station of the Israelites 'between Migdol (perhaps Jebel Atâkah) and the sea.' Pharaoh, following them from the north, would see the impassable heights of Atâkah on the one side, and the wilderness beyond, and might, therefore, well say, 'They are entangled in the land, the wilderness hath shut them in.'

From the low promontory of Atâkah to the opposite shore of the gulf is just seven miles. This distance could easily be traversed by the Israelites in a night; and it would leave sufficient room for the opening of the miraculous passage, and the subsequent overthrow of the horses and chariots of Pharaoh, when the waters returned in their strength. At this spot, therefore, we feel inclined to fix the passage.\*

2. *The Red Sea to Sinai.*—On reaching the Asiatic shore Moses and Miriam sang their songs of triumph. The people, turning their eyes to the sea, 'saw the Egyptians dead upon the shore'; and doubtless, according to Eastern custom, they took their spoils. They would obtain in this way a large supply of arms and armour.

Their first experience of Asia was a painful one:—'They went three days in the wilderness, and found no water' (Exod. xv. 22). It was the wilderness of Shur, which appears to have embraced the whole region from the shores of the Gulf of Suez, and the frontier of Egypt to the borders of Canaan (Gen. xvi. 7; xxv. 18). The name *Shur* ('wall') may have been derived from the wall-like

\* For the full discussion of this question the reader may consult Robinson, *B. R.* i. 56-59; Wilson, *Lands of the Bible*, i. 135-159; Olin, *Travels*, i. 344-350; Stewart, *Tent and Khan*, 42-59; Sandie, *Horeb and Jerusalem*, 77-97; and article EXODUS.

ridge of Jebel et-Tîh. This same region was also called 'the Wilderness of Etham' (Exod. xv. 22; Num. xxxiii. 8); a fact which strengthens the view advocated above as to the position of Etham.

It may be objected to the foregoing view of the place of passage that 'the Fountains of Moses' (*Ayûn Mûsa*) are within two miles of the shore where the Israelites must have landed. The objection has no weight. The fountains are very small, and could not have supplied the wants of such a multitude. Besides, they may not have been seen, for the people seem to have turned immediately toward Sinai. It is worthy of note that the mountain-chain which bounds the plain in front of where the people crossed is called *Jebel Râhah*, 'the mountain of rest'; while that on the African side behind is called *Jebel Atâkah*, 'the mount of deliverance.' Can these names have arisen from the passage of the Israelites?

The plain between Jebel Râhah and the gulf is bare and waterless. The surface is undulating, and intersected by shallow wadys. The greater part has a barren flinty soil; but near the shore are mounds and ridges of drift sand. After three days' travel through this thirsty land, they came to the fountain of Marah, but its waters were 'bitter,' as the name implies. Just eighteen hours' march, or about thirty-eight English miles, from Ayûn Mûsa is the fountain of Hawârah ('destruction'). Its water is salt and 'bitter;' and there can be little doubt that this is that very Marah where the people murmured, saying, 'What shall we drink?' and where Moses was ordered to sweeten the waters by throwing a desert shrub into them (xv. 23-26).\*

Elim, the next station, was a desert paradise, with its numerous fountains (not 'wells' but 'living springs,' עֵינֹת, Exod. xv. 27) and palm groves. Five miles from Hawârah is a broad deep valley called Ghurundel, fringed with bushy palm trees, and thickets of tamarisk and acacia. It contains several copious fountains, which supply a perennial stream, one of the very few in the peninsula of Sinai. This is surely Elim.

At Ghurundel the plain ends and the mountains begin. The peaks are still distant, but their rugged roots from the right and left interlap, leaving between them wild ravines. On the right rises Jebel Hammâm, dark and desolate, deriving its name from a warm spring, or natural 'bath' at its base. Six miles from Ghurundel is Wady Useit, which some suppose to be Elim; but, though it has fountains and palm groves, it is not so well suited for a large encampment as its rival. Below the fountain it contracts into a wild ravine, 'serpentine between two towering walls of limestone, many hundred feet high, of the most dazzling whiteness, which occasionally meeting beneath, scarcely admitted a difficult passage through its terrific jaws' (Bartlett, *Forty Days in the Desert*, p. 36).

The ridge of Râhah now shuts in the path on the left, while the precipitous sides of Hammâm bar all progress along the shore. Between them lies the only path to Sinai. On advancing four hours' march from Useit, there is an open area where two glens unite and form Wady Taiyibeh,

which bends sharply to the south, and winds between dark lofty cliffs for five miles, and then opens upon a narrow plain, bordering on the Red Sea. The route of the Israelites cannot be mistaken here. We read, 'they removed from Elim and encamped by the Red Sea.' The plain at the mouth of Wady Taiyibeh must be the place of the encampment; and a wild lonely spot it is. Here the sublime scenery of the Sinai mountains burst at once upon the view of the Israelites. The glittering granite peaks, the gorgeous colouring of the nearer cliffs, the deep blue sea, and away far beyond it the pale outline of the African coast form a picture rarely equalled.

The 'wilderness of Sin' was the next station (Num. xxxiii. 11). The narrative in Exodus omits the encampment by the sea (xvi. 1). The omission is important. It shows that it was not the object of the sacred writer to mention all the stations, only the more remarkable. Nor does he intimate that the journeys were made on consecutive days. A whole month was spent between Rameses and Sin (cf. Num. xxxiii. 3; Exod. xvi. 1), though only eight stations are named, and only ten days' actual march recorded. Another circumstance is worthy of note: Not a word is yet spoken of the flocks and herds. They were doubtless scattered over the whole country, having been led to the best pastures, and most copious fountains. It has been argued indeed by Colenso and others, that if such had been the case they must have been constantly guarded by armed men. The answer is easy. We are told that the fear of the Israelites had gone before them, and spread over all Western Asia—fear inspired by the stupendous miracles of the plagues, and by the destruction of Pharaoh's host in the Red Sea. The divine promise is most emphatic:—'I will send my fear before thee, and will destroy all the people to whom thou shalt come; and I will make all thine enemies turn their backs unto thee' (Exod. xxiii. 27; cf. xv. 14; Num. xxii. 2-4; Deut. ii. 24, 25, etc.) Under such circumstances their flocks could feed in perfect security from the borders of Egypt to Canaan, over a region containing 15,000 square miles. It is because critics of the Colenso school will shut their eyes to the whole circumstances of the case, and deliberately ignore the divine element, that the Exodus and wilderness-journey appear to them incredible.

At the mouth of Wady Taiyibeh commences the plain which extends along the whole south-western side of the peninsula. At first narrow, and interrupted by low spurs from the mountains, it soon expands into an undulating, dreary waste, covered in part with a white gravelly soil, and in part with sand. This is 'the wilderness of Sin.'\* Its desolate and barren aspect appears to have produced a most depressing effect on the Israelites. Shut in on the one hand by the sea, on the other by wild mountains, exposed to the full blaze of a burning sun, on that bleak plain, the stock of provisions brought from Egypt now exhausted (Joseph. *Antiq.* iii. 1. 3), we can scarcely wonder that they said to Moses: 'Would to God we had died by the hand of the Lord in the land of Egypt, when we sat by the flesh-pots, when we did eat bread to the full;

\* There is another bitter fountain called Abu-Suweirah, near the shore, about 12 miles westward; and also one a few miles south of Hawârah; but Hawârah is in the direct route to Sinai.

\* For different views regarding the wilderness of Sin, see Lepsius, *Discoveries in Egypt*, p. 355; Beumont, *Cairo to Sinai*, 34; Stewart, *Tent and Khan*, 162.

for ye have brought us forth into this wilderness, to kill this whole assembly with hunger' (Exod. xvi. 3).

It was here the quails were sent in answer to the cry of the people for flesh; and it was on the surface of this desert the heaven-given *manna* first appeared, bathed in morning dew. The site of the camp is incidentally indicated by the statement that, 'as Aaron spake unto the whole congregation of the children of Israel *they looked toward the wilderness*, and, behold, the glory of the Lord ap-

peared in a cloud.' The camp must thus have been at the upper or northern end of the plain, not far distant from Wady Taiyibeh.

The route from Sin to Rephidim cannot be traced. There are no satisfactory data. In Exodus (xvii. 1) it is simply recorded that they 'journeyed from the wilderness of Sin, after their journeys, according to the commandment of the Lord, and pitched in Rephidim.' In the book of Numbers (xxxiii. 12, 13), two intermediate stations are mentioned, Dophkah and Alush, but their sites are

519. A Desert Scene.

unknown. The various opinions regarding the position of Rephidim have already been stated, and its probable site pointed out [REPHIDIM]. Taking for granted that Rephidim was in Wady esh-Sheikh, a short march from Sinai, and consequently not far distant from the tomb or sanctuary of Sheikh Saleh (*Handbook*, p. 37; Robinson, *B. R.* i. 146 and 121), the distance from Sin would be above sixty miles, through an exceedingly wild and difficult region. Several routes were open to the

people. One leads up Wady Shelal, Mokatteb (the celebrated 'written valley'), and Feirân; another passes along the coast to the entrance of Wady Feirân, and goes up that great valley; a third passes along the plain nearly to the parallel of Tûr, and then up through sublime glens direct to Sinai. The passes along the first route are in places so narrow and difficult that the people would scarcely have ventured through them unless driven by necessity. The passes on the third route are

even more difficult, and, besides, in following it the people would not have gone near the place which we have endeavoured to identify as Rephidim (see, however, Sandie, *Horeb and Jerusalem*, 156, seq.) Wady Feirân affords a tolerably easy and wide approach from the plain to the heart of the mountains. It contains, besides, that copious fountain, with its streamlet and palm grove, near the old city of Feirân, which is justly called the 'desert paradise;' and in connection with this it should not be forgotten that no complaint of want of water is recorded between Sin and Rephidim. Perhaps Feirân may be identical with Dophkah or Alush. Some locate Rephidim here; but at Rephidim 'there was no water for the people to drink,' while Feirân is the best watering-place in the peninsula.

Wady esh-Sheikh falls into Feirân, after sweeping round in a semicircle to the northward from the foot of Mount Sinai. It is the most spacious valley in the peninsula, and on the whole the most fertile. It is the natural, and for such a multitude as the Israelites, the only practicable approach to 'the Mount of God' from Egypt. It, with its continuation Feirân, forms in fact the great thoroughfare of the desert.

At Rephidim the people murmured because 'there was no water for them to drink' (Exod. xvii. 1). Then 'the Lord said unto Moses, Go on before the people, and take with thee the elders of Israel; and thy rod, wherewith thou smotest the river, take in thine hand, and go. Behold, I will stand before thee there upon the rock in Horeb; and thou shalt smite the rock, and there shall come water out of it, that the people may drink. And Moses did so in the sight of the elders of Israel' (verses 5, 6). Horeb must have been at some little distance from the site of the camp at Rephidim, and yet not so far as to prevent the people going there for a supply of water.

The attack of the Amalekites appears to have followed immediately the miracle of the smitten rock; and as it was begun by an assault upon the rear of the Israelites—upon 'all that were feeble behind thee, when thou wast faint and weary' (Deut. xxv. 18)—it would seem probable it took place when the able-bodied men were gone forward with Moses and the elders to procure water. This throws new light upon the incident. On the following day the Israelitish warriors were marshalled under Joshua (Exod. xvii. 9), and the Amalekites completely routed.

It is usual to connect the Amalekites with Feirân, and to represent the battle as a brave attempt on their part to defend the paradise of their desert home (Lepsius, p. 363; Ritter, *Pal. und Syr.* i. 717, seq.; Stanley, *S. and P.* 28; Stewart, *Tent and Khan*, 97). For this there is not a shadow of evidence. The home of the Amalekites was much farther north, and it is questionable whether they had any possessions among the mountains of Sinai. It would seem that when the main body of the Israelites were approaching Rephidim, the Amalekites feared they were about to advance northward; consequently they crossed the passes of Jebel et-Tih in force, and attacked the rear of the host as above stated. It is important to observe that the roads from the desert of Et-Tih fall into Wady esh-Sheikh just at the place where we have attempted to fix the site of Rephidim.

After leaving Rephidim the camp was pitched in

front of Mount Sinai, on the plain of *Râhah* ('rest'), on the first day of the third month, and consequently just a month and a half after their departure from Rameses (Exod. xix. 1). With his usual graphic power Dean Stanley describes this last stage of the people's progress to the 'Mount of God':—'Onwards and upwards, after their long halt, exulting in their first victory, they advanced deeper and deeper into the mountain-ranges, they knew not whither. They knew only that it was for some great end, for some mighty sacrifice, for some solemn disclosure, such as they had never before witnessed. Onwards they went, and the mountains closed around them, upwards through winding valley, and under high cliff, and over rugged pass, and through gigantic forms, on which the marks of creation even now seem fresh and powerful; and at last, through all the different valleys, the whole body of the people were assembled. On their right hand and on their left rose long successions of lofty rocks, forming a vast avenue, like the approaches which they had seen leading to the Egyptian temples between colossal figures of men and of gods. At the end of this broad avenue, rising immediately out of the level plain on which they were encamped, towered the massive cliffs of Sinai, like the huge altar of some natural temple; encircled by peaks of every shape and height, the natural pyramids of the desert. In this sanctuary, secluded from all earthly things, raised high above even the wilderness itself, arrived, as it must have seemed to them, at the very end of the world—they waited for the revelation of God. . . . The outward scene might indeed prepare them for what was to come. They stood in a vast sanctuary, not made with hands—a sanctuary where every outward shape of life, animal or vegetable, such as in Egypt had attracted their wonder and admiration, was withdrawn. Bare and unclothed, the mountains rose around them; their very shapes and colours were such as were calculated to carry their thoughts back to the days of old creation' (*Lectures on the Jewish Church*, i. 147). Alone with their God, shut in by the wildest and grandest of his works, in front of his chosen mountain-altar, they now saw his glory, and received from his lips a full revelation of his will. The whole scene and circumstances were wondrously fitted to impress them with the majesty and power of Jehovah, to free them from every taint of Egyptian idolatry, and to constrain them to yield to him implicit and everlasting obedience.

The making of the golden calf by Aaron, and the offering of strange fire by his sons, before the visible presence of Jehovah on Sinai, afford the strongest possible evidence that Israel was 'a stiff-necked and rebellious people.' It is difficult to account for such blind and reckless insatiation. After the giving of the law, and the construction of the tabernacle, the most remarkable event at Sinai was the second passover. Their cattle must now have been brought together, so as to enable them to select the paschal lambs, and also to permit the shepherds to observe the feast. It was spring time, when the fountains are amply supplied by the winter rains and snow, and when all the valleys are clothed with verdure. There could have been no difficulty either in guarding the flocks, amid these mountain fastnesses, or in supplying them with requisite food and water. The numbering of the people, and the visit of Jethro to Moses,

were the only other incidents of importance during the long encampment 'before the mount.'

3. *Sinai to Kadesh*.—'On the twentieth day of the second month, in the second year, the cloud was taken up from off the tabernacle of the testimony. And the children of Israel took their journeys out of the wilderness of Sinai' (Num. x. 11). The order of march was now arranged with great precision. The exact station of every tribe and family was minutely fixed. The tabernacle and sacred vessels were carried along by the priests in solemn procession. But we must not infer that the whole body of the people were grouped together in one dense column. The flocks and herds were still scattered over the desert; and with them, as we believe, the great bulk of the men and women.

The route followed from Sinai to Kadesh it is more difficult to define, with any approach to accuracy, than that from Egypt to Sinai. Two difficulties here meet us:—The first arises from the impossibility of identifying the stations; the second from the fact that the people were twice at Kadesh (cf. Num. xii. 16; xiii. 2, 26, 33; xx. 1). The first visit took place during the second year of the journeying, and about three months after their departure from Sinai; the second, after an interval of thirty-eight years' wandering [KADESH]. But, in the general summary of the stations in Num. xxxiii., Kadesh is mentioned only once, and that in the last year of journeyings. Now, in the extended narrative of Num. x.-xii., there are but *two* stations between Sinai and Kadesh—namely, Taberah and Hazeroth. We read that 'the people removed from Hazeroth, and pitched in the wilderness of Paran' (xii. 16); that is at Kadesh, for it is said of the spies who were sent out, that 'they went and came to Moses, and to Aaron, and to all the congregation of the children of Israel, unto the wilderness of Paran, to Kadesh' (xiii. 26). Turning, however, to Num. xxxiii. 18, we find that the people went from Hazeroth to Rithmah; and between the latter and Kadesh there are no less than *seventeen* stations enumerated. The question thence arises: Were all these visited during the first journey to Kadesh, or do any of them properly belong to the second journey? The former appears more probable. In giving the summary in Num. xxxiii., the sacred writer would scarcely have omitted the first visit to Kadesh, had he been enumerating the stations as well after as before that visit. It is much more natural to suppose, that he gives a full list of the places of encampment between Sinai and Kadesh; and then, omitting all notice of the thirty-eight years' wandering, as not properly pertaining to the journey to Canaan, he takes up the narrative again at the close of the second visit.

Adopting this view, and assuming the site of Kadesh to be, as already fixed, at Ain el-Weibeh [KADESH], we shall attempt to trace the general line of march as far as the sacred record may guide.

On the breaking up of the camp at Sinai the people journeyed for three consecutive days, and finally encamped in the wilderness of Paran (Num. x. 12), at a place afterwards called Taberah (v. 33 with xi. 3). The direction must have been north-east, for Paran was the ancient name of the south-eastern section of Et-Tih. They would thus pass down Wady esh-Sheikh for some six miles, and then strike to the right across a dreary region of

rugged hills and bleak valleys; then probably through the ridge of Fera, by the wild ravine called Wady Sal, into the high sandy plain of Debbet er-Ramleh (*Handbook*, p. 37). The whole country is dreary and desolate, which may explain the murmurs and complaints of the people. The murmurers were punished by a supernatural fire, and hence arose the name *Taberah*, 'burning.' When this was stayed by the intercession of Moses, 'the mixed multitude that was among them fell a lusting: and the children of Israel also wept again, and said, Who shall give us flesh to eat?' (xi. 4). The discontent was now widespread, and Moses feared an open rebellion. But the Lord by a miraculous wind 'brought up quails from the sea, and let them fall by the camp, as it were a day's journey on this side and as it were a day's journey on the other side' (xi. 31). It was a fatal gift, for immediately on eating a plague broke out and committed terrible ravages. This gave the place still another name, *Kibroth-hattavah*, 'the graves of lust,' 'because they buried the people that lusted' (v. 33, 34).

Hazeroth was the next station, and probably not far distant from Taberah (xi. 35; xxxiii. 17). It has, with much probability, been identified with *Ain Hudhera*, a little fountain in the desert, eighteen hours' march from Sinai (*Handbook*, p. 38; Burckhardt, *Travels*, 495). The place was noted by the foolish attempt of Aaron, at the instigation of his sister Miriam, to excite rebellion against Moses, and by the terrible punishment inflicted upon Miriam (xii. 1-15). Stanley mentions three points which appear to conform the hypothesis that the Israelite route lay through this region. First, The brook of El-Ain is emphatically 'the watering-place' of the country, and must have attracted round it any nomadic settlements, such as are implied in the name *Hazeroth*, 'enclosures.' Secondly, In their murmurs before arriving at Hazeroth, 'the sea' is twice mentioned in a manner that may indicate its proximity. Thirdly, Stanley himself saw here a flight of birds—large red-legged cranes—which literally darkened the sky. A similar flight was seen by Schubert near the same spot (*S. and P.* 82). 'The determination of this spot is perhaps of more importance than would at first sight appear; for if this position be adopted for Hazeroth it settles the question as to the whole route of the Israelites between Sinai and Kadesh. It shows that they must have followed the route upon which we now are to the sea, and so along the coast to Akabah, and thence probably through the great Wady el-Arabeh to Kadesh' (Robinson, *B. R.* i. 151). As to the general line of route there can be little doubt that Dr. Robinson is right; but it seems natural that a large body of men like the Israelites would keep more to the north than Robinson did, and pass down Wady el-Ain, and its continuation Wady Wefir, to the shore of the Gulf of Akabah. This was the route followed by Laborde (*Mt. Sinai and Petra*, 227), Bartlett (*Forty Days in the Desert*, 97), and Miss Martineau (*Eastern Life*, 383). It might be supposed, on glancing at a map, that the Israelites could have travelled north and passed up the plateau of Et-Tih, and thence descended to Kadesh. This, however, was really impracticable, for the eastern side of Et-Tih is so rugged and so deeply furrowed by ravines that they must have passed round as far as Eboda ere they could have turned down to

Kadesh, and that would have led them into the centre of the Amalekites. And besides, Ezion-gaber, which lay at the head of the Gulf of Akabah (1 Kings ix. 26), was one of the stations passed.

But this theory is by no means free from difficulties. According to Num. xxxiii. 36 the people journeyed direct from Ezion-gaber to Kadesh; and the stations of Moseroth, Bene-jaakan, Hor-hagidgad, and Jotbathah, were visited in succession before reaching Ezion-gaber (30-34). These stations are unquestionably identical with Mosera, 'Beeroth of the children of Jaakan' (or Bene-jaakan), Gudgodah, and Jotbah, where they subsequently encamped when going from *Kadesh to Ezion-gaber* (cf. Deut. x. 6, 7; ii. 8; Num. xxi. 4); and they consequently lay between these places, and apparently in the valley of the Arabah. The Israelites must, therefore, have traversed the Arabah several times. In fact the thoughtful reader will observe that it was not the design of the sacred writer to give a full, connected, and consecutive narrative of the journeyings. Leading events alone are recorded, and the places in which they occurred are mentioned. Even these are not mentioned in chronological order. In the book of Deuteronomy this is especially the case. Moses is there instructing the people before his death, and he improves his solemn exhortations by lessons drawn from the most noted events of their history. Again, it will be observed from a careful examination of the narratives that the most direct line of route to the point of ultimate destination was rarely if ever followed. The people appear to have directed their course now to the right, now to the left; they even turned back, and passed and repassed the same places, in obedience, no doubt, to their divine guide. They also spent much more time than was required for the mere purposes of travel. They lingered for days, and even weeks, in some places. They were at least seven days at Hazeroth (Num. xii. 14), and they were apparently much longer at Taberah.

It will thus be seen that it would be vain to attempt to construct an exact itinerary of this part of the desert journey, nor is this of any consequence in so far as the illustration of Scripture is concerned. Two points alone are fixed with any approach to accuracy—Hazeroth and Ezion-gaber. The latter place they must have approached from the north, and after encamping at it, turned back again northward. In going from Hazeroth they probably travelled down Wady Ain and Wetr to the shore of the gulf, then along the shore northward past Ezion-gaber, and up the Arabah. Then back down the Arabah to Ezion-gaber; and finally up it again to Kadesh. To some this may seem strange and inconsistent, but it is the theory most in accordance with the physical geography of the desert and the statements of the sacred historian.

Kadesh, whose site has already been fixed and described [KADESH], was, next to Sinai, the most important of all the resting-places of the children of Israel. Its name implies a sanctity of a far earlier origin than the Exodus; but at this time it received, as it were, a fresh baptism. During the first visit to Kadesh the twelve spies were sent to view the land of promise. Their report had a most important bearing on the future history of the nation. The faithfulness of Joshua and Caleb gained for them privileges denied to all their

brethren; and the mingled falsehood and cowardice of the remaining ten roused the people to rebellion, which resulted in the thirty-eight years' wandering. When too late, the Israelites saw their sin and folly, and attempted to force their way up the passes of Et-Tih, and to enter Canaan from the south. But God was not with them, and they were driven back with disgrace and slaughter (Num. xiii. and xiv.)

The rebellion of Korah, Dathan, and Abiram, afterwards sprang up, instigated perhaps by the feeling that Reuben's birthright and Levi's services in God's cause at Sinai had given to the prince of these tribes a title to rule above that of Moses and Aaron. The destruction of the whole rebel band was one of the most signal and terrible manifestations of divine wrath and power in Israelitish history (Num. xvi.) It was, perhaps, on this occasion, instigated by these solemn events, and in prospect of the long wanderings, and final desert tomb, that Moses wrote the ninetieth Psalm, in which, with deep sorrow and pathos, he exclaims, 'Who knoweth the power of thine anger? Even according to thy fear, so is thy wrath. So teach us to number our days, that we may apply our hearts unto wisdom.'

Of the thirty-eight years' wandering to which the Israelites were now condemned, and of that 'great and terrible wilderness' into which they were driven, not a single record has been preserved. The name *Et-Tih*, 'The wandering,' appears to be the only local memorial of it. History is absolutely silent until, after the lapse of that long period, another generation, but still under the same aged leaders, appears once more around the sacred fountain of Kadesh.

The second visit to Kadesh appears to have been prolonged like the first. It was signalled also by some solemn incidents. The first was the death of Moses's sister, thus simply recorded: 'And the people abode in Kadesh; and Miriam died there, and was buried there' (Num. xx. 1). Another murmuring of the congregation followed, because the supply of water failed. The sacred spring was unable to meet the wants of such a multitude. God again commanded Moses to smite one of the desert cliffs with his rod; 'And the water came out abundantly, and the congregation drank, and their beasts' (xx. 11). This last clause is important. It proves that the flocks and herds had survived the forty years' wandering, and had been brought together at Kadesh probably in the prospect of an immediate entrance into Canaan. The Israelites appear to have hoped that the Edomites would permit them to pass direct through their territory, and thus reach the eastern bank of the Jordan without a long and painful march through the great desert. In this they were disappointed. The messengers sent to the king of Edom made the fairest possible proposals, but were met with a direct refusal (Num. xx. 14).

4. *Kadesh to the Plains of Moab*.—Immediately afterwards the Israelites left Kadesh, crossed the Arabah in a south-eastern direction, and encamped on the very border of Edom, at the foot of the mountain-range near Mount Hor. This became the scene of one of their most painful bereavements—the death of Aaron. Both he and his brother had displeased God in some unexplained way, 'at the water of Meribah;' and because of this they were told that they should not enter the

Promised Land. Aaron's sentence was soon executed. His death, next to that of Moses, was one of the most solemn and imposing on record. He was an old man, but apparently still hale and vigorous. In company with his brother and son he went up by divine command into Mount Hor, 'in the sight of all the congregation : ' and Moses stripped Aaron of his garments, and put them upon Eleazar his son ; and Aaron died there on the top of the mount' (xx. 22-28), in the fortieth year of the wandering, on the first day of the fifth month (xxxiii. 38).

It seems strange that the Israelites, when at Kadesh the second time, did not enter Palestine from the south. The reason was probably this :— Their approach had attracted the attention of the warlike tribes that inhabited the southern mountains, who would naturally ally themselves with the Amalekites of the Negeb, and the Philistines. These tribes had perhaps assembled in force to defend the difficult passes of the Arabah. This view is strengthened by the fact that as soon as the Israelites turned back from Kadesh, they were attacked in the rear by king Arad the Canaanite, who was at first successful, but in the end completely destroyed (Num. xxi. 1-3 ; xxxiii. 40). In order to penetrate Palestine at a point thought to be impracticable, and thus to give the Israelites an easy victory, God led them to the eastern frontier, and opened up a way through the waters of the Jordan.

After thirty days' mourning for Aaron the Israelites set out once more on their long but final journey. Every stage in their course is now distinctly marked, and the general line is traced with ease. But even here the rate of travel was very slow. They must have lingered at places, or what is more probable they must have zigzagged through the eastern desert in search of water and pasturage. Passing down the great valley of Arabah once more, they turned eastward at Ezion-gaber (Num. xxi. 4 ; Deut. ii. 8), and sweeping round the southern border of Edom entered the desert of Arabia. Even their previous experience of desert life and travel did not prepare them for the privations and horrors of this 'great and terrible wilderness.' From the knowledge we now possess of that barren and waterless waste, we can understand the words of the sacred historian, and the bitter complaints of the suffering people :—' And the soul of the people was much discouraged because of the way. And the people spake against God, and against Moses, Wherefore have ye brought us up out of Egypt to die in the wilderness ? for there is no bread, neither is there any water' (Num. xxi. 4, 5). But their faithless rebellious murmurings only added to their calamities ; for fiery serpents were sent among them, and many died in agony. And here again the Lord mingled wondrous mercy with righteous judgment ; for the 'Brazen Serpent' was set up, which not only effected a bodily cure, but was made to the faithful Israelite the type of a far greater salvation (xxi. 7-9).

At length the territory of Edom was left behind, and the people encamped 'in Ije-Abarim, in the border of Moab' (xxi. 11 ; xxxiii. 44). Two more stages brought them to the banks of the Arnon, on crossing which they entered the territory of the Amorites. 'It was a marked epoch in their journeyings, when, after having crossed the watercourse or torrent, shaded or overgrown by willows (so the

word *Zeral* signifies), that formed the first boundary of the desert, they passed the stream of the Arnon, the first that they had seen since the Nile, which, flowing through its deep defile of sandstone rocks, parts the cultivated land of Moab from the wild mountains of Edom' (Stanley, *Lectures on Jewish Church*, i. 184). The 'wilderness' was now left behind for ever, but the 'wanderings' had not yet drawn to a close. Other difficulties beset Israel immediately on crossing the border of the land they were destined to inherit. Their eyes and hearts appear to have been fixed on Canaan proper—that country west of the Jordan through which the patriarchs had roamed. They wished to pass into it by the shortest and easiest road. They consequently asked of Sihon, king of the Amorites, what they had previously asked of Edom—a passage through his borders. It was sternly refused ; and Sihon, collecting his warriors, 'went out against Israel.' A new and unexpected struggle thus arose, and resulted in the acquisition of one of the richest and most beautiful regions of Western Asia. Sihon was defeated. The green plateau of Moab and wooded hills of Gilead, which had constituted his kingdom, were soon in the hands of the Israelites (xxi. 21-32). Og, the giant king of Bashan, was next conquered, and his great cities, most of which, deserted but not ruined, still stud the vast plain, were occupied. The settlement of the tribes now began, and the wandering drew to a close.

After the conquest of eastern Palestine the Israelites encamped on the splendid plain at the foot of the mountains of Moab, on the east bank of the Jordan. There were enacted the closing scenes of the great journey. They were sad and solemn. The numbers of the people, and their success, struck terror into the heart of the king of Moab, and he sent for Balaam the prophet to curse them ; but the Lord changed the intended curse into a blessing (Num. xxii.-xxiv.). The wily prophet, however, seeing he could not directly curse Israel, advised the Moabites and Midianites to put temptation in their way. The wicked stratagem succeeded (Num. xxxi. 16). Many thousand of the Israelites perished in consequence by pestilence and the sword ; but a still more terrible punishment was executed upon Midian, and Balaam himself fell in the general massacre (Num. xxv. xxxi.).

The eleventh month of the fortieth year of 'wandering' had now come. The wilderness was left behind, and the 'Land of Promise' before the eyes of the people on the other side of the Jordan. As if to complete his great mission, and to leave behind him a statistical record of its success, Moses numbered the people. They amounted to 601,730 males above the age of twenty, showing a decrease of only 1820 from the time the census had been taken in Sinai thirty-nine years before. And yet, among these there were but three men remaining who had been numbered on that occasion (Num. xxvi. 63-65).

Moses, after a solemn charge to the whole assembly, and a song of praise and triumph, bade the people a last farewell, and retired to the top of Nebo to die [MOSES]. He was the desert-leader, and with his death the desert-journey ended.

The literature of this subject is very extensive. The leading authorities alone are here mentioned. They with others are frequently quoted in the body

WAR. The Hebrew nation, so long as it continued in Egyptian bondage, might be regarded as unacquainted with military affairs, since a jealous government would scarcely permit so numerous and dense a population as the pastoral families of Israel which retained their seat in Goshen certainly were to be in possession of the means of resistance to authority; but placed as this portion of the people was, with the wanderers of the wilderness to the south, and the mountain robbers of Edom to the east, some kind of defence must have been provided to protect its cattle, and in a measure to cover Lower Egypt itself from foreign inroads. Probably the labouring population, scattered as bondsmen through the Delta, were alone destitute of weapons, while the shepherds had the same kind of defensive arms which are still in use, and allowed to all classes in Eastern countries, whatever be their condition. This mixed state of their social position appears to be countenanced by the fact that, when suddenly permitted to depart, the whole organisation required for the movement of such a multitude was clearly in force; yet not a word is said about physical means to resist the pursuing Egyptians, although at a subsequent period it does not appear that they were wanting to invade Palestine, but that special causes prevented them from being immediately resorted to. The Israelites were, therefore, partly armed; they had their bows and arrows, clubs and darts, wicker or ox-hide shields, and helmets (caps) of skins, or of woven rushes, made somewhat like our bee-hives.

These inferences are borne out by the fact that the Egyptian offensive weapons were but little better, and that the materials, being readily accessible and in constant use, could be manufactured by the cattle-herds and dwellers in tents themselves. From their familiar knowledge of the Egyptian institutions, the Israelites doubtless copied their military organisation as soon as they were free from bondage, and became inured to a warlike life during their forty years' wandering in the desert; but with this remarkable difference, that while Egypt reckoned her hundred thousands of regulars, either drawn from the provinces or nomads by a kind of conscription, such as is to be seen on the monuments, or from a military caste of hereditary soldiers, the Hebrew people, having preserved the patriarchal institution of nomades, were embodied by families and tribes, as is plainly proved by the order of march which was preserved during their pilgrimage to the Land of Promise. That order likewise reveals a military circumstance which seems to attest that the distribution of the greatest and most warlike masses was not on the left of the order of movement—that is, towards their immediate enemies—but always to the front and right, as if even then the most serious opposition might be expected from the east and north-east—possibly from a reminiscence of past invasions of the giant races, and of the first conquerors, furnished with

cavalry and chariots, having come from those directions.

At the time of the departure of Israel, horses were not yet abundant in Egypt, for the pursuing army had only 600 chariots, and the shepherd people were even prohibited from breeding or possessing them. The Hebrews were enjoined to trust, under divine protection, to the energies of infantry alone, their future country being chiefly within the basin of high mountains, and the march thither over a district of Arabia where to this day horses are not in use. We may infer that the inspired lawgiver rejected horses because they were already known to be less fit for defence at home than for distant expeditions of conquest, in which it was not intended that the chosen people should engage.

Where such exact order and instruction existed, it may not be doubted that in military affairs, upon which in the first years of emancipation so much of future power and success was to depend, measures no less appropriate were taken, and that, with the Egyptian model universally known, similar institutions, or others equally efficient, were adopted by the Israelites. Great tribal ensigns they had, and thence we may infer the existence of others for subordinate divisions. Like the Egyptians, they could move in columns and form well-ordered ranks in deep fronts of battle; and they acted upon the best suggestions of human ingenuity united with physical daring, except when expressly ordered to trust to divine interposition. The force of circumstances caused in time modifications of importance to be made, where doctrine had interfered with what was felt to hinge on political necessities; but even then they were long and urgently wanted before they took place, although the people in religion were constantly disregarding the most important points, and forsaking that God who, they all knew and believed, had taken them out of bondage to make them a great nation. Thus, although from the time the tribes of Reuben and Manasseh received their allotment east of the Jordan, the possession of horses became in some measure necessary to defend their frontier, still the people persisted for ages in abstaining from them, and even in the time of David would not use them when they were actually captured; but when the policy of Solomon had made extensive conquests the injunction was set aside, because horses became all-important; and from the captivity till after the destruction of Jerusalem, the remnant of the eastern tribes were in part warlike equestrian nomades, who struck terror into the heart of the formidable Persian cavalry, won great battles, and even captured Parthian kings. When both the kingdoms of Judah and Israel were again confined to the mountains, they reduced their cavalry to a small body; because, it may be, the nature of the soil within the basin of the Libanus was, as it still is, unfavourable to breeding horses. Another instance of unwillingness to violate ancient institutions is found in the Hebrews abstaining from active war on the Sabbath until the time of the Maccabees.

There are, however, indications in their military transactions, from the time Assyrian and Persian conquerors pressed upon the Israelite states, and still more after the captivity, which show the influence of Asiatic military ideas, according to which the masses do not act with ordered unity, but trust to the more adventurous in the van to decide the

fate of battle. Later still, under the Maccabees, the systematic discipline of Macedonian importation can be observed, even though in Asia the Greek method of training, founded on mathematical principles, had never been fully complied with, or had been modified by the existence of new circumstances and new elements of destruction; such, for example, as the use of great bodies of light cavalry, showering millions of arrows upon their enemies, and fighting elephants introduced by the Ptolemies.

But all these practices became again modified in Western Asia when Roman dominion had superseded the Greek kingdoms. Even the Jews, as is evident from Josephus, modelled their military force on the imperial plan; their infantry became armed, and was manœuvred in accordance with that system which everywhere gave victory by means of the firmness and mobility which it imparted. The masses were composed of cohorts or their equivalents, consisting of centuriae and decurie, or subdivisions into hundreds, fifties, and tens, similar to modern battalions, companies, and squads; and the commanders were of like grades and numbers. Thus the people of Israel, and the nations around them, cannot be accurately considered, in a military view, without taking into account the successive changes here noticed; for they had the same influence which military innovations had in Europe between the eras of Charlemagne and the Emperor Charles V., including the use of cannon—that invention for a long time making no greater alteration in the constitution of armies, than the perfection of war machines produced upon the military institutions of antiquity.

The army of Israel was chiefly composed of infantry, as before remarked, formed into a trained body of spearmen, and, in greater numbers, of slingers and archers, with horses and chariots in small proportion, excepting during the periods when the kingdom extended over the desert to the Red Sea. The irregulars were drawn from the families and tribes, particularly Ephraim and Benjamin, but the heavy armed derived their chief strength from Judah, and were, it appears, collected by a kind of conscription, by tribes, like the earlier Roman armies; not through the instrumentality of selected officers, but by genealogists of each tribe, under the superintendence of the princes. Of those returned on the rolls, a proportion greater or less was selected, according to the exigency of the time; and the whole male population might be called out on extraordinary occasions. When kings had rendered the system of government better organised, there was an officer denominated השוטֹר, *hash-shoter*, a sort of muster-master, who had returns of the effective force, or number of soldiers ready for service, but who was subordinate to the הכֹּפֶר, *has-sopher*, or scribe, a kind of secretary of state. These officers, or the שְׁטָרִים, *shoterim*, struck out, or excused from service:—1st, Those who had built a house without having yet inhabited it; 2d, Those who had planted an olive or vineyard, and had not tasted the fruit—which gave leave of absence for five years; 3d, Those who were betrothed, or had been married less than one year; 4th, The *saint-hearted*, which may mean the constitutionally delicate, rather than the cowardly, as that quality is seldom owned without personal inconvenience, and where it is no longer a shame the rule would destroy every levy.

The levies were drilled to march in ranks (I

Chron. xii. 38), and in column by fives (חֲמִישִׁים, *Chamushim*\*) abreast (Exod. xiii. 18); hence it may be inferred that they borrowed from the Egyptian system a decimal formation, two fifties in each division making a solid square, equal in rank and file: for twice ten in rank and five in file being told off by right-hand and left-hand files, a command to the left-hand files to face about and march six or eight paces to the rear, then to front and take one step to the right, would make the hundred a solid square, with only the additional distance between the right hand or unmoved files necessary to use the shield and spear without hindrance; while the depth being again reduced to five files, they could face to the right or left, and march firmly in column, passing every kind of ground without breaking or lengthening their order. The Pentastichous† system, or arrangement of five men in depth, was effected by the simple evolution just mentioned, to its own condensation to double number, and at the same time afforded the necessary space between the standing files of spearmen or light infantry for handling their weapons without obstacle, always a primary object in every ancient system of training. Between the fifth and sixth rank there was thus space made for the ensign-bearer, who, as he then stood precisely between the companies of fifty each, had probably some additional width to enable his ensign being stationed between the four middlemost men in the square, having five men in file and five in rank before, behind, and on each side; there he was the regulator of their order, coming to the front in advancing, and to the rear in retreating; and this may explain why στίχος, a file, and the Hebrew *degheh* and *nes*, an ensign, are in many cases regarded as synonymous. Although neither the Egyptian depth of formation, if we may judge from their pictured monuments, nor the Greek phalanx, nor the Roman legion, was constructed upon decimal principles, yet the former was no doubt so in its origin, since it was the model of the Israelites; and the tetrastichal system, which afterwards succeeded, shows that it was not the original, since even in the phalanx, where the files formed, broke, and doubled by fours, eights, sixteens, and thirty-twos, there remained names of sections which indicated the first-mentioned division: such was the pentacontarchy, denoting some arrangement of fifty, while in reality it consisted of sixty-four; and the decany and decurio, though derived from a decimal order, signified an entire file or a compact line in the phalanx, without reference to number.

With centuries thus arranged in masses, both movable and solid, a front of battle could be formed in simple decimal progression to a thousand, ten thousand, and to an army at all times formidable by its depth, and by the facility it afforded for the light troops, chariots of war, and

\* If this term could be satisfactorily shown to mean fifty, it would still contain the decimal system, and equally necessitate the above formation; but no army, except for a short manœuvre before battle, could march in column with a front of fifty, though the companies were of fifty men; they must always have been doubled for simplifying every efficient manœuvre. There was thus also an officer to command the front, and another the rear.

† Taking στίχος in its confined sense of a file or row of men arranged behind each other.

cavalry, to rally behind and to issue from thence to the front. Archers and slingers could ply their missiles from the rear, which would be more certain to reach an enemy in close conflict than was to be found the case with the Greek phalanx, because from the great depth of that body missiles from behind were liable to fall among its own front ranks. These divisions were commanded, it seems, by קַטְסִינִים, *ketsinim*, officers in charge of one thousand, who, in the first ages, may have been the heads of houses, but in the time of the kings were appointed by the crown, and had a seat in the councils of war; but the commander of the host

שַׂר עַל הַצֶּבֶא, *sar ul hat-tzaba*—such as Joab, Abner, Benaiah, etc.—was either the judge, or, under the judge or king, the supreme head of the army, and one of the highest officers in the state. He, as well as the king, had an armour-bearer, whose duty was not only to bear his shield, spear, or bow, and to carry orders, but above all, to be at the chief's side in the hour of battle (Judg. ix. 54; 1 Sam. xiv. 6; xxxi. 4, 5). Beside the royal guards, there was, as early at least as the time of David, a select troop of heroes, who appear to have had an institution very similar in principle to our modern orders of knighthood, and may have originated the distinctive marks already pointed out as used by the Romans; for it seems they strewed their hair with gold dust. [ARMS.]

In military operations, such as marches in quest of, or in the presence of, an enemy, and in order of battle, the forces were formed into three divisions, each commanded by a chief captain or commander

of a corps, or third part, שְׁלִישׁ, or שְׁלִישׁוֹ, *shelish*, as was also the case with other armies of the East; these constituted the centre, and right and left wing, and during a march formed the van, centre, and rear. The great camp in the wilderness was composed of four of these triple bodies disposed in a quadrangle, each front having a tribal great central standard, and another tribal one in each wing.

The war-cry of the Hebrews was not intoned by the ensign-bearers, as in the West, but by a Levite; for priests had likewise charge of the trumpets, and the sounding of signals; and one of them, called 'the anointed for war,' who is said to have had the charge of animating the army to action by an oration, may have been appointed to utter the cry of battle (Deut. xx. 2). It was a mere shout (1 Sam. xvii. 20), or, as in later ages, *Hallelujah!* while the so-called mottoes of the central banners of the four great sides of the square, of Judah, Reuben, Ephraim, and Dan, were more likely the battle-songs which each of the fronts of the mighty army had sung on commencing the march, or advancing to do battle (Num. x. 34, 35, 36; Deut. vi. 4). These verses may have been sung even before the two books wherein they are now found were written, and indeed the sense of the text indicates a past tense. It was to these we think Jehoshaphat addressed himself when about to engage the Moabites: he ordered 'the singers before the Lord' to chant the response (2 Chron. xx. 21): 'Praise the Lord, for his mercy endureth for ever.' With regard to the pass-word, the sign of mutual recognition occurs in Judg. vii. 18, when, after the men had blown their trumpets and shown light, they cried: 'The sword of the Lord and of Gideon'—a repetition of the very words overheard by that chief while watching the hostile army.

Before an engagement the Hebrew soldiers were spared fatigue as much as possible, and food was distributed to them; their arms were enjoined to be in the best order, and they formed a line, as before described, of solid squares of hundreds, each square being ten deep, and as many in breadth, with sufficient intervals between the files to allow of facility in the movements, the management of the arms, and the passage to the front or rear of slingers and archers. These last occupied posts according to circumstances, on the flanks, or in advance, but in the heat of battle were sheltered behind the squares of spearmen; the slingers were always stationed in the rear, until they were ordered forward to cover the front, impede a hostile approach, or commence an engagement, somewhat in the manner of modern skirmishers. Meantime the king or his representative appeared, clad in holy ornaments, הוֹדֵרֵי קֹדֶשׁ, *hadri kodesh* (in our version rendered 'the beauties of holiness,' 1's. cx. 3; 2 Chron. xx. 21), and proceeded to make the final dispositions for battle, in the middle of his chosen braves, and attended by priests, who, by their exhortations, animated the ranks within hearing, while the trumpets waited to sound the signal. It was now, with the enemy at hand, we may suppose, that the slingers would be ordered to pass forward between the intervals of the line, and, opening their order, would let fly their stone or leaden missiles, until, by the gradual approach of the opposing fronts, they would be hemmed in and recalled to the rear, or ordered to take an appropriate position. Then was the time when the trumpet-bearing priests received command to sound the charge, and when the shout of battle burst forth from the ranks. The signal being given, the heavy infantry would press forward under cover of their shields, with the רֶמָּחַ (*romach*) protruded direct upon the front of the enemy: the rear ranks might then, when so armed, cast their darts; and the archers, behind them all, shoot high, so as to pitch their arrows over the lines before them, into the dense masses of the enemy beyond. If the opposing forces broke through the line, we may imagine a body of charioteers reserve, rushing from their post, and charging in among the disjointed ranks of the enemy, before they could reconstruct their order; or wheeling round a flank, fall upon the rear; or being encountered by a similar manœuvre, and perhaps repulsed, or rescued by Hebrew cavalry. The king, meanwhile, surrounded by his princes, posted close to the rear of his line of battle, and in the middle of showered missiles, would watch the enemy and strive to remedy every disorder. Thus it was that several of the sovereigns of Judah were slain (2 Chron. xviii. 33; xxxv. 23), and that such an enormous waste of human life took place; for two hostile lines of masses, at least ten in depth, advancing under the confidence of breastplate and shield, when once engaged hand to hand, had difficulties of no ordinary nature to retreat; because the hindmost ranks, not being exposed personally to the first slaughter, would not, and the foremost could not, fall back; neither could the commanders disengage the line without a certainty of being routed. The fate of the day was therefore no longer within the control of the chief, and nothing but obstinate valour was left to decide the victory. Hence, with the stubborn character of the Jews, battles fought among themselves were particularly

sanguinary; such, for example, as that in which Jeroboam king of Israel was defeated by Abijah of Judah (2 Chron. xiii. 3-17), wherein, if there be no error of copyists, there was a greater slaughter than in ten such battles as that of Leipsic, although on that occasion 350,000 combatants were engaged, for three successive days, provided with all the implements of modern destruction in full activity. Under such circumstances defeat led to irretrievable confusion, and where either party possessed superiority in cavalry and chariots of war it would be materially increased; but where the infantry alone had principally to pursue a broken enemy, that force, loaded with shields and preserving order, could overtake very few who chose to abandon their defensive armour, unless they were hemmed in by the locality. Sometimes a part of the army was posted in ambush, but this manœuvre was most commonly practised against the garrisons of cities (Josh. viii. 12; Judg. xx. 38). In the case of Abraham (Gen. xiv. 15), when he led a small body of his own people, suddenly collected, and falling upon the guard of the captives, released them, and recovered the booty, it was a surprise, not an ambush; nor is it necessary to suppose that he fell in with the main army of the enemy. At a later period there is no doubt the Hebrews formed their armies, in imitation of the Romans, into more than one line of masses, and modelled their military institutions as near as possible upon the same system.

Such were the instruments and the institutions of war, which the Hebrew people, as well as the nations which surrounded them, appear to have adopted; but in the conquest of the Promised Land, as regarded their enemies, the laws of war prescribed to them were, for purposes which we cannot now fully appreciate, more severe than in other cases. All the nations of antiquity were cruel to the vanquished, perhaps the Romans most of all: even the Egyptians, in the sculptures of their monuments, attest the same disposition—the males being very generally slaughtered, and the women and children sold for slaves. With regard to the spoil, except in the special case just referred to, the Hebrews divided it in part with those who remained at home, and with the Levites, and a portion was set apart as an oblation to the Lord (Num. xxxi. 50). This right of spoil and prey was a necessary consequence of military institutions where the army received

no pay. שָׁלַל, *shalal*, that is, the armour, clothes, money, and furniture, and מַלְכוֹת, *mal'koch*, prey, consisting of the captives and live stock, were collected into one general mass, and then distributed as stated above; or, in the time of the kings, were shared in great part by the crown, which then, no doubt, took care to subsidise the army and grant military rewards. [ARMS; ARMOUR; ENCAMPMENT; ENGINES; FORTIFICATIONS; STANDARDS].—C. H. S.

WARDLAW, RALPH, D.D., a congregationalist minister and professor of theology at Glasgow, was born at Dalkeith 22d December 1779, and died at Easterhouse, near Glasgow, 17th December 1853. Besides some highly important contributions to Systematic and Polemical Divinity, he published during his lifetime *Lectures on Ecclesiastes*, 2 vols. 8vo, 1821, 2d ed. 1838; and after his death,

VOL. III.

*Expositions of Proverbs, Zechariah, Romans, and James* were edited from his MSS. by his son, 8 vols. sm. 8vo, 1861-62. These volumes, besides affording admirable specimens of expository discourse, contain much careful and accurate exegesis, founded on learned investigation, as well as a thorough discussion of doctrinal and ethical questions.—W. L. A.

WARS OF THE LORD, BOOK OF THE (סֵפֶר מִלְחָמוֹת יְהוָה), a document cited Num. xxi. 14.

It was probably a collection of poems or songs celebrating the victories which had been achieved by the Israelites by the help of God. That it was an Amorite work, as Michaelis suggested, is disproved by the use of the term יְהוָה, which Michaelis vainly attempts to show is to be taken as a verb, and the passage translated:—‘As it is said in the book of the wars, it shall be.’ There is no reason to doubt that there were minstrels enough in Israel at all times of their history to record the events of that history in song, and those composed before the date of this notice might have been written in a book. What confirms this are the undoubted fragments of ancient songs in ver. 17, 18, and 27-30.

It is not clear what the passage cited means; but it seems to give a geographical notice, and probably was of some importance as indicating the ancient boundaries of the Moabitish territory (Rosenmüller, *in loc.*; Hävernick, *Einleit.* i. 2, p. 504, E. T. p. 321; Bleek, *Einl.* p. 199). Hengstenberg has a peculiar view (*Beiträge*, ii. 223), which Baumgarten (*Theolog. Commentar*, ii. 344) follows. He translates: ‘And Vaheb [took He —i.e. Jehovah] in the storm, and the brooks, the Arnon and the valley of the brooks which goes down to the dwelling of Ar, and leans on the borders of Moab.’ This is not very different from the LXX. version: διὰ τοῦτο λέγεται ἐν βίβλῳ πόλεμος τοῦ Κυρίου τῇν Ζωδβ [they probably read זֹהֵב for יְהוָה] ἐφλόγισε, καὶ τοὺς χειμάρρους Ἰαρδὲν.—W. L. A.

WASHING. [ABLUTION.]

WASHING OF FEET. The custom of washing the feet held, in ancient times, a place among the duties of hospitality, being regarded as a mark of respect to the guest, and a token of humble and affectionate attention on the part of the entertainer. It had its origin in circumstances for the most part peculiar to the East.

In general, in warm Oriental climes, cleanliness is of the highest consequence, particularly as a safeguard against the leprosy. The East knows nothing of the factitious distinctions which prevail in these countries between sanitary regulations and religious duties; but the one, as much as the other, is considered a part of that great system of obligations under which man lies towards God. What, therefore, the health demands, religion is at hand to sanction. Cleanliness is in consequence not next to godliness, but a part of godliness itself.

As in this Oriental view may be found the origin and reason of much of what the Mosaic law lays down touching clean and unclean, so the practice of feet-washing in particular, which considerations of purity and personal propriety recommended, hospitality adopted and religion sanctioned.

In temperate climes bathing is far too much neglected; but in the East the heat of the atmosphere and the dryness of the soil would render

4 A

the ablution of the body peculiarly desirable, and make foot-washing no less grateful than salutary to the weary traveller. The foot, too, was less protected than with us. In the earliest ages it probably had no covering; and the sandal worn in later times was little else than the sole of our shoe bound under the foot. Even this defence, however, was ordinarily laid aside on entering a house, in which the inmates were either barefoot or wore nothing but slippers.

The washing of the feet is among the most ancient, as well as the most obligatory, of the rites of Eastern hospitality. From Gen. xviii. 4, xix. 2, it appears to have existed as early as the days of the patriarch Abraham. In Gen. xxiv. 32 also 'Abraham's servant' is provided with water to wash his feet, and the men's feet that were with him. The same custom is mentioned in Judg. xix. 21. From 1 Sam. xxv. 41, it appears that the rite was sometimes performed by servants and sons, as their appropriate duty, regarded as of a humble character. Hence, in addition to its being a token of affectionate regard, it was a sign of humility.

The most remarkable instance is found in the 13th chapter of John's Gospel, where our Saviour is represented as washing the feet of his disciples, with whom he had taken supper. Minute particulars are given in the sacred narrative, which should be carefully studied, as presenting a true Oriental picture. From ver. 12, *seq.*, it is clear that the act was of a symbolical nature; designed to teach, *à fortiori*, brotherly humility and goodwill. If the master had performed for his scholars an act at once so lowly yet so needful, how much more were the disciples themselves bound to consider any Christian service whatever as a duty which each was to perform for the other. The principle involved in the particular act is, that love dignifies any service; that all high and proud thoughts are no less unchristian than selfish; and that the sole ground of honour in the church of Christ is meek, gentle, and self-forgetting benevolence.

It was specially customary in the days of our Lord to wash before eating (Matt. xv. 2; Luke xi. 38). This was also the practice with the ancient Greeks, as may be seen in *Iliad*, x. 577. From Martial (*Epig.* iii. 50. 3, *Deposui soleas*), we see it was usual to lay aside the shoes, lest they should soil the linen. The usage is still found among the Orientals (Niebuhr, b. 54; Shaw, p. 202). But Jesus did not pay a scrupulous regard to the practice, and hence drew blame upon himself from the Pharisees (Luke xi. 38). In this our Lord was probably influenced by the superstitious abuses and foolish misinterpretations connected with washing *before* meat. For the same reason he may purposely have postponed the act of washing his disciples' feet till *after* supper, lest, while he was teaching a new lesson of humility, he might add a sanction to current and baneful errors. [ABLUTION.]

Vessels of no great value appear to have been ordinarily kept and appropriated to the purpose. These vessels would gain nothing in estimation from the lowly, if not mean office, for which they were employed. Hence, probably, the explanation of Ps. lx. 8, 'Moab is my wash-pot.' Slaves, moreover, were commonly employed in washing the feet of guests. The passage, then, in effect, declares the Moabites to be the meanest of God's instruments.

The union of affectionate attention and lowly service is found indicated by foot-washing in 1 Tim. v. 10, where, among the signs of the widows that were to be honoured—supported, that is, at the expense of the church—this is given, if any one 'have washed the saints' feet.'

Foot-washing (*pedilavium*) became, as might be expected, a part of the observances practised in the early Christian church. The real signification, however, was soon forgotten, or overloaded by superstitious feelings and mere outward practices. Traces of the practice abound in ecclesiastical history, and remnants of the abuse are still to be found, at least in the Romish church. The reader who wishes to see an outline of these may consult Siegel, *Handbuch der ch. Alterthümer*, ii. 156, *seq.*—J. R. B.

WATCH (שָׂמַר), denoting 'to cut into,' thence 'to impress on the mind,' 'to observe,' 'to watch,' or שָׁפַח, the original meaning of which is 'to look out,' thence 'to watch,' as in English, 'to keep a look-out,' is a nautical phrase for 'to watch.' Watching must have been coeval with danger, and danger arose as soon as man became the enemy of man, or had to guard against the attacks of wild animals. Accordingly we find traces of the practice of watching in early portions of the Hebrew annals. Watching must have been carried to some degree of completeness in Egypt, for we learn from Exod. xiv. 24 that the practice had, at the time of the Exodus, caused the night to be divided into different watches or portions, mention being made of the 'morning watch.' Compare 1 Sam. xi. 11. In the days of the Judges (vii. 19) we find 'the middle watch' mentioned. See Luke xii. 38. At a later period Isaiah plainly intimates (xxi. 5, 6) that there was a watch-tower in Jerusalem, and that it was customary on extraordinary occasions to set a watchman. Watchmen were, however, even at an earlier day, customarily employed in the metropolis, and their post was at the gates (2 Sam. xviii. 24, *seq.*; 2 Kings ix. 17, *seq.*; Ps. cxxvii. 1; Prov. vii. 34), where they gave signals and information, either by their voice or with the aid of a trumpet (Jer. vi. 17; Ezek. xxxiii. 6). At night watchmen were accustomed to perambulate the city (Cant. iii. 3; v. 7). In the N. T. we find mention made of the second, the third, and the fourth watch (Luke xii. 38; Matt. xiv. 25). The space of the natural night, from the setting to the rising of the sun, the ancient Jews divided into three equal parts of four hours each. But the Romans, imitating the Greeks, divided the night into four watches (*vigiliae*), and the Jews, from the time they came under subjection to the Romans, following this Roman custom, also divided the night into four watches, each of which consisted of three hours: these four periods Mark (xiii. 35) has distinguished by the terms *ὄψις*, *μεσονύκτιον*, *ἀλεκτροφωλία*, *πρωὴ* (Buxtorf, *Lex. Talmud.*; Fischerus, *Prologus de Vitiis Lex. N. Test.*) The terms by which the old Hebrew division of the night was characterised are—1. 'The first watch,' שְׁמֵרֹת רֵאשִׁית, beginning of the watches (Lam. ii. 19); 2. 'The middle watch,' שְׁמֵרֹת הַתְּכִינָה (Judg. vii. 19); 3. 'The morning watch,' שְׁמֵרֹת הַבֹּקֶר (Deut. xiv. 24; 1 Sam. xi. 11). The first extended from sunset to our ten o'clock, the second from ten at night till two in the morning, and the

third from that hour till sunrise (Ideler, *Chronol.* i. 486).—J. R. B.

WATER. No one can read far in the sacred Scriptures without being reminded of the vast importance of water to the Hebrews in Palestine, and indeed in every country to which their history introduces us; and more particularly in the deserts in which they wandered on leaving Egypt, as well as those into which they before or afterwards sent their flocks for pasture. A subject of such importance necessarily, therefore, claims considerable attention in a Biblical Cyclopædia. The natural waters have already been disposed of in the articles PALESTINE AND RIVER; and in CISTERN and JERUSALEM notice has been taken of some artificial collections. It now remains to complete the subject, under the present head, by the addition of such details as may not have been comprehended under the articles referred to.

It has been shown that the absence of small rivers, through the want of rain in summer, renders the people of the settled country, as well as of the deserts, entirely dependent upon the water derived from wells, and that preserved in cisterns and reservoirs, during the summer and autumn; and gives an importance unknown in our humid climate to the limited supply thus secured.

With respect to reservoirs, the articles to which reference has been made will supply all the information necessary, except that we may avail ourselves of this opportunity of noticing the so-called Pools of Solomon, near Bethlehem, which being supplied from fountains furnish some characteristics which distinguish them from cisterns, and deserve attention as ancient works of probably Hebrew art. The tradition which ascribes them to Solomon seems to be founded on the passage in which the writer of Ecclesiastes (usually supposed to be Solomon) speaks of his undertakings: 'I made me gardens and orchards, and I planted in them trees of all kinds of fruits; I made me *pools of water*, to water therewith the wood that bringeth forth trees' (Eccles. ii. 5, 6). To these allusion is also supposed to be made in Canticles (iv. 12): 'A garden enclosed is my sister, my spouse; a spring shut up, a fountain sealed.' In short we have here a small secluded valley, obviously the site of an ancient garden, with reservoirs of water supplied by a 'shut up' fountain. Hence the valley itself goes among old travellers by the name of Hortus Conclusus. It is also conceived to be the spot mentioned by Josephus, who says: 'There was, about fifty furlongs from Jerusalem, a certain place called Etham, very pleasant in fine gardens, and abounding in rivulets of water, whither Solomon was wont to go forth in the morning, sitting on high in his chariot' (*Antiq.* viii. 7). Maundrell (p. 86) thinks that the pools were very probably made by Solomon; but 'for the gardens,' he says, 'one may safely affirm that if Solomon made them in the rocky ground which is now assigned for them, he demonstrated greater power and wealth in finishing his design than he did wisdom in choosing the place for it.' But Hasselquist (p. 145), a better judge, says: 'The place will well admit that Solomon might have formed a garden here, though it is not by nature an agreeable situation, being in a bottom; but perhaps this great prince might choose to improve nature by art, as many other potentates have done.' The fact is, that a valley kept always ver-

dant by the singular abundance of water, afforded peculiar advantages in this country for a pleasure-ground. Mariti remarks (*Voyage*, ii. 388): 'Nature has still preserved its original fertility to the valley of *Hortus Conclusus*. Although but little cultivated, the soil still produces a tolerable quantity of cotton and various kinds of grain. There are also seen fine plantations of fruit-trees, affording the most juicy fruits of the country. Various flowers and many fragrant plants grow there naturally at all seasons, among which are thyme, rosemary, marjoram, sage, absinthium, persil, rue, ranunculuses, and anemones.' De Breves (*Voyage*, p. 180) long bore similar testimony, though he was there in the very unfavourable month of July; he describes the valley as 'always green,' and, besides the plants just named, cultivated by nature's own kindly hand, he adds oranges, citrons, and pomegranates to the fruits which grow there. Zuallart (*Voyage*, iv. 3) says that several species of rare plants were found in the valley, and seems to insinuate the probability that they had been propagated from exotic plants which Solomon introduced into his gardens.

Of the pools a very good description is given by Dr. Wilde (*Narrative*, ii. 420): 'At the extremity of the valley we arrived at three enormous tanks, sunk in the side of a sloping ground, and which from time immemorial have been considered to be the workmanship of Solomon; and certainly they are well worthy the man to whom tradition has assigned their construction. These reservoirs are each upon a distinct level, one above the other, and are capable of holding an immense body of water. They are so constructed, both by conduits leading directly from one another, and by what may be termed anastomosing branches, that when the water in the upper one has reached to a certain height, the surplus flows off into the one below it, and so on into the third. These passages were obstructed and the whole of the cisterns were out of repair when we visited them, so that there was hardly any water in the lowest, while the upper one was nearly full of good pure water. Small aqueducts lead from each of these cisterns to a main one that conducts the water to Jerusalem. They are all lined with a thick layer of hard whitish cement, and a flight of steps leads to the bottom of each, similar to some of those in the holy city. Where the lowest cistern joins the valley of Etham it is formed by an embankment of earth, and has a sluice to draw off the water occasionally. A short distance from the upper pool I descended into a narrow stone chamber, through which the water passes from the neighbouring spring on its course to the cisterns. This likewise has a traditional tale to tell; it is said to be the sealed fountain to which allusion is made in the 4th and 5th chapters of the Canticles. From an examination of this place, it appeared to me that several springs empty themselves into these reservoirs, which are partly cut out of the solid rock, and partly built with masonry.

'Nigh to the upper part there is a large square castle, apparently of an order of architecture belonging to the Christian era; and in all probability so placed to guard these waterworks during the period of the holy war, for we know to what extremities some of the early crusaders were reduced from the different wells being poisoned by the enemy upon their approach to Jerusalem.

'These fountains having been already described

by Maundrell, Pococke, and others, I shall not dwell longer upon them, except to mention two circumstances, that it appears extraordinary they have not been adverted to by former travellers; the first is, their great similarity to the fountains assigned to Solomon at Ras-el-Ain, near Tyre; and the fact of both being natural springs, that were pent up so as to raise the water they contained to the level of its final destination. The second is, that these springs were originally collected into one stream, which must then have formed a considerable rivulet, and running through this valley, finally discharged its waters into the Asphaltine lake.

‘On our return to the city we followed the track of the aqueduct as far as Bethlehem, and afterwards crossed it in several places on the road. It is very small, but the water runs in it with considerable rapidity, as we could perceive by the open places left in it here and there. From the very tortuous

course that this conduit takes in following the different sinuosities of the ground, being sometimes above and sometimes beneath the surface, it is difficult to persuade oneself that it does not run up hill, as many have supposed. Finally, it crosses over the valley of Rephaim, on a series of arches, to the north of the lower pool of Gihon, and winding round the southern horn of Zion, is lost to view in the ruins of the city. It very probably supplied the pool of Bethesda, after having traversed a course of certainly not less than from thirteen to fifteen miles.’

To this very clear description we have only to add the measurements of Dr. Robinson (*Bibl. Researches*, ii. 165):—

*Lower Pool*.—Length, 582 feet; breadth at the east end, 207 feet; at the west end, 148 feet; depth at the east end, 50 feet, of which 6 feet water (in the month of May).

520. Solomon's Pool.

*Middle Pool*.—Distance above lower pool, 248 feet; length, 423 feet; breadth at the east end, 250 feet; at the west end, 160 feet; depth at the east end, 39 feet, of which 14 feet water.

*Upper Pool*.—Distance above middle pool, 160 feet; length, 380 feet; breadth at the east end, 236 feet; at the west end, 229 feet; depth at east end, 25 feet, of which 15 feet water.

Lord Nugent (*Lands Classical and Sacred*, ii. 11) makes the pools a few feet larger each way, but admits that Robinson's measurement may probably have been more exact than his own.

With respect to wells, their importance is very great, especially in the desert, where the means of forming them are deficient, as well as the supply of labour necessary for such undertakings, which, after all, are not always rewarded by the discovery of a supply of water. Hence in such situations, and indeed in the settled countries also, the wells

are of the utmost value, and the water in most cases is very frugally used (*Num.* xx. 17-19; *Deut.* ii. 6, 28; *Job* xxii. 7). It is, however, not merely the value of the well itself, but certain other considerations that explain the contests about wells which we find in the histories of Abraham and Isaac (*Gen.* xxi. 25-31; xxvi. 15-22). Here we see that the people of the country strenuously contested the right of the patriarchs to the wells which they digged, and even went so far as to fill up again (instead of leaving open for their own use) the wells which Abraham had opened. The fact is, however, that, at the present day, to dig a well at a station remote from a supply of water, is the most difficult and arduous operation which the chief of a tribe or clan undertakes; and the benefits of such a work are so highly appreciated, that the property in the well becomes vested in him and in his heirs for ever. While his clan is

encamped near it, no persons not belonging to it can draw water from the well without his leave. This right exists, however, only on the understanding that the well is maintained in good condition; for if it gets out of repair, or is choked up, and remains in this state for any length of time, the property in it lapses to the person or tribe by whom it is restored to a serviceable condition. This is the law of the desert; but as its application to the

scriptural questions respecting the property of wells is important, we may be allowed to introduce from the *Pictorial History of Palestine* (p. 61) a passage bearing strongly on the subject: 'Abraham had digged a well near his encampment, and of the use of this the 'servants' (probably the herdsmen) of Abimelech had violently deprived him. As men seldom act without some reason, or show of reason, which is deemed satisfactory to themselves, it may

521. Fountains of Moses.

seem likely that Abimelech's people doubted the right of Abraham to apply the law of the desert to the common lands of an appropriated territory, and to claim the exclusive possession of the well he had dug in such a land. If their view had been just, however, it could only have entitled them to a share of the water, and not have justified them in assuming that exclusive possession which they denied to the party at whose expense the benefit had been secured. But taking into account some trans-

actions of rather later date, we incline to think that the cause of all the differences about wells which we read of in the history of Abraham and of Isaac lay deeper than this account supposes, and must be sought in a country more similarly circumstanced than the open deserts to that in which the patriarch was at this time sojourning. The best analogy is offered in Persia. There all waste lands—that is, all lands which are uncultivable from wanting the means of irrigation—are called 'God's

lands ;' and although the king is regarded as the general proprietor of the soil, such lands are free for any uses to which they can be applied ; and whoever procures the means of irrigation becomes the proprietor of the land which he thus renders cultivable. Now, as among the immemorially ancient usages of the East, none are more ancient than those which relate to the occupation of land, it is not too much to suppose that a similar usage to this existed in the time of Abraham ; and if so, it is easy to conclude that the anxiety of the Philistines about the wells dug by Abraham arose from the apprehension that by the formation of such wells he would be understood to create a lien on the lands in which they lay, and would acquire an indefeasible right of occupation, or rather of possession ; and it might seem to them inconvenient that so powerful a clan should acquire such a right in the soil of so small a territory as that which belonged to them. Hence their care, when Abraham afterwards left their part of the country, to fill up the wells which he had digged ; and hence also the renewed and more bitter strife with Isaac when he, on arriving there, proceeded to clear out those wells and to dig new ones himself. That Isaac also pursued cultivation to some extent in the lands for which he had thus secured the means of irrigation, is a remarkable corroboration of the view we now take, as he certainly might, in this way, but we know not how he could otherwise, acquire such a proprietary right as could alone entitle him to cultivate the soil.

522. Well and Bucket at Jaffa.

'Abimelech, in reply to the complaint of Abraham respecting the well, declared that the conduct of his servants had not been sanctioned by him, and that, indeed, this was the first time he had heard anything of the matter ; and he made no objection to the proposal of Abraham, that the recognition of his (the patriarch's) right to the well should form a part of the proposed covenant. This proposal, thus represented as the sole matter for which Abraham himself took care to provide in a solemn engagement with the king of the Philistines, is, perhaps, as striking an indication of the supreme importance of water in those Eastern countries as can anywhere be found. Both parties then swore to the covenant, the terms of which have thus been stated ; and as a memorial of the transaction, and in particular of his acknowledged right to the well, the patriarch gave it the name of Beer-sheba, *the well of the oath*. This imposition of commemorative names upon places was the principal of various methods which were resorted to in these earliest ages to perpetuate the memory of events and contracts, in the absence of those written documents which were afterwards found more suitable for such purposes.'

It appears in Scripture that the wells were sometimes owned by a number of persons in common,

and that flocks were brought to them for watering on appointed days, in an order previously arranged. A well was often covered with a great stone, which being removed, the person descended some steps to the surface of the water, and on his return poured into a trough that which he had brought up (Gen. xxiv. 11-15 ; xxix. 3-10 ; Exod. ii. 16 ; Judg. v. 11). There is, in fact, no intimation of any other way of drawing water from wells in Scripture. But as this could only be applicable in cases where the well was not deep, we must assume that they had the use of those contrivances which are still employed in the East, and some of which are known from the Egyptian monuments to have been very ancient. This conclusion is the more probable as the wells in Palestine are mostly deep (Prov. xx. 5 ; John iv. 11). Jacob's well near Shechem is said to be 120 feet deep, with only fifteen feet of water in it (Maundrell, *Journey*, March 24) ; and the labour of drawing from so deep a well probably originated the first reluctance of the woman of Samaria to draw water for Jesus : 'Sir, thou hast nothing to draw with, and the well is deep.' From this deeper kind of well the water is drawn by hand in a leathern bucket not too heavy, sometimes by a windlass, but oftener, when the water is only of moderate depth, by the *shadoof*, which is the most common and simple of all the machines used in the East for raising water, whether from wells, reservoirs, or rivers. This consists of a tapering lever unequally balanced upon an upright body variously constructed, and from the smaller end of which is suspended the bucket by a rope. This when lowered into the well, is raised full of water by the weight of the heavier end. By this contrivance the manual power is applied in lowering the bucket into the well, for it rises easily, and it is only necessary to regulate the ascent. This machine is in use under slight modifications from the Baltic to the Yellow Sea, and was so from the most remote ages to the present day. The specimen in the annexed woodcut occurs in the neighbourhood of Jaffa. The water of wells, as well as of fountains, was by the Hebrews called 'living water,' translated 'running water,' and was highly esteemed (Lev. xiv. 5 ; Num. xix. 17). It was thus distinguished from water preserved in cisterns and reservoirs.—J. K.

WATER OF SEPARATION. [UNCLEANNESS.]

WATERS OF JEALOUSY. The law of Moses (Num. v. 11-31) supposes the case of a husband on whom has fallen 'the spirit of jealousy' in regard to his wife, whom he suspects but cannot prove to have been guilty of unchaste intercourse with another man ; and it makes provision for the removal of a state of feeling entirely incompatible with domestic felicity and order, and which was a scandal in Israel not to be continued. The rule prescribed with this view was, that the man should bring his wife to the priest, by whom she should be placed before the Lord, who alone could manifest whether she was guilty or not. An offering was to be brought by the man as an offering of memorial, that is not of thanksgiving (Lev. ii. 2), but of his wife's transgression, actual or supposed (מִזְבֵּחַ עֹלָה), and hence it was to be composed not of fine meal but of barley-meal, and to be without oil or incense, to betoken the severity of the man's feel-

ing. The priest was then to take holy water (perhaps from the laver in the sanctuary, Exod. xxx. 18), and mix with it some dust from the floor of the tabernacle; and having uncovered the woman's head, and put the memorial-offering into her hands, and holding in his own the basin with the water called here 'the bitter water that brings a curse' (מֵי הַמָּוֶה הַמַּרְרִים), he was to administer to her an oath as to her innocence, at the same time assuring her that if she was guilty, and took the oath falsely, the most dreadful consequences to herself would ensue; whereas if she was guiltless this would be made manifest by her being left unharmed. Having made a record in writing of the penalty that would follow if she were guilty, the priest was then to wash this out with water from the basin; to indicate, doubtless, its power of purgation, and to encourage the woman to swallow it if conscious of innocence. The woman was then to drink the bitter water; and having thus made her appeal to God as the Omniscient, her innocence would be proved by her remaining unhurt, whilst her guilt would be proved by the water causing her belly to swell, and her thigh to rot; thus, as the Talmudists remark (*Sotah*, i. 7), making her suffer in those parts of her body concerned in her sin. This ordeal is only a special application of the general principle which pervades the whole theocratic institute, that judgment is with the Lord, and that to him must all causes be referred which baffled the skill of men (Deut. i. 17). A belief like this seems to pervade the race, and to lie at the basis of all the ordeals by which men have sought to establish the guilt or innocence of those against whom crimes were alleged which only the Deity could detect (see Grotius on ver. 27, and *Encyclop. Britan.* xvi. 701).—W. L. A.

## WAVE-OFFERING. [OFFERING.]

## WEAPONS. [ARMS.]

WEASEL. Although under the head *CHOLED* we have given *mole* as its synonym, yet such is the vagueness of Oriental denominations, and the necessity of noticing certain species which, from their importance, cannot well be supposed to have been altogether disregarded in the Bible, that in this place a few words descriptive of the species of Viverridae and Mustelidae, known to reside in and near Palestine, and supposed to be collectively designated by the term *tsigim*, may not be irrelevant. They appear both anciently and among ourselves collected into a kind of group, under an impression that they belong to the feline family; hence we, like the ancients, still use the words civet-cat, tree-cat, pole-cat, etc.; and, in reality, a considerable number of the species have partially retractile claws, the pupils of the eyes being contractile like those of cats, of which they even bear the spotted and streaked liveries. All such naturally have arboreal habits, and from their low lengthy forms are no less disposed to burrow; but many of them, chiefly in other hemispheres, are excellent swimmers. One of these species, allied to, if not the same as, *Genetta barbara*, is the *Thela Elan*, by Bochart described as having 'various colours, and as being spotted like a pard.' In Syria it is called *sephka*, in Arabia *zebeeb*, and lives by hunting birds and shaphans. There are besides, in the same region, the *nimse*, ferret or pole-cat (*Putorius vulgaris*), for these two are not specifically distinct;

*fert-el-heile*, the weasel (*Mustela vulgaris Africana*), differing from ours chiefly in its superior size and darker colours. A *paradoxurus*, identical with or nearly allied to *P. typus*, occurs in Arabia; for it seems these animals are found wherever there are Palmifere, the date-palm in particular being a favourite residence of the species. Two or three varieties, or perhaps species, of *nems* occur in Egypt solely; for the name is again generic in the Arabian dialects, and denotes the *ichneumon*. Arabia proper has several other animals, not clearly distinguished, though belonging to the families here noticed; but which of these are the *sun-*

523. *Paradoxurus typus*—the Palm-Martin.

*giab* and the *simur*, or the *alphanex* of Ibn Omar Abdulbar, quoted by Bochart, is undetermined; albeit they evidently belong to the tribes of vermin mammals of that region, excepting as regards the last mentioned, now known to be a kind of miniature fox (*Megalotis zerda*, Ham. Smith), or *fennec* of Bruce, who nevertheless confounded it with *Paradoxurus typus*, or an allied species which equally frequents palm-trees; but the *fennec* does not climb. It is equally impossible to point out the cats, tree-cats, and civet-cats noticed by the poet Nemesianus, who was of African birth; or by the Arabian Damir, who makes no further distinctive mention of them [CAT].—C. H. S.

## WEAVER (אֹרֵג, אֹרֵגָה), WEAVING (אֹרֵגָה).

Weaving of some sort must be contemporary with the use of textile fabrics, and this remounts to the earliest ages. That weaving was practised by the Israelites before they were acquainted with the Egyptians cannot be doubted; but as the Egyptians were from an early period famous for the delicacy and beauty of the products of their looms, we may suppose that the Israelites learned something from them during their residence among them.

The fabrics required by a household were probably usually manufactured in the house. Hence in the description of the virtuous woman her diligence and skill in weaving are prominently commended (Prov. xxxi. 13, 22, 24). That weaving, however, was practised as a trade, and that from a very early period there was a weavers' guild among the Israelites, appears evident from 1 Chron. iv. 21. Women also were employed in weaving as a trade (2 Kings xxiii. 7). Perhaps the commoner sorts of work were done at home, while skilled workers were employed to produce the fine byssus fabrics and highly ornamented work, resembling that for which the looms of Egypt were famous (Wilkinson, *Anc. Egypt*. ii. 85, ff.)

The looms of Egypt were of the most simple kind; and those of Judæa were doubtless not less so. The 'weaver's beam' (מִנּוֹר אֲרָגִים) was a piece of wood placed either perpendicularly or horizontally, to which the web (מִסְכֶּכֶת) was fastened. The other implements used were the shuttle (אָרֶג) and the יִתְרִי, which some make a pin, others a rope or cord, and which certainly was used to fasten the web to the beam (Judg. xvi. 14). Mention is also made of the דִּלְקָה, or *thrum* (Is. xxxviii. 12), and of the שֵׁתִי and the עֵרֶב (Lev. xiii. 48, ff.), which in the A. V. are rendered *warp* and *woof*. This is also the rendering of the LXX. ἐν στῆμον ἢ ἐν κρῶκι. But how could the plague be in the warp or the woof and not in both; or how could the one be burned and not the other? (ver. 52). This has led Houbigant to suggest that these terms denote different kinds of cloth, the one of a more simple, the other of a more complicated texture; and this Dathe, Rosenmüller, Baumgarten, and Knobel approve.

The fabrics produced by the loom among the Hebrews were of woollen, byssus, and cotton; also the camels-hair and goats-hair cloths used for the covering of tents and for the dress of the poor. Other more costly and artistic fabrics were also probably produced by weaving [NEEDLE-WORK].

Our Lord wore a χιτὼν ἄρραφος (John xix. 23), a garment without seam wholly woven from top to bottom. A similar garment Josephus says was worn by the high-priest (*Antiq.* iii. 7. 4); and the Brahmins of India make a point of wearing only such.—W. L. A.

WEDDING. [MARRIAGE.]

WEEK. [SABBATH.]

WEEKS, FEAST OF. [PENTECOST.]

WEIGHTS AND MEASURES. This is a subject on which our knowledge is by no means complete and satisfactory. The notices respecting it which the Bible supplies are fragmentary and scattered; and though the Jewish authorities and Josephus afford us useful aids, and though the topic has received full and very careful investigation, still difficulties remain, and there are points on which we must be content either with probable conjecture, or an approximation to the truth.

So long, indeed, as the subject was insulated from its natural connections, and Hebrew weights and measures were studied apart from those of other ancient nations, the difficulty and uncertainty might well be considerable. Of late, however, a juster method of treatment has been originated in Germany. The Roman measures came from Greece, the Grecian from Phœnicia, the Phœnician from Babylon. Accordingly each system will throw light on the other, and all may be made to contribute something to the elucidation of the Hebrew weights and measures. This method of viewing the subject, and the satisfactory lessons which have been hence deduced, are to be ascribed to Böckh (*Metrologischen Untersuchungen*, Berlin 1838), who, availing himself of the results ascertained by English, French, and German scholars, and of the peculiar facilities afforded by a residence in the midst of the profound and varied erudition

of the Prussian capital, has succeeded, by the application of his unwearied industry and superior endowments, in showing that the system of weights and measures of Babylon, Egypt, Palestine, Phœnicia, Greece, Sicily, and Italy, formed one great whole, with the most intimate relationships and connections. Our limited space permits only a very brief notice of the results which the inquiries of Böckh and his school seem to have ascertained. We will first advert to the names of the Hebrew weights or coins. 1. כֶּכֶר is derived from a root signifying 'round,' so that the word denotes a circular-shaped mass of metal. Thus, etymologically, it may be rendered 'the circle.' In 2 Kings v. 22 it is translated 'talent'; the more exact determination of its import is fixed by the addition of another noun, as 'talent of silver' (2 Kings v. 22, 23), and 'talent of gold' (1 Kings ix. 14). 2. מָנָה is a word of Shemitic origin, the Greek μνᾶ. It occurs in the Coptic N. T. in the forms *amna* and *emna*. In 1 Kings (x. 17) it is rendered 'pound.' 3.

שֶׁקֶל, weight in the abstract, the usual weight among not only the Hebrews, but the Persians also—σῆκλος. It varies in its import, and is rendered *shekel* by our translators, who have thus merely preserved the original word. 4. בֶּקַע, 'a *bekah*' (Exod. xxxviii. 26), is from a root which signifies 'to divide'; hence a moiety or half, 'half a shekel' (Gen. xxiv. 22). The word in this application is found only in the Pentateuch. 5. גֶּרַח, properly a grain, or, in particular, the bean, or St. John's bread, *carab*; hence, the smallest weight. The word is retained in the English translation; thus in Exod. xxx. 13, 'a shekel is twenty gerahs.' It is obvious that no determinate and satisfactory unit in a system of weights can be gained from a changeable object like a grain. This difficulty, however, is not peculiar to the Hebrews. We have our *grains*, and the Greeks had their *oboli*.

In order to determine the relations which the כֶּכֶר, talent, bore to the smaller weights and coins, we may have recourse to those passages which speak of the formation of the sanctuary. According to Exod. xxx. 13, every Israelite above twenty years of age had to pay the poll-tax of half a shekel as a contribution to the sanctuary. Exod. xxxviii. 26 tells us that this tax had to be paid by 603,550 men. The sum amounted to 100 talents and 1775 sacred shekels (Exod. xxxviii. 25), which are equal to 603,550 half, or 301,775 sacred shekels. Accordingly the talent contained 3000 sacred shekels; for by deducting from

301,775 shekels  
1,775 shekels

we get 300,000 shekels

to be divided among 100 talents, making each talent equal to 3000 sacred shekels.

The value of the sacred shekel in regard to the *gerah* is determined by Exod. xxx. 13; Lev. xxvii. 25; Num. iii. 47; Ezek. xlv. 12, to be twenty *gerahs*; the half-shekel, *bekah*, is equal to ten *gerahs*.

The determination of the relative value of the *maneh* is not easy, for it depends on a passage which in the Hebrew cannot be understood (Ezek. xlv. 12), 'Twenty shekels, five and twenty shekels, fifteen shekels shall be your maneh,' but which in the Sept. (*Cod. Alex.*) seems to state that a maneh was equal to fifty sacred shekels. Thus there ensues this table:—

Kikkar	I			
Maneh	60	I		
Shekel	3000	50	I	
Bekah	6000	100	2	I
Gerah	60,000	1000	20	10 I

The use of the precious metals as a medium of exchange in commerce dates back to a very early period of history. A common, recognised, and invariable standard of value, by means of which goods, instead of being exchanged in barter, might be bought and sold, is indispensable in any but a primitive state of trade. Accordingly Abraham buys a field by the intervention of silver. But this silver or gold must have an acknowledged value, else it cannot answer its purposes; there must also be a means of ascertaining easily that the professed and ostensible is the real value of any particular portion. Hence coins which bear 'the image and superscription of Cæsar,' or some token to assure traders that the piece of money is right both in quality and in quantity. In early periods these tokens would obviously be imperfect. The quantity was ascertained by weight, the quality by inspection. If now we inquire how soon the Hebrews possessed money of a fixed value, we find Abraham himself buying a field for 'four hundred shekels of silver current with the merchant,' which value was ascertained by weight. Here the shekel is a recognised ordinary unit. This, at least, is clear. The passage may also imply that the purchase-money was paid, not in silver bars, but in silver pieces, shekels; the weighing being intended to ascertain that the shekels were of the proper value, which was not guaranteed by the fixed and invariable characters of a coin. If we pass on to the time of Moses, we find pieces of money of a fixed and recognised value in circulation among the Israelites, and are led to see that the amount of the circulating medium must have been very considerable. In the historical and prophetic writings of a later period mention is made of the shekel and of other pieces of money, so that their use in commerce before the Babylonish captivity is placed beyond a doubt. To term these pieces of money coin might be to mislead, since the word coin refers the mind to the operations of a government mint; but it is clear that as pieces of money of a fixed and recognised value they must have been of a certain size, and borne some distinctive marks. Hence the only difference between those pieces of money and coin lies in the quarter whence they came—private or public—and in the sanction and authority which they accordingly carried with them. The Talmud refers coin, strictly so called, to the ante-exilian period. What the circulating medium among the Hebrews was made up of, may be inferred from what has gone before: there was the shekel; also the sacred shekel, if this latter is to be distinguished from the former; then the half-shekel, or bekah, which may be a name for the ordinary shekel; there was also a quarter-shekel, 'the fourth part of a shekel of silver' (1 Sam. ix. 8); and, finally, the smallest silver coin, namely the gerah. From the passage in Samuel just cited it appears clear that those pieces of money were used in the ordinary commerce of life, and we have previously seen that money was demanded in the service of religion. In 1 Sam. ii. 36, a word occurs (אֲנֹרִי) disguised in the E. V. under the phrase 'a piece of silver,' which may have been the current name for the coin that, from its weight,

was called a gerah. It is thus evident that there prevailed among the Hebrews, at an early period, a very considerable and much-employed metallic circulating medium.

Of these coins the shekel is worth twenty gerahs; but there are three shekels mentioned in the O.T.—the ordinary shekel, the shekel of the sanctuary (Exod. xxx. 13), and the shekel after the king's weight (2 Sam. xiv. 26). Are these three different kinds? or are they different descriptions for the same coin?—thus, is the first, shekel, the common name; the second, sacred shekel, the coin according to the ecclesiastical standard; the third, king's shekel, the same according to the regal standard, the function having passed from the priests to the monarch? No satisfactory answer to these questions presents itself, and our space forbids more discussion.

But how are we to gain a unit for estimating the worth of the ante-exilian coins, of which not one has come down to us? Let us notice one or two facts connected with the Jewish post-exilian coins. During the exile the Israelites became intimately acquainted with the money-system which prevailed in Babylon. After their return home, and during the Persian dominion, we find mention made of a Persian coin, דַרִיכָא, the *darick* (Ezra ii. 69; viii. 27; Neh. vii. 70), which is Englished by 'drachm,' in the Greek δραχμή. The coin was so named after Darius, son of Hystaspes. These coins were made according to a foot, which was nearly the same as the Attic, and the standard weight of each was 1644 Parisian grains. In the Greek period, under the Ptolemies and Seleucidae, the Jews used the coins of these princes (1 Maccab. xv. 5, 6); but when they gained a short national independence under the Maccabees, they coined many of their own, as, for instance, in the first year of Simon Maccabæus. Coins of Simon and his followers are in existence, and have been carefully studied. Confining our remarks to the coins of Simon Maccabæus, we mention the following ascertained facts: they bear the old Hebrew or Samaritan characters, and not the square letter of the modern Hebrew, which is derived from the former under the influence of tachygraphy and caligraphy. These coins are exclusively of silver. The shekels and half-shekels belong to the first and second years of Simon's reign. Doubts prevail as to the genuineness of the coins bearing date the third and fourth years of his rule, but the shekels of his third year are admitted to be genuine. The coins of the first

year bear the inscription יְרוּשָׁלַם קִדְשָׁא, 'Holy Jerusalem.' The weight of the shekel varies somewhat. The heaviest weighs 271½ Parisian grains; the greater part from 266 to 268 Parisian grains. The standard may approximately be taken at 274 Parisian grains, to which Böckh is led by comparison with other systems. Here, then, we have the weight of the shekel; though we cannot say with certainty that it remained the same in every period of the earlier history, yet this becomes very probable when the retentiveness of customs which characterises the East is taken into account. Besides, the change introduced by the Maccabees was a restoration of the old constitution under influences which would cause the past to be rigidly reproduced. The shekel in the Pentateuch and Ezekiel is found equal to twenty gerahs. What

shekel? The inscription 'Holy Jerusalem' makes it likely that it was the sacred shekel. We thus, then, arrive at these conclusions:—

Gerah	=	13.7	Par. grains.
Bekah, or common shekel	"	137	"
Sacred shekel	"	274	"
Maneh	"	13,700	"
Talent	"	822,000	"

These conclusions find corroboration by being compared with the weights of other Eastern nations, and the whole inquiry authorises the inference, that one general system prevailed in the more civilised nations, being propagated from the East, from an early period of history.

In the N. T. (Matt. xvii. 24) the temple tax is a didrachm; from other sources we know that this 'tribute' was half a shekel; and in ver. 27 the stater is payment of this tax for two persons. Now the stater—a very common silver Attic coin, the tetradrachm—weighed 328.8 Parisian grains: thus not considerably surpassing the sacred shekel (274 Parisian grains). Are we, then, to hold the stater of the N. T. for an Attic tetradrachm? If so, its agreement with the sacred shekel is striking. There is reason in the passage of Matthew and in early writers for regarding the two as the same. And the Attic tetradrachm sank from its original weight of 328.8 to 308 and 304. This approximation must have gone on increasing, for under the empire a drachm was equal to a Roman denarius, which in the time of Tiberius weighed 69.8 Parisian grains. Four denarii were equal to 279 Parisian grains; so that, if the denarius is regarded as an Attic drachm, the sacred shekel may be correctly termed a tetradrachm. With this Josephus agrees (*Antiq.* iii. 8. 2), who says that the shekel (σικλος), a Hebrew coin, contains four Attic drachms.

Names of measures of length are for the most part taken from members of the human body, which offered themselves, so to say, naturally for the purpose, and have generally been used in all times and places in instances where minute accuracy was not demanded. And though, within certain limits, these measures have approached to sameness—for the human foot, to take it as an example, may have been slightly over or somewhat under twelve inches, while it never in any generation extended to twenty-four inches—yet was there scope also for considerable latitude and diversity, and nothing like a system of normal measures can hence be gained, unless means are found for determining the average length of any one of these measures, or for fixing the length which it was intended to represent.

At the basis of the Hebrew system of measures of length lies אמה, cubit, the fore-arm, or the distance from the point of the elbow to the tip of the third finger. This is a word supplied by no Hebrew root, but derived from the Egyptian Mahe, signifying 'cubit,' which, with the same meaning, is found in the Coptic in the form Mahi, and with the prefix, Ammah.

A longer measure, applied in measuring buildings, was the קנה (Ezek. xli. 8; Apoc. xxi. 15), rendered in the common version 'reed,' more properly 'rod.' In Judg. iii. 16, Ehud's sword (not 'dagger') is said to have been in length גמר. As he wore this weapon under his mantle, the length of this measure may be approximately conjectured.

Smaller measures of length were—1. ארך, from a root meaning to expand (the hand), hence a 'span.' This word is found in the Egyptian, which seems to have borrowed it from the Shemitic. 2. אפוח, the breadth of the hand (1 Kings vii. 26; Exod. xxv. 25). 3. אצבע, the finger (Jer. lii. 21), the denomination of the smallest measure of length. Thus we have the breadth of the finger, of the hand, of the span—the length from the tip of the little finger to the point of the thumb,—and the cubit.

In order to ascertain the length of these, we take the cubit as our standard. The longer measure, reed, or rod, consists, in Ezek. xli. 8, of six great cubits, that is, of six such cubits as were a handbreadth longer than the common cubit (Ezek. xl. 5; xliii. 13). The relation of zereth, span; tepach, handbreadth; and ezba, finger, is not given in the O. T. By comparing together Exod. xxv. 10, with Josephus, *Antiq.* iii. 6. 5, we find the span equal to half a cubit, for the length which Moses terms two cubits and a half Josephus designates five spans. The relation of tepach (handbreadth) and ezba (finger) to ammah (cubit) appears from their several names and their import in other systems. The handbreadth is four fingers; the span contains three times the breadth of the hand, or twelve fingers. This is the view which the Rabbins uniformly take. We find a similar system among the Greeks, who reckoned in the cubit twenty-four fingers, six handbreadths, and two spans. The same was the case with the Egyptians.

But the ammah itself is not a fixed unit, for in Ezekiel we have found a cubit which was a handbreadth longer than the common cubit. The subject has been amply discussed, and opinions are various [CUBIT]. We may conclude that there were two cubits, the sacred of seven, the common of six handbreadths; and thus these two cubits were to each other as seven to six—that is, the sacred cubit held seven handbreadths of the ordinary cubit of six handbreadths. There is no reason, however, to think that the sacred cubit was divided into seven parts. It was the older, and would be divided according to the duodecimal method which prevails in this matter, and accordingly would contain six palms and twenty-four fingers, only that its fingers and palms were greater than those of the ordinary cubit. This is proved by the express statements of the Talmud, according to which the sacred, as well as the common cubit, contained six handbreadths.

As we have no unit of measure given us in the Scriptures, nor preserved to us in the remains of any Hebrew building, and as neither the Rabbins nor Josephus afford the information we want, we have no resource but to apply for information to the measures of length used in other countries. We go to the Egyptians. The longer Egyptian cubit contained about 234.333 Parisian lines, the shorter about 204.8. According to this the Hebrew measures of length were these:—

Sacred cubit	. 234.333	Parisian lines.
The span	. 117.166	"
The palm	. 39.055	"
The finger	. 9.7637	"
Common cubit	204.8	"
The span	. 102.4	"
The palm	. 34.133	"
The finger	. 8.533	"

The two sets of measures—one for dry, another for liquid things—rest on the same system, as appears from the equality of the standard for dry goods, namely the ephah, with that for liquids, namely bath. The difference in the names is merely accidental. **הוֹמֶר** (homer), denoting a heap, is the name for the largest measure of dry goods (Lev. xxvii. 16; Num. xi. 32; Ezek. xlv. 11). In later times the homer was replaced by the cor (Ezek. xlv. 14), which is found among the Hellenists in the form *kópos*. In Hosea iii. 2,

the **לֶחֶם**, 'half-homer,' is mentioned, which the Seventy render by *ἡμικόπος*, and the Vulgate by 'corus dimidius.' Another measure is **אֵיפָה**, which comes from an Egyptian root denoting 'to measure.' **סֵאָה**, found in the Septuagint, the N. T., and Josephus, under the form *σάρον*, is of uncertain origin. The Seventy translate it sometimes by simply *μέτρον*, 'measure' (Gen. xviii. 6), and the dual form by *διμέτρον* (2 Kings vii. 1). **עוֹמֶר**, in its derivation and meaning resembles **הוֹמֶר**, but denotes a much smaller mass. **קֶבֶץ** (cab), the hollow, the bowl, was adopted by the Greeks as *káβos*. These are measures for dry goods. We now pass on to liquid measures. **בַּת** is from a root which denotes 'to determine,' 'to measure.' It is put in relation to the homer in Ezek. xlv. 11, 14; whence we learn that the bath was applied to fluids. **הֵין** is retained by the Seventy in the forms *εἷν*, *εῖ*, *εῦ*. The word is of Egyptian origin. **לֹג** (log) is a word found only in the Mosaic law regarding the cleansing of the leper (Lev. x. 12, 'the log of oil'). It is referable to an Arabic root which denotes 'to press into,' The feminine form is found in the Syriac, with the meaning of bowl. Log had the same import as cab.

In order to determine the relations between these measures, we take the ephah and bath, which in Ezek. xlv. 11 are declared to be of one measure. They each contained the tenth part of a homer (Ezek. xlv. 11, 14); thus the relation of the homer to the bath and the ephah belongs to a decimal division (Exod. xvi. 36).

The Seah, *μέτρον*: the translation given by the Septuagint of the Hebrew in Exod. xvi. 36 is as follows:—*τὸ δὲ γομὸρ τὸ δέκατον τῶν τριῶν μέτρων ἦν*,—'the homer is the tenth part of three measures, ( $\frac{3}{10}$ ). With the Septuagint and the Targum the ephah was equal to three seahs (comp. Matt. xiii. 33, *σάρα τρία*, with Gen. xviii. 6, and Jerome on the former place). The same relation is derived from a passage in Josephus (*Antiq.* ix. 4. 5), where the contents of the seah are given as one Italian modius and a half, for the modius held sixteen sextarii, and the ephah, according to Josephus, seventy-two sextarii; a modius and a half is, therefore, the third part of the ephah. The Rabbinists entirely concur in these views. The cab, according to Josephus (*Antiq.* ix. 4. 4; comp. 2 Kings vi. 25), is equal to four xestæ, for one-fourth of a cab he translates by *ξέστης*, seventy-two of which make a *μετρητής*, a measure; eighteen cabs then make an ephah, and six a seah. In the same way the Rabbinists determine the proportion of the cab to the seah (comp. the passage in Leusden, *Phil. Mixtus*, p. 205). There remain the hin and the log. The hin, according to Josephus (*Antiq.* iii. 9. 4), is an old Hebrew mass, which contained two Attic *χόες*, of which twelve went to the Attic me-

tres; therefore the hin is the sixth part of the bath. The log, according to the Rabbinists, is the twenty-fourth part of the seah, consequently the seventy-second part of the bath, and the twelfth part of the hin (comp. Leusden, *Phil. Mixtus*, p. 207).

There are two divisional systems found in these measures: 1. A decimal; and 2. A duodecimal, thus:—

Homer . . .	1
Bath and ephah	10
Gomer . . .	100

By putting together the measures for dry and those for liquid articles, we obtain the duodecimal division:—

Ephah or Bath	1
Seah . . .	3
Hin . . .	6
Cab . . .	18
Log . . .	72

Here all the numbers are divisible either by twelve or by submultiples of twelve. Such a duodecimal arrangement is found in the cubic measures of the Greeks and Romans. Hence the three systems give and receive support.

We will now exhibit all these measures in relation to the greatest, the homer:—

Homer . . .	1
Bath and Ephah	10
Seah . . .	30
Hin . . .	60
Gomer . . .	100
Cab . . .	180
Log . . .	720

The duodecimal is the original principle, the decimal system being introduced only to bring the two methods into harmony. The homer did not at first form a part of the Hebrew system (Ezek. xlv. 11).

For the actual size of these measures we must refer to Josephus, of whom Theodoret (*In Exod.* xxix.) says: *πιστευτέον δὲ ἐν τοῖσις τῷ Ἰωσήφ ἀκριβῶς τοῦ ἔθνους τὰ μέτρα ἐπισταμένῳ*,—'follow in these things Josephus, who well understood the measures of the nation' (comp. *Antiq.* viii. 3. 8). To the homer or cor Josephus ascribes (*Antiq.* xv. 9. 2) twelve Attic medimni, where the reading should be metretæ. Bath and Ephah are the same. Josephus (*Antiq.* viii. 2. 9) determines each at seventy-two xestæ, and makes them equal to an Attic metretes. The saron is twenty-four sextarii; the hin is twelve sextarii; the gomer, the tenth part of the ephah, must hold seven and one-fifth sextarii; the cab is equal to four xestæ. On the log Josephus gives no information; as the fourth part of the cab, it held a xestes. The Attic metretes, which corresponded with the Hebrew bath and ephah, contains 739,800 Parisian grains of rain-water, which would fill a space of about 1985 Parisian cubic inches. Thus we come to the following table:—

SIZE.	WEIGHT IN WATER.
Par. cub. in.	Par. gr.
Homer 19857.7	7,398,000
Ephah 1985.77	739,800
Seah 661.92	246,600
Hin 330.96	123,300
Gomer 198.577	73,980
Cab 110.32	41,100
Log 27.58	10,275

Böckh has proved that it is in Babylon we are to look for the foundations of the metrological systems of the ancient world; for the entire system of measures, both eastern and western, must be referred to the Babylonish foot as to its basis. Here is the root of the original system, and of the individual systems which sprang from the original one. This important fact, ascertained and established by Böckh, has been investigated and confirmed by an independent inquirer of the highest authority—viz. K. O. Müller. Not only the metrological system, but with it other knowledge went westward from Babylon. This metrological system bears traces of having proceeded from the hands of Babylonian astronomers. The ancient world was dependent for its astronomy on Babylon. Herodotus (ii. 101) says that the Greeks borrowed the division of the day into twelve parts from the Babylonians, calling to mind the duodecimal division which we have spoken of. The Zodiac too is of Asiatic, Ideler holds of Babylonian origin; but recent investigations have shown a striking agreement between the astronomy of the Babylonians and the Chinese, to say nothing of other nations in the farther east (Ideler, *Über die Zeitrechnung der Chinesen*, etc., Berlin 1839; Biot, *Journal des Savans*, Dec. 1839, Jan. and May 1840; *Göttingen Gel. Anzeigen*, 1840, p. 201, seq.) Of this common knowledge several considerations concur in referring the origin, not to the Chinese, but to the Babylonians. Hence Babylon appears as the land which was the teacher of the east and the west in astronomical and mathematical knowledge, standing as it were in the middle of the ancient world, and sending forth rays of light from her two extended hands. Palestine could not be closed against these illuminations, which in their progress westward must have enlightened its inhabitants, who appear to have owed their highest earthly culture to the Babylonians and the Egyptians.

WELL. [WATER.]

WELLS, EDWARD, D.D., was educated at Westminster School and at Christ Church, Oxford, where he took his degree of M.A. in 1693. He commenced D.D. in 1704. He was rector of Blechley, Buckinghamshire, and Cottesbach, Leicestershire. He died in 1724. Besides some smaller works, he published two which were long held in high esteem, and are still not without their value: *A help to the more easy and clear understanding of the Holy Scriptures*, 8 vols. 4to, being a revised translation of the Bible, with a paraphrase and annotations; and *An Historical Geography of the O. and N. T.* 1711, 4 vols 8vo; 1804, 4to;

1828, 2 vols. 12mo. He wrote also a work on the book of Daniel, Lond. 1716, 4to.—W. L. A.

WEMYSS, THOMAS, was born in 1772 in London, though his parents belonged to Scotland, and were only on a visit to the metropolis at the time of his birth. He was educated at the High School and University of Edinburgh, and was engaged there for some time in private tuition. Among those whom he taught were the Messrs. Haldane, whom he instructed in Greek. He was afterwards for some time classical tutor in the Theological Academy which they instituted. Soon after this he removed to York, and thence to Darlington, at the latter of which places he died in 1841, after many years of useful labour in the work of tuition. He is known to Biblical scholars by several works of learning and ability. 1. *Biblical Gleanings*, York, s. a.; 2. *Clavis Symbolica, or Key to the Symbolical Language of Scripture*, fol. xxvi. of the 'Biblical Cabinet'; 3. *Job and his Times, or a Picture of the Patriarchal Age*, London 1839. At his death he left in MS. a work in which he sought to do for the book of Daniel what he had done for the book of Job. The excellence of the latter makes one hope that the former may be given to the public.—W. L. A.

WESSELY, HARTWIG, or *Naphtali Herz*

*Wessel* (נפתלי הירץ וויזל, abbreviated נ"ה), one of the most distinguished Hebraists of the eighteenth century. He was born at Amsterdam in 1725, and derived his name from the fact that his ancestors came from Wesel or Wessel. His parents went to live at Copenhagen when he was quite a youth, and being pious Jews, they sent him to a Talmudic school at the age of six. So great were his natural endowments that he could translate sundry portions of the Talmud without any aid at the age of nine, and had the most perfect mastery of the Hebrew language at the age of seventeen (1742). Having also acquired the knowledge of other languages, he devoted himself at this early period to the study of the Scriptures, and made a Hebrew translation of the Book of Wisdom, accompanying it by a most elaborate commentary entitled *The Spirit of Grace* (רוח הן). This maiden production of Wessely, though not published till 1777, shows the extraordinary grasp which he had of almost all departments of literature and science. It is a pattern of Hebrew composition, resembles the classical language of the O. T., and abounds with valuable criticism on the sacred language, and especially on its synonyms. Wessely afterwards went to Amsterdam, where, though engaged in business, he devoted all his spare time to the elucidation of the Hebrew Scriptures, and the reformation of his co-religionists. As a result of his labours, he published two volumes of his gigantic work on the synonyms of the Hebrew language,

called *Lebanon* (לבנון), under the special title of

*A Closed Garden* (גן נעול), in allusion to Song of Songs iv. 12, Amsterdam 1765-6. The first volume (חדרים) consists of 10 sections (הבית הראשון), subdivided into 120 chapters, and contains a most elaborate philological and psychological disquisition on the signification and development of the root חכם, as well as a treatise on a portion of the Mosaic law. It is preceded by an extensive introduction, entitled *The Entrance into the Garden*

(מבוא הַנֵּן), in which the plan of the work is set forth, and specimens of Hebrew synonyms are given. The second volume (הַבֵּית הַשֵּׁנִי) consists of 13 sections (חֲדָרִים), subdivided into 180 chapters (חֲלוֹנוֹת), and gives in a most learned manner a philosophico-traditional explanation of all the passages of the O. T. in which either the word **הַמֶּזֶק** or its derivatives occur. It is likewise preceded by an elaborate introduction (הַנֵּן), wherein those words are explained which constitute mixed forms. The work is invaluable for its definitions of Hebrew words, especially the technical expressions, as well as for its tracing the connection between the Mosaic law and the traditional explanations thereof. A second edition of it was published in Vienna 1829, and a third in Warsaw 1838. Wessely returned to Copenhagen in 1769, and went to Berlin in 1774, where he became most intimate with Mendelssohn, the great philosopher, and reformer of modern Judaism [MENDELSSOHN]. Here he continued, amid circumstances of extreme penury, to issue his valuable contributions to Hebrew literature, and published a commentary on the important tractate of the Mishna called *The Sayings of the Fathers* (פְּרָקֵי אֲבוֹת), under the title

*The Wine of Lebanon* (יַיִן לְבָנוֹן), Berlin 1775, which not only sets forth the opinions and doctrines prevalent in the time of Christ, but contains valuable remarks on the synonyms of the Hebrew language. Here too he also published (1777) his maiden work on the Wisdom of Solomon, and a commentary on Leviticus (בְּאוֹר לְסֵפֶר וִיקְרָא), 1782, which forms part of the commentary to Mendelssohn's German translation of the Pentateuch [MENDELSSOHN]. Wessely returned to Hamburg in 1804, where he died March 23, 1805. The chief work of Wessely, however, on the Hebrew synonyms, entitled *A critico-philosophical Hebrew Lexicon*, has not as yet been published. Euchel printed an extract of it in the Hebrew *Essays and Reviews*, called הַמֵּאֲסֵפֶה, *The Gleaner*, vol. iii. appendix i. p. 3-38, reprinted in the *Bikkure Ha-Itim*, iii. pp. 70-76. A German translation of an extract from the Hebrew original by Euchel was published in the same *Essays and Reviews*, vol. ii. pp. 69-76, 85-87; comp. Meisel, *Leben und Wirken Wessely's*, Breslau 1841; Jost, *Geschichte des Judenthums*, iii. 307, ff., Leipzig 1859; Geiger, in *Zeitschrift der deutschen morgenländischen Gesellschaft*, vol. xvii. 321, ff., Leipzig 1863; Fürst, *Bibliotheca Judaica*, iii. 507-509.—C. D. G.

WEST (מַעֲרָב, בּוֹא הַשֶּׁמֶשׁ, יָם, אַחֲרֵי). The Shemite, in speaking of the quarters of the heavens, etc., supposes his face turned towards the east; so that the east is before him, קֵדָם, strictly what is before, or in front; the south on his right hand, דְּרֹמָה, strictly what lies to the right; the north is on his left hand, שְׂמוֹאל, the left side; and the west behind him, אַחֲרֵי, literally the hinder side. The latter Hebrew word, though never translated 'west' in our version, means so: as in Is. ix. 12, 'the Philistines behind,' opposed to the Syrians, קֵדָם; Sept. ἀφ' ἡλίου δυσμῶν; Vulg. ab occidente; and in Job xxiii. 8. The words (Deut. xi. 24), 'the uttermost sea,' הַיָּם הַזֶּה, are rendered in Sept. ἡς τῆς θαλάσσης τῆς ἐπὶ δυσμῶν; Vulg. ad mare occidentale (comp. xxxiv. 2; Joel ii. 20). The more general use of

the word אַחֲרֵי for the west was doubtless superseded among the inhabitants of Palestine by יָם, literally 'the sea,' that is, the Mediterranean Sea, which lay to the west, and which, as a more palpable object, became to them the representative of the west generally, and chiefly associated with their ideas of it. Accordingly this word יָם, and its derivatives יָמָה, etc., are thirty-two times rendered by θάλασσα in the Sept., and only once by δυσμα: in the Vulgate, by occidentis and mare. It is used to signify a quarter of the heavens, or of the earth (Gen. xxviii. 14; Deut. xxxiii. 23; 1 Kings vii. 25; 1 Chron. ix. 24; 2 Chron. iv. 4; Is. xi. 14; xlix. 12; Ezek. xlviii. 1; Hos. xi. 10; Zech. xiv. 4). It is used adjectively in the same sense; as, west border (Num. xxxiv. 6; Josh. xv. 12; Ezek. xlv. 7); western (Num. xxxiv. 6); west quarter (Josh. xviii. 14); west side (Exod. xxvii. 12; xxxviii. 12; Num. ii. 18; xxxv. 5; Ezek. xlviii. 3-8, 23, 24); westward (Gen. xiii. 14; Num. iii. 23; Deut. iii. 27; Ezek. xlviii. 18; Dan. viii. 4); west wind (Exod. x. 19). Those words of Moses, 'Naphtali, possess thou the west and the south' (Deut. xxxiii. 23), seem to contradict the statement of Josephus, that this tribe possessed the east and the north in Upper Galilee (*Antiq.* v. i. 22); but Bochart interprets 'the south,' not with regard to the whole land of Canaan, but to the Danites, mentioned in ver. 22; and by 'the west' he understands the lake of Tiberias, or Galilee, or Gennesaret; for the portion of Naphtali extended from the south of the city called Dan or Laish, to the Sea of Tiberias, which was in this tribe. So all the Chaldee paraphrasts expound the word יָם, here translated *west*; Sept. θάλασσαν καὶ Λίβα; Vulg. mare et meridiem (*Hierozoic.* pt. i. lib. iii. c. 18). In some passages the word signifies the coasts of the Mediterranean Sea, and 'the islands of the sea' denotes the western parts of the world, or European nations. Thus, in regard to the future restoration of the Jews to their own land, it is said (Hosea xi. 10), 'when the Lord shall roar, then the children shall tremble (that is, hasten; an allusion to the motion of a bird's wings in flying) from the west' (see ver. 11, and comp. Is. xxiv. 14, 15, with Is. xi. 11, xxiv. 14). In the account given of the removal of the plague of locusts from Egypt, we are told (Exod. x. 19), 'the Lord turned a mighty strong west wind,' רוּחַ יָם, ἀνεμὸν ἀπὸ θαλάσσης. Supposing that these were the very words of Moses, or a literal rendering of his words, it follows that the Egyptians made a similar reference to the Mediterranean, since Moses, an Egyptian, would no doubt use the language of his country in describing an event which occurred in it. If his words do not refer to the Mediterranean, they must refer to the far distant Atlantic, which, however, according to Herodotus, was not known to the Egyptians till many ages afterwards. Moses also represents God as saying to Abram, *in the land*, 'Lift up thine eyes and look northward, and southward, and eastward, and westward,' יָמָה (Gen. xiii. 14). The allusion to the sea in the latter passage may be accounted for, upon the supposition that the very words of God to Abram had been preserved, and were inserted by Moses in his history. In two passages (Ps. cvii. 3; Is. xlix. 12) מֵיִם stands opposed to כִּנְצָפֹן, but ought still to be rendered 'the west;' comp. Amos viii. 12; Deut. xxxiii. 23. The

west is also indicated by the phrase ארץ מבוטא, ארץ מבוטא, de terra occasus solis. These words are translated 'the west country' in Zech. viii. 7—literally, the country of the going down of the sun, and are fully translated in Ps. l. 1; cxlii. 3; Mal. i. 11; comp. Deut. xi. 30; Josh. i. 4; xxiii. 4. Another word by which the west is denoted is מערב, from ערב, to remove, pass away, disappear as the sun does; hence the quarter of the heavens, etc., where the sun sets, the west. The same idea is conveyed in the Greek word δσμαλ, from δσω. It occurs in 1 Chron. xii. 15; Ps. lxxv. 6; ciii. 12; cvii. 3; Is. xliii. 5; xlv. 6; lix. 19; Sept. δσμαλ; Vulg. occidens. In Dan. viii. 5, Αίψ, occidens. It is used to denote the west quarter of the heavens or earth. In the Apocrypha and N. T. the word translated 'west' invariably corresponds to δσμαλ (Judith ii. 19; Matt. viii. 11; xxiv. 27; Luke xii. 54; xiii. 29; Rev. xxi. 13); Vulg. occidens, occasus. Our Lord's memorable words, 'They shall come from the east and the west,' etc. (Matt. viii. 11), to which Luke adds 'and from the north and the south' (xiii. 29), signify all the regions of the world; as in classical writers also (Xen. Cyr. i. 1. 3). Grotius thinks that this passage refers to the promise to Jacob (Gen. xxviii. 14). In our Lord's prediction of the destruction of Jerusalem by the Romans (Matt. xxiv. 27)—'For as the lightning cometh out of the east and shineth even unto the west, so also shall the coming of the Son of man be'—he is supposed to have intimated the precise direction in which the Roman army conducted the invasion. His reference to the cloud, τὴν νεφέλην, rising out of the west, as the precursor of a shower (comp. 1 Kings xviii. 43-46), still corresponds to the weather in Palestine. Volney says: 'L'ouest et le soud-ouest, qui règnent (en Syrie et Palestine) de Novembre a Février, sont, pour me servir de l'expression des Arabes, les pères des pluies'—The west and south-west winds, which in Syria and Palestine prevail from November to February, are, to borrow an expression of the Arabs, the fathers of showers (Voyage en Syrie, tom. i. p. 297; Shaw's Travels, p. 329).—J. F. D.

WETSTEIN, JOH. JAC., born at Basle 5th March 1693, began his career as assistant and diakonus at the Leonhards-Kirche, Basle; but being deposed from his office in 1730, he went to Holland, where he became professor of philosophy and church history in the Remonstrant Gymnasium at Amsterdam. He rendered material help to Biblical study by his edition of the Greek N. T., 2 vols. fol., Amst. 1751-52 [CRITICISM, BIBLICAL]. The Prolegomena to this work, first published in 1730, then in a more perfect state prefixed to the work itself, were again edited separately by Semler, Hal. Sax. 1764. Wetstein died 22d March 1754.—W. L. A.

WETTE, WILH. MARTIN LEBERECHE DE, D.D., was born 12th January 1780, at Ulla, near Weimar. He was educated at Weimar and Jena; and a powerful influence on his mental habits and bent of opinion was exerted by early intercourse with Herder, Griesbach, and Paulus. In 1807 he became extraordinary professor of theology at Jena; in 1809 he was appointed ordinary professor of theology at Heidelberg; thence he went, in 1810, to Berlin. Having come under the censure of the

government for writing a letter of sympathy to the mother of Sands, the murderer of Kotzebue, he was, in 1819, dismissed from his professorship, and banished from the Prussian dominions. He betook himself to Basle, where he was appointed professor of theology in 1821; and here he remained till his death, which took place 16th June 1849. Few men have exerted a more powerful influence on modern theology in Germany than De Wette. His learning, his vigour, his acumen, his boldness, his versatility, and his unwearied assiduity, conspired to give him a powerful hold over educated men of all classes. He commenced his career as an adherent of the destructive school of criticism, and to the last he was in criticism very much of a sceptic. But along with this he was as an interpreter singularly fair as well as learned and acute, so that his exegetical works possess the highest value. The works by which he is best known are: *Lehrbuch der Einleitung in die Büch. A. und N. T.*, Berl. 1817, 2 vols., of which the 6th edition is in circulation; *Lehrbuch der Hebr. Jüd. Archäologie*, Leipz. 1814, which has also passed through several editions; *Die Heil. Schrift. des A. u. N. T. übersetzt*, Heidelb. 1831, several editions; *Commentar üb. die Psalmen*, Heidelb. 1811, 4th ed. 1836; *Kurzfass. Exegetisch. Hdbuch. zum N. T.* 1836-1848, several editions. On his merits as an expositor, see COMMENTARY.—W. L. A.

WHALE. [TANNEEN.]

WHEAT. [CHITTAH.]

WHIRLWIND. [WINDS.]

WHISTON, WILLIAM, born 1667, died 1752. He was educated at Cambridge, where he was admitted at Clare Hall in 1686, and was elected fellow in 1693. He became vicar of Lowestoff in 1698. He succeeded Sir Isaac Newton as Lucasian professor of mathematics at Cambridge, but having embraced Arian views, he was deprived of his professorship, and expelled the university. He removed to London, where he died. A man of great attainments, of vigorous intellect, and restless activity, he marred his usefulness by his eccentricity of thought, and the unsettledness of his opinions. Among his Biblical writings may be named, *A short view of the Chronology of the O. T. and of the Harmony of the Four Evangelists*, 4to Cam. 1702; *An Essay on the Revelation of St. John, so far as concerns the past and the present times*, 4to, ibid. 1706; *The Accomplishment of Scripture Prophecies, being the Boyle Lecture for 1707*, ib. 1708; *An Essay towards restoring the true text of the O. T., and for vindicating the citations therein made in the N. T.* Lond. 1722, with Supplement, 1723; *The Sacred Hist. of the O. and N. T.* 6 vols. 8vo, 1745; *The Primitive N. T.* 1745.—W. L. A.

WHITBY, DANIEL, D.D., was born at Rushden or Rusden, Northamptonshire, in 1638. He was educated at Oxford, and obtained a fellowship in 1664. He became a prebendary of Salisbury in 1688, and chanter, and was also rector of St. Edmunds in that city. He died in 1726. He was a man of learning and acumen, and as an expositor is distinguished by the clearness with which his views are stated, and the precision with which he seeks to determine the sense of the passage [COMMENTARY]. His principal work is his *Paraphrase and Commentary on the N. T.*, 2 vols. fol., 1703,

often reprinted. His theological views were Arminian, with a leaning towards Arianism, which in his later years became more decided.—W. L. A.

WHITE, JOSEPH, born at Gloucester in 1746, and died at Oxford in 1814. He was educated at Oxford, where he became a fellow of Wadham College, and in 1775 was appointed professor of Arabic. He was afterwards regius professor of Hebrew, and was also canon of Christ Church, prebendary of Gloucester, and rector of Melton in Suffolk. He was one of the most eminent Oriental scholars of his day. Besides his famous *Bampton Lecture*, we owe to him an admirable edition of the *Philoxenian Syriac version of the Four Gospels* from the Ridelean MSS. in the library of New College, Oxford, with an interpretation and notes, 2 vols. 4to, 1778. He edited also an edition of the *Greek N. T.*, with the various readings approved by Griesbach, 2 vols. 8vo, Oxon. 1798; and *A Diatessaron sive integra historia D. N. Jesu Christi Græce*, ibid. 1803. A useful compendium of the critical labours of Griesbach on the N. T. was furnished in his *Criseis Griesbach. Synopsis*, Lond. 1811.—W. L. A.

WICLIF. [WYCLIFFE.]

WIDOW (יָתוּמָה, *χήρα*). Though no special provision for widows is prescribed by the Mosaic law, that law regards them with a kindly aspect. They are to share in the religious feasts (Deut. xvi. 11, 14); they are to have part with the Levite, the stranger, and the fatherless in the tithes of the increase of the land each third year (Deut. xiv. 29; xxvi. 12); and if a sheaf is by oversight left in the field in harvest, it is to be for the widow and fatherless, as are the gleanings of the olive-tree and the vineyard (Deut. xxiv. 19-21); the widow's garment is not to be taken in pledge (Deut. xxiv. 17); and in general they were to be treated with equity and generosity as under the special protection of God (Gen. xxii. 22; Deut. xxvii. 19; comp. Ps. xciv. 6; Is. i. 17; Jer. vii. 6; Ezek. xxii. 7; Zech. vii. 10; Mal. iii. 5). With regard to the law for the remarriage of a widow by the brother of her deceased husband, see MARRIAGE.

In passing from the O. T. to the N. one is struck with the fact that the number of widows in connection with the apostolic churches seems to have been disproportionately large as compared with the probable number among the Jews in former times, or with the average number in any community at any time. What makes this more remarkable is that the multiplicity of widows among the Christians was as sudden as the multiplication of disciples, and simultaneous with it (comp. Acts vi. 1). On this subject we have been favoured with the following remarks by a friend:—

'A sudden increase of ordinary poverty, along with a sudden increase of disciples, would be quite natural and explicable; but that as soon as there was a multitude of disciples there should also be a multitude of widows, before the rise of deadly persecution or famine, and before death, in the ordinary course of events, could diminish the disciples, seems strange indeed. Still stranger and more significant is the fact that this widowhood was female only, and that it appears to have been a common and customary feature of the early churches. At Joppa, about four or five years after the day of Pentecost, the excellence of Dorcas

was evinced in the clothing of widows, who wept as they showed her work to Peter, and to whom, with the saints, he presented her alive. This class of persons must have been numerous when Paul thought it necessary to couple them specifically with the unmarried in his instructions to the Corinthians respecting marriage. To this peculiarity of number and increase must be added the apostle's peculiar distinction between 'widows' and 'widows indeed,' and the relationship which he intimates between widows and a man or woman that believes (1 Tim. v. *passim*). We are not aware that any satisfactory attempt has ever been made to account for these peculiarities of early ecclesiastical widowhood. Our own attention was first drawn to it by the personal observation of facts in the mission-field, which appeared to illustrate the whole subject, and to suggest the true interpretation of Paul's language to Timothy concerning widows, as well as to solve the vexed question of the continued polygamy of converted heathens.

'We believe that by 'widows indeed' the apostle means widows by the decease of their husbands—widows in the ordinary way common to all lands and ages; and that, as distinguished from these, he intends by 'widows' (the widows of believers) to denote *the repudiated wives of converted polygamists*. Such women were in a state of widowhood, and yet they were not widows indeed, because their late husbands were still alive. When a polygamist, either Jew or Gentile, became a Christian, and found that 'one wife' was the law of Christ's house, for the sake of 'a godly seed' (Mal. ii. 15), he had to select one and put away the rest of his two or more wives. The multiplication of disciples, therefore, among Jewish or Gentile polygamists, was the multiplication of widows; and the proper treatment and care of such widows was the first perplexing question of the church, occasioning the appointment of deacons, and grew to such dimensions by the conversion of Gentile polygamists and the consequent increase of widows by divorce, that Paul found it necessary to dispose of the question for ever by his instructions to Timothy. 'Widows' simply are widows by divorce; 'widows indeed' are widows by death. In the first church in Jerusalem it was sufficient to provide for their wants by daily diaconal ministration; but in other churches, where such ministration did not obtain, it became an important question of ecclesiastical economy how such persons were to be suitably provided for. The Oriental seclusion of females, which excluded them from all sorts of business as means of support, greatly enhanced or practically created the difficulties of the question, which seldom or never occurs in the history of modern missions, because their sphere very slightly touches as yet the region of Oriental womanhood. In the destined extension, however, of the Christian religion in the East, the recurrence of the question is certain; and both to provide for it by ascertaining the apostolic canon, and to contribute to N. T. exegesis, cannot be deemed an irrelevant or trivial task.

'A 'widow indeed' (that is, by the husband's death) the apostle justly and emphatically describes as 'desolate,' as trusting in God and continuing in supplications and prayers night and day; and such he commands to be 'honoured.' Concerning 'widows' (that is, by the husband's divorce) he gives sundry instructions, which, when carefully

and critically considered, will be found coincident with widowhood by divorce, and in contradistinction to widowhood by death. Our chief concern at present for explaining the apostle's distinction of widowhood, and to account for its prevalence, is with the 16th verse: 'If any man or woman that believeth have widows, let them relieve them, and let not the church be charged; that it may relieve them that are widows indeed.' What is meant by a believing man or woman having widows, so as to be under obligation to relieve them, while the relief of 'widows indeed,' but not of 'widows,' properly devolves on the church? We found the answer to this question in the position and conduct of a converted polygamist in Jamaica, who, on his conversion, repudiated all his wives but one, and provided for the divorced ones according to his ability. 'What are all those cottages for?' was asked, pointing to a number that encircled the owner's dwelling. 'These,' said our informant, who knew the man and the neighbourhood well, 'are the dwellings which the proprietor has given to his divorced wives.' This was a flash of light on the apostle's words, and a revival of what must have often occurred, in substance at least, in apostolic times. Here was a believing man that had widows, whom he relieved according to his ability, that the church should not be charged, and that the church's funds might be expended on 'widows indeed.' The pure spirit of Christianity prohibited his plurality of wives; and its equitable and benevolent spirit would not allow him to consign to want and misery the persons with whom he had contracted a life-long relationship, or to charge their maintenance on others, and take away the support of the truly desolate and necessitous.

'When such a man died, the obligation to relieve the surviving 'widows' descended with his property, agreeably to the maxim that 'property has its duties as well as its rights.' If his wife (now a 'widow indeed') inherited, she immediately answered the apostle's description: 'If any woman that believeth have widows.' Or, if a believing daughter inherited, she also answered to this description. If a believing son inherited, he, like his father, in the matter of obligation stood forth as a believing man that had widows. And thus the whole question of providing for the divorced wives, the widows by divorce, among Christian men, was ruled and settled. They must not be neglected; they must not burden the church; they must not touch the maintenance of widows indeed; they must be provided for by the man that had undertaken to maintain them, and whose engagement for maintenance was not to be cancelled by the godly rule of one wife, or by his heirs.

'In the settlement of the question of divorced women's support is involved the previous question of continued polygamy. 'One wife' is the law of the house. Polygamy was not 'in the beginning,' and cannot be tolerated by Christ's 'perfect law.' What was 'winked at' in 'the times of ignorance' must not be practised or permitted in the times of light. Missionaries to the heathen should insist on the repudiation of every wife but one by a converted polygamist, and on the complementary process of maintaining the divorced, so long as these abstain from a second marriage and need support, and so far as the man's ability to support them extends.

'But what of divorced women in the church (for

such there might be), without any such claim on a man or woman that believeth? The men who divorced them might be unconverted and utterly regardless of equitable claims. In this case the apostle says: If they are threescore years old, and of good repute, let them be taken into the number or list of the church's recognised widows, for maintenance or employment, or both; if younger, let them marry.

'No qualification of age appears to be required for the admission of a 'widow indeed' into 'the number.' She was desolate and devout, and was entitled to 'honour,' including church maintenance, if she needed it. But if she belonged to a Christian family, she was entitled to her maintenance in it; for 'if any provide not for his own, and specially for those of his own house, he hath denied the faith and is worse than an infidel.'

'It is not necessary for the purpose of this exposition to consider the position and employment of recognised or registered widows in the early churches. Macknight thinks they were 'teachers of the young.' They might also be the appointed dispensers of the church's hospitality, in an age when public places of entertainment were unknown, and when flight from persecution demanded the special sympathy and hospitality of believers. The apostle's statement of the qualifications of registered widows coincides with both these functions: 'Let not a widow be taken into the number under sixty years old, having been the wife of one husband [that is, not a divorced woman remarried]: borne witness to for good works; that she hath brought up children, that she hath lodged strangers, that she hath washed the saints' feet [as a part of hospitality], that she hath relieved the afflicted [and expressed her fitness to show kindness to Christians in their flights or journeys], that she hath diligently followed every good work.' The unfitness of younger widows for such work is also apparent. 'But the younger widows reject: for when they cannot endure Christ's rein [when they cannot endure that restraint to which they have subjected themselves for Christ's sake] they will marry; incurring condemnation because they have put away their first fidelity. And at the same time also they learn to be idle, wandering about from house to house; and not only idle but tattlers also, and meddlers, speaking things which they ought not. I command therefore young widows to marry, to bear children, to govern the house, to give no occasion to the adversary for reproach. For already some are turned aside after Satan' (Macknight's *Translation of 1 Tim. v. 9-15*).—J. G. M.'

WIFE. [MARRIAGE; WOMAN.]

WILDERNESS. [DESERT.]

WILKINS, DAVID, D.D., was successively keeper of the Episcopal library at Lambeth, rector of Mongham-Parva, and Great Chart and Hadleigh, and rector of Monk's Ely. He was also a prebendary of Canterbury and archdeacon of Suffolk. He died in 1745. He published *Paraphrasis Chald. in libb. Chronicorum, auctore R. Josepho, e MS. Cantab. descripta, ac cum vers. Lat. in lucem missa*, 4to, Amst. 1715; *Nov. Test. Egypt. vulgo Copticum e MSS. Bodleianis descript.*, Oxon. 1716. He issued also a collection of the *Concilia Magnæ Britanniae et Hiberniæ*, a A.D. 446 ad A.D. 1717, 4 vols. fol., Lond. 1721.—W. L. A.

WILLET, ANDREW, born at Ely 1562, died 1621, was educated at Cambridge, where he obtained a professorship; became a prebendary of Ely about 1598; and was also rector of Childerley and of Borley. He was a learned and laborious writer. He published commentaries on several works of Scripture, under the title of *Hexapla*, in which six translations are compared and a sixfold exposition is given. He thus issued *Hexapla on Genesis*, Lond. 1605; on *Exodus*, ib. 1608; on *Leviticus*, ib. 1631; on *Daniel*, 1610; and on *Romans*, 1620; also a *Harmony on the Books of Samuel*, on the same plan, but more abridged. All these are valuable for their erudition and copiousness of matter; but they are somewhat prolix and not always judicious. Willet wrote also an enormous work of 1300 pages folio on the Popish controversy, entitled *Synopsis Papismi*, Lond. 1634, 2d ed., 10 vols. 8vo, ib. 1852.—W. L. A.

WILLOW. [OREB; TSAPHTSAPHA.]

WILLOWS, BROOK OF THE (נַחַל הָעֲרָבִים), a stream mentioned Is. xv. 7. The versions differ in their rendering of the original; some (LXX. Syr. Arab.) making it *brook of the Arabs*; others (Vulg. Luth. A. V.) *brook of the willows* or *willow-brook*. Ewald, Hitzig, Maurer, Knobel, and others take עֲרָבִים here = עֲרֻבֹת, and render *brook of the deserts*. The legitimacy of this is doubtful, as there is no instance of the word being so used in the masc. form; but if it be admitted, we may identify the river or brook of Isaiah with the נַחַל הָעֲרָבָה, *nachal ha-arabah*, of Amos vi. 14. In this case there can be little doubt that the stream which at its upper part is called *Wady el-Ahsa* (*brook of the sandy plain*), and at its lower part *W. es-Sâfieh*, is the stream intended. This flows into the Dead Sea near its south-eastern extremity, and would form the natural division between Moab and Idumæa. This wady lies in the direction which Isaiah represents the fugitives as taking, and would be a boundary beyond which they would very naturally carry what they had been able to rescue from the invader. (See Burckhardt, *Trav. in Syria*, p. 441; Robinson, *Bib. Res.* ii. 594-600; Pusey, *Minor Proph.* p. 209).—W. L. A.

WILLS. [INHERITANCE.]

WILNA, ELIJAH, also called the *Pious* (הַחֲסִיד). This remarkable Hebraist and commentator, who endeavoured to produce a reformation among the Jews in Poland at the same time that Mendelssohn and Wessely were labouring to the same effect in Germany [MENDELSSOHN; WESSELY], was born at Wilna 1720. His natural endowments were so extraordinary that when eleven years old he was not only a thorough Hebraist, but unravelled the mysteries of the Kabbalah [KABBALAH], and was master of astronomy, geometry, grammar, etc.; and at the age of thirteen (1733) was appealed to as a great authority and teacher. In addition to his marvellous native powers he possessed a real love for learning, and great assiduity, as well as an independent fortune, and lived to be seventy-seven years of age (i.e. to 1797). It is therefore not surprising that up to the year 1760 he wrote the prodigious number of sixty volumes, in explanation of both the Scriptures and the traditional law, that he was visited by the Rabbins from far and wide as the oracle of the Jewish nation; that the year of his birth was described by the words of Malachi

VOL. III.

+

(iii. 23 Heb., iv. 5, Engl.), 'I am sending you Elijah' (שֶׁלַח לָכֶם אֵלִיהוּ)—i.e.  $\aleph + \delta + \lambda + 30 + \psi = 480$ , i.e. 1720, as the advent of Elijah, in allusion to his name; and that the year of his death was indicated by the ascension of Elijah (עֲלֹת אֵלִיהוּ)—i.e.  $16 + \eta + 5 + \iota + 10 + \lambda + 30 + \aleph + 1 + \tau + 400 + 16 + \lambda + 30 + \epsilon + 70 = 558$ , or 1797, in allusion to 2 Kings ii. 1, 11. Fifty-four of his works appeared between 1802 and 1854, and as it is beyond the limits of this notice to describe them all, we shall confine ourselves to those works which are more immediately connected with the Hebrew Scriptures and Biblical literature. These are as follows:—(1.) A commentary on the Pentateuch, entitled *The Mantle of Elijah* (אֲדָרַת אֵלִיהוּ), in allusion to 2 Kings ii. 13, and to his own name, first printed in the excellent edition of the Hebrew Pentateuch with the Great and Small Massora, the Chaldee Paraphrases, the commentaries of Rashi and Seforno, as well as with the critical apparatus of Norzi (מִנְחַת שִׁי), the commentaries on the Massora by Solomon Dobrowiner (מִנְחַת שְׁלֹמֹה), and his son Feivel Dobrowiner (מִנְחַת כְּלִיל), Dobrowina 1804, and again at Halberstadt 1859-60. The commentary on Leviticus was published separately, with the Hebrew text, Rashi's comment., etc., at Constantinople 1818. (2.) A commentary on Isaiah i.-xii., and Habakkuk, edited and supplemented by his grandson, Jacob Moses of Slonim, Wilna 1820, 2d ed. *ibid.* 1843. (3.) A commentary on Jonah, published, together with his explanations of Talmudic Agadas, Wilna 1800, and separately Prague 1803. (4.) A commentary on Proverbs, Sklov 1798, Prague 1815, and Warsaw 1838. (5.) A commentary on Job i.-vi., Warsaw 1854. (6.) A commentary on the Song of Songs, Prague 1811, Warsaw 1842. (7.) A commentary on Chronicles, Wilna 1820, *ibid.*

1843. (10.) A Hebrew Grammar (רִקְדוּק אֵלִיהוּ), Wilna 1833. (11.) A Topographical Description of Palestine, and a treatise on the Solomonic Temple (סֵפֶר צוֹרֵת הָאָרֶץ וְתַבְנִית הַבַּיִת), Sklov 1802. (12.) A commentary on the third or Ezekiel's Temple (תַּבְנִית הַבַּיִת הַשְּׁלִישִׁי), or on Ezek. xl.-xlvii., Berlin 1822 (comp. Jost, *Geschichte des Judenthums*, iii. 248, ff., Leipzig 1859; Fürst, *Bibliotheca Judaica*, iii. 516-521).—C. D. G.

WIMPLE. [VEIL.]

WIND, etc. (רוּחַ; Sept. πνεῦμα, ἀνεμος; Vulg. spiritus, ventus). The Hebrew word signifies *air in motion* generally, as breath, wind, etc. Both the Sept. words occur in the following definition of wind by Aristotle (*De Mundo*, c. 4, 9): "Ἀνεμος οὐδὲν ἐστὶ πλὴν ἀπὸ πύλιν βέωος, ὅστις ἀμα καὶ πνεῦμα λέγεται—"Wind is nothing else but a large quantity of air flowing, which is also called πνεῦμα." So also Plato has μεγάλην τῶν πνεύματι for a high wind (*Phædon*, sec. 24, edit. Forster). Josephus also uses πνεῦμα βίαιον for a violent wind (*Antiq.* xiv. 2, 2), as Lucian also does, βίαιον πνεύματι (*Ver. Hist.* lib. i. tom. i. p. 714). The Vulgate word *spiritus*, from *spiro*, 'to breathe,' 'blow,' is applied in like manner in Latin, as by Virgil (*Æn.* xii. 365). The Hebrew word is used—I. For the wind as a *natural phenomenon* (Gen. iii. 8; Job

4 B

xxi. 18; xxx. 15, 22; xxxvii. 21; Ps. i. 4; ciii. 16; Prov. xxx. 4; Eccles. i. 6; xi. 4; Is. vii. 2; xvii. 13; xl. 7; Jer. x. 13; li. 16; Amos iv. 13). It is poetically ascribed to the immediate agency of God (Ps. cxxxv. 7; cxlvii. 18; comp. Baruch vi. 61). In the N. T. it occurs in Matt. xi. 7; xiv. 24; Mark iv. 39; John iii. 8; Acts xxvii. 4; Eph. iv. 14; James i. 6; Rev. vi. 13; vii. 1. Throughout the N. T. the word is *ἀνεμος*, except in our Lord's illustration, John iii. 8. In the Apocrypha *ἀνεμος* occurs in Wisdom v. 14; xiii. 2, etc.; but *πνεῦμα* in xvii. 18; Eccclus. v. 9; xxii. 18; Song of the Children xxvii. 42. We might perhaps attribute the exclusion of the word *πνεῦμα*, for 'the wind,' from the N. T., to its having become almost entirely appropriated to 'heavenly things.' In Acts ii. 2, we have *πνοή*, translated 'wind'; Vulg. *spiritus*. It means the same in Homer (*Il.* v. 697), *πνοή* for *πνοή βορέαο*, 'the breath or blast of Boreas'; comp. Job xxxvii. 10, Sept. In Gen. iii. 8, 'the cool of the day,' or rather 'wind of the day,' indicates the evening, since in the East a refreshing breeze arises some hours before sunset; Vulg. *ad auram post meridiem*. Comp. Cant. ii. 17; iv. 6; where the words 'until the day break and the shadows flee away' should be rendered 'until the day breathe or blow' (*i.e.* till evening): Heb. *שִׁפּוֹחַ*; Sept. *διαπνεύσῃ*; Vulg. *aspiret*. The evening breeze is still called, among the Persians, 'the breeze of the day' (Chardin, *Voyage*, t. iv. p. 48). In Amos iv. 13, God is said to 'create the wind.' Although this idea is very conformable to the Hebrew theory of causation, which does not recognise second causes, but attributes every natural phenomenon immediately to the divine agency, yet the passage may perhaps be directed against the *worship* of the winds, which was common among ancient nations. Comp. Wisdom xiii. 2. Herodotus relates it of the Persians (i. 131). The words of our Saviour, 'a reed shaken with the wind' (Matt. xi. 7), are taken by some in the natural, and by others in a metaphorical sense. The former view is adopted by Grotius, Beza, Campbell, Rosenm., Schleusner, and Wetstein; and is confirmed, as Rosenmüller observes, by the antithesis of the rich man, whose magnificence all gladly survey. The comparison is adopted to reprove the fickleness of the multitude (comp. ver. 15, and Eph. iv. 14). 2. The wind occurs as the *medium of the divine interposition, or agency* (Gen. i. 2; viii. 1; Exod. xv. 10; Num. xi. 31; 1 Kings xviii. 45; xix. 11; Job i. 19; Is. xi. 5; Jonah i. 4). In the N. T. the wind was supernaturally employed at the day of Pentecost, like the 'sound' and 'fire' (Acts. ii. 3). Indeed our Lord's illustration (John iii. 8), and the identity of the Hebrew and Greek words signifying breath, wind, and spirit, lead to the inference, that the air in motion bears the nearest resemblance of any created object to divine influence, and is therefore the most appropriate medium of it [SPIRIT]. To this class of instances we refer Gen. i. 2, 'and the Spirit of God moved upon the face of the waters.' Along with Patrick and Rosenmüller we construe the phrase, 'a wind of God,' a wind employed as the medium of divine agency. Rosenmüller compares Ps. civ. 30; cxlvii. 8; Is. xl. 7. Dr. Lee refers to 1 Kings xviii. 12; 2 Kings ii. 16; and Ps. xxxiii. 6; Is. xi. 4. In the two latter passages, he observes that the word is equivalent to *power*, etc. The commotions of the

elements, etc., through means of which the petulance of Elijah was reproved (1 Kings xix. 11), are best understood as having occurred in vision (comp. Dan. ii. 35; Zech. v. 9). 3. The wind is used *metaphorically* in the following instances: 'The wings of the wind' denote the most rapid motion, 2 Sam. xxii. 11, where the phrase may be a poetical representation also of the incident recorded 2 Sam. v. 24; Ps. civ. 3. The onomatopoeia in the two former passages, in Hebrew, is remarkable. Anything light or trifling is called wind (Job vii. 7; Is. xli. 29; Ps. lxxviii. 39; comp. Eph. iv. 14; Eccclus. v. 9). Violent yet empty speech is called 'a strong wind,' or a mere tempest of words (Job vii. 2). 'Vain knowledge' is called *דַּעַת־רוּחַ*, knowledge of wind (Job xv. 2); 'vain words,' words of wind (xvi. 3). Many expressive *phrases* are formed with this word. 'To inherit the wind,' denotes extreme disappointment (Prov. xi. 29); 'to hide the wind,' impossibility (xxvii. 16); to 'labour for the wind,' to labour in vain (Eccles. v. 16); 'to bring forth wind,' great patience and pains for no purpose (Is. xxvi. 18; comp. Hos. viii. 7; xii. 1); 'to become wind,' to result in nothingness (Jer. v. 13). The four winds denote the four quarters of the globe (Ezek. xxxvii. 9); 'to scatter to all winds,' to disperse completely (Ezek. v. 10; xii. 14; xvii. 21); 'to cause to come from all winds,' to restore completely (xxxvii. 9). 'The wind hath bound her upon her wings,' means deportation into a far country (Hos. iv. 19); 'to sow the wind and reap the whirlwind,' unwise labour and a fruitless result (viii. 7); 'to feed on the wind,' to pursue delusory schemes (xii. 1); 'to walk in wind,' to live and act in vain (Micah ii. 11); 'to observe the wind,' to be over cautious (Eccclus. xi. 4); to 'winnow with every wind,' to be credulous, apt to receive impressions (Eccles. v. 9). *Comparisons*.—Disappointment, after high promise or pretension, is 'as wind without rain' (Prov. xxv. 14); the desperate speeches of an afflicted person are compared to wind (Job vi. 26). *Symbolically*.—Empires are represented as having wings, and 'the wind in their wings,' denotes the rapidity of their conquests (Zech. v. 9). The wind is often used as the symbol or emblem of calamities (Is. xxxii. 2; xli. 16; lvii. 13; lxiv. 6); destruction by the Chaldean army (Jer. iv. 11, 12; comp. Wisd. iv. 4; v. 23; xi. 20). 'The windy storm' (Ps. lv. 8) denotes Absalom and his party. The wind is the frequent emblem of the divine chastisements (Is. xxvii. 8; Jer. xxii. 22; li. 1, etc.) *Beautiful expressions* occur, as in Is. xxvii. 8, 'He stayeth his rough wind in the day of the east wind'; that is, God doth not aggravate the misfortunes of mankind by his chastisements; to 'make a weight for the winds' (Job xxviii. 25). *Mistranslations*.—In Ps. lxxviii. 39, 'He remembered that they were but flesh, a wind that passeth away and cometh not again,' should probably be rendered, 'a spirit going away and not returning.' All the versions make the words relate to the soul of man. Homer has a very similar description of death (*Il.* ix. 408). In Eccles. i. 5, 6, the translation is faulty, and the sense further obscured by a wrong division of verses. The passage should be read: 'The sun also ariseth and the sun goeth down, and hasteth to his place where he ariseth, going to the south and circulating to the north. The wind is continually whirling about, and the wind returneth upon its whirlings.' All the ver-

sions give this rendering; our version alone mistakes the meaning. The phrase 'brought forth wind,' is understood by Michaelis as an allusion to the female disorder called emphysema, or windy inflation of the womb (*Syntagma, Comment.* vol. ii. p. 165). The Syriac translator also understood the passage in this way: 'enixi sumus ut illæ quæ ventos pariunt.' 4. The east wind, רוֹחַ קָדִים, *ánemos vótos, ánevmos kabúson, vótos, ventus urens, spiritus vehemens, ventus auster.* קָדִים, *kabúson, ardor, æstus, ventus urens.* Both forms denote the natural phenomenon (Gen. xli. 6, 23; Job xxxviii. 24; Ps. xlviii. 7; lxxviii. 26; Jonah iv. 8). Considerable indefiniteness attends the use of these words. Dr. Shaw remarks, that every wind is called by the Orientals קָדִים, an east wind, which blows from any point of the compass between the east and north, and between the east and south (*Travels*, p. 285). Accordingly the Sept. often understands this word to mean the south, as in Exod. x. 13; xiv. 21 (see Bochart, *Hieroicozon*, pt. ii. lib. i. cap. 15). If the east wind happens to blow a few days in Palestine during the months of May, June, July, and August, it occasions great destruction to the vines and harvests on the land, and also to the vessels at sea on the Mediterranean (Hos. xiii. 15; Jonah iv. 8; Job xiv. 2; xv. 2; Is. xl. 7; Gen. xli. 6, 23; Ezek. xvii. 10; xix. 12; xxvii. 26; Ps. xlviii. 7; ciii. 5). In Jonah iv. 8, the phrase occurs, קָדִים חֲרִישִׁית רוֹחַ, a still or sultry east wind. For testimonies to the destructiveness of this wind in Egypt and Arabia, see Niebuhr (*Beschreib. von Arabien*, p. 8); Thevenot (*Voyages*, pt. i. liv. ii. c. 34). It is accordingly often used to denote any pernicious wind, as in Ps. xlviii. 7, where it is rendered by Sept. πνεῦμα βλασφ, Vulg. *spiritus vehemens.* It is used metaphorically for pernicious speech, a storm of words (Job xv. 2); calamities, especially by war (Is. xxvii. 8; Jer. xviii. 17; Ezek. xvii. 10; xix. 12; xxvii. 26; Hos. xiii. 15). In this latter passage the east wind denotes Shalmaneser king of Assyria; in Ezek. xxvii. 26, it denotes the Chaldeans. Tyre is there represented under the beautiful allegory of a ship towed into deep waters, and then destroyed by an east wind. A very similar representation is given by Horace (*Carm.* i. 14). The east wind denotes divine judgment (Job xxvii. 21). *Phrases.*—'To follow the east wind,' is to pursue a delusory and fatal course (Hos. xii. 1). 5. West wind, רוֹחַ יָם, *ánemos apò thalássēs, ventus ab occidente* [WEST]. 6. North wind, רוֹחַ צָפוֹן (Prov. xxv. 23), *ánemos boréas, ventus Aquilo* [NORTH]. 7. South wind, רוֹחַ דָּרֹם (Job xxxvii. 17), תִּימָן (Ps. lxxviii. 26), *λίψ, ventus Africus* (Luke xii. 55), *vótos* (Sirocco), (Acts xxvii. 13) [SOUTH]. 8. The four winds, רוֹחֵי רוּחוֹת, *τὰ τέσσαρα πνεύματα, ol téssapes ánevmoi*, quatuor venti. The Hebrews speak only of four winds; and so Josephus (*Antiq.* viii. 3. 5). This phrase is equivalent to the four quarters of the world (Ezek. xxxvii. 9; 2 Esdras xiii. 5), the several points of the compass, as we should say (Dan. viii. 8). *Phrases.*—'Striving of the four winds,' is great political commotions (Dan. vii. 2; comp. Jer. iv. 11, 12; li. 1); 'to hold the four winds,' is by contrary to secure peace (Rev. vii. 1); 'to be divided to the four winds,' implies utter dispersion (Dan. xi. 4; Jer. xlix. 32; Ezek. v. 10, 12; xvii. 2). So also the phrase, *ἐκ τῶν τεσσάρων ἀνέμων* (Matt. xxiv. 31) means from all parts of the world (Mark xiii. 27). 9. The Hebrews, like

other ancient nations, had but few names of winds. Homer mentions only βορέας, νότος, ξέφυρος, and εὔρος. Aul. Gellius, indeed, complains of the infrequency of names of winds in ancient writers (*Noct. Att.* ii. 22). The same indefiniteness appears in Herodotus (see Larcher's notes on i. 188). In the course of time the Greeks and Romans added eight other winds to the original four, but that appearing too minute a division, they reduced the additional ones to four, thus making only eight in all. The names of these may be seen in Larcher (*ut supra*), or Pliny (*Hist. Nat.* xviii. 34). Further information may be found in Coray's *Translation of Hippocrates, De Aeribus, Aquis et Locis*, Paris 1800; *Discours Préliminaire*; and see index. For a comparative table of the English, Latin, and Greek divisions of the winds, and their names, amounting to more than thirty, see Beloe's Herodotus (*Polymnia*, notes, vol. iii. p. 293, Lond. 1791). One Greek name of a wind occurs in Acts xxvii. 14, Εὐροκλύδων, *Euroclydon*, a tempestuous wind in the Mediterranean, now called a *Levanter*. The Alexandrian MS. has Εὐρακύλων; Vulg.

*Euroaquo*; Syriac אורקליון. The common reading, Εὐροκλύδων, seems derived from Εὔρος, *Eurus*, 'east wind,' and κλύδων, 'a wave,' quasi an eastern tempest. Other MSS. read Εὐρυκλύδων, *Euryclydon*, from εὐρύς, 'broad,' and κλύδων, 'a wave,' or rough wavy sea; and then the word would mean the wind which peculiarly excites the waves. Shaw defends the common reading, and describes the wind as blowing in all directions from the N.E. round by the N. to the S.E. (*Travels*, p. 330, etc., 4to; see Bowyer's conjectures, and Doddridge, *in loc.*) The Hebrews had no single terms indicating the relative velocity of the air in motion, like our words breeze, gale, etc. Such gradations they expressed by some additional word, as 'great,'

רוֹחַ-גָּדוֹל, 'a great wind' (Jonah i. 4), 'rough,' קָשָׁה, etc. Nor have we any single word indicating the destructive effects of the wind, like their verbs כָּעַר and שָׁעַר, as וַאֲסַעֲרֵם (Zech. vii. 14, etc.), and answering to the Greek word ἀνεμώφθορος (see Sept. of Gen. xli. 6, 23). Our metaphorical use of the word *storm* comes nearest. The phrase רוֹחַ סְעִירָה, 'stormy wind,' πνεῦμα καταιγίδος, *spiritus procellæ*, occurs in Ps. cvii. 25; cxlviii. 8. It is metaphorically used for the divine judgments (Ezek. xiii. 11, 13). The word סְעִירָה is usually translated 'whirlwind;' it means, however, more properly a storm (2 Kings ii. 1, 11; Job xxxviii. 1; xl. 6; Zech. ix. 14; Sept. συσσεισμός, λαίλαψ, νέφος; Vulg. *turbo*; Ecclus. xliii. 17; συστροφή πνεύματος, xlviii. 9; λαίλαπι πυρός). The Hebrew word is used metaphorically for the divine judgments (Is. xl. 24; xli. 16); and to describe them as sudden and irresistible (Jer. xxiii. 19; xxv. 32; xxx. 23). 'A whirlwind out of the north' (Ezek. i. 4) denotes the invasion from Babylon. Another word, סוּפָה, is also translated 'whirlwind,' and properly so. It occurs in Job xxxvii. 9; Is. xxi. 1. It is used as a simile for complete and sudden destruction (Prov. i. 27); and for the most rapid motion, 'wheels of war-chariots like a whirlwind' (Is. v. 28; Jer. iv. 13). Total defeat is often compared to 'chaff scattered by a whirlwind' (Is. xvii. 13). It denotes the rapidity and irresistibility of the divine judgments (Is. lxvi. 5). The phrase 'to reap the whirlwind' denotes useless labour (Hos. viii. 7); 'the day of the whirlwind,' destruction by

war (Amos. i. 14). 'The Lord hath his way in the whirlwind,' is probably an allusion to Sinai (Nah. i. 3). A beautiful comparison occurs in Prov. x. 25: 'As the whirlwind passeth, so is the wicked no more: but the righteous is an everlasting foundation.'—J. F. D.

#### WINDOW. [HOUSE.]

WINE. This subject requires to be treated in this place as a purely Biblical question, independently of all party controversies which have arisen on the 'wine question' (as it is called), in connection with total abstinence. The writer, a total abstainer for many years, is fully persuaded that the theory or practice of total abstinence has no legitimate connection with the investigation in hand.

I. WINE, denoting properly the fermented juice of the grape, is used in the A. V. as the rendering of several HEBREW and GREEK WORDS. To these our attention must, in the first place, be directed.

1. יַיִן, *yayin*, according to Gesenius, from יָן, an unused root, having the force of *ferendi*, *astuendi*; according to Fürst, from יָן, like the Arabic يَن, Aeth. ነ, Greek *Fōnos*, et sic porro ceteris in linguis, Arm. gini; Lat. Vinum; Eng. Wine; LXX. οἶνος, *oînos*, ἀσκος, γλεύκος. Others take the word to be of Indo-European extraction, from the root *we*, to weave, or *wan*, to love. The meaning of the word, therefore, is regarded by some as uncertain, but apparently without reason, as Gesenius is clearly right in his derivation of it.

This word, the most commonly employed in the O. T. Scripture for wine, occurring about 142 times, is also the most comprehensive, including, like the corresponding English word, wines of all sorts, although used also in a more restricted sense, to denote *red* wine. That *yayin* was intoxicating admits of no question. Noah planted a vineyard, and drank of the *yayin* and was *drunken* (Gen. ix. 21); Nabal drank *yayin* and was *very drunken* (1 Sam. xxv. 36, 37); the 'drunkards of Ephraim' were 'overcome with *yayin*' (Is. xxviii. 1), or rather knocked down, or, as Gill paraphrases it, 'smitten, beaten, knocked down with it as with a hammer, and laid prostrate on the ground, where they lie fixed to it, not able to rise.' Jeremiah says: 'I am like a drunken man, and like a man whom *yayin* hath overcome' (xxiii. 9).

But, although intoxicating, yet it was not only permitted to be drunk, but was also used for sacred purposes, and is spoken of as a blessing. Thus, in Jacob's blessing on Judah: 'His eyes shall be red with *yayin*, and his teeth white with milk' (Gen. xlix. 12). So in God's promise to restore his people to their own land: 'I will bring again the captivity of my people . . . and they shall plant vineyards and drink the *yayin* thereof' (Amos iv. 19). 'Drink thy *yayin*,' says the preacher, 'with a merry heart, for God now accepteth thy works' (Eccles. ix. 7). The Nazirite, at the expiration of his vow, was permitted to drink *yayin* (Num. vi. 13-20); the Israelites were permitted to drink *yayin* at their feasts (Deut. xiv. 24-26); *yayin* was used in the sacred service of Jehovah, being poured out as a drink-offering to him (Exod. xxix. 40; Lev. xxiii. 13; Num. xv. 5). Hence, it not only 'maketh glad the heart of man' (Ps. civ. 15), but also 'cheereth both God and man' (Judg. ix. 13); its cheering effects being symbolically transferred to the Divine Being.

The intoxicating quality of *yayin* Dr. Tattam confirms by Rabbinical testimony. 'The Mishna, in the treatise on the Passover, informs us that four cups of wine were poured out, and blessed, and drunk by each of the company at the eating of the Paschal Lamb; and that water was also mixed with the wine, because it was considered too strong to be drunk alone. Pesachim, cap. vii. 13; x. 1. In Hieros. Shabb. fol. xi. 1, we read, 'it is commanded that this rite be performed with red wine.'

'Babylon. Shabb. fol. lxxvii. 1: 'Sharon wine is of famous report, with which they mix two parts of water.'

'Babylon. Beracoth. fol. 1. 1: 'Their wine (יַיִן) was very strong, and not fit for drinking *without being mixed with water*.' The Gemara adds: 'The cup of blessing is not to be blessed *until it is mixed with water*.'

'The *Jerusalem Talmud* says, 'It became a man nobly to entertain his wife and children (at the Passover), that at this feast they might be merry with wine, יַיִן.'

'To meet the objection, How can intoxication be hindered? the Rabbins replied, 'Because wine between eating does not intoxicate a man.' Hieros. Talm.' (Dr. Tattam's reply to a Pamphlet by Rev. W. Ritchie on the Scripture Testimony against Intoxicating Wine, pp. 8, 9.)

2. תִּירוֹשׁ, *Tirosh*, from יָרַשׁ, to possess, 'Mustum, novum vinum ita dictum quia inebriat, cerebrum occupat' (Ges. *Thes.* 633). So Fürst, 'Mustum uvis expressum, a. v. יָרַשׁ, occupare, acquirere, comparare' (*Concord.* 525. 2). Dr. Lees, it is true, says that it is so called because it 'constituted one of the most valuable possessions of the Jews' (*Temp. Quest.* p. 114). The word occurs about 34 times in the Bible (rendered in the LXX. by three distinct terms, οἶνος, ῥάξ, μέθυσμα), sometimes in connection with *yayin*, sometimes with oil, and sometimes with words denoting the edible productions of the earth.

Does it denote an intoxicating, or a non-intoxicating beverage? The latter has been asserted; but, as would seem, without reason. The contrary appears to be the truth. Hosea says (iv. 11), 'Whoredom and wine (*yayin*), and new wine (תִּירוֹשׁ, *tirosh*), take away the heart.' Here the use of the phrase 'take away the heart' implies the tendency of *tirosh* to 'blunt the moral feelings and derange the intellect.' The testimony of the Rabbins is to the same effect. They say, 'Tirosh, תִּירוֹשׁ, is new wine; the liquor of the grapes first pressed out, which easily takes possession of the mind of man' (Sanhedr. lxxvi. 1). 'If thou abuse it thou shalt be poor; if thou rightly use it thou shalt be head' (Joma lxxvi. 2). Again, in the Gemara, 'Wherefore is it called *Tirosh*? Because all who are drawn to it shall be poor' (Tattam's *Reply*, 5). Such is the testimony of the Rabbins, 'who ought to know something of their own language.' In accordance with this, the Targumists Onkelos and Jonathan render *tirosh*, in every instance of its occurrence (except in three cases where there is no word, or the word for vineyard), by the word חֲמַר, *chamar* (Tattam, 5, 6).

That *tirosh* denotes not 'vine-fruit, the produce of the vine in the solid form of grapes, raisins,' etc., but *wine* properly, is sufficiently plain. Thus (Prov. iii. 10), 'Thy presses shall burst forth

with new wine,' *tirosk*. (Is. lxii. 8), 'The sons of the stranger shall not *drink* thy wine,' *tirosk*. (Joel ii. 24), 'The fats shall *overflow* with wine (*tirosk*) and oil.' This, according to the author of *Lo Yayin*, is an 'image of abundance'; the 'vats piled up with fruits so full, that what was put on would roll off to the ground, because they could hold no more!' (p. 54).

It is, however, argued from Micah vi. 15 that *tirosk* means grapes: 'Thou shalt tread *tirosk*, but shalt not drink the wine.' *Tirosk* is here represented as being trodden, and must therefore, it is concluded, be grapes. But in Is. xvi. 10 *yayin* is represented as being trodden: 'The treaders shall tread no יַיִן (*yayin*) in their presses.' Is *yayin* also grapes? Surely one must be very prosaic not to be capable of understanding such modes of expression. It is also argued, from the occurrence of the word along with *corn* (Gen. xxvii. 28), that *tirosk* is a solid substance. The very opposite conclusion is, however, the natural one. Corn and wine are the two principal and representative kinds of food; the former of solids, the latter of liquids. 'Bread and water' occur together very often (*ex. gr.* Ezek. iv. 17; 1 Sam. xxv. 11, etc.) Is *water*, then, a *solid*?

3. חֶמֶר, *Chemer*, from חָמַר, *astuavit, ferbuit*; Chaldee form, חֶמֶר; LXX. οἶνος, *kalós*; 'Vinum a fervendo et fermentanda dictum' (Ges. *Thes.* 493). The word occurs eight times, twice in its Hebrew, and six times in its Chaldee form. In Deut. xxxii. 14, it is (in the A. V., after the Vulg.) treated as an adjective, and rendered 'pure'—'the pure blood of the grape,' instead of 'the blood of the grape—wine,' *chemer*. The Rabbins call it 'pure or neat wine' (*i.e.* no water being mixed with the juice of the grape), 'because it disturbs the head and the brain' (Tattam). They regarded *chemer* and *tirosk* 'as equivalent terms.' This pure, powerful wine was permitted to the Israelites (Deut. xxxii. 14); and is spoken of with approbation by Isaiah: 'In that day sing ye unto him, A vineyard of red wine (חֶמֶר, *chemer*); I, the Lord, do keep it' (xxvii. 2, 3). And Cyrus and Artaxerxes commanded that *chemer* should be given to the people of Israel 'for the service of the God of heaven' (Ezra vi. 9).

4. יֵשֶׁבֶר, *Shēchar*, from יָשַׁבֵּר, *inebriavit se*; LXX. σκεπα, οἶνος, μέθυσμα, μέθη; Vulg. *Vinum*, 'temetum, an inebriating drink, whether wine prepared or distilled from barley, or from honey, or from dates' (Ges. *Thes.* 1440). So Fürst, who adds, 'or any other kind of intoxicating drink comprehended under the name τῶν σικέπων.' Jerome says: 'Sicera (יֵשֶׁבֶר) Hebræo sermone omnis potio, quæ inebriare potest, sive illa quæ frumento conficitur, sive pomorum succo, aut quum favi decoquantur in dulcem et barbaram potionem, aut palmarum fructus exprimuntur in liquorem, coticisque frugibus aqua pinguior coloratur' (*Ep. ad Nepotianum*). In the A. V. the word is rendered *strong wine*, Num. xxviii. 7; and, occurring along with *yayin*, *strong drink*, Prov. xx. 2; Is. v. 11, 22. Onkelos, on Num. xxviii. 7, calls it 'old wine'; Rabbi Solomon, Rabbi Eleasar, Aben Ezra, and others, call it 'intoxicating wine.' 'The word

means strong drink, from whatever substance made' (Tattam). It was used as a drink-offering in the service of God (Num. xxviii. 7); and was, notwithstanding its highly intoxicating property, permitted to the Israelites (Deut. xiv. 26).

A vain attempt has been made, by connecting the word etymologically with *sugar*, to prove, in the face of the clearest evidence to the contrary, that it was a sweet, *non-intoxicating* syrup (see Dr. F. Lees' Works). The word is employed in the following passages in such a manner as to show decisively that it denotes an intoxicating drink:—Lev. x. 9, where the priests are forbidden to drink wine or *shēchar* when they go into the tabernacle; 1 Sam. i. 15, where Hannah, charged with drunkenness by Eli, replies it is not so: 'I have drunk neither wine nor *shēchar*;' Ps. lxix. 13, where the Psalmist complains: 'I was the song of the drinkers of *shēchar*,' A. V. 'drunkards;' Prov. xx. 1: 'Wine is a mocker, *shēchar* is raging; and whosoever is deceived thereby is not wise;' Prov. xxxi. 4, 5: 'It is not for kings to drink wine, nor for princes *shēchar*, lest they drink and forget the law;' Is. v. 22: 'Woe unto them that are mighty to drink wine, and men of strength to mingle *shēchar*;' Is. xxviii. 7: 'They also have erred through wine, and through *shēchar* are out of the way: the priest and the prophet have erred through *shēchar*, they are swallowed up of wine, they are out of the way through *shēchar*;' Is. xxix. 9: 'They are drunken, but not with wine; they stagger, but not with *shēchar*.'

*Shēchar* may have been a sweet beverage, as sugary as Dr. Lees or any one else chooses; but it was most certainly *intoxicating*.

5. עֵסִיס, 'āsis (from עָסַס, to tread); LXX. ἄσμα, γλυκασμός, οἶνος νέος, μέθη; Targ. חֶמֶר מֵרֶת, pure wine; Vulg. dulcedo, mustum; *must*, that which is expressed from grapes by treading, or from pomegranates (Ges. *Thes.* 1054). Henderson says: 'By עֵסִיס is meant the *fresh wine*, or juice of the grape or other fruit which has just been pressed out, and is remarkable for its sweet flavour, and its freedom from intoxicating qualities' (*Com. on Joel* i. 5). Yet its intoxicating quality seems intimated in Is. xlix. 26: 'They shall be drunken with their own blood as with sweet wine' (*hasis*); Joel i. 5: 'Awake, ye drunkards, and weep . . . because of the new wine (*hasis*); for it is cut off from your mouth.' It is promised by God as a blessing, Joel iii. 17, 18; Amos ix. 13.

6. סָבָא, *sobā*, from סָבַא, *potavit*, idque intemperantius, *gurgilavit*, to drink to excess, to tope (Ges. *Thes.* 932); LXX. οἶνος; Vulg. *Vinum*. The noun occurs only in two places, but the verb and participle often; the latter to denote drunk, a drunkard, a toper. Gesenius renders the noun in Is. i. 22 *vinum*, but in Hos. iv. 18, *compotatio*, a drinking bout, a carouse; so Henderson, Dathe, etc. The LXX. must have followed a various reading in this place. *Sobā*, then, means some (or perhaps any) kind of intoxicating drink.

7. מִסְכָּה, *mesek*, from מִסַּךְ, *miscere*, to mix, to mingle; wine mixed with water or aromatics; LXX. κέρασμα; Vulg. *Mistum*. It occurs only once, Ps. lxxv. 9; but the participial noun מִמְסָךְ in Prov. xliii. 30, Is. lxv. 11, in a similar sense = wine

\* Quoted by Gesenius, *Thes. in verbo*.

highly spiced, to improve its flavour and enhance its intoxicating power. [MENI.]

8. שְׁמָרִים, *Shemārīm*, from שָׁמַר, *servavit, re-servavit, aservavit*, to keep, to preserve, to lay up; LXX. τρυγέας, φύλαγμα, δόξα; Vulg. *Fæces, Vendemia*, A. V. lees, dregs, wine on the lees. The word occurs five times, and always in the plural. It is used both of lees and of wine preserved on the lees;—of lees, Ps. lxxv. 9; Zeph. i. 12; Jer. xlviii. 11; in all which passages it is used in a figurative sense; in the second and third, the form of expression is proverbial, being used of individuals and nations—‘de iis qui desides, atque otiosi sunt, vel certe vita utuntur quæta, tranquilla, metaphora a vino petita, quod diu in cella reconditum fæcibus superjacet et intactum asservatur, quo validius fit vinum odorque fragrantior’ (Ges. *Thes.* 1444); it is used of wine, Is. xxv. 6, where the prophet foretells the rich provision of gospel blessings under the figure of ‘a feast of fat things, of wines on the lees, *Shemārīm*, well refined, כְּזֵיקִים, defecated—i.e. ‘Vinum vetus et nobilissimum a fæcibus purgatum’ (Ges.), or, ‘cum fæcibus servatum (Hefenwein), quod defecatum et clarificatum in conviviis opiparis apponitur’ (Fürst, *Concord.* 1177). The word is used of lees, according to some, ‘from their preserving the strength and flavour of wine (Alexander); according to others, as ‘Id quod ad ultimum usque reservatur et remanet—fæces, utpote quæ in imo vasis fundo subsident’ (Fürst). This ‘Vetus et nobilissimum vinum’ is spoken of approvingly in the last-cited passage.

9. אֲשִׁישָׁה, *ashîsha*, LXX. λάγανον ἀπὸ πηγάνου, πέμμα, ἀμορίτης—i.e. a cake from the frying-pan, a baked cake, a sweet cake—variation of rendering truly. The Targ. of Jonathan on Exod. xvi. 31 uses אֲשִׁישָׁה for the Heb. צִפְחִית, a flat cake. The ‘traditio Judaica’ is גִּרְבָּה דְּחִמָּה, a jar of wine. The A. V. has flagons, flagons of wine. The plural of the word occurs both in the masculine and feminine forms. Critics are pretty generally agreed that it does not denote wine or any other drink, but a *cake*; such as was ‘prepared from dried grapes, or rasins pressed or compacted into a certain form. Cakes of this kind are mentioned as delicacies with which the weary and languid are refreshed (2 Sam. vi. 19; 1 Chron. xvi. 3; Cant. ii. 5); and were offered in sacrifice to idols (Hos. iii. 1). They differed from צִפְחִית—i.e. grapes dried but not compacted into the form of cakes; and also from דְּבִלָּה—i.e. figs pressed into cakes.’ So Gesenius, who derives the word from אָשַׁשׁ to *press*, although Ginsburg would derive it from a similar form denoting to *burn*. The evidence seems in favour of a cake, especially a grape cake, in which latter sense it certainly occurs Hos. iii. 1, where however it is written more fully, or rather with the addition of עֲנָבִים, *grapes*, which fills up its meaning, אֲשִׁישֵׁי עֲנָבִים = *cakes of grapes*. Dr. Tattam, resting on the authority of Rabbins whom he quotes, seems inclined to abide by the rendering of the A. V. (see *Reply*, p. 13, 14).

Three other words may here be noticed:—חֲמִין, *chometz*; LXX. ὄξος, but in Prov. x. 26 δμφαξ,

*uva immatum*, sour grapes; so Syr. ܐܬܝܢܐ; Vulg. *acetum*; A. V. *vinegar*, rightly.\*

עֲנָבִים, *anābīm*, Hos. iii. 1; A. V. wine, but properly grapes. See above, under אֲשִׁישָׁה.

יֵקֵב, *yekeb*; A. V. wine (Deut. xvi. 13), but incorrectly, as the word denotes a *winepress*.

In the N. T. several words are employed denoting wine:—

(1.) οἶνος, comprehending every sort of wine.  
(2.) γλεύκος, sweet, or ‘new wine,’ which, as well as the former, seems, from the use made of it (Acts ii. 13), to signify wine of an intoxicating quality: ‘These men are full of new wine;’ to which charge Peter replies: ‘These men are not drunken as ye suppose’ (v. 15)—although Dr. Lees’ interpretation is fairly admissible: that the language is that of mockery, as if we should say of a drunken man: He has taken too much water. The *gleukos* was the fruit of the grape, so kept as to preserve its sweetness, ‘perhaps made of a remarkably sweet small grape, which is understood by the Jewish expositors to be meant by שֶׁרֶק, or שֶׁרֶקָה (Gen. xlix. 11; Is. v. 2), and still found in Syria and Arabia’ (Alford on Acts ii. 13). Suidas: τὸ ἀποσταλάγμα τῆς σταφύλης πρὶν πατηθῆναι.  
(3.) γέννημα, or γέννημα τῆς ἀμπέλου, fruit of the vine = wine (Luke xxii. 18).

(4.) Οἶνος ἄκρατος, pure wine (Rev. xiv. 10)—οἶνον ἄκρατον εἶναι λέγομεν, ὃ μὴ μέμικται τὸ ὕδωρ, ἢ παντράσιον ὀλίγον μέμικται (Galen in *Wetstein*, cited by Alford). Here the phrase is used figuratively.

(5.) Ὅξος, sour wine, or vinegar (Matt. xxvii. 48; Mark xv. 36, etc.)

(6.) Σίκερα, A. V. ‘strong drink;’ Heb. יֵשֶׁכַר, ‘any strong drink made of grapes’ (Robinson, Alford, etc.)

II. *Some HISTORICAL NOTICES of the use of wine in the Bible.*—The first notice we have of wine in the O. T. is in the case of Noah, who ‘planted a vineyard, and did drink of the wine (*yayin*), and was drunken’ (Gen. ix. 20, 21). The culture of the vine, no doubt, existed before, but the patriarch now resumes the occupation which had been interrupted by the flood. ‘Nowhere does the vine

\* [This, it appears, was obtained either from *yayin* or *shechar* (Num. vi. 3), and was used by those engaged in the labours of the field to soften and render more palatable the dry bread which formed the food of the reapers (Ruth ii. 14). It was also used as a beverage, probably mixed with water (Num. vi. 3), in which case it would resemble the *posca* of the Romans, which was not an intoxicating drink, and was used only by the poorer classes (Plaut. *Mil. Glor.* iii. 2. 23). In Matt. xxvii. 34 our Lord is said to have had vinegar mingled with gall offered to him to drink when on the cross; Mark (xv. 23) says it was wine mingled with myrrh; Luke that it was vinegar offered by the soldiers in mockery (xxiii. 36); and John that it was vinegar (xix. 29). Possibly these accounts refer to two separate occurrences; the one an act of cruelty on the part of the soldiers, who, in response to our Lord’s exclamation, ‘I thirst,’ offered him some of their own *posca*; the other an act of intended kindness, designed to alleviate his sufferings by an anodyne.—ED.]

grow spontaneously in such abundance and excellence as in the region of Ararat in Armenia, and the eastern Pontus; but, no doubt, the culture of the vine was of remote antiquity, invented by one nation and spread to other countries; for thus only can the remarkable circumstance be accounted for, that wine bears the same name in almost all eastern and western nations' (*Kalisch*, Gen. ix. 20, 21). 'It may be added, that the Egyptians attributed the manufacture of wine to Osiris, the Phœnicians and Greeks to Bacchus, the Romans to Saturn' (*ibid.*)

The next notice of wine is in the history of Lot, whose daughters 'made their father drink wine' (*yayin*), so that he became stupidly intoxicated (Gen. xix. 32, etc.). It next occurs in Isaac's blessing pronounced on Jacob: 'The Lord give thee . . . plenty of corn and wine' (*yayin*) (Gen. xxvii. 28). The next notice of the juice of the grape is in connection with Egypt (Gen. xl. 11), when the chief butler says: 'I took the grapes and pressed them into Pharaoh's cup.' Are we to take these words according to their strict literality? And did the kings of Egypt, at the time, drink the unfermented juice of the grape only? However that may be, and although an affirmative answer seems demanded, yet we know that the vine was cultivated in Egypt from very ancient times, representations of the process of the manufacture of wines being found on tombs belonging to the 4th dynasty; that wine was used almost universally by the rich; that it was freely drunk at the banquets of both men and women, and even excessively, as the monuments abundantly testify; that it was drunk even by the priests and offered in the temples to their gods. All this is now well ascertained, notwithstanding the contradictory statements of Herodotus on some points (see Rawlinson's *Herod.* ii. 103, 126; Wilkinson's *Ancient Egyptians*, i. 144, etc.).

In the laws of Moses, wine is frequently mentioned. It was commanded to be offered to God as a drink-offering (Num. xv. 5, 7, 10). This furnishes the key to the peculiar language of Jotham's parable: 'Wine that cheereth God and man' (Judg. ix. 13); an exposition much preferable to that which renders the words: 'The gods and men;' for wine was offered to God as the drink of the Great King, the symbol of our best spiritual things which we offer in his worship. Wine was forbidden to the priests during the performance of their sacred duties in the tabernacle (Lev. x. 9), which prohibition seems to have originated in the offence of Nadab and Abihu, who, most probably, 'transgressed through wine.' At other times the priests were at liberty to drink wine. To the Nazarites, while under their vow, not only wine but vinegar, and the fruit of the vine generally, in every form, was prohibited (Num. vi. 3, 4). The Israelites were at liberty to drink wine even at their national sacred festivals when rejoicing before the Lord (Deut. xiv. 22-26). The Rechabites are mentioned as very peculiar in their abstinence from wine, as well as their refraining to live in houses, and are commended, not for their abstinence, but for their obedience to the command of their ancestor (Jer. xxxv.)

Wine was used by the Jews in the celebration of the passover; for the account of which see PASS-OVER, and Tattam's *Reply to Ritchie*.

The Rabbins have a curious tradition, that at the great feast which shall inaugurate the coming

of the Messiah, he shall drink wine made from grapes which grew in Paradise during the six creative days, and preserved in Adam's cave for that great occasion (Othonis *Lex.*, art. 'Vinum;' Buxt. *Syr. Jud.* 460).

It appears to have been an ancient custom to give medicated or drugged wine to criminals condemned to death, to blunt their senses, and so lessen the pains of execution. To this custom there is supposed to be an allusion, Prov. xxxi. 6, 'Give strong drink unto him that is ready to perish;' and an illustration of the custom is furnished by the soldiers giving Jesus 'wine mingled with myrrh,' or, which is the same, 'vinegar'=sour wine; 'mingled with gall'=a bitter drug, without specifying the kind (Mark xv. 23; Matt. xxvii. 34). 'Omnes a synedrio ad mortem damnati potarunt *יין חי*, vino vivo (h. e. optimo, forti) ut diriperetur intellectus ejus, ad confirmandum id dicitur, Prov. xxxi. 6, etc. De perituro dicitur, id fieri, ut obliviscatur mortis, quæ est infortunium ipsius' (Schoet. *Hor. Heb.* 236). To the same custom some suppose there is a reference in Amos ii. 8, where the 'wine of the condemned' (A. V.) is spoken of. The margin reads, instead of condemned, 'fined or mulcted;' so Gesenius; Henderson, *amerced*. The wicked here described, in addition to other evil practices, imposed unjust fines upon the innocent, and spent the money thus unjustly obtained upon wine, which they quaffed in the house of their gods. As Dathe renders: 'pecunias hominibus innocentibus extortas computationibus absument in templis deorum suorum.'

Mixed wine is often spoken of in Scripture. This was of different kinds. Sometimes it was mixed with water to take it down (Is. i. 22); sometimes with milk (Songs v. 1); and sometimes, by lovers of strong drink, with spices of various kinds, to give it a richer flavour and greater potency (Is. v. 22; Ps. lxxv. 8). The 'royal

wine,' literally wine of the kingdom, *יין מלכות*

(Esther i. 7), denotes most probably the best wine, such as the king of Persia himself was accustomed to drink. 'Wine of Lebanon' is referred to in such a way as to indicate its peculiar excellence—'the scent thereof shall be as the wine of Lebanon' (Hos. xiv. 7). Hence it is thought to have been distinguished by its grateful smell. But *יֵכָר* means, as the margin renders it, *memorial*, and includes odour, flavour, and refreshing influence. And modern travellers attest the excellence of the wine of Lebanon. The 'wine of Helbon, or Chalybon,' is mentioned as one of the importations of Tyre (Ezra xxvii. 18), and was very famous.

The vine abounded in ancient, as it does in modern Palestine; and wines of various degrees of excellence were made. 'The wines of modern Palestine are represented by modern travellers as being of excellent quality. The sweet wines are particularly esteemed in the East, because they are grateful to the taste, very exhilarating; and some of them will keep for a long time. They were therefore preferred by those who were addicted to drinking, and commonly selected for the tables of kings. Their inebriating quality is alluded to by the prophet Isaiah: 'I will feed them that oppress you with their own flesh, and they shall be drunken as with sweet wine' (Is. xlix. 26).

‘The testimony of travellers respecting the spirituous nature of the wines of Palestine accords with that of the sacred writers. . . . It is observed by *Thévenot*, that the people of the Levant never mingle water with their wine at meals, but drink by itself what water they think proper for abating its strength. While the Greeks and Romans by mixed wine understood wine united and lowered with water, the Hebrews, on the contrary, meant by it wine made stronger and more inebriating by the addition of powerful ingredients. . . .

‘The wines of Palestine are generally kept in bottles made of leather, or goat-skins, sewed or pitched together. In these the process of fermentation took place, and the wine acquired its proper degree of strength.

‘In absence of anything like chemical analysis, these are the data from which we must draw our conclusions concerning the nature of the wines referred to by the sacred writers. Some of them are represented to have been sweet wines, which, if not the strongest, are known to have been very strong. The grapes from which they were produced were remarkable for their richness and excellence; the climate of the country being such as to favour the growth and development of those principles which, during fermentation, were converted into alcohol. And as the grapes of that country are now known to furnish very rich and spirituous wines, we may infer that the ancient were similar in their character; since there is abundant evidence that the climate has not suffered any material change for three thousand years.

‘I should not omit, in confirmation of this view of the spirituous nature of the wines of Palestine, to advert to the modes in which they were kept. It is now well known, that when mixtures of alcohol and water are put into bladders, the water evaporates, and leaves the alcohol in a more concentrated form. And it is asserted that wine which has been kept in bottles closed by pieces of bladder firmly tied over the mouth, in a few weeks acquire the strength and flavour which would be imparted to it only by several years’ preservation in the ordinary way. Now, it is probable that the leather bags into which these wines are put would produce a similar effect upon the liquor, which, after the process of fermentation had ceased, would soon attain its complete and appropriate alcoholic character’ (Prof. Silliman, *Amer. Jour. of Science and Arts*, 1834, quoted by Kitto on *Ps.* lxxv. 8).

‘The wine was generally contained in large ox-skins ranged round the store-room, and quite distended with liquor. The larger skins seem to have answered to casks; the smaller goat and kid skins, to barrels and kegs in the comparison, to be chiefly used in conveying to customers the smallest quantities required. Individuals rarely keep large stores of wine in their houses, but get a small supply of a goat-skin or two from the wine-store. This seems also to have been the case with the ancient Jews, for Nehemiah, although holding the rank of governor, had no store of wine, for we read he had a supply every ten days (*Neh.* v. 18). The large skins in the wine-store we have mentioned are supported above the floor on frames of wood’ (Kitto on *Job* xxxii. 19). Similar methods of storing and keeping wine were common to the Greeks and Romans.

III. Now, what is the teaching of the Scriptures in respect to the USE of wine?—They make no dis-

inction between intoxicating and non-intoxicating wines—never refer or allude to such a distinction. Yet wine, *וַיִּין*=*olivos*, is constantly spoken of in

precisely the same way that corn, and oil, and milk are spoken of—namely, as a blessing sent by God for the use of man. It was enjoined to be used in the service of God. It is employed as a symbol of the highest spiritual blessings (*Is.* lv. 1, 2). The use of it was common among the Jews, as it is among the people of all wine-producing countries. It was forbidden to the Nazarites alone, and that only while under their vow. The use of it is in one case distinctly prescribed by Paul to Timothy (1 Tim. v. 23). Jesus Christ came ‘drinking wine’ as well as ‘eating bread’ (*Luke* vii. 33, 34), and in one instance miraculously produced a supply of wine when it was needed (*John* ii.). We attach great importance, religiously and theologically, to these facts. Jesus was no ascetic. He gave no countenance to asceticism. By drinking wine—freely using the blessings of God’s providence—he testified against the error, afterwards called Gnostic and Manichean, which would attach impurity to that which enters the mouth, and vindicated the liberty of his followers to use ‘every creature of God’ as good and fit for food, and to be received with thanksgiving by them as those who ‘believe and know the truth’ (1 Tim. iv. 3, 4). But this error repelled, and this liberty asserted, none are obliged to drink wine or to eat meat if they prefer not. There is liberty on this side also. They may abstain if they choose. Paul expressed his readiness to abstain from ‘flesh’ and ‘wine’ to secure the good of a brother, or to avoid occasioning him injury (*Rom.* xiv. 21; comp. 1 Cor. viii. 13). The same liberty is ours; and if a great practical good may be attained by abstinence, Christian benevolence calls us in this direction.

But while liberty to use wine, as well as every other earthly blessing, is conceded and maintained in the Bible, yet all abuse of it is solemnly and earnestly condemned. In the book of Proverbs the warnings against such abuse are frequent and severe (*xx.* 1; *xxiii.* 29-35; *xxxi.* 4-7). It is the same in the N. T. (1 Cor. vi. 10; *Gal.* v. 21). ‘Be not drunk with wine—not given to much wine.’ Such are its precepts—precepts which would have little or no force, or even meaning, were wine not intoxicating, and were there not some peculiar danger incident to its use. If wine were not intoxicating, the apostle might as well have exhorted them against drinking too much milk or too much water. He takes for granted the right to use; he recognises the danger incident to the use; but instead of prohibiting, he cautions and exhorts against excess. Moderation in eating and drinking is the broad Christian law. Abstinence from some kinds of food may become a duty under peculiar circumstances. Self-denial, in relation to things lawful, is often imperative. Wine is good; is a gift of God. It may be used with advantage; it may be abused, but not innocently or with impunity. It may be declined in the exercise of Christian liberty; it ought to be declined, if doing so helps forward the cause of humanity, morality, and religion, and promotes the glory of God. (*Ges. Thes. Ling. Heb. et Chal.*; *Fürst’s Concord. Vet. Test. Heb. et Chal.*; *Tattam’s Reply to Ritchie*; *Otho, Lex. Rabbin. Phil.*; *Works of Dr. F. Lees*, 2 vols.; *Kitto’s Pict. Bib.*; *Smith’s Dic. of Greek and Rom.*

*Antiquities*, art. 'Vinum'; Buxtorf's *Synagoga Jud.*, cap. x. xi.; *English Cyc.*, art. 'Wine,' etc.; Denman, *The Vine and its Fruit*; Redding's *Description of Wines, Ancient and Modern*; Wilkinson's *Anc. Egyptians*, 2 vols.)—I. J.

**WINE-PRESS** or **WINE-FAT**. When the grapes were collected, which was an occasion of mirth and singing, they were conveyed to the press (כַּנֶּחֱשׁ, ληνός). This was commonly placed in the vineyard (Is. v. 2; Matt. xxi. 33), or at any rate outside the towns and villages (Zech. xiv. 10; Rev. xiv. 20). It consisted of two troughs or vats, one smaller than the other, the former to receive the grapes the latter the expressed juice. The smaller, which was properly called כַּנֶּחֱשׁ, ληνός, was placed above the larger (כַּנֶּחֱשׁ, ὑπολήνιον), and when filled with grapes was trodden by several persons; a service which, though fatiguing, was usually performed with singing and other expressions of joy (Judg. ix. 27; Is. xvi. 10; Jer. xxv. 30; xlviii. 33). The expressed juice (טֵינִי, ληνός) flowed through a hole or spout in the side of the smaller vessel (the *gath*) into the larger one (the *yekeb*). These terms are usually strictly applied (comp. Neh. xiii. 15; Is. lxiii. 2; Lam. i. 15; Joel ii. 24; iii. 13; but sometimes *yekeb* is used for the whole apparatus (Job xxiv. 11; Jer. xlviii. 33), just as ὑπολήνιον is in Matt. xxi. 33. In its proper sense it seems to be used Prov. iii. 10: 'thy presses shall abound (Ges., 'overflow' Ewald, 'redundabunt' Maurer) with must.'

524. Egyptian Wine-press.

The Egyptians usually trod the grapes, but they sometimes resorted to a process of twisting in a bag similar to that of the *Torcular* among the Romans (Wilkinson, *Anc. Egypt*. ii. 152). Among the Hebrews treading only seems to have been employed; and as this caused the garments to be sprinkled with the juice, which was red, and as it conveyed a representation of oppression and torture, images of war and bloodshed were taken from it (Is. xvi. 10; lxiii. 1-3; Lam. i. 15). Some such

method of relieving the fatigue of the treaders may have been resorted to as is indicated in the wood-cut, which represents an ancient Egyptian wine-press. Robinson (*Later B. R.* p. 137) describes an ancient wine-press cut in the rock.—W. L. A.

**WINER**, GEORG BENEDICT, D.D., was born at Leipsic 13th April 1789. He was educated at the gymnasium and university of his native town. In 1819 he became extraordinary, and in 1823 ordinary professor of theology at Erlangen, whence he returned to Leipsic in 1832 to fill one of the chairs of theology there. In this sphere the most of his life was spent. He died 12th May 1858. Winer was a man of extensive and exact scholarship, and his writings have been highly appreciated wherever they have been known. To him we are indebted for the best treatise extant on N. T. grammar, and his *Realwörterbuch* is a storehouse of Biblical knowledge, from which all subsequent writers on the subjects it embraces have found it their interest to draw. Very useful to theological students is his *Comparative Darstellung der Lehrbegriffs der verschiedenen Christl. Kirchenparteien*, 4to, 1824, sec. ed. 1837; as also his edition of the *Augsburg Confession*, with notes, 1825; but it was in the department of Biblical literature that he chiefly laboured. His principal Biblical works are: *Grammatik des N. T. Sprachidioms*, Leipz. 1822, translated from the 6th ed. (1855) into English, 2 vols. Edin. 1859; *Grammatik des Bibl. u. Targum. Chaldaismus*, 1824; *Chald. Lesebuch*, 1825; *Simonis Lex. Heb. et Chald. ordine etymologico descriptum*, 1828; *Beitrag zur verbesser. der N. T. Lexicographie*, 1823; *De Vers. Pentat. Samarit.* 1817; *De Onkeloso ejusd. Paraphrasi Chald.* 1820; *De Vers. Syr. N. T. usu critico*, 1823; *Bibl. Realwörterbuch*, 1820, 3d ed. 3 vols. 1847-48; *Pauli ad Galatas Epist. Latine vert. et perpet. annotat. illustr.* 1827, sec. ed. without the Lat. version, 1828. Besides these Winer wrote many programmes on points of Biblical grammar and lexicography. Of great utility also is his *Handbuch der Theolog. Literatur*, 2 vols. 3d ed. 1838; *1ste Ergänzungsheft*, 1842.—W. L. A.

**WINNOWNING**. [AGRICULTURE.]

**WINTER**. [PALESTINE.]

**WINTLE**, THOMAS, B.D., was a native of Gloucester, where he was born in 1737. He was educated at Oxford, where he became a fellow and tutor of Pembroke College. He became rector of Wittrisham, Kent, in 1767, and of Brightwell, Berks, in 1774. He died in 1814. His principal work is *Daniel; an Improved Version attempted, with a preliminary dissertation and notes*, Oxford 1792, 4to; Lond. 1836, 8vo. This belongs to the Lowth school of criticism and exegesis, and is a favourable example of the school. Wintle wrote also *A Dissertation on the vision in the second chapter of Zechariah*, Oxford 1797; and a series of discourses on the Beatitudes, under the title of *Christian Ethics*, 2 vols. 8vo, Oxford 1812.—W. L. A.

**WISDOM OF JESUS SON OF SIRACH**. [ECCLESIASTICUS.]

**WISDOM**, THE, OF SOLOMON, one of the deuterocanonical books which have come down to us by tradition as the production of the son of David.

1. *The Title and Position of the Book.*—This book is called—i. *Σοφία Σαλωμών*, or *Σαλωμώντος* (Cod. Alex., Ald. Compl.); *SOPHIA SOLOMONIS*; *SAPIENTIA SOLOMONIS* in the Sept.;

*the Wisdom of Solomon*; and *ܠܚܝܡܐ ܠܫܠܡܝܢ*, *ܠܚܝܡܐ ܠܫܠܡܝܢ*, the Great Wisdom of Solomon, in the

Syriac version, because it was anciently believed to have been written by Solomon, who therein propounds the lessons of wisdom. ii. It is denominated *πανέρπτος σοφία*, *All-Virtuous Wisdom*, an appellation which, though also given to Proverbs and Ecclesiasticus, is especially given by Athanasius and Epiphanius to this book, because it treats more extensively of wisdom than either of the other so-called Solomonic productions; iii. *ἡ θεία σοφία*, *Sapientia Dei*, by Clement of Alexandria (*Strom.* iv. 16), and Origen (on Rom. vii. 14); and iv. In the Vulgate it is simply called *Liber Sapientia*, without the name of Solomon, because St. Jerome disputed the Solomonic authorship of it. The versions of the Reformation are divided between those appellations. Thus, in Luther's version (1536), the Genevan version (1560), the Bishops' Bible (1568), and the A. V. (1611), this book is called the *Wisdom of Solomon*, according to the Sept.; whilst the Zurich version (1531), Coverdale's Bible (1535), Matthew's Bible (1537), Cromwell's Bible (1539), and Cranmer's Bible (1540), denominate it *The Book of Wisdom*, after the Vulgate. As to the position of the book, it is placed in the Sept. and in the Vulgate after the Song of Songs, and before Ecclesiasticus, or immediately after the canonical productions of Solomon, since it was believed that it too proceeded from this monarch. Though all the translations of the Reformation followed the example of Luther's version in separating the deuterocanonical from the canonical books, yet they have deviated from their prototype in the order of the Apocrypha. Thus, whilst Luther, in his Bible, places this book between Judith and Tobit, the Zurich version, which as usual is followed by Coverdale, and he again by Cromwell's Bible, Matthew's Bible, the Bishops' Bible, and Cranmer's Bible, as well as the Geneva version and the A. V., place it between the additions to Esther and Ecclesiasticus.

2. *Design, Division, and Contents of the Book.*—The design of this book is both parnetical and apologetical. It comforts and strengthens the faithful who are distracted by the inexplicable difficulties in the moral government of the world, by showing them that whatever sufferings and taunts they have to endure, both from their apostate brethren and their heathen oppressors, and however much the wicked and the idolaters may prosper here, the elect in following the counsels of divine wisdom will be able to look forward with joy to a future state of retribution, where the righteous Judge will render to the ungodly according to their deeds, and confer upon the godly a blissful immortality.

This design is developed in three sections, into which the book is divisible, the contents of which are as follows:—

(a.) *The First Section* (i. i.–vi. 21), which contains the real problem of the book, opens with an admonition to the magnates of the earth to follow the paths of righteousness, since God only reveals himself to and abides with those who are of an up-

right heart (i. 1-6), and duly registers the deeds of the wicked, which he will most assuredly bring before the bar of a future judgment (7-16). For although the wicked deny the immortality of the soul (ii. 1-6), indulge in the pleasures of this world (7-9), and persecute the righteous, defying God to defend them (10-24); and though the case of the godly seems almost forlorn, yet God exercises a special care over his people, whom he allows to be chastised in order to purify them (iii. 1-7), and has destined his saints to judge the nations of the earth, and to abide for ever with their Lord (8, 9); whilst he has laid up condign punishment for the wicked (10-18). The wicked who have large families are therefore not to be envied, for their children only perpetuate their wickedness (iv. 1-7), whilst the righteous who are suddenly overtaken by death are not to be deplored, since honourable age is not to be measured by length of years, but by holiness of conduct, and since they are sometimes suddenly taken away to escape the snares of the wicked; thus showing that God's mercy is with his saints even in their untimely death, because they, having been perfected in their youth, though dead speak condemnation to the wicked, who shall at last in the great day of retribution be constrained to confess it (8-20). For then the righteous shall triumph, and the wicked who shall witness it will confess with anguish of soul that they have acted foolishly and wickedly, and that those whom they have derided and persecuted in this life are really the children of God, enjoy a glorious immortality, and deal out terrible punishments on the ungodly (v. 1-23). Having shown that this is the doom of the wicked, Solomon reiterates in more earnest tones the warning to the magnates of the earth with which this section commences, seeing that the righteous Judge who invested them with the powers they possess, will soon call them to the bar of his judgment, where there is no respect of persons (vi. 1-8); and tells them that the most effectual way to obey this warning is to learn divine wisdom, who is always ready to be found of those that seek her (9-14), who alone is the safest guide in this world, and leads to a union with the Creator in the world to come (15-21).

(b.) *The Second Section* (vi. 22–ix. 18) describes the nature of this wisdom, the blessings she secures, and the manner in which she is to be obtained, by the experience of Solomon, who recounts it himself in the first person. He tells us that, though an exalted monarch, he realised his mortality, and therefore prayed for wisdom (vi. 22–vii. 7). With this precious gift, which he preferred above thrones, riches, health, and beauty, come all other earthly blessings of which she is the mother (8-12). Through her he became the friend of God, whose she is, and who bestows her as a gift (13-16). By her aid he fathomed the mysteries of the changing seasons, of the heavenly bodies, and of the animal and vegetable kingdoms, as she herself is the maker of all things, and pervades all creation. She alone unites us to God with ties of friendship, and no vice can prevail against her (17-30). She, too, confers all earthly blessings, all intellectual and moral powers, as well as the ability to govern nations, and she can only be obtained from God in answer to prayer (viii. 1-21). Solomon then recites the prayer in answer to which he received this divine gift (ix. 1-18).

(c.) *The Third Section* (x. 1–xix. 22) describes the

blessings which wisdom secured to the people of God, and the sore calamities which befell the ungodly who rejected her teaching, from the history of mankind, beginning with Adam and ending with the conquest of the promised land. Thus it shows how wisdom guided and protected the pious from Adam to Moses (x. 1-xi. 4); how the wicked who despised her counsels and afflicted the righteous were punished, as seen in the case of the Egyptians (xi. 5-xii. 1) and the Canaanites (xii. 2-27). As the chief sin of the Canaanites was idolatry, Solomon takes occasion to describe the origin, folly, and the abominations of idolatry (xiii. 1-xv. 19), and then returns to describe the plagues of Egypt, which constitute an essential part of the history in question, thus showing the awful doom of the wicked and the great deliverance of the righteous (xvi. 1-xix. 22).

3. *Unity and Integrity of the Book.*—From the above analysis of its contents it will be seen that the book forms a complete and harmonious whole; the grand problem discussed in the first section being illustrated in the second section by the experience of Solomon, and in the third section by the experience of God's people, detailed in chronological order. Indeed the unity and integrity of the book were never questioned till the middle of the last century, when Houbigant (*Prolegomena in Not. Crit. in omnes V. T. libros*, i. pp. ccxvi. and ccxxi.) maintained that it consists of two parts, the first (i.-ix.) being written by Solomon in Hebrew, and the second (x.-xix.) being most probably an addition of the Greek translator of the first part. Eichhorn submits (*Einleitung in d. Apokry.* p. 142, ff.) that the two parts, which belong to different authors, are i.-xi. 1, and xi. 2-xix., or if proceeding from the same author, that he must have written the second part in his younger years, before he divested himself of his national prejudices and before his notions were enlarged by Greek philosophy. Bretschneider again (*De libri Sap. parte priore*) will have it that it consists of four different documents, the first of which (i. 1-vi. 8) is a fragment of a larger work originally written in Hebrew by a Palestinian Jew connected with the court of Antiochus Epiphanes; the second (vi. 9-x.) was written in Greek at the time of Christ, by an Alexandrian Jew, who put sentiments of Greek philosophy into the mouth of Solomon in order to vindicate for the Jews the honour of having possessed all philosophic systems and sciences prior to every one else. The third (xii.-xix.) was also written, at the time of Christ, by a common Jew, who possessed the crudest notions; whilst the fourth piece (xi. 1-26) was added by the compiler of the book to connect the second and third parts. These must suffice as specimens of the opinions entertained by some respecting the unity of this book. They are most ably and elaborately refuted by Grimm (*Comment.* p. 9-15).

The integrity of the book is not only impugned by those who dispute its unity, but by some who admit that it has a regularly developed plan. Thus Grotius will have it that it is imperfect and unfinished, having been mutilated by some accident of time; whilst Calmet, who also maintains that the book is unfinished, hesitates to decide whether the end was lost by accident or through the unfavourable circumstances of the times, or whether it was designedly omitted by the author himself. But a conclusion more apposite and more in harmony

with the design of the book can hardly be imagined than xix. 22, in which the just reflection and moral lesson are enunciated as deduced from the whole treatise, that the righteous are under God's special care, and that he 'assists them in every time and place.' Equally untenable is the assertion that the book contains interpolations by a Christian hand. This assertion was first made by Grotius (*Christiana quædam commodis locis addidit, Præf. in Libram Sapientie*), who in his *Comment.* specifies iv. 7, where he remarks 'Sed hæc, ut dixi, Evangelium magis redolent.' Graetz (*Geschichte der Juden*, iii. 443, ff., 2d ed., Leipzig 1863), who advocates the same opinion, adduces ii. 24; iii. 13; iv. 1; xiv. 7. But all these passages, when fairly interpreted, are perfectly consistent with Jewish sentiments; and we are almost sure that if the erudite Dr. Graetz had consulted Grimm's masterly commentary on the passages in question when preparing the second edition of the third volume of his History, he would not have reprinted so literally the remarks from the first edition on this subject.

4. *Philosophical and Doctrinal Character of the Book.*—Though there are Platonic and Stoical sentiments in this book, yet it is not to be supposed that the author propounds therein a philosophical view of Judaism. The Book of Wisdom contains no greater admixture of Greek elements than the post-Babylonian canonical writings contain of Persian element. It is essentially based upon the truths embodied in the O. T., whose spirit it breathes and whose doctrines it sets forth as paramount, whilst the Greek sentiments are very subordinate, and are such as would almost enter spontaneously into the mind of any educated Jew residing in such a place as Alexandria. The doctrines of divine and human wisdom, or *objective* and *subjective* wisdom, as it is termed, propounded in this book, are simply amplifications and bolder personifications of what is to be found in Proverbs and Ecclesiasticus. This may be seen in the conception of *divine wisdom* being an emanation from, or the Spirit of God present with, the Deity before and during the creation of the world, and brooding over the elements of the unformed world (Wisdom vii. 22, 25, ix. 9, 17; with Prov. iii. 19, viii. 22-26, Job xxxiii. 4, Ecclus. xxiv. 3); in the view that human wisdom proceeds from the primordial divine wisdom which permeates all finite and pure spirits (Wisdom vii. 25; with Job xxxii. 8, Prov. ii. 6, Ecclus. i. 1), for which reason the two not unfrequently merge into one another (Wisdom vii. 12, viii. 6, x., with Prov. iii. 13-20, viii.); that she is '*the universitas litterarum*,' she teaches us all arts and sciences—cosmology, chronology, meteorology, astronomy, zoology, pneumatology, psychology, botany, pharmacy, politics, philosophy of history, parables, and enigmas (Wisdom vii. 17-21, viii. 8; with Exod. xxxi. 3, 1 Kings iii. 12, iv. 29-34); and the whole range of morals and spiritual virtues (Wisdom i. 1-18; x. 1-15; Prov. i. 7; iii.) Not only does the author of this book derive his leading thoughts from the canonical Scriptures of the O. T., but, as an orthodox Jew, he even espouses the traditions of his fathers. Thus in harmony with these traditions, which tell us that models of both the tabernacle and the temple were shown by God to Moses and Solomon, he speaks of the temple in Jerusalem as having been made after the model of the temple in heaven (comp. *μνημα σκηνης ἀγίας ἣν ποροποιήσας ἀπ' ἀρχῆς*, Wisd. ix. 8, with *בית*

המקדש שלמטה מכן כנגד בית המקדש שלמעלה, *Menachoth*, 29; Rashi on Exod. xxv. 9, 40; Heb. viii. 5). Cap. x. 19 b, which has occasioned great difficulty to interpreters, and which the Vulgate, Luther, the Zurich Bible, Coverdale's Version, Matthew's Bible, Cromwell's Bible, Cranmer's Bible, the Geneva Version, the Bishops' Bible, Grotius, Calmet, etc., take as antithetical to ver. 19 a, referring it to the Israelites whom wisdom brought forth from the depth of the sea—thus violating both its connection with the following verse, as indicated by *διὰ τοῦτο* and the sense of *ἀναβράζειν*, which is not to bring out, but to spit out, to cast out—is based upon a tradition which tells us that the sea spit out the corpses of the Egyptians when the Jews despoiled them of their weapons. This tradition is given in the *Mechilta*, the so-called *Chaldee paraphrases of Jerusalem*, and Jonathan b. Uziel on Exod. xv. 12, and *Pirke de Rabbi Eliezer*, sect. xlii.\* and is at the basis of the account in Josephus (*Antiq.* ii. 16. 6). Our author also follows tradition in his remark that it was not the turning to the brazen serpent, as stated in Num. xxi. 9, but to God, which saved the Israelites (Wisdom xvi. 7 with *Rosh Ha-Shana*, 26; *Ferusalem Targum*; and Rashi on Num. xxi. 9); that the manna (Num. xi. 8) had all manner of pleasant tastes (Wisdom xvi. 20, 21, with *Toma*, 75); that prayers must be offered to God before the sun rises (Wisdom xvi. 28 with *Mishna Berachoth*, i. 2); that Sodom was destroyed because its inhabitants were inhospitable to strangers (Wisdom xix. 17, 18, with *Sanhedrim*, 109), etc. etc. With these facts before us we entirely differ from Gfrörer (*Philo*, ii. 207, etc.), Dähne (*Alex. Jüd. Religionsphilos.* ii. 153, etc.), and others, who maintain that the author of this book derived his leading tenets from Alexandrian, and more especially from Platonic philosophy, and fully concur with Ewald (iv. 549), who remarks 'that no one who is intimately acquainted with the O. T., as well as with our author, will say that he derived the doctrine of immortality from the above-named source. The specification of the *σωφροσύνη, φρόνησις, δικαιοσύνη, and ἀνδρεία*, as the four cardinal virtues, both here (Wisdom viii. 7) and by Philo (ii. 455, etc.; 4 Maccab. i. 18, etc.; v. 22, etc. (where *εὐσέβεια* is put for *φρόνησις*); xv. 7, where there is a similar change), is indeed real Platonic, and is derived entirely from

the Platonic school. But even these four virtues appear in viii. 7 as merely secondary, and in the whole connection of the treatment of the book as accidental.' Welte (*Einleitung*, 163, ff.), indeed, who does not dispute the agreement of the Book of Wisdom with Alexandrian philosophy, goes so far as to say that it only refers to such things as are also more or less clearly expressed in the canonical books of the Hebrew Scriptures.

In its religious doctrines the book of Wisdom is one of the most important and interesting contributions to the literature of the Jewish theology before the advent of Christ. It shows how the tenets of the Jews were preparing them for the teachings of the N. T. Thus it tells us that God is not the author of death, but made both man and all creatures in the image of his own eternity, and delighted in the whole of his creation (i. 13, 14; xi. 24), which he made for perpetual duration (i. 14 with Rom. viii. 20, 21). Death entered into the world through the envy of the devil (ii. 24). We have here the first instance on record where the serpent which tempted the protoplasts in Paradise is identified with the devil (ii. 24), thus confirming the explanation given of Gen. iii. 1-15 in John viii. 44; Rev. xii. 9; xx. 2. Graetz (iii. 443, ff.), who cannot brook so striking a confirmation on the part of the Jews before Christ to the correctness of the teachings of the N. T., will have it that this is one of the passages interpolated by a Christian hand. But there is very little doubt that the Jews believed in the identity of the serpent and Satan long before the advent of Christ (comp. Ginsburg, *The Kabbalah*, p. 29, Longman 1865), and that this notion has even passed over into the Persic religion (comp. Hengstenberg, *Christology*, i. 7, etc., English translation). The book of Wisdom, moreover, shows that the doctrine of immortality and a future judgment was most emphatically believed and was generally current among the Jews (i. 15; iii. 4; vi. 18, 19; viii. 17); that the Israelites believed that the wicked attract death by their sinful deeds (i. 16); that the saints, who are the children of God (ii. 13, 16, 18), will ultimately judge the world and rule over the nations thereof (iii. 8 with Matt. xix. 28; 1 Cor. vi. 2; Rev. ii. 26; iii. 21; xx. 4-6). The author of this book also propounds the doctrine of the pre-existence of the soul (viii. 20). This, however, he did not derive direct from Platonism, both because the manner in which he enunciates it is different from the mode in which it is represented by Plato and Philo, and because this doctrine was held by the Essenes in Palestine and is to be found in the Talmud (comp. Josephus, *De Bell. Jüd.* ii. 8. 11; *Chagiga*, 12 b; *Sebamoth*, 62; *Aboda Sara*, 5; Ginsburg, *The Kabbalah*, p. 31, etc.) The body is regarded as the seat of sin (i. 4; viii. 20) and as a mere hindrance and prison of the soul (Wisdom ix. 15 with 2 Cor. v. 1-4; Joseph. *De Bell. Jüd.* ii. 8. 11). No trace, however, is to be found in this book of a resurrection of the body or of a personal Messiah.

5. *Author and date of the Book.*—As the book itself ascribes the words therein contained to Solomon, and represents him as narrating his personal experience (vii.-xix.), the book of Wisdom has come down to us by tradition as the production of this great monarch. Thus it is not only expressly described as the work of this wise king in the inscriptions of the most ancient versions (viz. Sept. Syriac, Arabic, etc.), but it is quoted as such by the most

\* This tradition explains the Chaldee paraphrases which have copied it. We shall give it in its oldest poetical form, from the *Mechilta*. It is as follows:—'The sea cast out the dead on the earth, whilst the earth cast them back into the sea. The earth said, When I only received the blood of one person, Abel, it was said to me, Cursed art thou (Gen. iv. 11); how can I now receive the blood of such a multitude of slain ones? Whereupon the Holy One, blessed be he, swore by his right hand that he will not bring the earth into judgment for it.' Etheridge (*The Targums on the Pentateuch*, vol. i. p. 493-4) mistranslates קָבַל קְטִילֵינוּ and קָבַל קְטִילֵינוּ, by receive thy murderers, in defiance of the form of the word and the original tradition. A knowledge of the latter would have preserved him from similar mistakes, which are not unfrequently to be met with in his translation of the Chaldee paraphrases.

συνοδεύσω, vi. 22; ἀδελῶς—ἀφδόνως, vii. 13; ἀργὰ—ἐργα, xiv. 5; ἀδικα—δικη, i. 8; ἰδίας ἰδιότητος, ii. 23; ἀτραπὸν τρόπιος, v. 10; δυνατοὶ δὲ δυνατῶς, vi. 6; ὁσίων τὰ ὅσια ὁσιωθήσονται, vi. 10, κ. τ. λ. see Grimm, p. 7)—showing beyond doubt that the book was originally written in Greek. As to the Hebrew colouring of the language, the lexical Hebraisms (ex. gr. ἀπλότης καρδίας, i. 1; μερὶς, κλήρος, ii. 9; τρέβοι, ii. 15; λογίζεσθαι εἰς τι, ii. 16; πληροῦν χρόνον, iv. 13; ὅσιοι τοῦ Θεοῦ, iv. 15), the numerous Hebrew parallelisms, etc. etc., these are to be expected from so thorough an Israelite as the writer of this book manifestly was, especially when it is borne in mind that the author breathes throughout the whole of his work the spirit of the O. T.; that the book of Wisdom is an Hellenistic version of the same tradition wherein Solomon is represented as having philosophically refuted scepticism and tyranny, of which the book of Ecclesiastes is a Palestinian version [ECCLESIASTES], and that the author took the ancient Hebrew poetry for his model.

The style of the book is very uneven. Some portions of it are truly sublime, and will bear comparison with any passages in the best classics; as, for instance, the delineation of the sensualist (ii. 1, etc.), the picture of future judgment (v. 15, etc.), and the description of wisdom (vii. 22–viii. 1); whilst in other passages the author, as Bishop Lowth remarks, 'is often pompous and turgid as well as tedious and diffuse, and abounds in epithets, directly contrary to the practice of the Hebrews' (*Lectures on the Sacred Poetry of the Hebrews*, Prælect. xxiv.).

7. *Canonicity and Authority of the Book.*—Though the book of Wisdom, like the other deuterocanonical books, was never included in the canon of the synagogue, as is evident from the list of the Hebrew Scriptures given in the Talmud (*Baba Bathra*, 14); and though it is not found in the catalogues of Origen, Jerome, Epiphanius, Athanasius, Cyril, etc.; yet there can be but little doubt that it was held in great respect among the Jews, and that the apostle Paul was familiar with its language, as may be seen from the striking parallels in Rom. ix. 21 to Wisd. xv. 7; in Rom. ix. 22 to Wisd. xii. 20; in Eph. vi. 13–17 to Wisd. v. 17–19. The next allusion to it, though also not by name, is to be found in the epistle of St. Clement to the Corinthians (i. 27 with Wisd. xi. 22; xii. 12); and Eusebius tells us (*Hist. Eccl.* v. 26) that Irenæus made use of it in a lost book. Clement of Alexandria quotes it as the inspired work of Solomon, with the introductory phrase ἡ θεία σοφία λέγει (*Strom.* iv. 16, p. 609, ed. Potter). It is also quoted as such by Origen (*Contra Celsum*, iii. 72), Tertullian (*Advers. Valent.* c. ii.), Cyprian (*Exhortat. Martyr.* 12), Cyril (*Catech.* ix. p. 127), etc. etc. Hence it was declared as canonical by the third council of Carthage (A.D. 397), in the councils of Sardis (A.D. 347), Constantinople in Trullo (A.D. 692), Toledo (A.D. 575), Florence (A.D. 1438), and in the fourth session of the council of Trent (1546). With other deuterocanonical writings it remained in the canon till the time of the Reformation, when Luther first separated it and put it together with the rest of the Apocrypha at the end of the O. T. Still Luther spoke of it with great respect (*Vorrede auf die Weisheit Salomonis* in his translation of the Bible, ed. 1534). In the Anglican Church the book of

Wisdom is looked upon with still greater favour. Thus chapters xiii. xiv. are quoted in the *Homilies* as the writing of Solomon (*Sermon against Peril of Idolatry*, part iii.); vii. 11, 16; ix. 13; xiii. 1; xvi. 8, are cited as the work of the same wise man (*Sermons for Rogation Week*, part i.-iii.); iii. 1, xiii.-xv. are quoted as Scripture (*Sermon against the fear of Death*, part iii.; *Against Idolatries*, part i. and iii.); and cap. v. is referred to as *Holy Scripture* (*Against Wilful Rebellion*, part vi.).

8. *Literature.*—Rainold, *Censura Librorum Apocryph.* 1618, especially Prall. xvii.-xxiii.; Arnald, *The Book of Wisdom*, in Patrick, Lowth, Whitby, and Lowman's *Critical Commentary*; Wessely, *Hebrew Commentary on Wisdom*, Berlin 1780; Gutmann, *Die Apokryphen des Alten Testaments*, p. 3, ff., Altona 1841; Ewald, *Geschichte des Volkes Israel*, iv. 548, ff., Gottingen 1852; Schmid, *Das Buch der Weisheit übersetzt und erklärt*, Vienna 1858; and especially Grimm, *Das Buch der Weisheit erklärt*, part vi. of the *Kurzegefasstes exegetisches Handbuch zu den Apokryphen d. A. T.* Leipzig 1860. See also Grætz, *Geschichte der Juden*, iii. pp. 292 ff., 242 ff., 2d edition, Leipzig 1863; and the *Introductions to the O. T.* by Bertholdt (v. 225, ff., Erlangen 1815); De Wette (section 312-315); Keil (section 244-246, Erlangen 1859); and Davidson (iii. 396-410, London 1863).—C. D. G.

WITCH. The fem. מְכַשֶּׁפָּה (a sorceress), is found in Exod. xxii. 18; Sept. φαρμακός; Vulg. *malefica*; the mas. מְכַשֵּׁף (a sorcerer or magician), in Exod. vii. 11; Deut. xviii. 10; Dan. ii. 2; Mal. iii. 5; Sept. φαρμακός; Vulg. *maleficus*; and בְּשַׁף in Jer. xxvii. 9. In the N. T. 'sorcerer,' φαρμακός; Vulg. *maleficus*, occurs in Rev. xxi. 8; xxii. 15.

WITCHCRAFT בְּשִׁפָּה, pl. בְּשִׁפִּים occurs in 2 Kings ix. 22; Is. xlvii. 9, 12; Mic. v. 12; Nah. iii. 4; Sept. φαρμακεία, φάρμακα; Vulg. *veneficium*, *maleficium*. In the Apocrypha 'witchcraft,' 'sorcery,' φαρμακεία; *veneficium*, Wisd. xii. 4; xviii. 13; and in the N. T. Gal. v. 20; Rev. ix. 21; xviii. 23. As a verb בִּשְׁפָה, 'he used witchcraft,' occurs in 2 Chron. xxxiii. 6; ἐφαρμακεύετο, *maleficus artibus inserviebat*. This verb, in Arabic, signifies 'to reveal' or 'discover,' in Syriac *eth-paal*, according to Gesenius, 'to pray,' but this word, he observes, like many other sacred terms of the Syrians, as כְּמֹרִים בעל, etc., is restricted by the Hebrews to idolatrous services: hence כִּשְׁף means 'to practise magic,' literally 'to pronounce or mutter spells.' The word φαρμακός is derived from φαρμακεύω, to administer or apply medicines as remedies or poisons; to use magical herbs, drugs, or substances, supposed to derive their efficacy from magical spells; and thence to use spells, conjurations, or enchantments; hence φαρμακός means, in the classical writers, a preparer of drugs, but generally of poisons, or drugs that operate by the force of magical charms; and thence a magician, an enchanter of either sex. It occurs in the latter sense in Josephus (*Antiq.* xvii. 4. 1), and is applied by him to a female, τὴν μητέρα αὐτοῦ φαρμακὸν καὶ πόρνην ἀποκαλεῖσαι (*Antiq.* ix. 6. 3). This word also answers in the Sept. to חֲרָטְמִים, 'magicians' (Exod. ix. 11), φαρμακοί, *malefici*. The received text of Rev. xxi. 8 reads φαρμακεύς;

but the Alexandrian, and sixteen later MSS., with several printed editions, have *φαρμακός*, a reading embraced by Wetstein, and by Griesbach received into the text. *Φαρμακός* occurs in the same sense as *φαρμακός*, in Lucian (*Dial. Deor.* xiii. 1; Joseph. *Vita*, sec. 31). The word *φαρμακεία* is used of *Circe* by Aristophanes (*Plut.* 302), and in the same sense of enchantment, etc., by Polybius (vi. 13. 4; xl. 3. 7). It corresponds in the Sept. to לְהַטִּים, 'enchantments' (Exod. vii. 11, 22). The verb *φαρμακεύω* is employed in the sense of using enchantments by Herodotus (vii. 114), where, after saying that when Xerxes came to the river Strymon, the magi sacrificed white horses to it, he adds: *φαρμακεύσαντες δὲ ταῦτα ἐς τὸν ποταμὸν, καὶ ἄλλα πολλὰ πρὸς τοῦτοις*,—'and having used these enchantments and many others to the river,' etc. The precise idea, if any, now associated with the word 'witch'—but, however, devoutly entertained by nearly the whole nation in the time of our translators—is that of a female, who, by the agency of Satan, or rather, of a familiar spirit or gnome appointed by Satan to attend on her, performs operations beyond the powers of humanity, in consequence of her compact with Satan, written in her own blood, by which she resigns herself to him for ever. The belief in the existence of such persons cannot be traced higher than the middle ages, and was probably derived from the wild and gloomy mythology of the northern nations, amongst whom the Fatal Sisters, and other impersonations of destructive agency in a female form, were prominent articles of the popular creed. A very different idea was conveyed by the Hebrew word, which probably denotes a sorceress or magician, who pretended to discover, and even to direct the effects ascribed to the operation of the elements, conjunctions of the stars, the influence of lucky and unlucky days, the power of invisible spirits, and of the inferior deities (Graves's *Lectures on the Pentateuch*, pp. 109, 110, Dublin 1829). Sir Walter Scott well observes, that 'the sorcery or witchcraft of the O. T. resolves itself into a trafficking with idols and asking counsel of false deities, or, in other words, into idolatry' (*Letters on Demonology and Witchcraft*, London 1830, Let. 2). Accordingly, sorcery is in Scripture uniformly associated with idolatry (Deut. xviii. 9-14; 2 Kings ix. 22; 2 Chron. xxxiii. 5, 6, etc.; Gal. v. 20; Rev. xxi. 8). The modern idea of witchcraft, as involving the assistance of Satan, is inconsistent with Scripture, where, as in the instance of Job, Satan is represented as powerless till God gave him a limited commission; and when 'Satan desired to sift Peter as wheat,' no reference is made to the intervention of a witch. Nor do the actual references to magic in Scripture involve its reality. The mischiefs resulting from the *pretension*, under the theocracy, to an art which involved idolatry, justified the statute which denounced it with death;

though instead of the unexampled phrase לֹא תַחִיָּה, 'thou shalt not suffer to live,' Michaelis conjec-

tures לֹא תַחִיָּה, 'shall not be' (Exod. xxii. 18), which also better suits the parallel, 'There shall not be found among you, etc., a witch' (Deut. xviii. 10). Indeed, as 'we know that an idol is nothing in the world, and that there is none other God but one' (1 Cor. viii. 4), we must believe all pretensions to traffic with the one, or ask counsel

of the other, to be equally vain. Upon the same principle of suppressing idolatry, however, the prophets of Baal also were destroyed, and not because Baal had any real existence, or because they could avail anything by their invocations. It is highly probable that the more intelligent portion of the Jewish community, especially in later times, understood the emptiness of pretensions to magic (see Is. xlv. 25; xlvii. 11-15; Jer. xiv. 14; Jonah ii. 8). Plato evidently considered the mischief of magic to consist in the tendency of the pretension to it, and not in the reality (*De Leg.* lib. 11). Divination of all kinds had fallen into contempt in the time of Cicero: 'Dubium non est quin hæc disciplina et ars augurum evanuerit jam et vetustate et negligentia' (*De Legibus*, ii. 13). Josephus declares that he laughed at the very idea of witchcraft (*Vita*, sec. 31). For the very early writers who maintained that the wonders of the magicians were not supernatural, see *Universal Hist.* (vol. iii. p. 374, 8vo ed.) It seems safe to conclude from the Septuagint renderings, and their identity with the terms used by classical writers, that the pretended exercise of this art in ancient times was accompanied with the use of drugs, or fumigations made of them. No doubt the skilful use of certain chemicals, if restricted to the knowledge of a few persons, might, in ages unenlightened by science, along with other resources of natural magic, be made the means of extensive imposture. The natural gases, exhalations, etc., would contribute their share, as appears from the ancient account of the origin of the oracle at Delphi. The real mischiefs ever effected by the professors of magic on mankind, etc., may be safely ascribed to the actual administration of poison. Josephus states a case of poisoning under the form of a philtre or love potion, and says that the Arabian women were reported to be skilful in making such potions (*Antiq.* xvii. 4. 1). Such means doubtless constitute the real perniciousness of the African species of witchcraft called *Obi*, the similarity of which word to the Hebrew בִּזְיוֹן, *inflation*, is remarkable. Among the Sandwich Islanders, some, who had professed witchcraft, confessed, after their conversion to Christianity, that they had poisoned their victims. The death of Sir Thomas Overbury is cited as an instance in this country, by Sir Walter Scott (*ut supra*). There was, indeed, a wide scope for the production of very fantastic effects, short of death, by such means. The story of 'the witch of Endor,' as she is commonly but improperly called, is, under the article SAUL, referred to witchcraft. She indeed belongs to another class of pretenders to supernatural powers [DIVINATION]. She was a necromancer, or one of those persons who pretended to call up the spirits of the dead to converse with the living (see Is. viii. 19; xxix. 4; lxx. 3). A full account is given of such persons by Lucan (vi. 591, etc.) and by Tibullus (i. 2; v. 45), where the pretensions of the sorceress are thus described:

Hæc cantu finditque solum, Manesque sepulchris  
Elicit, et tepido devocat ossa rogò.

Of much the same character is the Sibyl in the 6th book of Virgil's *Æneid*. It is related as the last and crowning act of Saul's rebellion against God, that he consulted 'a woman who had a familiar spirit' (1 Sam. xxviii. 7), literally 'a mistress of the *Obi*,'—an act forbidden by the divine law (Lev. xx. 6), which sentenced the pretenders to

such a power to death (ver. 27), and which law Saul himself had recently enforced (1 Sam. xxviii. 3, 9), because, it is supposed, they had freely predicted his approaching ruin; although, after the well-known prophecies of Samuel to that effect, the disasters Saul had already encountered, and the growing influence of David, there 'needed no ghost to come from the grave to tell them this.' Various explanations of this story have been offered. It has been attempted to resolve the whole into *imposture and collusion*. Saul, who was naturally a weak and excitable man, had become, through a long series of vexations and anxieties, absolutely 'delirious,' as Patrick observes. 'He was afraid and his heart greatly trembled,' says the sacred writer. In this state of mind, and upon the very eve of his last battle, he commissions his *own servants* to seek him a woman that had a familiar spirit, and attended by two of them, he comes to her 'by night,' the most favourable time for imposition. He converses with her alone, his two attendants, whether his secret enemies or real friends, being absent, *somewhere*, yet, however, close at hand. Might not one of these, or some one else, have agreed with the woman to personate Samuel in another room?—for it appears that Saul, though he spoke with, did not *see* the ghost (ver. 13, 14); who, it should be observed, told him nothing but what his own attendants could have told him, with the exception of those words, 'to-morrow shall thou and thy sons be with me' (ver. 19); to which, however, it is replied, that Saul's death did not occur upon the morrow, and that the word so translated is sufficiently ambiguous, for though מחר means 'to-morrow' in some passages, it means the future indefinitely in others (Exod. xiii. 14, and see the margin; Josh. iv. 6, 21; comp. Matt. vi. 34). It is further urged, that her 'crying with a loud voice,' and her telling Saul, at the same time, that she knew him, were the well-timed arts of the sorceress, intended to magnify her pretended skill. It is, however, objected against this, or any other hypothesis of collusion, that the sacred writer not only represents the Pythoness as affirming, but also himself affirms, that she saw Samuel, and that Samuel spoke to Saul, nor does he drop the least hint that it was not the real Samuel of whom he was speaking. The same objections apply equally to the theory of ventriloquism, which has been grounded upon the word used by the Sept., ἐγγασ-τρίμυθος. Others have given a *literal interpretation* of the story, and have maintained that Samuel actually appeared to Saul. Justin Martyr maintains this theory, and in his dialogue with Trypho the Jew, urges this incident in proof of the immortality of the soul (p. 333). The same view is taken in the additions to the Sept. in 1 Chron. x. 13, καὶ ἀπεκρίνατο αὐτῷ Σαμουὴλ ὁ προφήτης; and in Ecclus. xvi. 9, 20, it is said, 'and after his death Samuel prophesied, and showed the king his end,' etc. Such also is the view Josephus takes (*Antiq.* vi. 14. 3. 4), where he bestows a laboured eulogium upon the woman. It is, however, objected that the actual appearance of Samuel is inconsistent with all we are taught by revelation concerning the state of the dead; involves the possibility of a spirit or soul assuming a corporeal shape, conversing audibly, etc.; and further, that it is incredible that God would submit the departed souls of his servants to be summoned back to

earth, by rites either utterly futile, or else deriving their efficacy from the co-operation of Satan. So Tertullian argues (*De Animâ*, cap. lvii.), and many other of the ancients. Others have supposed that the woman induced Satan or some evil spirit to personate Samuel. But this theory, beside other difficulties, attributes nothing less than miraculous power to the devil; for it supposes the apparition of a spiritual and incorporeal being, and that Satan can assume the appearance of any one he pleases. Again, the historian

(ver. 14) calls this appearance to Saul, שמואל, 'Samuel himself' (the latter word is entirely omitted by our translators); which he could not with truth have done if it was no other than the devil; who, besides, is here represented as the severe reprover of Saul's impiety and wickedness. The admission that Satan or an evil spirit could thus personate an individual at pleasure, would endanger the strongest evidences of Christianity. Others have maintained another interpretation, which appears to us at once tenable and countenanced by similar narratives in Scripture—namely, that the whole account is the narrative of a miracle, a *divine representation or impression*, partly upon the senses of Saul and partly upon those of the woman, and intended for the rebuke and punishment of Saul. It is urged, from the air of the narrative in ver. 11, 12, that Samuel appeared before the woman had any time for jugglery, fumigations, etc.; for although the word 'when' (ver. 12) is speciously printed in Roman characters, it has nothing to answer to it in the original, which reads simply thus, beginning at ver. 11: 'Then said the woman, Whom shall I bring up unto thee? And he said, Bring me up Samuel. And the woman saw Samuel, and cried with a loud voice.' No sooner then had Saul said, 'Bring me up Samuel,' than Samuel himself was presented to her mind—an event so contrary to her expectation, that she cried out with terror. At the same time, and by the same miraculous means, she was made aware of the royal dignity of her visitant. The vision then continues in the mind of Saul, who thereby receives his last reproof from heaven, and hears the sentence of his approaching doom. Thus God interposed with a miracle previously to the use of any magical formulæ, as he did when the king of Moab had recourse to sorceries to overrule the mind of Balaam, so that he was compelled to bless those whom Balak wanted him to curse (Num. xxiii.); and as God also interposed when Ahaziah sent to consult Baal-zebub, his god, about his recovery, when by his prophet Elijah he stopped the messengers, reproved their master, and denounced his death (2 Kings i. 2, 16). It may also be observed that Saul was on this occasion simply sentenced to the death he had justly incurred by having recourse to those means which he knew to be unlawful. Of the same nature of divine representation or vision, we think, was the reproof administered to Elijah, at Mount Horeb, when 'a great and strong wind rent the mountains, and brake in pieces the rocks before the Lord,' and was succeeded by 'an earthquake,' etc. (1 Kings xix. 11, etc.) Of the same nature, also, was the Temptation of our Lord (see the article, and other instances of divine vision not expressly specified as such, in Bishop Law's *Theory of Religion*, pp. 85, 86, London 1820). Farmer is of opinion that the suppression of the word 'himself'

(ver. 14), and the introduction of the word 'when' (ver. 12), are to be ascribed to the prejudices of our translators. If they do not betray a bias on their minds, these instances support the general remark of Bishop Lowth upon the English translation, 'that in respect of the sense, and accuracy of interpretation, the improvements of which it is capable are great and numberless' (*Preliminary Dissertation to Isaiah*, ad finem). Some other *mistranslations* occur in reference to this subject. In 1 Sam. xv. 23, 'rebellion is as the sin of witchcraft,' should be of 'divination.' In Deut. xviii. 10, the word *חֹשֶׁב* does not mean 'witch,' but, being masculine, 'a sorcerer.' In Acts viii. 9, the translation is exceedingly apt to mislead the mere English reader: 'Simon used sorcery, and bewitched the people of Samaria'—*Σίμων προῦπηρ-χεν ἐν τῇ πόλει μαγείων καὶ ἐξιστῶν τὸ ἔθνος τῆς Σαμαρείας*—i.e. 'Simon had been pursuing magic, and perplexing (or astonishing) the people,' etc. See also ver. 11, and comp. the use of the word *ἐξιστῆμι*, Matt. xii. 23. In Gal. iii. 1, 'Foolish Galatians,' *τὸς ἡυᾶς ἐβόσκατε*, 'who hath fascinated you?' (For the use of the words *βακάνια* and *χαρμακία* in magic, among the Greeks, see Potter's *Archæologia Græca*, vol. i. chap. xviii. p. 356, etc., Lond. 1775.) It is considered by some that the word 'witchcraft' is used metaphorically for the allurements of pleasure (Nah. iii. 4; Rev. xviii. 23), and that the 'sorcerers' mentioned in ch. xxi. 8 may mean sophisticians of the truth. The kindred word *φαρμάσσω* is used by metonymy, as signifying 'to charm,' 'to persuade by flattery,' etc. (Plato, *Sympos.* sec. 17), 'to give a temper to metals' (*Odys.* ix. 393). The last-named theory concerning the narrative of Samuel's appearance to Saul is maintained with much learning and ingenuity by Hugh Farmer (*Dissertation on Miracles*, p. 472, etc., Lond. 1771). It is adopted by Dr. Waterland (*Sermons*, vol. ii. p. 267), and Dr. Delaney in his *Life of David*; but is combated by Dr. Chandler with objections, which are, however, answered or obviated by Farmer. On the general subject, see Michaelis's *Laws of Moses*, by Dr. A. Smith, London 1814, vol. iv. pp. 83-93; Banier's *History of Mythology*, lib. iv.; Winer's *Biblisches Real-Wörterbuch*, art. 'Zauberei.'—J. F. D.

WITNESS (ῥῦ; Sept. *μάρτυς* or *μάρτυρ*; Vulg. *testis*). It is intended in the present article to notice some of the leading and peculiar senses of this voluminous word. It occurs, 1st, in the sense of a *person* who deposes to the occurrence of any fact, a witness of any event. The Hebrew word is derived from *רָאָה*, to repeat. The Greek is usually derived from *μεῖρω*, to 'divide,' 'decide,' etc., because a witness decides controversies (Heb. vi. 16); but Damm (*Lex. Hom.* col. 1495) derives it from the old word *μάρη*, 'the hand,' because witnesses anciently held up their hands in giving evidence. This custom among the ancient Hebrews is referred to in Gen. xiv. 22; among the heathens, by Homer (*Il.* x. 321), and by Virgil (*Æn.* xii. 196). God himself is represented as swearing in this manner (Deut. xxxii. 40; Ezek. xx. 5, 6, 15; comp. Num. xiv. 30). So also the heathen gods (Pindar, *Olymp.* vii. 119, 120). These Hebrew and Greek words, with their various derivations, pervade the entire subject. They are applied to a *judicial witness* in Exod. xxiii. 1;

Lev. v. 1; Num. v. 13; xxxv. 30 (comp. Deut. xvii. 6; xix. 15; Matt. xviii. 16; 2 Cor. xiii. 1); Prov. xiv. 5; xxiv. 28; Matt. xxvi. 65; Acts vi. 13; 1 Tim. v. 19; Heb. x. 28. They are applied, *generally*, to a person who certifies, or is able to certify, to any fact which has come under his cognisance (Josh. xxiv. 22; Is. viii. 2; Luke xxiv. 48; Acts i. 8, 22; 1 Thes. ii. 10; 1 Tim. vi. 12; 2 Tim. ii. 2; 1 Pet. i. 5). So in allusion to those who witness the public games (Heb. xii. 1). They are also applied to any one who testifies to the world what God reveals through him (Rev. xi. 3). In the latter sense the Greek word is applied to our Lord (Rev. i. 5; iii. 14). It is further used in the ecclesiastical sense of *martyr* [MARTYR]. Both the Hebrew and Greek words are also applied to *God* (Gen. xxxi. 50; 1 Sam. xii. 5; Jer. xlii. 5; Rom. i. 9; Phil. i. 8; 1 Thes. ii. 5); to *inanimate things* (Gen. xxxi. 52; Ps. lxxxix. 37). The supernatural means whereby the deficiency of witnesses was compensated under the theocracy have been already considered under the articles ADULTERY, TRIAL OF; URIM AND THUMMIM. For the punishment of false witness and the suppression of evidence, see PUNISHMENT. For the forms of adjuration (2 Chron. xviii. 15), see ADJURATION. Opinions differ as to what is meant by 'the faithful witness in heaven' (Ps. lxxxix. 37). Some suppose it to mean the moon (comp. Ps. lxxii. 5, 7; Jer. xxxi. 35, 36; xxxiii. 20, 21; Eccles. xliii. 6); others, the rainbow (Gen. ix. 12-17).—2. The witness or *testimony* itself borne to any fact is expressed by *ῥῦ*; *μαρτυρία*; *testimonium*. They are used of *judicial testimony* (Prov. xxv. 18; Mark xiv. 56, 59). In ver. 55, Schleusner takes the word *μαρτυρία* for *μάρτυρ*, the abstract for the concrete (Luke xxii. 71; John viii. 17; Joseph. *Antiq.* iv. 8. 15). It denotes the testimony to the truth of anything *generally* (John i. 7, 19; xix. 35); that of a poet (Tit. i. 13). It occurs in Josephus (*Cont. Apion.* i. 21). In John iii. 11, 32, Schleusner understands the *doctrine*, the thing professed; in v. 32, 36, the *proofs* given by God of our Saviour's mission; comp. v. 9. In viii. 13, 14, both he and Bretschneider assign to the word the sense of *praise*. In Acts xxii. 18, the former translates it *teaching* or *instruction*. In Rev. i. 9 it denotes the *constant profession* of Christianity, or testimony to the truth of the gospel (comp. i. 2; vi. 9). In 1 Tim. iii. 7 *μαρτυρίαν καλὴν* means a *good character* (comp. 3 John 12; Eccles. xxxi. 34; Joseph. *Antiq.* vi. 10. 1). In Ps. xix. 7, 'The testimony of the Lord is sure,' probably signifies the *ordinances, institutions*, etc. (comp. cxix. 22, 24, etc.) Those ambiguous words, 'He that believeth in the Son of God hath the witness in himself' (1 John v. 10), which have given rise to a variety of fanatical meanings, are easily understood, by explaining the word *ἔχει*, 'receives,' 'retains,' etc.—i.e. the foregoing testimony which God hath given of his Son, whereas the unbeliever rejects it. The whole passage is obscured in the English translation by neglecting the uniformity of the Greek, and introducing the word 'record,' contrary to the profession of our translators in their *Preface to the Reader* (ad finem). The Hebrew word, with *μαρτύριον*, occurs in the sense of *monument, evidence*, etc. (Gen. xxi. 30; xxxi. 44; Deut. iv. 45; xxxi. 26; Josh. xxii. 27; Ruth iv. 7; Matt. viii. 4; Mark vi. 11; Luke xxi. 13; James v. 3). In 2 Cor. i. 12, Schleusner explains *μαρτύριον*, com-

mendation. In Prov. xxix. 14 and Amos i. 11, לעד is pointed to mean *perpetually, for ever*, but the Sept. gives εἰς μαρτύριον; Aquila εἰς ἔτι; Symmachus εἰς αἰ; Vulg. *in aeternum*. In Acts vii. 44 and Rev. xv. 5, we find ἡ σκηνή τοῦ μαρτυρίου,

and this is the Sept. rendering for מועד אהל (which really means 'the tabernacle of the congregation') in Exod. xxix. 42, 44; xl. 22, 24—deriving מועד from עוּד, 'to testify,' instead of from עוֹד, 'to assemble.' On 1 Tim. ii. 6, see Bowyer's *Conjectures*. In Heb. iii. 5, Schleusner interprets εἰς μαρτύριον τῶν λαληθησομένων, 'the promulgation of those things about to be delivered to the Jews.'—3. *To be or become a witness*, by testifying the truth of what one knows. Thus the Sept. translates העיד (Gen. xliii. 3), μαρτυρέω, *to bear witness*, and Amos iii. 13: see also 1 Kings xxi. 10, 13. In John i. 7; xv. 26; xviii. 23, Schleusner gives as its meaning, *to teach or explain*; in John iv. 44; vii. 7; 1 Tim vi. 13, *to declare*; in Acts x. 43; Rom. iii. 21, *to declare prophetically*. With a dative case following, the word sometimes means *to approve* (Luke iv. 22). So Schleusner understands Luke xi. 48, 'ye approve the deeds of your fathers,' and he gives this sense also to Rom. x. 2. In like manner the passive μαρτυρούμαι, 'to be approved,' 'beloved,' 'have a good character,' etc. (Acts vi. 3; 1 Tim. v. 10; comp. 3 John 6, 12). 'The witness of the Spirit,' alluded to by St. Paul (Rom. viii. 16), is explained by Macknight and all the best commentators as the extraordinary operations of the Holy Spirit concurring with the filial dispositions of converted Gentiles, 'to prove that they are 'the children of God,' as well as the Jews.—4. 'To call or take to witness,' to invoke as witness, μαρτύρομαι (Acts xx. 26; Gal. v. 3; Joseph. *De Bell. Jud.* iii. 8. 3). A still stronger word is διαμαρτύρομαι, which corresponds to העיד (Deut. iv. 26). It means 'to admonish solemnly,' 'to charge earnestly,' 'to urge upon' (Ps. lxxxi. 8; Neh. ix. 26; Luke xvi. 28; Acts ii. 40). In other passages the same words mean to 'teach earnestly.' In Job xxix. 11, a beautiful phrase occurs, 'When the eye saw me it gave witness to me.' The admiring expression of the eye upon beholding a man of eminent virtue and benevolence, is here admirably illustrated. The description of the mischief occasioned by a false witness, in Prov. xxv. 18, deserves notice; 'a man that beareth false witness against his neighbour, is a maul, and a sword, and a sharp arrow.' Few words afford more exercise to discrimination, in consequence of the various shades of meaning in which the context requires they should be understood.—J. F. D.

WITSIUS, HERMANN, D.D., was born at Euchuysen, in Friesland, 12th February 1636. After officiating as pastor in different places, he was appointed to a theological chair at Utrecht, from which he passed to the same at Franeker, and ultimately to the professorship of theology at Leyden, where he died 22d October 1708. He was a learned and pious divine, and orthodox according to the Cocceian type. His most important works, besides his system of theology, entitled *De Economia fœderum*, in which he gives the best exposition extant of the federal theology, are his *Miscellanea Sacra*, of which the best edition is that published at Leyden 1736, 2 vols. 4to; his *Ægyptiaca sive de Ægyptior. sacrar. cum Hebr. collatione*,

4to, Amst. 1683, Bas. 1739; and his *Meletemata Leidensia quibus continentur prælectiones de vita et rebus gestis Pauli, necnon dissertt. exeget. duodecas denique Comment. in Ep. Judæ*, 4to, Leyd. 1703. Translations into English have appeared of his *Æconomia*, of his *Dissertations on the Creed* (by Donald Frazer, D.D., 2 vols. 8vo), and of his *Dissertations on the Lord's Prayer* (by William Pringle, in 'Edin. Bib. Cab.' No. 24).—W. L. A.

#### WIZARD. [DIVINATION.]

WOIDE, CHARLES GODFREY, D.D., a native of Germany, was born in 1725, and was educated at Frankfort-on-the-Oder and at Leyden. After being some time pastor at Lissa, he came over to be preacher at the German Chapel Royal, London. In 1782 he became assistant-librarian in the British Museum. Whilst in this office he made use of his learning and opportunities to transcribe with his own hand the N. T. portion of the *Codex Alexandrinus*, which forms one of the special treasures of that institution, and this he afterwards published in *facsimile* in 1 vol. fol., Lond. 1786 [MANUSCRIPTS]. The preface and the various readings of this splendid work were republished by Spohn under the title *Notitia Codicis Alex. cum var. ejus lectt. omnibus*, Lips. 1790, with notes by Spohn. At the time of his death, which took place 10th May 1790, Woide was engaged in preparing *Fragmenta N. T. a vers. Ægyptica Dialecti Thebaid. Sahidic. seu superioris Ægypti*. This was completed by Dr. Ford, and appeared in 1 vol. fol., Oxon. 1799.—W. L. A.

#### WOLF. [ZEEB.]

WOLF, JOHANN CHRISTOPH, was born at Wernigerode 21st February 1683. He was educated at Wittenberg, and when he had finished his studies there he spent some time in travelling through Holland and England, chiefly with a view of exploring the public libraries of these countries. In 1710 he was appointed professor of philosophy at Wittenberg; in 1712, professor of Oriental languages at Hamburg; in 1715, pastor of the Domkirche in that city; and in 1719, pastor of St. Catherine's there. He died 25th July 1739. He was a man of learning and indefatigable labour, and we are indebted to him for several works of standard value in the department to which they belong. These are—*Historia Lexicor. Heb.*, Wittenb. 1705; *Bibliotheca Hebræa sive notitia auct. Heb.*, 4 vols. 4to, Hamb. 1715-33; *Cura Philologica in N. T.* (1725-35), best edition, 5 vols. 4to, Basil 1741; *Epitaphia Judaica Heb. et Lat.* in Ugolino Thesaur. xxxiii.; *Anecdota Græca Sacra et Profana ex MSS. cruta*, 4 vols. 8vo, Hamb. 1722-24; *Notitia Karaeorum hausta ex tract. Mardochai*, etc., 4to, Hamb. 1721.—W. L. A.

WOLFSSOHN (= *b. Seeb Wolf*), AARON, also called Aaron Halle (אהרן האללי), was born 1736, and died in Fürth, March 20, 1835, in the seventy-ninth year of his age. He was a distinguished disciple of Mendelssohn, professor in King William School at Breslau, and worked in the department of Biblical exegesis and Hebrew literature in conjunction with Joel Löwe, G. Solomon, etc. etc. Of his numerous writings, the following relate to the elucidation of the Scriptures and the Hebrew language:—(1.) A German translation of Lamentations, with an elaborate Hebrew introduction and commentary by

Löwe, Berlin 1788. (2.) A translation of Esther, with a Hebrew introduction and commentary by Löwe, Berlin 1788. (3.) A translation of Ruth, with a Hebrew introduction and commentary by Löwe, Berlin 1788. (4.) A Hebrew commentary on the Song of Solomon, written conjointly with Löwe, accompanying Mendelssohn's translation of this book, Berlin 1789. (5.) The Book of Job, with a German translation and Hebrew commentary, Prague 1791; Vienna 1806. (6.) The First Book of Kings, with a German translation and Hebrew commentary, Breslau 1809. (7.) Critical and exegetical annotations on the vision of Habakkuk, Breslau 1806. (8.) A German translation of the first two chapters of Habakkuk, published in the periodical entitled *Jedidja*, vol. ii. p. 107, ff. (9.) A German translation and Hebrew exposition of the Sabbatic and Festival Lessons [HAPHTAROTH], in conjunction with Löwe, the two Euchels, Theodor, and Friedländer, Berlin 1790. And (10.) A Hebrew primer, entitled *Ab-taljon* (אַבְטַלְיוֹן), with an introduction by Friedländer, Berlin 1790; Breslau 1799; Vienna 1800; Prague 1806; Vienna 1814. He also wrote a number of essays and reviews on sundry Biblical subjects, which are enumerated by Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 2732-2734; Fürst, *Bibliotheca Judaica*, iii. 553, etc.—C. D. G.

WOMAN, in Hebrew אִשָּׁה, which is the feminine form of אִישׁ, as among the ancient Romans *vira* (found still in *virago*) from *vir*; and in Greek ἀνδρῖς from ἀνῖρ: like our own term woman, the Hebrew is used of married and unmarried females. The derivation of the word thus shows that according to the conception of the ancient Israelites woman was man in a modified form—one of the same race, the same genus, as man; a kind of female man. How slightly modified that form is, how little in original structure woman differs from man, physiology has made abundantly clear. Different in make as man and woman are, they differ still more in character; and yet the great features of their hearts and minds so closely resemble each other, that it requires no depth of vision to see that these twain are one! This most important fact is characteristically set forth in the Bible in the account given of the formation of woman out of one of Adam's ribs: a representation to which currency may have the more easily been given, from the apparent space there is between the lowest rib and the bones on which the trunk is supported. 'And Adam said, This is now bone of my bones, and flesh of my flesh: she shall be called Woman, because she was taken out of man.' An immediate and natural inference is forthwith made touching the intimacy of the marriage-bond: 'Therefore shall a man leave his father and his mother, and shall cleave unto his wife, and they shall be one flesh' (Gen. ii. 21-24). Those who have been pleased to make free with this simple narrative, may well be required to show how a rude age could more effectually have been taught the essential unity of man and woman—a unity of nature which demands, and is perfected only in, a unity of soul. The conception of the Biblical writer goes beyond even this, but does not extend farther than science and experience unite to justify. There was solid reason why it was not good for Adam 'to be alone.'

Without an help-meet he would have been an imperfect being. The genus homo consists of man and woman. Both are necessary to the idea of man. The one supplements the qualities of the other. They are not two, but one flesh, and as one body so one soul.

The entire aim, then, of the narrative in Genesis was, by setting forth certain great physical facts, to show the essential unity of man and woman, yet the dependence of the latter on the former; and so to encourage and foster the tenderest and most considerate love between the two, founded on the peculiar qualities of each—pre-eminence, strength, intellectual power, and wisdom on the one side; reliance, softness, grace, and beauty on the other,—at the same time that the one set of excellences lose all their worth unless as existing in the possession of the other.

It will at once be seen that under the influence of a religion, at the bottom of which lay those ideas concerning the relations of the sexes one to another, slavery on the part of the woman was impossible. This fact is the more noticeable, and it speaks the more loudly in favour of the divine origin of the religion of the Bible, because the East has in all times, down to the present day, kept woman everywhere, save in those places in which Judaism and Christianity have prevailed, in a state of low, even in some cases gilded, bondage, making her the mere toy, plaything, and instrument of man. Nothing can be more painful to contemplate than the humiliating condition in which Islamism still holds its so-called free women—a condition of perpetual childhood—childhood of mind, while the passions receive constant incense; leaving the fine endowments of woman's soul undeveloped and inert, or crushing them when in any case they may happen to germinate; and converting man into a self-willed haughty idol, for whose will and pleasure the other sex lives and suffers.

It will assist the reader in forming a just conception of Hebrew women in the Biblical periods, if we add a few details respecting the actual condition of women in Syria. Mr. Bartlett (*Walks about Jerusalem*, p. 191, seq.) visited the house of a rich Jew in the metropolis of the holy land. We give the substance of his observations: 'On entering his dwelling we found him seated on the low divan, fondling his youngest child; and on our expressing a wish to draw the costume of the female members of his family, he commanded their attendance, but it was some time before they would come forward; when however they did present themselves, it was with no sort of reserve whatever. Their costume is chastely elegant. The prominent figure in the room was the married daughter, whose little husband, a boy of fourteen or fifteen as he seemed, wanted nearly a head of the stature of his wife, but was already chargeable with the onerous duties of a father. An oval head-dress of peculiar shape, from which was slung a long veil of embroidered muslin, admirably set off the brow and eyes; the neck was ornamented with bracelets, and the bosom with a profusion of gold coins, partly concealed by folds of muslin; a graceful robe of striped silk, with long open sleeves, half-laced under the bosom, invested the whole person, over which is worn a jacket of green silk with short sleeves, leaving the white arm and braceleted hand at liberty. An elderly person sat

on the sofa, the mother, whose dress was more grave, her turban less oval, and of blue shawl, and the breast covered entirely to the neck, with a kind of ornamented gold tissue ; and over all was seen a jacket of fur : she was engaged in knitting, while her younger daughter bent over her in conversation ; her dress was similar to that of her sister, but with no gold coins, or light muslin folds, and instead of large ear-rings, the vermillion blossom of the pomegranate formed an exquisite pendant, reflecting its glow upon the dazzling whiteness of her skin. We were surprised at the fairness and delicacy of their complexion, and the vivacity of their manner. Unlike the wives of Oriental Christians, who respectfully attend at a distance till invited to approach, these pretty Jewesses seemed on a perfect footing of equality, and chatted and laughed away without intermission. Many of the daughters of Judah, here and at Hebron, are remarkable for their attractions. Mr. Wolff describes one of them with enthusiasm, and no small unconscious poetry—'the beautiful Sarah,' whom his lady met at a 'wedding-feast.' 'She was scarcely seated when she felt a hand upon hers, and heard a kind greeting. She turned to the voice and saw a most beautiful Jewess, whom I also afterwards saw, and I never beheld a more beautiful and well-behaved lady in my life, except the beautiful girl in the valley of Cashmere ; she looked like a queen in Israel. A lovely lady she was ; tall, of a fair complexion and blue eyes, and around her forehead and cheeks she wore several roses. No queen had a finer deportment than that Jewess had.'

525. Syro-Arabian costume. Indoor dress.

Mr. Bartlett was also admitted into the abode of a Christian family in Jerusalem, of whom he thus speaks (pp. 195-6) :—'The interior of their houses is similar to those of the Jews. In our intercourse with them we were received with more ceremony than among the former. The mistress of the family is in attendance with her children and servants, and besides pipes and coffee, the guest is presented with saucers of sweetmeats and small glasses of aniseed ; which, when done with, are taken from him by his fair hostess or her servant, who kiss his hand as they receive them. They are more reserved, often standing during the visit. Their dress is more gorgeous than that of the Jewish women, but not so chastely elegant ; it suits well with the languor of their air, their dusky complexion, and large black eyes. The head-dress has

a fantastic air, like that of a May-day queen in England, and the bust is a little in the style of

'Beauties by Sir Peter Lely,  
Whose drapery hints we may admire freely.'

A heavy shawl is gracefully wreathed round the figure, and the dress, when open, displays long loose trousers of muslin and small slippers. The ensemble, it must be admitted, is very fascinating, when its wearer is young and lovely.'

526. Garden dress.

We now pass to the peasantry, and take from Lamartine a sketch of the Syrian women as seen by him at the foot of Lebanon, on a Sunday, after having with their families attended divine service, when the families 'return to their houses to enjoy a repast somewhat more sumptuous than on ordinary days : the women and girls, adorned in their richest clothes, their hair plaited, and all strewn with orange-flowers, scarlet wall-flowers, and carnations, seat themselves on mats before the doors of their dwellings, with their friends and neighbours. It is impossible to describe with the pen the groups, so redolent of the picturesque, from the richness of their costume and their beauty, which these females then compose in the landscape. I see amongst them daily such countenances as Raphael had not beheld, even in his dreams as an artist. It is more than the Italian or Greek beauty ; there is the nicety of shape, the delicacy of outline, in a word, all that Greek and Roman art has left us as the most finished model ; but it is rendered more bewitching still, by a primitive artlessness of expression, by a serene and voluptuous languor, by a heavenly clearness, which the glances from the blue eyes, fringed with black eyelids, cast over the features, and by a smiling archness, a harmony of proportions, a rich whiteness of skin, an indescribable transparency of tint, a metallic gloss upon the hair, a gracefulness of movement, a novelty in the attitudes, and a vibrating silvery tone of voice, which render the young Syrian girl the very houri of the visual paradise. Such admirable and varied beauty is also very common ; I never go into the country for an hour without meeting several such females going to the fountains or returning, with their Etruscan urns upon their shoulders, and their naked legs clasped with rings of silver.'

The ordinary dress of the women of Palestine is not perhaps much fitted to enhance their natural charms, and yet it admits of ease and dignity in the carriage. Dr. Olin thus describes the custo-

mary appearance of both male and female: 'The people wear neither hats, bonnets, nor stockings; both sexes appear in loose flowing dresses, and red or yellow slippers; the men wear red caps with or without turbans, the women are concealed by white veils, with the exception of the eyes' (vol. ii. p. 437).

The singular beauty of the Hebrew women, and the natural warmth of their affections, have conspired to throw gems of domestic loveliness over the pages of the Bible. In no history can there be found an equal number of charming female portraits. From Hagar down to Mary and Martha, the Bible presents pictures of womanly beauty that are unsurpassed and rarely paralleled. But we should very imperfectly represent in these general remarks the formative influence of the female character as seen in the Bible, did not we refer these amiable traits of character to the original conceptions of which we have spoken, and to the pure and lofty religious ideas which the Biblical books in general present. If woman there appears as the companion and friend of man, if she rises above the condition of being a bearer of children to that noble position which is held by the mother of a family, she owes her elevation in the main to the religion of Moses and to that of Jesus. The first system—as a preparatory one—did not and could not complete the emancipation of woman.

527. Young lady in full dress.

The Oriental influence modified the religious so materially, as to keep women generally in some considerable subjection. Yet the placing of the fondest desires and the glowing hopes of the nation on some child that was to be born, some son that was to be given, as it made every matron's heart beat high with expectation, raised the tone of self-respect among the women of Israel, and caused them to be regarded by the other sex with lively interest, deep regard, and a sentiment which was akin to reverence. There was, however, needed the finishing touch which the Great Teacher put to the Mosaic view of the relations between the sexes. Recognising the fundamental truths which were as old as the creation of man, Jesus proceeded to restrain the much-abused facility of divorce, leaving only one cause why the marriage-bond should be broken, and at the same time teaching that as the origin of wedlock was divine, so its severance ought not to be the work of man. Still further—

bringing to bear on the domestic ties his own doctrine of immortality, he made the bond co-existent with the undying soul, only teaching that the connection would be refined with the refinement of our affections and our liberation from these tenelements of clay in which we now dwell (Matt. v. 32; xix. 3, *seq.*; xxii. 23, *seq.*) With views so elevated as these, and with affections of the tenderest benignity, the Saviour may well have won the warm and gentle hearts of Jewish women. Accordingly, the purest and richest human light that lies on the pages of the N. T. comes from the band of high-minded, faithful, and affectionate women, who are found in connection with Christ from his cradle to his cross, his tomb, and his resurrection. These ennobling influences have operated on society with equal benefit and power. Woman, in the better portions of society, is now a new being. And yet her angelic career is only just begun. She sees what she may, and what under the gospel she ought to be; and ere very long, we trust, a way will be found to employ in purposes of good, energies of the finest nature which now waste away from want of scope, in the ease and refinements of affluence, if not in the degradations of luxury—a most precious offering made to the Moloch of fashion, but which ought to be consecrated to the service of that God who gave these endowments, and of that Saviour who has brought to light the rich capabilities, and exhibited the high and holy vocation, of the female sex.—J. R. B.

ADDENDUM.—Women appear to have enjoyed considerably more freedom among the Jews than is now allowed them in western Asia, although in other respects their condition and employments seem to have been not dissimilar. At present, women of all ranks are much confined to their own houses, and never see the men who visit their husbands or fathers; and in towns they never go abroad without their persons and faces being completely shrouded: they also take their meals apart from the males, even of their own family. But in the rural districts they enjoy more freedom, and often go about unveiled. Among the Jews, women were somewhat less restrained in their intercourse with men, and did not generally conceal their faces when they went abroad. Only one instance occurs in Scripture of women eating with men (Ruth ii. 14); but that was at a simple refectory, and only illustrates the greater freedom of rural manners.

The employments of the women were very various, and sufficiently engrossing. In the earlier, or patriarchal state of society, the daughters of men of substance tended their fathers' flocks (Gen. xxix. 9; Exod. ii. 16). In ordinary circumstances, the first labour of the day was to grind corn and bake bread, as already noticed. The other cares of the family occupied the rest of the day. The women of the peasantry and of the poor consumed much time in collecting fuel, and in going to the wells for water. The wells were usually outside the towns, and the labour of drawing water from them was by no means confined to poor women. This was usually, but not always, the labour of the evening; and the water was carried in earthen vessels borne upon the shoulder (Gen. xxiv. 15-20; John iv. 7, 28). Working with the needle also occupied much of their time, as it would seem that not only their own clothes but those of the men

were made by the women. Some of the needle-work was very fine, and much valued (Exod. xxvi. 36; xxviii. 39; Judg. v. 30; Ps. xlv. 14). The women appear to have spun the yarn for all the cloth that was in use (Exod. xxxv. 25; Prov. xxxi. 19); and much of the weaving seems also to have been executed by them (Judg. xvi. 13, 14; Prov. xxxi. 22). The tapestries for bed-coverings, mentioned in the last-cited text, were probably produced in the loom, and appear to have been much valued (Prov. vii. 16).

We have no certain information regarding the dress of the women among the poorer classes; but it was probably coarse and simple, and not materially different from that which we now see among the Bedouin women, and the female peasantry of Syria. This consists of drawers, and a long and

528. Matron in full dress.

loose gown of coarse blue linen, with some ornamental bordering wrought with the needle, in another colour, about the neck and bosom. The head is covered with a kind of turban, connected with which, behind, is a veil, which covers the neck, back, and bosom [VEIL]. We may presume, with still greater certainty, that women of superior condition wore over their inner dress a frock or tunic like that of the men, but more closely fitting the person, with a girdle formed by an unfolded kerchief. Their head-dress was a kind of turban, with different sorts of veils and wrappers used under various circumstances. The hair was worn long, and, as now, was braided into numerous tresses, with trinkets and ribands (1 Cor. xi. 15; 1 Tim. ii. 9; 1 Pet. iii. 3). With the head-dress the principal ornaments appear to have been connected, such as a jewel for the forehead, and rows of pearls (Sol. Song i. 10; Ezek. xvi. 12). Ear-rings were also worn (Is. iii. 20; Ezek. xvi. 12), as well as a nose-jewel, consisting, no doubt, as now, either of a ring inserted in the cartilage of the nose, or an ornament like a button attached to it. The nose-jewel was of gold or silver, and sometimes set with jewels (Gen. xxiv. 47; Is. iii. 21). Bracelets were also generally worn (Is. iii. 19; Ezek. xvi. 11), and anklets, which, as now, were probably more like fetters than ornaments (Is. iii. 16, 20). The Jewish women possessed the art of staining their eyelids black, for effect and expression (2 Kings ix. 30; Jer. iv. 30; Ezek. xxiii. 40); and it is more than

probable that they had the present practice of staining the nails, and the palms of their hands and soles of their feet, of an iron-rust colour, by means of a paste made from the plant called *henna* (*Larsonia inermis*). This plant appears to be mentioned in Sol. Song i. 14, and its present use is probably referred to in Deut. xxi. 12; 2 Sam. xix. 24.

529. Nose-jewel.

The customs concerning marriage, and the circumstances which the relation of wife and mother involved, have been described in the article MARRIAGE.

The Israelites eagerly desired children, and especially sons. Hence the messenger who first brought to the father the news that a son was born, was well rewarded (Job iii. 3; Jer. xx. 15). The event was celebrated with music; and the father, when the child was presented to him, pressed it to his bosom, by which act he was understood to acknowledge it as his own (Gen. i. 23; Job iii. 12; Ps. xxii. 10). On the eighth day from the birth the child was circumcised (Gen. xvii. 10); at which time also a name was given to it (Luke i. 59). The first-born son was highly esteemed, and had many distinguishing privileges. He had a double portion of the estate (Deut. xxi. 17); he exercised a sort of parental authority over his younger brothers (Gen. xxv. 23, etc.; xxvii. 29; Exod. xii. 29; 2 Chron. xxi. 3); and before the institution of the Levitical priesthood he acted as the priest of the family (Num. iii. 12, 13; viii. 18). The patriarchs exercised the power of taking these privileges from the first-born, and giving them to any other son, or of distributing them among different sons; but this practice was overruled by the Mosaic law (Deut. xxi. 15-17).

The child continued about three years at the breast of the mother, and a great festival was given at the weaning (Gen. xxi. 8; 1 Sam. i. 22-24; 2 Chron. xxxi. 6; Matt. xxi. 16). He remained two years longer in charge of the women; after which he was taken under the especial care of the father, with a view to his proper training (Deut. vi. 20-25;

xi. 19). It appears that those who wished for their sons better instruction than they were themselves able or willing to give, employed a private teacher, or else sent them to a priest or Levite, who had perhaps several others under his care. The principal object was, that they should be well acquainted with the law of Moses; and reading and writing were taught in subservience to this leading object.

The authority of a father was very great among the Israelites, and extended not only to his sons, but to his grandsons—indeed to all who were descended from him. His power had no recognised limit, and even if he put his son or grandson to death, there was, at first, no law by which he could be brought to account (Gen. xxi. 14; xxxviii. 24). But Moses circumscribed this power, by ordering that when a father judged his son worthy of death, he should bring him before the public tribunals. If, however, he had struck or cursed his father or mother, or was refractory or disobedient, he was still liable to capital punishment (Exod. xxi. 15, 17; Lev. xx. 9; Deut. xxi. 18-21).—J. K.

WOOD-CARRYING, THE FEAST OF (קרבן העצים), one of the annual festivals instituted after the Babylonish captivity.

1. *Name of the Festival and its significance.*—The name קרבן עצים or קרבן העצים, which literally denotes *the wood-offering*, ξυλοφóρια, *Xylo-*

*phoria*, or its fuller phrase, יום טוב של קרבן עצים, *the feast of wood-offering*, ἡ τῶν ξυλοφορίων ἑορτή (Joseph. *Bell. Jud.* ii. 17. 6), by which this festival is designated, is derived from Neh. x. 35; xiii. 31. It obtained its name from the fact that on the day in which it was celebrated all the people, without any distinction of tribe or grade, brought wood to the temple, being the last day in the year whereon wood could be felled for the burning of the sacrifices and the perpetual fire on the altar. It is also denominated זמן

לכהניא, *the time of wood for the priests* (*Megillath Taanith*, v.), because on this festival the priests too, like the rest of the people, offered wood.

2. *The day, and manner of its celebration.*—The day on which this festival was annually celebrated was the 15th of *Ab* (אב=August). This is distinctly attested by the unanimous voice of the most ancient and most trustworthy records (comp. *Mishna Taanith*, iv. 8; *Babylon Gemara*, *ibid.* 30 a; *Baba Bathra*, 121 a; *Megillath Taanith*, v.; *Midrash Rabba* on Lamentations, cap. lvii.) The remark in Josephus, that this festival was celebrated on the 14th (τῇ δὲ εἰς τῶν ξυλοφορίων ἑορτῆς οὕσης—ἐν ᾗ πᾶσιν ἔθος ἔλθην τῷ βωμῷ προσφέρειν, *Bell. Jud.* ii. 17. 6; and τῇ δὲ εἰς πεντεκαίδεκάτῃ δὲ ἡν Λάου μηνός, κ.τ.λ., *ibid.* ii. 17. 7), must therefore be regarded as the error of a copyist (comp. Herzfeld, *Geschichte des Volkes Israel*, i. 144; Grätz, *Geschichte der Juden*, iii. 478, 2d ed.) The nine days in the year appointed for the delivery of wood by the respective families were as follows:—On the 20th of *Ab*, when the descendants of Pachat Moab b. Jehudah furnished the wood; the 20th of *Elul*, the family of Adeen b. Jehudah; the 1st of *Tebet*, the family of Parosh; the 1st of *Nisan*, the family of Arah b. Jehudah; the 20th of *Tamuz*, the family of David b. Jehudah; the 5th of *Ab*, the family of Parosh b. Jehudah; the 7th of *Ab*, the family of Jondab b. Rechab; the 10th of *Ab*, the family of Senaa b. Benjamin; and on the 15th

of *Ab*, the family of Saltu b. Jehudah, with the priests, Levites, and all those who did not know from what they descended, as well as the families of Gonbei Ali and Kozai Keziath (*Mishna Taanith*, iv. 3). So general was the delivery of wood on this day (*i.e.* the 15th of *Ab*), that even proselytes, slaves, Nethinim, and bastards brought fuel (*Megillath Taanith*, v.) Hence the remark of Josephus, that on this day all the people brought wood, from which circumstance it derived its name (*Bell. Jud.* ii. 17. 6).

On this day, when all the people were thus congregated together, discarding all distinction of tribe, of rich and poor, of Israelite and proselyte, of master and slave, the maidens of Jerusalem met together for singing joyful and religious songs and for dancing. Dressed in white garments, which they borrowed in order not to shame those who had none of their own, these damsels assembled together in an open place in the vineyards. They sang strophic songs in the sacred language, and danced in the presence of the congregation. It was on this occasion that the happy choice of partners in life frequently took place, since it was one of the two annual opportunities afforded to the young people of making their attractions known without violating feminine modesty (*Mishna Megilla*, iv. 8) [MARRIAGE]. Cessation from manual labour on this day was, however, not enjoined; but fasting, penitential prayers, and mourning for the dead were forbidden (*Megillath Taanith*, v.; *Maimonides*, *Jud. Ha-Chezaka Hilchoth K'lei Ha-Mikdash*, vi.)

3. *Origin and date of this Festival.*—The origin of this festival is involved in great obscurity, as the ancient Talmudic authorities which describe its celebration differ materially in their opinions about the occasion which gave rise to its institution. From Neh. x. 35; xiii. 31, we learn that this statesman, in order to supply the necessary fuel for the burning of the sacrifices and the keeping up of the perpetual fire on the altar, ordained that each family in rotation is to furnish wood for the temple at a certain period of the year, and that the order and time of delivery are to be settled by casting lots. The result obtained by the casting of lots is not mentioned in the canonical Scriptures; but the post-canonical documents, which describe the temple-service, furnish us with a minute account of both the names of the respective families upon whom it devolved to supply the wood, and the periods of the year in which they delivered it. This account is given in the preceding section of this article. It is, therefore, only natural to conclude that the different families who are thus recorded to have offered the wood at appointed times did so in accordance with the results obtained by the casting of lots. Now, the reason why the 15th of *Ab* was kept as a special festival, and why all the nation at large took part in the offering of wood on this day, is, according to some authorities in the Talmud, that on it the people ceased to fell wood for the temple, because, according to R. Eliezer the Great, the heat of the sun begins to diminish on this day, and the wood which was cut after this date did not become sufficiently dry. Hence the 15th of *Ab* was designated 'the day on which the axe is broken.' As it was also believed that the wood cut down after the 15th of *Ab* is sapless (*Rosh Ha-Shana*, 2 a, 14 a), Herzfeld (i. 145) ingeniously conjectures that the trees were regarded as dead after this date, and the

wood of such trees was considered as unfit for the altar. The other ancient opinion about the origin of this festival is, that the furnishing of wood for the temple by the pious, which existed from time immemorial, and which Nehemiah reinstituted after the return from Babylon, was prohibited by some wicked sovereign, and that this interdict was abolished on the 15th of *Ab*. Hence this day was constituted a festival, and the families who jeopardised their lives in stealthily supplying wood for the temple during the time of the prohibition are those named above, who as a privilege continued to bring some wood on this festival, whether the fuel was wanted or not. There is, however, a difference of opinion as to who this wicked monarch was. The Jerusalem Talmud will have it that it was Jeroboam who placed guards on the roads leading to the temple in order to prevent the people from taking to the sanctuary the first-fruits and the wood, and the families of Gonbei Ali and Kozie Keziath, mentioned in the *Mishna*, were those who encountered the danger in clandestinely supplying

the wood (מהו נוכבי עלי ובני קוציע קציעות בשעה)

שהושיב ירבעם בן נבט פרסמאות על הדרכים ולא

הושיבו מלכי (Jerusalem Taanith, iv. 6). The *Megillath Taanith* (cap. v.) again has it that this interdict proceeded from 'the kings of

Greece' (והושיבו מלכי יון פרוסמאות על הדרכים), who imitated the conduct of Jeroboam; whilst the *Babylonian Talmud* omits the dynasty altogether, and simply remarks that the prohibition emanated from some government (*Taanith*, 28 a). As the reference to Jeroboam on the part of the *Jerusalem Talmud* is simply to make this monarch the author of all the wicked deeds in connection with the Jews, and as, moreover, the ascription of this deed in the *Megillath Taanith* to Greek rulers is unhistorical—since Antiochus Epiphanes, to whom alone it could refer, totally abolished the temple-service, which rendered it useless to smuggle the first-fruits and wood—Graetz concludes that this prohibition could only proceed from Alexander Jannai, who forbade the offering of wood out of hatred to the Pharisees, and that then the above-named pious families clandestinely furnished the fuel. When this interdict ceased with the reign of Alexander, and the ancient custom of wood-offering was resumed, the concluding day for the delivery of it (comp. *Taanith*, 31 a) obtained a higher significance, and was elevated into a national festival (Graetz, iii. 477). It will be seen from the account of the nature of this festival that the custom for all the people to bring large supplies of firewood for the sacrifices of the year could not possibly have been designed to relieve the *Nethinim*, and that these *Nethinim* did not bear a conspicuous part in it, as is supposed by the learned Plumptre (Smith's *Dictionary of the Bible*, s. v. 'Nethinim').

Meyer, Amsterdam 1724; Maimonides, *Fad Ha-Chezaka Hilchoth K'lei Ha-Mikdash*, vi.; Herzfeld, *Geschichte des Volkes Israel*, vol. i. pp. 67, ff.; 144, ff.; Nordhausen 1855; Jost, *Geschichte des Judenthums*, vol. i. 169, Leipzig 1857; Graetz, *Geschichte der Juden*, pp. 122, 477, ff., 2d edition, Leipzig 1863.—C. D. G.

WOOL (צֶמֶר). The fleece of the sheep, as such, was properly called גֶּזַי or גֶּזַיָּה, while the material of which it was composed was called צֶמֶר; hence גֶּזַי הַצֶּמֶר, a fleece of wool (Judg. vi. 37).

Wool was used by the Hebrews from an early period extensively for clothing (Lev. xiii. 47; Deut. xxii. 11; Job xxxi. 20; Prov. xxxi. 13; Ezek. xxxiv. 3; Hos. ii. 5). In the law the mixing of woollen and flax (*Tsemer* and *Pishtim*) in a garment was forbidden (Lev. xix. 19; Deut. xxii. 11). Such a mixture was called *Sha'atnez* (שַׂעֲטָנֶז), a word of obscure signification, rendered by the LXX. κίβδηλος, adulterated, and by Aquila ἀντιδιακείμενον, varied; it is probably of Egyptian origin, and may be, as Joblonski suggests, the Coptic *Shontnes*—i.e. *byssus fimbriatus*, or a compound of two Coptic words, *saht*, *textura*, and *noij*, *falsus*. These etymologies, however, are uncertain. The prohibition itself stands in connection with other laws forbidding the mixing of different things; all of which rest apparently on the idea that a thing in its simple natural state as it comes from God is pure, but when mixed by man's art with something else, thereby loses its proper character, and is defiled (see Winer *R. W. B.* under 'Saat' and 'Verschiedenartiges' for different views of the design of the law). Josephus says (*Antiq.* iv. 8. 11) that the garments of the priests were composed of woollen and linen interwoven, and this the Talmudists also aver (*Mishna, Kilaim*, ix. 1); but it is impossible to reconcile this with such passages as those above noted compared with Ezek. xlv. 17, ff.—W. L. A.

WORLD is the English term by which our translators have rendered four Hebrew words: 1.

חֵלֶךְ, comes from a root which signifies 'to rest,' to 'discontinue,' and hence 'to cease from life,' 'to be at rest,' and as a noun, 'the place of rest,' 'the grave.' The word occurs in the complaint uttered by Hezekiah when in prospect of dissolution, and when he contemplates his state among the inhabitants, not of the upper, but the lower world (Is. xxxviii. 11); thus combining with many other passages to show that the Hebrews, probably borrowing the idea from the Egyptian tombs, had a vague conception of some shadowy state where the manes of their departed friends lay at rest in their ashes, retaining only an indefinite personality in a land of darkness and 'the shadow of death' (Job x. 21, 22). 2. חָלָה means 'to conceal,' and derivatively 'any hidden thing,' hence 'age,' 'antiquity,' 'remote and hidden ages'; also 'the world,' as the hidden or unknown thing (Ps. xlix.

1); in a similar manner, 3. עוֹלָם (in the N. T. αἰών), the root-signification of which is 'to hide,' denotes a very remote, indefinite, and therefore unknown period in time past or time to come, which metaphysicians call eternity *à parte ante*, and eternity *à parte post*. In Ps. lxxiii. 12 it is rendered 'world'; but in this and in the previous instance it may be questioned whether the natural creation is really meant, and not rather 'the world' in our metaphorical use of the term, as denoting the intelligent world, the rational inhabitants of the earth, and still more specifically that portion of them with which we are immediately concerned.

4. תִּלָּל comes from a radix that signifies 'to flow'; and as water is the unfailing cause of fertility in the East, it denotes 'to be productive,' 'to bear fruit'; and as a noun, 'the fruit-bearer,' that is, the earth. This word is frequently rendered 'world' in the common version, but if more was intended than the earth on which we dwell, it may be doubted if the passages in which it occurs will justify the translators.

In truth, the Hebrews had no word which comprised the entire visible universe. When they wanted to speak comprehensively of God's creation, they joined two words together and used the phrase 'heaven and earth' (Gen. i. 1). We have already seen that they had an idea of an under world; the meaning of their ordinary term for earth, אֲרֶץ, which signifies the 'lower,' shows that they also regarded the earth as beneath the sun; while the term for heaven, שָׁמַיִם, denoting 'what is elevated,' indicates that their view was that the heavens, or the heights, were above. Above, below, and under—these three relations of space comprehend their conception of the world.—J. K.

WORM (תוֹלַעַת, רֶמָּה; Sept. σκώληξ, σαπρία, σῆψις; Vulg. *vermis*, *putredo*, *tinea*). No distinction is observed in the use of the Hebrew words. For instance, רֶמָּה is applied to the creature bred in the manna (Exod. xvi. 24); to that which preys on human flesh (Job vii. 5; xvii. 14; xxi. 26; xxiv. 20; Is. xiv. 11); and תוֹלַעַת, to the creature bred in the manna (Exod. xvi. 20); to that which preys on human flesh (Is. xiv. 11; lxvi. 24); on vegetables, as on the gourd of Jonah (iv. 7); and on vines (Deut. xxviii. 39). The ancient Hebrews applied these words as indifferently as the common people now do the words 'worm,' 'fly,' etc. The only distinction occurring in the Bible is שֶׁנִּי

תוֹלַעַת, the insect which furnished the crimson dye [COLOURS]. Similar indeterminateness attends the Septuagint and Vulgate renderings. Aristotle also applies the word σκώληξ to the larva of any insect—τίκει δὲ πάντα σκώληκα, 'all insects produce a worm' (*Hist. Nat.* v. 19). The insect which the manna is said to have 'bred, when kept till the morning'—רֶמָּה, תוֹלַעַת, σκώληξ, *vermis* (Exod. xvi. 20, 24)—whatever it was, must be considered as miraculously produced as a punishment for disobedience, since the substance now understood to be the same keeps good for weeks and months, nor did the specimen laid up in the ark breed worms [MANNA]. An insect is alluded to as injuring vines and grapes (Deut. xxviii. 39); תוֹלַעַת, σκώληξ, *vermis*. The Greeks had a distinct name for this insect, and probably as early as the Septuagint translation of Exodus was made, ver. εῖψ and εἴξ (Theophrastus, *De Causis*, iii. 27). It was called by the Latins involvulus, convolvulus, and volvox (Plautus, *Cistell.* Act iv. Sc. 2; Pliny, *Hist. Nat.* xvii. 28). Rosenmüller thinks it to have been the *Scarabeus hirtellus*, or the *Scarabeus muticus hirtus testaceo-nigricans* of Linnæus (*Syst. Nat.* tom. i. pt. iv. p. 1577). Forskal calls it the *Pyralis vitana*, or *Pyralis fasciana*. A species of beetle, *Lehrus cephalotes*, is injurious to the vines of Hungary; other species of beetles do similar mischief (*rynchites*, *bacchus*, *eumolpus*). Vine-leaves in France are frequently destroyed by the larva of a moth,

*Tortrix vitana*. In Germany another species does great injury to the young branches, preventing their expansion by the webs in which it involves them; and a third species, *Tortrix fasciana*, makes the grapes themselves its food (Kirby and Spence, *Introduction to Entomology*, vol. i. p. 205, London 1828). It may serve as an illustration of the looseness of popular diction respecting insects, to remark that what the farmers call 'the fly' in the turnip, is in reality a small species of jumping beetle, for which *turnip-fly* would be a more appropriate name. In Job vii. 5 the patriarch complains that his 'flesh is clothed with worms and clods of dust,' רֶמָּה, σαπρία σκώληκων; and in 2 Maccab. ix. 9, it is stated to be the fate of Antiochus, that while he lived 'worms' (σκώληκας) 'rose up out of his body'; and St. Luke records this disorder to have been inflicted on Herod (Acts xii. 23, σκώληκός-βρωτος: comp. Joseph. *Antiq.* xix. 8. 2; xvii. 6. 5; *De Bell. Jud.* i. 33. 5). It has been attempted to explain all these instances as cases of phthiriasis, or the lousy disease; but the conjecture is inconsistent with the words employed in the several narratives; and since they are instances of persons being devoured by worms while alive, contrary to the order of nature, we are compelled to ascribe the phenomenon to divine agency. For the account of insects infesting the human frame, from disease, see Kirby and Spence (*Introduction to Entomology*, vol. i. p. 84). Allusion is made in various passages to 'worms' preying upon the dead. Thus Job, in the anticipation of death, says, 'I have said to the worm, Thou art my mother, and my sister' (Job xvii. 14; comp. xxi. 26; xxiv. 20; Is. xiv. 11; lxvi. 24; Eccles. x. 11; xix. 3; 1 Maccab. ii. 62). In one apparent instance of this nature (Job xix. 26), 'though after my skin worms destroy this body,' the word 'worms' is supplied by our translators. These passages, and especially the latter, have contributed to the popular impression in this country, that the human body, when buried in the grave, is consumed by worms. The Oriental method of burial in wrappers, and of depositing the corpse in caves, etc., would no doubt often afford the spectacle of the human body devoured by the larvæ of different insects; but the allusions in Scripture to such sights do not apply to burial in this country, except where the body, as was the case in London till lately, is buried in a wooden coffin only, in vaults which have communications with the external air, when, even in the centre of the metropolis, the writer has found swarms of a species of fly, of a cimex aspect, which insinuates itself between the lid and lower part of the coffin, and whose larvæ battened in the corpse within, while the adult insect sported in the lurid atmosphere of the vault. The 'gourd' of Jonah is said to have been destroyed

by 'a worm' (Jon. iv. 7); תוֹלַעַת, σκώληξ, *vermis*. The identity of the gourd with the *Ricinus communis* seems to be well established [KIKAYON]; and Rumphius (*Herbar. Ambonens.* tom. iv. p. 95) testifies to the ravages of a species of black caterpillar upon it. These are produced, he says, in great quantities in the summer time, during a gentle rain, and eat up the leaves of the Palma Christi, and gnaw its branches to the pith in a single night (Michaelis, *Suppl. ad Lexic. Hebraic.* p. 2187). Allusions to the worm in wood occur in the Septuagint of Prov. xii. 4, and xxv. 20; ἐν ὕλῳ σκώληξ; Vulg. *vermis ligno*; which words have

nothing corresponding to them in the present Hebrew Text (see Vulgate of 2 Kings xxiii. 8). The word 'worm' occurs metaphorically (Job xxv. 6), 'how much less man that is a worm' (רֶמֶס, *sampla*, *putredo*), 'and the son of man which is a worm'; תולע, *σκώληξ*, *vermis* (Ps. xxii. 6; Is. xli. 14). Homer also compares a man of inferior consequence to a worm, ὥστε σκώληξ ἐπὶ γαλῆ κείτο *tabels* (Il. xiii. 654). It is possible that the

word תולע was also given as a proper name; thus 'Tola' occurs among the descendants of Issachar (Gen. xli. 13), and was also the name of a person of the same tribe (Judg. x. 1). Bochart conjectures that the name was given to these children by their parents because the tribe of Issachar was one of the meanest, and they were themselves in needy circumstances, or that these were very sickly children when born. He remarks, however, that the first Tola became a great man, the head of the Tolaites (Num. xxvi. 23), who, in the days of David, amounted to 22,600 (1 Chron. vii. 2); and that the latter judged Israel twenty years (Judg. x. 1, 2). 'Worm' occurs in the N. T. in a figurative sense only (Mark ix. 44, 46, 48): 'Their worm dieth not, and the fire is not quenched'; words borrowed from Is. lxvi. 24, which originally relate to a *temporal* state of things, but which had also become, in our Lord's time, the popular representation of future punishment (Judith xvi. 17; Ecclus. vii. 17) [SOUL; TOPHET]. Origen here understands 'worm' in a metaphorical sense, as denoting the accusation of conscience; but Austin, Chrysostom, Cyril of Alexandria, Theophylact, etc., contend that the word should be understood literally. Several mistranslations occur. In Is. li. 8, 'and the worm shall eat them like wool,' the word דם means a species of moth [MOTH]. In Mic. vii.

17, the words 'like worms of the earth, כוחלי, literally, 'creepers in the dust,' 'serpents'; Vulg. *reptilia terræ* (comp. Deut. xxxii. 24). In 1 Maccab. ii. 62, 'Fear not the words of a sinful man, for his glory shall be dung and worms'; instead of κοπρία, 'dung,' should be read *sampla*, 'rotteness,' as in the Sept. of Job vii. 5; xxv. 6. So also in Ecclus. xix. 3, 'Moths and worms shall have him that cleaveth to harlots'; instead of σήτες, 'moths,' read σήπη, 'rotteness.' Bochart (*Hierozoicon*, ed. Rosenmüller, Lips. 1793-1796, vol. iii.; *De Vermibus*).—J. F. D.

WORMWOOD. [ABSINTHIUM.]

WRESTLING. [GAMES.]

WRITING is an art by which facts or ideas are communicated from one person to another by means of given signs, such as symbols or letters. It has been a generally received and popular opinion that writing was first used and imparted to mankind when God wrote the Ten Commandments on the tables of stone; but the silence of Scripture upon the subject would rather suggest that so necessary an art had been known long before that time, or otherwise the sacred historian would probably have added this extraordinary and divine revelation to the other parts of his information respecting the transactions on Mount Sinai.

After the gift of language (which was indispensable to rational creatures), it would seem that *writing* was the most highly beneficial and important boon which could be conferred on men pos-

sessed of intellect and understanding, who from their circumstances must divide and spread over the whole earth, and yet be forced from various necessities to maintain intercourse with each other.

In the earliest times families must have separated: the pastoral life required much room for flocks and herds; and as the wealth of each household increased, the space between them must have become greater, and every year would compel more distant migrations from these unfailling causes (Gen. xiii.)

But even in the first ages of the world it would be requisite not only to preserve unimpaired the knowledge of God, but it would be desirable to have some method of transmitting and receiving intelligence from the scattered communities, of a more certain nature than verbal messages ever can be; nor is it probable that events which were destined to act upon all time should be left to float upon the uncertain stream of tradition, when by the art of writing they might be accurately conveyed without addition or diminution to the latest posterity. It is scarcely possible that the wondrous gift of writing was withheld until the world had been twice re peopled, and 2513 years had rolled by.

The working in iron and the construction of musical instruments are recorded in Gen. iv. 21, 22; whilst neither before nor after that period is the origin or discovery of *writing* any more alluded to than is the origin of language itself. Is it then too much to believe that God by revelation immediately imparted to mankind the power of writing? For it does not appear that any person ever invented an alphabet who had not previously heard of or seen one; and every nation which possessed the art always professed to have derived its knowledge from a god. Without writing, no information could have been conveyed to remote nations with accuracy. Few persons repeat a thing in the precise words in which a detail was given to them, and the most trifling change in an expression may throw the whole into error and confusion, or entirely destroy the sense. But such cannot be the case if writing be the means of communication, for whatever is thus definitely stated may be equally well understood by those to whom it is addressed as by those who write it. God never works unnecessary miracles; but that must have been the case if, for upwards of two thousand years, the memory and speech of various men were *alone* the depositaries of his dealings with mankind.

It was a matter of the utmost consequence that the most exact accounts should have been preserved of the creation, the fall of man, and many prophecies of deepest interest to unborn generations. The ages and genealogies of the patriarchs; the measures of the ark; the first kingly government in Assyria; the history of Abraham and his descendants for 430 years, including minute circumstances, changes, and conversations, in many different countries; could scarcely have been perfectly preserved by *oral* descent for twenty centuries, unless the antediluvians and their immediate posterity did not partake of the failings of Christians in the defects of forgetfulness and exaggeration; but allowing the art of *writing* to have been *given with language*, there is no difficulty, and it becomes obvious that each transaction would be recorded and kept exactly as it was either revealed or happened.

It is not a vain thing to suppose that the history

of creation, and all following events, as briefly related by Moses, were taken from ancient documents in the possession of the Israelites: this opinion is maintained by Calmet (*Commentaire Littéral*, vol. i. part i. p. 13). The gifts of inspiration, like those of nature, are never superfluous. When God had once revealed to the Patriarchs what was 'in the beginning,' there was no further need for a new revelation; and the Hebrew historian might compile from previous records what was sufficient for mankind to know respecting the origin of 'things which are seen.'

In the fifth chapter of Genesis it is said, 'This is the *book* of the generations.' If there had been merely a traditionary recollection of 'the generations of Adam,' preserved only by transmission from one memory to another for more than a thousand years, the term *book* would have been most inapplicable, and could not have been used; and to suppose that a written document had been referred to cannot be deemed as forcing the construction of the word in this instance, more than when it is also believed that 'the *book* of the generation of Jesus Christ' (Matt. i. 1) was likewise copied from a national register, and not given by a new revelation or old tradition, for the genealogies in the N. T. were not of less importance than those of the sons of Shem (Gen. xi.), and yet the former were taken from public records. Why, then, should a miracle have been wrought to preserve the latter?

The Book of Job is considered to be the most ancient written document extant, and is deemed an authentic narrative and not an imaginative poem (James v. 11). By some persons it is thought to be the work of Moses (see Mason Good's *Diss. to Translation of Job*); but this is denied by Bishop Lowth (*Lectures on Hebrew Poetry*). Lightfoot and others think Elihu was the author. This is the more credible opinion; for it is scarcely possible to believe that long conversations between several persons in the land of Uz should have been orally preserved for perhaps several centuries, and then recorded with minute accuracy by an individual who spoke a different language, and who received it from the lips of strangers and foreigners.

Hales asserts that Job lived at most two hundred years before the Exode. Our version of the Scriptures fixes the time of Job at B.C. 1520, which allows but twenty-nine years between his era and that of the departure of the Israelites from Egypt. Be that as it may, the declarations of Job prove that *letters* and *books* were known to him and his countrymen, who were a people quite distinct from the Hebrews.

In the nineteenth chapter of Job (ver. 23, 24) it is said, 'Oh, that my words were now written! Oh, that they were printed in a *book*! that they were graven with an iron *pen*!' Also Job xxxi. 35, 'mine adversary had *written* a *book*.' Such expressions could not have been used, and would have had no meaning, if the art of writing had been unknown; nor could there have been such terms as *book* and *pen*, if the things themselves had not existed.

If, then, it be granted that the Book of Job was *written*, and such expressions were current before the Exode, it becomes evident from sacred history that writing was not only in use before the law was given on Mount Sinai, but that it was also known amongst other patriarchal tribes than the children

of Israel. The supposed writer, Elihu, the son of Barachel the Buzite (Job xxxii. 2), was a descendant of Nahor, the brother of Abraham (Gen. xxii. 20, 21), and might thus be possessed of whatever arts the family of Terah had inherited from Noah. Another singular phrase is found in Job: 'My days are swifter than a post' (ix. 25). This would imply the regular transmission of intelligence by appointed messengers from place to place; and although it does not follow as a necessary consequence that such a person on all occasions carried *letters*, it is more than probable that such a mode of conveying important communications was established in civilised countries, where *books*, *pens*, and *writing* were known.

Before the law was given by God to Moses, he had been commanded to write the important transactions which occurred during the progress of the Israelites from Egypt to Canaan; for in Exod. xvii. 14, it is recorded, 'And the Lord said unto Moses, Write this for a memorial in a *book*.' An account of the discomfiture of the Amalekites is the first thing said to have been written by Moses. This battle was fought ere the people left Rephidim (Exod. xvii. 13), from whence they departed into the wilderness of Sinai (Exod. xix. 2); and, therefore, that writing was drawn up before the events on the mount took place. The law was 'written by the finger of God' (Exod. xxxi. 18), B.C. 1491, and since that time there is no question as to the existence of the art of writing. The commandments were written on two tables of stone (Exod. xxxiv. 1); but immediately afterwards, when Moses was interceding with God for the sinning idolaters, he says, 'Blot me out of thy *book* which thou hast written' (Exod. xxxii. 32). If writing in alphabetical characters had been seen by Moses for the first time on the 'tables of stone,' he could not from these have had the faintest conception of a *book*, which is a thing composed of leaves or rolls, and of which the stones or slates could have given him no idea.

Forty years after the law was written, the Israelites took possession of the land of Canaan, where the 'cities were walled and very great' (Num. xiii. 28). Amongst other places which were conquered was one called by them Debir, but whose original name was Kirjath-sepher, or the City of Books, or Kirjath-sannah, the City of Letters (Josh. xv. 49; Judg. i. 11). The Canaanites could not have gained their knowledge of letters or of books from the Hebrews, with whom they were entirely unacquainted or at war, and must, therefore, have derived them from other sources. The Canaanites being the descendants of Canaan, a son of Ham, had probably preserved and cultivated the same arts and sciences which Misraim, another son of Ham, carried into Egypt (Gen. x. 6).

'The Book of Jasher' (Josh. x. 13) is mentioned by Joshua, but whether as a chronicle of the past or present is uncertain.

Books and writing must have been familiar to Moses, 'who was learned in all the wisdom of the Egyptians' (Acts vii. 22), for at the time of his birth that people had arrived at a high pitch of civilisation. Since the penetration of Dr. Young discovered the key by which the hitherto mysterious hieroglyphics can be deciphered, it has been found that from the earliest era Egypt possessed a knowledge of writing. Without crediting the very distant period given by some chronologists, which

fixes the beginning of the first regal dynasty there 5867 years B.C., or as M. Prisse, the learned hieroglyphist says in his private accounts, 'unnumbered ages before the erection of the pyramids,' it is not presuming too much to think that the chronology adopted by Ussher is too short to include many Scriptural transactions. Chronology is a matter of *opinion*, founded on data supplied by various sources of information, and not an article of *faith*: it may therefore be altered and improved in conformity with well-ascertained facts and legitimate evidence.

Hales, agreeing with Josephus, says that Menes, the first king of the first Egyptian dynasty, began his reign B.C. 2412 years [CHRONOLOGY]; but previous to his assuming the royal dignity, Egypt had been long ruled by a succession of priests, and in their theocracy Thoth or Hermes, a *god*, was considered by them to be the inventor of letters (the Egyptians never acknowledged *demi-gods*); and in no instance is the discovery of the art of writing ever attributed to men (Wilkinson, *Anc. Egypt.* v. 2).

There were three kinds of writing practised in Egypt:—1st, The hieroglyphical, or sacred sculptured characters; 2d, The hieratic, or sacerdotal, which was abbreviated; 3d, The demotic, or enchorial, which became the hand in general use. Lepsius, in *The Annals of Archaeological Correspondence*, Rome 1837, maintains that the Egyptians had two colloquial dialects in use, which were very distinct; the classical or sacerdotal, and the popular. The sacred, or hieroglyphic writing, as well as the hieratic of all ages, presents the former,

530. Ancient Writing Materials.

whilst the demotic presents the common dialect. Wilkinson thinks the hieroglyphical was the sole mode of writing in the more ancient times, yet allows the hieratic to have been employed in remote ages; but if M. Prisse's discovery be true, of a papyrus said to be written in the reign of a hitherto unknown king in the first Memphite dynasty, and in the hieratic character, its extreme antiquity will be found coeval with the hieroglyphical.

If there be no enchorial writing found (for monuments or tombs which were sacred could not have common characters upon them) until about B.C. 600, that circumstance does not prove that such a mode of writing was unknown in the earliest times; for from the account of the burial of Jacob (Gen. l. 9), and from the *Song of Moses* (Exod. xv. 1, and xiv. 26), it is clear that horsemen were a

part of the Egyptian army, and yet there is but one solitary specimen of a man on horseback amongst the infinite variety of sculptured representations of their manners and customs (Wilkinson, vol. i. p. 289). The priestly rulers of Egypt had continued, like the framers of caste in India, to bind down by certain definite and established laws (even to the meagre delineation of the human body in painting) every mode of action, and from that circumstance it may be inferred that the manner in which trials before the judges were carried on was not an innovation of later times. There were royal and priestly scribes, but there must have been a different grade, employed by other classes, as in their law-courts the complainant always stated his case in writing, and the defendant also replied in writing; from which circumstance (were there none other) it may be inferred that there was some common popular writing for such purposes, besides that of the sacred hieroglyphics, or sacerdotal mode. In the paintings which represent the judgment after death, Thoth, who is called the 'Secretary of Justice,' is always portrayed with his tablet and style, just beginning to write.

The Memnonium is said to have been built about the time of Moses (B.C. 1571); over the entrance gateway to the library was inscribed, 'Remedy, or Balsam for Souls.' Over the mouldering door which led to the bibliothetical repository, Champollion read, written over the heads of Thoth and Sakh (who were the male and female deities of arts, sciences, and literature), the remarkably appropriate titles of 'President of the Library,' and 'Lady of Letters.' In the Sanctuary at Luxor, erected 200 years before the birth of Moses, there is an inscription over Thoth, which begins, 'Discourse of the Lord of the Divine Writings.' The number of works ascribed to Thoth is stated to have been 36,525.

The great Pyramid is supposed to have been erected at least 2123 years B.C.; in A.D. 1837, Col. Howard Vyse found in the low chamber the name of Suphis (Cheops) scored in red ochre on the rough stones behind the front facing of the room (see *Ancient Egypt*, by G. R. Gliddon, vice-consul at Cairo; Boston, U.S. 1844).

'In Egypt nothing was done without writing. Scribes were employed on all occasions, whether to settle public or private questions, and no bargain of any consequence was made without the voucher of a written document' (Wilkinson, vol. i. p. 183). On a tomb said to have been built about the time the Pyramids were erected, is seen the representation of a steward giving an account of the number of his master's flocks and herds (vol. iv. p. 131). The scribes and stewards, who were employed in domestic suits, conveyancing, and farming, could not have used the *sacred* characters for their affairs, nor could they have been understood by the people generally if they had; it may therefore be concluded that the enchorial writing was that in popular practice.

Pliny is in error in saying that papyrus was not used for paper before the time of Alexander the Great, for papyri of the most remote Pharaonic period are found with the same mode of writing as that of the age of Cheops (Wilkinson, vol. iii. p. 150). A papyrus now in Europe, of the date of Cheops, establishes the early use of written documents, and the antiquity of paper made of the byblus, long before the time of Abraham (*Ancient Egypt*.

p. 13). As papyrus was expensive, few documents of that material are found, and these are generally rituals, sales of estates, and official papers (papyrus was used until about the 7th century of our era). A soldier's leave of absence has been discovered written upon a piece of broken earthenware.

No one can dispute the extreme antiquity of Egypt as a nation, nor that, at the time of Moses, its inhabitants were in a state of advanced civilisation. From the researches of travellers and hieroglyphists in late years, it is proved beyond doubt that many of the hieroglyphical inscriptions were written before the exodus of the Hebrews, and that writing must therefore have been in use at or before that period; but it yet remains to be said from whence the art was derived.

'The earliest and surest data' (respecting alphabetical language) 'are found in the genuine paleogeographical monuments of the Phœnicians.' 'Amongst the most ancient coins yet known is one supposed to be B.C. 394' [ALPHABET]; but these ancient specimens of engraving or writing prove nothing as to the *origin* of the thing itself. It is possible that written characters can be traced no higher than from a Phœnician stock, for they were the immediate posterity of Noah's family. The argument here stated, as to the credible supposition that writing was given with language, is not at all invalidated by gems or coins which exhibit the oldest or most primitive form of written characters known.

The Hindoos and Chinese profess to have had amongst them the art of writing from time immemorial; but although they cannot establish the truth of their endless chronologies, yet it is highly probable that they have been acquainted with that mode of communicating and transmitting ideas from remote ages. Eight Chinese bottles have been found in different tombs at Thebes; on five of them is written the same inscription, 'The flower opens, and lo! another year.' In China writing is still symbolical, there being 80,000 characters, to which there are 214 radical keys.

Letters are generally allowed to have been introduced into Europe from Phœnicia, and to have been brought from thence by Cadmus into Greece, about fifteen centuries before Christ, which time coincides with the eighteenth Egyptian dynasty; but whilst none may deny such to have been the origin of European alphabetical characters, it does not prove the Phœnicians to have been the inventors of writing. That people occupied Phœnicia in very early times after the Deluge, and if the patriarch and his sons possessed the knowledge of letters, their posterity would doubtless preserve the remembrance and practice of such an invaluable bequest, which would be conveyed by their colonists into Greece and Africa. In the New World it was found that the Peruvians had no system of writing, whilst the Mexicans had made great advances in hieroglyphical paintings.

The Aztecs, who preceded the Mexicans, had attained much proficiency in the art, such as was adequate to the wants of a people in an imperfect state of civilisation. 'By means of it were recorded all their laws, and even their regulations for domestic economy; their tribute rolls, specifying the imposts of the various towns; their mythology, rituals, and calendars, and their political annals carried back to a period long before the foundation of the city. They digested a complete system of

chronology, and could specify with accuracy the dates of the most important events in their history, the year being inscribed on the margin against the particular circumstances recorded' (Prescott's *Conquest of Mexico*, i. 88).

A Mexican MS. usually looks like a collection of pictures, each forming a separate study. Their materials for writing were various. Cotton cloth, or prepared skins, were used, but generally a fine fabric made from the leaves of the aloe (*Agave Americana*), from which a sort of paper was prepared, somewhat resembling Egyptian papyrus, which could be made more soft and beautiful than parchment. When written, the documents were either made up into rolls or else into volumes, in which the paper was shut up like a folding screen, which gave the appearance of a book. When the Spaniards arrived in Mexico, great quantities of these MSS. were in the country; but the first Christian archbishop, Zumarraga, caused them to be collected from every part of the country, and had the whole burnt! (Prescott).

In later times there have been two instances in which persons in semi-barbarous countries have constructed an alphabet, from having heard that by such means ideas were communicated in many lands. A man of the Greybo tribe, on the African coast, and a Cherokee, are said to have formed a series of letters adapted to their respective languages; but in neither case was it the result of *intuitive* genius (Gliddon, p. 17).

Various have been the materials and implements used for writing. As was before observed, paper made from the papyrus is now in existence which was fabricated 2000 years B.C. Moses hewed out of the rock two tables of *stone* on which the commandments were written (Exod. xxxiv. 1). After that time the Jews used rolls of *skins* for their sacred writings. They also engraved writing upon gems or gold plates (Exod. xxxix. 30).

Before the discovery of paper the Chinese wrote upon thin boards with a sharp tool. Reeds and canes are still used as writing implements amongst the Tartars; and the Persians and other Orientals write for temporary purposes on leaves, or smooth sand, or the bark of trees. The Arabs in ancient times wrote their poetry upon the shoulder-blades of sheep.

The Greeks occasionally engraved their laws on tables of brass. Even before the days of Homer table-books were used, made of wood, cut in thin slices, which were painted and polished, and the pen was an iron instrument called a *style*. In later times these surfaces were waxed over, that the writing might be obliterated for further use. Table-books were not discontinued till the 14th century of the Christian era.

At length the superior preparations of paper, parchment, and vellum, became general, and superseded other materials in many, and all entirely civilised, nations.

The European mode of writing, with its perfect and complete apparatus of pen, ink, and paper, is too well known to need description in these pages, and would be irrelevant in an article like the present.—S. P.

WYCLIFFE, JOHN DE, was born in 1324, at the village of Wycliffe in Yorkshire. In 1340 he entered Queen's College, Oxford, but soon afterwards removed to Merton. In 1361 he was pre-

sented to the living of Fylingham; soon after he became warden of Baliol College, and ere long of Canterbury Hall. At this time he was involved in a keen controversy with the mendicant friars, and the zeal he had shown against them and in favour of ecclesiastical reform generally, led to an attempt to deprive him of his office of warden. A long suit followed, which ended in the papal court deciding against Wycliffe in 1370. In 1372 he took his degree of D.D., and proceeded to read divinity lectures in the university. In 1374 he was sent to Bruges as a member of the commission appointed to treat with the pope regarding certain encroachments on the English church which he had perpetrated, a duty which detained him abroad for two years. In his absence he was presented by the crown to the rectory of Lutterworth. Meanwhile the hostility of the party opposed to him in the church had been becoming more determined and bitter; and in 1377 he was cited to appear before parliament to answer to the charge of holding and publishing heretical opinions. From this time he was involved in almost constant conflict with the hierarchy, and but for the protection of powerful patrons his name would probably have been added to the long roll of martyrs for the truth. He maintained his cause with fearless courage and consummate ability; but the toils and trials to which he was exposed brought on an attack of paralysis. In 1382 he was summoned before a commission at Oxford, to answer certain charges against him of holding heretical doctrines. Here he boldly defended the views he had advanced, especially on the subject of transubstantiation. The result was the dissolution of his connection with Oxford, on which he retired to Lutterworth, where the remainder of his days was spent. He died 31st Dec. 1384. He wrote many treatises, but his great work was his translation of the Scriptures into the English of his day—a monument of his learning, piety, and zeal, which happily remains [ENGLISH VERSIONS].—W. ## X

XANTHICUS (Ξανθικός), the sixth month of the Macedonian year (2 Maccab. xi. 30, 33). Josephus says (*Antiq.* i. 3. 3; x. 3) that it corresponded to the Heb. Nisan; and the Syr. version has  here.—W. L. A.

XIMENES, DE CISNEROS FRANCISCO. This distinguished cardinal and primate of Spain, to whom Biblical literature is indebted for the first Polyglott, was born in 1436 at the little town of Tordelaguna, of an ancient but decayed Castilian family, who originally lived at Cisneros, whence the cardinal derived the name *de Cisneros*. Being in straitened circumstances his parents destined him for the church from his very youth, and accordingly gave him an excellent rudimentary education in the ancient languages at Alcalá. At the age of fourteen (1450) he was sent to the university of Salamanca, where he devoted himself most assiduously to the study of the civil and canon law, and received in 1456 the degree of bachelor in both these departments. Three years after he left the university (1460) he went to Rome, where he practised the law for six years, and from which place

he was suddenly called to his native country (1467) by the death of his father. Before his return, however, he obtained a papal bull or *expectative*, preferring him to the first benefice of a specified value which should become vacant in the see of Toledo. For this he had to wait several years, and when a vacancy at last offered itself, at the death of the arch-priest of Uzeda (1473), and Ximenes took possession of it, Archbishop Carrillo threw him into prison, where he was detained six years. When restored to freedom and placed in possession of his benefice, he effected an exchange for the chaplainship of Sigüenza (1480), in order to escape the jurisdiction of the vindictive archbishop. In this new position he prosecuted with the utmost diligence the study of theology, as well as of the Hebrew and Chaldee languages, which afterwards proved of the greatest service to him when editing the Polyglott. His extraordinary qualities had now become so famous that Mendoza, who was at that time bishop of Sigüenza, appointed him vicar. In the midst of his brilliant career he entered (1483) the novitiate to the Observantines of the Franciscan order in the convent of San Juan de los Reyes at Toledo, when he exchanged his baptismal name *Gonzalo* for Francisco. After a few years sojourn in it, he quitted this convent to become a hermit in the convent of Our Lady of Castañar, so called from a deep forest of chestnuts in which it was embosomed. In the midst of these dark mountain solitudes he built with his own hands a little hermitage, in which he passed three years in prayer and meditation, and which he only left because his superiors appointed him guardian of the convent of Salzeda. Upon the recommendation of Mendoza, now cardinal and archbishop of Toledo, he was appointed confessor to Queen Isabella in 1492; in 1494 he was elected provincial of his order in Castile; and in 1495, on the death of Mendoza, was promoted to the archbishopric of Toledo, and with it became High Chancellor of Castile. Passing by his political adventures and martial exploits as foreign to the scope of the biographical notices in this Cyclopædia, we shall only detail Ximenes' efforts to promote Biblical studies and sacred literature. As the most praiseworthy undertaking in this department, which ultimately led to the publication of the celebrated Complutensian Polyglott, is his founding the university at Alcalá de Henares = the Roman *Complutum*, whence the Polyglott derives the appellation *Complutensian*. The site for this abode of learning he selected himself in 1498, and in 1500 he laid the foundation-stone of the college of San Ildefonso. Adjoining to this principal college he had erected nine other colleges, as well as a hospital for the sick of the university, and the whole pile of buildings was completed in 1508 under his own superintendence. With the aid of his learned friends he appointed forty-two professors, and the first lecture was delivered in the university in August 1508. He assigned for its support 14,000 ducats a-year. Having thus completed his scheme for the education of the people at large, Ximenes now applied himself to carrying into effect his projected Polyglott, which was to supply the spiritual guides of the people with the originals of the sacred Scriptures, being the source whence these teachers derive the instruction they impart to those intrusted to their care. To this end he began to collect materials for the Polyglott in 1502, shortly after laying the

foundation-stone of the other projected structure of learning, and the work was completed in 1517. The stupendous character of this magnificent Bible may be seen from the following analysis of the contents of the six splendid volumes.

(a.) *The first volume* contains the Pentateuch in Hebrew, Chaldee, Greek, and Latin. The Hebrew text, which has the vowel-points but not the accents, occupies the outside of the three columns, the Sept. with an interlineary Latin translation occupies the inside column, and the Vulg. occupies the middle column, indicating that just as Christ was crucified between two thieves so the Roman Church, represented by St. Jerome's version, is crucified between the synagogue represented by the Hebrew text, and the Eastern Church, denoted by the Greek version. At the lower part of the page are two smaller columns, one containing the Chaldee paraphrase and the other a Latin translation of it. This volume is preceded by—*i.* St Jerome's Preface to the Pentateuch. *ii.* The Bull of Leo X. permitting the circulation of the work. *iii.* Addresses to the reader by Francis, bishop of Abyla, and Francis of Mendoza, archdeacon of Pedroche. *iv.* The dedicatory epistle of Cardinal Ximenes to Leo X. *v.* An address to the reader about the language of the O. T. *vi.* A treatise on finding the roots of the Hebrew words. *vii.* An introduction to the N. T. *viii.* An introduction to the Hebrew and Chaldee Lexicon and Hebrew Grammar, as well as to the interpretation of proper names. *ix.* On the manner of studying the sacred Scriptures. *x.* Epistle of St. Jerome to Paul the Presbyter about the history of the sacred books. At the end of the volume are two leaves of errata.

(b.) *The second volume* contains Joshua, Judges, Ruth, Samuel, Kings, Chronicles, and the Prayers of Manasseh. It is preceded by—*i.* The dedicatory epistle to Leo X. *ii.* Address to the reader as in the first volume, and at the end of the volume are two leaves of errata. In this volume, as well as in the remaining two volumes, which embrace the O. T., the two columns containing the Chaldee paraphrase and the Latin translation of it are omitted. The cardinal tells us that he has only given the Chaldee version of the Pentateuch, and omitted the Targum on the Prophets and Hagiographa, because he looked upon it as corrupt, interspersed with Talmudic fables, and as unworthy to be bound up with the Holy Scriptures.

(c.) *The third volume* contains Ezra, Nehemiah, Tobit, Judith, Esther, Job, Psalms, Proverbs, Ecclesiastes, Song of Songs, Wisdom, and Ecclesiasticus. It is preceded by the same dedicatory epistle and address to the reader as given in the previous volumes, and the end has two leaves of errata. It is to be observed that the Sept. on the Psalms, instead of having the new interlineary Latin translation, which is the case in all the other books of the O. T., has the old Latin version occupying this interlineary position.

(d.) *The fourth volume* contains Isaiah, Jeremiah, Lamentations, Baruch, Ezekiel, Daniel with the additions, the Minor Prophets, and the three Maccabees. Like the other volumes it begins with the dedicatory epistle and ends with two leaves of errata. At the end of this volume is the date July 10, 1517.

(e.) *The fifth volume* contains the whole N. T. in Greek and Latin (Vulgate) in two columns. A letter of reference connects the Greek and Latin

texts verbally together, as will be seen from the following specimen of Matt. xxvi. 1 :—

<p>Καὶ ὁ ἐγένετο ὁ ὅτε ἔτελεσεν ὁ ἰησοῦς πάντας τοὺς λόγους αὐτοῦ.</p>	<p>Et factum est cum consummasset Jesus, sermones hos omnes.</p>
--	--

When there is anything in the one to which there is nothing in the other to correspond, a hyphen or circles are used to fill up the vacant space, in order that the student may easily see whether the Latin translation has always corresponding words to the Greek original.

The volume is preceded by—*i.* A Greek address to the reader with a Latin translation. *ii.* A Greek epistle of Eusebius. *iii.* St. Jerome's Prologue on the four Evangelists addressed to Pope Damasus. At the end of the volume is the date January 10, 1514, and on the next leaf are some Greek and Latin verses in commendation of the book. The editors of this volume were Ælius Antonius Nebrissensis, Demetrius Cretensis, Ferdinandus Pitianus, and especially Lepoz de Stunica, who prepared the Greek text.

(f.) *The sixth volume* contains—*i.* A Hebrew and Chaldee vocabulary of the O. T., dated March 17, 1515. *ii.* An explanation of the Hebrew, Chaldee, and Greek proper names of the O. and N. T. in alphabetical order, whereunto is added a list of names according to the various readings. *iii.* An introduction to the Hebrew Grammar, dated May 1515. *iv.* An alphabetical Index of the Latin words which occur in the work. *v.* A Greek and Latin Lexicon. *vi.* An introduction to the Greek Grammar. *vii.* An explanation of the Hebrew, Chaldee, and Greek names which occur in the N. T. This volume is almost entirely the work of Zamora. [ZAMORA.]

When with the aid of the most learned converted Jews and Christians that Spain could produce, the last sheet of this magnificent Polyglott was finished, in 1517, after spending over it fifteen years of incessant labour and fifty thousand ducats, John Broccario, the son of the printer, then a child, was dressed in his best attire and went with a copy to the cardinal. The latter, as he took it up, raised his eyes to heaven, and devoutly offered up his thanks to the Saviour for being spared to see the completion of this good work, which had cost him so much labour and anxiety. Then turning to those who surrounded him, Ximenes said, that 'of all the acts which distinguished his administration, there was none, however arduous, better entitled to their congratulation than this!' It does indeed seem that Providence had just spared Ximenes to complete this grand work, for he died a few months after it, November 8, 1517, aged 81. His death, however, delayed its immediate circulation. For although completed in 1517, the Polyglott did not receive the sanction of Pope Leo X. for its publication until March 22, 1520, and the copies were not circulated and vended till 1522. As there were only 600 copies printed, the Polyglott became very scarce so early as the latter part of the 16th century.

As for the MSS. used in compiling the texts of the Hebrew Scriptures—the so-called Chaldee Paraphrase of Onkelos on the Pentateuch, the Sept., the Greek of the N. T., and the Vulg.—these have as yet eluded the research of critics. The Hebrew text of the O. T. and the Chaldee of the Pen-

tateuch had already been published several times, both in parts and as a whole, before the appearance of the Polyglott. Thus, the Hebrew Pentateuch with the Chaldee of Onkelos appeared in Bologna 1432; *ibid.* 1490; Lisbon 1491; Naples 1491; Brescia 1492; *ibid.* 1493; and Constantinople 1505. The text of the Earlier Prophets was published at Soncino 1485; and Leiria 1494; of the Latter Prophets, *circa* 1485; and Pessaro 1515; of the Hagiographa, Naples 1486-7, *ibid.* 1490; and Salonica 1513; and of the entire Bible, Soncino 1488, and Brescia 1494. It was therefore not likely that the editors would resort much to MSS., though it is stated that they used seven MSS., which the cardinal secured at the cost of 4000 ducats without saying what they were. Besides the Hebrew and Chaldee texts of the Complutensian Polyglott, with the exception of a few variations, agree with those of former and later editions, which shows that the editors depended upon the printed texts. The same is the case with the text of the Vulg. which had repeatedly been published before—viz. at Mayence 1450-5; Bamberg 1462; Strasburg 1469; *ibid.* 1470; *ibid.* 1468; Cologne 1470; Rome 1471; Mayence 1472; Cologne 1474; Basle 1475; Placenza 1475; Nuremberg 1475; Venice 1475; Paris 1475; Venice 1476; Naples 1476; Nuremberg 1476; Basle 1477; Venice 1478; Lyons 1479; Col. 1480; Venice 1480; *ibid.* 1481; *ibid.* 1483; *ibid.* 1484; *ibid.* 1487; Basle 1491; Venice 1495; Paris 1504; Lyons 1514; and a number of other places. It is the texts of the Sept. and of the Greek N. T. which appeared for the first time in this Polyglott, and for which of course MSS. had to be used. And indeed, though the editors, in accordance with the custom of that time, do not describe the MSS., they distinctly declare that 'ordinary copies were not the archetypes for this impression, but very ancient and correct ones; and of such antiquity that it would be utterly wrong not to own their authority; which the supreme pontiff Leo X., our most holy father in Christ, and lord, desiring to favour this undertaking, sent from the apostolical library to the most reverend lord the Cardinal of Spain, by whose authority and commandment we have had this work printed' (*Preface to the N. T.*) The same declaration is made by Cardinal Ximenes himself, who says in his dedication to Pope Leo X.: 'For Greek copies indeed, we are indebted to your Holiness, who sent us most kindly from the apostolical library very ancient codices both of the O. and the N. T., which have aided us very much in this undertaking.' That Greek MSS. both of the O. and the N. T. were furnished from the Vatican library is moreover corroborated by the fact that though all the MSS. which formerly belonged to Cardinal Ximenes, and which comprised almost all the MS. materials used in the Polyglott, are still safely preserved in the library at Madrid, to which place they have been transferred from Alcalá,\* yet no MSS. exist in this collection of the Sept. on the Pentateuch, or of the Greek N. T., thus showing that they did not belong to the cardinal, and that they were restored again to the Vatican when the

work was completed. Indeed the two Greek MSS. of the Sept. which Ximenes got from Leo are now ascertained, as has been shown by Fr. Vercellone in his Preface to Card. Mai's edition of Codex B. Vercellone also mentions the fact that Codex B is missing in catalogues of the Vatican library made in 1518, which seems to favour the supposition that the editors of the Polyglott had it.

A most remarkable testimony to the interest which Pope Leo X. took in securing a correct text of the N. T., and to the nature of the MSS. he procured for this purpose, is to be found in the celebrated *Massoreth Ha-Massoreth* of Elias Levita. As we have not seen the passage noticed anywhere, we subjoin it entire in an English version: 'When I was at Rome I saw three Chaldeans who arrived from the country of Prester John (פֶּרֶסְטֵר יוֹהָן), having been sent for by Pope Leo X. They were masters of the Syriac language and literature, though their vernacular language was Hebrew. The special language however they employed in writing books, as well as that of the N. T. of the Christians which they had brought with them, was Syriac, which is also called Aramæan, Babylonian, Assyrian, Chaldaic, Tursai or Targum, being denominated by these seven names. Pope Leo X. had sent for them in order to correct by their codices his exemplar of the N. T., which was written in Latin. I then saw in their hands a Psalter written in Syriac characters as well as translated into Syriac; that is to say the Hebrew text was written with Syriac letters' (*Massoreth Ha-Massoreth, Introduction*, iii. 11 a, ed. Sulzbach 1771).

It only remains to be added that the Greek text of this Polyglott has been reprinted in the Antwerp or Royal Polyglott (1569-72), the Heidelberg Polyglott edited by Bertram (1586), the Hamburg Polyglott edited by Wolder (1596), and the Paris Polyglott edited by Le Jay (1645).

T.* pp. 1-18, London 1854, where will also be found reprinted Dr. Thomson's catalogue of the MSS. used in preparing the Polyglott; Horne, *Introduction to the Holy Scriptures*, vol. iv. pp. 119-122, ed. Tregelles, London 1856.—C. D. G.

## Y

YACHMUR (יַחְמֹר), Deut. xiv. 5; 1 Kings iv. 23) is not, as in the A. V., 'the fallow-deer,' but the *Oryx leucoryx* of the moderns, the true Oryx of

\* The whimsical story which the Danish professor Moldenhawer brought from Spain in 1784, that the MSS. had all been sold by an illiterate librarian about the year 1749, as *useless parchments*, to a rocket-maker, who soon worked them up in the regular way of his vocation—and which was VOL. III.

believed through Europe for about sixty years—is now relinquished by scholars as fabulous. It is greatly to be regretted that so indefatigable a scholar as Prescott should still have incorporated it in his excellent *History of Ferdinand and Isabella*, part ii. cap. xxi.

the ancients, and of Niebuhr, who quotes R. Jona, and points out the Chaldaic *yachmura*, and Persian *kutzakohi* (probably a mistake for *maskandos*), and describes it as a great goat. The eastern Arabs still use the name *yazmur*.

531. The Yachmur. *Oryx leucoryx*.

The *Leucoryx*, as the name implies, is white, having a black mark down the nose, black cheeks and jowl, the legs, from the elbow and heel to the pastern joints, black, and the lower half of the thighs usually, and often the lower flank, bright rufous; hence the Heb. name from *הָמַר* (*rubere*, to redden). The species now resides in pairs, in small families, and not unfrequently singly, on the mountain-ranges along the sandy districts, in the desert of eastern Arabia, and on the banks of the Lower Euphrates; and may extend as far eastward as the west bank of the Indus, feeding on shrubby acacias, such as *tortilis* and *Ehrenbergi*. It was, no doubt, formerly, if not at present, found in Arabia Petrea, and in the eastern territories of the people of Israel.—C. H. S.

YAËL (יָעַל), a species of wild goat; supposed by some to be the *Ibex*, but probably a species peculiar to Syria and Arabia the *Capra Sinaitica*

532. Wild Goat of Sinai.

of Ehrenberg. The male is considerably taller and more robust than the larger he-goats, the horns forming regular curves backwards, and with from fifteen to twenty-four transverse elevated cross

ridges, being sometimes near three feet long, and exceedingly ponderous: there is a beard under the chin, and the fur is dark brown; but the limbs are white, with regular black marks down the front of the legs, with rings of the same colour above the knees and on the pasterns. The females are smaller than the males, more slenderly made, brighter rufous, and with the white and black markings on the legs not so distinctly visible. This species live in troops of fifteen or twenty, and plunge down precipices with the same fearless impetuosity which distinguishes the ibex. Their horns are sold by the Arabs for knife handles, etc.—C. H. S.

YAËN (יָעֵן) and fem. YAANAH (יָעָנָה), always coupled with *בֵּית*; the latter is the form most frequently used. This term designates the ostrich (LXX. *στρουθιον*; Vulg. *struthio*), and is derived by some from an obsolete root יָעַן, to be greedy; whilst others, with greater probability, regard the word as onomatopoeitic from the harsh cry of the bird. References to this bird are frequent in the O. T. (Lev. xi. 19; Deut. xiv. 15; Job xxx. 29; xxxix. 13; Is. xlii. 21; xxxiv. 13; xliii. 20; Jer. l. 39; Lam. iv. 3; Micah i. 8); in most of which passages the A. V. has the mistaken rendering of *owls*. In Job xxxix. 13 female ostriches are called רִנְנִים, from their wailing tremulous cry.

There are two varieties of ostrich, the one having a glossy black plumage, and often attaining ten feet in height; the other covered with grey and dingy feathers, and never reaching seven feet. They are gregarious, associating sometimes in troops of near a hundred. They are birds of great voracity, and perhaps on this account were included among unclean birds in the law.—W. L. A.

YAHALOM (יְהָלֹם), a species of gem, deriving its name from its hardness (from *הָלַם*, to hammer or beat). The older versions make it the *oryx*; Ibn Ezra and other of the Jewish commentators make it the *diamond*, which is the rendering given in the A. V. (Exod. xxviii. 18; xxxix. 11; Ezek. xxviii. 11), and approved by Braun (*De vest. Sacerd.* ii. 13). It is doubtful, however, if the art of cutting the diamond was known at that early period; and, besides, the Heb. name *Shamir* seems to have been appropriated to the diamond [SHAMIR]. The probability therefore is in favour of the Yahalom being an onyx, which is a species of chalcedony of the flint family of minerals.—W. L. A.

YANSHUPH (יָנֶשֶׁף); Lev. ii. 17; Deut. xiv. 16; Is. xxxiv. 11). In the Septuagint and Vulgate it is translated 'Ibis,' but in our version 'Owl'; which last Bochart supports, deriving the name from *נֶשֶׁף* *nesheph*, 'twilight.' It may be remarked that 'ibis' in Europe, and even in mediæval and modern Egypt, was a very indefinite name, until Bruce first pointed out, and Cuvier afterwards proved, what we are to understand by that denomination. The Ibis is probably the *Abou-hannes* of Bruce, and certainly the *Ibis religiosa* of Cuvier, who discovered specimens in the mummy state, such as are now not uncommon in museums, and, by comparison, proved them to be identical with his sacred ibis. The species is nowhere abundant; it occurs, in the season, on the Upper Nile, a few in company, seldom coming down into Lower Egypt, but extending over cen-

tral Africa to the Senegal. A bird so rare about Memphis, and totally unknown in Palestine, could not be the Yanshuph of the Pentateuch, nor could the black ibis which appears about Damietta, nor any species, strictly tenants of hot and watery regions, be well taken for it. Bochart and others, who refer the name to a species of owl, appear to disregard two other names ascribed to owls in the 16th verse of the same chapter of Leviticus. If, therefore, an owl was here again intended, it would have been placed in the former verse, or near to it. In this difficulty, considering that the Seventy were not entirely without some grounds for referring the Hebrew Yanshuph to a wader; that the older commentators took it for a species of ardea; and that the root of the name may refer to twi-

533. Night Heron of Arabia.

light, indicating a crepuscular bird; we are inclined to select the night heron as the only one that unites these several qualities. It is a bird smaller than the common heron, distinguished by two or three white plumes hanging out of the black-capped nape of the male. In habit it is partially nocturnal. The Arabian Abou-onk (?), if not the identical bird, is a close congener of the species, found in every portion of the temperate and warmer climates of the earth: it is an inhabitant of Syria, and altogether is free from the principal objections made to the ibis and the owl. The Linnaean single *Ardea nycticorax* is now typical of a genus of that name, and includes several species of night herons. They fly abroad at dusk, frequent the sea-shore, marshes, and rivers, feeding on mollusca, crustacea, and worms, and have a cry of a most disagreeable nature. This bird has been confounded with the night hawk, which is a goat-sucker (caprimulgus), not a hawk.—C. H. S.

YARN. This is the rendering in the A. V. of a word which appears first in the form יָרֵן (1 Kings x. 28), and then in the form יָרֵן (2 Chron. i. 16). The LXX. in the former passage gives ἐκ Θεκουῆ (Alex. Θεκουεῖν), from Tekoa, in the latter it omits the word; the Vulg. has *de Coa, from Coa*, in both places. The word is probably a local designation; and Coa is most likely the place intended.—W. L. A.

YASHPH (יָשָׁפֶת), a precious stone which nearly all are agreed in regarding as the *jasper*

(LXX. ἰάσμις), a conclusion which the name itself (carried probably abroad by the Phœnicians) guarantees. The jasper is of the flint family; its prevailing colour is dark red, frequently with cloudy or flammeous shades; but specimens of yellow, red, brown, and green are found. That kind which is commonly known as the *blood-stone*, which has bright red spots on a dark green ground, is the most esteemed (Rosenmüller, *Biblical Mineralogy*, p. 41).—W. L. A.

YEAR (שָׁנָה). The Hebrew year consisted of twelve unequal months, which, previously to the exile, were lunar, as may be seen from the names of the moon, חֹדֶשׁ and יָרֵךְ, which signify respectively a month (so with us moon from month, German *mond*); though Credner, relying too much on hypothesis, especially on the assumption of the late origin of the Pentateuch, has endeavoured to show that, until the 8th century before Christ, the Israelites reckoned by solar years. The twelve solar months made up only 354 days, constituting a year too short by no fewer than eleven days. This deficiency would have soon inverted the year, and could not have existed even for a short period of time without occasioning derangements and serious inconvenience to the Hebrews, whose year was so full of festivals. At an early day, then, we may well believe a remedy was provided for this evil. The course which the ancients pursued is unknown, but Ideler (*Chronol.* i. 490) may be consulted for an ingenious conjecture on the subject. The later Jews intercalated a month every two, or every three years, taking care, however, to avoid making the seventh an intercalated year. The supplementary month was added at the termination of the sacred year, the twelfth month (February and March), and as this month bore the name of Adar, so the interposed month was called Veadar (וְאָדָר), or Adar the Second. The year, as appears from the ordinary reckoning of the months (Lev. xxiii. 34; xxv. 9; Num. ix. 11; 2 Kings xxv. 8; Jer. xxxix. 2; comp. 1 Maccab. iv. 52; x. 21), began with the month Nisan (Esther iii. 7), agreeably to an express direction given by Moses (Exod. xii. 2; Num. xi. 1). This commencement is generally thought to be that of merely the ecclesiastical year; and most Jewish, and many Christian authorities, hold that the civil year originally began, as now, with the month Tisri; the Rabbins conjecturally assigning as the reason that this was the month in which the creation took place. Josephus' statement is as follows: 'Moses appointed that Nisan should be the first month for their festivals, because he brought them (the Israelites) out of Egypt in that month; so that this month began the year, as to all the solemnities they observed to the honour of God, although he preserved the original order of the months as to selling and buying and other ordinary affairs (*Antiq.* i. 3. 3). Winer, however, is of opinion that the commencement of the year with Tisri, together with the beginning of the sacred year in Nisan, is probably a post-exilic arrangement, designed to commemorate the first step of the return to the native soil of Palestine (Esther iii. 1; Neh. vii. 73; viii. 1, *seq.*); an idea, however, to which they only can give assent who hold that the changes introduced on the return from Babylon were of a constructive rather than a restoratory nature—a class of authorities with which the writer has few

bonds of connection. The reader should consult Exod. xxiii. 16; xxxiv. 22. But the commencement of the civil year with Tisri, at whatever period it originated, had after the exile this advantage,—that it accorded with the era of the Seleucidæ, which began in October. The ancient Hebrews possessed no such thing as a formal and recognised era. Their year and their months were determined and regulated, not by any systematic rules of astronomy, but by the first view or appearance of the moon. In a similar manner they dated from great national events, as the departure from Egypt (Exod. xix. 1; Num. xxxiii. 38; 1 Kings vi. 1); from the ascension of monarchs, as in the books of Kings and Chronicles; or from the erection of Solomon's temple (1 Kings viii. 1; ix. 10); and at a later period, from the commencement of the Babylonish captivity (Ezek. xxxiii. 21; xl. 1). When they became subjects of the Græco-Syrian empire they adopted the Seleucid era, which began with the year B.C. 312, when Seleucus conquered Babylon.—J. R. B.

**YELEK** (יֶלֶק). This term is variously rendered (Ps. cv. 34, βροῦχος, *bruchus*, caterpillar; Jer. li. 14, 27, ἀκρίς, *brucus*, caterpillar; and in the latter passage the Vulg. reads *brucus aculeatus*, and some copies *horripilantes*; Joel i. 4, ii. 25, βροῦχος, *bruchus*, cankerworm; Nah. iii. 15, 16, ἀκρίς and βροῦχος, cankerworm). Assuming that the Psalmist means to say that the יֶלֶק was really another species employed in the plague on Egypt, the English word caterpillar in the common acceptation cannot be correct, for we can hardly imagine that the larvæ of the Papilionidæ tribe of insects could be carried by 'winds.' Cankerworm means *any worm* that preys on fruit. βροῦχος could hardly be understood by the Sept. translators of the minor prophets as an unfledged locust; for in Nah. iii. 16 they give βροῦχος ὠμῆρες καὶ ἐξενερδσθη, *the βροῦχος flies away*. The Arabic يَلَق, *to be white*, is offered; hence the white locust, or the chafer-worm which is white (Michaelis, *Recueil de Quest.* p. 64; *Sup.*

*ad Lex. Heb.* p. 1080). Others give לֶקֶק, *to lick off*, as Gesenius, who refers to Num. xxii. 4, where this root is applied to the ox 'licking' up his pasturage, and which, as descriptive of celerity in eating, is supposed to apply to the יֶלֶק. Others suggest the Arabic وَلَق, *to hasten*, alluding to the quick motions of locusts. The passage in Jer. li. 27 is the only instance where an epithet is applied

to the locust, and there we find כְּמִנְיֹת יֶלֶק, 'rough caterpillars.' As a noun the word means 'nails,' 'sharp-pointed spikes.' Hence Michaelis refers it to the rough sharp-pointed feet of some species of chafer (*ut supra*). Oedman takes it for the *G. cristatus* of Linn. Tychsen, with more probability, refers it to some rough or bristly species of locust, as the *G. hamatopus* of Linn., whose thighs are ciliated with hairs. Many grylli are furnished with spines and bristles; the whole species *acheta*, also the *pupa* species of Linn., called by Degeer *Locusta pupa spinosa*, which is thus described:—Thorax ciliated with spines, abdomen tuberculous and spinous, posterior thighs armed beneath with four spines or teeth; inhabits Ethiopia. The allusion in Jer. is to the ancient accoutrement of war-horses, bristling with sheaves of arrows.—J. F. D.

**YEMIM** (יְמִיִּם). This ἀπαξ λεγόμενον occurs Gen. xxxvi. 24, where it is rendered in the A. V. by 'mules.' This is the meaning given to the word by some of the Rabbins, and it is adopted in the Zürich Bible, to which the A. V. is so much indebted, by Diodati and others. Luther, however, follows Jerome, who gives *aque calide* as the proper rendering, and this is now generally adopted. There are warm springs in the vicinity of the Dead Sea, and some of these probably Anah found when feeding his father's asses in the Arabah. The Cod. Samar. reads הַיְמִיִּם, *The Emin*, and this the Targumists follow; but this is evidently a mistake.—W. L. A.

#### YOKE. [AGRICULTURE.]

**YONAH** (יוֹנָה, *olvas*, *περιστέρα*). There are probably several species of doves or pigeons included in the Hebrew name *yonah*. It may contain all those that inhabit Palestine, exclusive of the turtle-doves properly so called. Thus generalised, the dove is figuratively, next to man, the most exalted of animals, symbolising the Holy Spirit, the meekness, purity, and splendour of righteousness. Next, it is by some considered (though in an obscure passage) as an early national standard (Ps. lxxviii. 13), being likewise held in pagan Syria and Phœnicia to be an ensign and a divinity, resplendent with silver and gold; and so venerated as to be regarded as holy, and forbidden as an article of food. By the Hebrew law, however, doves and turtle-doves were the only birds that could be offered in sacrifice, and they were usually selected for that purpose by the less wealthy (Gen. xv. 9; Lev. v. 7; xii. 6; Luke ii. 24); and to supply the demand for them, dealers in these birds sat about the precincts of the Temple (Matt. xxi. 12, etc.) The dove is the harbinger of reconciliation with God (Gen. viii. 8, 10, etc.) As to the supposed use of doves' dung for food, see **DOVES' DUNG**.

534

With regard to the dove as a national ensign, it may be remarked that we have two figures where the symbol occurs: one from a Phœnician coin, where the dove stands on a globe instead of the usual pedestal of ancient signa, with wings closed, and a glory of sunbeams round the head; the other, from a defaced bas-relief observed in the Hauran, where the bird, with wings displayed, is seated also on a globe, and the sunbeams, spreading behind the whole, terminate in a circle of stars; probably representing Assyria, Syria, or perhaps Semiramis (compare several passages in Jeremiah). The brown wood-dove is said to be intended by the

Hebrew name; but all the sacred birds, unless expressly mentioned, were pure white, or with some roseate feathers about the wing coverts, such as are still frequently bred from the carrier-pigeon of Scanderoon. It is this kind which Tibullus notices, 'Alba Palestino sancta Columba Syro.'

The carrier-birds are represented in Egyptian bas-reliefs, where priests are shown letting them fly on a message; and to them also may be referred the black-doves, which typified or gave their name to an order of Gentile priests, both in Egypt and, it would seem, in early Greece, who, under this character, were, in the mysteries, restorers of light. This may have had reference to the return of the dove which caused Noah to uncover the ark. All pigeons in their true wild plumage have iridescent colours about the neck, and often reflected flashes of the same colours on the shoulders, which are the source of the silver and gold feathers ascribed to them in poetical diction; and thence the epithet of purple bestowed upon them all, though most applicable to the vinous and slaty-coloured species. The coasts and territory of Syria are noted for the great number of doves frequenting them, though they are not so abundant there as in the Coh-i-Suleiman chain near the Indus, which in Sanscrit is named Arga varta, or, as it is interpreted, the 'dove.' Syria possesses several species of pigeon: the *Columbaenas*, or stock-dove, *C. palumbus*, or ring-dove, *C. domestica*, *Livia*, the common pigeon in several varieties, such as the Barbary, Turkish or Persian carrier, crisp, and shaker. These are still watched in their flight in the same manner as anciently their number, gyrations, and other manoeuvres were observed by soothsayers. The wild species, as well as the turtle-doves, migrate from Palestine to the south; but stock and ring doves are not long absent.

We figure above (No. 534) the more rare species of white and pink carrier, and the Phœnician sacred ensign of the dove.—C. H. S.

## Z

ZAANAIM, PLAIN OF (אֵלֹן בְּעֵנַיִם); more correctly 'Oak of Zaanaim'; δρὺς πλεονεκτούστων; Alex. δρὺς ἀναπανομένων; *Vallis quæ vocatur Senaim*), a place mentioned only in Judg. iv. 11, where, in relating the story of Barak's victory, and Jael's terrible act of loyalty, the sacred historian states that Heber the Kenite, Jael's husband, had separated from his brethren, 'and pitched his tent unto the plain (or oak) of Zaanaim, which is by Kedesh.' The locality is thus indicated. The 'oak' was probably some noted tree, perhaps a patriarch in a sacred grove, beneath or around which nomad shepherds of those days were accustomed to pitch their tents, as Abraham pitched his by the oak of Mamre. The green pastures which abound around the ruins of Kedesh are studded to this day with large oak trees; and the writer has seen, at more than one place, the black tents of the nomad Turkman pitched beneath them. The name *Zaanaim*, which appears to signify 'removings' (as if a camping-ground), has passed away, at least no trace of it has yet been discovered (*Handbook*, p. 444; Van de Velde, *Travels*, ii. 418).

It is generally supposed that the *Zaananim* of

Josh. xix. 33 is only another form of Zaanaim; and there can be little doubt that such is the case. The rendering of the A. V. is incorrect. 'And their coast was from Heleph, from Allon to Zaananim.' The Hebrew is כְּאֵלֶן בְּעֵנַיִם, and can only signify, 'from the oak of (or 'in') Zaananim' (see Keil, *ad loc.*; Reland, *Pal.* p. 717; Keil and Delitzsch on *Judg.* iv. 11; Stanley, *Jewish Church*, i. 324; Porter, *Giant Cities of Bashan*, p. 268).—J. L. P.

## ZAANAN. [ZENAN.]

ZABAD (זָבָד, *God-given*; Sept. Ζαβέδ). 1. A person of the tribe of Judah, mentioned in 1 Chron. ii. 36, among the descendants of Sheshan, by the marriage of his daughter with an Egyptian servant [JARHA; SHESHAN].

2. A grandson of Ephraim, who, with others of the family, was killed during the lifetime of Ephraim, by the men of Gath, in an attempt which the Hebrews seem to have made to drive off their cattle (1 Chron. vii. 21). [See EPHRAIM.]

3. Son of an Ammonitess named Shimeath, who, in conjunction with Jehozabad, the son of a Moabitess, slew king Joash, to whom they were both household officers, in his bed (2 Kings xii. 21; 2 Chron. xxiv. 25, 26). In the first of these texts he is called Jozachar. The sacred historian does not appear to record the mongrel parentage of these men as suggesting a reason for their being more easily led to this act, but as indicating the sense which was entertained of the enormity of Joash's conduct, that even they, though servants to the king, and though only half Jews by birth, were led to conspire against him 'for the blood of the sons of Jehoiada the priest.' It would seem that their murderous act was not abhorred by the people; for Amaziah, the son of Joash, did not venture to call them to account till he felt himself well established on the throne, when they were both put to death (2 Kings xiv. 5, 6; 2 Chron. xxv. 3, 4).

4. One of the persons who, at the instance of Ezra, after the return from captivity, put away the foreign wives they had taken (Ezra x. 27).—J. K.

ZABUD (זָבֻד, *bestowed*; Sept. Ζαβούθ), a son of Nathan the prophet, who held under Solomon the important place of 'king's friend,' or favourite (1 Kings iv. 5), which Hushai had held under David (1 Chron. xxvii. 33), and which a person named Elkanah held under Ahaz (2 Chron. xxviii. 7). Azariah, another son of Nathan, was 'over all the (household) officers' of king Solomon; and their advancement may doubtless be ascribed not only to the young king's respect for the venerable prophet, who had been his instructor, but to the friendship he had contracted with his sons during the course of education. The office, or rather honour, of 'friend of the king,' we find in all the despotic governments of the East. It gives high power, without the public responsibility which the holding of a regular office in the state necessarily imposes. It implies the possession of the utmost confidence of, and familiar intercourse with, the monarch, to whose person 'the friend' at all times has access, and whose influence is therefore often far greater, even in matters of state, than that of the recognised ministers of government.

## ZABULUN. [ZEBULUN.]

ZACCHEUS (Ζακχαῖος, צַכִּי, *justus*?), a superintendent of taxes at Jericho. Having heard of the Redeemer, he felt a great desire to see him as he drew near that place; for which purpose he climbed up into a sycamore-tree, because he was little of stature. Jesus, pleased with this manifestation of his eagerness, and knowing that it proceeded from a heart not far from the kingdom of God, saw fit to honour Zaccheus by becoming his guest. This offended the self-righteous Jews, who objected that 'he was gone to be a guest with a man that is a sinner.' This offensive imputation was met by Zaccheus in the spirit of the Mosaic conception of goodness—'The half of my goods I give to the poor; and if I have taken anything from any man by false accusation, I restore him fourfold.' He that knew the heart of man knew, not only the truth of this statement, but that the good works of Zaccheus emanated from right motives, and therefore terminated the conversation with the words, 'This day is salvation come to this house, forsomuch as he also is a son of Abraham'—a declaration which, whether Zaccheus was by birth a Jew or not, signifies that he had the same principle of faith which was imputed to Abraham, the father of the faithful, for righteousness (Luke xix. 2, *seq.*)

Tradition represents Zaccheus as the first Christian bishop of Caesarea.—J. R. B.

ZACHARIAH. [ZECHARIAH.]

ZACHARIAS. [ZECHARIAH.]

ZADOK, derived from the root צָדַק, corresponding with the Latin *justus*. There are several men of this name mentioned in the O. T.

1. In the reign of David, ZADOK (the son of Ahitub and father of Ahimaaz, 1 Chron. vi. 8) and Ahimelech, were the priests (2 Sam. viii. 17). ZADOK and the Levites were with David when, after the middle of the 11th century B.C., he fled from Absalom; but the king ordered Zadok to carry back the ark of God into the city (2 Sam. xv. 24, 25, 27, 29, 35, 36; xviii. 19, 22, 27). The king, also, considering Zadok a seer, commanded him to return to the city, stating that he would wait in the plain of the wilderness until he should receive such information from him and his son Ahimaaz, and also from the son of Abiathar, as might induce him to remove farther away. On hearing that Ahithophel had joined Absalom, David requested Hushai, his friend, to feign himself to be also one of the conspirators, and to inform Zadok and Abiathar of the counsels adopted by Absalom and his rebellious confederates. The request of David was complied with, and the plans of the rebels made known to David by the instrumentality of Zadok and the others.

After Absalom was vanquished, David sent to Zadok and Abiathar, the priests, saying, 'Speak unto the elders of Judah, Why are ye the last to bring the king back to his house?' etc. (2 Sam. xix. 11; xx. 25). When Adonijah attempted to succeed to the throne, Abiathar countenanced him, but Zadok was not called to the feast at which the conspirators assembled. King David sent for Zadok and Nathan the prophet to anoint Solomon king (1 Kings i. 32-45).

2. In 1 Chron. vi. 12, and Neh. xi. 11, another ZADOK is mentioned, the father of whom was also called Ahitub, and who begat Shallum. This

Zadok descended from Zadok the priest in the days of David and Solomon, and was the ancestor of Ezra the scribe (Ezra vii. 2). We learn from Ezek. xl. 46; xliii. 19; xlv. 15; xlviii. 11, that the sons of Zadok were a pre-eminent sacerdotal family.

3. ZADOK was also the name of the father-in-law of Uzziah and the grandfather of King Jotham, who reigned about the middle of the 8th century before Christ (2 Kings xv. 33; 2 Chron. xxvii. 1).

4 and 5. Two priests of the name of ZADOK are mentioned in Neh. iii. 4-29, as having assisted in rebuilding the wall of Jerusalem about B. C. 445.

The Zadok mentioned in Neh. x. 22 as having sealed the covenant, and Zadok the scribe named in Neh. xiii. 13, are probably the same who helped to build the wall.—C. H. F. B.

ZAHAB (זָהָב), the general name for *gold* in Hebrew. Besides this other words are used to indicate the metal in different states, or of different qualities, viz.—1. **זָהָב**, *native gold*, produced in a pure state, and without mixture with any other metal (Job xxviii. 17; Ps. xxi. 4; cxix. 127; Song v. 15; etc.) The word is derived apparently from **פָּנָה**, *to separate or purify*; in 2 Chron. ix. 17 **טָהוֹר**, *pure gold*, is used instead of **זָהָב** of 1 Kings x. 18. 2. **בָּצֵר**, *gold-dust or ore* (Job xxii. 24, 25).

[BETZER.] 3. **חֲרִיץ**, from **חָרַץ**, *to shine, glister*, denotes gold with reference to its colour (Ps. lxxviii. 14; Prov. iii. 14; viii. 10; xvi. 16; Zech. ix. 3); it is used chiefly in connection with silver. 4. **כֶּתֶם**, from **כָּתַם**, *to dig out ore*, used poetically for gold (Job xxi. 34; Prov. xxv. 12; Lam. iv. 1, etc.); it is sometimes coupled with **אֹפִיר** (Job xxviii. 16; Ps. xlv. 10; Is. xiii. 12), once **אֹפֶן** (Dan. x. 5).

*Zahab* is sometimes joined with **סָגוֹר**, signifying *concealed, shut up, treasured*, to describe *treasured gold* (1 Kings vi. 20, 21; vii. 49, 50; x. 21; 1 Chron. iv. 20). In 1 Kings x. 16, 17, and 2 Chron. ix. 15, 16, mention is made of **זָהָב שְׁחֵט**, of which Solomon caused two hundred shields to be made. Gesenius renders this *mixed or alloyed gold*; but the rendering of the LXX., χρυσά ἐλατά, gold beaten out by the hammer into plates, seems preferable.

The Hebrews got their gold from Arabia, chiefly from Ophir. Mention is also made of Uphaz and Parvaim as places whence gold was brought; but great uncertainty exists as to the places so named [PARVAIM; UPHAZ]. Gold was known at a very early period (Gen. ii. 11), and was used from remote antiquity for articles of personal ornament (Gen. xxiv. 22; xli. 42). It constituted part of Abraham's wealth (Gen. xiii. 2). It was extensively employed for the utensils of the tabernacle and in the temple (Exod. xxv. 35; 1 Kings vi. 22). The first notice we have of its being used as money is in the age of David (1 Chron. xxi. 25). In early times silver seems to have been the usual medium of exchange, and hence in Hebrew as in other tongues silver often means money (Gen. xxiii. 9, etc.)—W. L. A.

ZAIR (זַעִיר, 'little'; Σείρα; *Seira*). In the expedition of king Joram against Edom this place

is mentioned. It is said he 'went over to *Zair*, and all the chariots with him; and he rose by night and smote the Edomites which compassed him about' (2 Kings viii. 21). There is no other reference to it in Scripture. It was evidently situated on, if not within the border of Edom, and consequently somewhere in the great valley of Arabah. There Joram would have favourable ground for the operations of his chariots. As no place of this name has been found on the borders of Moab, several theories have been advanced regarding it.

1. Some identify it with Zoar; but the latter was situated too far northward (Movers, *Krit. Unters.* 218). 2. Some suppose it to be an erroneous reading for זָרִי, 'his princes,' which is found in its place in the parallel passage (2 Chron. xxi. 9); but for this there is no manuscript authority (Dahler, *Paralip.* p. 107). 3. Others think that the correct reading ought to be שְׂעִיר, *Seir*, the ancient name of Edom. Such conjectures are purely gratuitous. The critical scholar must admit the authenticity of the text unless he can bring forward some trustworthy evidence of corruption (see Keil and Bertheau, *ad loc.*)—J. L. P.

ZAÏT, or SAIT (זַיִת), is universally acknowledged to be the Olive-tree. The Latin author Ammianus Marcellinus, as quoted by Celsius (vol. ii. p. 331), was acquainted with it, for he says of a place in Mesopotamia, '*Zaitam* venimus locum, qui *Olea* arbor interpretatur.' *Zaitoon* is the Arabic name by which the olive is known from Syria to Caubul, and described in the works of both Arabic and Persian authors. No tree is more frequently mentioned by ancient authors, nor was any one more highly honoured by ancient nations.

The olive-tree is of slow growth, but remarkable for the great age it attains. It never, however, becomes a very large tree, though sometimes two or three stems rise from the same root, and reach from twenty to thirty feet high. The leaves are in pairs, lanceolate in shape, of a dull green on the upper, and hoary on the under surface. Hence in countries where the olive is extensively cultivated, the scenery is of a dull character from this colour of the foliage. The fruit is an elliptical drupe, with a hard stony kernel, and remarkable from the outer fleshy part being that in which much oil is lodged, and not, as is usual, in the almond of the seed. It ripens from August to September.

Of the olive-tree two varieties are particularly distinguished; the long-leaved, which is cultivated in the south of France and in Italy, and the broad-leaved in Spain, which has also its fruit much larger than that of the former kind. The wild olive-tree, as well as the practice of grafting, has been noticed in the article AGRILEIA. The great age to which the olive attains is well attested. Chateaubriand says: 'Those in the garden of Olivet (or Gethsemane) are at least of the times of the Eastern empire, as is demonstrated by the following circumstance. In Turkey every olive-tree found standing by the Musselmans, when they conquered Asia, pays one *medina* to the Treasury, while each of those planted since the conquest is taxed half its produce. The eight olives of which we are speaking are charged only eight *medinas*.' By some, especially by Dr. Martin, it is supposed that these olive-trees may have been in existence even in the time of our Saviour. Dr. Wilde describes the largest of them as being twenty-four

feet in girth above the roots, though its topmost branch is not thirty feet from the ground; Bové, who travelled as a naturalist, asserts that the largest are at least six yards in circumference, and nine or ten yards high; so large, indeed, that he calculates their age at 2000 years.

The olive is one of the earliest of the plants specifically mentioned in the Bible, the fig being the first (Gen. viii. 11). It is always enumerated among the valued trees of Palestine; which Moses describes (Deut. vi. 11; viii. 8) as 'a land of oil-olive and honey' (so in xxviii. 40, etc.); and (2 Chron. ii. 10) Solomon gave to the labourers sent him by Hiram, king of Tyre, 20,000 baths of oil. Besides this, immense quantities must have been required for home consumption, as it was extensively used as an article of diet, for burning in lamps, and for the ritual service. The olive still continues one of the most extensively cultivated of plants. Mr. Kitto mentions that in a list he had made of references to all the notices of plants by the different travellers in Palestine, those of the presence of the olive exceed one hundred and fifty, and are more numerous by far than to any other tree or plant. The references to vines, fig-trees, mulberries, and oaks, rank next in frequency. Something of this must, however, depend upon the knowledge of plants of the several travellers. Botanists, even from Europe, neglect forms with which they are unacquainted, as, for instance, some of the tropical forms they meet with. Not only the olive-oil, but the branches of the tree were employed at the Feast of Tabernacles. The wood also was used (1 Kings vi. 23) by Solomon for making the cherubim (vers. 31, 32), and for doors and posts 'for the entering of the oracle,' the former of which were carved with cherubim, and palm-trees, and open flowers. The olive being an evergreen was adduced as an emblem of prosperity (Ps. lii. 8), and it has continued, from the earliest ages, to be an emblem of peace among all civilised nations. The different passages of Scripture are elucidated by Celsius (*Hierobot.* ii. p. 330), to whom we have been much indebted in most of the botanical articles treated of in this work, from the care and learning which he has brought to bear on the subject.—J. F. R.

ZALMON (זַלְמוֹן; Sept. Σελμών), a mountain in Samaria near to Shechem (Judg. ix. 48). [SALMON.]

ZALMONAH (זַלְמוֹנָה; Σελμωνά), a station of the Israelites in the desert [WANDERING, WILDERNESS OF].

ZALMUNNA. [ZEBAH AND ZALMUNNA.]

ZAMZUMMIMS (זַמְזֻמִּים; Sept. Ζοχομμιν), a race of giants dwelling anciently in the territory afterwards occupied by the Ammonites, but extinct before the time of Moses (Deut. ii. 20) [UZUM; GIANTS.]

ZANOAH (זָנוּחַ, *marsh, bog*). 1. (Sept. Τανώ; Alex. Ζανώ), one of the towns of Judah 'in the valley or Shephelah' (Josh. xv. 34); which Jerome identifies with a village called in his time Zanua, on the borders of Eleutheropolis, on the road to Jerusalem (*Onomast.* s. v. 'Zanohua'). The name of Zanu'a is still connected with a site on the slope

of a low hill not far east of Ain Shems (Beth-shemesh).

2. (Zakanaḥ; Alex. *Zawakelu*; formed by combining זנח and the following word (הקין), a town in the hill country of Judah (Josh. xv. 56), founded probably by Jehuthiel the son of Mered by his Jewish wife (1 Chron. iv. 18). Robinson mentions a place *Za'natah* about ten miles south of Hebron (*B. R.* ii. 626; Van de Velde, *Memoir*, p. 354).

ZAPHNATH-PAANEAH (צִפְנַת פְּעֵנָה; Sept.

Ψονθοφανήχ), an Egyptian name given by Pharaoh to Joseph in reference to his public office. The genuine Egyptian form of the word is supposed to have been more nearly preserved by the Sept. translator, as above; in which both Jablonsky (*Opusc.* c. 207-216) and Rosellini (*Mon. Storici*, i. 185) recognise the Egyptian PSOTMFENEH, 'the salvation,' or 'saviour of the age;' which corresponds nearly enough with Jerome's interpretation, 'Salvator mundi.' Gesenius and others incline, however, rather to regard its Egyptian form as PSONTMFENEH, 'sustainer of the age,' which certainly is a better meaning. This, in Hebrew letters, would probably be represented by צִפְנַת פְּעֵנָה, Paznath-Paaneah; but in the name as it now stands the letters פֶּנַּל are transposed, in order to bring it nearer to the Hebrew analogy. Concerning the Egyptian root SNT, *sustentare, tueri*, see Champollion, *Gramm.* p. 380; Pezron, *Lex. Copt.* p. 207. [Bunsen, adopting the LXX. form, says, 'In the former part of the word lies the old Egyptian root *sut* = *sout*, to ground, to secure, and the latter is to be resolved into *p ankḥ*, life, a term in which many of the old Egyptian names terminate' (*Bibelwerk*, in loc.) The name given to Joseph would thus mean *Life-sustainer*.]

ZAPHON (צָפוֹן, 'the north;,' *Σαφών*; *Saphon*), a city of Gad, situated in 'the valley,' or *Arabah*, on the east bank of the Jordan, and grouped with Succoth. It is only mentioned in Josh. xiii. 27. It probably lay near the northern end of the valley, and hence its name. No trace of it has been discovered. It would appear to be this city which is mentioned in Judg. xii. 1, 'The Ephraimites gathered themselves together and passed over to *Zaphon*' (צִפְוֹנָה). This is generally regarded as an appellative, and rendered 'northward;' but the construction shows it to be a proper name, and so it is represented in the Alexandrine MS. of the Septuagint. According to a statement of the Gemara it was identical with *Amatha* (Reland, *Pal.* p. 308; Keil and Delitzsch on *Judg.* ad loc.); but *Amatha* lay among the mountains.—J. L. P.

ZARED. [ZERED.]

ZAREPHATH. [SAREPTA.]

ZARETAN, ZARTHAN, and ZARTANAH (צָרְתָּנָה and צָרְתָּנָה; *Σαρπά* in 1 Kings vii. 46; *Σαρθάν* in 1 Kings iv. 12; *Sarthan* and *Sarthana*) are different forms of the same name. The two first are identical in Hebrew (Josh. iii. 16; 1 Kings vii. 46); and the third has a feminine termination (1 Kings iv. 12). The name is first mentioned in connection with the miraculous passage of the Jordan by the Israelites:—'The waters rose up upon an heap far from the city Adam, that is beside *Zaretan*.' Its position is more definitely pointed out in 1 Kings iv. 12 as near Bethshean.

In the only other passage where the name occurs it is used to describe the place where the brazen vessels of the temple were cast—'in the clay-ground between Succoth and Zarthan' (vii. 46). It must thus have been a well-known place on the bank of the Jordan, and not far distant from Bethshean. Van de Velde says: 'The name seems to have been preserved in that of *Surtabah*, the peculiar mountain group in the Ghor south of Wady-el-Ferrah' (*Memoir*, 354). This, however, is much too far south, being at least thirty miles from Bethshean (see, however, Keil and Delitzsch on Josh. iii. 16); and the resemblance in name is more fanciful than real.—J. L. P.

ZARETH-SHAHAR (צָרֶת הַשָּׂהָר; *Σαραθὰ καὶ Σάων*; Alex. *Σαρθ Σάωρ*; *Sarath-asar*), a town in the territory allotted to the tribe of Reuben, and described as being 'upon a mount of the valley' (בְּהָר הַעֵמֶק), that is, of the Jordan valley. It is only mentioned in Josh. xiii. 19, and the notice is so indefinite that its site cannot be fixed farther than that it was somewhere within the territory of Reuben, and in the Jordan valley. It must consequently have been near the north-eastern shore of the Dead Sea. Even the recent minute researches of De Saulcy in this region have failed to discover any trace of it. Seetzen's conjecture that it is identical with *Sara* in Wady Zurka Main, cannot be received (*Reisen*, ii. 369; see Keil and Delitzsch on *Joshua*, ad loc.)—J. L. P.

ZARHITES, THE (הַזְרִיתִּים; *ὁ Ζαράι*; Alex. *ὁ Ζαραετ*), the descendants of Zerah the son of Judah (*Num.* xxvi. 13, 20).

ZEALOTS. The followers of Judas the Gaulonite or Galilean [JUDAS]. Josephus speaks of them as forming the 'fourth sect of Jewish philosophy,' and as distinguished from the Pharisees chiefly by a quenchless love of liberty and a contempt of death. Their leading tenet was the unlawfulness of paying tribute to the Romans, as being a violation of the theocratic constitution. This principle, which they maintained by force of arms against the Roman government, was soon converted into a pretext for deeds of violence against their own countrymen; and during the last days of the Jewish polity, the Zealots were lawless brigands or guerrillas, the pest and terror of the land. After the death of Judas, and of his two sons, Jacob and Simon (who suffered crucifixion), they were headed by Eleazar, one of his descendants, and were often denominated *Sicarii*, from the use of a weapon resembling the Roman Sica (Joseph. *Antiq.* xviii. 1; *De Bell. Jud.* iv. 1-6; vii. 8; Lardner's *Credibility*, pt. i. b. i. ch. 6, 9; Kitto's *Palestine*, pp. 741, 751).—J. E. R.

ZEBAH AND ZALMUNNA, chiefs of the Midianites, whom Gideon defeated and slew. [GIDEON.]

ZEBAIM (הַצְבִּיִּים). This term is appended to the name of Pochereth, the chief of a family numbered among Solomon's servants (Ezra ii. 57; Neh. vii. 59). It has been supposed by some to be the name of a place, but it is more probably the pl. of צִבִּי, *an antelope or gazelle*; 'Pochereth of the antelopes' having probably received that name from being a mighty hunter of these animals.—W. L. A.

ZEBEDEE (*Zēbedaios*; in Hebrew זְבִדִּי, *Zabdi*, זְבִדִּיָּה, *Jehovah's gift*), husband of Salome, and father of the apostles James and John (Matt. x. 2; xx. 20; xxvi. 37; xxvii. 56; Mark iii. 17; x. 35; John xxi. 2). He was the owner of a fishing-boat on the lake of Gennesaret, and, with his sons, followed the business of a fisherman. He was present, mending the nets with them, when Jesus called James and John to follow him (Matt. iv. 21; Mark i. 19; Luke v. 10); and as he offered no obstacle to their obedience, but remained alone without murmuring in the vessel, it is supposed that he had been previously a disciple of John the Baptist, and, as such, knew Jesus to be the Messiah. At any rate, he must have known this from his sons, who were certainly disciples of the Baptist. It is very doubtful whether Zebedee and his sons were of that very abject condition of life which is usually ascribed to them. They seem to have been in good circumstances, and were certainly not poor. Zebedee was the owner of a 'ship,' or fishing-smack, as we should call it—and, perhaps, of more than one; he had labourers under him (Mark i. 20); his wife was one of those pious women whom the Lord allowed 'to minister unto him of their substance;' and the fact that Jesus recommended his mother to the care of John, implies that he had the means of providing for her; whilst a still further proof that Zebedee's family was not altogether mean may be found, perhaps, in the fact, that John was personally known to the high-priest (John xviii. 16).

ZEBOIM (זְבוֹיִם, but in Hos. xi. 8, זְבוֹיִם; Ζεβωίμ; Ζεβωεῖμ; Ζεβοειμ; *Seboim*), a city situated apparently in that part of the Jordan valley which was anciently called 'The Vale of Siddim' (Gen. xiv. 3), and generally grouped with Sodom and Gomorrah (x. 19; Deut. xxix. 23; Hos. xi. 8). It has been already shown that, in all probability, the site of the Pentapolis, after having been burned by fire from heaven, was overflowed, and now forms the southern section of the Dead Sea [SODOM; SEA]. This being the case, all attempts to discover any traces of Zeboim must necessarily be vain (see, however, De Saulcy, *Journey round the Dead Sea*, i. 416).—J. L. P.

ZEBOIM, THE VALLEY OF (נֵי הַזְבוֹיִם; *Tal nei Zebaim*; *Vallis Seboim*), is only mentioned in 1 Sam. xiii. 18, where it is said that one of the bands of Philistine spoilers went out from Michmash 'the way of the border that looketh to the Valley of Zeboim.' This must not be confounded with the city of Zeboim. Though the names are the same in English, they are radically different in the Hebrew. 'The Valley of Zeboim' signifies the 'valley of hyænas,' and was apparently given to one of those wild ravines which run down the eastern slopes of Benjamin into the Jordan plain.—J. L. P.

ZEBUL (*זְבֻל*, a dwelling; Sept. Ζεβούλ), an officer whom Abimelech left in command at Shechem in his own absence; and who discharged with fidelity and discretion the difficult trust confided to him (Judg. ix. 29-41). See the particulars in ABIMELECH.

ZEBULUN, TRIBE AND POSSESSIONS OF (זְבֻלֻן, also זְבֻלָּן; Ζαβουλών; *Zabulon*). Zebulun was the sixth and last son of Leah, and the tenth born to Jacob (Gen. xxx. 20; xxxv. 23). In the order of birth he followed his brother Issachar, with whom, in the history of the tribes, and in their allotted territories in Canaan, he was closely connected (Deut. xxxiii. 18). His personal history does not appear to have contained a single incident worthy of record; and his name is not once mentioned except in the genealogical lists. At the time of the descent of Jacob into Egypt, Zebulun had three sons, Sered, Elon, and Jahleel (Gen. xli. 14), who became the founders of the three great families into which the tribe was divided (Num. xxvi. 26). Though the first generation was so small, this tribe ranked fourth in numbers among the twelve, when the census was taken at Mount Sinai, in the year of the exodus; Judah, Dan, and Simeon being more numerous. During the wilderness-journey it increased from 57,400 males to 60,500; but it held just the same relative place among the twelve—Judah, Dan, and Issachar being before it when the census was made on the plains of Moab (Num. xxvi. 27).

History is almost as silent regarding the acts of the tribe during the long period of Egyptian bondage, and the desert journey, as it is regarding the patriarch Zebulun himself. It does not appear to have been signalised in any way. A quiet steady demeanour seems to have been the chief characteristic of the people. The only point worthy of note previous to its settlement in Palestine is the fact that, on the solemn proclamation of the law, Zebulun was among the six tribes stationed on Mount Ebal to pronounce the curses (Deut. xxvii. 13).

The position and physical character of Zebulun's destined territory in the Land of Promise had been sketched in the prophetic blessings of Jacob and Moses. Looking down into a far distant age, Jacob exclaimed, as his son stood by his bedside: 'Zebulun shall dwell on the coast of seas; and he shall be for a shore of ships; and his side will be to Zidon!' (Gen. xlix. 13). Though Issachar was an elder brother, Jacob seems to have already noticed and acknowledged the political superiority of Zebulun, by placing him first in order. This superiority was afterwards more fully displayed in the blessing of Moses, which, though embracing both tribes, appears as if addressed to Zebulun alone—'And of Zebulun he said: Rejoice, Zebulun, in thy going out; and, Issachar, in thy tents. They shall call the people unto the mountain; there they shall offer sacrifices of righteousness; for they shall suck of the abundance of the seas, and of treasures hid in the sand' (Deut. xxxiii. 18, 19). Zebulun's territory was one of the richest and most beautiful sections of western Palestine. Joshua defines its borders with his usual minuteness, though, in consequence of the disappearance of many old cities, it cannot now be entirely identified. Its position, however, and general extent are clear enough. Asher and Naphtali bounded it on the north, and Issachar on the south. It stretched across the country from the Sea of Galilee on the east, to the maritime plain of Phœnicia on the west; embracing a large strip of Esdraelon, a portion of the plain of Akka, the whole of the rich upland plain

of Battauf, with the fertile table-land between it and the great basin of the Sea of Galilee. The beautiful wooded hills and ridges extending from Tabor, by Nazareth and Sefuriyeh, to the plain of Akka, were also in Zebulun. It touched Carmel on the south-west; and though it did not actually reach to the shore of the Mediterranean, its sides joined the narrow maritime territory of Phœnicia, to which Jacob, according to common eastern custom, gives the name of its chief city, Zidon—'And his side will be to Zidon.' Its opposite extremity resting on the shore of the sea of Galilee, the words of Jacob were fulfilled: 'Zebulun shall dwell on the coast of seas.' His fishermen on the Sea of Galilee, and his merchants navigating the Mediterranean, in company with their Phœnician neighbours, illustrate remarkably the other blessings: 'He shall be for a shore of ships;' 'he shall rejoice in his goings out.' Possessing thus a rich agricultural country, abundance of wood, and an outlet for commercial enterprise both in the Mediterranean and in the Sea of Galilee, the future state and history of Zebulun were influenced and moulded by external circumstances. The four northern tribes, Zebulun, Issachar, Asher, and Naphtali, were in a great measure isolated from their brethren. The plain of Esdraelon, almost unceasingly swept by the incursions of hostile nations, separated them from Ephraim and Judah; while the deep Jordan valley formed a barrier on the east. Isolation from their brethren, and their peculiar position, threw them into closer intercourse with their Gentile neighbours—the old mountaineers whom they were never able entirely to expel (Judg. i. 30), and especially the commercial Phœnicians. Their national exclusiveness was thus considerably modified; their manners and customs were changed; their language gradually assumed a foreign tone and accent (Matt. xxvi. 73); and even their religion lost much of its original purity (2 Chron. xxx. 10, 18). 'Galilee of the Gentiles' and its degenerate inhabitants came at length to be regarded with distrust and scorn by the haughty people of Judah (Is. ix. 1; Matt. iv. 15; xxvi. 73).

The four northern tribes formed as it were a state by themselves (Stanley, *Jewish Church*, i. 266); and among them Zebulun became distinguished for warlike spirit and devotion. In the great campaign and victory of Barak it bore a prominent part (Judg. iv. 6, 10). Deborah in her triumphal ode, says: 'Zebulun and Naphtali were a people that jeopardied their lives unto the death in the high places of the field' (v. 18). It would appear besides that their commercial enterprise led them to a closer and fuller study of the arts and sciences than their brethren. 'They thus at an early period acquired the reputation of literary accomplishment; and the poet sang of them: 'From Zebulun are the men who handle the pen of the scribe' (Judg. v. 14; Kalisch on *Genesis*, p. 753). This combination of warlike spirit with scientific skill seems to be referred to once again in a more extended field of action. The sacred historian mentions that in David's army there were, 'of Zebulun, such as went forth to battle, expert in war, with all instruments of war, fifty thousand which could keep rank; not of double heart' (1 Chron. xii. 33). They were generous also and liberal, as well as brave and loyal; for they contributed abundantly of the rich products of their

country—meal, figs, raisins, wine, oil, oxen, and sheep—to the wants of the army (ver. 40).

The tribe of Zebulun, though not mentioned, appears to have shared the fate of the other northern tribes at the invasion of the country by Tiglath-pileser (2 Kings xvii. 18, 24, *seq.*) From this time the history of distinct tribes ceases. With the exception of the Levites, the whole were amalgamated into one nation, and on the return from exile were called Jews. The land of Zebulun, however, occupied a distinguished place in N. T. times. It formed the chief scene of our Lord's life and labours. Nazareth and Cana were in it; and it embraced a section of the shore of the Sea of Galilee, where so many of the miracles of Christ were performed, and so many of his discourses and parables spoken. Then was fulfilled the prophecy of Isaiah: 'The land Zabulon, and the land Nephthalim, the way of the sea, beyond Jordan, Galilee of the Gentiles; the people which sat in darkness saw great light; and to them which sat in the region and shadow of death, light is sprung up' (Is. ix. 1, 2; Matt. iv. 15, 16).—J. L. P.

ZECHARIAH (זְכַרְיָה), whom *Jehovah remembers*; Sept. and N. T. *Zaxaplas*), a very common name among the Jews, borne by the following persons mentioned in Scripture.

1. ZECHARIAH, son of Jeroboam II., and fourteenth king of Israel. He ascended the throne in B.C. 772, and reigned six months. It has been shown in the article ISRAEL, that from undue deference to a probably corrupted number, which ascribes 41 years to the reign of Jeroboam II., chronologers have found it necessary to *suppose* anarchy or an interregnum of 11 years, during which his son Zechariah was kept from the throne. But there is no appearance of this in the sacred narrative, and it was not likely to follow a reign so prosperous as Jeroboam's. The few months of Zechariah's reign just sufficed to evince his inclination to follow the bad course of his predecessors; and he was then slain by Shallum, who usurped the crown. With his life ended the dynasty of Jehu (2 Kings xiv. 29; xv. 8-12).

2. ZECHARIAH, high-priest in the time of Joash, king of Judah. He was son, or perhaps grandson, of Jehoiada and Jehosheba; the latter was the aunt of the king, who owed to her his crown, as he did his education and throne to her husband [JOASH]. Zechariah could not bear to see the evil courses into which the monarch eventually fell, and by which the return of the people to their old idolatries was facilitated, if not encouraged. Therefore, when the people were assembled at one of the solemn festivals, he took the opportunity of lifting up his voice against the growing corruptions. This was in the presence of the king, in the court of the temple. The people were enraged at his honest boldness, and with the connivance of the king, if not by a direct intimation from him, they seized the pontiff and stoned him to death, even in that holy spot, 'between the temple and the altar.' His dying cry was not that of the first Christian martyr, 'Lord, lay not this sin to their charge' (Acts vii. 60), but 'The Lord look upon it, and require it' (2 Chron. xxiv. 20-22). It is to this dreadful affair that our Lord alludes in Matt. xxiii. 35; Luke xi. 51. At least this is the opinion of the best interpreters, and that which has most probability in its favour. The only difficulty arises from his being

called the son of Barachias, and not of Jehoiada; but this admits of two explanations—either that Zechariah, though called the ‘son’ of Jehoiada in the O. T., was really his grandson, and son of Barachias, who perhaps died before his father; or else that, as was not uncommon among the Jews, Jehoiada had two names, and Jesus called him by that by which he was usually distinguished in his time, when the Jews had acquired a reluctance to pronounce those names which, like that of Jehoiada, contained the sacred name of Jehovah. See Doddridge, Le Clerc, Kuinoel, Wetstein, and others, on Matt. xxiii. 35.

3. ZECHARIAH, described as one ‘who had understanding in the visions of God’ (2 Chron. xxvi. 7). It is doubtful whether this eulogium indicates a prophet, or simply describes one eminent for his piety and faith. During his lifetime Uziah, king of Judah, was guided by his counsels, and prospered; but went wrong when death had deprived him of his wise guidance. Nothing is known of this Zechariah’s history. It is possible that he may be the same whose daughter became the wife of Ahaz, and mother of Hezekiah (2 Kings xvi. 1, 2; 2 Chron. xxix. 1).

4. ZECHARIAH, son of Jeberechiah, a person whom, together with Urijah the high-priest, Isaiah took as a legal witness of his marriage with ‘the prophetess’ (Is. viii. 2). This was in the reign of Ahaz, and the choice of the prophet shows that Zechariah was a person of consequence. Some confound him with the preceding; but the distance of time will not admit their identity. He may, however, have been the descendant of Asaph named in 2 Chron. xxix. 13.—J. K.

5. ZECHARIAH (זְכַרְיָה; Ζαχαρίας), the eleventh in order of the minor prophets, was ‘the son of Berechiah, the son of Iddo the prophet.’ The meaning of בְּרַעְיָה has been disputed, some affirming that Iddo was not the *grandfather*, as the formula seems to indicate, but the *father* of Zechariah, and thus rendering the clause with Jerome, ‘filium Barachiae, filium Addo,’ or with the Septuagint, *τὸν Παπαχίου, υἱὸν Ἀδδώ*. Jerome likewise refers to his peculiar rendering in his notes. Others of the fathers adopted it, such as Cyril of Alexandria, who attempts to solve the difficulty created by it by maintaining that the one was the natural, the other the spiritual parent, of the prophet—Berechiah being his father *κατὰ τὴν σάρκα*, and Iddo the prophet, *κατὰ τὸ πνεῦμα*. Others have justified this translation by assigning both names to Zechariah’s father, as if he had worn them successively at different periods of his life, or as if one of them had been a cognomen. But the version of Jerome and the Seventy is a false one. Analogy declares against it, and its origin is to be traced to Ezra v. 1, and vi. 14, where the prophet is named only ‘Zechariah the son of Iddo.’ The words בְּרַעְיָה denote merely ‘grandson of Iddo’ (Gesenius, *Thesaur.* p. 216), and the paternal name may have been omitted because of its comparative obscurity, while the grand-paternal name is inserted, because of its national popularity. It was a very strange mistake of Jerome to confound the Iddo named in connection with this prophet as his ancestor with Iddo the seer, who flourished some centuries before under Jeroboam, first king of Israel (Hieronym. *Comment. ad Zach.*) The term זְכַרְיָה in the first verse belongs, not to Iddo, but to Zechariah, as

the Septuagint and Vulgate properly render it. The probability is, that Iddo is the person mentioned in Neh. xii. 4 as one of the sacerdotal prophets who had returned with Joshua and Zerubbabel. Berechiah, son of Iddo, and father of Zechariah, seems to have died young, for in Neh. xii. 16, Zechariah is said to be Iddo’s successor, under Joiakim, son of Joshua. Thus the prophet’s descent is, in Ezra, traced at once from his grandfather. Compare Gen. xxix. 5, and xxxi. 28-55. Should this theory be correct, Zechariah exercised the priestly as well as the prophetic office. In the second year of Darius Hystaspis, and the eighteenth year of the return, he was a young man, when he entered on his work (זְכַרְיָה, ii. 4), so that

he was born in Babylon, and must have come back with the first band of exiles. As a prophet he was somewhat later than Haggai, but the mission of both coincided. The pseudo-Epiphanius is wholly in error, therefore, when he speaks of Zechariah as coming from Babylon *ἥδη προβεβηκώς* (*De Vita Prophet.* xxi.), and so is Dorotheus, who says that he returned *etate profecta*. But the argument from the use of זְכַרְיָה, ii. 4, admitted by Hengstenberg, Knobel, and Kimchi, is precarious; and is denied by Ewald, Maurer, and Hitzig, who refer the זְכַרְיָה, not to the prophet, but to ‘the man with the measuring line.’ The name Zechariah was a very common one among the Jews, three others bearing it seem also to have been prophets.

The mission of Zechariah had especial reference to the affairs of the nation that had been restored to its territory. The second edict, granting permission to rebuild the temple, had been issued, but the work had paused during the reign of Cambyzes and the Magian usurper; and the office of Zechariah was to incite the flagging zeal of the people, in order that the auspicious period might be a season of religious revival as well as of ecclesiastical reorganisation, and that the theocratic spirit might resume its former sway in the breasts of all who were engaged in the work of restoring the ‘holy and beautiful house.’ The prophet assures them of success in the work of re-erecting the sacred edifice, despite of every combination against them; for Zerubbabel ‘should bring forth the head-stone with shouting, Grace, grace unto it’—comforts them with a solemn pledge that, amidst fearful revolutions and conquests by which other nations were to be swept away, they should remain uninjured; for, says Jehovah, ‘He that toucheth you toucheth the apple of mine eye.’ The pseudo-Epiphanius records some prodigies wrought by Zechariah in the land of Chaldaea, and some wondrous oracles which he delivered; and he and Dorotheus both agree in declaring that the prophet died in Judea in a good old age, and was buried beside his colleague Haggai.

*Book.*—The book of Zechariah consists of four general divisions.

I. The introduction or inaugural discourse (ch. i. 1-16).

II. A series of nine visions, extending onwards to ch. vii., communicated to the prophet in the third month after his installation. These visions were—

1. A rider on a roan horse among the myrtle-trees, with his equestrian attendants who report to him the peace of the world—symbolising the fitness of the time for the fulfilment of the promises of God, his people’s protector.

2. Four horns, symbols of the oppressive enemies by which Judah had been on all sides surrounded; and four carpenters, by whom these horns are broken—emblems of the destruction of these anti-theocratic powers.

3. A man with a measuring-line describing a wider circumference for the site of Jerusalem, as its population was to receive a vast increase—fore-showing that many more Jews would return from Babylon and join their countrymen, and indicating also the conversion of heathen nations under the Messiah.

4. The high-priest Joshua before the angel of the Lord, with Satan at his right hand to oppose him. The sacerdotal representative of the people, clad in the filthy garments in which he had returned from captivity, seems to be a type of the guilt and degradation of his country; while forgiveness and restoration are the blessings which the pontiff symbolically receives from Jehovah, when he is reclad in holy apparel and crowned with a spotless turban, the vision at the same time stretching into far futurity, and including the advent of Jehovah's servant the BRANCH.

5. A golden lamp-stand fed from two olive-trees, one growing on each side of it—an image of the value and divine glory of the theocracy as now seen in the restored Jewish church, supported, not 'by might nor by power, but by the Spirit of Jehovah,' and of the spiritual development of the old theocracy in the Christian church, which enlightens the world through the continuous influences of the Holy Ghost.

6. A flying roll, containing on its one side curses against the ungodly, and on its other, anathemas against the immoral—denoting that the head of the theocracy would from his place punish those who violated either the first or the second table of his law—the command in the middle of each table being selected as an example.

7. A woman pressed down into an ephah by a sheet of lead laid over its mouth, borne along in the air by two female figures with storks' wings, representing the sin and punishment of the nation. The Fury, whose name is WICKEDNESS, is repressed, and transported to the land of Shinar;—i.e. idolatry, in the persons of the captive Jews, was for ever removed at that period from the Holy Land, and, as it were, taken to Babylon, the home of image-worship. (For another meaning, see Jahn's *Introduction*, Turner's translation, p. 428.)

8. Four chariots issuing from two copper mountains, and drawn respectively by red, black, white, and spotted horses, the vehicles of the four winds of heaven—a hieroglyph of the swiftness and extent of divine judgments against the former oppressors of the covenant-people.

9. The last scene is not properly a vision, but an oracle in connection with the preceding visions, and in reference to a future symbolical act to be performed by the prophet. In presence of a deputation of Jews from Babylon, the prophet was charged to place a crown on the head of Joshua the high-priest, a symbol which, whatever was its immediate signification, was designed to prefigure the royal and sacerdotal dignity of the man whose name is 'Branch,' who should sit as 'a priest upon his throne.'

The meaning of all the preceding varied images and scenes is explained more or less fully to the prophet by an attendant *angelus interpretis*.

III. A collection of four oracles delivered at various times in the fourth year of Darius, and partly occasioned by a request of the nation to be divinely informed, whether, now on their happy return to their fatherland, the month of Jerusalem's overthrow should be registered in their sacred calendar as a season of fasting and humiliation. The prophet declares that these times should in future ages be observed as festive solemnities.

IV. The 9th, 10th, and 11th chapters contain a variety of prophecies unfolding the fortunes of the people, their safety in the midst of Alexander's expedition, and their victories under the Maccabean chieftains, including the fate of many of the surrounding nations, Hadrach, Damascus, Tyre, and Philistia (see Hengstenberg's *Christologie*).

V. The remaining three chapters graphically portray the future condition of the people, especially in Messianic times, and contain allusions to a siege of the city, the means of escape by the cleaving of the Mount of Olives on the descent of Jehovah, with a symbol of twilight breaking into day, and living waters issuing from Jerusalem, and concluding with a blissful vision of the enlarged prosperity and holiness of the theocratic metropolis, when upon the bells of the horses shall be inscribed 'holiness unto the Lord.'

*Integrity.*—The genuineness of the latter portion of Zechariah, from ch. ix. to xiv., has been disputed. Among the first to suggest doubt on this subject was Joseph Mede, who referred chaps. ix. x. and xi. to an earlier date, and ascribed them to Jeremiah. Remark on Matt. xxvii. 9, 10, he says: 'It may seem the evangelist would inform us that those latter chapters ascribed to Zachary—namely, the ninth, tenth, eleventh, etc.—are indeed the prophecies of Jeremy, and that the Jews had not rightly attributed them. Certainly, if a man weigh the contents of some of them, they should in likelihood be of an elder date than the time of Zachary—namely, before the captivity; for the subjects of some of them were scarce in being after that time. . . . As for their being joined to the prophecies of Zachary, that proves no more they are his than the like adjoining of Agur's proverbs to Solomon's proves that they are therefore Solomon's, or that all the psalms are David's because joined in one volume with David's psalms' (*Epist.* xxxi.) His opinion was adopted in England by Hammond, Kidder, Bridge, Newcome, Whiston, and Secker, by Pye Smith and Davidson, and has been followed, with variations, on the continent by Flügel (*Die Weissagung. Zach. übersetzt*, etc., 1784); by Bertholdt (*Einleit.* p. 1701); by Rosenmüller in his *Scholia*, though in the first edition he defended the genuineness of these chapters; by Eichhorn (*Einleit.* sec. 605); Corrodi (*Beleuchtung des Bibelcanons*, i. 107); De Wette, in the earlier editions of his *Einleitung*; Credner (*Foel*, 67); Knobel (*Der Prophetismus*, etc., Th. ii. s. 284); Forberg (*Comment. in Zach. Vaticin.*, pars i.); as also by Maurer, Hitzig, Ewald, Ortenberg (*Die Bestandteile des B. Sacharja*); Bleek (*Einleit.* p. 553); Herzfeld (*Gesch.* i. p. 286); Bunsen (*Gott in der Gesch.* i. p. 449, etc.); and E. Meier (*Gesch. d. poet. Lit. der Hebräer*, p. 306).

On the other hand, the integrity of this portion of Zechariah has been defended by Jahn (*Introduction*, pt. ii. sec. 161), Carpzov (*Critica Sacra*, p. 848), Beckhaus (*Integrität d. Proph. Schriften*, p.

337), Koester (*Meletemata Crit. et Exeget. in Zach. part. post.* p. 10), Hengstenberg (*d. Integrität d. Sacharjah*, in his *Beiträge*, i. 361), Burger (*Etudes Exég. et crit. sur le Proph. Zach.* p. 118), Thenius, Herbot, Schegg, Hofmann, Kliefoth, Ebrard, Hävernich, Henderson, De Wette, Keil (*Einleit.* sec. 103), Stähelin (*Specielle Einleit.* p. 321, etc.), Moore (*Prophets of the Restoration*, p. 209, New York 1856), Neumann (*Die Weissag. d. Sacharjah ausged.* 1860), and Köhler (*d. Weissag. Sacharjahs erkl.* 1863). The theory of Mede was suggested by the difficulty arising from the quotation in Matthew, and, rejecting other hypotheses, he says: 'It is certain that Jeremiah's prophecies are digested in no order, but only as it seems they came to light in the scribes' hands. Hence sometimes all is ended with Zedekiah, then we are brought back to Jehoiakim, then to Zedekiah again, etc. Whereby it seems they came not to light to be enrolled *secundum ordinem temporis*, nor all together, but as it happened in so distracted a time. And why might not some not be found till the return from captivity, and be approved by Zechariah, and so put to his volume according to the time of their finding and approbation by him, and after that some other prophecies yet added to his?' (*Epist.* li.) The others who deny the genuineness of these chapters are by no means agreed as to the real authorship of them. Eichhorn ascribes one portion to the time of Alexander, and the other sections to a period before the exile; while Corrodi places the fourteenth chapter as low as the age of Antiochus Epiphanes. Bertholdt, Gesenius, Maurer, and Knobel suppose the ninth, tenth, and eleventh chapters to be the production of Zechariah, the son of Jeberechiah, referred to in Is. viii. 2, and the remaining three to be the composition of an anonymous author who lived under Josiah, and of course before the captivity. Rosenmüller is of opinion that the whole second part is the work of one author who lived under Uzziah. Flügge arbitrarily divides it into no less than nine sections, referring them to different times and authors, but yet ascribing the ninth chapter to the Zechariah spoken of in 2 Chron. xxvi. 5. Ewald adds xiii. 7-9 to the first section—ix.-xi. Bunsen ascribes the second section—xii.-xiv.—to 'Urijah, the son of Shemaiah of Kirjath-jearim' (Jer. xxvi. 20). Newcome places the first three chapters, as to date of authorship, before the overthrow of Israel, and the last three before the captivity of Judah. Hitzig and Credner carry back the period of their authorship to the age of Ahaz, or before it.

This question of genuineness is one of some difficulty, and the arguments on either side are not of preponderant influence. It may certainly be asked in favour of the genuineness, How came these chapters to be connected with the acknowledged writings of Zechariah, especially as the addition must have been made within a brief period of the prophet's death? No satisfactory answer can be given, and the suppositions that ix.-xiv. was anonymous, or, being current under the name of Zechariah, son of Berechiah, was appended to the previous oracles, have no historical support whatever. Uriah is called a priest, but Zechariah is not called a prophet (Is. viii. 2). Many of the arguments against the genuineness of this latter portion of Zechariah rest on peculiar interpretations of his language, making it refer to events that happened prior to the time when he flourished. But this exegesis may not

in all points be correct. Ephraim is indeed spoken of, though that kingdom was overthrown 186 years before the return of the Jews from Babylon; and it is inferred that the author of such oracles must have lived when Ephraim was an independent sovereignty. It may be said, in reply, that vast numbers of the ten tribes returned with their brethren of Judah from captivity; and we find (ch. xii. 1) Israel used as a name for all the tribes. In Malachi, too, we find Israel used after the captivity in contrast to Jerusalem. Zechariah never characterises Ephraim as a separate political confederation; nor, as Henderson remarks, 'is there anything, but the contrary, to induce the conclusion that a king reigned in Judah in the days of the author.' The predictions in this latter part, supposed by some to refer to past events, are by others interpreted to refer to the Egyptian expedition of Alexander, the sufferings of the Messiah, and the final overthrow of Jerusalem. As the prophets before the Babylonian captivity threatened a deportation to Babylon, so Zechariah, living after that event, menaces a Roman invasion and slavery. The exile is supposed to be past in ix. 12, x. 6. The mention of Persia, Egypt, Greece, Gaza, and Ashdod, harmonises with the state of parties in the prophet's age, or after the exile. No seer could have spoken of Jerusalem shortly before the captivity as Zechariah does—predicting for it a striking deliverance and the crowding of strangers to worship in it. Yet there are some difficult points. How could the brotherhood of Israel and Judah be described as broken by the prophet? But to lay stress on this would carry the composition greatly beyond the time which the opponents of the integrity contend for—would carry it beyond the division of the kingdoms. How could he say, 'the pride of Assyria shall be brought down' (x. 11), if he lived a century after the overthrow of Nineveh and soon after the Persian capture of Babylon? Perhaps Assyria and Egypt mean not the kingdoms, but only the territories in which many Jews still dwelt. De Wette supposes that the parts which seem to belong to an earlier period were written in reference to the future and in prophetic form. Little stress can be placed on any argument based on imagined difference of style in the former and latter chapters of this prophecy. The introductory notices to the separate oracles in the early portion of the book, as 'the word of the Lord came,' or 'thus saith the Lord of hosts' which occurs forty-one times, or 'I lifted up mine eyes and saw,' are either not found in the last section, or are very different in form (comp. i. 1-7, iv. 8, vi. 9 with ix. 1, xi. 4). The writer also in the earlier part mentions his own name and gives dates, but there is a total omission of those characteristics in the second part. The repetition of עֹר in successive clauses, as four times in i. 17, does not occur in the second part. 'Lord of the whole earth' is found in iv. 14, vi. 5, but not in the concluding chapters. Rulers are called 'shepherds' and the people 'the flock' only in the second part, nor does there occur in it that form of mysterious visionary representation which gives peculiar colour and style to the first part. In the second part, too, are recurring formulæ, as often 'It shall come to pass' (וְהָיָה), xii. 9; xiii. 2, 3, 4, 8; xiv. 6, 8, 13, 16; 'saith the Lord' (נְאֻם יְהוָה), xii. 1, 4; xiii. 2, 7, 8; and the phrase, בַּיּוֹם הַהוּא, 'in that day,' is

used six times in the twelfth chapter, thrice in the thirteenth chapter, and five times in the fourteenth chapter. The phrase is found rarely in the former part, ii. 15; iii. 10; vi. 10. But we are too ignorant of many circumstances in the prophet's history to speculate on the causes of such change; or if we are unable to discover any æsthetical or religious reasons for such alterations, it is surely rash to come on such grounds to a decision of diversity of authorship. Introductory formulæ as different as those in Zechariah occur in other books whose sameness of style is admitted as proof of identity of authorship, as in Amos, where the application of the same principles of criticism would 'dismember it,' and assign its composition to three different authors. Nor perhaps is the difference of style of the former and latter portions of Zechariah greater than the different topics treated would lead us to expect. It may also be replied that there are terms and phrases common to both parts of the book, as the peculiar use of the word 'eye,' iii. 9; iv. 10; ix. 1-8; the occurrence of the hophel הַעֲבִיר, with the signification to remove, iii. 4; xiii. 2; and the striking idiom מַעֲבִיר וּמְשִׁיב, vii. 14; ix. 8 (Keil, *Einleit.* sec. 163). Similar theocratic promise is found in ii. 10; ix. 12; xi. 14; and ix. 9. Comp. also ii. 4 with xiv. 10; viii. 20 with xiv. 16. Stähelin (p. 323) insists too on the close similarity which Zechariah presents to the prophets of his own period in those disputed last chapters. Thus he resembles Jeremiah, Zephaniah, and Ezekiel. Compare Zech. xi. 1-3 with Jer. xxv. 34-36 and xii. 5; Zech. xiv. 8 with Ezek. xlvii. 1-12; Zech. ix. 12 with xvi. 8; Zech. ix. 2 with Ezek. xxviii. 3; Zech. ix. 5 with Zeph. ii. 4; Zech. x. 3 with Ezek. xxxiv. 17; Zech. xiv. 10 with Jer. xxxi. 38, etc. etc. Not a few of the passages of this kind usually quoted are found on close examination to be merely accidental coincidences; and such, as a whole, are the resemblances which Hitzig and others find between this latter part of Zechariah and some of the older prophets. Comp. ix. 8 with Joel iii. 17; ix. 13 with Joel iii. 6; xii. 2 with Joel iii. 11; xii. 16 with Amos viii. 10; xiii. 5 with Amos vii. 14. That Zechariah should manifest acquaintance with the earlier prophets need occasion no surprise. Yet the resemblance is not very close between viii. 20-23 and Is. ii. 3 and Mic. iv. 2. The name 'Branch,' iii. 8, is found in Jer. xxiii. 5; xxxiii. 15. Allusion is also made to his prophetic predecessors before the fall of Jerusalem, vii. 7. No great stress can be laid on peculiar words occurring in the later part. הָיִךְ is written in full form, but the same spelling is found in Hosea and Amos. אֶלְנָה is used of Jewish chiefs, as in Jer. xiii. 21. While much may be said in favour of the integrity of the book, there are still, as we have seen, some features of difference that are not easily explained: alteration of allusions and formula; occasional glimpses into the condition of the country which appear to want consistency; different phases of the Messianic reign, and different standpoints from which it is viewed; and a change of style from the visions and flatter prose of the first part to the richer and more poetical style of the concluding chapters. The chief argument against the genuineness of these chapters is that expressed by Mede on Matt. xxvii. 9: 'There is no Scripture saith they are Zechariah's, but there is Scripture saith they

are Jeremiah's' (*Works*, p. 786). The quotation in Matthew varies in several points from the present Hebrew text. The evangelist, to serve his immediate object, changes the first person into the third, and for the words, 'I threw it' (the money), he has, 'And they gave them.' The Hebrew אֶל הַיֹּצֵר, 'to the potter,' are in the Sept. rendered εἰς τὸ χυευντήριον, 'into the crucible;' and in Matt. εἰς τὸν ἀγρόν τοῦ κεραμέως. Ewald, Gesenius, and Fürst, following the Targum, and Kimchi, propose to read אֶל הַיֹּצֵר, 'to the treasury;' but the word does not occur with this meaning in Scripture. Döpke (*Hermeneutik*, p. 212) and Kuinoel (*Comm.* in loc.) suppose that Matthew quoted some unpublished apocryphal Jeremiah, perhaps such a one as that to which Jerome refers, as having found it among the Nazarenes, and of which a portion containing analogous language is yet extant in a Sahidic lectionary in the *Codex Huntingtonianus*, 5, in the Bodleian Library, and in the Coptic language in a MS. in the library of St. Germain in Paris. This passage, as given by Dr. Henderson, at once betrays itself to be a clumsy imitation, designed to solve the very difficulty on which we are writing. Ewald thinks that the Evangelist quoted a portion of Jeremiah now lost. Augustine, Meyer, and Alford generally hold, as Fritzsche does, that the discrepancy arose on the part of the Evangelist, 'per memorie errorem' (*Comment. in Matt.* p. 801). Nor is there any extrication from the difficulty in supposing, with Elsner, that the reference of the Evangelist is to the transaction recorded in Jer. xxxii. 8, or in hinting, with Eusebius (*Hist. Eccles.* x. 4), that the oracle cited has been falsified by the Jews. It is another conjecture without warrant that the name Jeremiah was the technical appellation of the third great division of the Hebrew Scriptures, so that any quotation from the minor prophets may be referred to him, not as its author, but as the title of that collection, from one of the books of which it is taken (Lightfoot's *Works*, by Pitman, vol. xi. p. 344). That there is a difference of reading was a fact early known. Perhaps the proper name was omitted altogether, or rather not inserted at all by the evangelist, and he wrote only διὰ τοῦ προφήτου. Augustine testifies that MSS. were found in his days wanting the word Ἰερεμίου. It is not found either in the most ancient and faithful version, the Syriac, nor in the Verona and Vercelli Latin MSS. It is wanting also in MSS. 33, 157, and in the Polyglott Persic, in the modern Greek, and in a Latin MS. of Luc. Brug. Other codices and versions read Ζαχαρίου, such as MS. 22, and the Philoxenian Syriac in the margin—a reading which was approved of by Origen and Eusebius. Morus, Le Moine, Griesbach, Henderson, and others, believing that Matthew wrote in Hebrew or Syro-Chaldaic, think the original was simply בִּיר הַנְּבִיא, 'by the prophet,' and that the Greek translator, mistaking the בִּיר for בִּיר, read בִּיר, and thinking it a contraction for בִּירְמָהוּ, rendered it διὰ Ἰερεμίου τοῦ προφήτου. If the authority of MSS. be now in favour of Ἰερεμίου, then the error may have arisen on the part of some early copyist meeting with the contracted form Ζριου, and mistaking it for Ἰριου. The various opinions of the fathers, and the different lections in MSS. and versions, seem to point to some such change and error in the course of early transcription. Hengstenberg

imagines that Matthew names Jeremiah, and not Zechariah, on purpose to turn the attention of his readers to the fact that Zechariah's prophecy was but a reiteration of a fearful oracle in Jer. xviii. xix.; a curse pronounced of old by Jeremiah, and once fulfilled in the Babylonian siege; a curse reiterated by Zechariah, and again to be verified in the Roman desolation. This theory, adopted by M'Caul, is at least preferable to that of such critics as Glassius and Frischmuth, and virtually of Hofmann (*Weisag. und Erfül.* ii. p. 128), who hold that the quotation in Matthew is made up of a mixture of oracles from Jeremiah and Zechariah, while Jeremiah only is named as the earlier and more illustrious of the two—the *primarius auctor*. Theophylact's explanation is clumsy, for he proposes to insert *kal*—'by Jeremiah and the prophet, to wit Zechariah.' The notion of Wordsworth is peculiar, as he holds that the oracle had in the first instance been delivered by Jeremiah, and that though it is now in Zechariah, it is quoted as Jeremiah's, because the spirit intends to 'teach us not to regard the prophets as the authors of their prophecies,' they being only 'channels,' not sources (*New Test.* in loc.) Calvin says, as to the introduction of the name Jeremiah, *ne nescire fatore nec anxie laboro*. Our space is so limited that we have only found room to indicate the various points of discussion, and on this account we need not enter into the hypercritical question as to the different authorships of chaps. ix. x. xi. and of chaps. xii. xiii. xiv. This division, with various proposed subdivisions, rests to a great extent on subjective grounds, which are easily shifted or variously moulded.

*Style.*—The language of Zechariah has not the purity and freshness of a former age, yet probably it is purer than the style of Ezekiel and Jeremiah. A slight tinge of Chaldaism pervades it. We have the particle אֵת at the commencement of incomplete sentences (vii. 7; viii. 17), and a peculiar use of אֲשֶׁר (i. 15; vi. 10), the occurrence of ה before the *status const.* (iv. 7-10), omission of כִּי (vii. 23), the unusual phrase כָּבַת עֵין (ii. 12) (כָּבַת) being derived by Gesenius and Fürst from a root כָּבַב, 'to hollow out,' and meaning the gate of the eye), the unwonted construction of אֶחָד as אֶחָד (ii. 12), etc. Ewald does not join in that depreciation of his style which Knobel and De Wette indulge in. Yet from the strange symbols introduced by him—swift dramatic transitions and abrupt and rapid explanations—his oracles are difficult of comprehension, so that Jerome says: *Obscurissimus liber inter duodecim et longissimus—ab obscuris ad obscuriora transivimus* (*Comment. in Zach.* lib. i. lib. ii. p. 779, 825; *Opera*, vol. vi. ed. Vallar). The symbols with which he abounds are obscure, and their prosaic structure is diffuse and unvaried. The rhythm of his poetry is unequal, and its parallelisms are inharmonious and disjointed. He is also peculiar in his introduction of spiritual beings into his prophetic scenes.

6. ZECHARIAH, the father of John the Baptist [JOHN THE BAPTIST.]

ZEDAD (זֶדָד; Σαπαδάκ; Alex. Σαδαδάκ; *Sedada*), a city which formed one of the landmarks on the north-east border of the Promised Land, as described by Moses (Num. xxxiv. 8) and Ezekiel (xlvii. 15). The line of that border has already been fully defined [PALESTINE, p. 384]; and just in the position which appears to be indicated by the sacred writers stands the modern village of *Sudud*, whose name in Arabic (سدد) corresponds exactly to the Hebrew *Zedad*. The fact of its being grouped with 'the entrance of Hamath,' and the cities of Hamath and Riblah, shows that Zedad must have been situated in that region; and the identity of name establishes identity of site (Robinson, *B. R.* ii. 507; Knobel on Num. xxxiv. 8; Wetzstein, *Reisebericht über Hauran*, 88). Zedad lies eight hours east of Hums, the ancient Emesa, across an open desolate plain. It is a large, thriving village, surrounded by gardens and fields. Some fragments of columns built up in the walls of the houses, and some large hewn stones in the streets and lanes, bear evidence to its antiquity. Sudud is now the head-quarters of the Jacobite church in Syria. The inhabitants all belong to the one sect, and they are brave, spirited, and industrious. Though hated by their fellow-christians, encompassed by plundering Arabs, and oppressed by the government, they still prosper (Porter, *Handbook*, pp. 550, 580; *Giant Cities of Bashan*, 317).—J. L. P.

ZEDEKIAH (זְדַכְיָהוּ; זְדַקְיָהוּ; *Zedekia, Zedekias*). 1. Son of Josiah, the twentieth and last king of Judah, was, in place of his brother Jehoiakim, set on the throne by Nebuchadnezzar, who changed his name from Mattaniah to that by which he is ordinarily spoken of. As the vassal of the Babylonian monarch, he was compelled to take an oath of allegiance to him, which, however, he observed only till an opportunity offered for throwing off his yoke. Success in such an undertaking was not likely to attend his efforts. His heart was not right before God, and therefore

was he left without divine succour. Corrupt and weak, he gave himself up into the hands of his nobles, and lent an ear to false prophets; while the faithful lessons of Jeremiah were unwelcome, and repaid by incarceration. Like all of his class, he was unable to follow good, and became the slave of wicked men, afraid alike of his own nobility and of his foreign enemies. By his folly and wickedness he brought the state to the brink of ruin. Yet the danger did not open his eyes. Instead of looking to Jehovah, he threw himself for support on Egypt when the Chaldean came into the land and laid siege to his capital. The siege was begun on the tenth day of the tenth month in the ninth year of his reign. For a year and a half did Jerusalem effectually withstand Nebuchadnezzar. At the end of that time, however, the city was stormed and taken (B.C. 588), when Zedekiah, who had fled, was captured on the road to Jericho. Judgment was speedily executed; his sons were slain before his eyes, and he himself was deprived of sight and sent in chains to Babylon, where he died in prison (2 Kings xxiv. 17, *seq.*; xxv. 1, *seq.*; 2 Chron. xxxvi. 10, *seq.*; Jer. xxviii. xxxiv. xxxvii. xxxviii. xxxix. lii.; Ezek. xvii. 15). —J. R. B.

2. A false prophet who, when Micaiah the prophet of Jehovah was, in compliance with the request of Jehoshaphat, summoned to advise whether he and Ahab should go against Ramoth-Gilead to battle, set himself to oppose Micaiah. In the vehemence of his rage he even struck the prophet on the cheek, probably as Josephus (*Antiq.* viii. 15. 3) states, in bravado as a challenge to him to inflict, if he could, some such judgment on him as Iddo inflicted on Jeroboam for a similar insult. Micaiah contented himself with obscurely intimating that on some season of approaching danger he should be compelled to hide himself, and then should see the falsehood of those declarations by which he was misleading the kings (1 Kings xxii. 11-24; 2 Chron. xvii. 10-24).

3. The son of Maaseiah, a false prophet denounced by Jeremiah, and who was taken captive to Babylon along with Jeconiah. Jeremiah declared that he should be burnt to death by order of Nebuchadnezzar, and that under circumstances which should make his name and fate a proverb (Jer. xxix. 21, 22).

4. The son of Hananiah (Jer. xxxvi. 12.—W. L. A.

ZĒĒB (זֶבֶב), the name of a fierce rapacious animal (Gen. xlix. 27; Is. xi. 6; lxv. 25; Jer. v. 6, etc.; λύκος, Matt. vii. 15; x. 16; Luke x. 3; John x. 12; Acts xx. 29; Ecclus. xiii. 17). By this term there is no doubt the *wolf* is intended, though the identity of the species in Palestine is by no means established, for no professed zoologist has obtained the animal in Syria, while other travellers only pretend to have seen it. Unquestionably a true wolf, or a wild canine with very similar manners, was not infrequent in that country during the earlier ages of the world, and even down to the commencement of our era. The prophets, as well as the Messiah, allude to it in explicit language. At this day the true wolf is still abundant in Asia Minor, as well as in the gorges of Cilicia, and from the travelling disposition of the species, wolves may be expected to reside in the forests of Libanus; yet, except we rely on mere rumours,

wild and contradictory assertions, or decided mistakes as to the species, none are at present found in the Holy Land. Hemprich and Ehrenberg, the most explicit of the naturalists who have visited that region, notice the *dib* or *zeb* ذيب, under the denomination of *Canis lupaster*, and also, it seems, of *Lupus Syriacus*: they describe it as resembling the wolf, but smaller, with a white tip on the tail, etc.; and give for its synonym *Canis anthus*, and the wolf of Egypt, that is the λύκος of Aristotle, and *Thos anthus* of Ham. Smith. This species, found in the mummy state at Lycopolis, though high in proportion to its bulk, measures only eighteen inches at the shoulder, and in weight is scarcely more than one-third of that of a true wolf,

535. Egyptian Wolf.

whose stature rises to thirty and thirty-two inches. It is not gregarious, does not howl, cannot carry off a lamb or sheep, nor kill men, nor make the shepherd flee; in short, it is not the true wolf of Europe or Asia Minor, and is not possessed of the qualities ascribed to the species in the Bible. The next in Hemprich and Ehrenberg's description bears the same Arabic name; it is scientifically called *Canis sacer*, and is the *piseouch* of the Copts. This species is, however, still smaller, and thus cannot be the wolf in question. It may be, as there are no forests to the south of Libanus, that these ravenous beasts, who never willingly range at a distance from cover, have forsaken the more open country; or else, that the *derbonn*, now only indistinctly known as a species of black wolf in Arabia and southern Syria, is the species or variety which anciently represented the wolf in Syria: an appellation fully deserved, if it be the same as the black species of the Pyrenees, which, though surmised to be a wild dog, is even more fierce than the common wolf, and is equally powerful. The Arabs are said to eat the *derbonn* as game, though it must be rare, since no European traveller has described a specimen from personal observation. Therefore, either the true wolf, or the *derbonn*, was anciently more abundant in Palestine, or the ravenous powers of those animals, equally belonging to the hyena and to a great wild dog, caused several species to be included in the name [KELEB].—C. H. S.

ZĒEB. [OREB AND ZĒEB.]

ZELAH (זֶלָח; *Sela*), a city of Benjamin (Josh. xviii. 28), containing the family tomb of Kish, the father of Saul (2 Sam. xxi. 14). It was probably also the native-place of Israel's first king. Its geographical position is not described by the sacred historian, nor does it appear to have been known

to ancient geographers (Reland, *Pal.* p. 1058); but from the way in which it is grouped with other places it could not have been very far distant from Jerusalem. Some would identify Zelah with Zelzah, and both with the modern village of Beit Jala, near Bethlehem (Wilson, *Lands of Bible*, i. 401; Van de Velde, *Memoir*, 355); for this, however, there is no evidence, and the names *Zelah* and *Zelzah* (זֶלְזָח) are radically different. The site of Zelah is unknown.—J. L. P.

**ZELOPHEHAD**, son of Hephher, a descendant of Joseph, who had no sons, but five daughters. These came to Moses and Eleazar, when now at the edge of the Promised Land, to lay their case before them for adjudication. Their father had died in the wilderness, leaving no male child. The daughters thought themselves entitled to take their father's share of the land. Moses on this brought their cause before Jehovah, who ordered that they should receive their father's inheritance, taking occasion to establish the general rule: 'If a man die, and have no son, then ye shall cause his inheritance to pass unto his daughter,' and failing daughters, to his next of kin (Num. xxvi. 33; xxvii. 1, *seq.* Compare Josh. xvii. 3, *seq.*)—J. R. B.

**ZELZAH** (זֶלְזָח; ἀλλομένους μεγάλη; *in meridie*), a place in the border of Benjamin, mentioned by Samuel when sending Saul home from Ramah: 'Thou shalt find two men by Rachel's sepulchre, in the border of Benjamin, at Zelzah' (1 Sam. x. 2). It is not again named in Scripture. Rachel's sepulchre is well known. It stands on the side of the road leading from Bethlehem to Jerusalem, about a mile distant from the former. Westward of the sepulchre, in full view across the valley, and not much over half-a-mile distant, is the village of Beit Jala, which may probably be identical with Zelzah. The names bear some slight resemblance to each other, and the position agrees with the sacred narrative (Wilson, *Lands of the Bible*, i. 401). The Sept. rendering of *Zelzah* is remarkable. It makes it an expression of joy on the part of the men who announced the finding of the asses—'Thou shalt meet two men *leaping violently*.' But Dean Stanley's remark on this is surely a rash criticism, that the Hebrew text 'cannot be relied upon' (*Sin. and Pal.* 222).—J. L. P.

**ZEMARAIM** (זְמַרַּיִם; Σαρὰ; Alex. Σεμρῖν; *Semaraim*), one of the ancient towns in the territory allotted to Benjamin. It is only once mentioned, and is grouped between Beth-Arabah and Bethel (Josh. xviii. 22); and it would therefore appear to have been situated either in the Jordan valley (Arabah), or on the mountain declivities between it and Bethel. About five miles north of Jericho, in the valley of the Jordan, are the ruins of a small town or village, strewn over a low hill, and called *Khurbet es-Sumrah*, 'the ruins of Sumrah.' The name (زمره) is radically identical

with Zemaraim; and as the site corresponds to the Scripture notice of that town it may be regarded as the modern representative of the old town of Benjamin (Robinson, *B. R.* i. 569; iii. 292, note; Van de Velde, *Memoir*, 355).

2. A *mountain* of this name is mentioned in 2 Chron. xiii. 4:—'And Abijah stood up upon Mount Zemaraim, which is in Mount Ephraim, VOL. III.

and said, Hear me, thou Jeroboam, and all Israel.' (Though the Hebrew word is the same, the LXX. has here Σομορών, and the Vulg. *Semeron*). Its geographical position is not farther defined. Reland and others (*Pal.* p. 1058) suppose that it stood near the town of Zemaraim, and took its name from it. This, however, is impossible, if Zemaraim be identified with es-Sumrah, because Mount Zemaraim was situated in the mountainous region of Ephraim, whereas es-Sumrah is in the Jordan valley. Others would identify Mount Zemaraim with the hill on which Samaria was built, and which is called *Shimron* in the Hebrew (שִׁמְרוֹן). The names, however, are different; and the conference between Abijah and Jeroboam, before the great battle, was evidently at some place much farther south than Samaria (see Reland, *Pal.* 344), and probably not far distant from the borders of the two kingdoms at Bethel (Keil and Bertheau, *ad loc.*)—J. L. P.

**ZEMARITE**, THE. [HAM.]

**ZEMER**. In our version of Deut. xiv. 5 זֶמֶר, *zemer*, is rendered Chamois; Sept. Καμηλοπάρδαλις; Vulg. *Camelopardalus*; Luther, in his German translation, adopts *Elend*, or 'Elk;' and the old Spanish version, from the Hebrew, has 'Cabra montes.'\* All, however, understand *zemer* to be a clean ruminant; but it is plain that the Mosaic enumeration of clean animals would not include such as were totally out of the reach of the Hebrew people, and at best only known to them from specimens seen in Egypt, consisting of presents sent from Nubia, or in pictures on the walls of temples. The *Camelopardalis* or *Giraffe* is exclusively an inhabitant of Southern Africa, and therefore could not come in the way of the people of Israel. The same objection applies to the Elk, because that species of deer never appears further to the south than northern Germany and Poland; and with regard to the Chamois, which has been adopted in our version, though it did exist in the mountains of Greece, and is still found in Central Asia, there is no vestige of its having at any time frequented Libanus or any other part of Syria. We may, therefore, with more propriety refer to the ruminants indigenous in the regions which were in the contemplation of the sacred legislator, and we may commence by observing that זֶמֶר, *zemer*, is a term which, in the slightly altered form of *zammer*, is still used in Persia and India for any large species of ruminants, particularly those of the stag kind, which are commonly denominated *Rusa*, a subgenus of deer established in Griffith's translation of Cuvier's *Animal Kingdom*. In the sacred text, however, the word *zemer* is not generic, but strictly specific. *Ail*, or 'stag,' is mentioned at the same time, and, as well as several *Antilopidae*, in the same verse; we must, therefore, look for an animal not hitherto noticed, and withal sufficiently important to merit being named in so important an ordinance.

The only species that seems to answer to the conditions required is a wild sheep, still not uncommon in the Mokattam rocks near Cairo, found in Sinai, and eastward in the broken ridges of

\* Biblia en lengua Española traducida palabra por palabra da la verdad Hebrayca por muy excelentes letrados, fol. No date.

Stony Arabia, where it is known under the name of Kesch, a slight mutation of the old Hebrew כֶּשֶׁב, *Cheshb*, or rather כֶּבֶשׂ *Chebes*, which is applied indeed to a domestic sheep, one that grazed; while *Zemer* appears to be derived from a root denoting 'to crop' or 'feed on shrubs.'

536. Kesch. *Ovis tragelaphus*.

This animal is frequently represented and hieroglyphically named on Egyptian monuments, but we question if the denomination itself be phonetically legible. The figures in colour leave no doubt that it is the same as the Kesch of the modern Arabs, and a species or a variety of *Ovis tragelaphus*, or bearded sheep, lately formed into a separate group by Mr. Blyth under the name of *Ammotragus barbatulus*. The Spanish version of the Hebrew text, before quoted, appears alone to be admissible, for although the species is not strictly a goat, it is intermediate between that genus and the sheep. It is a fearless climber, and secure on its feet, among the sharpest and most elevated ridges. In stature the animal exceeds a large domestic sheep, though it is not more bulky of body. Instead of wool, it is covered with close fine rufous hair: from the throat to the breast, and on the upper arms above the knees there is abundance of long loose reddish hair, forming a compact protection to the knees and brisket, and indicating that the habits of the species require extraordinary defence while sporting among the most rugged cliffs; thus making the name *Zemer*, 'one that springeth,' if that interpretation be trustworthy, remarkably correct. The head and face are perfectly ovine, the eyes are bluish, and the horns, of a yellowish colour, are set on as in sheep; they rise obliquely, and are directed backwards and outwards, with the points bending downwards. The tail, about nine inches long, is heavy and round. It is the *Mouflon d'Afrique* and *Mouflon à Manchettes* of French writers, probably identical with the *Tragelaphus* of Caius, whose specimen came from Barbary. See bearded Argali in Griffith's *Animal Kingdom of Cuvier*. We figure a specimen in the Paris Museum and one in Wilkinson's *Egypt*, vol. iii. p. 19.—C. H. S.

ZENAN (זֵנָן; *Sevá*; Alex. *Sevámu*; *Sanan*), a town of Judah, situated in the Shephelah, or plain of Philistia, and apparently near the western coast, since it is grouped with Migdalgaḏ (Josh.

xv. 37). The latter has been identified with *Mejdel*, and a few miles south of it is a small village called *Fenin*, which may perhaps be the modern representative of Zenan. It is generally supposed that Zenan is the same place which the prophet Micah calls *Zanaan* (i. 11; זָנָן; see Reland, p. 1058; Keil and Delitzsch, on *Josh.* xv. 37), and which Knobel supposes to be identical with the ruin of *es-Senat*, near Beit Jibrín (Tobler, *Dritte Wanderung*, p. 124). The two places perhaps were the same; but the theory of Knobel has nothing to support it.—J. L. P.

ZENAS (Ζηνᾶς), a disciple who visited Crete with Apollos, bearing seemingly the epistle to Titus, in which Paul recommends the two to his attentions (Tit. iii. 13). He is called 'the lawyer;' and as his name is Greek, it seems doubtful whether he is so called as being, or having been, a doctor of the Jewish law, or as being a pleader at the Roman tribunals. The most probable opinion is, perhaps, that which makes him a Hellenistic Jew, and a doctor of the Mosaic law.—J. K.

ZEPHANIAH (זְפַנְיָה; Sept. *Σοφονίας*, taken from a participial form according to Bleek), the ninth in order of the minor prophets, both in the Hebrew and Greek copies of the Scriptures (Hieronym. *Prolog. ad Paul. et Eustoch.*)

*Author.*—The name of this prophet has been variously explained. Disputes upon it arose as early as the time of Jerome, for in his Commentary on this book he says, 'Nomen Sophoniæ alii speculam, alii arcanum Dei, transtulerunt.' The word was thus derived either from זָפַן, *he saw beyond*, or זָפַן, *he hid*, with the common affix יָה. The old father made it a matter of indifference which etymon he adopted, as both, according to him, give virtually the same sense,—the commission of a prophet being virtually that of a watchman or seer, and the burden of his message, some secret revealed to him by God. Abarbanel (*Pref. in Ezek.*) adheres to the latter mode of derivation, and the pseudo-Dorotheus, following the former, translates the prophet's name by the Greek participle σκοπεῖων. Hiller, taking the term from זָפַן, renders it 'abscondidit se—i.e. delituit Jehovah' (*Onomast. sub voce*), but Simonis (*Onomast. V. T.*) gives the true signification, one sanctioned by Gesenius—'abscondidit—i.e. custodivit Jehovah,' *Jehovah hath guarded*, the verb זָפַן being used of divine protection in Ps. xxvii. 5; and lxxxiii. 4. The name seems to have been a common one among the Jews. Contrary to usual custom the pedigree of the prophet is traced back for four generations—'the son of Cushi, the son of Gedaliah, the son of Amariah, the son of Hizkiah.' This formal record of his lineage has led many to suppose that Zephaniah had sprung from a noble stock (Cyril, *Pref. ad Zeph.*), and the occurrence of the highest name in the list, which in the Hebrew text is spelled and pointed in the same way as that rendered Hezekiah in the books of Kings and Chronicles, has induced some to identify it with that of the good king, and to pronounce the prophet a cadet of the royal house of Judah. Kimchi is very cautious in his opinion, and leaves the point undecided; but Aben-Ezra concludes that Zephaniah was descended from Hezekiah; and his opinion has been followed by Huet (*Demonstrat. Evangel.* Propos. iv. 303), and by Eichhorn, Hengstenberg.

Hävernick, Keil, Hitzig, Bleek, and Strauss. The conjecture has little else to recommend it than the mere occurrence of the royal name. But it was not a name confined to royalty; and had it been the name of the pious monarch to which Zephaniah's genealogy is traced, his official designation, 'king of Judah,' might have been subjoined, in order to prevent mistake. Such an addition is found in connection with his name in Prov. xxv. 1 and Is. xxxviii. 9. It forms no objection to affirm that the phrase 'king of Judah' is added to Josiah, and to avoid repetition may have been omitted after Hizkiah, for such regard to euphony, such finical delicacy, is no feature of Hebrew composition. On the other hand the argument of Carpozov (*Introd.* p. 414), copied by Rosenmüller (*Proœmium in Zeph.*), against the supposed connection of the prophet with the blood royal, is of no great weight. These critics say that from Hezekiah to Josiah, in whose reign Zephaniah flourished, are only three generations, while from Hezekiah to Zephaniah four are reckoned in the first verse of the prophecy. But as Hezekiah reigned twenty-nine years, and his successor sat on the throne no less than fifty-five years, there is room enough in so long a period for the four specified descents; and Amariah, though not heir to the crown, may have been older than his youthful brother Manasseh, who was crowned at the age of twelve. As there was at least another Zephaniah, a conspicuous personage at the time of the captivity, the parentage of the prophet may have been recounted so minutely to prevent any reader from confounding the two individuals. The Jews absurdly reckon that here, as in other superscriptions, the persons recorded as a prophet's ancestors were themselves endowed with the prophetic spirit. The so-called Epiphanius (*De Vitis Prophet.* cap. xix.) asserts that Zephaniah was of the tribe of Simeon, of the hill Sarabatha, ἀπὸ ὄρους Σαραβᾶθᾶ. The existence of the prophet is known only from his oracles, and these contain no biographical sketch; so that our knowledge of this man of God comprises only the fact and results of his inspiration. It may be safely inferred, however, that he laboured with Josiah in the pious work of re-establishing the worship of Jehovah in the land.

*Age.*—It is recorded (ch. i.) that the word of the Lord came to him 'in the days of Josiah, the son of Amon, king of Judah.' We have reason for supposing that he flourished during the earlier portion of Josiah's reign. In the second chapter (vers. 13-15) he foretells the doom of Nineveh, and the fall of that ancient city happened 625 B.C. (Rawlinson's *Ancient Monarchies*, ii. 523). In the commencement of his oracles also, he denounces various forms of idolatry, and specially the remnant of Baal. The reformation of Josiah began in the twelfth, and was completed in the eighteenth year of his reign. So thorough was his extirpation of the idolatrous rites and hierarchy which defiled his kingdom, that he burnt the groves, dismissed the priesthood, threw down the altars, and made dust of the images of Baalim. Zephaniah may have prophesied prior to this religious revolution, and prepared the way for it though some remains of Baal were yet secreted in the land, or between the twelfth and eighteenth years of the royal reformer. So Hitzig, Jahn, Keil, Knobel, Ewald, De Wette, Umbreit, Strauss, Bunsen, and Movers (*Chronik.* p. 234) place him; while Eichhorn, Bertholdt,

Jaeger, Delitzsch, Stähelin, Kimchi, and Abarbanel, incline to give him a somewhat later date. The 'king's children' (i. 8) could not be sons of Josiah, who was but eight years old when he began to reign, nor does the name necessarily imply it; they may have been brothers, or princes of the blood royal, or princes living at the time when the oracle should be fulfilled. At all events, he flourished between the years B.C. 642 and B.C. 611; and the portion of his prophecy which refers to the destruction of the Assyrian empire must have been delivered prior to the year B.C. 625. The publication of these oracles was, therefore, contemporary with a portion of those of Jeremiah, for the word of the Lord came to him in the thirteenth year of the reign of Josiah. Indeed, the Jewish tradition is, that Zephaniah had for his colleagues Jeremiah and the prophetess Huldah, the former fixing his sphere of labour in the thoroughfares and market-places, the latter exercising her honourable vocation in the college in Jerusalem (Carpozov, *Introd.* p. 415). Koester (*Die Propheten*, iii.) endeavours to prove that Zephaniah was posterior to Habakkuk. His arguments from similarity of diction are trivial, and the more so when we reflect that all circumstances combine in inducing us to fix the period of Habakkuk in the reign of Jehoiakim [HABAKKUK], or immediately before the Chaldean invasion.

*Contents.*—The book consists of only three chapters, which form one whole, and are not to be separated as by Bertholdt, Eichhorn, and Knobel, into three parts, or by De Wette and Strauss into two parts. In the first, the sins of the nation are severely reprimanded, and a day of fearful retribution is menaced. The circuit of reference is wider in the second chapter, and the ungodly and persecuting states in the neighbourhood of Judæa are also doomed; but in the third section, while the prophet inveighs bitterly against Jerusalem and her magnates, he concludes with the cheering prospect of her ultimate settlement and blissful theocratic enjoyment. It has been disputed what the enemies are with whose desolating inroads he threatens Judah. The ordinary opinion is, that the foes whose period of invasion was 'a day of the trumpet and alarm against the fenced cities and against the high towers' (ch. i. 16), were the Chaldeans. Hitzig, Cramer, Eichhorn, Movers, Ewald, E. Meier, and Umbreit suppose the prophet to refer to a Scythian invasion, the history of which has been preserved by Herodotus (i. 105). The general style of the oracle, and the sweeping vengeance which it menaces against Assyria, Philistia, Ammon, and Cush, as well as against Judah, by some great and unnamed power, seem to point to the Chaldean expedition which, under Nebuchadnezzar, laid Jerusalem waste, and carried to Babylon its enslaved population. But there may be in the prophetic grouping allusions also to the Scythian raid which poured itself through so many countries, overflowed Media as the Huns of a later day did Italy, swept into Syria and Palestine, till it was arrested by the policy of Psammetichus, who was laying siege at the time to Ashdod. This invasion happened in the reign of the last Assyrian king, and in the period of Cyaxares and Nabopolassar (Rawlinson's *Monarchies*, ii. p. 508). The nations around, from Media and Babylon down to Egypt, were in commotion; war and revolution were impending; and amidst such restless upheavings Judah could

not escape (Stark's *Gaza*, p. 209, Jena 1852). The contemporary prophecies of Jeremiah seem to contemplate the musterings, onset, and devastations of the same victorious hosts. The first part of Zephaniah's prediction is 'a day of clouds and of thick darkness,' but the closing section is full of light and joy: 'The King of Israel, the Lord, is in the midst of thee; He will rejoice over thee with joy; He will rest in his love.'

*Style.*—We cannot by any means ascribe so low a character to Zephaniah's style as is done by De Wette (*Einleit.* sec. 245), who brands it as being often heavy and tedious. It has not the sustained majesty of Isaiah, or the originality and force of Joel: it has no prominent feature of distinction; yet its delineations are graphic, and many of its touches are bold and striking. For example, in the first chapter the prophet groups together in his descriptions of the national idolatry several characteristic exhibitions of its forms and worship. He seizes on the more strange peculiarities of the heathen worship—uttering denunciations on the remnant of Baal, the worshippers of Chemarim, the star-adorsers, the devotees of Malcham, the fanatics who clad themselves in strange apparel, and those who in some superstitious mummery leapt upon the threshold (Bochart, *Hier.* cap. 36). A few paronomasie occur (i. 15 and ii. 1-4); and occasionally there is a peculiar repetition of a leading word in the formation of a climax (ii. 15). Zephaniah has borrowed to a considerable extent from the earlier prophets, especially from Isaiah; as Is. xxxiv. 11 to Zeph. ii. 14, or Is. xlvii. 8 to Zeph. ii. 15, or Is. xviii. 1 to Zeph. iii. 10, or Is. xvi. 6 to Zeph. ii. 8. Coincidences of expression have also been noted between Zephaniah and some of his contemporaries, particularly Jeremiah (Eichh. *Einleit.* sec. 595; Rosenm. *Proem.* vi.; Strauss, p. 28). In Zeph. i. 5 and Jer. viii. 2, the same superstitious custom is referred to, and the phrase, 'settled on the lees,' is found Zeph. i. 12, and Jer. xlviii. 11. It was altogether groundless, therefore, in some of the older critics, such as Isidore and Schmidius (*Prolegom.* in *Sophon.*), to style Zephaniah the abbreviator of Jeremiah. Resemblances have also been traced between Zephaniah and Amos, and between him and his successor Ezekiel. The language of Zephaniah is pure: it has not indeed the ease and dignity of the earlier compositions, but it wants the degenerate feebleness and Aramaic corruption of the succeeding era. Zephaniah is not expressly quoted in the N. T.; but clauses and expressions occur which seem to have been formed from his prophecy (Zeph. iii. 9; Rom. xv. 6, etc.)

*Commentaries.*—Martini *Lutheri Comment. in Sophon. Prophet.* Opera Latina, t. iv.; Mart. Bucer *Sophonia Explicatio*, 1528; Nolteneii *Dissertatio Exeget. Prelim. in Proph. Zeph.* 1719; Cramer, *Scythische Denkmäler in Palestina*, 1777, it contains a Comment on Zephaniah; D. von Coelln, *Spicileg. Observat. Exeget. Critic. ad Zeph. Vaticinia*, 1818; P. Commentariis illustrat.* Berlin 1843; Umbreit *die klein. Proph.* ii. Th. 1846, Hamburg.—J. E.

ZEPHATH (צפת; Sept. Σεφέθ), a Canaanitish city, afterwards called Hormah (Judg. i. 17). The ancient designation is perhaps retained in the modern *es-Sufah*, the name of a difficult pass leading up from the Arabah to the south of Judah (Robinson, *Bib. Res.* ii. 592-616). Another identification has been proposed—viz. with *Sebâta*, a place on the road to Suez, half an hour north of Rôhébeh (Williams, *Holy City*, i. 464).

ZEPHATHAH, THE VALLEY OF (נִינָה צַפְתָּה; ἐν τῇ φάραγγι κατὰ βορρᾶν; in valle *Sephata*). When Zerah, the Ethiopian, invaded Palestine with his vast army, the sacred historian says that 'Asa went out against him, and they set the battle in array in the valley of Zephathah, at Mareshah' (2 Chron. xiv. 10). The name is not elsewhere mentioned; but the site of Mareshah is known [MARESHAH]; and there is a deep valley which runs past it down to Beit Jibrin, and thence into the plain of Philistia. This perhaps may be the valley of Zephathah (*Handbook*, p. 258). Dr. Robinson's theory that the name is preserved in *Tell es-Sâfieh* cannot be admitted, because it would locate it too far from Mareshah (*Bib. Res.* ii. 31).—J. L. P.

ZERAH (זֶרַח, a rising; Sept. Ζαρά). 1. Son of Judah and Tamar, and younger but twin brother of Pharez (Gen. xxxviii. 30; Matt. i. 3). Geddes, in his *Critical Remarks* (pp. 126, 127), has some interesting medical testimony in illustration of the remarkable circumstances attending the birth of the twins.

2. Son of Reuel and grandson of Esau (Gen. xxxvi. 13, 17).

3. Son of Simeon and founder of a family in Israel (Num. xxvi. 13). He is called Zohar in Gen. xlii. 10: his descendants are called Zarhites in Num. xxvi. 13, 20.

4. The Cushite king or leader who invaded Judah in the tenth year of king Asa (B.C. 941), with an army of 'a thousand thousands' (i.e. very many thousands) of men, and three hundred chariots. Asa defeated them in the valley of Zephathah at Mareshah, utterly routed them, pursued them to Gerar, and carried back much plunder from that neighbourhood. We are left uncertain as to the country from which Zerah came. The term Cushite or Ethiopian may imply that he was of Arabian Cush; the principal objection to which is, that history affords no indication that Arabia had at that epoch, or from its system of government could well have, any king so powerful as Zerah. That he was of Abyssinia or African Ethiopia is another conjecture, which is resisted by the difficulty of seeing how this 'huge host' could have obtained a passage through Egypt, as it must have done to reach Judæa. If we could suppose, with Champollion (*Précis*, p. 257), whom Coquerel follows (*Biog. Sacr.* s.v.), that Zerah the Cushite was the then king of Egypt, of an Ethiopian dynasty, this difficulty would be satisfactorily met. In fact it is now often stated that he was the same with Osorkon I. (of whom there is a statue in the British Museum, No. 8), the son and successor of the Shishak who invaded Judæa twenty-five years before, in the time of Rehoboam. This is a tempting explanation, but cannot be received without question, and it is not deemed satisfactory by Ro-

sellini, Wilkinson, Sharpe, and others. Jahn hazards an ingenious conjecture, that Zerah was king of Cush on *both* sides of the Red Sea—that is, of both the Arabian and African Ethiopia; and thus provides him a sufficient power without subjecting him to the necessity of passing through Egypt. This also is not without serious difficulties. In fact, no conclusion that can be relied upon has yet been exhibited.—J. K.

**ZERED** (זֶרֶד; *Zapéd*; Alex. *Zapé* and *Zapér*; *Zared*). A valley on the south-eastern border of Moab, where the Israelites encamped before crossing the Arnon (Num. xxi. 12). In the A. V. of Deut. ii. 13, it is called a 'brook'; but the Hebrew word is the same as in Numbers (נַחַל, 'a torrent-bed' or 'valley'). The name Zered seems to have disappeared; but as the wady was the southern border of Moab, Dr. Robinson says, 'the features of the country seem to show that this was probably the Wady el-Ahsey, which now separates the district of Kerak from Jebâl, and indeed forms a natural division between the country on the north and on the south. Taking its rise near the castle of el-Ahsey on the route of the Syrian Hâj, upon the high eastern desert, it breaks down through the whole chain of mountains to near the south-east corner of the Dead Sea, forming for a part of the way a deep chasm. The Israelites doubtless passed Wady el-Ahsey near its upper end, where it would present no difficulty' (*B. R.* ii. 157; Burckhardt, *Travels*, 400).—J. L. P.

**ZEREDA** (הַצֶּרֶדָה; Sept. ἡ *Zapirâ*; Alex. ἡ *Zapirâ*), a town on Mount Ephraim, the birth-place of Jeroboam the son of Nebat (1 Kings xi. 26). In an addition made by the LXX. to ch. xii. Sarira is said to have been built by Jeroboam for Solomon, and it is stated that to it Jeroboam returned when he came out of Egypt. It was probably a fastness or keep erected to protect or overawe the surrounding district, which took from it its name. Some would identify it with Zererath, Zarthan, and Zaredatha, but there is a difficulty in the way of this arising from the fact that this was on a hill, whilst these seem to have been in the plain.—W. L. A.

**ZEREDATHA.** [ZERERATH.]

**ZERERATH** (צֶרֶרֶת, with ה local, properly צֶרֶה, *Zererah*; Ταγαπαγαδά; Alex. καὶ στυή-γαγε), a place mentioned in connection with the flight of the Midianites after their defeat by Gideon in the valley of Jezreel:—'And the host fled to Beth-shittah in (to) Zererath, and to the border of Abel-meholah, unto Tabbath' (Judg. vii. 22). The reading of this word is not satisfactorily established in the Hebrew text. Some MSS., with the Syriac and Arabic versions read *Zeredath*, or *Zeredathah*, which is mentioned in 2 Chron. iv. 17. There can be little doubt that the places are identical, and the difference in name has arisen from an accidental mistake of a ז for a ד. It may also be the same place which is called *Zereda* in the A. V. (צֶרֶדָה, 1 Kings xi. 26), and which was the birth-place of Jeroboam the first king of Israel. But by comparing 2 Chron. iv. 17 with 1 Kings vii. 46, it would appear that Zeredatha was called *Zarthan*. A close con-

nection seems thus to be established between Zererath, Zeredathah, Zereda, and Zarthan. Three of them at least were situated in the valley of the Jordan, and not far distant from Bethshean. The probability is that they were all various forms of the same name. Examples of this are common in Syria at the present day (Keil and Delitzsch on *Judges*, ad loc.; Gesenius, *Thesaurus*, s. v. [ZAR-TENAH]).—J. L. P.

**ZERESH** (זֶרֶשׁ; Pers. *gold*; Sept. Ζωσάρα), the wife of Haman (Esth. v. 10; vi. 13), and well worthy of him, if we may judge from the advice she gave him to prepare a gibbet and ask the king's leave to hang Mordecai thereon [HAMAN; MORDECAI].—J. K.

**ZERUAH** (צֶרְוָה, *leprous*; Sept. Ζαριπά), the widowed mother of Jeroboam (1 Kings xi. 26).

**ZERUBBABEL** (זְרُبָבֶל, *sown in Babylon*; Sept. Ζωροβάβελ), called also 'Sheshbazzar, prince of Judah' (Ezra i. 8), son (comp. 1 Chron. iii. 17) of Shealtiel, of the royal house of David (1 Chron. iii.), was the leader of the first colony of Jews that returned from captivity to their native land under the permission of Cyrus, carrying with them the precious vessels belonging to the service of God. With the aid of Joshua and his body of priests, Zerubbabel proceeded, on his arrival in Palestine, to rebuild the fallen city, beginning with the altar of burnt-offerings, in order that the daily services might be restored. The Samaritans, however, having been offended at being expressly excluded from a share in the land, did all they could to hinder the work, and even procured from the Persian court an order that it should be stopped. Accordingly, everything remained suspended till the second year of Darius Hystaspis (A.C. 521), when the restoration was resumed and carried to completion, according to Josephus, owing to the influence of Zerubbabel with the Persian monarch (*Antiq.* xi. 3; Ezra; Haggai i. 1-14; ii. 1).—J. R. B. [The name Sheshbazzar was the Chaldee or Persic name which he had after the analogy of Belteshazzar, Shadrach, Meshach, and Abednego.]

**ZERUIAH** (צֶרְוִיָּה, *wounded*; Sept. Ζαρούια), daughter of Jesse, sister of David (1 Chron. ii. 16), and mother of Joab, Abishai, and Ashael (2 Sam. ii. 18; iii. 39; viii. 16; xvi. 9).

**ZIBA** (צִיבָא, *statue*; Sept. Ζιβά), a servant of the house of Saul, of whom David inquired if there was any one left of the house of Saul to whom the monarch might show favour. Mephibosheth was in consequence found, and having been certified of David's friendship, Ziba, who was at the head of a large family, having fifteen sons and twenty slaves, was appointed to till the land for the prince, and generally to constitute his household and do him service (2 Sam. ix. 2-10). This position Ziba employed for his master's harm. When David had to fly from Jerusalem in consequence of the rebellion of Absalom, Ziba met the king with a large and acceptable present:—'But where is Mephibosheth?' asked the fugitive monarch; 'In Jerusalem,' was the answer; 'for he said, To-day shall the house of Israel restore me the kingdom of my father.' Enraged at this, which looked like

ingratitude as well as treachery, David thereupon gave to the faithless Ziba all the property of Mephibosheth (2 Sam. xvi. 1, *seq.*) On David's return to his metropolis an explanation took place, when Mephibosheth accused Ziba of having slandered him; and David, apparently not being perfectly satisfied with the defence, gave his final award, that the land should be divided between the master and his servant (2 Sam. xix. 24, *seq.*) —J. R. B.

ZIBEON (זִבְעוֹן, *dyed*; Sept. Σεβεργών), a son of Seir, phylarch or head of the Hivites (Gen. xxxvi. 2, 20, 24, 29).

ZICHRI (זִכְרִי, *renowned*; Sept. Ζεφρι), an Ephraimite, probably one of the chiefs of the tribe, and one of the generals of Pekah king of Israel. It has been supposed that he took advantage of the victory of this monarch over the army of Judah to penetrate into Jerusalem, where he slew one of the sons of Ahaz, the governor of the palace, and the king's chief minister or favourite. It is difficult without this supposition to explain 2 Chron. xxviii. 7. There is some probability in the conjecture that he was the 'Tabael's son' whom Pekah and Rezin designed to set upon the throne of Judah [TABAE]. —J. K.

ZIDDIM (זִידִים), a place belonging to Naphthali (Josh. xix. 35). It has not been identified. Knobel suggests that the name may be preserved in *es-Saudah*, a place to the west of the southern extremity of the Lake of Tiberias; but this would place it in a territory beyond that of Naphthali, and in that of Issachar. There is more probability in the suggestion that it is to be identified with the *Kefr-Hattin*, a village a few miles west of the Lake Tiberias, and within the allotment of Naphthali. Lightfoot cites the Jerusalem Talmud (*Megillah*, fol. 70. 1) as identifying Ziddim with Caphar Hit-taint, near to Tiberias (*Cent. Chorog. Matthaeo praemiss.* c. 78). —W. L. A.

ZIDON, SIDON (Phœn. צִידֹן; Heb. צִידֹן, *Zidon*; Gr. Σιδών; the present صَيْدَا, *Saida*), the name of a Phœnician city, probably derived from צוּד, *to hunt, to fish*, and bestowed upon it for the abundance of the fish found in its neighbourhood (Urbs . . . quam a piscium ubertate Sidona appellaverunt: nam piscem [?] piscatum] Phœnices Sidon [cf.

Syr. ܥܝܕܢ vocant, Just. 18. 3), situated in a narrow plain between the Lebanon and the Mediterranean, in 33° 34' 05" N. L., 200 stadia from Tyre, 400 from Berytus (Strabo). The term 'first-born of Canaan,' bestowed upon it in the genealogical table of Gen. x. 15, can only be understood in the sense of its having early reached the highest place among the cities and tribes of Phœnicia; for the existence of other Phœnician cities before Zidon seems sufficiently proved from the circumstance Berytus and Byblos being mentioned much earlier by Sanchuniathon than Zidon; and further, from the priority and position of the local deities of the two former places in the colonies. Thus the worship of the Cabiri, the tutelary deities Berytus, and of Aphrodite, of Byblus, was nowhere found as a national cultus in Zidonian or Tyrian colonies, while long before historical

times they flourished in Cyprus, and had reached the most distant coast of the Mediterranean. That pre-historic period of a preponderance of northern Phœnicia, however, had passed away when we first meet Zidon in the Bible and Homer. There it appears already in the full zenith of its wealth and power: —'צִידֹן רַבָּה,' Zidon the Great, or Zidon the Metropolis, scil. of Zidonía. This district appears to have embraced the states of Zidon, Tyre, and Aradus, and its inhabitants are always distinguished from the inhabitants of the city itself (called 'Dwellers, יוֹשְׁבֵי, of Zidon) as צִידוֹנִים, 'Zidonians,' or dwellers in the districts; and it seems in those early times to have extended northwards to the Gibletes, southwards to the Carmel (Zebulun's border, Gen. xlix. 13). At a later period the boundaries south were determined by the fluctuating issue of the struggle for the hegemony between Zidon and Tyre, while northwards the river Tamyrus divided it from the State of Berytus. To the east, where it never had extended very far (Dan, a Zidonian colony, being described as being 'far from the Zidonians,' Judg. xviii. 7) in early days, it touched, at a later period, the territory of Damascus. The assumption, however, drawn by some writers from the inexact way in which the appellation Zidonian is used by ancient writers—viz. that this name stood for 'Phœnician,' and Zidonía itself for the whole of Phœnicia, an important part of which it only formed—is incorrect. Tyre, of later origin than Zidon, if not indeed founded by it, in the same way styles itself on coins אֶם צִידֹן, 'Metropolis of Zidonía,' in the sense of its momentary hegemony over Zidon only, possibly also with a secondary reference to the nationality of its inhabitants, mostly immigrants from Zidon.

The frequent allusions to the skilfulness of the Zidonians in arts and manufactures, the extent of their commerce, their nautical information and prowess, in ancient writers, are well known. Thus Homer, who never seems to have heard of Tyre, speaks of a large silver bowl cunningly wrought by Zidonians, which Achilles bestows as a prize upon the swiftest runner at the games in honour of Patroclus (*Il.* ψ 741). Menelaos gives Telemachus a similar bowl of silver, gold-edged, a gift to him from the king of the Zidonians (*Od.* δ 618). Sidonian women had worked the garment which Hecuba offers to Minerva (*Il.* ζ 290), etc. Of the trade of the 'Zidonian merchants' (*Is.* xxiii.), both by land and sea, we hear in Diod. Sic. (16, 41, 45); of their glass, linen, and other manufactories in Pliny, Virgil, Strabo, and other classical writers. As we have already spoken on this subject of their trade under PHœNICIA, it will suffice here to remind our readers of the terms πολύχαλος applied to Zidonía, and πολυδαίδαλοι to its inhabitants, by Homer, to show what was the renown both of the metal-produce of the country and of the skill of its sons and daughters in the early days of Greece.

The History of Zidon or Zidonía has likewise been touched upon briefly in the articles on PHœNICIA and TYRE. Although allotted to Asher (Josh. xix. 28), it yet never seems to have been really conquered by the Israelites. On the contrary, it would appear as if the Zidonians had, for a time at least, ruled over them. But very soon after that period its splendour and power began to pale before Tyre, which existed already at the time of Joshua, but as

a dependency from Zidon. After the memorable defeat which the Zidonians suffered in the war with the king of Askalon (13th century B.C.), reported by Justin, when the Zidonians are said to have 'retired to their ships and to have founded [? re-founded] Tyre,' Zidon almost disappears from history for a time,—so utterly enfeebled and insignificant had it become through the sudden and brilliant rise of its own daughter and rival, to whom all the noblest and most skilful of her children had fled. Its fate was almost the same as was that of Tyre herself when Dido-Elissa had founded Carthage, and drew all the most important elements from the old city to the 'New Town'—which, it must not be forgotten, had originally been a Zidonian settlement under the name of Kakkabe.

Although Zidon had retained her own kings, yet, at the time of David and Solomon, Tyre is found manning its fleets with Zidonian sailors, and Hiram furnishes Zidonian workmen for the building of Solomon's temple. Gradually the kings of Tyre even assumed the title of 'king of Zidon.' And, although the foundation of Carthage, and the consequent weakening of Tyre, allowed Zidon to breathe somewhat more freely, yet, a very short time after that event, the same internal political dissensions and party-struggles caused a similar emigration as that which had taken place in Tyre, or which had peopled Tyre itself with Zidonians. This emigration founded Aradus, and thus gave rise to the confederation of the three states of Tyre, Zidon, and Aradus, the supreme council (or Synedrium) of which had its seat at Tripolis. Yet this confederation did not last long. When Shalmanassar (707-701 B.C.) marched against Phœnicia, Zidon, out of her ancient rancour against her successful rival, joined, together with other cities, the conqueror, assisting him with sixty vessels manned with 800 rowers. Nothing is heard of Zidon for a century afterwards; but Tyre having emerged victoriously from the contest with Shalmanassar, it is to be presumed that it ruled its treacherous confederate with a heavy hand. When Chaldeans, Egyptians, Scythic hordes, overflowed the whole country during the 7th and part of the 6th century B.C., the power of both Tyre and Zidon was finally broken so completely that, notwithstanding their kings and their fleets, they almost without resistance fell into the hands of Persia under Cyrus and Cambyses (526 B.C.) As tributary provinces, they had now to aid their conquerors with their ships, both against the Greeks and the Egyptians. Yet no sooner had the Achæmenidian rulers restored peace, than these Phœnician cities began to gather wealth and strength anew, and in the year 351 Zidon dared Artaxerxes Ochus in open rebellion. Goaded to despair by the insolence of the Persian satraps and generals who had taken up their abode in their city, the inhabitants resolved to shake off the galling yoke, and persuaded their Phœnician kinsmen to join them in their resistance. Nectanebo, the king of Egypt, sent them 3000 Greek soldiers, who, together with their armed men and ships, bade fair to carry the day. After committing a few excesses in the royal palace itself, and taking some of their insolent visitors captive, they marched against the royal troops sent from Babylon to quell the rebellion, and, under the Zidonian general Tennes, routed them. Whereupon the king himself appeared before the city, and Tennes treacherously handed it over to the besieging enemy. The Zidonians

having burnt their ships, and seeing all further resistance impossible, shut themselves up in their houses, with their wives and children, and fired the whole place. No less than 40,000 people are said to have perished in the flames, together with the most colossal wealth. The king, indeed, sold the ruins, on account of the vast amount of molten gold and silver found beneath them, for many talents. Rebuilt again, it became a provincial town without importance, and gladly opened its gates to Alexander the Great—happy to get rid of the Persian yoke at any price. Under his Syrian successors it again rose in population and importance; so much so that Antiochus III. preferred to pass it by without attacking it (216 B.C.) At the time of Cæsar it appears to have possessed a kind of autonomy. In the middle of the 1st century A.D. it is again called 'Opulenta Sidon . . . maritimarum urbium maxima' (Pomp. Mela, i. 12); a circumstance due chiefly to its exceptionally favourable harbour or harbours—one for summer and one for winter. Greek coins style her *Ναυαρχίς*, Roman coins Colonia Augusta, and Metropolis. In the N. T. we find it mentioned in Matthew (xv. 21) and Mark (vii. 24, 31). Paul finds there also a Christian friend (Acts xxvii. 3). The first bishop of Zidon mentioned is Theodorus, who appeared at the Nicean council. Eusebius and Jerome call it 'Urbs Phœnices insignis,' while Antoninus Martyr (600) finds it in decay, and calls its inhabitants 'wicked people.'

From that time forth, however, little is heard of it until the time of the Crusades. Still called Sidona in the Itineraries, we meet it again as Saïda in Edrisi; and, by a further corruption of this name, as Sageta or Sagitta in later writers. Edrisi speaks of it as an important place, the four districts of which mount up to the Lebanon, and within the precincts of whose territory no less than 600 villages were situated. There can be no doubt about the importance of Saïda at the time of the Crusades. Although its surrounding districts yielded welcome plunder in cattle and other provisions to the invading army of the Crusaders, yet they dared not attack the city itself at first in 1099. Eight years later mighty preparations for a siege were made, but the inhabitants bought it off at a high price. The place was taken, nevertheless, in 1111, after a six weeks' defence. From that time forth it remained in the hands of the Christians for seventy-six years, when, after the battle of Hattin, Sultan Saladin seized it and destroyed its fortifications. Ten years later it again fell into the hands of the pilgrims (1197), who are said to have used the cedar-planks taken from its houses for stabling and fuel.

In 1253 Lewis IX. rebuilt it, and fortified it with high walls and towers, and afterwards sold it to the Templars, who very soon had to relinquish it to the Mongols. Destroyed by the latter, it was taken possession of by Sultan Ashraf in 1291. In 1321—at the time of Abulfeda—it had, in consequence of all these troubles and successive destructions, lost almost all vestiges of its former grandeur, and was hardly deemed worthy of mention. In the middle of the 15th century it reappears again as a port of Damascus. A new era dated for this city from the time of the Emir Fachr Ad-dîn, who for nearly half a century took up his abode there, and besides restoring it to somewhat of its pristine splendour, also made it the

link between Europe and Asia, its commerce and ideas. For here it was that Europeans, to whom the Emir was particularly favourable, first established themselves after the failing of the Crusaders' expeditions, and thence spread over the whole of the East. Of the gorgeous buildings erected by European architects whom he drew to his court, nothing but ruins now remain, but some bridges over the river at Beirut and Saida, constructed by Tuscan masters (Fagni and Cioli), exist to this day.

Factories and khans (campi) of magnificent proportions aided the reawakened trade and industry not a little, and European merchants, especially French and Italian, again crowded the streets and markets of ancient Zidon. After Fachr Ad-din's sudden downfall the commerce began to wane; but such was its importance still, that the French trade alone brought an annual revenue of 200,000 crowns into the Turkish treasury. In the constant warfare between the Druses and the Turks that ensued,

537. Zidon.

Saida suffered terribly; yet up to the end of the 18th century it remained the central point for export and import, which chiefly consisted of cotton, silk, rice, drugs, spices, cloth, etc. When, however, Jezzâr Pasha was appointed Pasha of Saida (1775), he at once assumed the attitude of a rebel towards the Porte, held the whole of Syria for a quarter of a century in a state of abject terror, and finally turned against the French merchants, who offered a

spirited resistance to his cruel and ruinous decrees. He expelled the French consulate in 1790, and ended by driving the French merchants themselves from the country.

Ever since Saida has lost all and everything, and has once more become a poor miserable place, without trade or manufactures worthy of the name. To add to its desolation, an earthquake, which took place in 1837, destroyed about one hundred of its

The third inscription we mentioned was discovered a few years ago by Consul Moore on another locality near Salda. It is found on a block 69 centimetres in height, 38 in length, which evidently was once used for building purposes. It is now in the possession of Comte de Vogue. The inscription reads as follows:—

2 ԵՐԵՐՈՒԹԱՆ . . .  
 ԸՆԿԵ  
 9 Գ ԶԱՆԱԼԱՆԻՇԱԿԸ ԼԱՆՈՒՆԸ ԸՆԿԵ . . .  
 ԸՆԿԵ  
 9 ՆԿԵՐԵՐԵԼԱՆԱԼԱՆԸ ԸՆԿԵՆԸ . . . . .  
 Դ ԸՆԿԵՐԵՐԵԿ [Ը] ԸՆԿԵՆԱՆԱԼԱՆԸ . . . ԸԸԸ  
 8 ԸՆԿԵՆԱՆԱԼԱՆԸ ԸՆԿԵՐԵԿ . . . ՆԿԵՐԸ  
 7 ԶԱՆԱԼԱՆԸ ԸՆԿԵՐԵԿ . . . ՆԿԵՐԸ . .  
 1 ԸՆԿԵՐԵԿ ԸՆԿԵՆԱՆԱԼԱՆ . . . ԸԸԸ

—contains 7 lines, as follows: —  
 among the living under the sun . . .  
 The shorter inscription—round the king's neck  
 contains 7 lines, as follows: —

ביר . . מ . . בשת ||  
 ימלכדבעשתרתמלך  
 צדנסכנבדעשתרת  
 מלכדנמאיתשנאר . .  
 ללעשתרת . . . . .

The fragmentary nature of this inscription allows of little certainty in its deciphering, save with respect to a few proper names.

The coins of Zidon in its Greek (Seleucidian, from Antiochus IV.) and Roman times are by no means rare. The most common emblem is a ship, in allusion to the maritime importance of the city.

Is it necessary that we, in conclusion, once more urge the infallible certainty of the most precious archaeological and palaeographical treasures awaiting the spade of the excavator, on this as on many another spot of ancient Canaan? [PHENICIA; TYRE; SEMITIC LANGUAGES, etc.]-E. D.

ZIF (זִיף, *bloom-month*), an ante-exilian name of the second Hebrew month (1 Kings vi. 1-37), corresponding with our April and May. This, the second month of the sacred, was the eighth of the civil year. The second month bore also the name Iyar.—J. R. B.

ZIKLAG (צִיקְלָג; Sept. Σεκελάκ), a city belonging to the tribe of Simeon (Josh. xv. 31; xix. 5), but at times subject to the Philistines of Gath, whose king, Achish, bestowed it upon David for a residence; after which it pertained to Judah (1 Sam. xxvii. 6; xxx. 1, 14, 26; 2 Sam. i. 1; 1 Chron. iv. 30; Neh. xi. 28).

While David was absent with his men to join Achish, Ziklag was burned and plundered by the Amalekites; and on his return, after receiving the spoil from them, he remained here till called to assume the crown after the death of Saul. It was during his stay in this place that he was joined by many considerable and valiant persons, whose adhesion to his cause was of much importance to him, and who were ever after held in high esteem in his court and army.—J. K.

ZILLAH (צִלָּה, *shade*; Sept. Σελλά), one of the wives of Lamech, and mother of Tubal-cain (Gen. iv. 19. [LAMECH].)

ZILPAH (זִלְפָּה, *a dropping*; Sept. Ζελφά), a female servant of Laban, whom he gave to Leah on her marriage with Jacob (Gen. xxix. 24), and whom Leah eventually induced him to take as a concubine-wife; in which capacity she became the mother of Gad and Asher (Gen. xxx. 9-13; xxxv. 26; xxxvii. 2; xli. 18).—J. K.

ZIMRAN (זִמְרָן, *sung*, i.e. *celebrated in song*; Sept. Ζομβρᾶν), a son of Abraham by Keturah, and the name of an Arabian tribe descended from him (Gen. xxv. 2; 1 Chron. i. 32). This name may perhaps be connected with the Zabram mentioned by Ptolemy as a city with a king, situated between Mecca and Medina.—J. K.

ZIMRI (זִמְרִי), a proper name in the O. T., which is derived from the root זָמַר, *carpere*, especially *carpere vites* = *putare vites*, 'to prune;' and also *carpere fides* = *pulsare, cantare*, 'to play,' 'sing.'

It is very remarkable that the Greek ψάλλειν also occurs in both these acceptations, which appear at first sight to be so very heterogeneous—to *scrape*, *pull*, *pluck*, and *to sing*. Compare the Latin *carpere*, which is etymologically connected, as well with the Greek ἄρπη, *sickle*, as with the English *harp*; and the English colloquial and vulgar expressions, 'to scrape the violin,' 'to pull away at the piano,' and 'to pull out a note.' If we consider the striking coincidence of the Greek with the Hebrew, we are led to suppose that the link of the ideas is as we have stated, and cease to be surprised that Fürst translates the name זִמְרִי by the German *Winzer* = *vine-dresser*, but Gesenius by *carmine celebratus*—i.e. a man celebrated by song, or a man of celebrity in general.

The Septuagint imitates the Hebrew sound by Ζαμβρᾶ, and Josephus (Antiq. viii. 12. 5) by Ζαμβρῆς.

Four men are called Zimri in the O. T. :—

1. A son of Zerah, who was a son of Judah by Tamar (1 Chron. ii. 6).

2. The name of the Israelite slain, together with the Midianitish woman, in Shittim, by Phinehas, was ZIMRI, the son of Salu, a prince of a chief house among the Simeonites (Num. xxv. 14).

3. King Saul begat Jonathan, who begat Merib-baal, who begat Micah, who begat Ahaz, who begat Jehoahaz, whose sons were Alemeth, Azmaveth, and ZIMRI. Zimri begat Moza, etc. (1 Chron. viii. 36; ix. 42).

4. In the twenty-sixth year of Asa, king of Judah, Elah, the son of Baasha, began to reign over Israel in Tirzah. After he had reigned two years, ZIMRI, the captain of half his chariots, conspired against him when he was in Tirzah, drunk, in the house of his steward. Zimri went in and smote and killed him, and reigned in his stead, about B.C. 928; and he slew all the house of Baasha, so that no male was left. Zimri reigned only seven days at Tirzah. The people who were encamped at Gibbethon, which belonged to the Philistines, heard that Zimri had slain the king. They made Omri, the captain of the host, king over Israel in the camp. Omri besieged Tirzah and took it. Zimri, seeing that the city was taken, went into the king's palace, set it on fire, and perished in it for his sins in walking in the way of Jeroboam, and for making Israel to sin (1 Kings xvi. 1-20; 2 Kings ix. 31).

5. The kings of ZIMRI, mentioned in Jer. xxv. 25, seem to have been the kings of the Zimranites, the descendants of Zimran, son of Abraham by Keturah (Gen. xxv. 2; 1 Chron. i. 32). It seems that in Jer. xxv. 25, זִמְרִי is a contraction for זִמְרָנִי. The town Zabram, mentioned by Ptolemy as situated between Mecca and Medina, perhaps had its name from the tribe of Zimran.—C. H. F. B.

ZIN (צִן; Sept. Σιν), a desert on the south of Palestine, and westward from Idumæa, in which was situated the city of Kadesh-barnea (Num. xiii. 21; xx. 1; xxvii. 14). Its locality is therefore fixed by the considerations which determine the site of Kadesh to the western part of the Arabah south of the Dead Sea.

ZINNIM (צִנִּימִים) and ZENINIM (צִנְיָנִים) occur in several passages of Scripture, as in Num. xxxiii. 55; Josh. xiii. 13, where they are mentioned along with SIKKIM; also in Job v. 5, and Prov.

xxii. 5. The Septuagint has *τρίβολος* in Prov. xxii. 5, and *βολίδες* in Num. xxxiii. 55, and Josh. xxiii. 13. It has been supposed that *zinnim* might be the *Rhamnus paliurus*, but nothing more precise has been ascertained respecting it, than of so many other of these thorny plants; and we may therefore, with Michaelis, say, 'Nullum simile nomen habent reliquæ linguæ Orientales; ergo fas est sapienti, Celsio quoque, fas sit et mihi, aliquid ignorare. Ignorantiæ professio via ad inveniendum verum, si quis in Oriente quæsierit.'—J. F. R.

#### ZION. [JERUSALEM.]

ZIPH (זִיפּ; Sept. *Zif*), the name of a city in the tribe of Judah (Josh. xv. 55; 2 Chron. xi. 8), and of a desert in its vicinity (1 Sam. xxiii. 14, 15). It is mentioned by Jerôme (*Onomast.* s. v.), but had not been since noticed till Dr. Robinson found the name in the Tell Zif (Hill of Zif), which occurs about four miles and a half S. by E. from Hebron, and is a round eminence about a hundred feet high, situated in a plain. A site also called Zif lies about ten minutes east of this, upon a low hill or ridge between two small wadys, which commence here and run towards the Dead Sea. There is now little to be seen besides broken walls and foundations mostly of unhewn stones, but indicative of solidity.—J. K.

ZIPHON (זִפְרוֹן; Sept. *Δεφρωνά*; Alex. *Ζεφρωνά*, the final *a* being the Heb. local ה), a place on the northern border of the land of Canaan as described by Moses (Num. xxxiv. 9). This has been identified with extensive ruins bearing the name of *Zifran* (زفران), fourteen hours to the N. E. of Damascus (Wetzstein, *Reisebericht über Hauran*, p. 88). If Ziphron is the same as the Sibraim of Ezek. xlvii. 16, it lay on the border of the Damascene and Hamath district, and this accords well with the above identification.—W. L. A.

ZIPPOR (זִפּוֹר or זִפּוֹרָה), the father of Balak king of Moab (Num. xxii. 2, etc.; xxiii. 18; Josh. xxiv. 9; Judg. xi. 25). Whether he was ever himself king of Moab is unknown, as he is never mentioned save in connection with Balak; indeed it may even be doubted whether any such person ever existed, as *Ben-Isippor* (Sparrow-son) may have been merely an appellation of Balak. As the feminine Zipporah, however, was used as a proper name, it is probable that Zippor was so also. He may have been the former king of Moab referred to Num. xxi. 26.—W. L. A.

ZIPPORAH (זִפּוֹרָה, *little bird*; Sept. *Ζεφώρα*), one of the seven daughters of Reuel (comp. Exod. xviii.), priest of Midian, who, in consequence of aid rendered to the young women when, on their going to procure water for their father's flocks, they were set on by a party of Bedouins, was given to Moses in marriage (Exod. ii. 16, *seq.*) A son, the fruit of this union, remained for some time after his birth uncircumcised; but an illness into which Moses fell in a khan when on his way to Pharaoh, being accounted a token of the divine displeasure, led to the circumcision of the child, when Zipporah, having, it appears, reluctantly yielded to the ceremony, exclaimed, 'Surely a bloody husband thou art to me' (Exod. iv. 26).

This event seems to have caused some alienation of feeling, for Moses sent his wife back to her father, by whom she is again brought to her husband while in the desert, when a reconciliation took place, which was ratified by religious rites (Exod. xviii. 1, *seq.*)—J. R. B.

ZIZ (זִיז; Sept. *Ἰσσεῖς*), a cliff or pass leading up from the Dead Sea towards Jerusalem, by which the bands of the Moabites and Ammonites advanced against Jehoshaphat (2 Chron. xx. 16). They seem to have come round the south end of the Dead Sea, and along the western shore as far as Engedi, where there is a pass which leads out northward towards Tekoa (Robinson, *Bibl. Res.* ii. 215). This is the route which is taken by the Arabs in their marauding expeditions at the present day.—J. K.

ZIZANION (Ζιζάνιον). This word occurs in Matt. xiii. 25, and several of the following verses, and is translated *weeds* by Luther, and *tares* in the A. V.; among Greek authors it is found only in the *Geoponica*. It is therefore supposed that, as the Gospel of Matthew was (as some think) first written in Syro-Chaldaic, the vernacular name of some particular plant was adopted, and thus introduced

538. *Lolium temulentum*.

into the Greek version. This seems to be confirmed by the existence of a plant which is suitable to the above passage, and of which the Arabic name is very similar to *zizanon*. Thus, in the parable of the man who sowed good seed in his field, it is said: 'But while men slept, his enemy came and sowed *tares* among the wheat: when the blade sprung up and brought forth fruit, then appeared the *tares* also.' From this it is evident that the wheat and the *zizanon* must have had considerable resemblance to each other in the herbageous parts, which could hardly be the case unless they were both of the family of the grasses. That such, however, is the case, is evident from what Volney says, that the peasants of Palestine and Syria do not cleanse away the seeds of weeds from their corn, but even leave that called *Sivan* by the

Arabs, which stuns people and makes them giddy, as he himself experienced. This no doubt is the

زوان; *Zawan*, or *Ziwan*, of Avicenna, and which Buxtorf, in his *Rabbinical Lexicon*, says was by the later Hebrews called זוןין *Zonin*. Avicenna describes two kinds of *Ziwan*; one 'quidpiam tritico non absimile,' of which bread is made; the other 'res ebrietatem inducens, pravæ naturæ, atque inter fruges provenit.' The *Ziwan* of the Arabs is concluded to be our Darnel, the *ivraie* of the French, the *Lolium temulentum* of botanists, and is well suited to the palate. It is a grass often found in corn-fields, resembling the wheat until both are in ear, and remarkable as one of the very few of the numerous family of grasses possessed of deleterious properties. These have long been known, and it is to this plant that Virgil alludes (*Georg.* i. 154):—

'Interque nitentia culta  
Infelix *lolium* et steriles dominantur avenæ,'  
J. K.

ZOAN (זון; Sept. *Távis*), an ancient city of Lower Egypt, situated on the eastern side of the Tanitic branch of the Nile, called in Egyptian **𓂏𓂏𓂏** or **𓂏𓂏𓂏**, *Ganē* or *Gani*—i.e. 'low region'—whence both the Hebrew name Zoan, and the Greek Tanis, are derived; as is also the Arabic San, by which name the site is still known. Zoan is of considerable Scriptural interest. It was one of the oldest cities in Egypt, having been built seven years after Hebron, which already existed in the time of Abraham (*Num.* xiii. 22; comp. *Gen.* xxii. 2). It seems also to have been one of the principal capitals, or royal abodes, of the Pharaohs (*Is.* xix. 11, 13; xxx. 4): and accordingly 'the field of Zoan,' or the fine alluvial plain around the city, is described as the scene of the marvellous works which God wrought in the time of Moses (*Ps.* lxxviii. 12, 33). The destruction predicted in *Ezek.* xxx. 14 has long since befallen Zoan. The 'field' is now a barren waste; a canal passes through it without being able to fertilise the soil; 'fire has been set in Zoan,' and the royal city is now the habitation of fishermen, the resort of wild beasts, and infested by reptiles and malignant fevers. The locality is covered with mounds of unusual height and extent, full of the fragments of pottery which such sites usually exhibit. These extend for about a mile from north to south, by about three-quarters of a mile. The area in which the sacred enclosure of the temple stood, is about 1500 feet by 1250, surrounded by the mounds of fallen houses, as at Bubastis [PI-BESETH], whose increased elevation above the site of the temple is doubtless attributable to the same cause—the frequent change in the level of the houses to protect them from the inundation, and the unaltered position of the sacred buildings. There is a gateway of granite and fine gritstone to the enclosure of this temple, bearing the name of Rameses the Great. Though in a very ruinous condition, the fragments of walls, columns, and fallen obelisks, sufficiently attest the former splendour of the building to which they belonged. The obelisks are all of the time of Rameses the Great (B. C. 1355), and their number, evidently ten, if not twelve, is unparalleled in any Egyptian temple. The name of this king most frequently occurs; but the ovals of his successor

Pthamen, of Osirtasen III., and of Tirhakah, have also been found. The time of Osirtasen III. ascends nearly to that of Joseph, and his name, therefore, corroborates the Scriptural account of the antiquity of the town. Two black statues, and a granite sphinx, with blocks of hewn and occasionally sculptured granite, are among the objects which engage the attention of the few travellers who visit this desolate place. The modern village of San consists of mere huts, with the exception of a ruined kasr of modern date (Wilkinson's *Modern Egypt*, i. 449-452; *Narrative of the Scottish Deputation*, pp. 72-76).—J. K.

ZOAR (זוער, also זער, 'smallness'; *Zōryopa*; *Σηγώρ*; *Segor*), one of the cities of the Pentapolis, and apparently, from the way in which it is mentioned, the most distant from the western highlands of Palestine (*Gen.* xiii. 10). Its original name was Bela (*xiv.* 2, 8), and the change is thus explained in the narrative of Lot's escape from Sodom. When urged by the angel to flee to the mountain, he pointed to Bela, and said: 'This city is near to flee unto, and it is a *little one* (זעער) : Oh, let me escape thither (is it not a *little one*?) and my soul shall live.' The angel consented; and the incident proved a new baptism to the place—'Therefore the name of the city was called *Zoar*,' that is, 'little' (*v.* 22). This incident further tends to fix its site, at least relatively to Sodom. It must have been nearer than the mountains, and yet outside the boundary of the plain or vale of Siddim, which was destroyed during the conflagration. It would seem from *ver.* 30 that it lay at the foot of the mountain into which Lot subsequently went up, and where he dwelt. That mountain was most probably the western declivity of Moab, overlooking the Dead Sea. In *Deut.* xxiv. 3 there is another slight indication of the position of Zoar. From the top of Pisgah Moses obtained his view of the Promised Land. The east, the north, and the west he viewed, and lastly 'the south, and the plain of the valley of Jericho, unto Zoar.' This is not quite definite; but considering the scope of the passage it may be safely concluded that the whole basin of the Dead Sea is meant, and that Zoar was at its southern end. Isaiah reckons Zoar among the cities of Moab, but does not describe its position. It would seem, however, from the way in which it is mentioned, that it must have been on the utmost border (*Is.* xv. 5). Jeremiah is the only other sacred writer who mentions it, and his words are less definite than those of Isaiah (*Jer.* xlviii. 34).

The site of Zoar must be determined in a great measure by that of Sodom. It has been shown that Sodom lay in that low valley which now forms the southern section of the Dead Sea [SODOM; DEAD SEA]; and as Zoar was in Moab, it follows that it must have stood near the base of the mountain-range at the south-eastern angle of the sea.

The notices of Zoar in later writers sustain this view. Josephus places it in Arabia—that is, east of the Dead Sea (*Bell. Jud.* iv. 8. 4). Jerome mentions it incidentally in various ways, all of which tend to indicate a site near the Dead Sea in the southern border of Moab (*Onomast.* s.v. 'Luith,' 'Nemrim,' 'Fenon'). Regarding itself directly he says: 'Ipsa est quæ hodie Syro nomine vocatur *Zoora*, Hebræo *Segor*, utroque *parvula* . . . vectes quoque pro terminis, et robore intellige, eo

*quod Segor in finibus Moabitorum sita sit, dividens ab eis terram Philistinim* (Comment. in Isai. xv. 5). Eusebius also describes the Salt Sea as lying between Jericho and Zoar (*Onomast.* s. v. 'Mare Salinarum'). Ptolemy assigns Zoar to Arabia Petraea (*Geogr.* v. 17). It was still a large town with a Roman garrison in the early centuries of the Christian era; and it became the seat of a bishop in the province of *Palästina Tertia* (Reland, *Pal.* pp. 272, 451, 463). The Crusaders mention the name, and passed through it on an expedition round the south end of the Dead Sea (*Gesta Dei*, p. 781); and the Arab historian Abulfeda says that Zoar, or Zoghar, lay near the Dead Sea and the Ghor (*Tab. Syr.* ed. Köh. p. 8).

It may be safely concluded from the foregoing data that the ancient city of Zoar lay at or near the south-east shore of the Dead Sea. At the mouth of Wady Kerak, where it opens on the little fertile plain at the neck of the peninsula of Lisân, are some ancient ruins, first described by Irby and Mangles (*Travels*, p. 448), and afterwards by De Saulcy (*Journey*, i. 307). There is a streamlet near it called *Der'a*, or *Zer'a*, which seems to be a vestige of the ancient name (Irby and Mangles, p. 447). Here we may, with considerable confidence, locate the ancient Zoar.

For the different views held regarding the site of Zoar, the student may consult Robinson, *B. R.* ii. 517; Reland, *Pal.* p. 1064; De Saulcy, *Travels*, i. 481; Tristram, *Land of Israel*, 360; Smith's *Dict. of Bib.* s. v.—J. L. P.

ZOBABH (צֹבָחַ and צֹבָה; *Σουβά*; *Soba*), one of the ancient kingdoms of Syria, first mentioned as having been conquered by Saul after his elevation to the throne of Israel (1 Sam. xiv. 47). King David also turned his victorious arms against 'Hadadezer, the son of Rehob, king of Zobah, as he went to recover his border at the river Euphrates' (2 Sam. viii. 3, 5, 12). From the sacred narrative we learn that it was one of the great provinces or kingdoms of Aram; that its people were rich and warlike; and that it embraced that section of northern Syria which lies between Hamath and the Euphrates (cf. 1 Chron. xviii. 3-9; xix. 6). It was so closely connected with Hamath, that that great city was sometimes distinguished as Hamath-Zobah (2 Chron. viii. 3). The people of Zobah were among the most troublesome and determined enemies of Israel during the reigns of David and Solomon. They seem to have lost no opportunity of joining confederacies to restrain the rising power of the Jewish nation. Solomon was especially harassed by the intrigues of Rezon, a refugee from Zobah, who collected a band of followers, seized the city of Damascus, and became for a time its real or virtual monarch. It is emphatically said of him, 'He was an adversary to Israel all the days of Solomon . . . and he abhorred Israel and reigned over Syria' (1 Kings xi. 23-25).

The Syriac interpreters take Zobah to be *Nisibis*, in Mesopotamia, and they have been followed by Michaelis' (Gesenius, s. v.). Others would identify it with the classic Chalcis. These, however, are mere conjectures. There are no data to fix definitely the site of the city. The kingdom manifestly lay north of Damascus, and east of Hamath. It was a wide arid plain intersected by several ranges of bleak white mountains; but having also a few fertile valleys. The inhabitants were pro-

bably semi-nomads, and chiefly shepherds. Like the modern Bedawîn of that region they were rich in horses (Ritter, *Pal. und Syr.* iv. 1700; *Handbook*, 614).—J. L. P.

ZOHAR (צָהָר, *whiteness*; *Zadp*). 1. A son of Simeon [ZERAH].

2. The father of Ephron the Hittite (Gen. xxiii. 8; xxv. 9).

3. (In Keri; in Chetib צֶהָר, *Jezoar*), a descendant of Judah (1 Chron. iv. 7).

#### ZOOLOGY, BIBLICAL. [BEASTS.]

ZOPHAR (צֹפֶר, *sparrow?* Sept. *Σωφάρι*), one of Job's three friends and opponents in argument (Job ii. 11; xi. 1; xx. 1; xlii. 9). He is called a Naamathite, or inhabitant of Naamah, a place whose situation is unknown, as it could not be the Naamah mentioned in Josh. xv. 41. Wemyss, in his *Job and his Times* (p. 111), well characterises this interlocutor:—'Zophar exceeds the other two, if possible, in severity of censure; he is the most inveterate of the accusers, and speaks without feeling or pity. He does little more than repeat and exaggerate the arguments of Bildad. He unfeelingly alludes (chap. xi. 15) to the effects of Job's disease as appearing in his countenance. This is cruel and invidious. Yet in the same discourse how nobly does he treat of the divine attributes, showing that any inquiry into them is far beyond the grasp of the human mind! And though the hortatory part of the first discourse bears some resemblance to that of Eliphaz, yet it is diversified by the fine imagery which he employs. He seems to have had a full conviction of the providence of God, as regulating and controlling the actions of men; but he limits all his reasonings to a present life, and makes no reference to a future world. This circumstance alone accounts for the weakness and fallacy of these men's judgments. In his second discourse there is much poetical beauty in the selection of images, and the general doctrine is founded in truth; its fallacy lies in its application to Job's peculiar case. The whole indicates great warmth of temper, and inflamed by misapprehension of its object, and by mistaken zeal.'

It is to be observed that Zophar has but two speeches, whereas the others have three each. When Job had replied (ch. xxvi.-xxxi.) to the short address of Bildad (ch. xxv.), a rejoinder might have been expected from Zophar; but he said nothing, the three friends, by common consent, then giving up the contest in despair (ch. xxxii. 1) [JOB].—J. K.

ZOPHIM, THE FIELD OF (צִפְרִים; *eis ἀγροῦ σκοπιδών*; *in locum sublimem*). When Balak desired Balaam to curse Israel, he took him to the most favourable spot for seeing the whole camp, then spread out on the plain on the east side of the Jordan, opposite Jericho: so 'he brought him unto the field of Zophim, to the top of Pisgah' (Num. xxiii. 14). Zophim was probably a district surrounding Pisgah; and the word 'field,' which must signify 'a cultivated field,' indicates doubtless the fertile nature of the territory. Mount Nebo, or Pisgah, is now undoubtedly identified [NEBO]. De Saulcy appears to have even heard the ancient name given to it by the Bedawîn (*Voyage en Terre*

*Sainte*, i. 289). Along its eastern side, and reaching from the ruins of Maan to Heshbon, is a plateau of arable land, still cultivated in part by the Arabs. There can be little doubt that this is 'the cultivated field of Zophim' (*Handbook*, p. 300).—J. L. P.

ZORAH (צֶרְעָה, *hornets' town*; Sept. Σαρά, a town reckoned as in the plain of Judah (Josh. xv. 33), but inhabited by Danites (xix. 41), not far from Eshtaul, and chiefly celebrated as the birth-place of Samson (Judg. xiii. 2, 25; xviii. 2, 8, 11; comp. 2 Chron. xi. 12; Neh. xi. 29). The site may still be recognised under the name of Surah, situated upon a spur of the mountains running into the plain north of Beth-shemesh (Robinson, ii. 339; iii. 18).—J. K.

ZUPH (צִיפָה; Σελφ; Alex. Σελφ; *Suph*), a district visited by Saul when in search of his father's asses (1 Sam. ix. 5). The way in which it is mentioned would seem to imply that it lay to the south of Benjamin. Saul first traversed Mount Ephraim on the north; then, after visiting Shalisha and Shalim, he passed through 'the land of the Benjamites,' and finally reached 'the land of Zuph,' where he turned back. His course was from north to south. It appears also that Ramah of Samuel

was in that region, and on going back home from it, after his interview with the prophet, his way led by Rachel's sepulchre (x. 2). The word *Zophim* (צופים) attached to Ramah is evidently a plural form of *Zuph*, and shows the connection between the land and the city. [RAMATHAIM-ZOPHIM.] 'The land of Zuph' was thus unquestionably to the south of the territory of Benjamin; but its exact locality has not yet been ascertained.—J. L. P.

ZURIEL (צִירְיָאֵל, *God is my rock*; Sept. Ζωρύριαν), son of Abihail, and family chief or genesarch of the Merarites at the organisation of the Levitical establishment (Num. iii. 35). It does not appear to which of the two great divisions of the Merarites he belonged.—J. K.

ZUZIMS (זִזִּים; Ἰζυμῖς *laxupa*; *Zuzim*), the name given in Gen. xiv. 5 to an ancient race of people who appear to have been the aboriginal inhabitants of the country afterwards possessed by the Ammonites. The eastern invaders first attacked the Rephaim in Bashan, apparently in Jebel Haurân, then marching southward they smote 'the Zuzims in Ham.' The Zuzims were evidently the same who in Deut. ii. 20 are said to have been giants, and to whom the Ammonites gave the name Zumzummims. They appear to have been allied by blood to the Rephaim, and other gigantic races who originally possessed Palestine; and probably a remnant of them, or at least a respect for their memory, may have lingered in Rabbath-Ammon down to the period of the Exodus; and the singular fact of the preservation of Og's 'bedstead' in that city may thus be accounted for. The name Zuzim has been variously interpreted (Gesenius, *Thes.* s. v.); but none of the interpretations are satisfactory, and they throw no light either on the people or their country.—J. L. P.

\* A statement in Smith's *Dict. of Bib.* s. v. 'Zophim,' requires a word of explanation. The writer of that article, Mr. Grove, says that Mr. Porter identifies *Attâris* with Pisgah. This may seem strange to the readers of the articles NEBO and PISGAH in this *Cyclopædia*. But on turning to the *Handbook for Syr. and Pal.* pp. 299, 300, it will be seen that Mr. Porter never expressed any such opinion. Mr. Grove has strangely mistaken his meaning.

# APPENDIX.

## ARTICLES OMITTED.

### ADAM

ADAM, THOMAS, a Puritan divine of the 17th century. He was (probably as vicar) at Wingrave, in Buckinghamshire, from 1614; in 1618 he held the preachship of St. Gregory's, under St. Paul's Cathedral, and was chaplain to Sir H. Montague, Lord Chief-Justice of England; in 1630 he was vicar of St. Bennet's, Paul's Wharf, London; and in 1653 he was 'passing a necessitous and decrepit old age' in London, having been sequestered from his living. He died some time before the Restoration. He was the author of several works, of which his *Commentary on the Second Epistle of St. Peter* is the one entitling him to mention here. This work, first published in 1633, has been twice republished in our own day, edited by the Rev. J. Sherman, Lond. 1839; Edin. 1862. It is one of the richest specimens of Puritan exposition extant, copious to a fault, but full of the happiest thoughts, redolent of learning, and breathing throughout the spirit of a lofty piety.—W. L. A.

BA'SHA (בִּשָּׁא). This term occurs Job xxxi. 40, where it is rendered by *cockle* in the A. V. It was a noxious weed of some kind, but of what kind is very uncertain. Some have thought it may be the *ζιζάνιον* of the N. T., but that was probably a product resembling wheat [ZIZANION], whereas the Ba'sha, from its name, from שָׂשָׁב, *to stink*, was more probably a weed of a herbaceous kind emitting a disagreeable odour.—W. L. A.

BLEEK, FRIEDRICH, was born at Ahrensbock in Holstein, 4th July 1793. He received his education at Lübeck, Kiel, and Berlin. In 1817 he commenced his career as a theological teacher in the university of Berlin, and in 1823 became one of the professors. In 1829 he removed to Bonn, where the rest of his life was spent, and where he died 27th Feb. 1859. Bleek was distinguished for his exact and copious scholarship, his power of lucid exposition, and the calm impartiality of his judgments. These qualities give value to his writings, the chief of which are *Der Brief an die Hebräer erläutert*, 3 parts, Berl. 1828-40; *Einleit. in d. A. T.* Berl. 1860; *Einleit. in d. N. T.* 1862; *Synoptische Erklärung der drei ersten Evangelien*, Leipz. 1862; *Vorlesungen üb. d. Apocalypse*, Berl. 1862; *Vorles. über die Briefe an d. Epheser, Colosser, und Philemon*, Berl. 1866; all except the first posthumous publications. Bleek wrote besides

### JUDICATURE

numerous articles for journals, and several academic programmes.—W. L. A.

DESHÈ (דֶּשֶׁה), young tender grass, as distinguished from *chatzir*, ripe grass ready for mowing (Prov. xxvii. 25). It is described as springing up after rain (Deut. xxxii. 2; 2 Sam. xxiii. 4); and is mentioned as provender relished by cattle (Job vi. 5). It is also used as a figure of transitoriness (Ps. xxxvii. 2).—W. L. A.

EKDACH (אֶקְדַּח), a kind of precious stone of which the gates of the New Jerusalem are poetically represented as being composed (Is. liv. 12). The A. V. translates it 'carbuncles;' but all that can be said is, that it was probably a stone of a red colour and fiery lustre, the name being derived from a root, קָדַח, to kindle; Ar. *قَدَح*, *gadach*, to strike fire.—W. L. A.

GAIUS (Γάιος), the Grecised form of the Latin Caius, the name of several persons mentioned in the N. T.

1. A Macedonian who had accompanied St. Paul to Ephesus, and who was seized by the mob when the uproar was made by Demetrius (Acts xix. 29). Nothing more is known of him.

2. A native of Derbe who, along with Timothy and others, accompanied St. Paul from Asia on the occasion of his second visit to Europe (Acts xx. 4). This Gaius is often confounded with the former; but the one is expressly called a Macedonian, the other was from Derbe (see Meyer's or Alford's note on Acts xx. 4).

3. A Christian famed for his hospitality, resident in Corinth (Rom. xvi. 23; 1 Cor. i. 15).

4. A Christian to whom St. John's third epistle is addressed, also noted for his hospitality to the Christians. Whether he was identical with any of the above is uncertain. Lücke thinks he was the same as No. 2, but for this he assigns no reason. Wolf identifies him with No. 3. According to the *Apostolic Constitutions* (vii. 46), he was made bishop of Pergamos by St. John.—W. L. A.

JUDICATURE. In the patriarchal times the office of judge was naturally vested in the head of the house; and in his hands was the power even of capital punishment (Gen. xxxviii. 24-26). When the people of Israel became an organised nation

the judicial power rested with the chief of the state, and was by him delegated to inferior officers. Thus Moses at first had this duty exclusively on his own shoulders, but by the advice of his father-in-law, both for his own relief and for the expediting of justice, he afterwards selected certain upright, wise, and skilful men, whom he appointed to act as judges under him. The number of these was seventy-two, and they were set over the larger and the smaller divisions of the people, so as probably to form a gradation of courts in which an appeal lay from the lower to the higher. Moses reserved in his own hands the adjudication of the weightier cases (Exod. xviii. 13-26; Deut. i. 9-18).

When Israel was settled in Canaan an arrangement took effect for which provision had been made in the law. In all places large enough to have walls and gates judges were appointed, who were to judge the people with just judgment and decide impartially between man and man. The persons selected were doubtless from among the elders of the place (Deut. xix. 12; xxi. 19; xxii. 18; Job xxix. 7-17), and with them were associated, probably for advice, some members of the Levitical order. Above these local judges stood a supreme judge, to whom difficult cases or disputed decisions were to be referred. Failing him, or at the option of the parties, the matter might be decided by the high-priest, with probably other priests as his assessors, forming a college of justice (Deut. xvii. 8-13). Of these supreme judges a series of thirteen ruled Israel between the time of Joshua and that of Saul. [JUDGES.] Under the monarchy the king was supreme judge (1 Sam. viii. 5; 2 Sam. xv. 2-4; 1 Kings iii. 16, etc.); but it would appear that he too had the aid of a company of assessors (Ps. cxxii. 5). In the reign of Jehoshaphat a more systematic and complete organisation of the judicial order seems to have been instituted; judges were placed in all the walled towns of Judah, and a central court of appeal, and for the adjudication of the weightier matters, was established at Jerusalem, composed of persons selected from among the priests, the Levites, and the chiefs of the families of Israel (2 Chron. xix. 5-11). This scheme, which had been disturbed by the captivity, was restored by Ezra (Ezra vii. 25). An appeal probably lay from the central court to the high-priest, but this is not quite certain. At a later date arose the court of the Sanhedrim, mentioned for the first time under Hyrcanus II. (Joseph. *Antiq.* xiv. 9. 3), which became the supreme tribunal of the Jews. Two lesser councils (*synedria*) are said by the Talmudical writers to have existed at Jerusalem, and in every town of 120 inhabitants one similar to these was found (Otho, *Lex. Rabbin. Philolog.* p. 723). It is probably to these lesser courts that our Lord alludes when he speaks of the *judgment* as distinguished from and subordinate to the *council* (Matt. v. 22). They were also intended in Matt. x. 17; Mark xiii. 9. [SANHEDRIM.]

The place where justice was administered was in the earlier times the gate of the town, by which publicity was secured (comp. Gen. xxiii. 10; Ruth iv. 1; 2 Kings vii. 3, etc.); hence the specification of 'gates' in Deut. xvi. 18. It would appear that it was usual to hear cases in the morning (Jer. xxi. 12); according to the Talmud, capital causes could not be heard during the night, they must be begun and ended within the day, nor could sentence be executed on the same day on which it was pro-

nounced (*Mishna, Tr. Sanhedrim*, iv. 1). The Talmud also says that a capital trial could not be conducted on the eve of the Sabbath or of a feast-day, because in case of its ending with the condemnation of the accused the sentence could not be executed next day without violating the Sabbath, nor could it be deferred, מפני עניני הדין, *propter afflictionem* (i.e. suspensionem) *judicii* (*Gemara* quoted by Cocceius, *Duo Tituli Thalmud. Sanhedrim et Maccoth*, etc., p. 36). In the early times judicial procedure was usually summary; each person pleaded his own cause (comp. Deut. i. 16; xxv. 1; 1 Kings iii. 16-28); the judge decided after hearing witnesses examined on oath [WITNESS; OATH]; and the sentence was usually carried into execution forthwith (Deut. xxv. 2; Josh. vii. 19-25), save when by appeal the case might be carried to a superior court.

The judge was bound by the most solemn sanctions to do equal justice between man and man, and to administer the law without respect of persons (Deut. i. 16, 17; xvi. 19; xxvii. 19, etc.). He was forbidden to receive gifts, to show favour to the rich, or pervert justice through pity for the poor, and to allow the opinion or will of the multitude to sway his decision (Deut. xvi. 19; Lev. xix. 15; Exod. xxiii. 2). As acting for God and under his authority, judges were to have regard only to what was right and just before Him (Deut. i. 17; xix. 17; 2 Chron. xix. 6). [See ADULTERY, TRIAL OF; ADVOCATE; DEPOSIT; LOAN; MOSES, LAWS OF; PROPERTY; PUNISHMENT, etc.]-W. L. A.

NAPIER, JOHN, Baron of Merchiston and the celebrated inventor of logarithms, 1550-1617. The exposition of the Revelation by this author is entitled, *A plain discovery of the whole of the Revelation of St. John, set down in two treatises; the one searching and proving the interpretation thereof; the other applying the same paraphrastically and historicallie to the text*, 1593. The work secured fame for Napier before his discovery of logarithms, which was announced in 1614. Before 1627, his exposition had been translated into French, and Dutch, and German, and more than one edition of it had been published in these foreign languages. It was entitled to this honour for its undoubted learning and research, though some of its calculations were so far from the mark as to fix the latter day between 1688 and 1700!-W. H. G.

PAR (פַּר), a term used principally of young bullocks, though sometimes also of the full-grown animal (Judg. vi. 25; Ps. lxxix. 32). It often appears with the adjunct בֶּקָרָה (Exod. xxix. 1; Lev. iv. 3, 14; Num. vii. 15, 17). It is almost always used of animals destined for sacrifice. From this may be explained Hos. xiv. 3: 'So will we pay bullocks our lips'-i.e. we will present our lips (= our thanksgivings) as sacrifices (see Pusey, *Minor Prophets*, in loc.). The LXX., however, seem to have used פַּר here, for they render by κατὰ, which undoubtedly gives a better meaning. As the bull was the emblem of strength *Par* is used metaphorically for a strong assailant (Ps. xxii. 12). In Jer. l. 27 *Parim* is supposed by some to denote *chiefs, princes*; by others it is taken to mean *the young men, the forces*= 'the chosen young men' of xlvi. 15. The form פַּרְהָ, a *heifer*, is used of a cow giving milk (Job xxi. 10; xviii. 6, 7),

and employed for purposes of draught (Hos. iv. 16). The 'heifers [A. V. kine] of Bashan' is an expression used of the women of Samaria to indicate their unrestrained habits and consequent lawlessness.—W. L. A.

PAR'OSH (פרעש, A. V. Flea, *Pulex irritans*, Class *aptera*, Linn.; *siphonaptera*, Latr.; *aphanaptera*, Kirby) occurs only 1 Sam. xxiv. 14; xxvi. 20, where David thus addresses his persecutor Saul at the cave of Adullam: 'After whom is the king of Israel come out? after whom dost thou pursue?—after a flea!'; 'The king of Israel is come out to seek a flea!' In both these passages our translation omits the force of the word פֶּרֶשׁ, which is found in the Hebrew of each: thus, 'to pursue after, to seek one or a single flea.' In the former passage the Septuagint preserves it—ψύλλον ἐνός; in the latter it omits all mention of the flea, and reads καθὼς καταδιώκει ὁ νυκτικῶραξ ἐν τοῖς ὄρεσι, 'as the owl hunteth on the mountains.' But another Greek version in the *Hexapla* reads ψύλλον ἔνα. The Vulgate preserves the word in both passages, *pulicem unum*. David's allusion to the flea displays great address. It is an appeal founded upon the immense disparity between Saul as the king of Israel, and himself as the poor contemptible object of the monarch's laborious pursuit. Hunting a flea is a comparison, in other ancient writings, for much labour expended to secure a worthless result.

The agility of the flea places it at the head of all the leaping insects, when its strength is considered in relation to its size, it being able to leap, unaided by wings, 200 times its own length. It was certainly with misplaced wit that Aristophanes (*Nub.* 145) endeavoured to ridicule Socrates for having measured ψύλλαν ὅπως ἄλλοιτο τοὺς αὐτῆς πόδας, 'how many of its own lengths, at one spring, a flea can hop.' Such is the happy change in the state of science that philosophers have since done this with impunity: they have also traced the interesting career of this insect from the round smooth egg deposited on the creatures that can afford food to the larva, falling down through the hair to the skin; the shining pearl-coloured active larva, feeding on the scurfy surface of the cuticle, rolling itself into a ball when disturbed; the cocoon or silken bag which it spins around itself; and its re-appearance as a perfect insect. It is more than likely that the flea, besides participating in the happiness of all animated nature, and supplying a link in the universal chain of being, as well as serving the incidental use of chastising uncleanness, may also, along with many other tribes of insects, serve the purpose of the scavenger, in clearing away some source of disease (see Cuvier's *Animal Kingdom*, Lond. 1834, art. 'Pulex'). Linnæus has assigned a personal service to mankind to some other insects, with which popular associations are even less pleasing, but which unerringly appear where the habits of mankind render their presence needful. Owing to the habits of the lower orders, fleas abound so profusely in Syria, especially during the spring, in the streets and dusty bazaars, that persons of condition always change their long dresses upon returning home. There is a popular saying in Palestine that 'the king of the fleas keeps his court at Tiberias'; though many other places in that region might dispute the distinction with that town (Kitto's *Physical History of Palestine*, p. 421).—J. F. D.

VOL. III.

PATHROS (פתרוס), a proper name always grouped by the sacred writers with Egypt. In the Sept. and Vulg. versions the word is not always rendered in the same way. In Is. xi. 11 the LXX. read Βαβυλωνίας, and the Vulg. *Phetros*. In Jer. xlv. 1 and 15, Παθούρης; *Phatures*. In Ezek. xxix. 14 and xxx. 14, Φαθούρης; Alex. παθούρης; *Phatures*. The plural of Pathros is *Pathrusim*, which occurs in Gen. x. 14 and 1 Chron. i. 12 as the name of a Mizraite tribe (פתרוסים; Πατροσωνιεμ; *Phetrusim*). The origin of the name is here indicated. The Mizraim were the descendants of Masor (מצור), dual (מצורים), a son of Ham (Gen. x. 6); and the Pathrusim were descendants of Pathros son of Masor (13, 14). The name Pathros was given to the country colonised by the tribe, and may perhaps have been, like some other names of patriarchs, descriptive of the country where they settled. Gesenius derives the word from the Egyptian Π-ΕΤ-ΡHC, *quod meridie est*; it is allied to the modern Coptic ⲡⲉⲣⲏⲥ, and the Arabic ميسريس, the name given in Egypt to the south wind (Freitag, *Lex. Arab.*). The Egyptians also use the form ΠΑΤΟΥΡHC, or ΠΑΘΟΥΡHC, in the same sense; and hence one of the provinces of Thebais was called *Phaturites* (Gesenius, *Thesaurus*, p. 1141). This is identical with the word παθούρης by which the translators of the Sept. render Pathros; and it thus affords a clue to the position of that country. Gesenius' etymology of the word has recently been questioned by Mr. Poole (Smith's *Dict. of Bible*, s. v.), but his arguments do not appear convincing.

Various theories have been advanced regarding the country here called Pathros. Some would identify it with Parthia (Calvin); some with Arabia Petrea (Forerius, *Comm. in Jesai.*); some with Pharuris in Ethiopia (Grotius). It is necessary, therefore, critically to examine those passages in Scripture in which the name occurs. Mizraim the son of Ham colonised Egypt and gave it a name which it retains to the present day in the Arabic form *Misr* [EGYPT; MIZRAIM]. Isaiah appears to distinguish Pathros from Mizraim (*l. c.*); but Jeremiah evidently includes it in the latter:—'All the people that dwelt in the land of Mizraim, in Pathros,' etc. (xlv. 15); while from the words of Ezekiel it might be inferred that Pathros was only another name for Mizraim: 'I will bring again the captivity of Egypt (Mizraim), and I will cause them to return into the land of Pathros, into the land of their birth' xxix. 14). Jerome translates this passage as follows: 'Et reducam captivitatem Ægypti, et collocabo eos in terra Phatures, in terra natiuitatis sue;' and comments upon it thus: 'Reducetur in antiquum solum universa captivitas, et collocabitur in urbe metropoli, quæ appellatur Phatures, ubi orta est et unde profecta est.' Jerome thus appears to have thought that Pathros was the earliest seat of the Egyptian nation. Herodotus also says that in ancient times 'Thebais bore the name of Egypt' (ii. 15); and existing monuments show that Upper Egypt, or Thebais, was inhabited at an earlier period than Lower Egypt. Now from all this it may be inferred that Mizraim was the general or collective name of a

great Hamitic nation, and was given to the whole country colonised by them; and that Pathros was a section or province of that country occupied by the subtribe of Pathrusim.

It is not directly stated however in what part of Mizraim Pathros was situated, and ancient writers differ widely upon this point. The Jerusalem Targum renders Pathrusim by *Pelusai*—that is, Lower Egypt. Hiller derives the word from פֶּלֶאֶת רֶם, *angulus vorationis*, and says the Delta is meant (Michaelis, *Spicileg. Geogr. Hebr.* p. 272). The Targum of pseudo-Jonathan reads נְסִינְתָּי, which, according to Bochart, also signifies the Delta (*Opera*, i. 274). But none of these theories agree with the Scripture notices, nor with the meaning of the name. The most probable opinion is that of Bochart, who affirms that Pathros is identical with the province of Thebais, which is sometimes spoken of as being in Egypt, and sometimes as distinct from it (Pliny, xviii. 18; Cassian. i. 3); just as in one part of Scripture Pathros appears to be located in Egypt, while in another it is distinguished from it (*l. c.*) Bochart suggests that as the name Mizraim is a dual form it was intended to indicate a twofold country—namely Lower Egypt, which is Mizraim proper; and Upper Egypt, or Thebais. This seems highly probable; for though Mizraim is sometimes used to denote one of the divisions only (as in Is. *l. c.*); yet it is more frequently given to the whole country. Ptolemy mentions an inland town, near Thebes, called *Pathyris* (sometimes written *Tathyris*), which seems to be the same as Pathros (iv. 5, 69); and Pliny says: 'The upper part of Egypt, which borders on Æthiopia, is called Thebais. The region is divided into prefectures of towns, usually termed nomes;' and among these he mentions *Phaturitis*, which corresponds to πα-θοῦρης, the LXX. rendering of Pathros (*Hist. Nat.* v. 9). The incidental notices of the sacred writers tend to confirm this view. In general, when giving lists of places, they group them in geographical order; and so Isaiah has 'Mizraim, Pathros, Cush' (Ethiopia)—advancing from north to south. Jeremiah observes a similar order (xlv. 1).

It may be safely concluded, therefore, that Pathros was that country which by classic geographers is usually called Thebais. Though sometimes included under the more general name Masor, because it was colonised by a tribe of the Mizraim, yet its magnitude and independence caused it to be generally spoken of as a distinct country; and hence the apparent discrepancy in the notices of the sacred writers. It would seem also, from traditional records and existing monuments, that Thebais was the first part of Egypt colonised, and that it was the birth-place of power, and civilisation, and art, in that country; and hence the prophet Ezekiel refers to Pathros as the origin of the Egyptian nation. Thebais was a strip of fertile valley forming the basin of the Nile; shut in on the east and west by deserts, and extending from the Delta on the north to Philæ on the south. The prophet Isaiah, therefore, appropriately places Pathros between Mizraim and Cush, or Lower Egypt and Ethiopia' (Kalisch on *Gen.* x.) See for fuller information Michaelis, *Spicileg.* i. 271-74; Jablonski, *Opuscula*, i. 198, ii. 122; Roediger, *Encyc. Germ.* xiii. 312; and art. EGYPT.—J. L. P.

PERSIAN VERSIONS. The Bible seems to have been translated at an early period into the

Persian language. Both Chrysostom (*Second Hom. on John*) and Theodoret (*De curand. Græc. Affect.*) speak of a Persian translation; and, according to Maimonides, the Pentateuch was translated many centuries before Mohammed into this language (Zunz's *Gottesdienstlichen Vorträge*, p. 9, note a). A Persian version of the Pentateuch was first printed at Constantinople, in Hebrew characters, A. D. 1546, as part of a Polyglott Pentateuch, and afterwards inserted by Walton in the London Polyglott, in the proper Persian character. It was made after the time of the false prophet, and must have been later than the 8th century. The text follows the Hebrew very closely, according to the Masoretic recension, retaining many of the original terms, from the translator's inability to render them into Persian. Both Onkelos's and Saadia's versions appear to have been consulted by the author.

If credit is to be given to the inscriptions, it was made by Jacob, the son of Joseph Tawus, for the use of the Persian Jews. Critics are not agreed about the meaning of Tus or Tawus. Rosenmüller (*De Vers. Pentat. Pers.* Lips. 1813, 4to) assigns it to the 9th century; Lorsbach (*Jena Allgem. Lit. Zeit.* 1816, No. 58), with less probability, brings it down to the 16th. Walton, in his *Prolegomena* (ed. Dathe, p. 694), speaks of two MS. copies of Psalms which he had; but both were very recent, and taken from the Vulgate, not the Hebrew. Hassler discovered an immediate version of Solomon's writings existing in Parisian MSS. (*Studien und Kritiken* for 1829, p. 469, et seq.)

There are two Persian versions of the Gospels, one of which is printed in the London Polyglott, from a MS. belonging to Pococke, written in the year of our Lord 1341. Its source is the *Peshito*, as internal evidence abundantly shows. The other version was made from the original Greek. Wheloc, professor of Arabic in the University of Cambridge, began to print it with a Latin translation. After his death it was edited by Pierson, London, 1652-57. The editors made use of the Syro-Persian MS. of the Gospels from which that in the Polyglott was printed. In consequence of the confusion arising from their procedure, the version is of little use either in the criticism or interpretation of the text.—S. D.

PESARO, AARON DE, was born about the middle of the 16th century at Pesaro in Italy, whence he derived his name. He immortalised his name by the compilation of an elaborate work entitled תְּלִדֹת אַהֲרֹן, *the Generations of Aaron*, after Num. iii. 11, which is an index of all the passages of the Hebrew Bible cited and explained in the Babylonian Talmud, giving the treatises, chapters, pages, and columns wherein these quotations are to be found. This stupendous work, which is indispensable to those who are desirous to see what principles of interpretation obtained in the days of Christ, and how the Hebrew Scriptures were explained in the ancient Jewish church, was first published in Freiburg 1583-84. The part which treats on the Pentateuch and the five Megilloth has frequently been printed with the Hebrew Pentateuch and the Rabbinic commentaries, and is given in the excellent edition of the Pentateuch with Chaldee paraphrases, the commentaries of Rashi, Nachmanides, Ibn Ezra, Rashbam, Seforno, Baal Ha-Turim, etc. etc., 5 vols. Vienna 1859. Comp. Steinschneider, *Catalogus Libr. Hebr. in*

*Bibliotheca Bodleiana*, col. 725; Fürst, *Bibliotheca Judaica*, iii. 79.—C. D. G.

STONES, PRECIOUS (אֲבֹן יָקָר, called also אֲבֹן חַיִּים, stone of grace or beauty, and אֲבֹן נֶחֱמֶה, stone of delight or elegance, sometimes simply אֲבֹן = stone, κατ' ἐξοχήν; LXX. λίθος χρηστός, λ. ἐκλεκτός). The precious stones mentioned in the Bible bear the names—Odem, Pitdah, Bareqeth, Nophech, Saphir, Yahalom, Leshem, Shebo, Achlamah, Tarshish, Shoham, Yashpeh, Kadkod, Shamir, Ekdach, Chrysoprasus, Chalcedony, Sardonyx. [See the articles on these in their proper places in this work.]

These gems must have been imported by the Hebrews from other countries, for Palestine is not known to contain any precious stones. They were brought from Arabia, Ethiopia, and India (1 Kings x. 2, 10; Ezek. xxvii. 22), probably by Phœnician traders. The cutting, setting, and engraving of gems was practised as an art among the Hebrews, and held in honour (Exod. xxxv. 33); that they owed their skill in this to their residence in Egypt is probable, but that it was known among them before this is evident from Gen. xxxviii. 18). By the Jews, as by all Asiatic peoples, jewels were much desired and esteemed. They formed a necessary ornament of kings, priests, and eminent persons (2 Sam. xii. 30; Ezek. xxviii. 13; Exod. xxviii. 17, ff.; xxxix. 10). They were used also for rings (Song v. 14), and for the decoration of sacred edifices (1 Chron. xxix. 2), and of furniture (Judith x. 21). The Targumist (Esther i.), to exalt the glory of Ahasuerus, says that he produced at his feast the treasures of gold, pearls, beryls, and emeralds which Cyrus had found when he captured Babylon, as many as 680 chestsful. From the esteem in which they were held, and their native qualities, precious stones came to be symbolical of beauty, grace, worth, and durability, and so they are spoken of in the Bible (Song v. 14; Is. liv. 11, 12; Lam. iv. 7; Rev. iv. 3, xxi. 10-21).

ZAMORA, ALFONSO DE (אַלְפֹנְסוֹ דִּי צִמּוֹרָה), the celebrated coadjutor in the Complutensian Polyglott, was born of Jewish parents, circa 1460, at Zamora, whence he derived his name. His profound knowledge of Hebrew and extensive learning in other departments of literature raised him to the dignity of Rabbi of the Jewish community in his native place. This office he exercised in 1492, when, upon the ignominious expulsion of the Jews from Spain by Ferdinand and Isabella, he embraced Christianity. Both his previous position and great learning attracted the notice of Cardinal Ximenes, who appointed Zamora professor of Hebrew in his newly-founded university of Alcalá de Henares, and afterwards selected him as one of the editors of the Polyglott. To this work he contributed—(1.) A vocabulary of the

Hebrew and Chaldee roots of the O. T., entitled *Vocabularium omnium primitivorum Hebraicorum et Chaldaicorum*; to which is added an *Index vocum Latinarum*, or index of the Latin words whereby the Hebrew and Chaldee words in the foregoing vocabulary are rendered. (2.) *Interpretatio Hebraicorum, Chaldaicorum, et Græcorum Nominum V. et N. Testamenti*. (3.) *Catalogus eorum, quæ in utroque Testamento aliter scripta sunt vitio scriptorum, quam in Hebræo et Græco, in quibusdam Bibliis antiquis*. (4.) *Introductiones Grammaticæ Hebraicæ*. These works are comprised in the sixth volume of the Polyglott. He also supplied (5.) The Latin translation of the so-called Chaldee paraphrase of Onkelos given in the first volume of this Polyglott. This Latin version, which has been reprinted at Antwerp 1535, is inserted with some emendations by Arias Montanus in the Antwerp Polyglott 1572, and is adapted with some emendations by Samuel Clerk in Walton's Polyglott [ONKELOS]. Besides these contributions to the Complutensian Bible, he wrote (6.) *Artis Grammaticæ Hebraicæ Introductio*, being a concise and lucid Hebrew Grammar, dedicated to Alfonso de Fonseca, Bishop of Toledo, Alcalá 1526. (7.) *Tractatus de vera Orthographia Hebraica*, Alcalá 1526. (8.) *Vocabulorum brevis omnium primitivorum Hebraicorum*, Alcalá 1526. (9.) A Latin translation of the Chaldee paraphrase of the Prophets, which is printed with emendations by Arias Montanus in the Antwerp Polyglott 1572. (10.) A Latin translation of the Chaldee paraphrase of Job, Proverbs, Song of Songs, and Lamentations, also inserted in the same Polyglott, with emendations by Montanus; and (11.) A Latin version of the Chaldee paraphrase of Ecclesiastes, printed in Pineda's elaborate commentary on this book, Antwerp 1620 [ECCLESIASTES.] Zamora died in 1531. Comp. Wolf, *Bibliotheca Hebræa*, i. 193; iii. 125; Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, 733; Fürst, *Bibliotheca Judaica*, iii. 542.—C. D. G.

ZEMACH, i. b. PALTOI, also called MAR ZEMACH, was Gaon or rector of the celebrated college at Pumbedita (from A.D. 872 to 890), where the successors of the ancient Scribes or the Doctors of the Law were trained [SCRIBES]. He has the honour of being the first who compiled an Aramaic Lexicon entitled *Aruch* (עֲרֻךְ) = *Arrangement*—i. e. of words in alphabetical order. This Lexicon was unknown to R. Nathan b. Jehiel, the immortal author of the celebrated Aramaic Lexicon which is now used by almost all students of the Talmud, Midrashim, and the Chaldee paraphrases of the Bible, and which is likewise called *Aruch*. [NATHAN.] The first who mentioned and made considerable use of Zemach's Lexicon was R. Saccuto, the author of the famous chronicle entitled *Zuchassin*, or the *Book of Genealogies* (סֵפֶר יְהוֹסִיָּן) [SACCUTO], who also compiled a similar work. Zemach's Lexicon, however, has not as yet come to light. The excerpts from Zemach's Lexicon made by R. Saccuto in his chronicle were collected by Rapoport, and published in note 11 to his biography of R. Nathan in *The Hebrew Essays and Reviews*, called *Bikkure Ha-Itim*, vol. xi. p. 81, etc., Vienna 1830. Other excerpts made by Saccuto in his unpublished Aramaic Lexicon have been published by Geiger in the *Zeitschrift der Deutschen morgenländischen Gesellschaft*, vol. xii. p. 144,

Leipzig 1858. Zemach is also supposed to be the author of the chronological account of the *Tanaim*, Teachers of the Law, or the Elders (*πρεσβύτεροι*), who began with Antigonus of Soho, B.C. 200, and terminated with Gamaliel III. b. Jehudah I, A.D. 200; as well as the *Amoraim* or later Doctors of the Law [*SCRIBES*], entitled

*the Order of the Tanaim and Amoraim* (סדר תנאים ואמוראים). This work has been edited by Luzzato in *The Hebrew Essays and Reviews*, entitled *Kerem Chemed*, vol. iv. p. 184, etc., Prague 1839. Comp. Graetz, *Geschichte der Juden*, v. 278, etc., Magdeburg 1860; Fürst, *Bibliotheca Judaica*, iii. 549.—C. D. G.

## ADDITIONS TO ARTICLES.

### CRITICISM, BIBLICAL (vol. i. p. 588).

Tischendorf has commenced to issue the eighth edition of his *Greek Testament* on the same plan as the seventh, and in the same form. Only two parts are issued as yet. Compared with its immediate predecessor, it is much improved.

### MANUSCRIPTS, BIBLICAL (vol. iii. p. 57, col. 1, l. 16).

Neubauer has printed the result of his examination—*Aus der Petersburger Bibliothek. Beiträge und Dokumente zur Geschichte des Karäerthums und der Karäischen Literature*, 1866. Only a small portion of the little volume is about Bible MSS.; and that has relation merely to the inscriptions respecting their dates. It does not appear that he collated any. The oldest is a roll containing Deuteronomy, No. 6, A.D. 489. Other rolls are dated 639 (No. 8), 764 (No. 9), 781 (13), 789 (14), 798 (15), 908 (12), 939 (7), 940 (10). Other MSS. are dated 888 (No. 55) and 923 (77), each containing Leviticus. No. 59 contains the last prophets, dated 921; No. 72, containing the Psalms and Job, is dated 929; while No. 89, containing the first prophets, is dated 933. No. 81, containing the Chronicles, is dated 957; No. 86, having the end of the Pentateuch, dates 959; No. 52, containing the last prophets, dates 1102; and No. 110, containing the Pentateuch, dates 1038. In addition to these notices, a few others relating to the dates of the same St. Petersburg MSS. are contained in Chwolson's *Achtzehn Hebräische Grabschriften aus der Krim*, printed in the *Memoires de l'Academie imperiale des sciences de St. Petersburg*, 1865. The object of the latter scholar was not the examination of MSS. It is disappointing to the critic to perceive the slender publication just issued by Neubauer, and his incompetency to the task of proper collation. Most of the Karaite MSS. are synagogue rolls, and therefore without vowels or accents.

In the year 1839, in consequence of a letter addressed by the governor-general of Odessa, Prince Woronzoff, to the governor of Sympheropol, respecting the Karaite Jews, Abraham Firkowitsch repaired to Tschufutkale, the seat of a very old Karaite community, as well as to other places, and found fifty-one Bible MSS., which, together with fifty-nine copies of inscriptions on gravestones, he brought to Odessa. It was impossible to doubt the genuineness of these documents, especially as

the character of the man who collected them was above suspicion. But there was an idea in some minds that the copies he made might have been incorrect, because the dates were more ancient than any hitherto known. In consequence of this, Dr. Stern was despatched by the Odessa Archaeological Society to the places visited by Firkowitsch, in order to verify the copies and subject the collection, as far as he could, to a careful examination. The result of his investigation went to confirm the general accuracy of the copies. Stern added to the collection some very old MSS., and discovered seven other ancient inscriptions on gravestones in the Jewish cemetery at Tschufutkale. Encouraged by this fresh addition, Firkowitsch, with his nephew Gabriel, undertook repeated journeys through those parts of the Crimea where Karaite communities and old cemeteries existed, gathering up whatever he could find in the shape of ancient MSS., and copying gravestones in Solchat, Kassa, Mangup, and Eupatoria. The industry of the travellers may be judged of by the fact, that when they went to St. Petersburg in 1853 they had about 700 copies of inscriptions on old graves, and 150 notices of dates contained in old Bible MSS. which they had discovered.

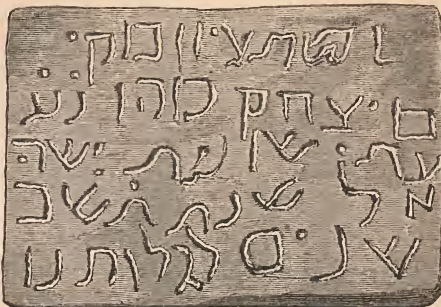

In 1856, when about to set forth on a similar mission, they were advised by several learned men to make facsimiles in paper of the most important inscriptions on tombstones, as a guarantee for the existence of the originals, in the interest of palæography. Following this advice, they returned with 100 facsimiles of inscriptions on graves belonging to different centuries. The nature and contents of these put the idea of falsification out of the question. It would have required fine tact, and an amount of historical, geographical, and palæographical knowledge which no Crimean Karaite could possess, to commit such forgeries. The acute Geiger has not ventured to impugn their genuineness; and Chwolson, who has all along watched the progress of these discoveries with interest, maintains that they cannot be forged. Indeed the difficulties in the way of such an hypothesis are insuperable. The latter scholar has just published a dissertation upon them, bringing out results which are new, important, and suggestive. If firmly established, they will enlarge, modify, and correct many opinions which have hitherto passed among scholars unchallenged.

The eighteen inscriptions on tombs given by Chwolson are all dated, and belong to the follow-

ing years of our era :—6, 30, 89, 179, 197, 262, 305, 369, 625, 670, 678, 719, 807, 834, 898, 937, 958, and 960. It is remarkable to see no less than three belonging to the first century. In the first eight, as they stand in Chwolson's list, three eras are mentioned—*after the exile, after the creation, and the era of the Matararchians*; most of them with only one of the dates, some with two. How then are the dates to be read? After giving the explanation of the three eras in question proposed by Firkowitsch, he examines them in a different method, and arrives at the same result, which is, that *the era of the exile* is 696 B.C.—*i.e.* the exile of the ten tribes; not 586 B.C. when Jerusalem was taken by Nebuchadnezzar; nor 69, when Jerusalem was taken by Titus. The era of the Matararchians (*i.e.* the Jews of Tamataarcha, now called Taman, near the ancient Phanagoria) corresponds to the date now usual among the Jews *after the creation*, to which 240 should be added to correspond to the Christian year; while the era *after the creation*, in these inscriptions, differs from the latter by 151 years, so that only 89 should be added to it to find the Christian year. These conclusions seem to us to be settled on solid grounds by Professor Chwolson; and they are confirmed by the dates on several old Karaite MSS., as he is careful to show.

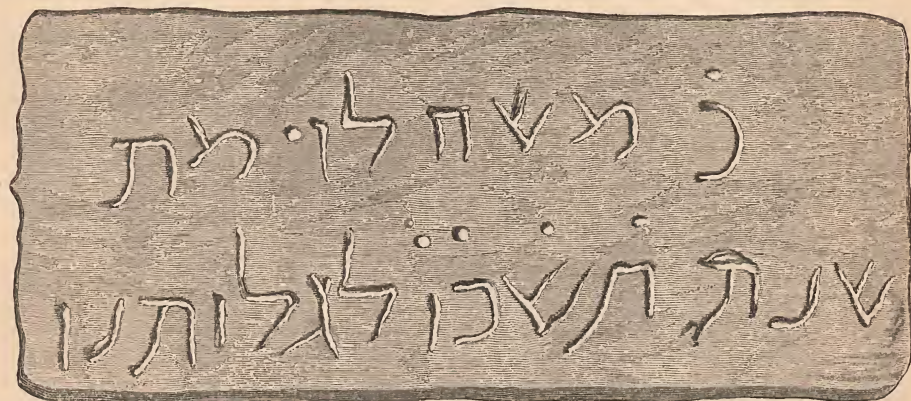

The following are the three oldest :—

No. 1.

זאת ציון בוקי  
בן יצחק כהן נע  
עת ישועת ישראל  
אל שנת תשבו  
שנים לגלותנו

'This is the grave of Bûki, son of Isaac, the priest; may his rest be in Paradise! [died] at the time of the deliverance of Israel, in the year 702 after our captivity' (*i.e.* A.D. 6).

No. 2.

ז' משה לו' מת  
שנת תשבו לגלותנו

'Rabbi Moses Levi died in the year 726 after our exile' (A.D. 30).

No. 3.

זדוק הלוי בן משה  
מת דא ליציה  
תשפה לגלותנו

'Zadok the Levite, son of Moses, died 4000 after the creation, 785 after our exile' (89 A.D.)

Dots over letters are marks of abbreviation or of numerals. In No. 1 נע is for נוחו ערך, or נפשו ערך, or נשמתו ערך. The word ישראל is divided between two lines; and ציון means *grave* (see Zunz's *Zur Geschichte und Literatur*, p. 393).

No. 2. ז' is for רב or רבי.

No. 3. א is for אלפים; ליציה for ליציה.

The era 'after our exile' occurs four times in grave-inscriptions, and twelve times in the inscriptions of MSS.; first on the old tombstone which dates A.D. 6, and last in the inscription of No. 87, belonging to the year 1059 A.D. The localities in which the era was used are, besides the tomb-inscriptions in Tschufutkale, the following :—*Matararcha*, in the year 489 A.D.; *Kol-Kat*, in the inscription of a fragmentary Pentateuch-roll, 585 A.D.; *Shemacha*, in Shirwan, A.D. 604, in two inscriptions; *Tschufutkale*, according to two inscriptions of 639 and 764 A.D. respectively; *Kerim*,

according to an inscription of 789; *Kaffa*, after an inscription of 798 A.D.; a locality on the Kur, in Caucasus, according to two inscriptions of 848 A.D.; *Kertsch*, according to a document of Abraham Ben Simchah, of 986 A.D.; *Sarkel* (perhaps) in an inscription of 1004 A.D.; *Jehud-Kal*, near Derbend, A.D. 1059. In some of these MS. inscriptions, the old Crimean, the Matarchian, or the Selucidian era, occurs in addition. The enumeration given shows that the era of *the exile* was used not only in the Crimea, but also in the Caucasus, and perhaps at the mouth of the Don.

Various interesting questions arise in connection with these Crimean discoveries of old MSS. and tomb-inscriptions.

*First*, The inquiry about the locality of the ten tribes seems to be brought very near its settlement. Caucasian and Crimean Jews, even the inhabitants of Sarkel at the mouth of the Don, dated 'after our banishment.' Hence the posterity of the exiles who were carried away at the breaking up of the kingdom of Israel inhabited those regions. Nor is it difficult to conjecture how they came there. They spread out of the lands of their first settlement at different times, and from various causes, into the regions of the East: from Armenia, probably, to the Caucasus; thence to the Crimea and to other south-eastern parts of European Russia. Thus the existing remnant of the ten tribes should not be looked for in one place. They are scattered over various countries of the East. It may be also that some are in the West, having come thither over Asia Minor. The Karaite Jews now in the Crimea are genuine descendants of the ten tribes, who have not intermingled with neighbouring non-Semitic peoples so as to lose their identity.

*Secondly*, We see that the modern square Hebrew character was in use among the Jews a considerable time before Christ. Whether it was current *several centuries* before then, as Chwolson asserts, may be doubted, though Nöldeke puts it before the Maccabean period. The origin, development, and age of this character have been recently discussed by De Vogüé and De Saulcy on the basis of tomb-inscriptions found at Jerusalem; but the views of the latter must be modified by these Karaite inscriptions. There can be no doubt that the square character was common in many countries at the time of Christ. The letter *yod* is a simple dot, explaining the reference of Christ, 'one *tot* or *tittle*.'

*Thirdly*, The Crimean Jews were in almost perpetual intercourse with the Jews of other lands, and were never without opportunities of knowing the ideas and doctrines prevalent in the central seats of Judaism.

*Fourthly*, It was not uncommon for these ante-Karaite Jews to put words and phrases on the tombs of the dead which imply a belief in the immortality of the soul. Thus *יְיָ*, in an abridged form, is not unusual, meaning, 'May his rest (or his soul) be in Paradise.' The expression occurs even in the inscription A.D. 6. The belief must, therefore, have been general among the Jews of the day. If so, it was current in Palestine at an earlier period, and existed at least in the Maccabean time, if it did not then originate. We cannot follow Chwolson in putting it so far back as from four to five centuries before Christ; nor do we agree with him in the conclusion he draws from the book of

Ecclesiastes respecting it. But he has some pertinent and just remarks on Renan, who has not scrupled to assert that the doctrine came from the Indo-European race to the Jews.

*Fifthly*, If the conclusion of Chwolson be well founded as to the era of the captivity—namely 696 B.C.—an important date is gained for Assyrian and Babylonian chronology, as well as the Egyptian. It has also a bearing upon the usual Hebrew chronology and the numbers in the Bible. From the old Crimean era being already used A.D. 89, we see that the Bible MSS. of that early period had the numbers of the present Hebrew text, not those of the Septuagint. And if the descendants of the ten tribes had the same era from the creation of the world as the Masoretic copies at that early period, there is a strong presumption in favour of the antiquity of the present text. It is not likely that the Palestinian Jews would have curtailed the numbers, in the first century, in order to differ from the LXX. Nor indeed did the time suffice for such falsification. The long chronology of Josephus and the Septuagint rests on a feeble basis than that of the Masoretic text.

*Sixthly*, Some objections to the date of these inscriptions may be anticipated from Rabbinical Jews. Indeed we know that one at least has been made by that eminent scholar Zunz, to whom several of them were shown by Dr. Mandelstamm in Berlin. The titles *rabbi* and *priest* occur; consequently, as Zunz asserts, they cannot be earlier than the eighth century of the Christian era. But surely such reasoning is one-sided. It may be that *rabbi* or *priest* is not found on tombstones among the Rabbinical Jews prior to the eighth century; but that is hardly a valid argument against another usage among ante-Karaite Jews. Is it logical to argue from what is already known to what has been hitherto unknown, and to conclude that the subject admits of no new or additional light? The title *rabbi* was in use in the time of Christ. What prevented the Jews from putting it on gravestones from that onward? It is also said that the names Moses and Levi could not have been on tombstones there in the first century; to which the answer is best put as an interrogation, Why?

The important contribution of Chwolson suggests the idea that, after all our expectations, important Karaite variations from the Masoretic text need not be expected. The Karaites were in contact with Jews from Judæa at a pretty early period. Numbers of the latter found their way into the Crimea from time to time. It is now known that three teachers, whom Fürst calls 'the three fathers of the Karaites,' were sent as missionaries by the Jews in Jerusalem to preach Rabbinical doctrines in the Crimea, which they did with success. This was about 957 A.D. These Rabbinical missionaries—Ephraim, Elisha, and Chanukah—punctuated Bible MSS. in the Crimea, spread their doctrines in Kertsch, Onchat, Solchat, and Kaffa; and converted two hundred families to Rabbanism in those places. Such facts seem to lead to the inference that the Karaite MSS. may have been conformed to the Rabbinical type. Happily, however, a number of these Bible MSS. are of a date prior to the 10th century. One of them is even as old as A.D. 489. Were they not rolls, which they generally are, we might have a larger basis for a critical knowledge of that peculiar punctuation and accentuation called the Assyrian and Babylonian, in con-

tradistinction to the Masoretic, about which Pinsker, Olshausen, and others have written. See *Achtzehn Hebräische Grabschriften aus der Krim*, von Dr. Chwolson, with nine plates, folio, St. Petersburg 1865; and the *Saturday Review* for May 5, 1866.

The little volume of Neubauer (*Aus der Petersburger Bibliothek. Beiträge und Dokumente zur Geschichte des Karaerthums und der Karaischer Literatur*, 1866) is disappointing. The author did not collate the Karaite MSS. in St. Petersburg. We rejoice to learn, however, that Chwolson is cataloguing these documents. If he would collate them properly, he would confer a permanent boon on the literary world, for we fear that nothing need be expected from Neubauer or Pinner.—S. D.

TALMUD (vol. iii. p. 944, col. 2, l. 13.)

The latest edition is that of A. Salomon, Berlin 1863, 1864, in thin volumes imperial 8vo, of which eight have appeared. Great activity in relation to the Talmud is observable at the present time, since five editions of it are in the press.

(Vol. iii. p. 944, col. 2, l. 34, after mention of Buxtorf's Lexicon.)

A new edition of this work has commenced, with additions and corrections, by Fischer and Gelbe, Leipzig 1866, small folio, to be issued in 25 parts, each containing 40 pages. One fasciculus has appeared.

# CONTENTS OF VOLUME III.

KEY :—General subjects in ordinary Roman type. Commentators and Critics in *Italics*.

a Signifies *first* or left-hand column ; b, *second* or right.

MAACHAH, 1 a	Malachi, 34 b	Margarites, 67 a	Meals, 118 a
